For further details, please refer to the chapter titled “Our Business” beginning on page 114 of this Draft Red Herring Prospectus.

Summary of the Industry in which our Company operates

The plastics industry is currently home to about 50,000 industries, most of which are micro, small, and medium-sized enterprises (MSMEs). These enterprises contribute Rs. 3.5 lakh crore (US\$ 42.89 billion) to India's economy and employ more than 50,000 people. The country recycles plastic at a rate of 60%, which is higher than that of developed nations. The "Make in India," "Skill India," "Swachh Bharat," and "Digital India" initiatives of the government are increasing plastic production, and by 2027, it is expected that the plastics industry will generate Rs. 10 lakh billion (US\$ 122.54 billion) annual revenue, with two lakh tonnes of exports. Given that polymer is a crucial raw ingredient for plastic, the plastic industry in India is closely related to the petrochemicals sector. As a result, both upstream and downstream activities are included in the plastic industry's value chain. While the upstream market is dominated by big firms, the downstream market is far more diversified, with many small and medium-sized businesses engaged in the production of plastic goods. Strong polymer production capabilities support the Indian plastic processing industry, ensuring the supply of raw materials. The majority of the essential raw materials, such as PVC, high-density polyethylene, low-density polyethylene, and polypropylene, are produced domestically.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Offer, including the merits and the risks involved. Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1. Some events may not be material individually but may be found material collectively.*
- 2. Some events may have material impact qualitatively instead of quantitatively.*
- 3. Some events may not be material at present but may be having material impact in future.*

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

*In this Draft Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “**Risk Factors**” on page 29 and “**Management Discussion and Analysis of Financial Condition and Results of Operations**” on page 239 of this Red Herring Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “**Restated Financial Statements**”.*

INTERNAL RISK FACTORS

- 1. **We derive a significant portion of our revenue from the sale of our key product i.e. Pet Preforms. Any decline in the sales of our key product could have an adverse effect on our business, results of operations and financial condition.***

We generate a significant portion of our revenue from our key product i.e. Pet Preforms which contributed 68.52% of our revenue from product sales for the nine period ended December 31, 2024, amounting to ₹15,950.61 lakhs, and 65.52% of our revenue from product sales in Fiscal 2024 amounting to ₹ 19,265.57 lakhs. Any decline in the sales of Pet Preforms on account of any reason including increased competition, pricing pressures or fluctuations in the demand for or supply of such products may adversely affect our business, results of operations and financial condition. We cannot assure you that we will be able to maintain the same levels of sales for Pet Preforms product in the future. Any inability on our end to anticipate and adapt to technological changes or evolving consumer preferences and/or any decrease in the demand for our key product may adversely impact our business prospects and financial performance.

The following table sets forth information on our product mix in terms of revenue contribution in the periods indicated:

(Rs. In Lakhs)

Item	31st December-2024	(%) of Revenue from sale of products	Fiscal 2024	(%) of Revenue from sale of products	Fiscal 2023	(%) of Revenue from sale of products	Fiscal 2022	(%) of Revenue from sale of products

2. *We generate our major portion of turnover from our operations in certain geographical regions and any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations*

We generate our major turnover from the State of Maharashtra. For the period ended December 31, 2024 and for the financial year ended March 31, 2024, March 31, 2023 & March 31, 2022, we derived major portion of our revenue from the state of Maharashtra i.e. 76.95%, 76.44%, 73.65% and 67.30% of total revenue from operations, respectively.

The following table sets forth the sales analysis for Maharashtra and the revenue contribution from the top five states:

(Rs. In Lakhs)

Particulars	December 31, 2024		March 31, 2024		March 31, 2023		March 31, 2022	
	Revenue	% of revenue from operations	Revenue	% of revenue from operations	Revenue	% of revenue from operations	Revenue	% of revenue from operations
Sales within Maharashtra	17,943.57	76.95%	22,534.19	76.44%	20,098.63	73.65%	13,015.85	67.30%
Sales to other States (Top Five)	4,023.37	17.25%	5,113.75	17.35%	4,897.47	17.95%	4,658.07	24.08%

We carry our entire manufacturing operations from our manufacturing units located at Latur, Maharashtra, due to the geographical concentration of our manufacturing operations at Maharashtra, our operations are prone to local, regional and environmental factors. Any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the state government or state or local governments, may require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our operations. Any such adverse development affecting continuing operations at our manufacturing units could result in significant loss due to an inability to meet customer orders and production schedules, which could materially affect our business reputation within the industry. The occurrence of or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects. We also sell our products in the state of Karnataka, Gujarat, Kerala, Telangana, Andhra Pradesh, Goa, Bihar, Uttar Pradesh and Madhya Pradesh.

3. *We are primarily dependent upon few key suppliers within limited geographical location for procurement of raw materials. Any disruption in the supply of the raw materials or fluctuations in their prices could have a material adverse effect on our business operations and financial conditions.*

We procure a large portion of our raw material from a few key suppliers, with whom we do not have any long-term supply contracts. Therefore, we cannot assure a steady supply of raw material at prices favorable to us. The principal raw material

used in our manufacturing process are High – Density Polyethylene, Low – Density Polyethylene, Darafoam Polylinex and Polyethylene Terephthalate (PET Resin), master batches etc. For the period ending December 31, 2024 and financial year ended March 31, 2024, March 31, 2023 and March 31, 2022, purchases from our top ten suppliers amounted to Rs. 11,898.99 lakhs, Rs. 17,255.15 lakhs, Rs. 19,959.68 lakhs and Rs. 13,519.03 lakhs respectively which represented 62.09%, 71.36%, 88.05% and 85.44% respectively of our total raw material purchases. Further, we source our raw material requirement from both domestic indigenously and internationally. During the stub period ended December 31, 2024, imported goods amounted to Rs. 855.88 lakhs, while indigenous goods stood at Rs. 11,647.56 lakhs. For further details, refer to the chapter heading ***“Restated Financial Statements”*** on page 168 of the Draft Red Herring Prospectus.

Inadequate supply of raw material caused either by a sudden loss of any of our existing major vendors for any reason could have a material adverse effect on our business operations and profitability. Further, any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the central or the state government or state or local governments may affect continuing operations at our factory and proposed factory and result in significant loss due to an inability to meet customer orders and production schedules, which could materially affect our business reputation in the market.

Further, discontinuation of such supply or a failure of these suppliers to adhere to the delivery schedule or the required quality could hamper our production schedule and therefore affect our business and results of operations. There can be no assurance that demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials. If we were to experience a significant or prolonged shortage of materials from any of our suppliers, and we cannot procure the raw materials requirement from other sources, we would be unable to meet our production schedules for our key products and to deliver such products to our customers in a timely manner, which would adversely affect our sales, margins and customer relations. Any delay in the supply or delivery of raw materials to us by our suppliers may in turn delay our process of manufacture and delivery of products to our customers and this may have an adverse effect on our business, cash flows and results of operations. Additionally, our inability to predict market conditions may result in us placing supply orders for inadequate quantities of such raw materials. Therefore, we cannot assure you that we will be able to procure adequate supplies of raw materials in the future, as and when we need them and on commercially acceptable terms.

4. *Increase in the prices of raw materials and fluctuations may adversely impact our business, financial condition and operational results.*

Raw material consumption and stock in trade contributed 81.45%, 81.10%, 82.85% and 81.01% of revenue from operations for the period ended December 31, 2024 and financial year ended March 31, 2024, 2023 and 2022 respectively. We are vulnerable to the risk of rising and fluctuating prices of raw materials which are determined by demand and supply conditions in the global and Indian markets. Any unexpected price fluctuations after placement of orders, shortage, delay in delivery, quality defects, or any factors beyond our control may result in an interruption in the supply of such materials and adversely affect our business, financial performance and cash flows.

Our manufacturing operations may face significant cost overruns or losses due to unforeseen cost increases arising from factors such as raw material shortages or price fluctuations, production costs, changes in taxation or regulatory requirements, delays in statutory approvals, supply chain disruptions beyond our control, unexpected design or engineering challenges, adverse weather conditions, or force majeure events. Any of these factors could impact our profitability and adversely affect our overall financial performance.

Additionally, we do not enter into long-term supply agreements with our suppliers and purchase all raw materials on a need basis, primarily through the spot market purchase mechanism. We aim to source these materials from a diverse range of suppliers. However, we may face risks associated with compensating for or passing on increased production costs due to fluctuations in raw material prices to our customers. Upward fluctuations in raw material prices can directly or indirectly affect our margins, which in turn may have a significant impact on our profitability, resulting in a material adverse effect on our business, financial condition, and results of operations. We may occasionally experience late deliveries from suppliers, forcing us to purchase raw materials at higher prices or with lower conversion efficiencies and specifications. Such issues could result in reduced revenues and adversely affect our business operations.

There can be no assurance that the current procurement efforts will be successful in ensuring an adequate supply of raw materials at viable prices to meet our production requirements. If we are unable to meet customer demand for our products or if our products are only available at a higher price because of a shortage of raw materials, we could lose customers, market share and revenue. Further, many of our competitors, that also purchase raw materials from our suppliers, may have stronger relationships as well as greater bargaining power with the suppliers. This may materially and adversely affect our business, financial condition, results of operations and cash flow.

In addition, any restrictions imposed by the Central or State governments, or any adverse changes in policies or regulations related to the supply of our raw materials, could negatively impact our business, prospects, financial condition, and results of operations. While we do not rely on imports for our raw materials, any unforeseen restrictions, changes in tariffs, or non-tariff barriers affecting domestic suppliers or supply chains could still lead to disruptions. Such changes could impact the availability, cost, and timely delivery of raw materials, potentially affecting our ability to meet production schedules and customer demands. Furthermore, there can be no assurance that we would be able to quickly identify alternate suppliers or secure favorable terms for raw materials in case of such disruptions. Any such challenges may adversely affect our operations and business performance. For further details, kindly refer section titled “**Financial Information of the Company**” beginning on Page 168 of this Draft Red Herring Prospectus.

5. The Pro forma financial information included in this Draft Red Herring Prospectus is not indicative of our expected results or operations in the future periods or our future financial position or a substitute for our past results.

The Company acquired the proprietorship firm “M/s Bai Kakaji Industries” with effect from March 01st, 2025 and therefore the Pro Forma Financial Information for the Fiscal 2024 and stub period ended on December 31st 2024 has been included in the Draft Red Herring Prospectus. It illustrates the impact of acquisition made by the company and its financial performance for the year ended March 31st, 2024 and stub period ended on December 31st, 2024 as if the acquisition had taken place at the beginning of the earliest reported year presented. For further details, see “**History and Certain Corporate Matters** – Details regarding material acquisitions or divestments of business/undertakings, mergers & amalgamations or any revaluation of assets, in the last ten years” and “**Pro Forma Financial Information**” on page 227.

The Pro forma Financial Information has been prepared by our Peer review auditor. It addresses a hypothetical situation and does not represent our actual financial condition or results of operations and is not intended to be indicative of our future financial condition and results of operations. The adjustments set forth in the Pro Forma Financial Information are based on available information and assumptions that our management believes to be reasonable. As the Proforma Financial Information is prepared for illustrative purposes only, it is, by its nature, subject to change and may not give an accurate picture of the actual financial results that would have occurred had such transactions by us been effected on the dates they are assumed to have been effected, and is not intended to be indicative of our future financial performance. The Proforma Financial Information does not include all of the information required for financial statements under India GAAP. Accordingly, investors should not unduly rely on our Proforma Financial Information. If the various assumptions underlying the preparation of the Proforma Financial Information do not come to pass, our actual results could be materially different from those indicated in the Proforma Financial Information. Accordingly, the Proforma Financial Information included in this Draft Red Herring Prospectus is not intended to be indicative of expected results or operations in the future periods or the future financial position of our Company or a substitute for our past results, and the degree of reliance placed by investors on our Proforma Financial Information should be limited.

6. There are outstanding legal proceedings involving our Company, our Directors and our Promoters. Any adverse decisions could impact our cash flows and profit or loss to the extent of demand amount, interest and penalty, divert management time and attention and have an adverse effect on our business, prospects, results of operations and financial condition.

There are outstanding legal proceedings involving our Company, our Directors and our Promoters. For details, see “**Outstanding Litigation and Material Developments**” beginning on page 251 of this Draft Red Herring Prospectus.

7. Our business is subject to season volatility due to packaged mineral water and soft drinks sales in summer and winter seasons.

Our Company’s business is inherently seasonal in nature, with a significant portion of our sales being made to packaged mineral water suppliers and soft drink manufacturers, whose demand peaks during the summer season and declines during the winter months. As a result, our revenues and profitability tend to be higher in the summer and lower in the winter, in line with industry practices. This seasonality may cause considerable fluctuations in our financial performance across different quarters or half-yearly periods, and such interim results may not accurately reflect the overall financial condition or operating results of the Company on an annual basis. Consequently, reliance placed by investors or other stakeholders on such seasonal financial figures, without consideration of the broader context, may lead to misinterpretation of the Company’s true performance and could potentially impact investor sentiment and decision-making. The following table represents the quarterly sales turnover of the company for the periods indicated:

(Rs. In Lakhs)

Period	FY 23-24		FY 22-23		FY 21-22	
	Revenue (in Lakhs)	% of Revenue	Revenue (in Lakhs)	% of Revenue	Revenue (in Lakhs)	% of Revenue

Our factory are currently located in Latur, Maharashtra which is subject to various operational risks, including equipment failures, industrial accidents, severe weather conditions, and natural disasters. Significant equipment malfunctions or breakdowns could result in substantial repair and maintenance costs and operational delays. If repairs are not timely or feasible, we may be forced to suspend operations until replacement machinery can be procured. Disruptions caused due to

breakdown of machinery installed could also lead to a reduction in our production levels, resulting in a negative impact on our earnings. We cannot assure you that we will always have access to sufficient supply of electricity in the future to accommodate our production requirements and planned growth. In the event of prolonged disruptions at our factory. Our facilities and equipment would be difficult and costly to replace on a timely basis and in a cost-efficient manner. Moreover, catastrophic events could also destroy any inventory located at our unit. Such disruptions may result in delays in shipments of raw materials from our suppliers to us and shipment of products from us to our customers. The occurrence of any such catastrophic event could result in the temporary or long-term closure of our factory, severely disrupting our business operations and materially and adversely affecting our business, results of operations, cash flows and financial condition.

9. *We require certain approvals or licenses in the ordinary course of business, and the failure to renew, obtain, or retain them in a timely manner, or at all, may adversely affect our operations.*

Though we believe that we have obtained those permits and licenses which are adequate to run our business, we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses, and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain, or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition, and results of operations.

Our Company has submitted applications for various approvals, including Trademark registration, factory license, private bonded warehouse, and permissions from the Maharashtra Pollution Control Board (“MPCB”) and the Maharashtra State Electricity Distribution Board (“MSEDDB”) for our manufacturing units. The approvals required by our Company are subject to various conditions, and there is no assurance that they will not be suspended or revoked in the event of actual or alleged non-compliance with their terms, or due to regulatory action. Any failure on our part to comply with applicable regulations, or any changes to such regulations, could result in increased compliance costs, penalties, revocation of approvals and permits, or disruption to our operations, any of which could have an adverse impact on our business. Our Company is in the process of making an application for a change in name in all the permits, licenses, and approvals, which are currently under the Company’s former name.

While our statutory auditor possesses a valid peer reviewed certificate, due to their existing commitments, the task of providing the restated financial statements was entrusted to the aforementioned peer-reviewed chartered accountant.

12. We have to update the name of our company in some of the statutory approvals and certificates due to the acquisition of Proprietorship firm into the Company, and any failure to efficiently integrate and operate the acquired business could adversely affect our results of operations and financial condition

Our Company has recently acquired the ongoing business of *M/s Bai Kakaji Industries*, a proprietorship firm owned by Mrs. Kiran Balkishan Mundada, pursuant to a Business Transfer Agreement dated March 01, 2025. Following this acquisition, some of the statutory approvals and registrations, including licenses and certificates required for the operation of the business, continue to be in the name of the erstwhile proprietorship firm. We are currently in the process of transferring these approvals and certificates in the name of our Company, Bai Kakaji Polymers Limited, in compliance with applicable laws, including the Companies Act, 2013. 14. Under-utilization of our manufacturing capacities and/or an inability to effectively utilize our existing manufacturing capacities in future could have an adverse effect on our business, future prospects and future financial performance.

Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing facilities as well as on the market demand of the products sold by us. Among others, the capacity utilization also depends upon the availability of raw materials, labour, industry/ market conditions and procurement practice followed by our customers. An inability to effectively utilize manufacturing capabilities over extended periods in future could materially and adversely impact our business, growth prospects and future financial performance. Further, Information relating to our installed capacities and the historical capacity utilization of our manufacturing facilities included in this Draft Red Herring Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials and assumptions relating to potential utilization levels and operational efficiencies. Though the details related to our installed capacities and actual utilization is certified by M/s *Abhijeet B Nalawade, Chartered Engineer dated June 12, 2025*, the Actual utilization rates may differ significantly from the estimated installed capacities or historical estimated capacity utilization information of our facilities. Undue reliance should therefore not be placed on our installed capacity or historical estimated capacity utilization information for our existing facilities included in this Draft Red Herring Prospectus.

15. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material effect on our business and financial condition.

Our operations are subject to risks inherent in manufacturing facilities such as risk of equipment failure, work accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions including hazards that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environmental damage. Our significant insurance policies consist of, among others, Bharat Flexi Laghu Udyam Suraksha, Marine Cargo Open Policy, Flexi Property Protector Policy, Fire Loss of Profit Insurance (FLOP) Policy, Burglary First Loss Policy, Machinery Breakdown Insurance Policy and Vehicle Insurance Policy from New India Assurance Co. Ltd, Magma General Insurance Limited, IFFCO - TOKIO General Insurance Co. Ltd. and United India Insurance Co. Ltd.

While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks. We have not insured ourselves for Key managerial person insurance, General liability insurance, Group medical insurance, Cargo Insurance during transit, Director's Limited liability insurance and cyber security or system failure insurance. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. Though, we have not faced any such instance in past, there can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

16. Our Company's logo is not registered as on Draft Red Herring Prospectus. We may be unable to protect our intellectual property against third party infringement or are found to infringe on the intellectual property rights of others, it could have a material adverse effect on our business, result of operations, and financial conditions.

We have not yet registered the trademark that we are using for the business. We have made an application under the Trademarks Act of 1999 to register our logo. “ and  which is pending for approval. Our logo is significant to our business and operations. The use of our logo by third parties could adversely affect our reputation, which could in turn adversely affect our business and results of operations. Obtaining, protecting and defending intellectual property rights can be time consuming and expensive, and may require us to incur substantial costs, including the diversion of the time and resources of management and technical personnel. Further, while we endeavor to ensure that we comply with the

intellectual property rights of others, there can be no assurance that we will not face any intellectual property infringement claims brought by third parties that may require us to introduce changes to our operations. Any claims of infringement, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending and resolving such claims, and may divert the efforts and attention of our management and technical personnel away from our business. We could be required to pay third party infringement claims. In such cases, our financial conditions and business operations may be adversely impacted.

17. Our failure to adapt to technological developments or industry trends could affect the performance and features of our products, and reduce our attractiveness to our customers.

As our operations grow in scope and size, whether through offering of new products or expansion into new markets, we must continuously improve, upgrade, adapt and expand our systems and infrastructure to offer our customers enhanced products, features and functionality ahead of rapidly evolving customer demands, while maintaining the reliability and integrity of our systems and infrastructure in a cost-efficient and competitive manner. The systems, infrastructure and technologies we currently employ may become obsolete or be unable to support our increased size and scale. Even, if we are able to maintain, upgrade or replace our existing systems or innovate or customize and develop new technologies and systems, we may not be as quick or efficient as our competitors in upgrading or replacing our systems. We may be unable to devote adequate financial resources or obtain sufficient financing on commercially acceptable terms in time, or at all, which may have a material adverse effect on our business, prospects, results of operation and financial condition. For further details regarding our business, please refer to chapter titled “**Business Overview**” beginning on page 114 of this Draft Red Herring Prospectus.

18. Our business is working capital intensive and Inventories and trade receivables form a major part of our current assets. Failure to manage our inventory and trade receivables could have an adverse effect on our sales, profitability, cash flow and liquidity.

Our Company’s business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets. The results of operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. To effectively manage our inventory, we must be able to accurately estimate customer demand / potential orders and supply requirements and purchase new inventory accordingly. Though, there is no past instance of over or under estimation of inventory during the reporting period, if we misjudge expected customer demand / potential orders, it could cause either a shortage of products or an accumulation of excess inventory. For the nine months period ended December 31, 2024 and fiscal year 2024, 2023 and 2022 our inventories were Rs. 2832.82 lakhs, Rs. 2304.82 lakhs, Rs. 1,850.30 lakhs and Rs. 1510.65 lakhs respectively.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. Moreover, since most of our sales are based on orders received from customers as per their requirements, if we fail to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and/ or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. For the nine months period ended December 31, 2024 and fiscal year 2024, 2023 and 2022 our trade receivables were Rs. 2,546.84 lakhs, Rs. 1,927.70 lakhs, Rs. 2,134.71 lakhs and Rs. 1,528.77 lakhs respectively. There can be no assurance that the progress payments will be remitted by our customers to us on a timely basis or that we will be able to efficiently manage the level of bad debt arising from such payment practice. We may be subject to working capital risks due to delays or defaults in payment by our customers, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

19. Extensive government regulation and the impact of plastics on the environment could have a severe impact on our ability to continue our business operations, which could adversely affect our business, results of operations and financial condition.

We are primarily engaged in the business of manufacturing of PET preforms, Plastic caps and closures. The raw material utilized to manufacture these products predominantly consists of plastic. The increasing reliance of the world on plastics and plastic products and their impact on the environment, could lead to promulgation of stricter government regulations and adoption of rigorous waste management rules which in turn may require us to make additional capital expenditures, incur additional expenses or take other actions in order to remain compliant and maintain our current operations. Increased awareness of plastic pollution and its staggering impact on our environment might lead to imposition of complete or partial

ban on the industrial usage of plastics or supply of plastics, which could have a severe impact on the operation of our manufacturing unit and our continued business operations. On happening of any of the abovementioned events, we may have to completely halt our business operations or reduce our production to comply with the prevalent government and industrial regulations. In the event, we are forced to shut down our manufacturing units or halt our business operations, the continuity of our business operations, revenue, result of operations and financial condition might be adversely affected.

20. *Our eligibility for and receipt of subsidies under the Packaged Scheme of Incentives (PSI) –2019 is subject to various conditions, and any delay, shortfall, or non-receipt of such subsidies may adversely affect our business, financial condition, and results of operations.*

We have been receiving industrial promotion subsidies under the Packaged Scheme of Incentives (**PSI**) – 2019 from the Directorate of Industries, Government of Maharashtra, in the name of Bai Kakaji Industries. Pursuant to a Business Transfer Agreement, our Company acquired the business of M/s Bai Kakaji Industries, effective from March 1, 2025. The continued receipt of these incentives is subject to fulfillment of various conditions, including submission of updated production data, audited financial statements, maintenance of normal production levels, and execution of required documentation such as disbursement agreements and stamped receipts.

However, the actual disbursement of sanctioned subsidies depends on compliance with the scheme's terms and the availability of government funds. There is no assurance that we will be able to meet all eligibility conditions within the prescribed timelines or that the sanctioned incentives will be received in full or without delay. Any delay, reduction, or withdrawal of these incentives may adversely impact our expected cash flows, working capital availability, and overall financial performance. Further, any changes to the PSI-2019 scheme or relevant government policies could affect our ability to claim or continue receiving similar incentives in the future, thereby impacting our business operations and profitability.

21. *Adverse publicity regarding our products could negatively impact us.*

Our company operates in a highly competitive industry where consumer perception and trust are paramount. Negative publicity, whether stemming from concerns about the efficacy or safety of our own products or those of our competitors, poses a significant risk to our business.

Such negative publicity, even if unfounded, can severely damage our reputation, erode consumer confidence, and lead to a decline in demand for our products. This decreased demand directly impacts our ability to acquire new customers and maintain existing sales volumes, ultimately resulting in a decline in revenue generation and cash flow. Furthermore, negative publicity can disrupt our operational activities, including production, distribution, and customer service. It can also necessitate significant financial resources to address the concerns raised, such as conducting further research, implementing corrective measures, and engaging in public relations and legal efforts to mitigate the damage. These unforeseen expenses can strain our financial resources, potentially impacting our ability to meet our operating cash flow requirements and hindering our overall growth and profitability.

22. *We have in the past entered into related party transactions and may continue to do so in the future.*

We have entered into various transactions with our Directors/ Promoters, Promoter Group members, Promoter Group entities and Group Company. These transactions, inter-alia include, remuneration, loans and advances, sales, purchases etc. For details, please refer to “**Annexure-AC- Related Party Transactions**” under Section titled “**Financial Information of the Company**” of this Draft Red Herring Prospectus. Our Company has entered such transactions due to easy proximity and quick execution on arms-length price in compliance with provisions of Companies Act 2013 and other applicable laws. Although all related-party transactions that we may enter into in the future are subject to approval by Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions are not entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

23. *Our contingent liabilities and commitments as stated in our Restated Financial Statements could affect our financial condition.*

Our contingent liabilities and commitments as on December 31, 2024 was Rs. 1,338.26 lakhs. If a significant portion of these liabilities materialize, fully or partly, the financial condition of our Company could be affected.

24. Our industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.

We believe that the industry in which we operate faces competitive pressures in recruiting and retaining skilled and unskilled labour. Our industry being labour intensive is highly dependent on labour force for carrying out its business operations. Shortage of skilled / unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past, however there can be no assurance that we will not experience any such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition. For more details regarding labour related expenses, please refer to the section titled *‘Financial Information of the Company’* beginning on page 168 of the Draft Red Herring Prospectus.

25. We are heavily dependent on our Promoter and Key Management Personnel for the continued success of our business through their continuing services and strategic guidance and support

Our performance depends upon the continued services efforts and abilities of our Promoters and Key managerial personnel, particularly Harikishan Pandurangji Mundada and Balkishan Pandurangji Mundada. They have gained significant experience in this line of business and has over the years-built relations with our suppliers, third party suppliers, customers and other persons who are connected with us and have been actively involved in the day to-day operations and management. Further we believe that the inputs and experience of our senior management, in particular, and other key personnel are valuable for successful delivery of products, our overall business operations and the strategic directions taken by our Company. For details in relation to the experience of our key management personnel, please refer to Section *“Our Management”* on page 144 of this Draft Red Herring Prospectus.

We cannot assure you that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find an adequate replacement in a timely manner, or at all. The loss of any of our promoter, senior management and other key personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the promoter, senior management and other key personnel could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy.

26. None of our Directors possess experience of being on the board of any listed company.

None of our Directors possess experience of serving on the board of any listed company and accordingly, may not be adequately well-versed with the activities or industry practices undertaken by the listed company. We cannot assure you

that this lack of adequate experience will not have any adverse impact on the management and operations of our Company. Further, our Company will also be subject to compliance requirements under the SEBI Listing Regulations and other applicable law post listing of the Equity Share on the Stock Exchanges. Our Board is capable of efficiently managing such compliance requirements including by engaging professionals having expertise in managing such compliances.

27. We are exposed to foreign currency fluctuation risks, particularly in relation to import of raw materials, which may adversely affect our results of operations, financial condition and cash flows

Our manufacturing operations require a number of input materials, illustratively High Density Polyethylene (HDPE) and Polyliner (Dara form) which are sourced / procured either partly, or entirely, from international suppliers. These input materials are indispensable in manufacturing some of our products and are integral to our manufacturing process. During the nine months period ended December 31, 2024 and for the last three Fiscals 2024, 2023 and 2022, our purchase from international suppliers were ₹ 855.88 lakhs, ₹716.89 lakhs, ₹960.76 lakhs and 1,070.89 lakhs, constituting 6.85%, 3.92%, 4.63% and 6.77%, respectively, of our total purchases. Thus, our global operations expose us to foreign exchange rate risks, arising primarily from our receivables, payables, export and import of goods.

The company has received a Proforma invoice for the purchase of plant & machinery from an overseas supplier, and will make the payment in a foreign currency using a bridge loan. However, the company has not hedged the associated currency risk. Change in the value of currencies with respect to the Rupee may cause fluctuations in our operating results expressed in Rupees. The Exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Depreciation of the Indian Rupee against the USD may adversely affect our results of operations by increasing the cost of the raw materials we import or any proposed capital expenditure in foreign currencies. There can be no guarantee that such fluctuations will not affect our financial performance in the future as we continue to expand our operations globally. In addition, we are subject to the risks associated with carrying out business operations on an international scale, including the following, the occurrence of any of which may adversely affect our business, results of operations, financial condition, cash flows and future prospects:

- Import and export regulations that could among others erode profit margins or restrict imports or exports, changes in foreign exchange controls and tax rates, foreign currency exchange rate fluctuations, including devaluations.
- Changes in regional and local economic conditions, including local inflationary pressures, economic cycle and demand for products in the international markets;
- Changes in laws and regulations, unsettled political conditions and possible terrorist attacks against countries where we sell our products or have other interests;

In the event that we are unable to anticipate and effectively manage these and other risks, it could have a material and adverse effect on our business, results of operations, financial condition, cash flows and future prospects.

28. We are subject to strict quality requirements and are consequently required to incur significant expenses to maintain our service quality. Any failure to comply with such quality standards may lead to cancellation of existing and future orders which may adversely affect our reputation, financial conditions, cash flows and results of operations.

All our products and manufacturing processes are subject to stringent quality standards and specifications as specified by our customers and also covered under the quality standards of certification. Furthermore, we are an ISO 9001:2015 certified company engaged in the manufacturing of PP/HDPE caps and closures through compression and injection moulding, as well as manufacture of Pet preforms by injection moulding, packing & dispatch for use in food and beverage industry. Given the nature of our products and the sector in which we operate, we believe that our customers have high standards for product, quality and delivery schedules. Adherence to quality standards is a critical factor as a defect in product manufactured by our Company or failure to comply with the specifications of our customers may, in turn, lead to the manufacturing of faulty end-products by our customers. This may lead to cancellation of supply orders by our customers. As a result, any failure on our part to maintain applicable standards and manufacture products according to prescribed quality specifications, may lead to loss of reputation of our Company, cancellation of the order, loss of customers, rejection of the product, which will require us to incur additional cost to replace the rejected product, all or any of which could have adverse effect on our business and financial condition, although, no such instance occurred in the past, by the Company till date. Additionally, it could expose us to monetary liability and/ or litigation. Further our facilities, process and products are exposed to regular inspection and audits by our customers to ensure that their internal standards are appropriately met. Any non-compliance observed during inspection/audit may have an adverse impact on our business, financial condition, results of operations and future prospects. Any negative publicity regarding our Company or our products could adversely affect our reputation, our operations and our results from operations.

29. *Our historical performance is not indicative of our future growth or financial results and we may not be able to sustain our historical growth rates.*

Our revenue from operations increased from ₹19,340.18 lakhs in FY 2021-22 to ₹27,287.91 lakhs in FY 2022-23, and further to ₹29,481.45 lakhs in FY 2023-24. For the nine-month period ended December 31, 2024 our revenue stood at ₹23,318.44 lakhs. Sustaining this growth will require significant investments, including in assets, and will put pressure on our ability to effectively manage and mitigate both historical and emerging risks. The expansion of our business, along with the increasing scope and complexity of our operations, may strain our internal control framework and processes, potentially resulting in delays, increased costs, and compromises in product and service quality. We may not be able to effectively manage this growth or achieve the desired profitability within the expected timeframe or at all.

In the plastic caps/closure and pet preforms products manufacturing industry, we operate competition from both organized and unorganized players from various regions in India. These competitors offer products similar to ours, potentially gaining a competitive edge in aspects such as pricing, durability, product quality, user experience, operational efficiency, timely delivery, and reliability. Keeping pace with the ever-changing technology landscape in the industry is crucial, and our ability to adapt will significantly impact our competitive standing.

Additionally, several of our strategic initiatives are currently in their nascent stages. While initial success is a possibility, the long-term success of these initiatives is not guaranteed. The inherent uncertainties in the early stages of strategic endeavours necessitate a cautious approach, and we cannot assure sustained success without potential challenges and adjustments along the way. We remain vigilant and adaptable, ready to navigate the evolving landscape and optimize our strategies for long-term success.

30. *Any variation in the utilization of the Net Proceeds as disclosed in this Draft Red Herring Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company*

We propose to utilize the Net Proceeds for repayment of borrowing availed by our Company, funding capital expenditure for the installation of additional plant & machinery and setting up a solar power project, and general corporate purposes. For further details of the proposed objects of the Issue, see “**Objects of the Issue**” beginning on page 84 of this Draft Red Herring Prospectus. However, these objects of the Issue have not been appraised by any bank, financial institution or other independent agency. Further, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with the Companies Act, 2013 and the SEBI ICDR Regulations, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Red Herring Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations. Further, our Promoters would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement to provide an exit opportunity to such dissenting shareholders of our Company may deter our Promoters from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoter will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition, if any, which may adversely affect our business and results of operations.

31. *Our Proposed investment in a solar power project, which forms part of the Objects of the Issue, is subject to regulatory, pricing, and operational risks that may adversely affect our financial performance.*

We propose to utilize ₹1,294.47 lakhs from the Net Proceeds of the Issue towards funding the capital expenditure for the supply, installation, and commissioning of a 2.5 MW AC / 3.5 MW DC ground-mounted solar power project under the Open Access mechanism, to be set up in a 50 MW solar park being developed by CleanHedge at Village Savali (K), Hettikundi, Agargaon Taluka, Karanja, Wardha, Maharashtra. Any adverse changes in policies relating to power purchase agreements (PPAs), net metering, tariff structures, banking of power, open access, or eligibility for set-off of power generated may negatively impact the economic viability of the project. In addition, fluctuations in solar tariffs, delays in obtaining statutory approvals, or withdrawal/modification of government subsidies or incentives may reduce the expected cost savings or returns on this investment. Furthermore, unforeseen operational or environmental challenges, such as lower solar radiation, equipment failure, or transmission delays, may affect the plant’s performance and efficiency. Accordingly,

there can be no assurance that the proposed solar project will achieve its intended objectives, and any such risks may adversely affect our profitability, cash flows, and overall results of operations.

32. *We are subject to competition from both organized and unorganized players in the market, which may significantly affect the fixation and realisation of the price for our product, which may adversely affect our business operation and financial condition.*

The market for our products is highly competitive, with both organized and unorganized players. Key differentiators include product quality, sales and distribution network, pricing, and timely delivery. Some competitors possess greater industry experience, financial resources, and technical capabilities, enabling them to adapt more quickly to changing market conditions. Unorganized sector competitors may offer products at highly competitive prices, potentially affecting our sales volume and growth prospects. Increasing competition could lead to a decline in our market share and margins, negatively impacting our business operations and financial condition. The industry is undergoing rapid consolidation, and the combined strength of larger companies could affect our competitive position across all business areas. Additionally, acquisitions of our customers or suppliers by competitors could result in lost business, impacting our operations and financial performance.

33. *Unsecured loans taken by us can be recalled at any time*

Our Company have currently availed unsecured loans which may be recalled by the lenders at any time. As on December 31, 2024, the unsecured loans of our Company that may be recalled at any time by the lenders aggregated to ₹544.44 lakhs, which constituted approximately 12.17% of the total indebtedness of our Company. For further details, see “**Statement of Financial Indebtedness**” beginning on page 236. In the event that any lender seeks a repayment of any such loan, we would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all

34. *The average cost of acquisition of Equity Shares by our Promoters, is lower than the face value of Equity Share.*

The average cost of acquisition of Equity Shares of our Promoters are lower than the face value of Equity Shares i.e. ₹ 10/- . For further details regarding the average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares of our Promoters in our Company, please refer Chapter titled “**Capital Structure**” beginning on page 71 of this Draft Red Herring Prospectus.

35. *We have issued Equity Shares in the last 12 months at a price which could be lower than the Issue Price.*

Except for bonus issue made on May 23, 2025 for 135,00,000 Equity Shares of face value of Rs.10 each in the ratio of 6:1, our Company has not issued any Equity Shares at a price lower than the Issue Price during the period of one year preceding the date of this Draft Red Herring Prospectus. For details, please refer to section titled “**Capital Structure**” on page 71 of this Draft Red Herring Prospectus.

36. *Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.*

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of our finished products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third-party transport service providers and engage them on a needs basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third-party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

37. *The Promoters (including Promoter Group) and Directors hold almost 100% of the Equity Shares of our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.*

Our Promoter and Directors are interested in our Company, in addition to regular remuneration or benefits or as on required basis reimbursement of expenses, to the extent of their shareholding in our Company or their relatives and benefits deriving from the directorship in our Company. There can be no assurance that our Promoter will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting.

For further information, please refer to the chapters/section titled ***“Our Business”, “Our Promoter and Promoter Group”*** and ***“Annexure AC - Related Party Transactions”***, beginning on pages 114, 160 and 168 respectively of this Draft Red Herring Prospectus.

38. We have incurred indebtedness which exposes us to various risks which may have an effect on our business and results of operations.

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on December 31, 2024, our total outstanding indebtedness was Rs. 4,700.16 lakhs including fund based, non-fund based and unsecured loans.

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to:

- a) increasing our vulnerability to general adverse economic, industry and competitive conditions;
- b) limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- c) affecting our credit rating;
- d) limiting our ability to borrow more money both now and in the future; and
- e) increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a shorter notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an effect on our cash flow and financial conditions of the company.

For further details regarding our indebtedness, see ***“Statement of Financial Indebtedness”*** on page 236 of this Draft Red Herring Prospectus.

39. Technology failures or Cyber-attacks or other security breaches could have a material adverse effect on our business, results of operation or financial condition

IT systems are critical to our ability to manage our operations. Our IT systems enable us to coordinate our operations, from planning, production scheduling, raw material ordering, invoicing, delivery, customer relationship, management and decision support. If we do not allocate and effectively manage the resources necessary to build and sustain the proper IT infrastructure, we could be subject to transaction errors, processing inefficiencies, customer service disruptions and, in some instances, loss of customers.

We face cyber threats, threats to the physical security of our facilities and employees, the potential for business disruptions associated with IT failures, natural disasters, or public health crises. We have installed anti-virus software to prevent our systems and infrastructure from being infected and crippled by computer viruses. If we are unable to protect sensitive information, our customers could question the adequacy of our threat mitigation and detection processes and procedures. Due to the evolving nature of these security threats, the impact of any future incident cannot be predicted.

40. Delays or defaults in client payments could affect our operations

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

41. Loans availed by our company has been secured on personal guarantees of our directors & promoters. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected in case of invocation of any personal guarantees provided by our directors.

Our Promoters & Directors i.e. Harikishan Pandurangji Mundada, Balkishan Pandurangji Mundada, Akash Balkishan Mundada Akshay Balkishan Mundada and Kiran Balkishan Mundada have provided personal guarantee majorily to secure our existing borrowings taken from the banks and may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the personal/corporate guarantees provided by the aforesaid may be invoked which could negatively impact their reputation and net worth. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding

amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

For further details regarding loan availed by our Company, please refer ***“Statement of Financial Indebtedness”*** on page 236 of this Draft Red Herring Prospectus.

42. Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.

Our promoters along with the promoter group will continue to hold majority of the Equity share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder's vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoter will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

43. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.

The proposed fund requirement for our Capital expenditure for setting solar power project and repayment of debt, as detailed in the section titled ***“Objects of the Issue”*** is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled ***“Objects of the Issue”*** beginning on page 84 of this Draft Red Herring Prospectus.

44. The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue price is based on numerous factors. For further information, see the chapter titled ***“Basis for Issue Price”*** beginning on page 93 of this Draft Red Herring Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. The factors that could affect our share price are:

- Variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings;
- Domestic and international economic, legal and regulatory factors unrelated to our performance

45. Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.

Our operations may be subject to incidents of theft or damage to inventory. The business may also encounter some inventory loss on account of employee theft, supplier fraud and general administrative error. While we have not experienced any such instance in the past, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse or similar incidents in the future, which could adversely affect our results of operations and financial condition. Though we have insurance losses due to theft, fire or damage caused by other casualties, could adversely affect our results of operations and financial condition.

46. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

47. We may not be able to sustain effective implementation of our business and growth strategy.

The success of our business will largely depend on our ability to effectively implement our business and growth strategy.

In the past, we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

48. *Our lenders have charge over properties in respect of finance availed by us.*

We have secured our lenders by creating a charge over our movable's assets in respect of credit facilities availed by us from banks and financial institutions. The total amounts outstanding and payable by us as secured loans were Rs. 3,929.12 lakhs as on December 31, 2024. In the event we default in repayment of the credit facilities availed by us and any interest thereof, hypothecation charge on our movable's assets may be invoked by the lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. For further information on the Financial Indebtedness please refer chapter titled "**Financial Indebtedness**" beginning page 236 of the Draft Red Herring Prospectus.

49. *Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.*

We are engaged in the manufacturing business which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund, Employee State Insurance, and Professional Tax etc. Any demand or penalty raised by the concerned authority in future for any previous years or current year will affect the financial position of the Company. In one of the instance, the Company did not meet export obligations under the EPCG licence for the financial years 2021–22 and 2022–23, resulting in unpaid customs duty of ₹109.75 lakhs and interest of ₹113.59 lakhs, which remained overdue for more than six months. However, these dues were paid in the financial year 2023–24. Additionally, there have been few instances of minor delays in payment of such statutory dues by the Company however, there are no outstanding statutory dues payable as on the date of this Draft Red Herring Prospectus.

50. *We are subject to the risk of failure of, or a material weakness in, our internal control systems. If the company are unable to establish and maintain an effective system of internal controls and compliances business and reputation could be adversely affected.*

We are exposed to risks arising from the inadequacy or failure of internal systems or processes, and any actions we may take to mitigate these risks may not be sufficient to ensure an effective internal control environment. Given our high volume of transactions, errors may be repeated or compounded before they are discovered and rectified. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. As a result, we may incur expenses or suffer monetary losses, which may not be covered by our insurance policies and may result in a material effect on our business, financial condition and results of operations.

51. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, working capital requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholder's investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, please refer chapter titled "**Dividend Policy**" on page 167 of this Draft Red Herring Prospectus.

52. *The Objects of the Issue for which funds are being raised, are based on our management estimates and have not been appraised by any bank or financial institution or any independent agency. Any variation between the estimation and actual expenditure as estimated by the management could result in execution delays or influence our profitability.*

The deployment of funds will be entirely at our discretion, based on the parameters as mentioned in the chapter titled "**Objects of the Issue**". The fund requirement and deployment, as mentioned in the "**Objects of the Issue**" on page 84 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter "**Objects of the Issue**" is at the discretion of our

Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “**Objects of the Issue**” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

53. *The company may undertake acquisitions, investments, joint ventures or other strategic alliances, which may have a material adverse effect on ability to manage business, and such undertakings may be unsuccessful.*

We may not realize the anticipated benefits of future strategic alliances, acquisitions, divestitures, or business strategies. We may in the future enter into strategic alliances, including joint ventures or minority equity investments, with various third parties to further our business purpose from time to time. These investments could subject us to a number of risks, including risks associated with sharing proprietary information with and non-performance by third parties, and increases in expenses in establishing new strategic alliances, any of which may materially and adversely affect our business. We may have limited ability to monitor or control the actions of these third parties. To the extent any of the third parties from our strategic alliance, joint venture, acquisition or divestiture investments suffers negative publicity or harm to their reputation from events relating to their businesses, we may suffer negative publicity or harm to our reputation by virtue of our association with any such third party.

We cannot assure you that we will be able to identify suitable acquisition opportunities, negotiate favourable terms or successfully acquire identified targets. While we do not believe we are subject to any significant integration risks on account of the acquisition, the success of such acquisition or other acquisitions that we may undertake from time to time depends, in part, on our ability to realize the anticipated growth opportunities and synergies from integrating these businesses, which requires substantial management attention and efforts as well as additional expenditures.

54. *Our actual results could differ from the estimates and projections used to prepare our financial statements.*

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

55. *There is no guarantee that the Equity Shares issued pursuant to the issue will be listed on the SME Platform of BSE in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

56. *Industry information included in this Draft Red Herring Prospectus has been derived from industry sources. There can be no assurance that such third-party statistical, financial and other industry information is complete, reliable or accurate.*

57. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

58. *Significant differences exist between Indian GAAP and other accounting principles, such as Ind AS, IFRS and U.S. GAAP, which may be material to investors' assessments of our financial condition, result of operations and cash flows.*

Our restated summary statements of assets and liabilities, restated summary statements of profit and loss and cash flows for the period ending December 31, 2024 and Fiscals 2024, 2023 & 2022 have been prepared in accordance with the Indian GAAP. We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Draft Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. Ind AS, US GAAP and IFRS differ in significant respects from Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited.

59. *Certain key performance indicators for certain listed industry peers included in this Draft Red Herring Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete.*

Pursuant to the requirements of the SEBI ICDR Regulations, we have included certain key performance indicators, comprising financial and operational information, for certain listed industry peers, in the ***"Basis for Issue Price"*** beginning on page 93 of the Draft Red Herring Prospectus. Although this information is sourced from and relied upon on the consolidated/ standalone audited financial statements of the relevant listed industry peers as available on the websites of the Stock Exchanges, including the annual reports of the respective companies submitted to Stock Exchanges, there is no assurance that this information with respect to industry peers is either complete. There may be different methodologies and formulas used to compute the various ratios.

60. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt-equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future equity issuance by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Offer, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

61. *Certain data mentioned in this Draft Red Herring Prospectus has not been independently verified.*

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

62. *QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and Individual Investors are not permitted to withdraw their Bids after Bid/Issue Closing Date.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Individual Bidders can revise their Bids during the Bid/Offer Period and withdraw their Bids until Bid/Offer Closing Date. While we are required to complete Allotment, listing and commencement of trading pursuant to the Issue within three (3) Working Days from the Bid/ Issue Closing Date, events affecting the Bidders' decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the Bidders' ability to sell our Equity Shares Allotted pursuant to the Issue or may cause the trading price of our Equity Shares to decline on listing.

63. *We may be subject to surveillance measures, such as the Additional Surveillance Measures (ASM) and the Graded Surveillance Measures (GSM) by the Stock Exchanges which may adversely affect trading price of our Equity Shares.*

SEBI and Stock Exchanges in order to enhance market integrity and safeguard interest of investors, have been introducing various enhanced pre-emptive surveillance measures. The main objective of these measures is to alert and advice investors to be extra cautious while dealing in these securities and advice market participants to carry out necessary due diligence while dealing in these securities. Accordingly, SEBI and Stock Exchanges have provided for (a) GSM on securities where such trading price of such securities does not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net-worth, price per equity multiple and market capitalization; and (b) ASM on securities with surveillance concerns based on objective parameters such as price and volume variation and volatility.

On listing, we may be subject to general market conditions which may include significant price and volume fluctuations. The price of our Equity Shares may also fluctuate after the Offer due to several factors such as volatility in the Indian and global securities market, our profitability and performance, performance of our competitors, changes in the estimates of our performance or any other political or economic factor. The occurrence of any of the abovementioned factors may trigger the parameters identified by SEBI and the Stock Exchanges for placing securities under the GSM or ASM framework such as net worth and net fixed assets of securities, high low variation in securities, client concentration and close to close price variation. In the event our Equity Shares are subject to such pre-emptive surveillance measures implemented by any of the Stock Exchanges, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

EXTERNAL RISK FACTORS

64. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. Recent developments in the ongoing conflict between Russia-Ukraine, Israel-Palestine has resulted in and may continue to result in a period of sustained instability across global financial markets, induce volatility in commodity prices, increase borrowing costs, cause outflow of capital from emerging markets and may lead to overall slowdown in economic activity in India. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries.

65. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

66. *A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.*

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. Further, there have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

67. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter "**Government and Other Approvals**" on page 265 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the

related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations.

68. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. To illustrate, the global financial turmoil impact, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

69. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Famine, War, Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, famine, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Our operations may be adversely affected by natural disasters and/or severe weather conditions, which can result in damage to our seeds inventory and hamper our productivity and may slow down our business operations temporarily or any other factor, which can adversely affect agriculture market in which we operate. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

In addition, India has witnessed local civil disturbances in recent years, in particular communal violence across ethnic or communal lines involving conflicts, riots and other forms of violence between communities of different religious faith or ethnic origins, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

70. *Our performance is linked to the stability of policies and the political situation in India.*

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

71. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

72. Changing regulations in India could lead to new compliance requirements that are uncertain.

The regulatory environment in which we operate is evolving and is subject to change. The Government of India may implement new laws or other regulations that could affect the logistics industry or the sectors we serve, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations. Any such changes and the related uncertainties with respect to the implementation or change in the legal framework may have a material adverse effect on our business, financial condition and results of operations.

73. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

74. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

ANNEXURE TO THE STATEMENT OF SPECIAL TAX BENEFITS

The information provided below sets out the special tax benefits available to the Company and the Equity Shareholders under the Income Tax Act, 1961 presently in force in India. It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in Equity Shares particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the benefits, which an investor can avail.

A. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE COMPANY:

1. Under Income-tax Act, 1961

Lower Corporate Tax rate under Section 115BAA²

A new Section 115BAA has been inserted by the Taxation Laws (Amendment) Act, 2019 (“the Amendment Act, 2019”) granting an option to domestic companies to compute corporate tax at a reduced rate of 25.17% (22% plus surcharge of 10% and cess of 4%) from the Fiscal Year 2019-20, provided such companies do not avail specified exemptions/incentives (e.g. deduction under Section 10AA, 32(1) (iia), 33ABA, 35(2AB), 80-IA etc.) The Amendment Act, 2019 also provides that domestic companies availing such option will not be required to pay Minimum Alternate Tax (“MAT”) under Section 115JB. The CBDT has further issued Circular 29/2019 dated October 02, 2019 clarifying that since the MAT provisions under Section 115JB itself would not apply where a domestic company exercises option of lower tax rate under Section 115BAA, MAT credit would not be available. Corresponding amendment has been inserted under Section 115JAA dealing with MAT credit.

The company is to exercise the above option in the Fiscal Year 2024-25 onwards.

2. Under Indirect-tax Laws including Goods & Service Tax Act, 2017

Benefits under the Central Goods and Services Tax Act, 2017, respective State Goods and Services Tax Act, 2017, Integrated Goods and Services Tax Act, 2017 and The Union Territory Goods and Services Tax Act, 2017 (read with relevant rules prescribed thereunder)

Under the Goods and Services Tax (“GST”) regime, all supplies of goods and services which qualify as exports are classified as Zero-rated supplies. Zero rated supplies are eligible for claim of GST refund under any of the two mechanisms, at the option of the Company.

The Company can either effect zero-rated supplies under Bond/ Letter of Undertaking (LUT) without payment of GST and claim refund of accumulated Input Tax Credit or effect zero-rated supplies on payment of Integrated Goods and Services Tax and claim refund of the tax paid thereof as per provisions of section 54 of Central Goods and Services Tax Act, 2017. Thus, the option of claiming refund of GST on zero rated supplies is available to the Company.

² As the Company has opted for concessional corporate income tax rate as prescribed under section 115BAA of the Act, it will not be allowed to claim any of the following deductions:

- a. Deduction under the provisions of section 10AA (deduction for units in Special Economic Zone)
- b. Deduction under clause (iia) of sub-section (1) of section 32 (Additional Depreciation)
- c. Deduction under section 32AD or section 33AB or section 33ABA (Investment allowance in backward areas, Investment deposit account, Site restoration fund)

GLOBAL ECONOMIC OUTLOOK

Global growth is stabilizing as inflation returns closer to targets and monetary easing supports activity in both advanced economies and emerging market and developing economies (EMDEs). This should give rise to a broad-based, moderate global expansion over 2025-26, at 2.7 percent per year, as trade and investment firm. However, growth prospects appear insufficient to offset the damage done to the global economy by several years of successive negative shocks, with particularly detrimental outcomes in the most vulnerable countries. From a longer-term perspective, catch-up toward advanced economy income levels has steadily weakened across EMDEs over the first quarter of the twenty-first century. Heightened policy uncertainty and adverse trade policy shifts represent key downside risks to the outlook. Other risks include escalating conflicts and geopolitical tensions, higher inflation, more extreme weather events related to climate change, and weaker growth in major economies. On the upside, faster progress on disinflation and stronger demand in key economies could result in greater-than-expected global activity. The subdued growth outlook and multiple headwinds underscore the need for decisive policy action. Global policy efforts are required to safeguard trade, address debt vulnerabilities, and combat climate change. National policy makers need to resolutely pursue price stability, as well as boost tax revenues and rationalize expenditures in order to achieve fiscal sustainability and finance needed investments. Moreover, to raise longer-term growth and put development goals on track, interventions that mitigate the impact of conflicts, lift human capital, bolster labor force inclusion, and confront food insecurity will be critical.

The global economic context has become modestly more favorable since last June, following several years characterized by overlapping negative shocks. Inflation appears to be moderating without a substantial slowdown in key economies, and monetary policy easing has now become widespread. In the next couple of years, deceleration in the two main engines of the global economy—the United States and China—is expected to be offset by firming growth elsewhere, including in many emerging market and developing economies. In all, the post-pandemic global economic expansion is forecast to remain on a steady path. However, the global economy appears to be settling at a relatively low level of growth—one insufficient to foster sustained economic development and catchup in per capita incomes—with the possibility of further headwinds from heightened policy uncertainty, growing trade fragmentation, slower than-anticipated progress in reducing inflation, and weaker activity in major economies.

Aggregate commodity prices softened by about 3 percent in 2024, primarily reflecting improving supply conditions for energy and food commodities, despite heightened geopolitical tensions. Commodity prices are projected to ease further over the forecast horizon. A small decline in oil prices last year reflected ample potential oil supply amid decelerating global oil consumption. A significant further decrease in oil prices is expected in 2025-26 as production expands while global oil demand growth remains modest. Base metals prices are set to stabilize over the forecast horizon, mirroring steady global growth. Meanwhile, prices for staple food crops, having fallen notably in 2024, are expected to post a small further decline.

Global headline inflation has continued to gradually ease, in part reflecting falling commodity prices and the lagged effects of monetary tightening. Inflation is now close to targets in many advanced economies and EMDEs, with the share of economies with above-target inflation on a downward trend and set to reach in 2025 its lowest level since the peak in 2022. Core inflation briefly edged up in some EMDEs and advanced economies at about the middle of last year on persistent strength in services inflation. However, it has since generally resumed a gradual decline.

A. Contributions to global growth

B. Share of economies with average trade growth in 2025-26 lower than in 2010-19

C. Annual change in oil demand

D. Share of economies with headline inflation above target

Fiscal policy is estimated to have been broadly neutral for global growth in 2024, with previously expected fiscal consolidation plans delayed in some major economies. Going forward, fiscal policy is generally anticipated to be modestly

contractionary. The pace of fiscal consolidation is expected to pick up in EMDEs excluding China, and in some advanced economies—although not in the United States—as governments intensify efforts to realign spending with revenues. This is likely to exert a modest drag on near-term global growth.

Over the longer term, comprehensive and wide ranging reforms will be necessary to foster greater prosperity and address the root causes of insufficient growth prospects in many EMDEs. Tackling the rising incidence of conflict is crucial to reversing declines in living standards in some of the most vulnerable countries. Targeted policies are needed to boost growth-enhancing investment, including in human capital, and advance labor force inclusion, especially in EMDE regions where the working-age population is projected to increase substantially. Bolstering food security is paramount. Acute food insecurity remains elevated, with conflict as a key driver, posing dire implications for both the immediate well-being and the lifetime prospects of those affected.

Global trade

Global trade in goods and services rebounded in 2024, growing by an estimated 2.7 percent after a tepid expansion in the previous year. Growth in goods trade accelerated in the second half of 2024, following a weaker-than-expected recovery in the first half. The pickup was partly driven by precautionary inventory buildup in anticipation of possible trade dislocations, including those resulting from dockworker strikes on the U.S. East Coast and the Gulf of Mexico, as well as announced and potential higher tariffs in the United States. Maritime transit and freight rates increased in the latter half of 2024, reflecting disruptions in maritime transport and higher shipping volumes. However, these costs remain well below the peaks seen during the pandemic and have not had a significant impact on the availability of goods or global delivery times thus far.

The recovery in global goods trade last year was uneven across country groups. Goods trade expanded steadily in EMDEs, while it remained weak in most advanced economies, except for the United States, as a result of sluggish growth. Moreover, leading indicators signal continued weakness in advanced-economy goods trade. Among EMDEs, the expansion in goods trade in 2024 was broad-based across region - except in the Middle East and North Africa (MNA), where trade contracted because of oil production cuts by OPEC+ members.

A. Goods trade growth

B. Global PMI: New export orders

Global services purchasing managers' index (PMI) for new export orders suggest that the recovery in services trade has stabilized, reflecting a slowdown in the growth of travel services. Recent data on tourist arrivals indicate that tourism activity has recovered to pre-pandemic levels in nearly all regions except for EAP, where strict pandemic-control measures remained in place for longer.

Against this backdrop, global trade growth is forecast to pick up to an average of about 3.1 percent in 2025-26, supported by slightly firming trade growth in the euro area which accounts for one-fourth of global trade as well as in Japan and EMDEs excluding China. Nevertheless, global trade growth over the forecast horizon is projected to remain below pre-pandemic averages, in line with heightened trade-restrictive measures and the overall relative softness in output and investment growth. Nearly two-thirds of countries are expected to experience lower trade growth in 2025-26 compared to their 2010-19 averages a period that was also characterized by subdued trade growth. A major downside risk to the trade outlook is the increased likelihood of surging trade restrictions and related uncertainty in light of policy shifts following key elections. Other downside risks include weaker than- expected global demand, escalating geopolitical tensions, and further disruptions in maritime transport.

INDIAN ECONOMY OVERVIEW

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP for Q2 FY25 is estimated at Rs. 76.60 lakh crore (US\$ 886.16 billion) with growth rate of 8.0%, compared to Rs. 70.90 lakh crore (US\$ 820.22 billion) for Q2 FY24. The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-December 2024, India's exports stood at Rs. 27.56 lakh crore (US\$ 318.96 billion), with Engineering Goods (27.32%), Petroleum Products (14.59%) and Electronic Goods (8.19%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market size

Real GDP for FY25 is estimated at Rs. 187.95 lakh crores (US\$ 2.2 trillion) with growth rate of 6.5%, compared to Rs. 176.51 lakh crore (US\$ 2.06 trillion) for FY24. As on Jan 2025, there are 118 unicorn startups in India, with a combined valuation of over Rs. 3.0 lakh crore (US\$ 354 billion). The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. The Current Account Deficit (CAD) stood at Rs. 98,095 crore (US\$ 11.5 billion) for Q3 of

FY25 as compared to Rs. 88,712 crore (US\$ 10.4 billion) in Q3 of FY24. This was largely due to increase in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.
- According to a report by the State Bank of India (SBI), domestic investment announcements in India have experienced a substantial increase, exceeding Rs. 37 lakh crore (US\$ 428.04 billion) in FY23 and FY24.
- According to data from the Directorate General of Civil Aviation (DGCA), India's domestic air passenger traffic increased by 6.12% in 2024, reaching a total of 161.3 million passengers. This growth follows a substantial YoY increase of 23.36% in 2023, attributed to the ongoing recovery from the pandemic
- As of January 10, 2025, India's foreign exchange reserves stood at Rs. 53,80,402 crore (US\$ 625.871 billion).
- In 1H 2024, India saw a total of US\$ 31.5 billion in PE-VC investments.
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks 3rd position in the global number of scientific publications.
- The gross GST (Goods and Services Tax) revenue collection stood at Rs. 1.77 lakh crore (US\$ 20.45 billion) in December 2024.
- Between April 2000–September 2024, cumulative FDI equity inflows to India stood at Rs. 89.30 lakh crore (US\$ 1,033.40 billion).
- In November 2024, the overall IIP (Index of Industrial Production) stood at 148.4. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 133.8, 147.4 and 184.1, respectively.

- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) – Combined inflation was 5.22% in December 2024 against 5.69% in December 2023.
- Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested (US\$ 13.89 billion) in India during January - (up to 15th July) 2024.
- The wheat procurement during Rabi Marketing Season (RMS) 2024-25 (till May) was estimated to be 266 lakh metric tonnes (LMT) and the rice procured in Kharif Marketing Season (KMS) 2024-25 was 400 LMT.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- According to a report by Wood Mackenzie in January 2025, India, the United States, and West Asia are expected to collectively add 100 Gigawatts (GW) of solar capacity by 2025, while China is anticipated to continue its leadership in the solar industry.
- In July 2024, the Ministry of Finance held the Union Budget and announced that for 2024-25, the total receipts other than borrowings and the total expenditure are estimated at Rs. 32.07 lakh crore (US\$ 383.93 billion) and Rs. 48.21 lakh crore (US\$ 577.16 billion), respectively.
- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).
- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.
- On September 17, 2023, Prime Minister Mr. Narendra Modi launched the Central Sector Scheme PM-VISHWAKARMA in New Delhi. The new scheme aims to provide recognition and comprehensive support to traditional artisans & craftsmen who work with their hands and basic tools. This initiative is designed to enhance the quality, scale, and reach of their products, as well as to integrate them with MSME value chains.
- On August 6, 2023, Amrit Bharat Station Scheme was launched to transform and revitalize 1309 railway stations across the nation. This scheme envisages development of stations on a continuous basis with a long-term vision.
- On June 28, 2023, the Ministry of Environment, Forests, and Climate Change introduced the 'Draft Carbon Credit Trading Scheme, 2023'.
- From April 1, 2023, Foreign Trade Policy 2023 was unveiled to create an enabling ecosystem to support the philosophy of 'Aatmanirbhar Bharat' and 'Local goes Global'.
- To enhance India's manufacturing capabilities by increasing investment and production in the sector, the government of India has introduced the Production Linked Incentive Scheme (PLI) for Pharmaceuticals.
- Prime Minister's Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of Rs. 1,500 crore (US\$ 182.35 million).
- Prime Minister Mr Narendra Modi has inaugurated a new food security scheme for providing free food grains to Antyodaya Ann Yojna (AAY) & Primary Household (PHH) beneficiaries, called Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY) from January 1, 2023.

Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and High-Frequency Indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of FY24 highlighted the unwavering support the government gave to its capital expenditure, which, in FY24, stood 37.4% higher than the same period last year. In the Union Budget of 2024-25, capital expenditure took lead by steeply increasing the capital expenditure outlay by 17.1 % to Rs. 11 lakh crore (US\$ 133.51

billion) over Rs. 9.48 lakh crore (US\$ 113.91 billion) in 2023-24. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's is experiencing resilient growth despite the global pandemic. India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023.

With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

INDUSTRY SCENARIO- PLASTIC INDUSTRY

Due to the enormous potential of the Indian market, local businesses have been encouraged to develop their technical skills, meet high-quality requirements, and expand their capabilities across a wide range of sectors of the growing plastics industry.

There have been phenomenal advancements in the petrochemical industry, and combined with the progress in the plastic machinery sector, they have helped forward the plastic processing industry immensely. This has made it easier for plastic processors to increase their capacity to serve both the domestic and international markets. Currently, the Indian plastic processing industry comprises approximately 30,000 units that use injection molding, blow molding, extrusion, and calendaring to create a wide range of products. Plastic material is becoming increasingly important across various industries, and per capita consumption is rising quickly. Traditional materials are being quickly replaced by plastic technology, processing equipment, expertise, and cost-effective manufacturing. The ability to serve international markets results from the skills developed in most of this industry's areas combined with inherent abilities. The Indian plastics industry has advanced significantly over the past few decades, becoming one of the nation's most significant sectors with a considerable base.

The consumption of plastics in India has significant regional variation, with Western India accounting for 47%, Northern India for 23%, and Southern India for 21%. The end-use sectors of automotive, packaging (including bulk packaging), plastics applications, electronic appliances, etc., account for the majority of consumption in Northern India and are located mostly in Uttar Pradesh and Delhi-NCR. However, other regions, including Rajasthan, Punjab, Haryana, Uttarakhand, J&K, and Himachal Pradesh, are anticipated to see growth in plastic processing due to increasing feedstock supply and a greater focus on the manufacturing sector.

Plastic materials, which were almost unknown until the 1920s, are now found in almost every facet of contemporary life, from the microchips in computers to the bags used to carry groceries. Plastic is essentially a set of materials, not just one, which is why it seems that it may be utilised almost anywhere. There are a vast variety of plastic material types, and many of them, like polyethylene, PVC, acrylic, etc., have efficient and adaptable qualities.

- **Polyethylene Terephthalate (PET):** Often known as polyethylene terephthalate, is the primary material used to make plastics in category one. Because of its vast utility, it is ranked first. Due to its powerful ability to stop oxygen from getting in and tainting the goods within, it is mostly used for food and beverage packaging. •
- **High-Density Polyethylene (HDPE):** High-Density Polyethylene is a durable resin used for various products, including shampoo bottles, playground equipment, caps, milkjugs, recycling bins, and shopping bags. It is thicker and more rigid than PET because it is formed of long, unbranched polymer chains. It is also fairly tough, impact-resistant, and resistant to temperatures up to 120° C without any negative effects. Given that HDPE is one of the most easily recycled plastic polymers, most recycling facilities accept it for disposal.
- **Low-Density Polyethylene (LDPE):** Unlike HDPE, LDPE is characterized by low-density molecules, giving this resin a thinner and more flexible design. It has the simplest structure of all plastics, making it easy and cheap to produce. Used in plastic bags, sixpack rings, various containers, dispensing bottles, and most famously for plastic wraps, it is not often recycled through curbside programs.
- **Polyvinyl Chloride (PVC):** As a synthetic plastic polymer, polyvinyl chloride is the world's third most extensively manufactured plastic. There are essentially two types of it: stiff and flexible. PVC is frequently used in buildings and construction to create pipes and profiles for doors and windows. It may be softer and more flexible when combined with

other materials and used for flooring, wiring, and plumbing insulation. PVC is currently replacing conventional building materials, including wood, metal, concrete, rubber, ceramics, etc., in various applications because of its adaptable qualities, such as lightness, durability, and ease of processing. PVC is still scarcely recyclable despite its many benefits and the plastics industry's attempts to make it more recyclable; as a result, it should be avoided wherever possible.

- **Polypropylene (PP):** The market for polypropylene, the second-most frequently manufactured commodity plastic, is anticipated to expand even further during the next years. It is tough and durable, can tolerate extreme temperatures, and is used in disposable diapers, vehicle components, thermal vests, yogurt containers, Tupperware, and even clothing. PP is typically utilized for living hinges because of its high resistance to fatigue (the thin piece of plastic that allows a part of a product to fold or bend from 1 to 180 degrees).
- **Polystyrene (PS):** The sixth type of plastic on the list is polystyrene, which comes in solid and foamed forms. Due to its low cost per unit weight and ease of production, this resin is used in a wide variety of products, including disposable tableware, insulation, packaging materials, and drinking cups. Styrofoam, perhaps better known by its brand name, is extremely flammable and hazardous because it can release harmful chemicals, especially when heated. It is considered to be one of the worst kinds of plastic in terms of the environment since it is not biodegradable. Due to its low specific gravity, polystyrene foam floats on water and 91 blows in the wind. It can have catastrophic impacts on the health of birds or marine animals that may ingest it since animals do not identify it as artificial and may mistake it for food. In addition, polystyrene is not separated and recycled when it is permitted, and curbside pickup recycling services do not take it.
- **Other Plastics:** Plastic will be included in group number seven if it cannot be distinguished from the six categories described above. The most well-known polymers in this class are polycarbonates (PC), used to create robust, durable products. In order to protect the eyes, polycarbonate is frequently used to make lenses for safety, sports, and sunglasses. However, they may also be found on compact discs (CD) and, more frequently, on smartphones. The usage of these resins has generated debate in recent years because, when they are flushed at high temperatures, they emit bisphenol A (BPA), a chemical that is listed as potentially dangerous to the environment.

Usage - The two main industries where plastic is used in India are the packaging and agricultural industries. The overall application of plastic in India from these two industries comes up to almost 46%. Electronics, home goods, and other industrial uses make up the market for plastic's remaining applications. The building, furniture, and transportation industries together account for the remaining plastic application.

Market Dynamics

The plastics industry is currently home to about 50,000 industries, most of which are micro, small, and medium-sized enterprises (MSMEs). These enterprises contribute Rs. 3.5 lakh crore (US\$ 42.89 billion) to India's economy and employ more than 50,000 people. The country recycles plastic at a rate of 60%, which is higher than that of developed nations. The "Make in India," "Skill India," "Swachh Bharat," and "Digital India" initiatives of the government are increasing plastic production, and by 2027, it is expected that the plastics industry will generate Rs. 10 lakh billion (US\$ 122.54 billion) annual revenue, with two lakh tonnes of exports.

Given that polymer is a crucial raw ingredient for plastic, the plastic industry in India is closely related to the petrochemicals sector. As a result, both upstream and downstream activities are included in the plastic industry's value chain. While the upstream market is dominated by big firms, the downstream market is far more diversified, with many small and medium-sized businesses engaged in the production of plastic goods. Strong polymer production capabilities support the Indian plastic processing industry, ensuring the supply of raw materials. The majority of the essential raw materials, such as PVC, high-density polyethylene, low-density polyethylene, and polypropylene, are produced domestically.

- **Upstream:** Petrochemical companies in India are primarily responsible for this section, which involves the production of polymers.
- **Downstream:** Plastic processing companies are responsible for this process, which involves turning polymers into plastic goods. Industries, including automotive, construction, electronics, healthcare, textiles, and fast-moving consumer goods (FMCG), among others, are the primary customers of plastic products. The downstream producers serve the needs of numerous industries throughout the nation.

The Indian plastic industry is one of the leading sectors in the country's economy. The history of the plastic industry in India dates back to 1957 with the production of polystyrene. Since then, the industry has made substantial progress and has grown rapidly. The industry is present across the country and has more than 2,500 exporters. It employs more than 4 million people in the country and constitutes 30,000 processing units; among these, 85-90% belong to small and medium enterprises. India manufactures various products such as plastics and linoleum, houseware products, cordage, fishnets, floor coverings, medical items, packaging items, plastic films, pipes, raw materials, etc. The country majorly exports plastic raw materials, films, sheets, woven sacks, fabrics, and tarpaulin. The Government of India intends to take the plastic industry from a current level of Rs. 3 lakh crore (US\$ 37.8 billion) of economic activity to Rs. 10 lakh crore (US\$ 126 billion) in 4-5 years. 10 Plastic Parks have been approved in the country by The Department of Chemicals and

Petrochemicals. Among these, six plastic parks have received final approval from the following states – Madhya Pradesh (two parks), Assam (one park), Tamil Nadu (one park), Odisha (one park), and Jharkhand (one park). These parks are intended to boost employment and attain environmentally sustainable growth.

Export Trend

In FY25 (Until June 2024), India's plastic exports stood at US\$ 2.93 billion. During this period, the exports of plastic films & sheets, FIBC woven sacks woven fabrics & tarpaulin and Packaging items – flexible rigid grew by 24.9%, 11.9%, and 10.4%, respectively, over the same period last year. The cumulative exports of plastics and related materials during 2022-23 were valued at US\$ 11.96 billion. This was a 10.4% decrease from the 2021-22 exports valued at US\$ 13.35 billion. Plastic raw materials were the largest exported category and constituted 27.76% of the total exports in 2022-23; it recorded a growth of 21.5% over the previous year. Plastic films and sheets were the second largest category, comprising 15.13% of the total exports, but declined by 10.6% over the previous year. In June 2024, the exports of plastics and linoleum from India were valued at US\$ 980.8 million. During the same period, medical items of plastics; FRP & composites; packaging items; cordage fishnets

& monofilaments and floorcoverings, leathercloth, & laminates recorded strong growth. The cumulative exports for April-June 2025 increase by 5.4% year-on-year (YoY) to US\$ 2.93 billion.

Export Destinations

Country-wise share in exports of plastic products during 2022-23

India exports plastic to more than 200 countries in the world. The top five consumer and houseware product importing countries are the USA, Germany Japan, the UK, and France. India largely exports plastic and related products to the USA, China, the UAE, the UK, Germany, Italy, Bangladesh, etc. The total value of exports to the USA, the largest consumer of the Indian plastic industry, stood at US\$ 2.31 billion in 2022-23, a decrease of 4.71% YoY. China was the second largest consumer of plastic export products from India and the total value of exports stood at US\$ 690.95 million. The USA and China constituted 19.37%, and 5.78%, of the total plastic exports in 2022-23. The total plastic exports from India to France during 2022-23 was around US\$ 211.4 million. To boost exports to France and Europe, PLEXCONCIL collaborated with the Indo-French Chamber in the first quarter of 2021-22. The Minister for Commerce and Industry, Mr. Piyush Goyal, recently urged industry to adopt international standards to help it

expand its global footprint. India has recently signed a free-trade agreement with UAE and Australia, which will give the plastics industry new opportunities.

The Plastic Export Promotion Council (PLEXCONCIL) has set a target to increase the plastic exports of the country to US\$ 25 billion by 2027. There are multiple plastic parks that are being set up in the country in a phased manner that will

help improve the plastic manufacturing outputs of the country. Under the plastic park schemes, the Government of India provides funds of up to 50% of the project costs or a ceiling cost of Rs. 40 crore (US\$ 5 million) per project. Government initiatives like “Digital India”, “Make in India”, and “Skill India” will also boost India’s Plastic industry. For instance, under the “Digital India” program, the government aims to reduce the import dependence on products from other countries, which will lift the local plastic part manufacturers. The government also launched a program for building Centres of Excellence (CoEs) to develop the existing petrochemical technology and promote the research environment pertaining to the sector in the country. This will aid in promoting and developing new applications of polymers and plastics in the country. Additionally, about 23 Central Institute of Plastics Engineering & Technology (CIPET) have been approved to accelerate financial and technological collaboration for promoting skills in the chemicals and petrochemicals sector.

Government Initiatives

The government has deregulated the petrochemical sector and allowed 100% FDI under the automatic route to promote fresh investments in the plastic industry. Some of the government's other initiatives to support the plastic industry have been mentioned below.

- The Central Institute of Petrochemicals Engineering & Technology (CIPET) is a premier national institution under the Ministry of Chemicals and Fertilizers, Government of India. The main goal of CIPET is to support the expansion of the plastics sector through a coordinated programme of education and research. The Institute has developed and progressed over time, forging deeper relationships with various businesses in an effort to produce resource-saving and commercially viable plastic-based innovations.
- The Central Institute of Petrochemicals Engineering & Technology {CIPET} has established a Center for Skilling and Technical Support (CSTS) in Vijayawada, Andhra Pradesh, to offer diploma and postgraduate diploma programmes, as well as skill development training programmes in the area of plastics engineering & technology.
- The Center offers technical/consulting services to the plastics industry in the areas of testing, manufacturing, and designing composites and molds for plastics.
- A program to establish "Centres of Excellence {CoEs}" has also been put into action to enhance India's current petrochemical technology and research environment and encourage the creation of new uses for polymers and plastics. Under this scheme, the Department of Chemicals and Petrochemicals has approved eight Centres of Excellence across various reputed Government Institutions in the country since 2015.

Plastic Parks Scheme

The Department of Chemicals & Petrochemicals under the Government of India proposed a scheme to establish plastic parks with cutting-edge infrastructure using a cluster development model. The objectives of this plan were:

- To make the domestic downstream plastic processing industry more competitive, capable of absorbing more polymers, and increase value-addition by implementing cutting-edge, R&D-driven strategies.
- Invite more investments in the sector to assure value addition and higher exports by expanding capacity and production, building quality infrastructure, and other means.
- Obtain environmentally sustainable growth by utilizing modern waste management techniques, recycling, etc.
- Adopt a cluster development strategy to accomplish the aforementioned goals due to the advantages of resource optimization and economies of scale.

Up to 50% of the project cost may be covered by grants from the Central Government, subject to a cap of Rs. 40 crore (US\$ 4.9 million) per project. The State Government, beneficiary industries, and loans from financial organizations will cover the project's remaining costs. The funding will cover the following:

- Infrastructure, including water supply, roads, drainage, effluent treatment plant, electricity, incinerator, etc.
- Buildings for administration, hostels, canteens, labour facilities, training, incubation, plastic recycling, warehousing, research & development, etc.
- Support for administrative and other management functions and the CEO's compensation during the project's execution.
- In order to ensure that the ability of the beneficiary and member firms is appropriately improved in order to absorb, implement, and sustain the proposed initiatives, the plan shall also support initiatives that are soft in nature. These might include surveys, studies, raising awareness and generating sensitization, skill-building and training at various levels, exposure trips, etc.

On the back of this scheme, the Department of Chemicals and Petrochemicals has authorized the construction of ten plastic parks across the country, six of which are in the states of Assam, Madhya Pradesh (two parks), Odisha, Tamil Nadu, and

Jharkhand. The implementation of these six plastic parks is in varying phases. The Detailed Project Reports {DPRs} for the establishment of plastic parks in the States of Uttarakhand and Chhattisgarh are being evaluated for the establishment of the remaining four parks, and a proposal for the establishment of two more parks is in the works.

Business Overview

We are primarily engaged in the business of manufacturing of PET preforms, Plastic caps and closures. These are important parts of packaging used in many consumer products. Our product portfolio include specialized closures such as Alaska closures (Commonly used in packaged drinking water), Carbonated Soft Drinks (CSD) cap (1881 neck finish), and wide range of PET preforms designed for different bottling needs. Our products find diverse applications across various industries including packaged drinking water, carbonated beverages, juices and dairy products.

We started our business in 2013 with a single machine for manufacturing of plastic closures. Over the years, we expanded our operations by adding more machines and increasing our production capacity. Today, we use modern machines such as SACMI Continuous Compression Molding, ASB Preform Molding and HUSKY Pet Injection Molding machines from globally renowned OEMs to make closures and PET preforms. All our products go through strict quality checks to make sure they meet the required standards. In recent years, we have grown into a larger company focused on making PET bottle caps in different shapes, sizes, and colors, along with cap handles used in many applications. During the nine months ended December 31, 2024, our sales were primarily concentrated in Maharashtra, Karnataka, Gujarat, Kerala, Telangana, Andhra Pradesh together contributing 94.21% of total revenue and highlighting our strong presence in western and southern India.

We also offer shrink and adhesive films to support our existing customers with a complete packaging solution. These films are in high demand, especially in industries that need strong and reliable packaging. Shrink film, made from LDPE (Low-Density Polyethylene), is mostly used for wrapping products together like bottles of water, soft drinks, or energy drinks. It is commonly used for secondary or tertiary packaging and is a cheaper alternative to corrugated boxes. For the nine months period ended December 31, 2024, our revenue from sale of products stood at Rs. 23,279.26 lakhs of which revenue from Pet preforms, Plastic closures, Shrink film and other products contributed 68.52%, 19.60%, 6.26% and 5.62% respectively.

Further, the Company has acquired the business of *M/s Bai Kakaji Industries* from its proprietor *Ms. Kiran Mundada* through a Business Transfer Agreement effective from 01st March 2025. This strategic acquisition create significant synergies for the Company, enabling us to expand our operational capacity and better meet the evolving needs of our clients. It also enhances our market presence and aligns with our long –term growth objectives.

As part of our strategy to enhance production capacity and efficiency, we commissioned a Milacron injection moulding machine for PET preforms in March 2025. Furthermore, we have placed an order for a Sacmi compression moulding machine for closures, which is expected to be delivered in August 2025. These investments will support increased output and improved operational performance.

Expand our domestic presence in existing and new markets

Our current customer base primarily consists of Indian companies operating in the plastic industry. We have established strong relationships with these clients by delivering quality products that meet their specific requirements. Looking ahead, we aim to expand our business by continuously adding new customers across various segments of the plastic industry. With increasing demand and evolving applications in this sector, significant opportunities for growth have emerged. We intend to strategically tap into these opportunities through targeted marketing initiatives, expanded product offerings, and enhanced supply capabilities. By leveraging our expertise, modern infrastructure, and customer-focused approach, we are well-positioned to broaden our market presence and drive sustained business growth.

Focus on consistently meeting customer specifications and quality standards

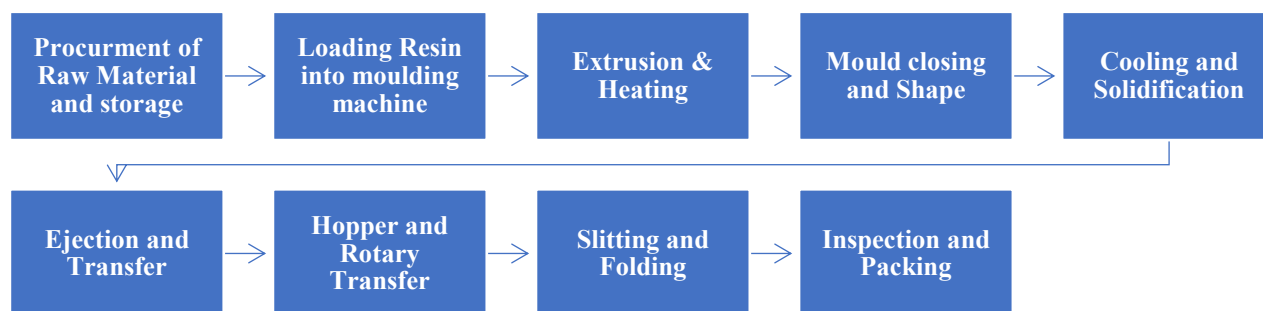

Our Company intends to focus on adhering to the customers' specifications and quality standards of the Closures and Pet preforms. MANUFACTURING PROCESS - PET BOTTLE CAPS/CLOSURES

There are different stages that are involved in our process, each stage is crucial and of utmost importance for the project to have its required quality and standard. We ensure quality control checks at each of the stages. Our process for manufacturing of bottle caps/closures consists of the following stage:

Manufacturing process steps

Step-1: Procurement of Raw Material and storage

We intend to maintain sufficient level of inventory to meet our customer demands and requirements. To achieve this, we plan and forecast our productions and accordingly the order of raw material is placed. Our production team and sales team are in constant touch which helps us to order optimal level of raw material. Further, our technical team ensures that the raw materials we procure are meeting the quality standards. The quality of HDPE or PP resin is a critical factor in making plastic closures. Only those resins with an antimony concentration of less than 300 mg are used. The raw materials are procured from authorized local vendors to ensure quality standards are met. Once the raw materials are procured from local suppliers, it is stored in our manufacturing facility having adequate storage capacity. HDPE and PP resins naturally absorb moisture from their surroundings. To prevent this, the resins are stored in a dry and cool environment within the inventory area.

Step-2: Loading Resin into moulding machine

In the next step, the resin is manually loaded into the compression moulding machine. The moulds with the desired closure profiles are precisely mounted into the machine after getting approval from the production team. These moulds may have 24, 32, or 48 cavities depending on the closure design.

Step-3: Extrusion and Melting

The extruder heaters are turned on and brought up to the appropriate melting temperature for HDPE or PP. Resin from the hopper is fed into the extruder, where a rotating screw pushes it through the heating zone. During compression molding, the resin melts into a semi-solid form and is pushed through a nozzle. A cutter trims the melted material, which then drops into the lower half of the mold.

In injection molding, the resin melts into a semi-solid form and is injected into the hot runner system, which then delivers it into the mold cavity.

Step-4: Mould Closing and Shaping

The upper and lower parts of the mould are closed using hydraulic pressure. The molten plastic fills the cavity and takes the shape of the mould. At this point, the machine's cooling cycle begins.

Step-5: Cooling and Solidification

Water is used as the cooling medium to bring down the temperature of the mould and solidify the plastic. As a result, the plastic closure takes its final shape.

Step-7: Ejection and Transfer

For Compression: After the rotation cycle is completed, the mold opens using hydraulic return pressure. A cam mechanism assists in ejecting the finished closures onto a turret, which then transfers them to a cooling conveyor belt.

For Injection: After the process cycle is complete, the mold opens and the ejector moves forward to eject all closures into the chute.

Step-8: Hopper and Rotary Transfer

After passing through the cooling conveyor, the closures are collected into a hopper and passed through a rotary system for the next operation.

Step-9 Slitting and Folding

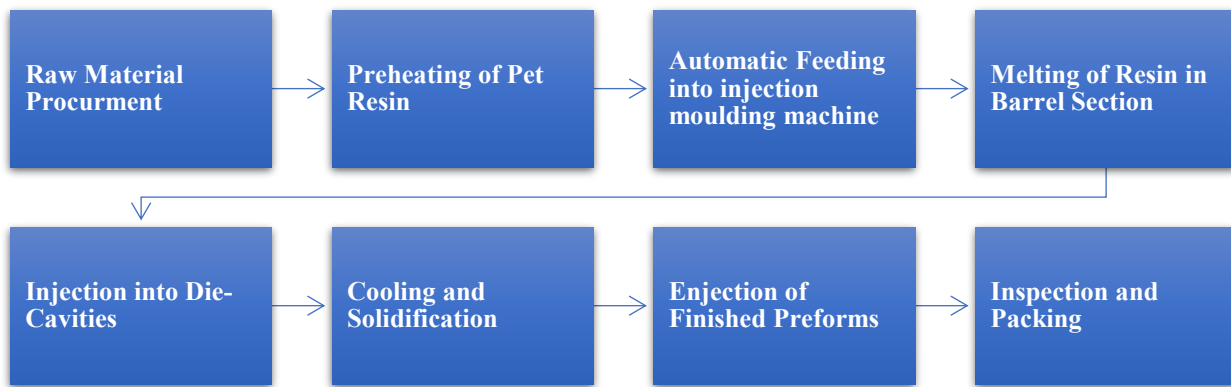

In this stage, the closures are sent into a slitting and folding machine. Folding tools shape the closures, and slitting blades—maintained at the right temperature—make precision cuts to complete the desired closure form.

Step-10 Inspection and Packing

The finished closures are checked by a camera-based inspection system for any defects. Approved closures are automatically counted and packed into boxes. These packed closures are now ready for mounting on blow-moulded bottles.

MANUFACTURING PROCESS - PET PREFORM

Our process for manufacturing of Pet Preform consists of the following stage:

Step-1: Raw Material Procurement

The manufacturing of PET preforms begins with selecting high-quality PET resin. Only resins with an antimony concentration below 300 mg are used to ensure compliance with safety and quality standards. The raw material is sourced from authorized local vendors and stored properly in the inventory.

Step-2: Preheating of PET Resin

PET resin tends to absorb moisture from its surroundings, which can affect the final product quality. Therefore, before processing, the resin is preheated to 160–185°C for approximately 4 hours. This step reduces the moisture content to below 50 parts per million (ppm) and helps prevent hydrolytic degradation and acetaldehyde formation, both of which can negatively impact PET quality.

Step-3: Automatic Feeding into Injection Moulding Machine

After drying, the PET resin is automatically fed into the injection moulding machine. Profile dies matching the required preform shape and weight are precisely mounted in the machine, after approval by the production team. Depending on the gram weight of the preform, dies with 4, 24, 32, or 48 cavities are used.

Step-4: Melting of Resin in Barrel Section

Barrel heaters are activated to reach the melting temperature of PET around 285 to 305°C. The resin flows from the hopper into the barrel section, where a rotating screw helps move and heat the resin. As the material passes through the heating zone, it melts into a semi-solid state, preparing it for injection.

Step-5: Injection into Die Cavities

The molten semi-fluid PET is then injected into the die cavities using controlled pressure and temperature. The material fills the mould cavity and begins to take the shape of the preform.

Step-6: Cooling and Solidification

Once the molten plastic fills the cavities, the cooling cycle of the machine is initiated. Water is used as a cooling medium to quickly reduce the temperature of the plastic, causing it to solidify into the desired preform shape.

Step-7: Ejection of Finished Preforms

After the cooling cycle is complete, the mould opens, and ejector pins push the solidified preforms out of the cavities. These preforms include the threaded neck portion, which is used later for cap mounting on bottles.

Step-8: Inspection and Packing

The finished Pet-Preform are checked by a Polari scopes base manually inspection system for any defects. Approved preforms by QC teams are counted and packed into boxes.

A. CORE BUSINESS LAWS

The Recycled Plastics Manufacture and Usage Rules, 1999

The Recycled Plastics Manufacture and Usage Rules, 1999, are a set of rules that govern the manufacturing, use, and disposal of recycled plastics in India. The rules were introduced by the Government of India to reduce plastic waste and promote the use of recycled plastics. Manufacturers must register with the Central Pollution Control Board (CPCB) to produce recycled plastic products. Recycled plastic containers must be clearly labelled to indicate the recycling process. The State Pollution Control Boards enforce the rules for manufacturing and recycling, while the District Collector/Deputy Commissioner enforces the rules for use, collection, and disposal. These rules include restrictions on the use of recycled plastic for food packaging, and requirements for labelling and thickness of plastic products.

Plastic Waste Management Rules, 2016 and the Plastic Waste Management (Amendment) Rules, 2024

These rules, notified by the Ministry of Environment, Forest and Climate Change, Government of India, provide a comprehensive framework for plastic waste management across the country, including Maharashtra. They mandate responsibilities for various stakeholders, including manufacturers, importers, and brand owners, emphasizing Extended Producer Responsibility (EPR). Under EPR, producers are accountable for the collection and environmentally sound disposal of plastic waste generated from their products. The rules also specify guidelines for recycling, processing, and disposal of plastic waste. The Plastic Waste Management (Amendment) Rules, 2024 are a set of rules that amend the Plastic Waste Management Rules, 2016. The rules were notified by the Ministry of Environment, Forest and Climate Change on March 14, 2024. It was to provide for a framework to enable the country to achieve its goal of eliminating single use plastic by the year 2025 and for matters connected therewith or incidental thereto.

Draft Notification on Extended Producer Responsibility (EPR) under Plastic Waste Management Rules: Requires manufacturers, importers, and brand owners (PIBOs) to manage the lifecycle of plastic products.

Draft EPR Guidelines for Plastic Packaging (2022): Establishes recycling targets and obligations for plastic packaging.

Maharashtra Plastic and Thermocol Products (Manufacture, Usage, Sale, Transport, Handling and Storage) Notification, 2018:

This notification enforces a comprehensive ban on the manufacture, usage, sale, transport, distribution, wholesale and retail sale, storage, and import of plastic bags (with or without handles) and disposable products made from plastic and thermocol. The ban covers items such as single-use disposable dishes, cups, plates, glasses, forks, bowls, containers, and packaging materials.

The Maharashtra Non-Biodegradable Garbage (Control) Act, 2006

An Act to prevent throwing or depositing non-biodegradable garbage in public drains, roads, wetland, wasteland, water bodies, places open to public view; to regulate the use of non-biodegradable material and for matters connected therewith or incidental thereto. The said act Prohibits throwing biodegradable and non-biodegradable garbage in public drains, sewage lines, natural or manmade lake, wet-lands. The said act covers all the waste type that cannot be decomposed by

natural or biological processes is considered non-biodegradable waste. Besides plastic, glass, and metals, it includes cardboard, paper, old clothes, thermocol sheets, cans, man-made polymer, biomedical waste, chemical waste, electronics, batteries, etc.

Bureau of Indian Standards Act, 2016

The Bureau of Indian Standards Act, 2016, as amended, provides for the standardization, marking and quality certification of goods or articles of any scheduled industry, process, system or service which it considers necessary in the public interest or for the protection of human, animal or plant health, safety of the environment, or prevention of unfair trade practices or national security. The Bureau of Indian Standards Act provides for the functions of the bureau which include, among others (a) recognize as an Indian standard, any standard established for any goods, article, process, system or service by any other 129 institution in India or elsewhere; (b) specify a standard mark to be called the Bureau of Indian Standards Certification Mark; and (c) make such inspection and take such samples of any material or substance as may be necessary.

The Legal Metrology Act 2009 and Legal Metrology (Packaged Commodities) Rules, 2011

The Legal Metrology Act, 2009 (“LMA”) provides for establishing establishing and enforcing standards of weights and measures, regulate trade and commerce in weights, measures and other goods which are sold or distributed by weight, measure or number uniform standards of weights and measures, regulate trade in weights, and other goods which are sold or distributed by weight, measure or number. Every manufacturer, repairer and seller shall have to obtain a license from the respective Controller. The Act allows Govt. approved test centers to verify weights and measures.

In this regard, the Legal Metrology (Packaged Commodities) Rules, 2011 (“LM Rules”) were framed which lays down specific provisions governing the packaging and labelling of commodities. These rules are applicable to packages intended for retail sale, wholesale packages and for export of packaged commodities and registration of manufacturers, packers and importers. Also, States may frame State specific rules under the Act to provide for the time limits for verification of weights and measures, maintenance of registers and records, stipulating the manner of notifying government authorities, fees for compounding of offences etc.

Further, the Legal Metrology (Government Approved Test Centre) Rules, 2013 have laid down specifications regarding verification of weights and measures specified therein by Government approved test centres.

The Electricity Act, 2003 (“Electricity Act”) and Electricity Rules, 2005 (the “Electricity Rules”)

The Electricity Act is a central legislation and provides for inter alia, generation, transmission, distribution, trading and use of electricity. Under the Electricity Act, the transmission, distribution, and trade of electricity are regulated activities which require licenses from the Central Electricity Regulatory Commission (“CERC”), the State Electricity Regulatory Commissions (“SERCS”) or a joint commission (constituted by an agreement entered into between two or more state governments or the central government in relation to one or more state governments, as the case may be).

The generating company is required to establish, operate and maintain generating stations, tie-lines, sub-stations and dedicated transmission lines. Further, the generating company may supply electricity to any licensee or even directly to consumers, subject to availing open access to the transmission and distribution systems and payment of transmission charges, including wheeling charges and open access charges, as may be determined by the relevant electricity regulatory commission. In terms of the Electricity Act, open access means the non- discriminatory provision for the use of transmission lines or distribution system or associated facilities with such lines or system, by any licensee or consumer or a person engaged in generation in accordance with the regulations specified by the relevant electricity regulatory commission. Under the Electricity Rules, 2005, as amended, if the captive generating plant is established by an affiliate company, the captive user must hold no less than 51% of the ownership in that affiliate company.

The Electricity Act requires the GOI to prepare the national electricity policy and tariff policy, from time to time, in consultation with the State Governments and Central Electricity Authority. The Electricity (Amendment) Rules, 2022 (“EAA”) has amended certain provisions of the Electricity Act. Among others, EAA has amended that on the issuance of license to more than one distribution licensee in an area of supply, the power and associated costs from the existing power purchase agreements with the existing distribution licensee, as on the date of issuing license to another distribution licensee, shall be shared among all the distribution licensees in the area of supply as specified by the State Commission. Further, in case of distribution of electricity in the same area of supply by two or more distribution licensees, the appropriate Commission, for promoting competition among such distribution licensees, will fix the maximum ceiling of tariff and the minimum tariff for retail sale of electricity.

Integrated Energy Policy 2006

The Integrated Energy Policy, 2006, (“Policy”) is a report of an expert committee constituted by the Government of India, to explore alternative technologies and possible synergies that would increase energy system efficiency and meet the requirement for energy services. The aims and objectives of this Policy include, amongst others, providing appropriate fiscal policies to take care of externalities, tax measures, transparent and targeted subsidies, promoting energy efficiency, providing incentive for renewable energy production by linking the incentive to not just the outlay but also the output. The Policy also provides for the respective power regulators to mandate feed-in-laws for renewable energy, as may be appropriate and as provided under the Electricity Act.

The Jawaharlal Nehru National Solar Mission

The National Solar Mission (the “NSM”) was approved by the Government of India on November 19, 2009 and launched on January 11, 2010. The immediate aim of the NSM was to focus on setting up an enabling environment for solar technology penetration in the country both at a centralized and decentralized level. The NSM has set a target of 100 GW of solar power in India by 2022 and seeks to implement and achieve the target in three phases (Phase I from 2012 to 2013, Phase II from 2013 to 2017 and Phase III from 2017 to 2022). The target will principally comprise 40 GW rooftop solar power projects and 60 GW large and medium scale grid connected solar power projects. In addition, the Government of India on March 22, 2017 sanctioned the implementation of a scheme to enhance the capacity of solar parks from 20,000 MW to 40,000 MW for setting up at least 50 solar parks each with a capacity of 500 MW and above by 2019 or 2020.

State Solar Policies

Our Company’s operations are also subject to the solar policies framed in the states in which the solar power projects are implemented, and we supply our products to such projects. Such policies typically provide a framework for the governance of the solar power industry and projects, procedures for undertaking of bids, terms of the renewable purchase obligations, connectivity to grid lines and the measures to be taken to promote the development of solar power in the state, including incentives to manufacturer such as grants of concessions on certain taxes, research and development initiatives.

All these codes have received the assent of President of India. Brief descriptions of each of the codes are given below:

Code of Wages, 2019

The Code aims to consolidate the laws relating to wages and bonus and matters connected therewith or incidental thereto. It received the assent of President of India on August 08, 2019. The Code contains procedure for fixing minimum wage, limit for fines and deductions in wages, minimum and maximum bonus, calculation of allocable and available surplus, as well as gender neutral consideration in fixing wages. The Code has given the power to Central Government to fix a “floor wage” and the State governments cannot fix any minimum wage less than the “floor wage”. The Code will apply to all employees. The central government will make wage-related decisions for employments such as railways, mines, and oil fields, among others. State governments will make decisions for all other employments. Wages include salary, allowance, or any other component expressed in monetary terms. This does not include bonus payable to employees or any travelling allowance, among others. The central or state government may fix the number of hours that constitute a normal working day. In case employees work in excess of a normal working day, they will be entitled to overtime wage, which must be at least twice the normal rate of wages. The Code prohibits gender discrimination in matters related to wages and recruitment of employees for the same work or work of similar nature. Work of similar nature is defined as work for which the skill, effort, experience, and responsibility required are the same.

The Code on Social Security, 2020

The Code on Social Security, 2020, is a comprehensive legislation in India designed to consolidate and amend existing laws relating to social security with the aim of extending social security benefits to all employees and workers, including those in the unorganized sector. This Code merges nine existing laws: the Employees’ Provident Funds and Miscellaneous Provisions Act, 1952; the Employees’ State Insurance Act, 1948; the Employees’ Compensation Act, 1923; the Maternity Benefit Act, 1961; the Payment of Gratuity Act, 1972; the Cine Workers Welfare Fund Act, 1981; the Building and Other Construction Workers Welfare Cess Act, 1996; the Unorganised Workers’ Social Security Act, 2008; and the Employment Exchanges (Compulsory Notification of Vacancies) Act, 1959.

The Code on Social Security, 2020, aims to create a universal social security system for all workers, including those in the gig and platform economy. It mandates the establishment of a Social Security Fund to provide benefits such as provident fund, employment injury benefits, housing, educational schemes for children, skill upgradation, funeral assistance, and old-age homes. The Code also outlines the roles and responsibilities of various bodies such as the Central Board of Trustees of the Employees’ Provident Fund and the Employees’ State Insurance Corporation in administering social security schemes. Additionally, the Code includes provisions for the registration of all employees and workers to ensure they receive their entitled benefits. It emphasizes the use of technology for the implementation and monitoring of social security schemes to improve transparency and efficiency. Employers are required to contribute to various social security funds, and the government may provide financial support to ensure the sustainability of these schemes.

The Code subsumes three labour laws relating to industrial relations, namely, the Trade Unions Act, 1926, the Industrial Employment (Standing Orders) Act, 1946 and the Industrial Disputes Act, 1947.

Occupational Safety, Health and Working Conditions Code, 2020

The Occupational Safety, Health and Working Conditions Code, 2020 (OSH Code) is one of three new labor codes that will consolidate the bulk of labor legislation in India and streamline labor compliance besides expanding the social security net for workers. Rules to implement the Code are expected to be finalized in the next few weeks.

New establishments covered by the OSH Code must register themselves (within 60 days of commencement of the Code) with registering officers appointed by the appropriate government. Establishments already registered under any other federal law will not be required to register again.

D. ENVIRONMENTAL LAWS

Environment Protection Act, 1986 and Environment (Protection) Rules, 1986 (“Environment Rules”) and Guidelines to regulate and control ground water extraction in India, 2020 as amended in 2023

The Environmental Protection Act, 1986 is an "umbrella" legislation designed to provide a framework for coordination of the activities of various central and state authorities established under various laws. The potential scope of the Act is broad, with "environment" defined to include water, air and land and the interrelationships which exist among water, air and land, and human beings and other living creatures, plants, micro-organisms and property.

The Environment Rules were notified by the Central Government, in exercise of its powers under the Environment Act. Pursuant to the Environment Rules, every person who carries on an industry, operation or process requiring consent under Water (Prevention and Control of Pollution) Act, 1974 or Air (Prevention and Control of Pollution) Act, 1981, shall submit to the concerned Pollution Control Board (“PCB”) an environmental statement for that financial year in the prescribed form.

The Environment Impact Assessment Notification 2006, under India's Environment Protection Act, 1986, mandates environmental assessments for projects with potential ecological impacts. It requires prior Environmental Clearance (EC) for activities in sectors like industry, infrastructure, and mining. Projects are categorized into Category A (central-level appraisal) and Category B (state-level appraisal) based on their environmental impact. The process involves Screening, Scoping, Public Consultation, and Appraisal, ensuring public participation and sustainable development.

For a wire manufacturing unit, the notification applies if the unit's operations involve significant use of resources, hazardous chemicals, or emissions affecting air, water, or soil quality. Depending on the scale and impact, such units might require EC, ensuring compliance with environmental norms and sustainable practices before establishment or expansion.

The Guidelines to regulate and control Groundwater Extraction ensure sustainable use through mandatory registration and NOCs for industries and commercial users. Areas are categorized as safe, semi-critical, critical, or over-exploited based on groundwater levels. Exemptions may apply to agriculture and rural drinking water. Monitoring mechanisms track extraction and ensure compliance. Violations attract penalties to prevent over-extraction and misuse. These measures balance development needs with groundwater sustainability.

Water (Prevention and Control of Pollution) Act, 1974

The Water (Prevention and Control of Pollution) Act, 1974 prohibits the discharge of pollutants into water bodies beyond a given standard, and lays down penalties for non-compliance. The Water Act also provides that the consent of the State Pollution Control Board must be obtained prior to opening of any new outlets or discharges, which is likely to discharge sewage or effluent.

Air (Prevention and Control of Pollution) Act, 1981 (“Air Act”)

The Air Act aims to prevent, control and abate air pollution, and stipulates that no person shall, without prior consent of the relevant state pollution control board, establish or operate any industrial plant which emits air pollutants in an air pollution control area. Such person also cannot discharge or cause or permit to be discharged the emission of any air pollutant in excess of the standards laid down by the State Boards. The central pollution control board and the state pollution control boards constituted under the Water Act perform similar functions under the Air Act as well. Pursuant to the provisions of the Air Act, any person establishing or operating any industrial plant within an air pollution control area, must obtain the consent of the relevant state pollution control board prior to establishing or operating such industrial plant.

The Noise Pollution (Regulation & Control) Rules 2000 (“Noise Regulation Rules”)

The Noise Regulation Rules regulate noise levels in industrial, commercial and residential zones. The Noise Regulation Rules also establish zones of silence of not less than 100 meters near schools, courts, hospitals, etc. The rules also assign regulatory authority for these standards to the local district courts. Penalty for non-compliance with the Noise Regulation Rules shall be under the provisions of the Environment (Protection) Act, 1986.

Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 (“Hazardous Waste Rules”) as amended by the Hazardous and Other Wastes (Management and Transboundary Movement) Amendment Rules, 2022

The Hazardous Waste Rules regulate the management, treatment, storage and disposal of hazardous waste by imposing an obligation on every occupier and operator of a facility generating hazardous waste to dispose of such waste without harming the environment. The term “hazardous waste” has been defined in the Hazardous Waste Rules and any person who has control over the affairs of the factory or the premises or any person in possession of the hazardous waste has been defined as an “occupier”. Every occupier and operator of a facility generating hazardous waste must obtain authorization from the relevant state pollution control board. Further, the occupier, importer or exporter is liable for damages caused to the environment resulting from the improper handling and disposal of hazardous waste and must pay any financial penalty that may be levied by the respective state pollution control board.

Method of Valuation:

Projected Unit Credit (PUC) Method: is used to assess the plan liabilities, including those related to death-in-service and incapacity benefits. Under this method a projected accrued benefit is calculated at the beginning of the year and again at the end of the year for each benefit that will accrue for all active members of the plan. The projected accrued benefit is based on the plans accrual formula and service as of the beginning or end of the year, but using final compensation, projected to the age at which the employee is assumed to exit. The plan liability is actuarial present value of the projected accrued benefits as on date of valuation.

Basis of Valuation:

Mortality is used as per Published rates under Indian Assured Lives Mortality (2012-2014) table. Rates at specimen ages are tabulated below:

Age (Years)	Rates
21	0.000934
22	0.000937

Our financial statements have been prepared in accordance with Indian GAAP, the Companies Act and the SEBI (ICDR) Regulations and restated as described in the report of our auditor dated June 27, 2025 which is included in this Draft Red Herring Prospectus under “Financial Statements”. The Restated Financial Information has been prepared on a basis that differs in certain material respects from generally accepted accounting principles in other jurisdictions, including US GAAP and IFRS. BUSINESS OVERVIEW

We are primarily engaged in the business of manufacturing of PET preforms, Plastic caps and closures. These are important parts of packaging used in many consumer products. Our product portfolio include specialized closures such as Alaska closures (Commonly used in packaged drinking water), Carbonated Soft Drinks (CSD) cap (1881 neck finish), and wide range of PET preforms designed for different bottling needs. Our products find diverse applications across various industries including packaged drinking water, carbonated beverages, juices and dairy products.

We started our business in 2013 with a single machine for manufacturing of plastic closures. Over the years, we expanded our operations by adding more machines and increasing our production capacity. Today, we use modern machines such as SACMI Continuous Compression Molding, ASB Preform Molding and HUSKY Pet Injection Molding machines from globally renowned OEMs to make closures and PET preforms. All our products go through strict quality checks to make sure they meet the required standards. In recent years, we have grown into a larger company focused on making PET bottle caps in different shapes, sizes, and colors, along with cap handles used in many applications. During the nine months ended December 31, 2024, our sales were primarily concentrated in Maharashtra, Karnataka, Gujarat, Kerala, Telangana, Andhra Pradesh together contributing 94.21% of total revenue and highlighting our strong presence in western and southern India.

We also offer shrink and adhesive films to support our existing customers with a complete packaging solution. These films are in high demand, especially in industries that need strong and reliable packaging. Shrink film, made from LDPE (Low-Density Polyethylene), is mostly used for wrapping products together like bottles of water, soft drinks, or energy drinks. It is commonly used for secondary or tertiary packaging and is a cheaper alternative to corrugated boxes. For the nine months period ended December 31, 2024, our revenue from sale of products stood at Rs. 23,279.26 lakhs of which revenue from Pet preforms, Plastic closures, Shrink film and other products contributed 68.52%, 19.60%, 6.26% and 5.62% respectively.

We have four manufacturing units in Latur, Maharashtra, and spread over 33,000 square meters. These units are equipped with modern machines, a laboratory, and testing equipment such as SST Secure Seal Tester (analogue & tester), Bridge strength tester, Vernier Calliper, Digital Torque and Perpendicular tester to make sure our products meet quality standards. Our in-house testing team carefully checks the quality, safety, and packaging of our caps, closures, and PET preforms. We are certified with ISO 9001:2015 by Euro UK Accreditation Licensing Services, Austria. This certification covers the manufacturing, packing, and dispatch of PP/HDPE caps and closures (using compression and injection moulding) and PET preforms (using injection moulding) for the food and beverage industry. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company.
