Further, the extent to which the industry and market data presented in this Draft Red Herring Prospectus is meaningful depends on the reader’s familiarity with and understanding of the methodologies used in compiling such data. There are standard data gathering methodologies in the industry in which we conduct our business, and methodologies and assumptions may vary widely among different industry sources.

FORWARD LOOKING STATEMENTS

All statements contained in this Draft Red Herring Prospectus that are not statements of historical fact constitute forward looking statements. All statements regarding our expected financial condition and results of operations, business, plans and prospects are forward-looking statements. These forward-looking statements include statements with respect to our business strategy, our revenue and profitability, our projects and other matters discussed in this Draft Red Herring Prospectus regarding matters that are not historical facts. Investors can generally identify forward-looking statements by the use of terminology such as “aim”, “anticipate”, “believe”, “expect”, “estimate”, “intend”, “objective”, “plan”, “project”, “may”, “will”, “will continue”, “will pursue”, “contemplate”, “future”, “goal”, “propose”, “will likely result”, “will seek to” or other words or phrases of similar import. All forward-looking statements (whether made by us or any third party) are predictions and are subject to risks, uncertainties and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement.

Forward-looking statements reflect our current views with respect to future events and are not a guarantee of future performance. These statements are based on our management’s beliefs and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect.

Further the actual results may differ materially from those suggested by the forward-looking statements due to risks or uncertainties associated with our expectations with respect to, but not limited to, regulatory changes pertaining to the industries in India in which our Company operates and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, technological changes, our exposure to market risks, general economic and political conditions in India and overseas which have an impact on our business activities or investments, the monetary and fiscal policies of India and other jurisdictions in which we operate, inflation, deflation, unanticipated volatility in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in domestic laws, regulations and taxes, changes in competition in our industry and incidence of any natural calamities and/or acts of violence. Important factors that could cause actual results to differ materially from our expectations include, but are not limited to, the following:

- We are highly dependent on certain key customers for a substantial portion of our revenues. Loss of relationship with any of these clients/customers may have a material adverse effect on our profitability and results of operations;
- Our Company has not entered into any long-term contracts with our clients/customers and we typically operate on the basis of projects received on hand. Inability to maintain regular project flow would adversely impact our revenues and profitability;
- We are dependent on our empanelled vendors for various software which we provide to our clients/ customers. The failure of our empanelled vendors to deliver that software in the necessary quantities, on time or to meet specified quality standards or technical specifications, could adversely affect our business and our ability to deliver orders on time;
- We are subject to project execution risks where delays arising from design changes, unanticipated site conditions, or client-related factors such as late approvals or frequent scope modifications can disrupt project timelines, increase operational costs and significantly impact our profitability;
- We generate our major portion of sales from our operations from a particular geographical region, USA and Australia. Any adverse developments affecting our operations in this country could have an adverse impact on our revenue and results of operations;
- Our reliance on overseas exposes us to risks such as geographical concentration and foreign currency exchange fluctuations, which could adversely impact our business, results of operations, and financial condition;
- Our software products owing to certain issues such as coding, configuration or any other technical error or defects could lead to Company bearing exponential costs, delay in revenues and consequently expose us to litigation;
- General economic and business conditions in the markets in which we operate and in the local, regional, national and international economies;
- Changes in government policies and regulatory actions that apply to or affect our business;

- Changes in political and social conditions in India, the monetary and interest rate policies of India and other countries;
- The occurrence of natural disasters or calamities;
- Our inability to maintain or enhance our brand recognition;
- Other factors beyond our control; and
- Our ability to manage risks that arise from these factors;

For further discussions of factors that could cause our actual results to differ, please refer the section titled “*Risk Factor*” and chapter titled “*Our Business*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on page 31, 121 and 245, respectively. By their nature, certain market risk disclosures are only estimating and could be materially different from what actually occurs in the future. As a result, actual gains or losses could materially differ from those that have been estimated.

There can be no assurance to Bidders that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, Bidders are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements to be a guarantee of our future performance.

Forward-looking statements reflect the current views as of the date of this Draft Red Herring Prospectus and are not a guarantee of future performance. These statements are based on our management’s beliefs and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect. Neither our Company, our Directors, the Syndicate Members nor any of their respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition.

In accordance with the SEBI ICDR Regulations, our Company, will ensure that the Bidders in India are informed of material developments until the time of the grant of listing and trading permission by the Stock Exchange for the Equity Shares pursuant to the Issue.

Loss of all or a substantial portion of revenue from these geographies, for any reason (including due to any recession or economic downturn, material adverse economic, social, or political developments, or material adverse social, political or economic development, civil disruptions, or changes in policies of the local government or national government in these countries) could have an adverse effect on our business results of operations, financial conditions, cash flows and future business prospects on a consolidated basis.

3. Our Company is heavily depending on Tekla Structures software. In case of reliance, any corruption, loss, or inaccessibility could have a material adverse impact on our business, results of operations, financial condition and cash flows.

The company is heavily reliant on Tekla Structures software, a specialized Building Information Modeling (BIM) software, for the design, detailing, and management of our projects. A significant portion of our operational workflow from modeling and analysis to fabrication and construction documentation is conducted within this software environment. Any disruption in access to, or corruption or loss of, Tekla Structures model files whether caused by hardware failure, software malfunction, cyber security breach, user error, license expiry, or other unforeseen circumstance could have a material adverse effect on our business.

Specifically, such incidents could result in:

- **Project delays** due to the need to reconstruct lost or corrupted models;
- **Increased costs** associated with recovery efforts, including technical support, data restoration, and potential rework;
- **Reduced productivity** and efficiency across our teams;
- **Client dissatisfaction** or breach of contract resulting from missed deadlines or compromised quality;
- **Legal and financial liabilities**, particularly where corrupted data impacts compliance, safety, or contractually agreed deliverables.

While we have not faced any instances of corruption, loss, or inaccessibility while operating Tekla Structures software that led to any adverse effect on our business or operations in Fiscals 2025, 2024 and 2023, there can be no assurance that such instances will not occur in the future. We maintain regular backups, implement control protocols, and provide training to minimize user error. We also use version control systems and cloud-based collaboration platforms to safeguard data. However, there is no guarantee that these measures will be fully effective against all forms of data corruption or loss.

Furthermore, we do not have an exclusive or long-term contractual agreement with the software provider. We do not have a formal contractual agreement with this software supplier, and as such, they are not obligated to continue their relationship with us. The loss of this relationship could have a material adverse effect on our business operations. There is no assurance that we will be able to source timely technical support, licensing renewals, or future upgrades on favourable terms. In addition, significant events affecting the supplier such as bankruptcy, changes in management, or mergers and acquisitions could negatively impact our operations. If the supplier becomes bankrupt or insolvent, we may lose access to critical software or services, which could adversely affect our operations and profitability.

4. We currently derive our revenue predominantly from the (Building Information Modeling) BIM Services. If the same is not well received by the market, our business and future prospects could be adversely impacted.

Our Company currently derives a substantial portion of its revenue from BIM services. BIM is central to our value proposition and a key differentiator in the markets we serve. The acceptance and continued demand for BIM services are therefore critical to our growth and sustainability. A significant reliance on a single service vertical like BIM exposes us to concentration risk.

If the market for BIM services fails to grow as anticipated, or if our clients or the broader construction and infrastructure industry shift towards alternative technologies, platforms, or methodologies, it could have a material adverse impact on our business, financial condition, cash flows, and future growth prospects. Additionally, changes in regulatory environments, a

decline in construction activity, delays in project investments, or budget cuts in key geographies could further affect the demand for BIM services.

Our revenue from the BIM services for the financial years ended March 31, 2025, 2024 and 2023 our revenue from BIM services contributed:

(₹ in lakhs)

BIM Services	2,104.62		83.91	1,031.14		83.09	593.49		79.77
Total	2,104.62		83.91	1,031.14		83.09	593.49		79.77

As certified by M/s. A V H K and Associates, Chartered Accountants, by way of their certificate dated June 27, 2025.

Furthermore, competition is intensifying in the BIM services sector, both from global players with advanced technological capabilities and from low-cost regional providers. If we fail to keep pace with technological advancements, software upgrades, or evolving customer expectations, we risk losing market share. Our ability to maintain a competitive edge is highly dependent on our technical expertise, continuous innovation, and ability to provide timely, cost-effective solutions.

We recognize these risks and are actively taking steps to diversify our service portfolio by exploring opportunities in adjacent segments such as precast detailing, 3D modeling for other industries, and value-added design engineering services. We are also continuously investing in talent development, software capability enhancement, and the adoption of complementary technologies like cloud-based collaboration tools and virtual construction environments.

However, there is no assurance that our future revenue will be more evenly distributed across our offerings. Customers who prefer BIM services may recall their orders for reasons beyond our control, including changes in their preferences, their perception in general, or the quality or their financial situation. Any decline in our quality standards, growing competition and any change in the demand may adversely affect our ability to retain customers. We cannot assure that we shall generate the same quantum of business, or any business at all, from this segment, may adversely affect our revenues and profitability. However, the composition and revenue generated from this segment might change as we continue to add new customers in normal course of business. We intend to retain our customers by providing services to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

5. *We are subject to project execution risks where delays arising from design changes, unanticipated site conditions, or client-related factors such as late approvals or frequent scope modifications can disrupt project timelines, increase operational costs and significantly impact our profitability, client satisfaction.*

We offer project-based services to our clients, and the timely execution of these projects is essential to our financial performance, resource optimization, and client satisfaction. However, project execution is inherently subject to several risks that can result in delays and cost escalations, ultimately impacting profitability.

One of the major contributors to project delays is design-related challenges. These may arise due to mid-project changes requested by clients, flaws or ambiguities in the initial design inputs, or revisions necessitated by evolving regulatory requirements. Each of these can result in rework, require additional approvals, or necessitate the reallocation of resources, thereby disrupting project workflows and increasing operational costs.

Client-side delays also play a critical role. These include late approvals, frequent scope modifications, delayed decision-making, or interruptions in the release of payments or funding. Such factors not only delay progress but also result in inefficiencies like idle manpower or underutilized technical capacity, which further strain our margins.

In addition, unanticipated site-specific challenges or coordination issues with other contractors may surface during the course of a project, further compounding these risks.

The cumulative effect of these challenges includes extended timelines, reduced profitability, potential contractual disputes, and in some cases, the imposition of penalties for non-compliance with agreed delivery milestones. Persistent delays or cost overruns can also erode client trust and damage our reputation in a highly competitive industry, which may adversely affect our ability to win future projects. We place strong emphasis on project planning, client communication, risk anticipation, and scope clarity at the outset of each engagement. However, despite these efforts, certain risks may be beyond our control and could materially affect our financial condition and business prospects.

6. ***We are dependent on our empanelled vendors for various software through which we provide services to our clients. The failure of our empanelled vendors to deliver this software in the necessary quantities, on time or to meet specified quality standards or technical specifications, could adversely affect our business and our ability to deliver orders on time.***

We source various software such as designing and operating system software, database software, antivirus software and other allied software products from the empanelled vendors. Our business is, therefore, heavily dependent on our relationships with empanelled vendors.

During the Fiscal 2025, Fiscal 2024 and Fiscal 2023 cost incurred towards investment in software expenses are mentioned below:

(₹ in lakhs)

Particulars	Fiscal 2025 Consolidated		Fiscal 2024 Consolidated		Fiscal 2023 Standalone	
	Amount	% of total expense	Amount	% of total expense	Amount	% of total expense
Information Technology Expenses towards payment of Subscription of Tekla Software	183.13	9.88%	133.07	14.95%	75.48	12.04%
Other Software subscription and AMC Charges	35.78	1.93%	8.12	0.91%	18.96	3.02%
Total	221.37	11.81%	141.19	15.86%	94.44	15.06%

As certified by M/s. R. M. Rajapurkar & Co., Chartered Accountants, by way of their certificate dated June 27, 2025.

We do not enter into any long-term contracts with our vendors for supply of these softwares. We place purchase orders with vendors from time-to-time basis our requirements and prices for softwares are normally based on the quotes we receive from these vendors. Thus, any failure on part of our vendors to deliver softwares in necessary quantities, to adhere to delivery schedules or to meet specified quality standards or technical specifications, could adversely affect our ability to deliver orders on time to our clients. In order to avoid occurrence of such instances, we place orders with our vendors as soon as an LOI is awarded to us.

7. ***Our Company relies on third-party software for design, modeling, and engineering execution. Any flaw or malfunction in such software may result in project delays, client dissatisfaction, reputational harm, or legal liability, which could adversely impact our operations and financial condition.***

We undertake our projects using industry-recognized software solutions developed and maintained by established third-party vendors. These software tools are critical to our design, modeling, and detailing processes, and our technical teams are trained to use them in accordance with global best practices.

We try to ensure that we regularly update to the latest software versions, follow standard quality checks at the input and output levels, and rely on the reputation and track record of the software vendors. However, if any error in the software goes undetected and leads to discrepancies in project outcomes, it may result in quality issues, customer dissatisfaction, or liability exposure.

We are exploring ways to further strengthen our quality assurance process and reduce dependency risks, including third-party validation, internal reviews, and alternative cross-checks. However, complete elimination of such risks may not be possible due to the inherent reliance on external technology platforms.

8. ***If we cannot attract and retain highly-skilled engineers, our ability to obtain, manage and operate new projects and to continue to expand existing projects may result in loss of revenue and an inability to expand our business.***

Our ability to execute and expand existing projects and obtain new clients depends largely on our ability to hire, train and retain highly skilled engineers. As on March 31, 2025, we have a total of 166 employees including 148 trained and skilled engineers. For further details in relation to our human resource, please see "Our Business" on page 85. Given our recent growth and strong demand for the engineers from our competitors, we cannot assure you that we will be able to hire or retain the number of engineers necessary to satisfy our current and future client needs. We also may not be able to hire and retain enough skilled engineers to replace those who leave. If we have to replace personnel who have left our employment, we will incur increased costs not only in hiring replacements but also in training such replacements until their productivity is enhanced. Our inability to attract and retain engineers could have a material adverse effect on our business, financial condition and results of operations.

Our business is people driven and, accordingly, our success depends upon our ability to attract, develop, motivate, retain and effectively utilise highly-skilled engineers. We believe that there is significant competition for engineers in India and that such competition is likely to continue for the foreseeable future. As a part of our strategy, our Company intends to hire individuals who can effectively promote our cutting-edge BIM, build strong client relationships and drive business growth in domestic and international markets. For further details see, “*Object of the Issue*” on page 113. If failure to hire, train and retain engineers in sufficient numbers could have a material adverse effect on our business, results of operations and financial condition.

9. We have certain outstanding litigation against us, an adverse outcome of which may adversely affect our business, reputation and results of operations.

10. We have negative cash flow from investing and financing activities in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

We have experienced negative cash flows in the past from investing and financing activities which have been set out below as per the restated consolidated financial information:

(₹ In Lakhs)

Particulars	Fiscal 2025 Consolidated	Fiscal 2024 Consolidated	Fiscal 2023 Standalone
Net Cash from Operating Activities	330.50	309.58	60.06
Net Cash from Investing Activities	(931.65)	(343.72)	(10.01)
Net Cash from Financing Activities	705.36	32.52	(25.25)

Cash flows of a company is a key indicator to show the extent of cash generated from the operations of a company to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For further details, see section titled “*Restated Consolidated Financial Information*” on page 186 and also for in detailed reason for negative cash flows, see section titled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” on page 245 of this Draft Red Herring Prospectus.

11. We have not yet placed orders in relation to the capital expenditure requirements and which are proposed to be funded out of the Net Proceeds. If there is any delay in placing the orders, or in the event the vendor is unable to perform its obligations, in part or at all, it may result in time and cost overruns and our business, prospects and results of operations may be adversely affected.

We intend to utilize a portion of the Net Proceeds for funding capital expenditure requirements. While we have procured quotations from vendors in relation to the capital expenditure to be incurred, we have not entered into any definitive agreements with any of these vendors. For details, see “*Objects of the Issue*” on page 85. Such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotation or that there will not be cost escalations. Further, the actual amount and timing of our future capital requirements may differ from our estimates due to inter alia unforeseen delays or cost overruns, unanticipated expenses, regulatory changes, and technological changes. In the event of any delay in placing the orders, or an escalation in the cost, or in the event the vendor perform its obligations in a timely manner, or at all, we may encounter time and cost overruns. Further, if the vendors express their inability or if they are unable to perform their obligations, we cannot assure you that we may be able to identify alternate vendor to provide us with the materials which satisfy our requirements at acceptable prices, which could result in the increase in capital expenditure, the proposed schedule of implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations.

12. Our Company has not entered into any long-term contracts with our customers and we typically operate on the basis of orders received. Inability to maintain regular order flow would adversely impact our revenues and profitability.

We have not entered into any long term contracts with our customers. Generally, we entered with them project base contract. As a result, our customers can terminate their relationships with us without any notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our services. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the level of service that our Company provides, quality consistency and fluctuation in demand. Although we place a strong emphasis on quality, pricing and timely delivery of our services and after service such as feedback on the trends in their market, personal interaction by the top management with the customers, etc., in the absence of contracts, any sudden change in the preference could adversely affect the business and the profitability of our Company.

13. A substantial proportion of our business is with global customers which are governed by foreign laws. Any failure to comply with the terms of such foreign laws or contractual obligations may resulting in monetary penalties, legal liabilities, and reputational damage, which could adversely affect our business, financial condition, and future prospects.

We possess extensive technical knowledge about our services, which has been built primarily through research and development and our own experiences. While we maintain domain expertise, our customers typically provide the technical specifications and project requirements, and we tailor our offerings accordingly in collaboration with such customers. Our arrangements with our customers are generally formalised through agreements, including MOU (Memorandum of Understanding), which are often governed by foreign laws. Accordingly, our obligations under these MOUs include performance benchmarks, adherence to technical standards and strict confidentiality and data protection requirements.

Any breach of terms of these MOUs could expose us to legal proceedings in foreign jurisdictions, which may involve unfamiliar regulatory frameworks, extended litigation timelines, and significant financial exposure. Any such adverse actions against us may impact our overall reputation and may deteriorate our relationship with other customers, including imposition of more stringent terms and onerous obligations. While there has been no incidence of breach of contractual obligations including confidentiality or non-disclosure obligations, in Fiscal 2025, Fiscal 2024 and Fiscal 2023, our failure to comply with the terms of such agreements in the future could have a material adverse effect on our reputation, business and our financial condition.

14. Our employee benefit expense is one of the major components of our fixed operating costs. An increase in employee benefit expense due to regulatory changes, wage inflation, or market competition may adversely affect our business.

We operate in a highly technical industry and we focus extensively on rendering the services by using professional expertise, and, therefore, technical proficiency and experience is an important factor for our employees. Consequently, our employee benefit is one of the larger components of our fixed operating costs. In the Fiscal 2025, Fiscal 2024 and Fiscal 2023, our employee benefits expense based were as set out below.

(₹ in lakhs)

Fiscal 2025 Consolidated		Fiscal 2024 Consolidated		Fiscal 2023 Standalone	
Employee benefit expense	As a % of revenue from operation	Employee benefit expense	As a % of revenue from operation	Employee benefit expense	As a % of revenue from operation
893.45	35.62%	524.62	42.27%	386.19	51.91%

Due to past economic growth and increased competition for skilled and semi-skilled employees in India, employee compensation has been rising rapidly in recent years. Our Company may need to increase our compensation levels to remain competitive in attracting and retaining the quality and number of skilled and semi-skilled employees that our business requires. Further, a shortage in the employee pool or general inflationary pressures will also increase our costs towards employee benefits.

Employee compensation in India has historically been lower than employee compensation in countries such as the US and UK, for comparably skilled professionals. Compensation increases in India could erode some of this competitive advantage and may negatively affect our profit margins. Additionally, one of our strategies is to expand our capabilities in India and in overseas markets- particularly in USA. We may need to continue to increase the levels of our employee compensation to remain competitive and manage attrition. Accordingly, a substantial long-term increase in our employee benefit expense could reduce our profitability, which could, amongst others, impact our growth prospects.

15. Our business operates in a rapidly evolving technological landscape. While our Promoter, management currently stay updated with industry developments, there is no assurance that they or our team will continue to adapt effectively. Inability to keep pace with technological changes may lead to missed project opportunities, operational inefficiencies, and loss of competitive edge.

Our business operates within evolving technological environment. Although our Promoter and management team currently make continuous efforts to stay abreast of industry trends, innovations, and technological developments, there can be no assurance that they will be able to effectively anticipate, adapt to, or implement such changes on an ongoing basis. Failure to keep pace with technological advancements may result in the Company being unable to meet evolving client requirements, adopt more efficient operational processes, or maintain alignment with industry best practices. This could lead to missed business opportunities, increased operational costs, reduced productivity, and ultimately, a loss of competitive advantage in the marketplace. Accordingly, our inability to effectively respond to technological changes may have a material adverse impact on our growth prospects, financial performance, and overall sustainability.

16. We operate in a competitive industry. Any inability to compete effectively may lead to a lower market share or reduced operating margins.

We operate in a highly competitive environment in both in the Indian and overseas markets. We compete with domestic and international entities which have operations in India and in the global markets. Some of our competitors may have certain advantages, including greater financial, technical and, or, marketing resources, which could enhance their ability to finance growth, fund future expansion, and, or, operate in more diversified geographies. As a result, to remain competitive in the market we must, in addition, continue to meet exacting quality in our services offered, continuously strive to reduce our costs and improve our operating efficiencies, continue to provide technologically advanced services and innovate our services. If we fail to do so, it may have an adverse effect on our market share and results of operations. We cannot assure

you that we can continue to effectively compete with such competitors in the future, and failure to compete effectively may have an adverse effect on our business, financial condition, and results of operations. Moreover, the competitive nature of the industry that we operate in may result in lower prices for our services and decreased profit margins, which may materially adversely affect our revenue and profitability. If we are unable to continuously optimise our processes, our ability to grow and, or, compete effectively, might be compromised, which would have an adverse impact on our business operations and financial condition.

17. *Our Company is subject to foreign exchange control regulations which may expose us to currency fluctuation risks and compliance-related challenges under evolving legal frameworks.*

Our Company is engaged in international operations and cross-border transactions, we are subject to the foreign exchange control framework prescribed under Indian laws, primarily governed by the Foreign Exchange Management Act, 1999 (FEMA) and the rules, regulations, and guidelines issued thereunder by the Reserve Bank of India (RBI). These regulations control the inflow and outflow of foreign exchange, repatriation of profits, foreign investments, and overseas transactions.

In particular, any overseas investment made by our Company, Telge Projects Limited, including investments in foreign subsidiaries or joint ventures, is regulated under the Overseas Direct Investment (ODI) framework notified by the Government of India and administered by the RBI. The ODI guidelines prescribe conditions relating to the structure of investment, valuation norms, funding sources, reporting obligations, and compliance timelines.

These regulations are subject to frequent updates and interpretational changes. In the event we are unable to comply with the applicable provisions or adapt to regulatory changes in a timely manner, it may result in non-compliance, which could attract penalties, delay our ability to transfer funds, impact intercompany operations, and restrict our strategic decisions related to international expansion.

Furthermore, we are also exposed to currency fluctuation risks as we receive or remit funds in foreign currencies, particularly in relation to our subsidiary and step-down subsidiaries situated in United States, which operate in a different regulatory and currency environment. Any volatility in exchange rates, combined with regulatory compliance risks, could adversely affect our financial position, cash flows, and international business activities.

While complying with legal and regulatory requirements, there can be no assurance that we will always be able to meet all regulatory obligations or avoid the adverse effects of changes in foreign exchange control laws.

18. *Our future success will depend on our ability to effectively implement our business and growth strategies. Our failure in effectively implementing our business and growth strategies may adversely affect our results of operations.*

Our success will depend, in large part, on our ability to effectively implement our business and growth strategies. Our ability to achieve our growth strategies will be subject to a range of factors, including our ability to identify market opportunities and demands in the industry, compete with existing companies in our markets, consistently exercise effective quality control, hire and train qualified personnel to provide our services and factors which may be beyond our control. Further, we may face increased risks when we enter new markets, and may find it more difficult to hire, train and retain qualified employees in new regions. We cannot assure you that we will be able to execute our strategies in a timely manner or within budget estimates or that we will meet the expectations of our customers and other stakeholders. We believe that our business and growth strategies will place great demands on our senior management and other resources and will require us to develop and improve operational, financial and other internal controls. Further, our business and growth strategies may require us to incur further indebtedness. Any inability to manage our business and growth strategies could adversely affect our business, financial condition and results of operations. Further, our business is to a large extent driven by our internal systems and control mechanism. Therefore, our continued growth is intrinsically linked to our being able to maintain adequate internal systems, processes and controls and, in order to manage our growth effectively, we must implement, upgrade and improve our operational systems, procedures and internal controls on a timely basis. Our failure to maintain such systems or to implement, upgrade or improve our systems could stymie our growth. For details, see “*Our Business – Strategies*” on page 133. We cannot assure you that we will be able to successfully implement our strategies, or we will be able to generate revenue all or any of the proposed strategies that we plan to implement.

19. *We have in the past entered into related party transactions and may continue to do so in the future and we cannot assure you that we could not have achieved more favourable terms if such transactions had not been entered into with related parties and that such transactions will not have an adverse effect on our financial conditions and result of operation.*

We have engaged in the past, and may engage in the future, in transactions with related parties, including with our Promoter, Director, Key Managerial Personnel and their relatives, on an arm’s length basis and in compliance with applicable law. Such transactions could be for salaries and remuneration, loans taken etc. A summary details of our transactions with related parties (including transactions with our Subsidiaries) are set out below:

(₹ in lakhs)

*Transactions with subsidiaries are excluded from percentage calculations as they are eliminated during the preparation of consolidated financial statements.

As certified by M/s. R. M. Rajapurkar & Co., Chartered Accountants, by way of their certificate dated June 27, 2025.

For summary of related party transactions, see “Summary of Offer Documents - Summary of Related Party Transactions” and “Restated Consolidated Financial Information” on pages 27 and 186, respectively.

While all such transactions have been conducted on an arm’s length basis in accordance with the Companies Act and other applicable laws including transfer pricing pertaining to the evaluation and approval of such transactions and contain commercially reasonable terms, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. It is likely that our Company may enter into related party transactions in the future. Such related party transactions may potentially involve conflicts of interest. We cannot assure you that such transaction, individually or in the aggregate, will always be in the best interests of our Company and/or that it will not have an adverse effect on our business and results of operations.

20. There are certain discrepancies and non-compliances noticed in some of our financial reporting and/or records relating to filing of returns and deposit of statutory dues with the taxation and other statutory authorities which may affect our revenue from operations.

In the past, our company has at several instances, delayed in filing our, GST returns, TDS returns, ESIC returns, EPF returns, Professional Tax returns and deposit of statutory dues, as a result of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes and statutory dues.

Our foreign subsidiary operates from a leased property located 8906 E Skelly Dr, Suite Tulsa, Oklahoma-74129, United States. For further details, see section titled Properties of subsidiary under chapter titled “Our Business” on page 121. We have not independently verified whether the lease agreement entered into by the subsidiary has been executed and registered in accordance with the applicable local laws of that jurisdiction. Instead, we have relied on confirmations provided by the officials of the foreign subsidiary, which has stated that, as per their understanding of the relevant local regulations, there is no requirement for prior approval or registration of the lease agreement.

However, we do not possess legal expertise in the laws of the foreign jurisdiction and have not engaged a local legal counsel to conduct a detailed due diligence or provide a formal legal opinion on the lease arrangement. In the event that the representation provided by the consulting firm or the company officials is inaccurate, or if the interpretation of local law changes or is challenged by regulatory authorities, it may result in the lease being treated as invalid, non-compliant, or unenforceable. This could lead to operational disruption at the leased premises, legal proceedings, monetary penalties, or reputational harm, all of which may have a material adverse effect on the business, financial condition, and operations of our subsidiary and, by extension, our Company.

There is no guarantee that our customers will pay us promptly or at all, which may affect the recoverability of our trade receivables. Additionally, we may struggle to manage any bad debt resulting from delayed payments. The table below outlines specific details regarding bad debts for the indicated year:

Particulars	Fiscal 2025	Fiscal 2024	Fiscal 2023
Bad debts (₹ Lakhs)	37.41	-	-

Taking legal action against our customers to enforce their contractual obligations can be challenging, and there is no guarantee that we will receive a favourable judgment or that it will be issued in a timely manner. If any of our customers fail to fulfil their contractual commitments, or if they face insolvency or liquidation, it could negatively impact our financial condition and results of operations.

25. We may not be able to prevent unauthorised use of trademarks obtained/ applied for by third parties, which may lead to the dilution of our goodwill. Failure to secure and protect our intellectual property exposes us to infringement, imitation, legal disputes, and potential loss of market share.

Our Company faces significant risks related to the protection of our intellectual property (IP). Without proper IP protections in place, we are vulnerable to competitors who may copy our services, eroding the uniqueness of our designing services offerings and potentially leading to loss of market share.

Additionally, there is the risk of inadvertently infringing on the IP rights of other companies, which could result in costly lawsuits and financial penalties. These legal challenges not only threaten our financial stability but could also damage our reputation and disrupt business operations. To mitigate these risks, it is essential for us to invest in robust legal protections to safeguard our innovations

26. *We are dependent on IT technology in carrying out our business activities and it forms an integral part of our business. If we face failure of our information technology systems, we may not be able to compete effectively which may result in lower revenue, higher costs and would adversely affect our business and results of operations*

Our continued growth depends on the ability and performance of our existing technology that is utilized and will be utilized in our operations. We have implemented various information technology and software solutions to cover key areas of our operations, procurement, and accounting. The IT team oversees various aspects of our information technology function including establishing and maintaining our systems, and other services to support our business. In some instances, we may not be able to identify the cause or causes of these performance problems immediately or in short order. This could negatively impact market acceptance of our business and our financial condition, and results of operations could be adversely affected.

Further, our various information technology and ERP systems are potentially vulnerable to damage or interruption from a variety of sources, which could result from inter alia cyber-attacks on or failures of such infrastructure or compromises to its physical security, as well as from damaging weather or other acts of nature. A critical or large-scale malfunction or interruption of one or more of our ERP systems or other IT systems could adversely affect our operations. In addition, it is possible that a malfunction of our data system security measures could enable unauthorized persons to access sensitive business data, including information relating to our intellectual property or business strategy or those of our customers. Such malfunction or disruptions could cause economic losses for which we could be held liable or cause damage to our reputation. While we have not faced any material malfunction or disruption in our IT systems, if any of these risks were to materialise it could have a material adverse effect on our business, results of operations and financial condition.

While we have not faced any attrition among our KMP and Senior Management personnel, we may be unable to hire and retain enough skilled and experienced employees to replace those who leave or may not be able to re-deploy existing resources successfully. Failure to hire or retain Key Managerial Personnel, Senior Management Personnel and skilled and experienced employees could adversely affect our business and results of operations.

The Company is presently significantly reliant on IDFC Bank Limited for its loan and credit facilities. A substantial portion of the Company's existing borrowings has been secured exclusively through this single financial institution. This concentration of financial dependence presents a potential risk to the Company's financial health and operational continuity. Any adverse developments relating to IDFC Bank Limited including changes in lending policies, interest rate revisions, or restrictions on existing credit lines may materially affect the Company's ability to meet its funding requirements and could impair the Company's liquidity position. Furthermore, this lack of diversification in financing sources may limit the Company's financial flexibility and bargaining power. The timely implementation of these objects is critical to the achievement of the Company's strategic goals, including business expansion, operational efficiency, and revenue growth. A delay in the utilisation of funds could hinder the execution of proposed projects or planned expenditures, thereby postponing the realization of anticipated benefits. This may lead to cost escalations, disruptions in operational timelines, and may ultimately impact the Company's ability to generate expected returns from the investments. Moreover, such delays may also affect the Company's competitive positioning in the market and could have a material adverse effect on its revenues, profitability, and overall financial performance. In the event of a significant uninsured loss or if we face large claims exceeding our insurance coverage, changes in our insurance terms, changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, financial condition, cash flows and results of operations. Even if our insurance coverage is adequate to cover direct losses, we may not be able to take timely or effective remedial or other appropriate actions in timely manner or at all.

Furthermore, our claim records may affect the premiums which insurance companies may charge us in the future. While we have not faced any instances of our insurance policies failing to adequately protect us against losses or claims exceeding our insurance coverage or insurance policies not being honored in full or on time that led to an adverse effect on our business or operations for the the financial year ended March 31, 2025, March 31, 2024 and March 31, 2023. We cannot assure you that deficiencies in our internal controls will not arise in the future, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls. Any inability on our part to adequately detect, rectify or mitigate any such deficiencies in our internal controls may affect ability to accurately report, or successfully manage, our financial risks, and to avoid fraud, which may in turn adversely affect our business, financial condition or results of operations. Further, given the high volume of transactions we process on a daily basis, notwithstanding the internal controls that we have in place, we may be exposed to the risk of fraud or other misconduct by employees, contractors, or customers. Fraud and other misconduct can be difficult to detect and deter. Certain instances of fraud and misconduct may go unnoticed or may only be discovered and successfully rectified after substantial delays. Even when we discover such instances of fraud or theft and pursue them to the full extent of the law or with our insurance carriers, there can be no assurance that we will recover any of the amounts involved in these cases. In addition, our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect, which may adversely affect our reputation, business, financial condition, results of operations and cash flows.

- 46. *We have taken guarantees from our promoter in relation to Debt Facilities provided to us, in an event any of these persons withdraw or terminate its/her guarantees, the lender for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities.***

We have taken guarantees from our promoter in relation to our secured debt facilities availed from our Bankers. In an event any of these persons withdraw or terminate her guarantees, the lender for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information, please see the chapter titled “Financial Indebtedness” beginning on page 244 of this Draft Red Herring Prospectus.

47. *Certain unsecured loans availed by our Company are repayable on demand. Any demand for repayment of such unsecured loans, may adversely affect our cash flows.*

As at March 31, 2025, we had availed unsecured loans aggregating to ₹ 36.75 lakhs from our directors and their relatives. The unsecured loans our Company have availed are repayable on demand. Any failure to service such indebtedness, or otherwise perform any obligations under such financing agreements may lead to acceleration of payments under such credit facilities, which may have a material adverse effect on our business, cash flows and financial conditions. For further information regarding our loans, please see “*Financial Indebtedness*” on page 244.

48. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for the objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “*Objects of the Issue*” beginning on page 85.

49. *The Directors of our Company does not have experience of being a director of a public listed company.*

The Directors of our Company do not have the experience of having held directorship of public listed company. Accordingly, they have limited exposure to management of affairs of the listed company which inter alia entails several compliance requirements and scrutiny of affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, our Company will require to adhere strict standards pertaining to accounting, corporate governance and reporting that it did not require as an unlisted company. Our Company will also be subject to the SEBI Listing Regulations, which will require it to file audited annual and unaudited half yearly reports with respect to its business and financial condition. If our Company experiences any delays, we may fail to satisfy its reporting obligations and/or it may not be able to readily determine and accordingly report any changes in its results of operations as promptly as other listed companies.

Further, as a publicly listed company, our Company will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our Company’s disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, the Board of Directors of our Company may have to provide increased attention to such procedures and their attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

50. *We have issued Equity Shares during the last one year at a price below the Issue Price*

Our Company had issued Bonus shares of 61,67,784 equity shares on June 26, 2025 in the ratio of 6:1 to the exiting shareholding in the last 12 months which may be at lower than the Issue Price. The Equity Shares allotted to shareholders pursuant to this Issue may be priced significantly higher due to various reasons including better performance by the Company, better economic conditions, and passage of time. For further details, see “*Capital Structure*” on page 74.

51. *Any variation in the utilisation of proceeds from the Issue shall be subject to applicable law.*

The funding requirements and the deployment of the proceeds from the Issue are based on the current business plan, current conditions, internal management estimates and strategy of our Company, which may be subject to changes. Accordingly, prospective investors in the Issue will need to rely upon our management’s judgment with respect to the use of Net Proceeds. Our internal management estimates may exceed fair market value or the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate capital expenditure and may have an adverse impact on our business, financial condition, results of operations and cash flows. Various risks and uncertainties, such as economic trends and business requirements, competitive landscape, as well as general factors affecting our results of operations, financial condition and access to capital, may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in our business. Thus, the use of the Net Proceeds for other purposes identified by our management may not result in actual growth of our business, increased profitability or an increase in the value of our business and your investment.

Further, in accordance with Sections 13(8) and 27 of the Companies Act 2013, we cannot undertake any variation in the utilisation of the Net Proceeds without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations. However, we will have flexibility in utilizing the balance Net Proceeds, if any, for general corporate purposes, subject to such utilisation not exceeding 15% of the Gross Proceeds from the Issue in accordance with Regulation 7(2) of the SEBI ICDR Regulations.

Additionally, our Promoter would be required to provide an exit opportunity to Shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by applicable SEBI regulations. Additionally, the requirement on the Promoter to provide an exit opportunity to such dissenting shareholders may deter the Promoter from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoter of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI. In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, or vary the terms of any contract referred to in this Draft Red Herring Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by redeploying the unutilised portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

Thus, we may not be able to utilise the proceeds from the Issue in the manner set out in this Draft Red Herring Prospectus in a timely manner or at all. As a consequence of any increased expenditure, the actual deployment of funds may be higher than estimated.

52. *We may need to seek additional financing in the future to support our growth strategies. Any failure to raise additional financing could have an adverse effect on our business, results of operations, financial condition and cash flows.*

We will continue to incur substantial expenditure in maintaining and growing our business operations and infrastructure. Our strategy to grow our business may require us to raise additional funds for our working capital or long-term business plans. While we have historically funded our capital expenditure primarily through internal accruals and cash flow from operations and during the last 3 Fiscals, we have funded our growth strategies through internal accruals and term loans from banks, we cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have.

If our internally generated capital resources and available credit facilities are insufficient to finance our capital expenditure and growth plans, we may, in the future, have to seek additional financing from third parties, including banks, and financial institutions. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. Our financing agreements may contain terms and conditions that may restrict our ability to operate and manage our business, such as terms and conditions that require us to maintain certain pre-set debt service coverage ratios and leverage ratios and require us to use our assets, including our cash balances, as collateral for our indebtedness. If we are unable to obtain such financing in a timely manner, at a reasonable cost and on acceptable terms or at all, we may be forced to delay our expansion plans, downsize or abandon such plans, which may materially and adversely affect our business, financial condition and results of operations, as well as our future prospects.

53. *We have not paid any dividends in the past years. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "Dividend Policy" on page 185 of this Draft Red Herring Prospectus.

54. *There is no guarantee that our Equity Shares will be listed on the BSE in a timely manner or at all and any trading closure at stock exchange may adversely affect the trading price of our Equity Shares. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.*

There is no guarantee that the Equity Shares will be listed on the BSE in a timely manner or at all and any trading closure at stock exchange may adversely affect the trading price of our Equity Shares. In accordance with Indian law, permission for listing and trading of the Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue. In accordance with current regulations and circulars issued by SEBI, the Equity Shares are required to be listed on the BSE within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in the Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares. Further, there can be no assurance that the Equity Shares once listed will continue to remain listed on the Stock Exchange. Indian laws permit a company to delist its equity shares on compliance with prescribed procedures including the requirement to obtain the approval of its shareholders. Further, certain instances of non-compliance with applicable laws can result in the delisting of the Equity Shares. We cannot assure you, therefore, that the Equity Shares, once listed, will continue to remain listed.

55. *The requirements of being a publicly listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

56. *The determination of the Price Band is based on various factors and assumptions and the Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares upon listing on the Stock Exchange.*

The determination of the Price Band is based on various factors and assumptions, and will be determined by our Company in consultation with the Book Running Lead Manager. Furthermore, the Issue Price of our Equity Shares has been determined by book building method. These will be based on numerous factors (For further information, please refer chapter titled "*Basis for Issue Price*" beginning on page 96 of this Draft Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares upon listing on the Stock Exchange. The price of our Equity Shares upon listing on the Stock Exchange will be determined by the market and may be influenced by many factors outside of our control.

57. *The objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution and are based on management estimates.*

Our funding requirements and proposed deployment of Net Proceeds as set out in the section "*Objects of the Issue*" at page 85 are based on management estimates and have not been appraised by any bank or financial institution. Our funding requirements are based on our current business plan and may vary based on various factors including macro-economic and other changes. In view of the dynamic nature of the industry in which we operate, we may have to revise our business plan from time to time and, consequently, the funding requirement and the utilization of proceeds from the Issue may also change. This may also include rescheduling the proposed utilization of the Issue Proceeds at the discretion of our management without obtaining Shareholders' approval. We may make necessary changes to utilisation of the Issue Proceeds in compliance with the provisions of the Companies Act. In the event of any variation in actual utilization of the Issue Proceeds, any increased fund deployment for a particular activity may be met from funds earmarked from any other activity and, or, from our internal accruals. Further, any such revision in the estimates may require us to revise our projected

expenditure which may have a bearing on our profitability. In addition to this, the estimates of the management may be inaccurate, and we may require additional funds to implement the purposes of the Issue.

Accordingly, at this stage, we cannot determine with any certainty if we will require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. Any delay in our schedule of implementation may cause us to incur additional costs. Such time and cost overruns may adversely impact our business, financial condition, results of operations and cash flows. In accordance with Sections 13(8) and 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds or in the terms of any contract as disclosed in this Draft Red Herring Prospectus without obtaining the Shareholders' approval through a special resolution. For further details of variation in objects, see "*Risk Factor - Any variation in the utilisation of proceeds from the Issue shall be subject to applicable law.*" on page 49.

58. *We have not commissioned an industry report for the disclosures made in the section titled 'Industry Overview' and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.*

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the section titled "*Industry Overview*" beginning on page 108 of this Draft Red Herring Prospectus. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Red Herring Prospectus. Further, the industry data mentioned in this Draft Red Herring Prospectus or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Red Herring Prospectus in this context.

59. *Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.*

Our restated consolidated financial information, including the financial statements provided in this Draft Red Herring Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, refer chapter titled "*Presentation of Financial Industry and Market Data*" beginning on Page 18 of this Draft Red Herring Prospectus.

Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited. India has decided to adopt the "Convergence of its existing standards with IFRS" and not the "International Financial Reporting Standards" ("IFRS"), which was announced by the MCA, through the press note dated January 22, 2010. These "IFRS based / synchronized Accounting Standards" are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed Company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards, i.e., IND (AS) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

60. Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute [●] % of the Issue Proceed.

As on date, we have not identified the use of such funds. Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute [●] % of the Issue Proceed. The deployment of such funds is entirely at the discretion of our management subject to the applicable laws and in accordance with policies established by our Board of Directors from time to time and subject to compliance with the necessary provisions of the Companies Act. For details, please refer the chapter titled “Objects of the Issue” beginning on Page 85 of this Draft Red Herring Prospectus.

61. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 5,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds and our company will have full discretion in respect of issue proceeds. However, audit committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue and as per regulation 262(5) of SEBI ICDR regulations 2018, we shall submit a certificate of the statutory auditor for utilization of money raised through the public issue to exchange while filing the quarterly financial results, till the issue proceeds are fully utilized. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

EXTERNAL RISKS

62. Recent global economic conditions have been challenging and continue to affect the Indian market, which may adversely affect our business, financial condition, results of operations and prospects.

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors’ reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India and could then adversely affect our business, financial performance and the price of our Equity Shares.

Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our equity shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders’ equity and the price of our Equity Shares.

63. Natural or man-made disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Natural disasters (such as typhoons, flooding, and/or earthquakes), epidemics, pandemics such as COVID-19, and manmade disasters, including acts of war, terrorist attacks, and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, and results of operations. Recent developments in the ongoing conflict between Russia and Ukraine has resulted in and may continue to result in a period of sustained instability across global financial markets, induce volatility in commodity prices, adversely impact availability of natural gas, increase in supply chain, logistics times and costs, increase borrowing costs, cause outflow of capital from emerging markets and may lead to overall slowdown in economic activity in India. Our operations may be adversely affected by fires, natural disasters, and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity, and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic, and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares. A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the highly pathogenic H7N9, H5N1, and H1N1 strains of influenza in birds and swine and more recently, the SARS- CoV-2 virus and the monkeypox virus. A worsening of the current outbreak of the COVID-19 pandemic or future outbreaks of SARSCoV-2 virus or a similar contagious disease

could adversely affect the global economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have a material adverse effect on our business and the trading price of the Equity Shares.

64. *Any downgrading of India's sovereign debt rating by an international rating agency could have a negative impact on our business and results of operations.*

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. Any adverse revisions to credit ratings for India and other jurisdictions we operate in by international rating agencies may adversely impact our ability to raise additional financing. This could have an adverse effect on our ability to fund our growth on favourable terms and consequently adversely affect our business and financial performance and the price of the Equity Share.

65. *Financial instability in other countries may cause increased volatility in Indian financial markets*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, United States, United Kingdom, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy.

These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition and results of operations and reduce the price of the Equity Shares.

66. *If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate thereby reducing our margins.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our clients, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or entirely offset any increases in costs with increases in prices for our services. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the Government has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

67. *We may be affected by competition laws, the adverse application or interpretation of which could adversely affect our business.*

The Competition Act, 2002, of India, as amended ("Competition Act"), regulates practices having an appreciable adverse effect on competition in the relevant market in India ("AAEC"). Under the Competition Act, any formal or informal arrangement, understanding, or action in concert, which causes or is likely to cause an AAEC is considered void and may result in the imposition of substantial penalties. Further, any agreement among competitors which directly or indirectly involves the determination of purchase or sale prices, limits or controls production, supply, markets, technical development, investment, or the provision of services or shares the market or source of production or provision of services in any manner, including by way of allocation of geographical area or number of clients in the relevant market or directly or indirectly results in bid-rigging or collusive bidding is presumed to have an AAEC and is considered void. The Competition Act also prohibits abuse of a dominant position by any enterprise. On March 4, 2011, the Government notified and brought into force the combination regulation (merger control) provisions under the Competition Act with effect from June 1, 2011. These provisions require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to and pre-approved by the Competition Commission of India (the "CCI"). Additionally, on May 11, 2011, the CCI issued Competition Commission of India

(Procedure for Transaction of Business Relating to Combinations) Regulations, 2011, as amended, which sets out the mechanism for implementation of the merger control regime in India.

The Competition Act aims to, among others, prohibit all agreements and transactions which may have an AAEC in India. Consequently, all agreements entered by us could be within the purview of the Competition Act. Further, the CCI has extraterritorial powers and can investigate any agreements, abusive conduct, or combination occurring outside India if such agreement, conduct, or combination has an AAEC in India. However, the impact of the provisions of the Competition Act on the agreements entered by us cannot be predicted with certainty at this stage. However, since we pursue an acquisition driven growth strategy, we may be affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, it would adversely affect our business, results of operations, cash flows, and prospects.

68. *The trading volume and market price of the Equity Shares may be volatile following the Issue.*

Conditions in the Indian securities market may affect the price or liquidity of the Equity Shares. Further, the market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- half yearly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

69. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time taken for such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Shareholders. For example, the exchange rate between the Indian Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

70. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax ("STT") is levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of listed equity shares held for more than 12 months may be subject to long-term capital gains tax in India at the specified rates depending on certain factors, such as STT paid, the quantum of gains and any available treaty exemptions. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of our Equity Shares held for a period of 12 months or less will be subject to short term capital gains tax in India. While non-residents may claim tax treaty benefits in relation to such capital gains income, generally, Indian tax treaties do not limit India's right to impose a tax on capital gains arising from the sale of shares of an Indian company.

Further, the Finance Act, 2019 (“Finance Act 2019”), passed by the Parliament of India stipulates that the sale, transfer and issue of certain securities through exchanges, depositories, or otherwise shall be charged with stamp duty. The Finance Act 2019 has also clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of certain securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of certain securities, other than debentures, on a delivery basis is currently specified under the Finance Act 2019 at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. These amendments have come into effect from July 1, 2020. Under the Finance Act 2020, any dividends paid by an Indian company will be subject to tax in the hands of the shareholders at applicable rates. Such taxes will be withheld by the Indian company paying dividends. The Government of India has recently announced the Union Budget for Financial Year 2025 (“Budget”). Pursuant to the Budget, the Finance (No.2) Act, 2024 was enacted which inter alia increased the rate of taxation of short-term capital gains and long-term capital gains arising from transfer of an equity share. There is no certainty on the impact of Finance (No. 2) Act, 2024 on tax laws or other regulations, which may adversely affect the Company’s business, financial condition, results of operations or on the industry in which we operate.

- 71. *There is no guarantee that our Equity Shares will be listed on the BSE in a timely manner or at all and any trading closure at stock exchange may adversely affect the trading price of our Equity Shares. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.***

There is no guarantee that the Equity Shares will be listed on the BSE in a timely manner or at all and any trading closure at stock exchange may adversely affect the trading price of our Equity Shares. In accordance with Indian law, permission for listing and trading of the Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue. In accordance with current regulations and circulars issued by SEBI, the Equity Shares are required to be listed on the BSE within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in the Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares. Further, there can be no assurance that the Equity Shares once listed will continue to remain listed on the Stock Exchange. Indian laws permit a company to delist its equity shares on compliance with prescribed procedures including the requirement to obtain the approval of its shareholders. Further, certain instances of non-compliance with applicable laws can result in the delisting of the Equity Shares. We cannot assure you, therefore, that the Equity Shares, once listed, will continue to remain listed.

- 72. *Any future issuance of Equity Shares, or convertible securities or other equity linked instruments by us may dilute your shareholding and sale of Equity Shares by shareholders with significant shareholding may adversely affect the trading price of the Equity Shares.***

We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including a primary offering of Equity Shares including to comply with minimum public shareholding norms applicable to listed companies in India or, convertible securities or securities linked to Equity Shares including through exercise of employee stock options, may lead to the dilution of investors’ shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. There can be no assurance that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

- 73. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities.

In addition, pursuant to the Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, which has been incorporated as the proviso to Rule 6(a) of the FEMA Non-debt Instruments Rules, all investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of the Equity Shares is situated in or is a citizen of any such country, can only be made through the Government approval route, as

prescribed in the FDI Policy dated October 15, 2020 and the FEMA Non-debt Instruments Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the Government of India.

74. *Changing laws, rules and regulations and legal uncertainties, including adverse application or interpretation of corporate and tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. In such instances, and including the instances mentioned below, our business, results of operations and prospects may be adversely impacted, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. Any political instability in India, such as corruption, scandals and protests against certain economic reforms, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

Additionally, the Government of India has introduced (a) the Code on Wages, 2019; (b) the Code on Social Security, 2020; (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 which consolidate, subsume and replace numerous existing central labour legislations. While the rules for implementation under these codes have not been notified, the implementation of such laws could increase our employee and labour costs, thereby adversely impacting our results of operations, cash flows, business and financial performance.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. For instance, companies can voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which reduces the rate of income tax payable to 22% subject to compliance with conditions prescribed, from the erstwhile 25% or 30% depending upon the total turnover or gross receipt in the relevant period. Any such future amendments may affect our other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability.

Further, the GoI has announced the union budget for Fiscal 2024, pursuant to which the Finance Bill, 2023 (“Finance Bill”), has introduced various amendments. The Finance Bill has received assent from the President of India on March 31, 2023, and has been enacted as the Finance Act, 2023. We cannot predict whether any amendments made pursuant to the Finance Act, 2023 would have an adverse effect on our business, financial condition and results of operations. Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

There can be no assurance that the GoI will not implement new regulations and policies requiring us to obtain approvals and licenses from the GoI or other regulatory bodies, or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment or change to governing laws, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent in the jurisdictions in which we operate may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. It may also have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which could materially harm our results of operations or cash flows. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

We are unable to determine the impact of any changes in or interpretations of existing, or the promulgation of, new, laws, rules and regulations applicable to us and our business. If that was to occur it could result in us, our business, operations or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

75. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Individual Investors are not permitted to withdraw their Bids after Bid/ Issue Closing Date.*

Pursuant to the SEBI ICDR Regulations, Qualified Institutional Buyers and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Similarly, Individual Investors who apply for minimum application size can revise or withdraw their Bids at any time during the Bid/ Issue Period and until the Bid/ Issue Closing Date, but not thereafter. Therefore, Qualified Institutional Buyers and Non-Institutional Investors will not be able to withdraw or lower their Bids following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations or otherwise at any stage after the submission of their Bids.

It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. The Taxation Laws (Amendment) Act, 2019 introduced section 115BAA wherein domestic companies are entitled to avail a concessional tax rate of 22% (plus applicable surcharge and cess) on fulfilment of certain conditions.

The option to apply for this tax rate is available from Financial Year (FY) 2019-20 relevant to Assessment Year (‘AY’) 2020-21 and the option once exercised through filing of Form 10IC on the Income tax portal shall apply to subsequent assessment years. The concessional tax rate of 22% is subject to the company not availing any of the following deductions under the provisions of the ITA:

- Section 10AA: Tax holiday available to units in a Special Economic Zone.
- Section 32(1)(iia): Additional depreciation.
- Section 32AD: Investment allowance.
- Section 33AB/3ABA: Tea coffee rubber development expenses/site restoration expenses

- Section 35AD: Deduction for capital expenditure incurred on specified businesses.
- Section 35CCC/35CCD: expenditure on agricultural extension /skill development
- Chapter VI-A except for the provisions of section 80JJAA and section 80M.

The total income of a company availing the concessional rate of 25.168% (i.e., 22% along with surcharge of 10% and health and education cess of 4%) is required to be computed without set off any carried forward loss and depreciation attributable to any of the aforesaid deductions/incentives. A company can exercise the option to apply for the concessional tax rate by filing Form 10IC on or before the due date of filing return of income under section 139(1) of the ITA. Further, provisions of Minimum Alternate Tax (‘MAT’) under section 115JB of the ITA shall not be applicable to companies availing this reduced tax rate, thus, any carried forward MAT credit also cannot be claimed. The provisions do not specify any limitation/condition on account of turnover, nature of business or date of incorporation for opting for the concessional tax rate. Accordingly, all existing as well as new domestic companies are eligible to avail this concessional rate of tax. The Company has opted to avail the concessional rate as per Section 115BAA in the fiscal year 2020-21.

b) Deductions in respect of employment of new employees under Section 80JJAA of the ITA

The eligibility to claim the deduction is subject to fulfilment of prescribed conditions specified in sub-section (2) of section 80JJAA of the ITA. The company is presently not claiming deduction under section 80JJAA of the ITA.

c) Deduction with respect to inter-corporate dividends –Section 80M of the ITA

The amount of deduction so claimed should not exceed the amount of dividend distributed by it on or before the due date. In this case, due date means one month prior to the due date of furnishing return of income under sub section (1) of section 139 of the ITA.

The company has one associate and one group company on which company has invested and thus, the company should be eligible to claim deduction under section 80M of the ITA in respect of dividends received (if any) from these and further distributed to its shareholders subject to fulfilment of other conditions.

2. Special Tax Benefits available to Shareholders

a) Dividend Income

Dividend income earned by the shareholders would be taxable in their hands at the applicable rates. However, in the case of domestic corporate shareholder, benefit of deduction under section 80M of the ITA would be available on fulfilling the conditions. Further, Finance Act 2021 restricted surcharge to 15% in respect of dividend income.

GLOBAL PROSPECTS

Policy Uncertainty Tests Global Resilience

The global economy is at a critical juncture. Signs of stabilization were emerging through much of 2024, after a prolonged and challenging period of unprecedented shocks. Inflation, down from multidecade highs, followed a gradual though bumpy decline toward central bank targets (Figure 1.1). Labor markets normalized, with unemployment and vacancy rates returning to prepandemic levels (Figure 1.2). Growth hovered around 3 percent in the past few years, and global output came close to potential (Figure 1.3).

However, major policy shifts are resetting the global trade system and giving rise to uncertainty that is once again testing the resilience of the global economy. Since February, the United States has announced multiple waves of tariffs against trading partners, some of which have invoked countermeasures. Markets first took the announcements mostly in stride, until the United States' near-universal application of tariffs on April 2, which triggered historic drops in major equity indices and spikes in bond yields, followed by a partial recovery after the pause and additional carve-outs announced on and after April 9. Despite significant equity market corrections in early March and April, price-to-earnings ratios in the United States remain at elevated levels in historical context, raising concerns about the potential for further disorderly corrections (April 2025 Global Financial Stability Report [GFSR]). Uncertainty, especially that regarding trade policy, has surged to unprecedented levels (Figure 1.4). The degree of the surge varies across countries, depending on exposures to protectionist measures through trade and financial linkages as well as broader geopolitical relationships.

These developments come against an already-cooling economic momentum. Recent data on real activity have been disappointing, with GDP growth in the fourth quarter of 2024 trailing the forecasts in the January 2025 World Economic Outlook (WEO) Update. High-frequency indicators such as retail sales and purchasing managers' surveys point to slowing growth. In the United States, consumer, business, and investor sentiment was optimistic at the beginning of the year but has recently shifted to a notably more pessimistic stance as uncertainty has taken hold and new tariffs have been announced. In labor markets, hiring has slowed in many countries, and layoffs have risen. Meanwhile, progress on disinflation has mostly stalled, and inflation has edged upward in some cases, with an increasing number of countries exceeding their inflation targets. Services inflation, though still on a downward trend, remains above levels prior to the inflation surge, and core goods inflation has seen an uptick since November 2024. Trade has held up, but this is mostly because of an increase in Chinese exports and US imports at the end of 2024, with consumers and businesses likely front-loading ahead of tariffs that were anticipated back then and now are in place.

In the backdrop, domestic imbalances and policy gaps give rise to unbalanced growth while opening up potential fragilities. In some countries, such as China, growth in 2024 has been mainly supported by external demand. On the contrary, in the United States, private consumption—traditionally the major contributor to GDP growth—as a share of GDP has reached its highest point during the 2020s, and the fiscal deficit remains historically large. Within-country inequalities in households' income gains signal another potential vulnerability. In some cases, real GDP has recovered, but real GDP per capita has not (Figure 1.5, panel 1). In others, median income has fallen behind, whereas incomes at the top and bottom of the distribution have recovered. Meanwhile, salient indicators of the cost of living, such as house prices and rents, have increased substantially (Figure 1.5, panel 2).

Varying Momentum across Countries

The stable performance of the global economy in the past couple of years hides important differences across countries. These differences are the result of diverse shocks, structural characteristics, and policy actions. They manifest themselves in varying cyclical positions and structural forces determining the outlook.

Diminished Policy Space

Crucially, much of the available policy space has already been exhausted in many countries (April 2020, April 2021, and October 2022 WEO reports), limiting how much support policymakers can give economies in case of new negative shocks or a pronounced downturn. Many countries passed large fiscal support packages, first during the pandemic and then as energy and food prices spiked at the onset of Russia’s invasion of Ukraine. Fiscal policy was expected to pivot somewhat toward consolidation; however, on account of recent geopolitical developments, some regions are now poised to pursue fiscal expansion. After the pandemic, the decisive and forceful monetary policy response brought inflation down to near central bank targets at relatively little cost to economic activity (see Chapter 2 of the October 2024 WEO). The hardearned credibility of central banks played an important role by limiting de-anchoring of inflation expectations. But the legacies, in the form of high public debt levels and increased scrutiny of central bank decisions, remain.

High Public Debt amid Elevated Interest Rates

Fiscal support during the pandemic and at the onset of the war in Ukraine in response to spiking energy and food prices supported the recovery. But fiscal measures sharply increased debt-to-GDP ratios. Despite some reductions that have occurred and additional cuts being planned, budget deficits remain large and cast a shadow on the outlook. Fiscal space is now much tighter than a decade ago, and the fiscal adjustment required to stabilize debt ratios is at a historic high (Figure 1.12, panel 1).

Figure 1.12. Fiscal Policy Space

At the same time, debt service as a fraction of fiscal revenue is rising (Figure 1.12, panel 2). The heterogeneous increase reflects cross-country divergence in fiscal policy stances, growth and inflation patterns, and debt maturity structures, with relatively larger reliance on short-term debt in some cases. Although servicing costs remain below pandemic levels in

countries where debt was incurred under favorable conditions during COVID-19, effective rates are likely to surpass pre-pandemic levels as debt rolls over, notably those for low-income countries and some emerging market and developing economies.

After more than a decade of very low interest rates in advanced economies, real long-term government bond yields have been on the rise (Figure 1.12, panel 3), surging significantly in recent months. Higher long-term rates, initially driven by monetary policy tightening, are persisting even as the monetary policy cycle has turned, owing to a global rise in term premiums. In the United States, a combination of increased issuances, higher expected inflation, and risk premiums compounded the rise in term premiums until mid-January, when long-term interest rates moderated. The recent tariff announcements pushed them back up again.

Global Imbalances Arising from Domestic Imbalances

Rising geopolitical tensions and widening domestic imbalances—in particular, weak demand in China and strong demand in the United States—have renewed concerns about global imbalances (Gourinchas and others 2024). Other nonmarket policies and state interventions could also contribute to external imbalances.

The volume of international trade in percent of world GDP has been broadly stable, but structural changes have been taking place nonetheless. Overall, increasingly more trade has been occurring within countries historically aligned with each other rather than between them (October 2024 WEO). Moreover, since 2016–17, China and the United States have diversified their bases of trading partners, decoupling from each other in terms of export and import linkages. In some cases, this diversification has happened at a microeconomic level along the supply chain through trade rerouting and production reallocation, such as that which has taken place among emerging markets in Asia, with an increasing share of import origination for the United States and as import as well as export counterparts for China. In addition, a distinct macroeconomic dimension of trade reallocation has emerged. For example, shifting demand patterns have led Europe to import more from China in general, and from the United States in the energy sector. At the same time, Europe is exporting more to the United States in other sectors. As a result, Europe’s trade exposure to both China and the United States has increased.

The Outlook: A Range of Possibilities

The swift escalation of trade tensions has generated extremely high levels of policy ambiguity, making it more difficult than usual to establish a central global growth outlook. Therefore, this WEO presents a range of global growth projections. First is a “reference forecast” based on measures announced as of April 4. This is what is presented in the tables of this report and the WEO database. Second, a pre–April 2 forecast (with a cutoff date of late March) incorporates all prior policy announcements and economic developments since the October 2024 WEO. Third, a post–April 9 model-based forecast is used to quantify the implications of the announced pause and associated additional exemptions, as well as the escalating tariff rates between China and the United States.

Global Assumptions

The reference forecast is predicated on several projections for global commodity prices, interest rates, and fiscal policies. Acknowledging the high level of prevailing uncertainty, Below are the scenarios involving additional trade, fiscal, and structural policies as well as other plausible shocks:

- Commodity price projections: Prices of fuel commodities are projected to decrease in 2025 by 7.9 percent, with a 15.5 percent decline in oil prices and a 15.8 percent drop in coal prices offset by a 22.8 percent increase in natural gas prices, the latter driven up by colder-than-expected weather and the halt of Russian gas flow to Europe through Ukraine since January 1. Nonfuel commodity prices are projected to increase by 4.4 percent in 2025. Projected food and beverage prices have been revised upward compared with those in the January 2025 WEO Update.
- Monetary policy projections: The Federal Reserve and the European Central Bank are expected to continue to reduce interest rates in the coming quarters, albeit at different paces from one another. In the United States, the federal funds rate is projected to be down to 4 percent at the end of 2025 and reach its long-term equilibrium of 2.9 percent at the end of 2028. In the euro area, 100 basis points in cuts are expected in 2025 (with three cuts having already occurred this year), representing two more 25 basis point cuts than in the assumptions underlying the October 2024 WEO, bringing the policy rate to 2 percent by the middle of the year. In Japan, policy rates are expected to be lifted at a similar pace as assumed in October 2024, gradually rising over the medium term toward a neutral setting of about 1.5 percent, consistent with keeping inflation and inflation expectations anchored at the bank of Japan's 2% target.
- Fiscal policy projections: Governments in advanced economies on average are expected to tighten fiscal policy in 2025–26 and, to a lesser extent, in 2027. The general government structural-fiscal-balance-to-GDP ratio is expected to improve by 1 percentage point in the United States in 2025. Yet it is worth noting that under current policies, US public debt fails to stabilize, rising from 121 percent of GDP in 2024 to 130 percent of GDP in 2030. These projections do not incorporate measures that remain under discussion at the time of publication, notably, the net expansionary US budget resolution (currently, most provisions under the Tax Cuts and Jobs Act are assumed to expire at the end of 2025). In the euro area, under the reference forecast, the primary deficit in Germany is expected to widen by about 1 percent of GDP by 2030 relative to 2024 and by about 4 percent of GDP relative to the January WEO forecast for 2030, with the increase driven primarily by higher defense spending and public investment, and this is assumed to generate spillovers to France, Italy, and Spain. The euro area debt-to-GDP ratio is expected to increase from its current 88 percent to 93 percent in 2030, although there is significant uncertainty surrounding the assessment of the economic impact of the additional fiscal spending. In emerging market and developing economies, primary fiscal deficits are projected to widen in 2025 by 0.3 percentage point on average, followed by fiscal tightening starting in 2026. In China, the structural-fiscal-balance-to-GDP ratio is expected to deteriorate by 1.2 percentage points in 2025. Public debt in emerging market and developing economies continues to rise from its current level of 70 percent of GDP, reaching a projected 83 percent in 2030.
- Trade policy assumptions: Tariff announcements between February 1 and April 4, with specific details on their implementation, are included in the reference forecast. On February 1, executive orders signed by US President Donald J. Trump imposed tariffs on Canada, China, and Mexico. An additional tariff of 10 percent on all imports from China came into effect on February 4, and another 10 percent was imposed on March 4. China responded with tariffs of 10 to 15 percent on imports of select US agricultural products, energy commodities, and farm equipment, which took effect on February 10, and on imports of agricultural products, which took effect on March 10. Tariffs of 25 percent on all nonenergy goods imports from Canada (for energy, 10 percent) and of 25 percent on all imports from Mexico took effect on March 4, with the exemption of goods compliant with the United States–Mexico–Canada Agreement (USMCA). Canada announced 25 percent countertariffs on roughly 40 percent of Canadian imports of goods from the United States. Mexico indicated the intention to respond without specifying the measures to be employed, hence the reference forecast includes no additional tariff imposed on Mexican imports from the United States. The United States also expanded tariffs on steel and aluminum, effective March 12, removing all exemptions to the 25 percent tariff on steel imports and increasing the tariff rate on aluminum from 10 to 25 percent. On March 26, the United States announced a 25 percent tariff on all automobiles and auto parts, excluding US content in auto and auto parts exports. This tariff came into effect on April 3 for autos, while implementation for auto parts was postponed to May 3. The US Fair and Reciprocal Plan was introduced on April 2, imposing a 10 percent minimum tariff on all countries other than Canada and Mexico and country-specific rates as high as 50 percent for roughly 60 countries. The universal 10 percent minimum tariff took effect on April 5, and the other tariffs were set to take effect on April 9. Exemptions applied to categories of goods deemed critical, such as pharmaceuticals, semiconductors, energy, and certain minerals. Countermeasures from Canada, announced on April 3, consisted of 25 percent tariffs on non-USMCA-compliant fully assembled vehicles imported from the United States. On April 4, China announced 34 percent tariffs, matching the increase in US duties on imports from China, to take effect on April 10.

- Under the reference forecast, trade policy uncertainty is assumed to remain elevated through 2025 and 2026. The perceived unpredictability of the current trade landscape is evident from the significant spike in the daily trade policy indicator (Caldara and others 2020), which surged more than four standard deviations in just three days after April 2, despite the disclosure of the details of the expected tariffs.

Growth Forecast

In the near term, under the reference forecast, global growth is projected to fall from an estimated 3.3 percent in 2024 to 2.8 percent in 2025, before recovering to 3 percent in 2026. This is lower than the projections in the January 2025 WEO Update, by 0.5 percentage point for 2025 and 0.3 percentage point for 2026, with downward revisions for nearly all countries. The downgrades are broad-based across countries and reflect in large part the direct effects of the new trade measures and their indirect effects through trade linkage spillovers, heightened uncertainty, and deteriorating sentiment. The growth impact of tariffs in the short term varies across countries, depending on trade relationships, industry compositions, policy responses, and opportunities for trade diversification. Fiscal support in some cases (for example, China, euro area) offsets some of the negative growth impact.

World Trade Outlook

Global trade growth is expected to slow down in 2025 to 1.7 percentage point, a downward revision of 1.5 percentage point since the January 2025 WEO Update. This forecast reflects increased tariff restrictions affecting trade flows and, to a lesser extent, the waning effects of cyclical factors that have underpinned the recent rise in goods trade.

Meanwhile, global current account balances are expected to narrow somewhat. The widening of current account balances in 2024 reflected widening domestic imbalances and a pickup in global goods trade. Over the medium term, global balances are expected to narrow gradually as the effects of these factors wane. Creditor and debtor stock positions are estimated to have increased in 2024, with the increases reflecting widening current account balances. They are expected to moderate slightly over the medium term as current account balances gradually narrow. In some economies, gross external liabilities remain large from a historical perspective and pose risks of external stress.

Risks to the Outlook

Overall, risks to the outlook are tilted to the downside, in both the short and the medium term. This section discusses the most prominent risks and uncertainties surrounding the outlook in detail. Following are the model-based analysis that quantifies risks to the global outlook and plausible scenarios.

- Downside Risks
Although some risks outlined in the January 2025 WEO Update have materialized and are now incorporated in the reference forecast, the likelihood of additional adverse risks being realized is increasing
 - Escalating trade measures and prolonged trade policy uncertainty
 - Financial market volatility and correction
 - Rising long-term interest rates
 - Rising social discontent
 - Increasing challenges to international cooperation
 - Labor supply gaps
- Upside Risks
Despite the increased prevalence of negative risks, some factors could lead to more favorable outcomes than those in the reference forecast:
 - Next-generation trade agreements
 - Mitigation of conflicts
 - Structural reform momentum
 - Growth engine powered by artificial intelligence (AI)

INDIAN ECONOMY OVERVIEW

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP for FY25 is estimated at Rs. 33.10 lakh crore (US\$ 3.8 trillion) with growth rate of 9.9%, compared to Rs. 30.12 lakh crore (US\$ 3.5 trillion) in FY24. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among

the key driver of the GDP in the second half of FY25. In FY25, India's exports stood at Rs. 37.31 lakh crore (US\$ 433.56 billion), with Engineering Goods (26.88%), Petroleum Products (13.86%) and electronic goods (8.89%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing.

In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market size

Real GDP for FY25 is estimated at Rs. 187.95 lakh crores (US\$ 2.2 trillion) with growth rate of 6.5%, compared to Rs. 176.51 lakh crore (US\$ 2.06 trillion) for FY24. As on Jan 2025, there are 118 unicorn startups in India, with a combined valuation of over Rs. 3.0 lakh crore (US\$ 354 billion). The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. The Current Account Deficit (CAD) stood at Rs. 98,095 crore (US\$ 11.5 billion) for Q3 of FY25 as compared to Rs. 88,712 crore (US\$ 10.4 billion) in Q3 of FY24. This was largely due to increase in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19

pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below:

- The HSBC India Manufacturing PMI increased to 58.4 in April 2025, up from 58.1 in March 2025, based on preliminary estimates. This rise signifies improved operating conditions and represents the most rapid growth pace observed in the past year. Contributing factors include a notable surge in new export orders, which experienced their most significant increase in over fifteen years, alongside a faster expansion in overall new business activity.
- In Q1 CY25, private equity (PE) and venture capital (VC) investments stood at Rs. 1,16,861 crore (US\$ 13.7 billion) across 284 deals.
- India saw a robust 10.35% growth in passengers carried by domestic airlines at 431.98 lakh in FY25, from 391.46 lakh in FY24, according to the Directorate General of Civil Aviation (DGCA).
- As of April 18, 2025, India's foreign exchange reserves stood at Rs. 58,57,537 crore (US\$ 686.70 billion).
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks 3rd position in the global number of scientific publications.
- The gross GST (Goods and Services Tax) revenue collection stood at Rs. 1.84 lakh crore (US\$ 21.57 billion) in February 2025.
- Between April 2000–December 2024, cumulative FDI equity inflows to India stood at Rs. 89.88 lakh crore (US\$ 1.05 trillion).
- In February 2025, the overall IIP (Index of Industrial Production) stood at 151.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 141.9, 148.6 and 194.0, respectively.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) – Combined inflation was 3.34% in March 2025 against 4.85% in March 2024.
- Foreign Institutional Investors (FII) inflows in FY25 were close to Rs. 1.27 lakh crore (US\$ 14.89 billion), while Domestic Institutional Investors (DII) bought Rs. 6.00 lakh crore (US\$ 70.34 billion) in the same period.
- India's wheat procurement rose 34% YoY, reaching 22.36 MT as of April 28, 2025, with target of 31 MT in sight. Strong MSP, bonuses, and robust crop output boost sales to government agencies, ensuring food security and potential for open market intervention.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- According to a report by Wood Mackenzie in January 2025, India, the United States, and West Asia are expected to collectively add 100 Gigawatts (GW) of solar capacity by 2025, while China is anticipated to continue its leadership in the solar industry.
- In July 2024, the Ministry of Finance held the Union Budget and announced that for 2024-25, the total receipts other than borrowings and the total expenditure are estimated at Rs. 32.07 lakh crore (US\$ 383.93 billion) and Rs. 48.21 lakh crore (US\$ 577.16 billion), respectively.
- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.
- On September 17, 2023, Prime Minister Mr. Narendra Modi launched the Central Sector Scheme PM-VISHWAKARMA in New Delhi. The new scheme aims to provide recognition and comprehensive support to traditional artisans & craftsmen who work with their hands and basic tools. This initiative is designed to enhance the quality, scale, and reach of their products, as well as to integrate them with MSME value chains.
- On August 6, 2023, Amrit Bharat Station Scheme was launched to transform and revitalize 1309 railway stations across the nation. This scheme envisages development of stations on a continuous basis with a long-term vision.
- On June 28, 2023, the Ministry of Environment, Forests, and Climate Change introduced the 'Draft Carbon Credit Trading Scheme, 2023'.
- From April 1, 2023, Foreign Trade Policy 2023 was unveiled to create an enabling ecosystem to support the philosophy of 'Aatmanirbhar Bharat' and 'Local goes Global'.
- To enhance India's manufacturing capabilities by increasing investment and production in the sector, the government of India has introduced the Production Linked Incentive Scheme (PLI) for Pharmaceuticals.
- Prime Minister's Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of Rs. 1,500 crore (US\$ 182.35 million).
- Prime Minister Mr Narendra Modi has inaugurated a new food security scheme for providing free food grains to Antyodaya Ann Yojna (AAY) & Primary Household (PHH) beneficiaries, called Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY) from January 1, 2023.

Road Ahead

India's economy grew by 6.2% in Q3 FY25. Signs of recovery are now visible, with growth expected to rise to 7.6% in Q4 FY25—indicating a possible turnaround in the coming months. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of FY24 highlighted the unwavering support the government gave to its capital expenditure, which, in FY24, stood 37.4% higher than the same period last year. In the Union Budget of FY26, capital expenditure took lead by steeply increasing the capital expenditure outlay by 10.0 % to Rs. 11.21 lakh crore (US\$ 131.42 billion) over Rs. 10.18 lakh crore (US\$ 119.34 billion) in FY25. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's total exports of goods and services rose by 5.5% to a record Rs. 69.8 lakh crore (US\$ 820.9 billion) in FY25, compared to Rs. 65.8 lakh crore (US\$ 773.0 billion) in FY24.

With a reduction in port congestion, supply networks are being restored. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall

OVERVIEW

Incorporated on January 16, 2018, we are presently engaged in comprehensive range of engineering design services, such as building information modeling (BIM), structural engineering design, material take-offs (MTO), 2D drafting and architectural design to ensure seamless project execution. Our services emphasize the use of modern methodologies over traditional approaches. Traditional approach in the AEC (Architecture, Engineering, and Construction) industry is based on manual process which is prone to the errors and potential for miscommunication. It relies on 2D model for visualization and designing of engineering projects. Hence this method is time consuming and results in delay in completion of projects with compromised quality which negatively impacts project outcome, while modern methodology is based on BIM (Building Information Modeling) digital process used in the architecture, engineering and construction (AEC) industries. BIM utilizes a 3D digital model with integrated data and collaborative workflows. Hence modern methodology is cost effective as it eliminates various layers which are used in traditional method which leads to competition of projects in timely manner. Further we serve to EPC (Engineering, Procurement, and Construction) firms, fabricators, and contractors by delivering accurate, cost-effective engineering services in a timely manner.

Our Company is certified with ISO 9001:2015 committed to 3D modelling & detailing of precast structure and steel structure for civil and construction industry. To deliver these services, our design layouts are based on following two frameworks:

Structural Steel: In this , our layouts and designs are developed on the basis of steel structures as the core construction element

Pre-cast concrete : In this framework, our layouts and designs are developed on the basis of concrete structures such as mixture of cement, water, sand and gravel as the core construction element

Following is our revenue bifurcation on the basis of above-mentioned frameworks for the financial years ending March 31, 2025 and the preceding two fiscals:

OUR SERVICES

Our core business verticals in the AEC (Architecture, Engineering, and Construction) industry encompass a broad spectrum of civil engineering design services and leveraging technologies to meet evolving global market demands.

1. Building Information Modeling (BIM) Services

BIM modelling is a digital representation of a building project, capturing both its physical attributes and functional characteristics. Our constructible models encompass structural components, hardware, connections, and reinforcement, enabling precise planning and execution. Our deliverables include accurate 3D shop drawings, erection plans, general arrangement layouts, part and assembly drawings, bar bending schedules, detailed quantity take-offs, comprehensive reports, and automated CNC files for fabrication.

(3D Model)

In this service, we deliver detailed models across all levels of development (LOD 100 to LOD 300), tailored to the specific requirements of each project phase.

LOD 100 (Pre- design) - At this level, the model is very basic, focusing on the overall shape, size, and general location.

LOD 200 (Schematic design) - At this stage, the model elements are represented with approximate quantities, sizes, shapes, locations, and orientations.

LOD 300 (Design Development) - It includes precise geometric information, specific components, accurate sizes and shapes.

Set out below is the diagrammatic presentation for BIM Modelling LOD100: Pre-Design to LOD300 Design Development:

Further, it includes BIM coordination which facilitates effective communication between, architects, structural designers, detailers, mechanic, electrician, plumbers, technician/ specialist handling heating ventilation and air conditioning services, contractors, builders. This help us in identifying and resolving conflicts early in the design process which reduces errors and duplication during the process.

Further, we focus on the use of modern methodologies by using of BIM over traditional approaches :

Traditional Approach:

Traditional method is based on manual process which is prone to the errors and potential for miscommunication. It relies on 2D model for visualization and designing of engineering projects. Hence this method is time consuming and results in delay in completion of projects with compromised quality which negatively impacts project outcome.

Features of Traditional Method:

- **2D Modeling:** This relies heavily on 2D drawings, which can be less effective for visualizing complex projects.
- **Increased Cost and Time consuming:** This can be expensive in nature due to increased risk of errors, duplication

of works, delays in completion of projects, inefficient communication and coordination.

- **Coordination:** This often involve sequential stages with limited collaboration, leading to misunderstandings and miscommunication. It involves 2D drawings, making it difficult for stakeholders to access and share information quickly.

Modern Approach:

BIM is a digital process used in the architecture, engineering and construction (AEC) industries. It involves creating and using 3D model for designing of engineering projects. Following is the presentation that how BIM works:

Features of BIM:

- **3D Modeling:** BIM creates a virtual 3D representation of a building or infrastructure project by using digital platform which results in low risk of errors. This model includes geometry, spatial relationships, geographic information, and properties of building components.
- **Cost- effective and Time saving:** BIM is cost effective as it eliminates various layers which are used in Traditional method which leads to competition of projects in timely manner. It minimizes errors, reduces rework, and optimizes resource utilization throughout the project lifecycle
- **Coordination:** BIM facilitates better communication and coordination among stakeholders as it operates in centralized platform, preventing misunderstandings and duplication or work.

2. Structural Engineering Design Services

Our structural 3D modeling services range from developing structural drawings to creating detailed 3D models. These models enhance visualization, streamline coordination with architects, and help reduce project timelines by presenting clear and comprehensive structural designs. We work closely with fabricators and construction companies to identify and resolve design issues early, incorporating intricate details such as concrete joints, I-section and H-section beams, and other critical components. Our deliverables include complete 3D representations of structural elements such as foundations, columns, beams, and roofs as well as fully developed as-built models for industrial, residential, and commercial buildings.

3. Material Take- Offs (MTO)

A material takeoff (MTO) is a comprehensive list of all materials needed for a construction project, including their quantities and specifications. We have skilled team that work closely with construction firms and subcontractors to generate accurate quantity take-offs and develop efficient BIM execution plans, ensuring material and component estimates are available before construction begins. With expertise in interpreting 2D drawings, our team estimates material take-offs (MTOs) and transforms them into detailed 3D BIM models complete with quantity annotations.

4. 2D Drafting Services

2D drafting is the process of creating two-dimensional technical drawings using software. It is the process of producing accurate technical drawings that illustrate the dimensions, layout, and structure of objects or spaces. These drawings serve as essential blueprints across industries such as construction, engineering, and design. By clearly representing design

concepts, 2D drafting supports effective communication, precise planning, and thorough documentation for a wide range of engineering and technical tasks.

5. Architectural Services:

Architectural drafting services translate architectural designs into technical drawings used for construction. These services provide detailed plans, elevations, sections, and other drawings necessary for builders to accurately construct a building. They utilize various software and tools, to create accurate and dimensionally precise documentation.

We have provided our services across the following countries:

6. *In-House Execution with Two-Shift Model*

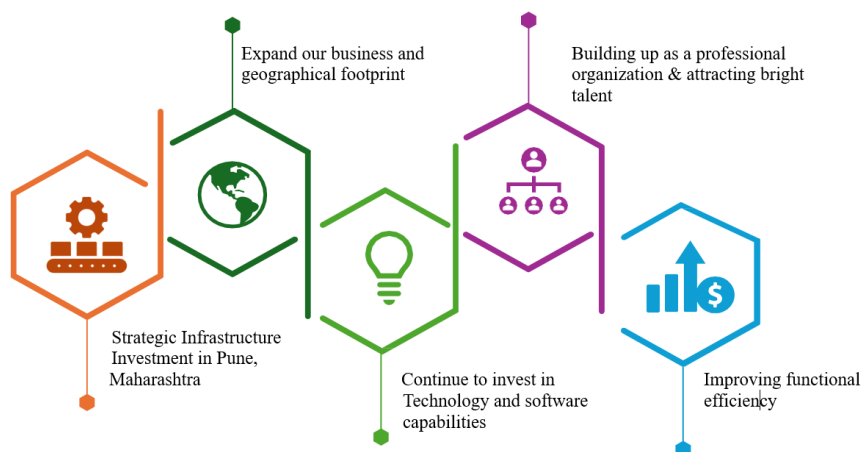

Operating with a team in multiple shifts- rather than a single general shift- can significantly increase the effective use of software licenses, which are often a substantial investment for organizations. This method ensures that expensive tools and systems are utilized over a longer duration each day, thereby maximizing return on investment (ROI). Adopting a shift-based working model transforms how organizations utilize their software and IT infrastructure. By increasing the hours of productive use each day, businesses gain more value from their existing investments, reduce costs, and enhance overall productivity. This strategic alignment of workforce and technology utilization is key to operational excellence.

7. *Strategic Acquisitions*

Strategic acquisitions have played a key role in strengthening our capabilities, expanding our service offerings, and accelerating growth across global markets. These acquisitions are carefully aligned with our long-term vision, allowing us to integrate talent, technologies, and best practices into our operations. This not only improves our ability to deliver comprehensive, end-to-end solutions but also creates value for our clients through innovation, efficiency, and localized knowledge.

Our growth and capabilities have been significantly strengthened by the acquisition of US-based companies Draftco Inc and Midwest Detailing LLC. These strategic moves have expanded our presence in the North American market while enhancing our expertise in detailing, BIM coordination, and construction documentation. Both firms bring a wealth of experience, technical excellence, and strong client relationships, which have seamlessly integrated into our operations. We believe that these acquisitions have not only increased our capacity but also enriched our service offerings, enabling us to deliver more comprehensive and localized solutions to clients across various sectors in the construction industry.

OUR KEY BUSINESS PROCESS

1. Business Development Outreach

At initial stage, our team engages with potential clients such as fabricators, precastors and contractors. The objective is to establish contact, understand upcoming project needs, and showcase the company's capabilities in detailing services. This interaction helps in identifying project opportunities and laying the foundation for future collaboration.

2. Review of Architectural and Structural Drawings

Once interest is confirmed, the client provides us with the necessary project briefs, including architectural and structural drawings. These documents are thoroughly reviewed to understand the scope, design intent and specific detailing requirements. This step ensures the team has a comprehensive understanding of the project before proceeding further.

3. Man-hour Assessment and Request for Quote (RFQ)

After receiving the project details, a careful analysis is conducted to evaluate the required detailing effort. The team estimates the man-hours, resources and timeline needed to complete the project. Based on this analysis, a Request for Quote (RFQ) is prepared and submitted to the client, outlining the proposed cost and delivery schedule.

4. Project Awarded on Basis of Experience, Pricing & Timelines

The client reviews the RFQ, considering our past experience, pricing competitiveness, and ability to meet deadlines. If the proposal aligns with the client's expectations and project goals, the project is formally awarded, enabling us to initiate the detailing process.

5. Project Kick Off & Request for Information (RFI)

With the project awarded, an internal kickoff meeting is held to assign responsibilities and set milestones. During this stage, any missing or unclear details in the drawings are identified and a Request for Information (RFI) is sent to the client to clarify these points. This ensures the team has all necessary information before modeling begins.

6. Modeling & Drafting Process

This is the core execution phase where the team starts creating detailed 2D and 3D models using industry-standard software like Tekla, SDS/2, AutoCAD or Revit. These models are used to generate accurate shop drawings, erection plans, and other fabrication details. The focus is on precision and compliance with design standards.

7. Quality Check and Client Submission

Once the initial drafts are prepared, they undergo a thorough quality check by senior team members. The drawings are reviewed for accuracy, completeness, and adherence to client standards. After internal approval, the drawings are issued to the client as IFA (Issue for Approval) for review and feedback.

8. Final Revisions and Detailing Adjustments

Based on the client's feedback on the IFA drawings, necessary modifications are made to address any comments or corrections. The team fine-tunes the models and drawings to ensure all aspects are error-free and align with the project requirements. This step finalizes the detailing output for construction use.

9. Final Deliverables and Handover for Construction

The final set of approved drawings and documents is issued as IFC (Issued for Construction) with all electronic files like .ncl and .dxf. These are the official deliverables used by the client for on-site construction and fabrication. At this point, we have completed its detailing responsibilities, ensuring the client has precise and construction-ready documentation.

PLANT AND MACHINERY

Since, we are a service provider company, we do not own any major plant and machinery. The office is equipped with desktops, laptops (out of which some are rented), servers, software licenses, internet connectivity, other communication equipment, security and other facilities including data centre infrastructure which are required for our business operations to function smoothly.

THE INFORMATION TECHNOLOGY ACT, 2000 (THE "INFORMATION TECHNOLOGY ACT") AND CERTAIN RULES MADE THEREUNDER

The Information Technology Act seeks to: (i) provide legal recognition to transactions carried out by various means of electronic data interchange involving alternatives to paper-based methods of communication and storage of information; (ii) facilitate electronic filing of documents; and (iii) create a mechanism for the authentication of electronic documentation through digital signatures. The Information Technology Act provides for jurisdiction over any offence or contravention under the Information Technology Act committed outside India by any person, irrespective of their nationality, if the act or conduct constituting the offence or contravention involves a computer, computer system or computer network located in India. Additionally, the Information Technology Act empowers the Government to direct any of its agencies to intercept, monitor or decrypt any information in the interest of sovereignty, integrity, defence and security of India, among other things. The Information Technology (Procedure and Safeguards for Blocking for Access of Information by Public) Rules, 2009, specifically permit the Government of India to block access of any information generated, transmitted, received, stored or hosted in any computer resource by the public, the reasons for which are required to be recorded by it in writing.

The Information Technology Act facilitates electronic commerce by recognizing contracts concluded through electronic means, protects intermediaries in respect of third-party information liability and creates liability for failure to protect sensitive personal data. The Information Technology Act also prescribes civil and criminal liability including fines and imprisonment for computer-related offenses including those relating to unauthorized access to computer systems, tampering with or unauthorized manipulation of any computer, computer system or computer network and damaging computer systems, and creates liability for negligence in dealing with or handling any sensitive personal data or information in a computer resource and in maintaining reasonable security practices and procedures in relation thereto, among others. Further, the Information Technology Act empowers the Government of India to formulate rules with respect to reasonable security practices and procedures and sensitive personal data.

The Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011 ("IT Security Rules") prescribe directions for the collection, disclosure, transfer and protection of sensitive personal data by a body corporate or any person acting on behalf of a body corporate. The IT Security Rules require every such body corporate to provide a privacy policy for handling and dealing with personal information, including sensitive

personal data, ensuring security of all personal data collected by it and publishing such policy on its website. The IT Security Rules further require that all such personal data be used solely for the purposes for which it was collected, and any third-party disclosure of such data is made with the prior consent of the information provider, unless contractually agreed upon between them or where such disclosure is mandated by law.

The Information Technology (Intermediaries Guidelines and Digital Media Ethics Code) Rules, 2021 (“IT Intermediary Rules”) require intermediaries receiving, storing, transmitting, or providing any service with respect to electronic messages to not knowingly host, publish, transmit, select or modify any information prohibited under the IT Intermediary Rules, and to disable hosting, publishing, transmission, selection or modification of such information once they become aware of it. The DPDP Act shall come into force on such date as the Central Government may, by notification in the Official Gazette, appoint and different dates may be appointed for different provisions of the DPDP Act. The DPDP Act seeks to balance the rights of individuals to protect their digital personal data with the need to process personal data for lawful and other incidental purposes. The DPDP Act provides that personal data may be processed only for a lawful purpose after obtaining the consent of the individual. A notice must be given before seeking consent, except in case of legitimate uses as provided under the DPDP Act. It further imposes certain obligations on data fiduciaries including (i) make reasonable efforts to ensure the accuracy and completeness of data, (ii) build reasonable security safeguards to prevent a data breach, (iii) inform the Data Protection Board of India (the “DPB”) and affected persons in the event of a breach, and (iv) erase personal data as soon as the purpose has been met and retention is not necessary for legal purposes (storage limitation). In case of government entities, storage limitation and the right of the data principal to erasure will not apply. The DPDP Act imposes certain additional obligations on a significant data fiduciary, such as appointment of a data protection officer, appointment of an independent data auditor and undertaking of other measures namely, periodic data protection impact assessment, periodic audit and such other measures as may be prescribed under the DPDP Act. The Central Government will establish the DPB. Key functions of the DPB include: (i) monitoring compliance and imposing penalties, (ii) directing data fiduciaries to take necessary measures in the event of a data breach, and (iii) hearing grievances made by affected persons. The DPB members will be appointed for two years and will be eligible for re-appointment. The Central Government will prescribe details such as the number of members of the DPB and the selection process.

THE DIGITAL PERSONAL DATA PROTECTION (DPDP) RULES, 2025

The DPDP Rules, 2025 is a comprehensive framework for the responsible handling of digital personal data in India. These rules are applicable to any entity—whether based in India or abroad—that processes the personal data of individuals located in India. This includes data collected directly in digital form or converted into digital format after being collected offline. The rules are designed to ensure that personal data is processed in a lawful, transparent, and secure manner. However, they do not apply to data processed by individuals for personal or domestic purposes, or to information that has been made publicly available by the individual or under legal obligation. Certain exemptions are also provided for specific sectors, such as education and healthcare, particularly when processing children’s data for safety or welfare purposes. Overall, the DPDP Rules aim to build trust in digital systems by enforcing accountability and giving individuals greater control over their data, making it essential for all organizations handling such data to understand and comply with these regulations.

PREVENTION OF MONEY LAUNDERING ACT, 2002

Money laundering is the processing of criminal proceeds to disguise its illegal origin. Terrorism, illegal arms sales, financial crimes, smuggling, and the activities of organized crime, including drug trafficking and prostitution rings, generate huge sums. Embezzlement, insider trading, bribery and computer fraud also produce large profits and create an incentive to legitimise the ill-gotten gains through money laundering. When a criminal activity generates substantial profits, the individual or group involved in such activities route the funds to safe heavens by disguising the sources, changing the form, or moving the funds to a place where they are less likely to attract attention.

The law of criminal procedure is intended to provide a mechanism for the enforcement of criminal law. Without the proper procedural law the substantive criminal law which defines offences and provides punishment for them would be almost worthless.

We are presently engaged in comprehensive range of engineering design services, such as building information modeling (BIM), structural engineering design, material take-offs (MTO), 2D drafting and architectural design to ensure seamless project execution. Our services emphasize the use of modern methodologies over traditional approaches. Traditional approach in the AEC (Architecture, Engineering, and Construction) industry is based on manual process which is prone to the errors and potential for miscommunication. It relies on 2D model for visualization and designing of engineering projects. Hence this method is time consuming and results in delay in completion of projects with compromised quality which negatively impacts project outcome, while modern methodology is based on BIM (Building Information Modeling) digital process used in the architecture, engineering and construction (AEC) industries. BIM utilizes a 3D digital model with integrated data and collaborative workflows. Hence modern methodology is cost effective as it eliminates various layers which are used in traditional method which leads to competition of projects in timely manner. Further we serve to EPC (Engineering, Procurement, and Construction) firms, fabricators, and contractors by delivering accurate, cost-effective engineering services in a timely manner.

The need for such a revision is evaluated on an ongoing basis.

2. Use of estimates

The preparation of the financial statements in conformity with the generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities as at the balance sheet date, the results of operation during the reported period and disclosure of contingent liabilities as on the reporting date. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable and are in their best knowledge of current event and actions. Actual results could differ from these estimates and differences between actual results and estimates are recognized in the period in which the results are known or materialize. Significant estimates used by the management in the preparation of these financial statements include provision for employee benefits, estimates of the economic useful life of plant and equipment, provision for expenses, provisioning for taxation etc.

The following significant accounting policies are adopted in the preparation and presentation of these financial statements:

1. Revenue Recognition

The following specific recognition criteria must also be met before revenue is recognised:

1. Revenue from sale of goods is recognized on transfer of significant risks and rewards of ownership which is generally on the dispatch of goods. Sales are exclusive of GST.

2. Revenue from services is recognized over time by measuring progress towards satisfaction of performance obligation for the services rendered. Amounts are billed as work progresses in accordance with agreed-upon contractual terms, either at periodic intervals (e.g., monthly or quarterly) or upon achievement of contractual milestones. Income from services is exclusive of GST.
3. Interest income is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate.
4. Dividend income is recognized when the company's right to receive dividend is established by the reporting date.

2. Foreign Currency Transaction:

- a) Foreign currency transactions are recorded at the exchange rates prevailing on the date of the transaction.
- b) Short term monetary items denominated in foreign currencies (such as cash, receivable, payable etc.) outstanding at the year end, are translated /re-converted at the year-end exchange rate unless covered by a forward contract.
- c) Any gain or loss arising on settlement and / or translation of short-term monetary transaction in foreign currency is accounted for in the statement of Profit and Loss.

3. Employee Benefits

- Defined Benefit Plans

For Defined Benefit Plans, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at the date of each statement of financial position.

The retirement benefit obligations recognised in the statement of financial position represents the present value of the defined benefit obligations reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to the present value of available refunds and reductions in future contributions to the scheme.

- Leave Encashment

The Company does not permit the carry forward of unutilized leave. Accordingly, any unclaimed leave balance as on 31st March shall lapse and will not be carried forward or eligible for encashment.

4. Borrowing Costs

Borrowing cost includes interest and amortization of ancillary costs incurred in connection with the arrangement of borrowings. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

5. Accounting for Taxes on Income

Tax expense comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

- a) Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date.
- b) Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

The carrying amount of deferred tax assets are reviewed at each reporting date. The company writes-down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

6. Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, share split and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

7. Property, Plant and Equipment

Property, plant and equipment are stated at cost, less accumulated depreciation and accumulated impairment losses. The initial cost of a property, plant and equipment comprises its purchase price, any costs directly attributable to bringing the property, plant and equipment into the location and condition necessary for it to be capable of operating in the manner intended by management.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss

arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in statement of profit and loss.

Capital work- in- progress includes cost of property, plant and equipment under installation / under development as at the balance sheet date.

8. Depreciation

BUSINESS OVERVIEW

Incorporated on January 16, 2018, we are presently engaged in comprehensive range of engineering design services, such as building information modeling (BIM), structural engineering design, material take-offs (MTO), 2D drafting and architectural design to ensure seamless project execution. Our services emphasize the use of modern methodologies over traditional approaches. Traditional approach in the AEC (Architecture, Engineering, and Construction) industry is based on manual process which is prone to the errors and potential for miscommunication. It relies on 2D model for visualization and designing of engineering projects. Hence this method is time consuming and results in delay in completion of projects with compromised quality which negatively impacts project outcome, while modern methodology is based on BIM (Building Information Modeling) digital process used in the architecture, engineering and construction (AEC) industries. BIM utilizes a 3D digital model with integrated data and collaborative workflows. Hence modern methodology is cost effective as it eliminates various layers which are used in traditional method which leads to competition of projects in timely manner. Further we serve to EPC (Engineering, Procurement, and Construction) firms, fabricators, and contractors by delivering accurate, cost-effective engineering services in a timely manner.

Our Company is certified with ISO 9001:2015 committed to 3D modelling & detailing of precast structure and steel structure for civil and construction industry. To deliver these services, our design layouts are based on following two frameworks:

Structural Steel: In this , our layouts and designs are developed on the basis of steel structures as the core construction element

Pre-cast concrete : In this framework, our layouts and designs are developed on the basis of concrete structures such as mixture of cement, water, sand and gravel as the core construction element

Following is our revenue bifurcation on the basis of above-mentioned frameworks for the financial years ending March 31, 2025 and the preceding two fiscals:

FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Our financial performance and results of operations are influenced by a number of important factors, some of which are beyond our control, including without limitation, intense domestic competition, general economic conditions, changes in conditions in the regional markets in which we operate and evolving government regulations and policies. Some of the more important factors are discussed below, as well as in the section titled “*Risk Factors*” beginning on page 31 of this Draft Red Herring Prospectus. Our Company’s future results of operations could be affected potentially by the following factors:

- We are highly dependent on certain key customers for a substantial portion of our revenues. Loss of relationship with any of these clients/customers may have a material adverse effect on our profitability and results of operations;
- Our Company has not entered into any long-term contracts with our clients/customers and we typically operate on the basis of projects received on hand. Inability to maintain regular project flow would adversely impact our revenues and profitability;
- We are dependent on our empanelled vendors for various software which we provide to our clients/ customers. The failure of our empanelled vendors to deliver that software in the necessary quantities, on time or to meet specified quality standards or technical specifications, could adversely affect our business and our ability to deliver orders on time;
- We are subject to project execution risks where delays arising from design changes, unanticipated site conditions, or client-related factors such as late approvals or frequent scope modifications can disrupt project timelines, increase operational costs and significantly impact our profitability;
- We generate our major portion of sales from our operations from a particular geographical region, USA and Australia. Any adverse developments affecting our operations in this country could have an adverse impact on our revenue and results of operations;
- Our reliance on overseas exposes us to risks such as geographical concentration and foreign currency exchange fluctuations, which could adversely impact our business, results of operations, and financial condition;
- Our software products owing to certain issues such as coding, configuration or any other technical error or defects could lead to Company bearing exponential costs, delay in revenues and consequently expose us to litigation;
- General economic and business conditions in the markets in which we operate and in the local, regional, national and international economies;
- Changes in government policies and regulatory actions that apply to or affect our business;
- Changes in political and social conditions in India, the monetary and interest rate policies of India and other countries;

- The occurrence of natural disasters or calamities;
- Our inability to maintain or enhance our brand recognition;
- Other factors beyond our control; and
- Our ability to manage risks that arise from these factors;

For further discussions of factors that could cause our actual results to differ, please refer the section titled “*Risk Factors*” and chapter titled “*Our Business*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on page 31, 121 and 245 of this Draft Red Herring Prospectus, respectively. PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIIs through designated intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the designated intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIIs through designated intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six working days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("**T+3 Notification**"). In this phase, the time duration from public issue closure to listing has been reduced to three working days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

Individual investors bidding under the Non-Institutional Portion bidding for more than ₹ 200,000 and up to ₹ 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

Pursuant to the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 issued by SEBI, as amended by the SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 and SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 (the “UPI Streamlining Circular”), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streaming Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one working day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints, the relevant SCSB as well as the post- issue BRLM will be required to compensate the concerned investor. Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the BRLMs, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law. The Issue will be made under UPI Phase III of the UPI Circular.
