The degree to which the financial information included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting policies and practices, the Companies Act, 2013 and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting policies and practices on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited. Prospective investors should review the accounting policies applied in the preparation of the Restated Standalone Financial Statements and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar.

In this Draft Red Herring Prospectus, any discrepancies in any table between the total and the sums of the amounts listed are due to rounding off. All figures in decimals have been rounded off to the second decimal and all percentage figures have been rounded off to two decimal places. In certain instances, discrepancies in any table between the sums of the amounts listed in the table and totals are due to rounding off.

Further, any figures sourced from third party industry sources may be rounded off to other than to the second decimal to conform to their respective sources, such figures appear in this Draft Red Herring Prospectus as rounded-off to such number of decimal points as provided in such respective sources.

Any percentage amounts, as set forth in “*Risk Factors*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” on pages 27, 132 and 227, respectively, and elsewhere in this Draft Red Herring Prospectus, unless otherwise stated or context requires otherwise, have been derived from Restated Standalone Financial Statements or non-GAAP financial measures as described below.

Further, these Non-GAAP Measures and other statistical and other information relating to operations and financial performance should not be considered in isolation or construed as an alternative to cash flows, profit/ (loss) for the years/ period or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities derived in accordance with Ind AS, Indian GAAP, IFRS or US GAAP. In addition, these Non-GAAP Measures and other statistical and other information relating to operations and financial performance, are not standardised terms and may not be computed on the basis of any standard methodology that is applicable across the industry and therefore, may not be comparable to financial measures of similar nomenclature that may be computed and presented by other companies and are not measures of operating performance or liquidity defined by Ind AS and may not be comparable to similarly titled measures presented by other companies. Further, they may have limited utility as a comparative measure. ### SECTION III – RISK FACTORS

**1. *We derive a significant portion of our revenue from operations from domestic sales which exposes us to risks specific to Indian geographies and market***

Our Company derived a significant portion of our revenue from operations from domestic sales from our customers for the nine months period ended December 31, 2024, Financial Year ended March 31, 2024, 2023 and 2022 as set out below:

Particulars	Nine months period ended December 31, 2024		For the year ended March 31, 2024		For the year ended March 31, 2023		For the year ended March 31, 2022	
	Revenue (₹ in Lakhs)	% of revenue from operations from domestic sales	Revenue (₹ in Lakhs)	% of revenue from operations	Revenue (₹ in Lakhs)	% of revenue from operations	Revenue (₹ in Lakhs)	% of revenue from operations
Domestic	6,152.59	80.14%	5,093.48	67.00 %	3,271.52	72.00%	3,834.49	100%
Exports	1,524.91	19.86%	2,528.57	33.00 %	1,263.57	28.00%	-	-
<b>Total</b>	<b>7,677.50</b>	<b>100.00 %</b>	<b>7,622.05</b>	<b>100.00 %</b>	<b>4,535.10</b>	<b>100.00 %</b>	<b>3,834.49</b>	<b>100.00 %</b>

Historically, we derived significant proportion of our revenue from operations from domestic sales, with a limited proportion of revenue derived from exports. This dependence on domestic sales exposes us to risks associated with regional economic fluctuations, changes in domestic regulations and market conditions specific to our country. A downturn in the domestic economy, increased competition or shifts in local demand could adversely impact on our financial performance. Further, a limited international exposure may prevent us from capitalising on growth opportunities in global markets and diversifying risks associated with reliance on a single market. As a result, our revenue growth could be constrained by domestic market conditions, which may also limit our ability to expand and diversify our customer base.

**2. *Our Company derive revenue from diversified customers. Our inability to acquire new customers or loss of all or a substantial portion to any of our major customers, for any reason and/or continued reduction of the business from them, could have a material adverse impact on our business, results of operations, cash flows and financial condition.***

Our Company derive revenues from diversified customers. Based on financial statements for the nine months period ended December 31, 2024, financial years ended March 31, 2024, March 31, 2023, and March 31, 2022, our revenue from top five (5) and top ten (10) customers are as follows:

Sr No.	Particulars	Nine months ended December 31, 2024	FY 2023-24	FY 2022-23	FY 2021-22
1.	Revenue from top five (5) customers	6048.75	4491.44	3637.85	3444.95
2.	Revenue from top ten (10) customers	6,730.58	5589.41	3982.84	3786.87

Sr No.	Particulars	Nine months ended December 31, 2024	FY 2023-24	FY 2022-23	FY 2021-22
1.	% of total revenue from top five (5) customers	78.79	58.93	76.32	83.63
2.	% of total revenue from top ten (10) customers	87.67	73.33	83.55	91.93

Our Company may continue to derive a significant portion of our revenues from key customers. Although the composition and mix up of our top customers varies from year to year, if any decision by one or all our customers to cease or significantly reduce their business with us, our revenue could decline, which may have a material adverse effect on our business, results of operations, cash flows and financial condition.

Although, we have not entered into legally binding agreements or any formal arrangements with them, we have conducted substantial business with these customers in the past and have maintained strong and long-term relationships. Our business is dependent on our continuing relationship with such customers, the quality of our products and our ability to deliver on their orders and quotes, and there can be no assurance that such customers will continue to do business with us in the future on commercially acceptable terms or at all. While we have developed valued relationships with certain of our customers in the normal course of business, there can be no assurance that our customers in the past or our newly acquired customers will continue to place similar orders with us in the future.

3. ***Our Company is dependent on limited number of suppliers for supply of raw materials and we have not made any long-term supply arrangement or agreement with our suppliers. In an eventuality where our suppliers are unable to deliver us the required materials, at a competitive price, in a time-bound manner it may have a material adverse effect on our business operations and profitability. The majority of our raw materials are sourced from few key suppliers. Discontinuation of the operations of such suppliers may adversely affect our ability to source raw materials at a competitive price***

We are dependent on third party suppliers for the procurement of potatoes which are integral to our operations in the sector, however, we have not entered into any long-term supply arrangement or agreement for the same.

Based on the audited financial statements for the nine-month period ended December 31, 2024 and financial years ended March 31, 2024, March 31,2023 and March 31,2022, our purchases from top five (5) and top ten (10) suppliers are as follows:

(₹ in lakhs)					
Sr No.	Particulars	Nine months ended December 31, 2024	FY 2023-24	FY 2022-23	FY 2021-22
1.	Purchase from top five (5) suppliers	2,018.62	1,201.74	1,095.56	863.91
2.	Purchase from top ten (10) suppliers	2,599.14	1,975.86	1,677.42	1,271.02

Following is the contribution of our top five (5) and top ten (10) suppliers from our total purchases:

(₹ in lakhs)					
Sr No.	Particulars	Nine months ended December 31, 2024	FY 2023-24	FY 2022-23	FY 2021-22
1.	% of total purchase from top five (5) suppliers	47.74	26.78	32.34	36.36
2.	% of total purchase from top ten (10) suppliers	61.47	44.03	49.52	53.49

There can be no assurance that strong demand, lack of required resources or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials. Although we have not experienced any significant disruption or delay in the sourcing of raw materials, which resulted in delays in our business activities, we cannot assure that such disruptions or delay will not occur and/or we shall continue to be able to source raw materials in a cost-effective manner.

If we experience a significant or prolonged shortage of resources from any of our suppliers and we cannot procure the raw materials from other sources, we would be unable to carry out our production schedules

in a timely manner, which would adversely affect our revenue, margins and customer relations. In the absence of a long-term supply arrangement or agreement with the suppliers, we cannot assure that a particular supplier will continue to supply raw materials to us in the future.

While we may find additional suppliers to supply these raw materials, any failure of our suppliers to deliver these raw materials in the necessary quantities or to adhere to delivery schedules, credit terms or specified quality standards may adversely affect our production processes and our ability to deliver orders on time and at the desired level of quality. As a result, we may lose customers which could have a material adverse effect on our business, financial condition and results of operations. Further, there can be no assurance that we will be able to effectively manage relationships with our existing or new suppliers or that we will be able to enter into arrangements with new suppliers at attractive terms or at all. If we fail to successfully leverage our existing and new relationships with suppliers, our business and financial performance could be adversely affected.

We are also subject to the risk that one or more of our existing suppliers may discontinue their operations, which may adversely affect our ability to source raw materials at a competitive price. The quantum and the price at which we procure our raw materials may fluctuate from time to time. The availability and price of such raw materials may be subject to a number of factors which are beyond our control, including but not limited to economic factors, environmental factors and changes in government policies and regulations, including those relating to the industry.

**4. *Any increase in the cost of our raw material or a shortfall in the supply of our raw materials, may adversely affect the pricing and supply of our products and have an adverse effect on our business, results of operations and financial condition.***

The success of our operations depends on a variety of factors, especially our ability to source raw materials at competitive prices with the desired quality & quantity. Potatoes are the main ingredient in our manufacturing process. Our potato procurement model involves direct purchase of potatoes from our network of farmers, third party suppliers and traders.

We majorly procure our potatoes from the states of Uttar Pradesh, Punjab and Gujarat. While we have developed strong relationships with these potato suppliers and farmers, we have not entered into any formal supply contracts with such parties. Consequently, the quantity procured and the price at which we procure such potatoes may fluctuate from time to time in the absence of a formal supply agreement.

The availability and price of potatoes is subject to a number of factors beyond our control, including seasonal factors such as harvest cycles, planting seasons, and crop yields; environmental factors such as rainfall patterns, drought conditions, pest infestations, temperature fluctuations; market demand-supply dynamics; transportation and storage infrastructure; farmer strikes/protests and commodity price trends in the regions in which we operate and the ones from where we procure potatoes. During the peak season, i.e., from December to March, we can procure potatoes at reasonable terms and in substantial quantities, whereas during the lean season their availability is reduced, and the prices are high. There can be no assurance that we will be able to procure all of our future potato requirements at commercially viable prices.

Potatoes is our primary raw material, forming majority of our total purchase costs. Any volatility in potato prices or availability directly impacts our cost structure and operating margins. Increased competition in the potato flakes industry may result in an increase in potato prices, potentially making it difficult for us to secure potatoes at competitive rates. This may impact our supply and ability to procure sufficient quantities at a reasonable cost, adversely affecting our business, operational results, and financial condition. Additionally, limited procurement at feasible prices could prevent us from utilizing our manufacturing unit to its full or optimal capacity, leading to profit losses or overall financial setbacks.

**5. *Inadequate storage conditions of raw materials may compromise product integrity and affect business operations and financial conditions.***

The storage of our primary raw material, potatoes, involves significant risks related to various environmental factors, including moisture levels, temperature fluctuations, humidity variations, and the

potential infestation by pests or parasites. Potatoes are perishable and sensitive to their storage conditions, making them vulnerable to spoilage if not stored under optimal conditions.

Excessive moisture can lead to rotting and fungal growth, while low humidity may cause dehydration and shrinkage, reducing the quality and weight of the potatoes. Similarly, temperature fluctuations, especially exposure to excessively high or low temperatures, can accelerate spoilage, trigger premature sprouting, or lead to chilling injuries that degrade their suitability for processing.

A failure to maintain proper storage conditions could result in a shortage of quality raw materials, affecting production schedules and efficiency. This, in turn, may impact product integrity, limit manufacturing capacity, and disrupt the supply chain. Despite our adherence to strict storage protocols and good manufacturing practices, these risks can be mitigated but not entirely eliminated. Any compromise in storage conditions may have a material adverse impact on our product quality, business operations, financial performance, and overall operational results.

In consideration of this constraint, our Company endeavors to secure and maintain sufficient quantities of potatoes in inventory. However, there are instances where misestimation of requirements may result in procurement of excessive quantities, creating storage challenges due to the inherently perishable nature of the commodity. Although we have entered into a lease agreement with Nishant Cold Storage which provides substantial storage capacity, such circumstances may necessitate the leasing of additional cold storage facilities. In the past, we have secured supplementary cold storage facilities when required for this purpose. While the geographic area in which our manufacturing unit is situated hosts numerous cold storage facilities, there exists a possibility that we may encounter temporary unavailability of suitable additional storage capacity, potentially resulting in deterioration of our raw material inventory, which could adversely affect our production capabilities, operational efficiency, and financial performance

**6. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our results of operations, cash flows and financial condition.***

Our Company's operations are subject to various risks and hazards inherent in the manufacturing business, which includes breakdown, work accidents, fire, earthquake, flood and other force majeure events, acts of terrorism and explosions that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environmental damage.

We have obtained insurance policies in relation to fire, policy for cold storage, burglary, plant and machinery etc. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks such as machinery breakdown, cash in transit, key man insurance, group personal accident, mediclaim policy. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

**7. *Our factories are subject to operating risks. Any shutdown of our existing factories or other production problems caused by unforeseen events may reduce sales and adversely affect our business, cash flows, results of operations and financial condition.***

Manufacturing facilities of our Company is located in Aligarh, which are subject to operating risks, and we may encounter manufacturing problems or experience difficulties or delays in production as a result of occurrence of the following events or any other events beyond our control:

- forced or voluntary closure of manufacturing facilities, including as a result of regulatory actions;
- problems with supply chain continuity, including as a result of natural or man-made disasters at any of our manufacturing facilities;

- manufacturing shutdowns, breakdown or failure of equipment, equipment performance below expected levels of efficiency, obsolescence of our equipment and production facilities, industrial accidents and the need to comply with the directives of relevant government authorities;
- labour disputes, strikes, lockouts that may result in temporary shutdowns or manufacturing disruptions;
- any changes in the availability of power or water availability which impacts the entire region;
- failure of a supplier to provide us with the critical raw materials or components for an extended period of time, which could impact continuous supply; and
- changes in political relationships between India and the countries in which we export and local political tensions

We have not experienced any instances which had disrupted our operations at our factories in the last three Financial years, but we cannot assure you that such instance will not arise in the future.

**8. *Our Company reported negative cash flow from its operating activity in financial year 2023. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.***

Our Company has reported certain negative cash flow in operating activities in financial year ended March 31, 2023, as per the Restated Financial Statements, as stated below:

(₹ in Lakhs)

If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

**9. *There have been some instances of delay and discrepancies with respect to filing of certain forms with the Registrar of Companies in the past, which may be subject to regulatory actions and penalties.***

**10. *Shortage or unavailability of electricity and fuel could affect our manufacturing operations and may have an adverse effect on our business, results of operations and financial condition.***

Shortage or unavailability of electricity and fuel could affect our manufacturing operations and may have an adverse effect on our business, results of operations and financial condition. For the December 31, 2024, and for the Financial Year ended March 31, 2024, 2023 and 2022, our electricity expenses accounted for ₹ 74.58 lakhs, ₹ 87.43 lakhs, ₹ 64.68 lakhs, and ₹ 61.58 lakhs which accounted for 1.40 %, 1.77 %, 1.89 % and 2.07 % of our total cost of materials consumed, respectively.

For the December 31, 2024, and for the Financial Year ended March 31, 2024, 2023 and 2022, our fuel expenses accounted for ₹ 672.92 lakhs, ₹ 651.92 lakhs, ₹ 571.03 lakhs, and ₹ 410.86 lakhs which accounted for 12.63 %, 13.22 %, 16.75 % and 13.82 % of our total cost of materials consumed, respectively.

Any shortage or non-availability of electricity, power, failure of the state electricity grid, or fuel supply disruptions could impact our ability to operate our Manufacturing Facilities efficiently. Such disruptions may delay production, impact fulfilment timelines to customers, and result in increased operational costs.

While we have not experienced any material disruptions in the supply of power or fuel during the nine-month period ended December 31, 2024, and in Financial Year ended March 31, 2024, 2023, and 2022, there can be no assurance that such issues will not arise in the future. Any significant disruption in utility supply may have an adverse effect on our manufacturing capabilities, customer satisfaction, and ultimately, our business, financial condition, and results of operations.

**11. *We are dependent on third party transportation and logistics service providers. Any increase in the charges of these entities could adversely affect our business, results of operations and financial condition.***

We majorly rely on third party transportation and logistics providers for delivery of our products. Though our business has not experienced any major disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. These transportation facilities may not be adequate to support our existing and future operations. There may be delay in delivery of products which may also affect our business and results of operation negatively. Any increase in the freight costs or unavailability of freight for transportation of our products may have an adverse effect on our business and results of operations. Further, disruptions of transportation services due to weather-related problems, strikes, lockouts, inadequacies in the road infrastructure, or other events could impair ability to procure delivery of goods on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations

**12. *Our business is working capital intensive. If we experience insufficient cash flows or are unable to access suitable financing to meet working capital requirements and loan repayment obligations, our business, financial condition and results of operations could be adversely affected.***

Our business requires a significant amount of working capital which is based on certain assumptions, and accordingly, any change in such assumptions will result in changes to our working capital requirements. Working capital is required for mobilization of resources like labour and raw materials.

Our working capital requirements may increase in the future on account of expansion project, undertaking larger orders, expanding our customer base, and also in cases where the agreed upon payment terms do not include advance payments, or if the contract's payment schedule calls for payment towards the end of the project. As on the nine month period till December 31, 2024, and for financial years ended March 31, 2024, March 31, 2023 and March 31, 2022, our working capital gap, i.e., difference between total current assets and total current liabilities, were ₹ 4,630.14 lakhs, ₹ 3,336.26 lakhs, ₹ 2,314.50 lakhs and ₹ 1,719.54 lakhs, respectively. We finance our working capital requirements through a variety of sources viz., equity capital (including accumulated reserves), cash credit facilities, working capital demand loans, letter of credit, bank guarantees and other fund based and non-fund based facilities.

Further, we cannot assure you that market conditions will allow us to access working capital facilities on terms which are acceptable to us, of sufficient limits, or at all. As of December 31, 2024, and March 31, 2024, our short-term borrowings (including borrowings from banks) amounted to ₹ 2,624.52 lakhs and ₹ 2,183.88 lakhs, respectively. Our ability to arrange for financing and our cost of borrowing depend on several factors, including general economic and market conditions, credit availability from financial institutions, the amount and terms of our existing indebtedness, investor confidence, and the continued success of current projects. In addition, our ability to raise funds is limited by certain restrictions imposed under applicable laws, including foreign exchange regulations. We strive to maintain strong relationships with banks and financial institutions. However, we cannot assure you that our relationships with lenders will not change.

**13. *Our inability to manage our growth may disrupt our business and reduce our profitability.***

As part of our growth strategy to meet customer needs, we are committed to provide best quality products and diversify our customer base and geographic footprint and minimizing our exposure to individual markets and segment. This will in turn result in substantial demands on our management, operational, and financial resources and our growth will require us to continuously invest in our operations and improve our operational, financial and internal controls, employee costs, newer units in newer locations,

expansion of existing units and administrative infrastructure.

An inability to manage our growth, including as a result of a failure to adequately respond to any such challenges, risks or uncertainties, may disrupt our business and reduce our profitability

**14. *We have incurred indebtedness, and our inability to obtain further financing or meet our obligations, under our financing arrangements could adversely affect our business, results of operations, financial condition and cash flows.***

As on December 31, 2024, our total indebtedness (including non-fund based limits) stood at ₹ 3,852.63 lakhs. Our ability to obtain financing is subject to a variety of uncertainties, including our financial condition, results of operations, cash flows and ending markets. Further, financing may not be available in a timely manner or in amounts or terms acceptable to us, or at all. Further, if we are required to raise equity financing, this could result in dilution to our Shareholders. Also, as on the date of this Draft Red Herring Prospectus, our Company have outstanding unsecured loans from ICICI Bank of ₹ 83.12 lakhs, in the event we avail any more unsecured loans in the future, there would be a possibility where such loans could be recalled by the lender at any time.

If any lender seeks repayment of any such loan, our Company will need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. Our inability to obtain further financing could adversely affect our business, results of operations, financial condition and cash flows. Further, our Promoters, Mr. Nishant Singhal, Mr. Prashant Singhal, Mrs. Sunita Singhal and Mr. Ramesh Chand Singhal, have given personal and corporate guarantees and collateralized commercial plots, in relation to certain borrowings availed by our Company. If these guarantees are revoked, our lenders may require alternative guarantees or collateral or the cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to source alternative guarantees to the satisfaction to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms at all and which may limit our operational flexibility. Accordingly, our business, results of operations and cash flows may be adversely affected by the revocation of the personal guarantees provided by our Promoter.

**11. *Our individual Promoters, namely, Mr. Nishant Singhal, Mr. Prashant Singhal, Mrs. Sunita Singhal and Mr. Ramesh Chand Singhal, have provided personal guarantees for loan facilities obtained by our Company. In the event that any of such facilities are revoked, the lenders for such facilities may require alternate securities, guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities, which could adversely affect our business, financial condition, results of operations and cash flows***

In connection with borrowings availed by our Company, our Promoters, Mr. Nishant Singhal, Mr. Prashant Singhal, Mrs. Sunita Singhal and Mr. Ramesh Chand Singhal, has provided personal property as collateral to secure certain loans. While this support has enabled the Company to access necessary financing, it also creates a dependency on the personal assets of our Promoters to maintain existing credit facilities.

Any adverse development relating to such collateral, such as disputes over ownership, enforcement of security, or deterioration in the value of the collateral, could potentially trigger a breach of loan covenants or lead to enforcement action by lenders. This may impact the credit terms available to the Company, limit our ability to secure future financing, or result in the re-negotiation of existing debt agreements on less favourable terms. Further, while the use of personal collateral reflects the Promoters' commitment to the business, it may create potential conflicts of interest in certain situations, particularly if enforcement action is initiated against the collateral by lenders. In such an event, our Promoters' ability to continue supporting the Company, financially or strategically, may be affected. There can be no assurance that continued reliance on the Promoters' personal property as collateral will not have reputational, financial, or operational consequences, all of which could adversely affect our business, results of operations, and financial condition.

**15. *Delay in Stamping of the Lease Deed for the new manufacturing unit.***

Our Company proposes to expand its manufacturing capabilities by establishing a new factory building adjacent to our existing facility. The proposed expansion will be situated on a 3651 square meter plot at Khasra No-634 MI, Village Mahua, Paragana Gorai & Tehsil Iglas, Aligarh, Uttar Pradesh. We have entered into a long-term lease agreement of 29 years executed on November 01, 2024 with members of our Promoter/Promoter Group - Sunita Singhal, Ramesh Chand Singhal, Pooja Singhal and Nishant Singhal on arm's length basis. There has been a delay in stamping of the said lease deed.

**16. Some of our loan agreements contain restrictive covenants which may adversely affect our business results of operations and financial condition.**

As on December 31, 2024, our indebtedness (long term and short term) on consolidated basis was ₹ 3,852.63 lakhs. The terms of sanction of such borrowings and certain terms of the financing agreements include covenants, such as the following:

1. No dividend to be declared/ no withdrawal in form of salary/remuneration/incentive/ commission by the promoter's directors in case of Overdues With the bank;
2. The Borrower shall not transfer, sell, lease, grant on license or create any third -party interest of any nature whatsoever on the Security without the prior written consent of the Bank;
3. The bank will have the right to review its facilities in case of any change in the ownership of the borrower enterprise. The borrower to immediately inform the bank with regard to changes in the shareholding pattern, if any;
4. Guarantors not to issue any personal guarantee to any other loans without prior written permission of the Bank except for Car Loan, Personal Loans, Home Loan, Education loan to be obtained for self and family members;
5. Borrower shall not have any account with other banks/financial institutions (for sole banking); and
6. Not undertake or permit any merger, de-merger, consolidation, reorganisation, scheme of arrangement or compromise with its creditors or shareholders or effect any scheme of amalgamation or reconstruction including creation of nay subsidiary or permit any company to become its subsidiary without prior consent of the lenders bank.

Although we have not defaulted on our financial obligations and have been in compliance with covenants in the past, we cannot assure you that we will be able to comply with all such financial obligations and covenants in the future. There can be no assurance that we will be able to comply with these financial or other covenants, or that we will be able to obtain the consents necessary to proceed with the actions which we believe are necessary to operate and grow our business, which may in turn have a material adverse effect on our business and operations. Further, during any period in which we are in default, we may not be able to raise, or may face difficulties raising, further financing. For details, see “*Financial Indebtedness*” on page 243 of this Draft Red Herring Prospectus.

**17. Our Company have certain contingent liabilities and commitments, which, if they materialize, may adversely affect our results of operations, financial condition and cash flows**

There can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current Financial Year or in the future. For further details in relation to our contingent liabilities, please refer to the section entitled "*Financial Statements*" and "*Management's Discussion and Analysis of Financial Position and Results of Operations*" on page 187 and 227, respectively, of this Draft Red Herring Prospectus.

**18. *Information relating to our production capacities and the historical capacity utilization of our manufacturing facilities included in this Draft Red Herring Prospectus is based on various assumptions and estimates and future production and capacity utilization may vary.***

The information relating to the estimated annual installed capacity and the average estimated annual available capacity of our manufacturing facilities included in this Draft Red Herring Prospectus are based on various assumptions and estimates of our management that have been taken into account by the chartered engineer in the calculation of our capacity. These assumptions and estimates include, calculations and explanations provided by our management, the period during which the facility operates in a year, availability of raw ingredients, expected utilization levels, estimated downtime resulting from scheduled maintenance activities, assumptions relating to unscheduled breakdowns, as well as expected operational efficiencies. Actual production levels and capacity utilization rates may therefore vary significantly from the estimated annual installed capacity and the average estimated annual available capacity information of our facilities. Undue reliance should therefore not be placed on our capacity information or historical capacity utilization information for our existing facilities included in this Draft Red Herring Prospectus. Further, average estimated annual available capacity has been calculated on the basis of the estimated daily available capacity for the relevant periods, as certified by J.K. Varshney, independent chartered engineer pursuant to certificate dated December 23, 2024. Please note that average estimated annual available capacity of a manufacturing facility in a relevant financial year as discussed above may vary from the estimated annual installed capacity in such relevant financial year, as the average estimated annual available capacity takes into account adjustments for actual scheduled and unscheduled downtime during such period. These assumptions and estimates may vary significantly from the assumptions or estimates taken into account by other companies in the same industry, in calculating the estimated annual installed capacities of their manufacturing facilities. For details, see "*Our Business – Our Manufacturing Facilities – Capacity and Capacity Utilisation*" on page 150.

**19. *The company plans to establish an additional manufacturing unit which requires approvals and licenses that have not yet been obtained, which could impact our business, financial condition and results of operations.***

The Company intends to expand its business operations by additional manufacturing unit utilizing the IPO proceeds. While we have executed the lease deed for the facility site and obtained relevant quotations, other actions for expansion are yet to be undertaken, including entering into formal contractual arrangements for the construction of such facility, obtaining necessary government and regulatory approvals, etc, which will be done by the Company in due course of time.

Any delay or failure in obtaining necessary approvals, unforeseen cost escalations, or construction delays could significantly postpone or impair our ability to implement our expansion plans as contemplated. Additionally, changes in government policies, market conditions, or technological advancements occurring during the implementation period may render our planned expansion less competitive or economically viable, potentially requiring modifications to our original plans and resulting in additional costs and delays.

Furthermore, there can be no assurance that the expanded operations will achieve the anticipated operational efficiencies, economies of scale, or revenue growth. If our expansion plans are delayed or abandoned, or if the expanded operations fail to generate the expected returns, our business, financial condition, results of operations, and prospects could be materially and adversely affected.

**20. *Our proposed capacity expansion plans relating to our manufacturing facility are subject to the risk of unanticipated delays in implementation and cost overruns.***

Our Company plans to expand its business operations by establishing an additional manufacturing unit. As we engage with third-party contract manufacturers and introduce new products, we may face regulatory challenges, staffing issues, and other operational hurdles. These difficulties could lead to increased costs, potential delays, and may affect our ability to achieve profitability in these new ventures.

Our expansion plans may be adversely affected by labour shortages, delays in equipment procurement or installation, increased costs, underperformance of machinery, design or construction defects, regulatory hurdles, delays in approvals, rising pre-operating expenses, taxes, finance charges, and other external factors beyond our control, including issues with third-party contract manufacturers.

There can be no assurance that the proposed capacity additions and expansions will be completed as planned or on schedule, and if they are not completed in a timely manner, or at all, our budgeted costs and investments in the contract manufacturing facilities may be insufficient to meet our proposed capital expenditure requirements.

Further, the estimated schedule completion date of the contract manufacturing facilities are based on estimates of the relevant third party contractor and we cannot assure you that such third-party contract manufacturing facilities will start production on schedule. If our actual capital expenditures significantly exceed our budgets, or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits of these projects, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects.

Although we have not experienced any time and cost overruns in the past, we cannot assure you that we will not experience cost overruns in relation to our additional manufacturing facilities in the future. There can be no assurance that such plans will be successfully implemented or completed or that if completed, they will result in the anticipated growth in our revenues or improvement in the results of operations we anticipate from the implementation of such initiatives. For details, see “*Our Business - Production Capacity and Capacity Utilisation*” on page 150.

**21. *If we are unable to recruit and retain senior management, qualified and skilled personnel, our business and our ability to operate or grow our business may be adversely affected***

Our Board of Directors, Senior Management and Key Managerial Personnel have good experience and have contributed to the growth of our business. For further details, see “*Our Management*” on page 165. Our future performance would depend on the continued service of our Senior Management, Key Managerial Personnel, qualified and skilled personnel with technical expertise, and the loss of any senior employee and the inability to find an adequate replacement may adversely affect our business, cash flows,

financial condition, results of operations and prospects.

While there has been no instance in the nine months ended December 31, 2024 and the last three Financial years where the resignation of any Senior Management or Key Managerial Personnel had an adverse impact on our business, results of operations, cash flows or financial conditions, we cannot assure you that such instance will not arise in the future.

Our future success, among other factors, will depend upon our ability to continue to attract, train and retain qualified personnel with critical expertise, know-how and skills that are capable of helping us. We may therefore need to increase compensation and other benefits in order to attract and retain personnel in the future, which may adversely affect our business, financial conditions, cash flows and results of operations.

22. ***We are significantly dependent on both skilled and unskilled labour for our Manufacturing Facility. Any disruption to the supply of such labour, or our inability to control the composition and cost of our contract labour, could adversely affect our business, results of operations, financial condition and cash flows.***

Our operations are reliant on both workers directly employed by us and contract labour, particularly at our project site. We directly engage workers for the entire manufacturing process, from collecting raw material to final packaging. The expenses incurred by our Company towards our employees (comprising salaries and wages, staff welfare expenses) and contribution to the employees' provident fund and other funds) for the nine months period ended December 31, 2024, and Fiscals 2024, 2023 and 2022 was ₹ 113.86 lakhs, ₹ 141.15 lakhs, ₹ 116.07 lakhs and ₹ 99.38 lakhs, respectively.

Any disruption in this labour supply, particularly during periods such as festive seasons, or challenges in managing the composition, availability, or cost of labour, could negatively affect our business, financial condition, and cash flows. Further, though we do not engage any manpower supply agencies, we may face shortage of labour supply, which may in turn adversely affect our business operations.

23. ***Our inability to collect receivables and defaults in payment from our clients could result in the reduction of our profits and affect our cash flows.***

We receive payments in parts as per the terms of the work orders from our clients. Our business depends on our ability to successfully obtain payments from our clients for products provided under our work orders. While we typically limit the credit we extend, we may still experience losses in the event our clients are unable to pay. As a result, while we maintain an allowance for doubtful receivables for potential credit losses based upon our historical trends and other available information, there is a risk that our estimates may not be accurate.

While there have been no material bad debts for the financial years ended March 2022, 2023, 2024 and for the nine months period ended December 31, 2024, we cannot assure you that we would not have any bad debts in the future.

24. ***We have entered into related party transactions and may continue to enter into related party transactions, which may involve conflicts of interest, including with certain of our Promoters, Directors and key management personnel.***

We have entered into certain transactions with related parties. While we believe that not all such transactions contain commercially reasonable terms, we cannot assure you that we could not have achieved more favorable terms had such transactions been entered into with unrelated parties.

There is no potential conflict of interest between our Company and its related parties, including its promoters as all such transactions have been conducted on an arm's length basis, and are in compliance with applicable laws, including the Companies Act. We cannot assure that we could not have achieved more favorable terms had such transactions been entered into with unrelated parties. Furthermore, it is likely that we will enter into related party transactions in the future.

Although all material related party transactions that we may enter into, will be subject to Audit Committee and Board or shareholder approval, as necessary under the Companies Act 2013 and the SEBI Listing Regulations, there can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation.

However, we cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions had not been entered into with related parties. Such related party transactions may potentially involve conflicts of interest.

For details, see “Annexure - 36 of the Restated Standalone Financial Statements” on page 215, respectively.

**25. *Our Promoters and Key Management Personnel may be interested in our Company, other than to the extent of reimbursement of expenses incurred or normal remuneration or benefits.***

Certain of our Promoters and Key Management Personnel may be regarded as having an interest in our Company other than reimbursement of expenses incurred and normal remuneration or benefits. For instance, our Promoters, Mr. Nishant Singhal, Mr. Prashant Singhal, Mrs. Sunita Singhal and Mr. Ramesh Chand Singhal are interested in our Company to the extent of their shareholding in our Company and the dividend declared, if any and any other distributions in respect of their shareholding in our Company. For details of shareholding held by such Promoters and Key Managerial Personnel, see “Capital Structure – Notes to Capital Structure” on page 72.

**26. *Our registered office and our manufacturing premises are not owned by us.***

Our registered office is not owned by us, and neither do we own the manufacturing plant land. All such non-owned properties are either leased or licensed to us and we function from such premises on rental basis. The Company and our Promoters are the owners of the factory land, have executed a lease agreement, permitting the Company to use the premises to establish the factory. Similarly, our Promoter, Sunita Singhal, is the owner of the Registered office premises, and has executed a lease agreement, permitting the Company to use the premises to be used as our Registered Office. While we do not expect our Promoters to ask us to vacate the Registered Office and/or factory premises and claim ownership therein, we cannot assure you that such a claim may not arise in the future.

**27. *We may undertake acquisitions, investments, joint ventures or other strategic alliances, which may have an adverse effect on our ability to manage our business, and such undertakings may be unsuccessful.***

We may undertake acquisitions, investments, joint ventures or other strategic alliances to expand our business operations. While we have not undertaken any acquisitions or joint ventures as of now, any future acquisitions may expose us to new operational, regulatory, market and geographic risks as well as risks associated with additional capital requirements as well as other considerable risks, including:

- our inability to integrate new operations, personnel, solutions;
- unforeseen or hidden liabilities, including exposure to lawsuits associated with newly acquired companies;
- the diversion of resources from our existing businesses;
- failure to comply with laws and regulations as well as industry or technical standards of the overseas markets into which we may expand;
- our inability to generate sufficient revenues to offset the costs and expenses of such acquisitions or strategic investment; and
- potential loss of, or harm to employees or customer relationships

Any of these events could disrupt our ability to manage our business, which in turn could have an adverse effect on our financial condition, cash flows and results of operations. Such risks could also result in our failure to derive the intended benefits of the acquisitions, and we may be unable to recover our investment

in such initiatives

28. ***We have applied for registration of trademarks including our company name, and there can be no assurance that we will be able to successfully register the trademark, or that it will not be infringed upon.***

Our name and trademarks are significant to our business and operations. We have applied for registration of trademarks (in various classes). Of the applications that remain pending as on the date of this Draft Red Herring Prospectus, all the applications current status is “**Formalities Chk Pass**”: (a) our company word mark name “Shivashrit” under service category potato flour, snacks food; (b) our company brand product under word mark name “ShivaShrit Shri Aahar” under service category potato flour, snacks food; (c) our company brand product under word mark name “ShivaShrit Shri Aahar (In Hindi)” under service category potato flour, snacks food; (d) our company brand product under word mark name “Flaker’s” under service category potato flour, snacks food. There can be no assurance that we will be able to obtain registration of the trademark applied for in our name, and such failure may materially and adversely affect our business prospects, reputation and goodwill. For further details, see “**Government and Other Statutory Approvals – Intellectual Property Rights**” on page 255 of this DRHP. Pending completion of the registration proceeding, any third-party may claim on our trademark which may lead to erosion of our brand value, and our operations could be adversely affected.

29. ***Industry information included in this Draft Red Herring Prospectus has not been derived from any commissioned or paid agency.***

The industry-related information contained in this Draft Red Herring Prospectus has been compiled from publicly available sources, including government publications, industry reports, official websites, and other publicly accessible data platforms, which we believe to be reliable and accurate to the best of our knowledge. Our Company has not commissioned any third-party or independent agency for the preparation of an exclusive industry report in connection with this Draft Red Herring Prospectus. The information presented under the section “*Industry Overview*” on page 118 is based on data available in the public domain and is intended to provide a general understanding of the food retailing and food processing industry in India.

While reasonable care has been taken in compiling and presenting this information, we cannot guarantee the accuracy, completeness, or reliability of the data sourced from such public materials. Different sources may employ varying methodologies and assumptions, and such assumptions are subject to change over time due to various economic, regulatory, and industry-specific developments. The industry data may also have been reclassified or modified by us for the purposes of presentation and may not be comparable across different sources.

Prospective investors are advised not to place undue reliance on this information and are encouraged to undertake their own independent analysis and consult their own advisors before making any investment decisions regarding the Offer. The inclusion of industry information in this Draft Red Herring Prospectus should not be construed as a recommendation to invest in or divest from our Company.

30. ***Failure to effectively manage our future growth and expansion may have a material adverse effect on our business prospectus and future financial performance.***

Our future growth depends, amongst other factors, on establishing new manufacturing facilities, expanding our existing production capacity. Our ability to achieve growth will be subject to a range of factors, including

- Establishing our presence in new territories;
- Strengthening our existence relationships with super stockists and them, distributions;
- Expanding our sales network;
- Continuing to exercise effective quality control;
- Hiring and training qualified personnel;
- Enhancing our research and development capabilities; and
- Maintaining our high food-safety standards.

Our future growth also depends on expanding our sales and distribution network to enter new markets in new geographies, through different sales channels. We face increased risks when we enter new markets, either India or abroad. Consumers in new markets are likely to be unfamiliar with our brand and products and we may need to build or increase brand awareness in the relevant markets by increasing investments in advertising and promotional activities than we originally planned. We may also face competition with the established brands in the new markets we intend to enter. We may find it more difficult to hire, train and retain qualified employees. In addition, we may have difficulty in finding reliable suppliers with adequate supplies of raw materials meeting our quality standards or super stockists and distributors with efficient distribution networks. As a result, the products we introduce in new markets may be more expensive to produce and/or distribute and may take longer to reach expected sales and profit levels than in our existing markets, which could affect the viability of these operations or our overall profitability.

Our expansion plans and business growth could strain our managerial, operational and financial resources. Our ability to manage future growth will depend on our ability to continue to implement and improve operational, financial and management information systems on a timely basis and to expand, train, motivate and manage our workforce. We cannot assure you that our personnel, systems, procedures and controls will be adequate to support our future growth. Failure to effectively manage our expansion may lead to increased costs and reduced profitability and may adversely affect our growth prospects. There can be no assurance that we will be able to achieve our business strategy of expanding into existing or new territories.

**31. *If we fail to maintain and enhance our brand and reputation, consumers' recognition of our brands, and trust in us, and our products, our business may be materially and adversely affected.***

Our business depends significantly on the strength of our brand and reputation in marketing and selling our products. We believe that our brand, Shivashrit is recognized among Indian consumers for value for money. We believe that continuing to develop awareness of our brand, through focused and consistent branding and marketing initiatives is important for our ability to increase our sales volumes and our revenues, grow our existing market share and expand into new markets. Consequently, product defects, consumer complaints, or negative publicity or media reports involving us, or any of our products could harm our brand and reputation and may dilute the impact of our branding and marketing initiatives and adversely affect our business and prospects. Negative media coverage regarding the safety, quality or nutritional value of our products, and the resulting negative publicity, could materially and adversely affect the level of consumer recognition of, and trust in, us and our products. In addition, adverse publicity about any regulatory or legal action against us could damage our reputation and brand image, undermine our consumers' confidence in us and reduce long-term demand for our products, even if the regulatory or legal action is unfounded or immaterial to our operations. Additionally, any delinquent publicity of India's snack food industry relating to food safety, including contamination, due to adulterated supplies of raw materials and inadequate enforcement of food-safety regulations and inspection procedures, which may not have a direct connection with us, may negatively influence consumer perception and demand for our products, which in turn could adversely affect our results of operations.

**32. *Any disruption in the supply chain could have an adverse impact on our business, financial condition, cash flows and results of operations.***

Our ability to manufacture, transport, and sell our products is critical to our success. Any disputes with our super stockists, including disputes regarding pricing or performance, could adversely affect our ability to supply products to our customers and could materially and adversely affect our product sales, financial condition, and results of operations. In addition, any damage or disruption to our supply chain, including transportation and distribution capabilities, due to weather, natural disaster, fire or explosion, terrorism, pandemics, strikes, government action, or other reasons beyond our control or the control of our super stockists, could impair our ability to manufacture or sell our products. Failure to take adequate steps to mitigate the likelihood or potential impact of such events or to effectively manage such events if they occur could adversely affect our business or financial results.

Further, there can be no assurance that we will be successful in detecting any non-compliance by our

super stockists with the provisions of their agreements with us, or by distributors of the terms of their respective arrangements, if any, with super stockists. Non-compliance by our super stockists or distributors could, among other things, negatively affect our brand, demand for our products and our relationships with other super stockists and distributors. Furthermore, if the sales volumes of our products to our consumers are not maintained at satisfactory levels or if super stockists or distributor's orders fail to track end-consumer demand, our distributors may not place orders for new products from us, may decrease the quantity of their usual orders or may seek discounts on the purchase price. The occurrence of any of these factors could result in a significant decrease in the sales volume of our products and therefore adversely affect our financial condition, cash flows and results of operations.

**33. *Stringent food safety, consumer goods, health and safety laws and regulations may result in increased liabilities and increased capital expenditures.***

Our operations are subject to stringent health and safety laws as our products are for human consumption and are therefore subject to various industry specific regulations. We may also be subject to additional regulatory requirements due to changes in governmental policies. Further, we may also incur additional costs and liabilities related to compliance with these laws and regulations that are an inherent part of our business. We are subject to various central, state and local food safety, consumer goods, health and safety and other laws and regulations. These relate to various issues, including food safety, food ingredients, and food packaging requirements, and the investigation and remediation of contamination. These laws and regulations are increasingly becoming stringent and may in the future create substantial compliance or remediation liabilities and costs. These laws may impose liability for non-compliance, regardless of fault. Other laws may require us to investigate and remediate contamination at our facilities and production processes. While we intend to comply with applicable regulatory requirements, it is possible that such compliance may prove restrictive, costly and onerous and an inability to comply with such regulatory requirement may attract penalty. For details see, "**Government and Other Approvals**" and "**Regulations and Policies**" beginning on pages 252 and 154, respectively.

**34. *Any inability to accurately manage inventory and forecast demand for our products in specific markets may have an adverse effect on our business, results of operations and financial condition.***

We estimate demand for our products based on projections, our understanding of anticipated consumer spending and inventory levels with our distribution network. If we underestimate demand, we may produce lesser quantities of products than required, which could result in the loss of business. If we overestimate demand, we may purchase more raw materials and produce more products than required, which may also result in locking in of our working capital. In the event of such over-production, we may face difficulties with storage and other inventory management issues before the expiry of the shelf life of our products, which may adversely affect our results of operations and profitability. In addition, even if we are able to arrange for sale of such stock, we cannot ensure that such products are not sold or consumed by consumers subsequent to the expiry of the shelf life, which may lead to health hazards. While we prominently display the shelf life in the packaging of our products, we cannot assure you that we will not face claims for damages or other litigation, if our products are consumed subsequent to expiry of their shelf life. Any or all of these factors could adversely affect our reputation, and consequently our business, prospects and financial performance.

**35. *Our revenues are subject to a significant number of tax regimes and changes in legislation governing the rules implementing them could adversely affect our results of operations.***

Taxes and other levies imposed by the Government of India or state governments in India that affect our industry include import duties on raw materials and finished goods, excise duty on the manufacture of our products, central and state sales tax and other levies, income tax, value added tax, octroi tax and entry tax, service tax and other new or special taxes and surcharges introduced on a permanent or temporary basis from time to time. Such higher taxes on the sale of the our products, in the form of excise or other taxes, could lead to increased prices, which in turn may reduce demand and consumption of our products and reduce our revenues and profitability. We are currently entitled to certain tax benefits and incentives.

Further, certain states in India have imposed, or are in the process of imposing, taxes on the consumption of food products containing higher than usual fat content. While our products are not subject to such

taxes at present, there can be no assurance that we will not be subject to taxes of such nature in the future. The imposition of any such taxes could lead to increased prices, which may reduce demand for our products and consequently reduce our revenues and profitability.

**36. *Some of our Directors do not have experience of being a director of a public listed company***

Some of the Directors of our Company do not have the experience of having held directorship of public listed company. Accordingly, they have limited exposure to management of affairs of the listed company which inter-alia entails several compliance requirements and scrutiny of affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a public listed company, the Company will require to adhere strict standards pertaining to accounting, corporate governance and reporting that it did not require as an unlisted company. The Company will also be subject to the SEBI Listing Regulations, which will require it to file audited annual and unaudited quarterly reports with respect to its business and financial condition. If the Company experiences any delays, we may fail to satisfy its reporting obligations and/or it may not be able to readily determine and accordingly report any changes in its results of operations as promptly as other listed companies.

Further, as a publicly listed company, the Company will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of the Company's disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, the Board of Directors of the Company may have to provide increased attention to such procedures and their attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

**External Risk Factors**

**37. *Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards ("IFRS"), which investors may be more familiar with and consider material to their assessment of our financial condition.***

The Restated Financial Information of our Company, which comprises the Restated Consolidated Statement of Assets and Liabilities, the Restated Consolidated Statement of Profit and Loss, the Restated Consolidated Statement of Cash Flows as at and for the nine months period ended December 31, 2024, Financial Years ended on March 31, 2024, March 31, 2023 and March 31, 2022 along with the summary statement of significant accounting policies read together with the annexures and notes thereto prepared in terms of the requirements of Section 32 of the Companies Act, the SEBI ICDR Regulations and the Guidance Note on Reports in Company Prospectuses (Revised 2019) issued by the ICAI, as amended from time to time.

Our Company has not attempted to quantify the impact of US GAAP, IFRS or any other accounting principles on the financial data included in this Draft Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the financial information included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting policies and practices, Indian GAAP, the Companies Act and SEBI ICDR Regulations. Any reliance by persons not familiar with the aforementioned policies and laws on the financial disclosures presented in this Draft Red Herring Prospectus should be limited.

**38. *Political, economic or other factors that are beyond our control may adversely affect our business and results of operations.***

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have

adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products or services may be adversely affected by an economic downturn in domestic, regional, and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

**39. *A slowdown in economic growth in India could cause our business to suffer.***

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

**40. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.***

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. Our

business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. For instance, the Government of India has recently introduced (a) the Code on Wages, 2019; (b) the Code on Social Security, 2020; (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 which consolidate, subsume and replace numerous existing central labour legislations. While the provisions of these codes have not yet been fully promulgated and notified, we are yet to determine the impact of all or some of such laws on our business and operations which may increase our expenses and affect our results of operations and financial condition. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

**41. *We may be affected by competition law in India and any adverse application or interpretation of the Competition Act may in turn adversely affect our business.***

The Competition Act, 2002, of India, as amended (**Competition Act**) regulates practices having an appreciable adverse effect on competition (AAEC) in the relevant market in India. Under the Competition Act, any formal or informal arrangement, understanding or action in concert, which causes or is likely to cause an AAEC is considered void and results in the imposition of substantial penalties. Further, any agreement among competitors which directly or indirectly involves the determination of purchase or sale prices, limits or controls production, shares the market by way of geographical area or number of guests in the relevant market or directly or indirectly results in bid-rigging or collusive bidding is presumed to have an AAEC in the relevant market in India and is considered void. The Competition Act also prohibits abuse of a dominant position by any enterprise.

The Competition Act aims to, among others, prohibit all agreements and transactions which may have an AAEC in India. Consequently, all agreements entered into by us could be within the purview of the Competition Act. Further, the Competition Commission of India (CCI) has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside India if such agreement, conduct or combination has an AAEC in India. Our Company is currently not a party to an outstanding proceeding, nor has our Company received any notice in relation to non-compliance with the Competition Act and the agreements entered into by our Company. However, if our Company is affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, it would adversely affect the business, results of operations and prospects of our Company.

**42. *Financial instability, economic developments and volatility in securities markets in other countries may also cause the price of the Equity Shares to decline.***

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. For instance, the economic downturn in the U.S. and several European countries during a part of Fiscals 2008 and 2009 adversely affected market prices in the global securities markets, including India. Following the United Kingdom's exit from the European Union (Brexit), there still remains significant uncertainty around the impact of Brexit on the general economic conditions in the United Kingdom and the European Union and any consequential impact on global financial markets. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese

economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries. Further, the collapse of the Silicon Valley Bank during Fiscal 2023 also caused economic downturn. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increase volatility in Indian securities markets and indirectly affect the Indian economy in general. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of the Equity Shares.

**43. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.***

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether full or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such cases, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GOI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

**44. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.***

There could be a downgrade of India's sovereign debt rating due to various factors, including changes in tax or fiscal policy, or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available.

Any downgrading of India's debt rating by a domestic or international rating agency could impact India's ability to borrow funds from international bodies thereby impacting governments spending in our industry. This could have an adverse effect on our business and financial performance and the ability to obtain financing for expenditures.

**45. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.***

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, fires, explosions, pandemic disease and man-made disasters, and acts of terrorism and military actions could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, an deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares.

In addition, certain regions in India have witnessed terrorist attacks and civil disturbances and it is possible that future terrorist attacks or civil unrest, as well as other adverse social, economic and political events in India could have a negative effect on us. Transportation facilities, including vehicles, may be

targets of terrorist attacks, which could lead to, among other things, increased insurance and security costs. Regional and global political or military tensions, or conflicts, strained or altered foreign relations, protectionism and acts of war or the potential for war could also cause damage and disruption to our business, which could materially and adversely affect our business, financial condition, cash flows and results of operations. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares. We may also face difficulty in accessing certain parts of India at certain times of the year or under adverse or inclement weather conditions.

**46. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.***

We are incorporated in India, and our operations are located in India. As a result, we are highly dependent on prevailing economic conditions in India and other economies and our results of operations and cash flows are significantly affected by factors influencing the Indian and global economies.

Other factors that may adversely affect the economy, and hence our results of operations and cash flows, may include:

- high rates of inflation in India and in countries where we operate our business could increase our costs without proportionately increasing our revenue, and as such decrease our operating margins;
- any slowdown in economic growth or financial instability in India and in countries where we operate our business;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing, resulting in an adverse impact on economic conditions and scarcity of financing for our expansions;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- prevailing income conditions among consumers and corporates;
- volatility in, and actual or perceived trends in trading activity on, the relevant market's principal stock exchanges;
- changes in existing laws and regulations in India and in countries where we operate our business;
- political instability, terrorism or military conflict in the region or globally, including in various neighboring countries;
- occurrence of natural or man-made disasters;
- any downgrading of debt rating of India or where we operate our business, by a domestic or international rating agency;
- instability in financial markets;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and, or, a timely basis; and
- any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

**47. *Adverse geopolitical conditions such as an increased tension between India and its neighboring countries, and Russia-Ukraine conflict, could adversely affect our business, results of operations and financial condition.***

Adverse geopolitical conditions such as increased tensions between India and its neighboring countries, resulting in any military conflict in the region could adversely affect our business and operations. Such events may lead to countries including the Government of India imposing restrictions on the import or export of products or input materials, among others, and affect our ability to procure input materials

required for our manufacturing operations. We could also be affected by the introduction of or increase in the levy of import tariffs in India, or in the countries to which we export our products, or changes in trade agreements between countries. For instance, the government of India imposed additional tariffs in the nature of countervailing duty and anti-dumping duty on a number of items imported from China. Any such measure which affects our input material supply or reciprocal duties imposed on Indian products by China or other countries may adversely affect our results of operations and financial condition. Such measures may also have an adverse impact on the products we export, including increasing the cost of such products, which may adversely affect our results of operations and financial condition. Further, prolonged Russia-Ukraine conflict that is currently impacting, inter alia, global trade, prices of oil and gas and could have an inflationary impact on the Indian economy.

48. ***Changes in technology may render our current technologies obsolete or require us to make substantial capital investments and failure to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis may affect our results of operations.***

Modernization and technology up gradation is essential to reduce costs and increase the output. Our production technology may become obsolete or may not be upgraded timely, hampering our operations and financial conditions. Although we believe that we have installed plant and machineries with the latest upgraded technology suitable for yarn production, we shall further continue to keep our technology updated. In case of availability of an updated technology in the industry, we may be required to implement new technology as failure to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis may affect our results of operation. Further, the cost in upgrading our technology may be significant which could substantially affect our finances and operations.

49. ***Governmental actions and changes in policy could adversely affect our Company's business.***

The Government of India and the State Governments in India have broad powers to affect the Indian economy and our business in numerous ways. Additionally, change in policies in the countries to which we export, may affect our business. Any change in the existing policies of Government of India and/or State Government, or foreign government policies, or new policies affecting the economy of India or any foreign country, where we operate our business, could adversely affect our business operations. Moreover, we also cannot assure you that the Central Government or State Governments in India, or foreign government in countries where we operate will not implement new regulations and policies which will require us to obtain additional approvals and licenses from the Government and other regulatory bodies or impose onerous requirements and conditions on our operations. We cannot predict the terms of any new policy, and we cannot assure you that such a policy will not be onerous. Such a new policy may also adversely affect our business, cash flows, financial condition and prospects.

50. ***Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.***

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

51. ***The requirements of being a listed company may strain our resources.***

Our Company is not a publicly listed company and has not, historically, been subjected to the increased scrutiny of our Company's affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, our Company will incur significant legal, accounting,

corporate governance and other expenses that our Company did not incur as an unlisted company. Our Company will be subject to the SEBI LODR Regulations, which will require our Company to file audited annual and unaudited quarterly reports with respect to our Company's business and financial condition.

If our Company experience any delays, our Company may fail to satisfy our Company's reporting obligations and / or our Company may not be able to readily determine and accordingly report any changes in our Company's results of operations as promptly as other listed companies. Further, as a publicly listed company, our Company will need to maintain and improve the effectiveness of our Company's disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our Company's disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our Company's management's attention may be diverted from our Company's business concerns, which may adversely affect the business, prospects, results of operations and financial condition of our Company.

**52. *Financial instability in other countries may cause increased volatility in Indian financial markets.***

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the equity shares.

The outbreak of Coronavirus has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

**RISK RELATED TO THE OFFER**

**53. *Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by any bank or financial institution or any other independent agency and our management will have broad discretion over the use of the Net Proceeds.***

We intend to utilise the Net Proceeds of the Offer as set forth in "*Objects of the Offer*" beginning on page 85. The funding requirements mentioned as a part of the objects of the Offer are based on internal management estimates in view of past expenditures and have not been appraised by any bank or financial institution. This is based on current conditions and is subject to change in light of changes in external circumstances, costs, other financial conditions or business strategies.

Various risks and uncertainties, including those set forth in this section, may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in our business. For example, our organic growth and expansion plans could be delayed due to failure to receive regulatory approvals, technical difficulties, human resources, technological or other resource constraints, or for other unforeseen reasons, events or circumstances. We may also use funds for future businesses which may have risks significantly different from what we currently face or may expect. Further, we may not be able to attract personnel with sufficient skills or sufficiently train our personnel to manage our expansion plans. Accordingly, use of the Net Proceeds for other purposes identified by our management may not result in actual growth of our business, increased profitability or an increase in the value of our business and your investment.

54. ***In the event that our Net Proceeds to be utilised towards inorganic growth initiatives are insufficient for the cost of our proposed inorganic acquisition, we may have to seek alternative forms of funding.***

We propose to utilize the Net Proceeds towards inorganic growth initiatives, as set forth in the “*Objects of the Offer*” beginning on page 85. We will from time to time continue to seek attractive inorganic opportunities that will fit well with our strategic business objectives and growth strategies, and the amount of Net Proceeds to be used for acquisitions will be based on our management’s decision. The amounts deployed towards such initiatives may not be the total value or cost of such acquisitions or investments, resulting in a shortfall in raising requisite capital from the Net Proceeds towards such acquisitions or investments. Consequently, we may be required to explore a range of options to raise requisite capital, including utilising our internal accruals and/or seeking debt, including from third party lenders or institutions.

55. ***We cannot assure payment of dividends on the Equity Shares in the future.***

Our Company has a dividend policy. However, Our Company has not declared dividends on the Equity Shares during the current Fiscal and the last three fiscal. Our ability to pay dividends in the future will depend upon our future results of operations, financial condition, cash flows, sufficient profitability, working capital requirements and capital expenditure requirements and other factors considered relevant by our directors and shareholders. Our ability to pay dividends may also be restricted under certain financing arrangements that we may enter into. We cannot assure you that we will be able to pay dividends on the Equity Shares at any point in the future. For details pertaining to dividend declared by us in the past, see “*Dividend Policy*” beginning on page 186.

56. ***Our Equity Shares have never been publicly traded, and after the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the Offer Price may not be indicative of the market price of the Equity Shares after the Offer.***

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares is proposed to be determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. Consequently, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Offer Price, or at all. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share price could fluctuate significantly because of market volatility. A decrease in the market price of our Equity Shares could cause investors to lose some or all of their investment.

57. ***The determination of the Price Band is based on various factors and assumptions and the Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer.***

The determination of the Price Band is based on various factors and assumptions, and will be determined by our Company in consultation with the Selling Shareholder and the Lead Manager. Furthermore, the Offer Price of the Equity Shares will be determined by our Company in consultation with the Selling Shareholder and the Managers through the Book Building Process. These will be based on numerous factors, including factors as described under “*Basis for Offer Price*” beginning on page 107 and may not be indicative of the market price for the Equity Shares after the Offer. The factors that could affect the market price of the Equity Shares include, among others, broad market trends, financial performance and results of our Company post-listing, and other factors beyond our control. We cannot assure you that an active market will develop or sustained trading will take place in the Equity Shares or provide any

assurance regarding the price at which the Equity Shares will be traded after listing.

**58. *Investors may be subject to Indian taxes arising out of income arising on the sale of and dividend on the Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares held as investments in an Indian company are generally taxable in India. Any capital gain realized on the sale of listed equity shares on a Stock Exchange held for more than 12 months immediately preceding the date of transfer will be subject to long term capital gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of Securities Transaction Tax (“STT”), on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any capital gains realized on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India.

Capital gains arising from the sale of the Equity Shares will not be chargeable to tax in India in cases where relief from such taxation in India is provided under a treaty between India and the country of which the seller is resident and the seller is entitled to avail benefits thereunder, subject to certain conditions. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

Similarly, any business income realized from the transfer of Equity Shares held as trading assets is taxable at the applicable tax rates subject to any treaty relief, if applicable, to a non-resident seller. Additionally, in terms of the Finance Act, 2018, which has been notified on March 29, 2018 with effect from April 1, 2018, the tax payable by an assessee on the capital gains arising from transfer of long term capital asset (introduced as section 112A of the Income-Tax Act, 1961) shall be calculated on such long-term capital gains at the rate of 10%, where the long-term capital gains exceed ₹100,000, subject to certain exceptions in case of a resident individuals and HUF.

Further, the Finance Act, 2019 has made various amendments in the taxation laws and has also clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis is specified at 0.015% and on a non -delivery basis is specified at 0.003% of the consideration amount. These amendments have come into effect from July 1, 2020.

Additionally, the Finance Act does not require DDT to be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source pursuant to any corporate action including dividends.

**59. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Offer Closing Date.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/Offer Period and withdraw their Bids until Bid/Offer Closing Date. While our Company is required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Offer within six Working Days from the

Bid/Offer Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

**60. *There is no guarantee that our Equity Shares will be listed on the BSE SME in a timely manner or at all.***

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Offer and until Allotment of Equity Shares pursuant to this Offer.

In accordance with current regulations and circulars issued by SEBI, our Equity Shares are required to be listed on the BSE SME within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

**61. *The Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer.***

The initial public offering price will be determined by the Book Building Process and may not be indicative of prices that will prevail in the open market following the Offer. The market price of the Equity Shares may be influenced by many factors, some of which are beyond our control, including:

- the failure of security analysts to cover the Equity Shares after this Offer, or changes in the estimates of our performance by analysts;
- the activities of competitors and suppliers;
- future sales of the Equity Shares by our Company or our shareholders;
- investor perception of us and the industry in which we operate;
- our quarterly or annual earnings or those of our competitors;
- developments affecting fiscal, industrial or environmental regulations;
- the public's reaction to our press releases and adverse media reports; and
- general economic conditions.

As a result of these factors, investors may not be able to resell their Equity Shares at or above the initial public offering price. In addition, the stock market often experiences price and volume fluctuations that are unrelated or disproportionate to the operating performance of a particular company. These broad market fluctuations and industry factors may materially reduce the market price of the Equity Shares, regardless of our Company's performance. There can be no assurance that the investor will be able to resell their Equity Shares at or above the Offer Price.

**62. *Investors may have difficulty enforcing foreign judgments against our Company or our management.***

Our Company is a limited liability company incorporated under the laws of India. All directors and executive officers are residents of India. A substantial portion of our Company's assets and the assets of our Directors and executive officers resident in India are located in India. As a result, it may be difficult for investors to effect service of process upon us or such persons outside India or to enforce judgments obtained against our Company or such parties outside India.

Recognition and enforcement of foreign judgments is provided for under Section 13 of the Code of Civil Procedure, 1908 ("CPC"), on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded

on an incorrect view of international law or a refusal to recognize the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record. However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction.

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Section 44A of the CPC provides that where a foreign judgment has been rendered by a superior court, within the meaning of that Section, in any country or territory outside of India which the GoI has by notification declared to be in a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. However, Section 44A of the CPC is applicable only to monetary decrees not being of the same nature as amounts payable in respect of taxes, other charges of a like nature or of a fine or other penalties. Some jurisdictions including the United Kingdom, United Arab Emirates, Singapore and Hong Kong have been declared by the GoI to be reciprocating countries for the purposes of Section 44A of the CPC.

The United States and India do not currently have a treaty providing for reciprocal recognition and enforcement of judgments, other than arbitration awards, in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any federal or state court in the United States on civil liability, whether or not predicated solely upon the federal securities laws of the United States, would not be enforceable in India. However, the party in whose favor such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in the United States. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India.

Further, there may be considerable delays in the disposal of suits by Indian courts. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgment if that court were of the view that the amount of damages awarded was excessive or inconsistent with public policy or Indian law. It is uncertain as to whether an Indian court would enforce foreign judgments that would contravene or violate Indian law. However, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI under the FEMA to execute such a judgment or to repatriate any amount recovered.

**63. *The requirements of being a listed company may strain our resources.***

We are not a listed company and have historically not been subjected to the compliance requirements and increased scrutiny of our affairs by shareholders, regulators and the public at large associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations or cash flows as promptly as other listed companies.

Further, as a listed company, we will be required to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition, results of operations and cash flows. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

64. ***Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.***

Under the Companies Act, a company having share capital and incorporated in India must offer holders of its Equity Shares pre-emptive rights to subscribe and pay for a proportionate number of Equity Shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the Equity Shares who have voted on such resolution. However, if the laws of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, you may suffer future dilution of your ownership position and your proportional interests in us would be reduced.

65. ***Any future issuance of Equity Shares or convertible securities or other equity linked securities by our Company may dilute your shareholding and sales of the Equity Shares by our major shareholders may adversely affect the trading price of the Equity Shares.***

Any future equity issuances by us, including a primary offering, may lead to the dilution of investors' shareholdings in us. Any disposal of Equity Shares by our major shareholders or the perception that such issuance or sales may occur, including to comply with the minimum public shareholding norms applicable to listed companies in India may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of the Equity Shares or incurring additional debt. There can be no assurance that we will not issue further Equity Shares or that the shareholders will not dispose of the Equity Shares. Any future issuances could also dilute the value of your investment in the Equity Shares. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of the Equity Shares.

66. ***A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.***

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI Takeover Regulations.

67. ***Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.***

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as shareholders of an entity in another jurisdiction.

68. ***Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure ("ASM") and Graded Surveillance Measures ("GSM") by the Stock***

***Exchanges in order to enhance market integrity and safeguard the interest of investors.***

SEBI and the Stock Exchange have introduced various pre-emptive surveillance measures in order to enhance market integrity and safeguard the interests of investors, including ASM and GSM. ASM and GSM are imposed on securities of companies based on various objective criteria such as significant variations in price and volume, concentration of certain client accounts as a percentage of combined trading volume, average delivery, securities which witness abnormal price rise not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net worth, price / earnings multiple, market capitalisation etc. Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors which may result in high volatility in price, low trading volumes, and a large concentration of client accounts as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchange for placing our securities under the GSM and/or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchanges. These restrictions may include requiring higher margin requirements, requirement of settlement on a trade for trade basis without netting off, limiting trading frequency, reduction of applicable price band, requirement of settlement on gross basis or freezing of price on upper side of trading, as well as mentioning of our Equity Shares on the surveillance dashboards of the Stock Exchanges. The imposition of these restrictions and curbs on trading may have an adverse effect on market price, trading and liquidity of our Equity Shares and on the reputation and conditions of our Company.

69. ***Our Company's revenues and profits are difficult to predict and can vary significantly from quarter to quarter. This could cause our share price to fluctuate.***

Our Company's quarterly operating results may fluctuate from quarter to quarter depending upon various internal and external factors. Therefore, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as an indication of our Company's future performance. It is possible that in the future some of our Company's quarterly results of operations may be below the expectations of market analysts and our investors, which could lead to a significant decline of the share price of the Equity Shares.

70. ***Qualified Institutional Buyers ("QIBs") and Non-Institutional Investors were not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Retail Individual Investors are not permitted to withdraw their Bids after Bid/ Offer Closing Date.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors and Eligible Employees Bidding in the Employee Reservation Portion can revise their Bids during the Bid/ Offer Period and withdraw their Bids until Bid/ Offer Closing Date. While our Company is required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Offer within three Working Days from the Bid/ Offer Closing Date or such other timeline as may be prescribed under applicable law, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, any changes in our business, our results of operation or the financial condition of our Company, which may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

71. ***Sale of Equity Shares by our Promoters and Promoter Group in future may adversely affect the market price of the Equity Shares.***

After the completion of the Issue, our Promoters and Promoter Group will own a significant percentage of our Company's issued Equity Shares. The sale of a large number of the Equity Shares by the Promoters

could adversely affect the market price of the Equity Shares. Similarly, the perception that any such primary or secondary sale may occur, could adversely affect the market price of the Equity Shares. No assurance may be given that the Promoters will not dispose of, pledge or encumber their Equity Shares in the future.

Further, pursuant to SEBI Circular No. SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 01, 2018, Individual Investors who applies for minimum application size in public Issue may use either Application Supported by Blocked Amount (ASBA) facility for making application or also can use UPI as a payment mechanism with Application Supported by Blocked Amount for making application. For details in this regards, specific attention is invited to the chapter titled “Offer Procedure” beginning on page 284 of the Draft Red Herring Prospectus.

The process of Book Building under the SEBI ICDR Regulations is subject to change from time to time and the investors are advised to make their own judgment about investment through this process prior to making a Bid or application in the Issue. For further details on the method and procedure for Bidding, please see section entitled “Offer Procedure” on page 284 of this Draft Red Herring Prospectus.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20/- to ₹ 24/- per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22/- in the above example. The Company in consultation with the BRLM, may finalize the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22/-. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

- Check eligibility for making a Bid (see section titled “Offer Procedure” on page 284 of this Draft Red Herring Prospectus);
- Ensure that you have a demat account and the demat account details are correctly mentioned in the Bid cum Application Form;

WC Days	26	115	95	122	202	123

#### Note:

- 365 days has been considered in a year
- Holding period level (in months/days) of Trade Receivables is calculated by dividing average trade receivables by revenue from operations multiplied by number of months /days in the year/period.
- Holding period level (in months/days) of Inventories are calculated by dividing average Inventories by Cost of Goods Sold multiplied by number of months/days in the year/period.
- Holding period level (in months/days) of Trade Payables is calculated by dividing average trade payables by Total Purchases multiplied by number of months/days in the year/period.

## Justification for Holding Period Levels

<b>Inventories</b>	<p>Inventory includes raw materials, work-in-progress (WIP), and finished goods that our company maintains for production and manufacturing purposes. In our industry, inventory primarily consists of key raw material such as potatoes for manufacturing of finished goods. The absolute inventory levels have increased due to higher sales in the normal course of business and expanded production capacity following the installation of a new plant in FY 2023 - 24. On average, inventory holding has ranged between 190 and 214 days between FY 2021 – 22 to FY 2023 - 24, primarily due to the procurement cycle of our major raw material, potatoes. As a seasonal agricultural product, potatoes are procured predominantly between December and March, accounting for 80% to 90% of the company's annual raw material requirement. This procurement pattern results in an inventory holding period within the 190 to 214-day range as at year end date.</p> <p>The company has estimated an average inventory holding period of 207 days for FY 2024–25 and 191 days for FY 2026–27, which is in line with historical trends. However, for FY 2025–26, the estimated inventory holding period is expected to rise to 289 days due to inventory holding for additional production capacity, the commercial production of which is scheduled to commence on June 1, 2026. Since potatoes for the expansion project need to be procured during the peak season, the company anticipates holding raw material stock worth ₹ 2300 Lakhs as of March 31, 2026. Though, it would impact an increase in inventories as of March 31, 2026, but benefit of sales from Expansion Project will be accrued during FY 2026-27.</p>
<b>Trade Receivables</b>	<p>Trade receivables consist of debts owed by both domestic and export customers. The Company's average trade receivables have been maintained between 15 and 19 days from FY 2021–22 to FY 2023–24. Further, the Company has estimated that average trade receivables will be maintained between 20 and 26 days, which is in line with past levels. The Company anticipates continued growth in trade receivables in FY 2024–25, FY 2025–26, and FY 2026–27 due to the ongoing addition of new customers, the opening of a new B2C segment in December 2024, and the expansion of production capacity through new facility additions.</p> <p><b>Increase in Revenue from Operations</b></p> <p>We expect revenue from operations to continue rising in FY 2024–25, FY 2025–26, and FY 2026–27 as the Company enters the B2C segment under the brand  in December 2024 and continues to expand its B2B customer base. Additionally, the Company is investing in capital expenditure through this IPO, which will result in a corresponding increase in trade receivables in absolute terms.</p>
<b>Trade Payables</b>	<p>Trade payables refer to the amounts a company owes to its suppliers for goods or services received on credit, representing trade payables. They typically arise from routine business activities, such as purchasing raw materials, inventory and other services, with the agreement to pay later. The average trade payable was maintained between 114 days to 179 days between FY 2021 – 22 to FY 2023 – 24. The 80% to 90% of annual requirement is procurement of company's raw material i.e. potato is between December to March, hence trade payable levels are between 114 days to 179 days of annual purchases.</p> <p>The company has estimated to maintain average trade payable level at 108 days and 113 days for FY 2024 – 25 and 2025 – 26. Further, the company plans to strengthen its financial position by utilizing IPO funds to optimize working capital and accelerate payments to suppliers which will lead to payment to creditors and reduction in the outstanding days payable. Hence, trade payables days are estimated at lower levels for FY 2026 – 24 which will enable our Company to get better terms from our vendors.</p>
<b>Working Capital Cycle</b>	<p>The working capital cycle of company was ranging from 26 days to 115 days between FY 2021 - 22 to 2023 - 24. Further, the working capital cycle have been estimated at 122 days for 2024 – 25 and 123 days for 2026 – 27. The company has estimated the working capital days at 202 days for FY 2025 – 26. The company's working capital cycle is estimated to increase for 2025-26 because the company plans to hold raw material stock worth ₹ 2300 Lakhs as of March 31, 2026, for the Expansion Project, which is set to commence commercial operation by 1<sup>st</sup> June, 2026. The company's major raw material is potatoes, which are a seasonal agricultural product. The company procures 80% to 90% of its annual</p>

	raw material requirement between December to March every year.
<b>Short Term Borrowings</b>	Short-term borrowings comprise working capital loans (CC/LC limits, pre-shipment credit, post-shipment credit, export bill discounting, and OD limits) from banks to finance the company's working capital requirements. The company currently has a regular working capital limit of Rs. 2,500 lakhs an additional limit of Rs. 800 lakhs for seasonal purchase during peak season. HDFC Bank has sanctioned an additional limit of Rs. 1,500 lakhs for the new plant, which will be released upon the commencement of commercial production at the additional facility.
<b>Other Liabilities</b>	Other liabilities primarily include items such as payable for employee benefits, payables for statutory and other authorities, advance from customers, and other similar obligations. Other current liabilities have been increased due to requirement of manpower in FY 2024 – 25, FY 2025-26 resulting increase in obligations due to increase in business in ordinary course and increase in advance from customers.
<b>Short Term Provisions</b>	Short term provisions primarily include provision for taxation, provision for employees' benefit, short term provisions. The provisions have been maintained in line with the increase of projected business income/expenses for the forthcoming years.
<b>Cash and Cash Equivalents</b>	The category of cash and cash equivalent comprises of cash in hand, bank balance and fixed deposit with original maturity of less than 12 months held with bank.

## SECTION VIII – ABOUT THE ISSUER COMPANY

### INDUSTRY OVERVIEW

#### Industry Overview and Market Analysis : Food Processing

##### Introduction

India is the fifth largest economy in the world and expected to be the fastest-growing economy among major G20 countries, with GDP growth estimated to be around 8% in FY24. The food processing sector has become a key contributor to India's economy over the past few years, thanks to progressive policy measures by the Ministry of Food Processing Industries (MoFPI). The sector has performed exceptionally well with an impressive average annual growth rate of 7.3% from 2015 to 2022. It has significantly contributed to Gross Domestic Product (GDP), employment, and investment, accounting for 10.54% of Gross Value Added (GVA) in Manufacturing and 11.57% in Agriculture sector in 2020-21. GVA in Food Processing sector has increased from Rs. 1.61 lakh crore (US\$ 24.60 billion) in 2015-16 to Rs. 1.92 lakh crore (US\$ 24.43 billion) in 2022-23 (as per First Revised Estimates of Ministry of Statistics and Programme Implementation).

India's diverse agro-climatic conditions allow for abundant production of cereals, pulses, fruits, and vegetables, making it a leading producer of various foods.

India was a global leader in milk production contributing ~25% to global milk production, in 2022-23. The country ranked second in vegetables and fruits and egg production and fifth in meat production, respectively, in 2022-23.

Additionally, India is the largest producer of spices in the world, with 11.26 million tonnes of major spices produced in 2022-23, as per the third advanced estimate by spices board of India. The food processing industry in India is still in its early stages, contributing less than 10% to the total food output. According to a Deloitte study on Level of Food Processing in India, processing levels were at 2.7% for vegetables, 4.5% for fruits, 15.4% for fishery, 21.1% for milk, and 34.2% for meat in 2020-21.

A strong food processing industry is essential for our nation to tackle food and nutritional security issues. Processed food offers convenience, extended shelf life, easy transport to remote areas, and improved accessibility, serving as a valuable source of nourishment. Additionally, it offers our farmers increased opportunities for better price realization and expanded selling prospects.

##### Market Size

The market size of food processing sector in India is estimated to reach US\$ 1,274 billion in 2027.

India is one of the largest populated countries in the world and is expected to continue having one of youngest populations in the world till 2030. The growing consumption of food is expected to reach US\$ 1.2 trillion by 2025-26, owing to urbanization and changing consumption patterns. The processed fruits and vegetables industry was valued at US\$ 15.4 billion in 2019. With heightened consumer awareness during lockdowns, there's increased demand for processed foods, especially in RTE/RTC, dairy, and fruit and vegetable segments.

The market size of food processing sector in India is estimated to reach US\$ 1,274 billion in 2027 from US\$ 866 billion in 2022, backed by the rise in population, changing lifestyle and food habits due to rising disposable income and urbanization.

According to the Viksit Bharat@2047 report, India's food processing sector will grow significantly, reaching US\$ 1,100 billion by FY35, US\$ 1,500 billion by FY40, US\$ 1,900 billion by FY45, and US\$ 2,150 billion by FY47.

Food and grocery market in India is the sixth largest in the world. Food processing industry contributes 32% to

this food market and is also one of the largest industries in the country, contributing 13% to total export and 6% of industrial investment. The food processing industry, within the registered factory sector, employs about 1.93 million people while the unregistered sector also employs approximately 5.1 million workers.

The employment in Food Processing Industries has increased from 17.73 lakh in 2014-15 to 20.68 lakh in 2021-22 as per the latest Annual Survey of Industries (ASI) report.

The scheme follows a cluster approach, establishing modern food processing units within well-defined agri/horticultural zones. Each park includes supply chain infrastructure like collection centres, processing units, and cold chains, along with developed plots for entrepreneurs. Under the MFP scheme 41 projects were approved, of which 24 are operational as of December 2023.
- In 2022, a Special Food Processing Fund of US\$ 263 million (Rs. 2,000 crore) was set up with National Bank for Agriculture and Rural Development (NABARD) to provide affordable credit for investments in setting up units under Mega Food Parks (MFP) and Designated Food Parks (DFP).

### **Government Initiatives**

- The Government of India (GOI) introduced the Pradhan Mantri Kisan SAMPADA Yojana (PMKSY), administered by the Ministry of Food Processing Industries (MoFPI). The scheme aims to establish modern infrastructure and streamline supply chain management from farm to retail, fostering growth in the food processing sector. It aims to enhance farmer returns, double farmers' incomes, generate employment opportunities in rural areas, reduce agricultural wastage, increase processing levels, and boost processed food exports.
- The Agro Processing Cluster Scheme under PMKSY is aimed at developing modern infrastructure and common facilities to facilitate the establishment of food processing units based on a cluster approach. This involves connecting groups of producers/farmers with processors and markets through a well-equipped supply chain. Each agro-processing cluster includes Basic Enabling Infrastructure (such as roads, water supply, power supply, drainage, ETP) and Core Infrastructure/Common facilities (including warehouses, cold storages, IQF, tetra pack, sorting, grading) along with at least 5 food processing units requiring a minimum investment of Rs. 25 crore (US\$ 3 million). The units are established simultaneously with the creation of common infrastructure, requiring at least 10 acres of land arranged either through purchase or lease for a minimum of 50 years.
- The "Integrated Cold Chain and Value Addition Infrastructure" Scheme under PMKSY was launched to establish uninterrupted cold chain facilities from farm to consumer, including pre-cooling, storage, and distribution. It encompasses various temperature-controlled storage, packing, and transportation facilities for diverse products like horticulture, dairy, and meat.
- The cold chain infrastructure created by 372 completed cold chain projects under this scheme until October 2023 involve 10.3 lakh MT of Cold Storage, Controlled Atmosphere (CA)/Modified Atmosphere (MA) Storage and Deep Freezer, 335 MT per hour of Individual Quick Freezing (IQF), 175.8 Lakh Litres Per Day (LLPD) Milk Processing/Storage, and 1860 reefer vehicles. Milk processing capacity is expected to double from 53.5 MMT to 108 MMT by 2025.
- The Mega Food Park (MFP) Scheme was launched under PMKSY to integrate agricultural production with the market by bringing together farmers, processors, and retailers. The scheme follows a cluster approach, establishing modern food processing units within well-defined agri/horticultural zones. Each park includes supply chain infrastructure like collection centres, processing units, and cold chains, along with developed plots for entrepreneurs. Under the MFP scheme 41 projects were approved, of which 24 are operational as of December 2023.
- In the Union Budget 2018-19, a new initiative called "Operation Greens" was introduced, modelled after "Operation Flood," with a budget of Rs. 500 crore (US\$ 71.5 million). This scheme was launched to boost Farmer Producers Organizations (FPOs), agri-logistics, processing facilities, and professional

management, focusing initially on Tomato, Onion, and Potato (TOP) value chains since November 2018. As part of the "Aatmanirbhar Bharat Package" to revive the economy post the COVID-19 supply chain disruptions, short-term measures under the scheme were extended from TOP crops to all fruits and vegetables (TOTAL). Furthermore, in the Union Budget 2021-22 speech, the coverage of long-term interventions, specifically Integrated Value Chain Development Projects initially targeting TOP crops, was expanded to include 22 perishable crops.

- MoFPI initiated the PM Formalisation of Micro food processing Enterprises Scheme (PMFME) nationwide to aid micro food processing enterprises with financial, technical, and business assistance for upgrading operations.
- The One District One Product (ODOP) scheme under PMFME was launched to reap the benefit of scale in terms of procurement of inputs, availing common services and marketing of products. It aims to provide the framework for value chain development and alignment of support infrastructure. ODOP approved for 713 districts in 35 States/UTs with 137 unique products.
- The Branding and Marketing support scheme provides 50% financial grant to groups of FPOs, Self Help Groups (SHGs), cooperatives to promote their existing or proposed brands to market their processed food products under the scheme.
- Food processing units qualify for complete profit exemption in the first five years and 25 percent (30 percent in case of companies) for next 5 years. 100% deduction permitted on capital expenditure for cold chain or warehouse.
- Loans to food and agro-based processing units and cold chain have been classified under agriculture activities for Priority Sector Lending (PSL).
- Government allows 100% FDI in the food processing sector under the automatic route, facilitating a straightforward and efficient investment process.

### **Road Ahead**

The Indian food processing sector offers a promising growth journey ahead and presents several opportunities with the sector being recognised as a key priority industry under the “Make in India” initiative. The MoFPI has undertaken several initiatives aimed at enhancing infrastructure and fostering food processing industries to stimulate investment in this domain. The Indian Government has sought to involve multiple stakeholders to improve interactions between farmers, processors, distributors, and retailers to establish strong supply chains linking farmers to processing and marketing to empower them with nearby grading and storage facilities which will enhance the value of their products.

There are substantial investment prospects totalling US\$ 2.36 billion across 31 projects under Common Infrastructure for Industrial Parks which includes facilities such as specialized processing units, effluent treatment plants, testing laboratories, common warehouses, and logistics support. Foreign investment opportunities in India's food processing sector are also promising due to favourable policies, a vast consumer market, and government initiatives focused on improving the sector's competitiveness and sustainability.

Upon the conversion of our Company into a public limited company, pursuant to resolutions passed by our Shareholders on August 5, 2024, the name of our Company was changed to “Shivashrit Foods Limited” (“SFL”) and a fresh certificate of incorporation dated October 4, 2024, having CIN number U15490UP2017PLC096223 was issued by the RoC.

#### BUSINESS OVERVIEW

Our company is manufacturer, supplier and exporter of potato flakes. Our Company has a dedicated potato processing and manufacturing facility at Aligarh in Western Uttar Pradesh, India for production of potato flakes.

We specializes in manufacturing of premium-grade potato flakes, used in ready-to-eat meals, snack foods, and processed food products. Our product’s portfolio is designed to cater to the specific requirements of both global and domestic food manufacturers, offering consistency in quality and a long shelf life.

The major raw material used in manufacturing of potato flakes are Potatoes. We procure potatoes directly from farmers, third party suppliers and traders. The peak season for procurement of potatoes is December to March, which is harvesting season. Our company procures appx. 80% - 90% of annual requirement of potatoes during peak season. We have direct access to the farmers in the radius of 200 kilometers from our manufacturing unit. This extensive network of farmers enables us to ensure a steady supply of high-quality potatoes. We work closely with the farmers to uphold strict quality standards at every stage of production, from planting to harvesting, by maintaining end - to end oversight of the procurement process. Thus, we ensure that the freshest and highest quality of the potatoes are delivered to our processing facilities. We offer competitive pricing and timely payments, ensuring that farmers are rewarded for their hard-work.

Potatoes, once sourced, are put through an end-to-end process, which is fully automated. The potatoes are first put through the process of washing to get rid of the larger dirt particles. These washed potatoes are there after peeled and trimmed, to prepare them for processing. These trimmed pieces are then sliced and blanched, which is a process of partial boiling, to make the potatoes soft and malleable. The blanched slices are then cooled and cooked thoroughly, before being sent for the mashing part of the process. These mashed potatoes are flattened into thin sheets that are rolled by a process called ‘drum drying’. Subsequently, these rolls are converted into flakes, which is our main product, ready for packaging and shipping. Lastly, the flakes are packaged into different sized packages, as per the requirements.

Our manufacturing unit commenced its operations in the year 2018 with an installed production capacity of 14.4 metric tons per day of potato flakes. In FY 2023-2024, our company expanded its existing potato flake processing line to increase its installed production capacity to 28.8 metric tons per day, which became operational in July 202. The unit is spread across a cumulative area of 2225 square meters (approximate 0.55 Acres). Our processing facility has been duly certified in accordance with the Food Safety and Standards Authority of India (FSSAI), International Standards for Food Safety Management Systems – ISO 22000:2018, HALAL, Global Standard for Food Safety – BRCGS from Intertek Certification Limited (UKAS certified body) and United States Food and Drug Administration (USFDA).

We process the procured potatoes at our processing facility located at Khasra No. 635, Village Mahua, Mathura Road, Tehsil Iglas, Aligarh, Uttar Pradesh – 202124, in accordance with ISO 22000:2018 standards, adhering to stringent quality protocols. The finished goods are tested in a laboratory within our processing facility to ensure the maintenance of quality standards.

Our company currently own three brands: Shivashrit,  and Flaker's. At present our products are marketed under the brand names Shivashrit and . Our company has been operating on a B2B business model since commencement of business, supplying products to industrial clients in the food and snacks industry, both domestically and internationally. ## OUR MANUFACTURING PROCESS

Our Company's primary business is manufacturing, packaging, distribution and sale of Potato Flakes. Potato Flakes are a dehydrated form of mashed potatoes, which is produced through a process of drying cooked, mashed potatoes. The process involves cooking peeled potatoes, mashing them, and spreading the mash into thin layers, which are then rapidly dried on heated drum rollers or a similar drying apparatus. After drying, the thin, crispy sheets are broken down into small flakes. Potato Flakes retains the natural taste and nutritional value of fresh potatoes, are gluten-free and offer the convenience of a dehydrated product. They are a versatile ingredient with wide range of application. .

### Process Flow Chart

The production of potato flakes involves several crucial stages that transform raw potatoes into a high-quality dehydrated product, preserving their nutritional content, flavor, and texture while ensuring a long shelf life. This organized approach maintains control over production process, ensuring that quality standards are met and that

timely deliveries are achieved.

## 1. Raw Material – Selection, Procurement and Preparation

a) **Selection** - The production of high-quality potato flakes begins with the selection of raw materials, particularly the potatoes themselves. The type of potato used plays a critical role in determining the texture, flavor, and overall quality of the final product. The potato samples are tested in our in-house lab. Potatoes with high starch content, such as Kufri Chipsona, Kufri Jyoti, Kufri Pukhraj, and Kufri Surya are commonly used for production. These varieties are preferred for their high dry matter content. Kufri Chipsona, in particular, is specifically bred for processing purposes, due to its low sugar content and high starch levels, which help minimize browning during the drying process. At raw material stage multiple quality checks are conducted by our in-house lab. . These stages are as follows:-

### 1) Potato Quality Assessment

Potatoes used in flake production must meet specific quality parameters. The initial inspection involves visual checks for physical defects such as bruises, sprouting, and decay. Further, moisture content and starch levels are tested as they significantly influence the texture and drying efficiency. Additionally, potatoes undergo pesticide residue analysis to ensure compliance with food safety regulations. Microbiological testing is also conducted to detect any bacterial, yeast, or mold contamination, ensuring that the potatoes are safe for processing.

### 2) Additional Ingredients Testing

Other ingredients, such as preservatives, emulsifiers, or additives, undergo separate quality tests. Purity, moisture content, and compositional analysis are performed to ensure that they meet the required standards and do not introduce contaminants into the final product.

b) **Procurement** - The bulk of the company's potato purchases take places during the peak harvest season, i.e. from December to March, primarily from Uttar Pradesh, Punjab, and Gujarat. The below given statewide data

Particular	Financial Year As on December 31, 2024		Financial Year As on March 31, 2024		Financial Year As on March 31, 2023		Financial Year As on March 31, 2022

Harayana	0.00	0.00	32.72	0.87	0.00	0.00	1.58	0.09
<b>Total</b>	<b>3685.71</b>	<b>100.00</b>	<b>3763.83</b>	<b>100.00</b>	<b>3003.06</b>	<b>100.00</b>	<b>1806.45</b>	<b>100.00</b>

By sourcing the majority of its annual requirements during the peak season, the company is benefited of favorable prices resulting into maximize profitability and minimizing exposure to price spikes. These potatoes are procured from, farmers through third party Suppliers and traders. To supplement supply, our company purchases from other regions during the off-harvest months. For instance, Gujarat provides potatoes later in the season, helping to bridge supply gaps between harvests.

c) **Preparation** - Upon arrival at our processing facility, the potatoes are thoroughly washed to remove dirt, debris, and any residual pesticides, ensuring hygiene and quality for the final product. This is followed by thorough washing to ensure the potatoes are clean and ready for processing. After wash, density

separators are used to sort the potatoes based on quality and suitability, ensuring that only the best raw materials are selected for processing. Following sorting, the potatoes undergo an automatic steam peeling process.

### Processing Stage Testing

Once the raw materials, pass the initial quality checks, proceed through various processing stages, each requiring specific quality assessments.

## 2. Peeling, Trimming and Slicing

Potatoes undergo steam peeling, which efficiently removes the skin without damaging the flesh. Steam is injected into the potatoes, causing the skin to loosen, after which it is removed using a rotating drum with abrasive surfaces. This method ensures minimal waste, while preserving the integrity of the potatoes, forming the foundation for the next stages. After peeling, the potatoes are transferred to the trimming stage, where semi-skilled workers manually inspect and trim away any blemishes, discoloration, or imperfections. Only the finest potatoes are transferred to the slicing stage, where they are mechanically sliced into thin, uniform pieces using sharp knives. Consistency in slice size is crucial for uniform cooking and drying, ensuring the production of high-quality flakes.

## 3. Blanching, Cooking and Mashing

Blanching is a critical step that helps in enzyme inactivation and microbial reduction. To preserve the texture and flavor, the sliced potatoes undergo blanching, where they are immersed in hot water at precisely 72°C to deactivate enzymes and enhance color. During this step, excess starch is removed, improving the texture and overall quality of the final product. After blanching, the slices are rapidly cooled using a screw cooler to maintain optimal quality and prevent overcooking.

Once cooled, the potato slices are steamed in a specialized cooker until they reach a temperature of 98°C. This step ensures thorough cooking and starch gelatinization, enhancing the final texture of the flakes. After cooking, the potatoes are transferred to a ricer, which mashes them into a smooth, uniform consistency. Emulsifiers are then added to the mash to improve texture and stability, ensuring the final product meets the highest quality standards.

#### 4. Emulsifiers

During the processing of potatoes into flakes, emulsifiers play a crucial role in maintaining a uniform mixture of water and fats, preventing phase separation. This ensures that the potato mash used for making flakes has a consistent texture, which is essential for producing high-quality, uniform flakes. In addition to texture improvement, emulsifiers also help in extending the shelf life of potato flakes by reducing the risk of rancidity in fat-containing products. Commonly used emulsifiers in potato flakes production include distilled monoglycerides (DMG), which are safe for consumption and approved for food processing.

#### 5. Drum Drying & Flaking

The mashed potatoes are dried using a drum dryer, where steam is injected into the drum to evaporate moisture and form a thin sheet of dried potato. This sheet is then removed from drum and flaked using rollers or milling elements to produce thin, crispy potato flakes. The flakes are sieved to eliminate any undersized or oversized particles, ensuring uniformity and consistency in texture and size.

#### 6. Final Inspection & Packaging

After the flakes are dried and processed, they undergo rigorous quality control checks. Moisture content, texture, and flavor are assessed to ensure that the product meets our strict quality standards. The final flakes are then packaged in High Density Polyethylene (HDPE) bags, ensuring they remain fresh and are protected during transportation and storage. Our packaging process includes vacuum-sealing using airtight bags to preserve the quality and extend shelf life of flakes. As per customer requirements, the

flakes are also milled into potato flour and sold.

### **Finished Product Testing**

Once the potato flakes are produced, they undergo through the multiple tests to confirm they meet the desired quality standards before packaging.

a) ***Moisture Content & Texture Analysis***

Moisture content is one of the most critical parameters, as excess moisture can lead to microbial growth and spoilage, whereas insufficient moisture can affect the texture and rehydration properties. The flakes are also evaluated for their texture to ensure they are neither too brittle nor too dense.

b) ***Particle Size & Bulk Density Testing***

The consistency of flake size is checked to ensure uniformity. Bulk density is also tested, as it affects packaging efficiency and the usability of the product in different applications.

c) ***Rehydration Test***

Potato flakes are expected to rehydrate quickly and uniformly when mixed with hot water. A rehydration test is performed to evaluate their absorption capacity and texture post-hydration, ensuring they meet consumer expectations.

d) ***Sensory & Nutritional Evaluation***

A sensory analysis is carried out to assess the colour, taste, aroma, and overall mouth feel of the product. This step ensures that the flakes retain the natural flavour of potatoes and do not exhibit any undesirable tastes or odours. Additionally, a nutritional analysis is performed to verify that the product meets the declared nutrient values, such as carbohydrate, protein, and fat content.

e) ***Microbiological & Safety Testing***

Finished potato flakes are subjected to microbiological testing to detect the presence of harmful pathogens like Salmonella, Escherichia coli, yeast, and mold. These tests ensure that the product is safe for consumption and meets food safety regulations.

### **7. Quality Control and Testing**

Our products are tested for standard quality and assurance processes before being packed and dispatched to customers. Our quality control and assurance in house team comprise of 5 personnel. Based on the nature of our product, the testing and quality team performs various tests on the finished products to ensure that the product maintains its quality standards in terms of its physical and chemical characteristics

and to check on any microbiological activity testing and analysis.

### Packaging

### Utilities

The production process is supported with utilities and other plant and machineries involved, which supports the whole production process.

Water is a crucial component of the process of manufacturing potato flakes. Potable water that meets food safety standards is used throughout the processing stages, from washing and peeling the potatoes to cooking and mashing. Additionally, clean water is required to maintain boiler efficiency and optimum availability. As such the access to clean, reliable water sources is essential for maintaining the hygiene and quality of the final product.

#### a) Reverse Osmosis system

Reverse osmosis, commonly referred to as RO, is a process where a large portion of dissolved solids and other contaminants are removed from water by forcing the water through a semi-permeable reverse osmosis membrane. RO can remove 95-99% of dissolved salts (ions), particles, colloids, organics, bacteria, and pyrogens from feed water. A RO membrane rejects contaminants based on their size and charge.

b) Boiler with Furnace

A boiler is an enclosed vessel that provides a means for combustion heat to be transferred into water until it becomes heated water or steam. The hot water or steam under pressure is then usable for transferring the heat to the production process. The boiler system comprises of feed water system, steam system and fuel system. The company has a Coal/briquettes fueled boiler installed at its premises. Appropriate measures have been taken for the protection of the environment by installation of furnace.

c) Chiller

In industrial applications, chilled water or other coolant liquid from the chiller is pumped through process. Industrial chillers are used for controlled cooling of products, mechanisms and factory machinery. It typically come as complete, packaged, closed-loop systems, including the chiller unit, condenser, and pump station with recirculating pump, expansion valve, no-flow shutdown, internal cold water control. Water is the most commonly used coolant within process chillers.

d) ETP – Effluent Treatment Plant

An Effluent Treatment Plant (ETP) is a facility that treats industrial wastewater before it is released into the environment. ETPs use physical, chemical, and biological processes to remove contaminants from wastewater. This ensures that the water meets environmental regulations and is safe for the public and ecosystems.

## RAW MATERIAL

### 1. Potatoes – Primary Raw Material

Potatoes are the primary raw material in the production of potato flakes, with their quality and grade significantly influencing the quality of the final product. To ensure high standards, strict selection and inspection are conducted at multiple stages using both electro-optical and manual systems.

- **Variety Selection:** High-starch varieties such as Kufri Chipsona, Kufri Jyoti, Kufri Pukhraj, and Kufri Surya are preferred for their high dry matter content, essential for achieving the desired texture and consistency in flakes.
- **Quality Standard:** Potatoes must meet specific quality standards before processing, with minimal defects like bruises, scabs, or green spots, as these affect taste, color, and texture. Additionally, low sugar content is required to prevent excessive browning during drying, which can lead to undesirably dark flakes.
- **Sourcing:** Potatoes are primarily sourced from major potato-growing regions in India, including Uttar Pradesh, Punjab, Gujarat known for producing potatoes with the ideal size, shape, and starch content for processing. This regional diversification also mitigates risks associated with location-specific challenges. The company procures potatoes from farmers, third party traders and Suppliers. Each region has different harvesting periods, allowing the company to align its procurement strategy with seasonal cycles and ensure availability of fresh, high-quality potatoes year-round.

### Supplier Identification and Selection

SFL source the majority of its raw material, i.e. potatoes, through open market operations and from legacy traders and farmers in the nearby regions. This strategy provides flexibility and allows the Company to capitalize on favorable market prices. Key selection criteria for traders include a strong delivery history, solid industry reputation, verified financial stability, and competitive, flexible pricing aligned with market trends. Traders must also demonstrate the capacity to meet volume and quality requirements and offer favourable contract terms. For small and medium farmers, criteria include adequate land holdings, a proven ability to deliver high-quality produce, and financial stability to reduce supply risk. Farmers with larger land areas are preferred; however, smaller-scale farmers are aggregated to meet volume demands.

All the raw material suppliers of our Company are domestically located and our Company does not procure any raw material from suppliers located overseas. Further, our Company do not enter into any contracts / agreements with its raw material suppliers.

## Cold Storage for Raw Potatoes

Potatoes, being a perishable commodity with a limited shelf life, require cold storage to preserve quality and texture over extended periods. Given SFL's procurement cycle, which peaks between December to March, it is essential to store sufficient quantities of potatoes to support year-round production, while minimizing spoilage and wastage. SFL uses a combination of third-party and promoter-owned cold storage facilities to preserve potatoes for year-round continuous production. Third party Cold Storage is used based on demand forecasts and space requirements, optimizing costs as needed. A cold storage facility is available adjacent to SFL's manufacturing facility, operated under M/s. Nishant Cold Storage (Promoted by promoters of SFL), for which our Company has entered into a rent agreement with M/s. Nishant Cold Storage for renting it's cold storage facility on pay as per use basis. It also has advantages like cost savings and streamlined logistics. This transaction is at arms' length.

Additionally, the company leverages market opportunities to purchase potatoes at lower market prices. If favourable pricing conditions arise outside the main procurement season, the company makes additional purchase to build up inventory. This ensures a buffer of raw materials to offset high potato prices, thereby minimizing procurement costs and maximizing profit margins.

The company's production facility is located in Aligarh, which is in close proximity to a network of local potato farmers, offering both logistical and cost benefits. Aligarh is a significant contributor to the potato production in Uttar Pradesh. The district has produced over tons of potatoes, making it a key area for both local consumption and supply to other States. Its strategic location, near major urban centers such as Delhi and Agra, further strengthens its position in the potato supply chain. This location advantage ensures a reliable, year-round supply of high-quality raw potatoes. By sourcing raw materials locally, the company not only reduces transportation costs but also shortens its supply chain, which enhances overall operational efficiency. This proximity also enables closer collaboration with farmers, fostering sustainable relationships and greater control over raw material quality.

Storage is managed flexibly, based on demand forecasts and space requirements, to optimize costs. A cold storage facility adjacent to SFL's manufacturing facility, operated in the name of M/s. Nishant Cold Storage, is leased to the company, providing cost savings and streamlined logistics.

## **BUSINESS STRATEGY**

### **1. Expansion with a new plant setup in the existing facility**

To meet the growing demand of our products from our existing customers and to the requirements of new customers, we intend to expand our manufacturing capacity for the existing product. The new plant will be set up alongside the existing / current facility to increase the production capacity. We intend to expand our manufacturing capabilities by installing additional factory building, machineries and equipment and utilities to increase our installed capacity by an additional 52.8 MT/ Day. The facility will ensure that the company can efficiently scale operations, reduce bottlenecks, and maintain a steady supply of potato flakes to its expanding market. With the proposed expansion, our aggregate installed capacity is expected to increase to ~ 82 MT/ Day.

### **2. B2C Segment launch and enhancement of brand visibility**

The company's Business-to-Consumer (B2C) product line, launched under the brand name , marked its entry into the retail segment. The brand was introduced in December 2024 and primarily focusing on Delhi NCR region other metropolitan cities across India.  embodies the company's dedication to providing high-quality potato flakes, enhancing brand visibility, and capturing a significant share of the retail market. This shift toward a direct-to-consumer model will enable the company to diversify its sales channels, enhance brand visibility, and capture a larger share of the retail market.

### 3. **Establishing strong customer relationships including the global footprint**

Establishing strong relationships with customers is essential for the company's growth strategy. Building customer loyalty through personalized experiences, responsive customer service, and engagement initiatives helps drive repeat business, enhance brand reputation, and increase market share. These strong relationships will not only improve operational efficiency but also support the successful launch and sustained growth of the new B2C segment of the company.

### 4. **Strengthening long-term supplier relationships and procurement processes**

The company aims to gradually reduce its dependence on open market purchases by establishing long-term relationships with regional farmers and reputable traders. While the flexibility of open market purchases will play a crucial role in procurement, forming long term relationships with suppliers is intended to secure a more stable and predictable supply of high-quality potatoes. By engaging directly with farmers, the company ensures greater control over raw material quality and can negotiate more consistent pricing, reducing exposure to seasonal price spikes and fluctuations. Establishing long term partnerships with reliable traders also helps SFL streamline procurement operations, ensuring a resilient supply chain that can better withstand market conditions. This strategic shift is central to the company's vision of cost-effective, reliable sourcing that aligns with its growth and quality objectives.

### 5. **Tapping increasing demand for ready to eat category, wide range of applications and untapped retail market in India**

India's ready-to-eat (RTE) food segment is experiencing significant growth, driven by shifting consumer lifestyles, increasing urbanization, rising disposable incomes, and a growing preference for convenience. The RTE category is particularly appealing to busy consumers who seek nutritious, convenient, and affordable meal options. These trends are not only transforming the food landscape but also opening up vast opportunities in both domestic retail and international exports.

While potato chips and other potato-based snacks (like fries) are well-established in the Indian market, potato flakes remain under-exploited. This product can cater to both traditional snack lovers and new-age consumers who seek healthier, more versatile snack options.

Potato Flakes offer versatility in both snack applications and culinary uses (e.g., as an ingredient in gravies, soups, or as a ready-to-cook component for homemade recipes). In recent years, Indian consumers have become more open to innovative snack offerings. Potato Flakes, with their ability to be used as a base for flavoured snacks or incorporated into a variety of recipes, fit well into the growing demand for multi-functional foods. The trend toward healthier eating—with a preference for snacks that are easy to prepare, yet convenient, tasty, and sometimes nutritious—can drive adoption of potato flakes.

Company is looking forward to establish its Retail Brand and invest in consumer education to explain the benefits and versatility of the product, such as its use in cooking or as an alternative to regular chips.

## COMPETITION

The potato flakes industry is characterized by intense competition, driven by the presence of both established players and emerging entrants. Competitors range from large-scale manufacturers with extensive distribution networks to smaller, localized producers catering to niche markets. Companies in this sector compete on factors such as product quality, pricing, production capacity, innovation, and brand recognition. Additionally, the growing demand for ready-to-eat and processed food products has attracted new players, further intensifying market dynamics. For SFL, maintaining strong relationships with key B2B clients, investing in advanced technology, and consistently delivering high-quality products are critical strategies to strengthen its competitive position. The company's entry into the B2C segment also opens opportunities to diversify its market presence, directly engage with consumers, and establish a robust brand identity in the retail space.

## INFRASTRUCTURE & UTILITIES

### ELECTRICITY AND POWER

Our manufacturing process requires an uninterrupted and constant power and fuel supply. An adequate and cost-effective supply of electrical power, fuel and water is critical to our manufacturing process. Power requirement in

our manufacturing facility is sourced through the State Electricity Board. In addition to the electricity connection, the company has a backup Diesel Generator (DG) system in place of a capacity of 11 KVA. The diesel generator is activated in the event of an electricity outage, ensuring that production processes are not disrupted. This backup power solution enhances operational reliability and minimizes downtime.

With respect to the production process, coal/briquettes are two fuel sources used for industrial boiler installed at the unit. This is to meet the energy needs for the production process, including boiling and other thermal requirements essential for potato processing. Coal ensures a stable and cost-effective power source for the continuous operation of machinery and equipment in the facility.

## **WATER**

Water plays a crucial role in the operations of the potato flakes manufacturing facility. Aligarh has a relatively high-water table, with groundwater levels ranging from 10 to 30 meters below the surface. The company sources groundwater for its manufacturing processes, ensuring a reliable and consistent supply for various stages of production. Groundwater is primarily used for washing and cleaning the potatoes before processing, as well as for other essential functions such as cooling, steam generation, and cleaning the production equipment. The company has installed a Submersible duly operated by an electric motor. The company has approval from the Ground Water Department Uttar Pradesh for such extraction of ground water.

**ANNEXURE 39 : EMPLOYMENT BENEFIT OBLIGATIONS**

**Gratuity & Leave Encashment** - The Present value of obligation is determined based on actuarial valuation using the Projected Unit Credit Method. This method considers each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

**Interest cost:** It is the increase in the Plan liability over the accounting period resulting from the operation of the actuarial assumption of the interest rate.

**Current Service Cost:** is the discounted present value of the benefits from the Plan's benefit formula attributable to the services rendered by employees during the accounting period.

**Actuarial Gain or Loss:** occurs when the experience of the Plan differs from that anticipated from the actuarial assumptions. It could also occur due to changes made in the actuarial assumptions.

Notes :

- (1) The discount rate indicated above reflects the estimated timing and currency of benefit payments. It is based on the yield/rates available on applicable bonds as on the current valuation date.
- (2) The Salary growth indicated above is the Company's best estimate of a increase in salary of the employees in future years,determined considering the general trend in inflation, seniority, promotions , past experience and other relevant factors such as demand and supply in employment market.

In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method i.e. projected unit credit method has been applied as that used for calculating the defined benefit liability recognised in the balance sheet.

### Overview

Our company is manufacturer, supplier and exporter of potato flakes. Our Company has a dedicated potato processing and manufacturing facility at Aligarh in Western Uttar Pradesh, India for production of potato flakes.

Potatoes, once sourced, are put through an end-to-end process, which is fully automated. The potatoes are first put through the process of washing to get rid of the larger dirt particles. These washed potatoes are there after peeled and trimmed, to prepare them for processing. These trimmed pieces are then sliced and blanched, which is a process of partial boiling, to make the potatoes soft and malleable. The blanched slices are then cooled and cooked thoroughly, before being sent for the mashing part of the process. These mashed potatoes are flattened into thin sheets that are rolled by a process called ‘drum drying’. Subsequently, these rolls are converted into flakes, which is our main product, ready for packaging and shipping. Lastly, the flakes are packaged into different sized packages, as per the requirements.

We specializes in manufacturing of premium-grade potato flakes, used in ready-to-eat meals, snack foods, and processed food products. Our product’s portfolio is designed to cater to the specific requirements of both global and domestic food manufacturers, offering consistency in quality and a long shelf life.

### **PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE**

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by IIs through intermediaries with the objective to reduce the time duration from public offer closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

**Phase I:** This phase is applicable from January 1, 2019, and will continue up to June 30, 2019. Under this phase, individual investor who apply for minimum application size would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Offer closure to listing would continue to be six Working Days.

**Phase II:** This phase commenced on completion of Phase I, i.e., with effect from July 1, 2019, and was to be continued for a period of three months or launch of five main board public offers, whichever is later. Further, as per the SEBI circular No. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular No. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount will be continued till further notice. Under this phase, submission of the Application Form by individual investors who apply for minimum application size through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Offer closure to listing would continue to be six Working Days during this phase.

**Phase III:** The commencement period of Phase III is notified pursuant to SEBI press release bearing number 12/2023 and as per the SEBI Circular No. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 09, 2023, where the revised timeline of T+3 days shall be made applicable in two phases i.e. (i) voluntary for all public offers opening on or after September 01, 2023; and (ii) mandatory on or after December 01, 2023. The Offer will be made under UPI Phase III of the UPI Circulars.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the SCSBs only after such banks provide a written confirmation, in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law. Accordingly, the Offer has been undertaken pursuant to the processes and procedures under UPI Phase III, subject to any circulars, clarification or notification issued by the SEBI pursuant to the T+3 Notification. The Offer has been advertised in all edition of Times Of India (a widely circulated English national daily newspaper) and all edition of Amar Ujala (a widely circulated Hindi national daily newspaper) on or prior to the Bid/Offer Opening Date and such advertisement has also been made available to the Stock Exchange for the purpose of uploading on their websites.

All SCSBs offering the facility of making applications in public offers are required to provide a facility to make applications using the UPI Mechanism. Further, in accordance with the UPI Circulars, our Company has appointed [●] as the Sponsor Bank to act as a conduit between the Stock Exchange and NPCI in order to facilitate collection of requests and / or payment instructions of the individual investors who apply for minimum application size into the UPI mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful applicants to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the Book Running Lead Manager will be required to compensate the concerned investor.

SEBI through its circular SEBI/HO/CFD/DIL2/CIR/P/2022/45 dated April 05, 2022, has prescribed. that all individual investors applying in initial public offerings opening on or after May 01, 2022, where the application amount is up to ₹ 5,00,000, shall use UPI. ## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and the Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991, prescribed the limits and the conditions subject to which foreign investment may be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, either through the automatic route or the approval route, depending upon the sector in which foreign investment is sought to be made. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”). The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment, where applicable. The Government of India makes policy announcements on FDI through press notes and press releases. The regulatory framework, over a period of time, thus, consists of acts, regulations, press notes, press releases, and clarifications among other amendments.

The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, GoI, earlier known as Department of Industrial Policy and Promotion (“DPIIT”) has issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”) by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by DPIIT that were in force and effect as on October 15, 2020.

Pursuant to Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020, which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“**Restricted Investors**”), will require prior approval of the Government of India. Further, in the event of a transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each Applicant must seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant must intimate our Company and the Registrar to the Offer in writing about such approval, along with a copy thereof within the Offer Period.

Transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI Circular and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Circular; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI. For further details of the aggregate limit for investments by NRIs and FPIs in our Company, see “*Offer Procedure – Bids by Eligible NRIs*” and “*Offer Procedure – Application by FII/FPIs*” on page 297 and 297 respectively of this Draft Red Herring Prospectus.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer. For further details, see “*Offer Procedure*” on page 284 of this Draft Red Herring Prospectus.
