These statements are based on our management’s beliefs and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect. Important factors that could cause actual results to differ materially from our expectations include but are not limited to:

- All of our stores are presently located in Gujarat. However, we plan to expand into new geographies and may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.
- All the properties on which we run our stores are taken on rent/lease by us and many of them have been taken by us from third parties on short term lease/rent basis. Any disruption of rent agreements so entered by us or any objections from the owners of these properties to let us continue our operations or vacate those properties on short notice may have a material and adverse impact on the business of our Company. Further, some of our lease agreements may have certain irregularities because of which we may be unable to effectively enforce our leasehold rights which may have a material and adverse impact on the business of our Company.
- We have significant working capital requirements and our inability to meet the working capital requirements may have an adverse effect on our results of operations.
- If we are unable to maintain an optimal level of inventory, our business, results of operations, financial condition and cash flows may be adversely affected.
- We intend to utilise a portion of the Net Proceeds for funding our capital expenditure requirements. This includes Purchase of Existing Store of the company located at Nana Chiloda, Ahmedabad and Purchase of fit-outs for Three (3) new proposed stores, which may be subject to the risk of unanticipated delays in implementation, cost overruns and other project risks and uncertainties.
- There are certain proceedings involving our Company, our Directors, Promoters and KMP/SMP which if determined against us, may have an adverse effect on our business, cash flows and results of operations.
- There have been certain instances of delays and discrepancies in relation to certain statutory filings made or required to be filed by our Company with the RoC under applicable law and certain other non-compliances under Indian company law.
- There are certain discrepancies and non-compliances noticed in filing of returns and deposit of statutory dues with the taxation and other statutory authorities in the past. Any delay in payment of statutory dues by our Company in future, may result in the imposition of penalties, which could adversely impact our financials.
- Any negative cash flows in the future would adversely affect our cash flow requirements, which may adversely affect our ability to operate our business and implement our growth plans, thereby affecting our financial condition.
- The restated financial statements have been provided by peer reviewed chartered accountants who is not statutory auditor of our Company.

For further discussion of factors that could cause our actual results to differ, see the Section titled “*Risk Factors*”; “*Business Overview*” and “*Management’s Discussion and Analysis of Financial Position and Results of Operations*” beginning on page 31, 162 and 276 respectively of the Red Herring Prospectus. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual future gains or losses

could materially differ from those that have been estimated.

There can be no assurance to investors that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements to be a guarantee of our future performance.

Neither our Company, our Directors, our Officers, Book Running Lead Manager and Underwriter nor any of their respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition. In accordance with SEBI requirements, our Company, and the Book running Lead Manager will ensure that investors in India are informed of material developments until such time as the grant of listing and trading permission by the Stock Exchange for the Equity Shares allotted pursuant to this Issue.

SECTION II - SUMMARY OF RED HERRING PROSPECTUS

PRIMARY BUSINESS OF THE COMPANY

City Square Mart is a brand owned by our company Jay Ambe Supermarkets Private Limited. our journey began in August 2018 with the establishment of our first store in Kudasan, Gandhinagar. In just six years, the company expanded to 17 stores across Gujarat, establishing itself as a fast-growing retail chain in the region.

The origins of our company trace back to June, 2016, when M/s Jay Ambe Trading was established as a partnership firm and lately our promoters Mr Jignesh Amratbhai Patel, Mr Rutwikumar Maganbhai Patel, Mr Bhikhabhai Shivdas Patel and Mr Harshal Daxeshkumar Patel along with other three partners joined the firm as new partners vide an alteration deed executed as on July 02, 2018 making the total partners of the firm to ten. After incorporation of our company on November 23, 2020, we took over the business of the firm Jay Ambe Trading vide a Business Sale and Purchase Agreement dated January 25, 2021, leading to the full transfer of all assets and liabilities of the firm to the company.

Our company is engaged in the business of trading of FMCG material, grocery, Home Textile, Home Décor, Cloths, or Apparels, Toys, Gift Articles, Footwear and other house hold items, via supermarkets.

The Company is carrying on its business through retail marts via franchise model as well. A franchise is a type of license that grants a franchisee access to a franchisor's proprietary business knowledge, processes, and trademarks, thus allowing the franchisee to sell a product or service under the franchisor's business name. In exchange for acquiring a franchise, the franchisee usually pays the franchisor an initial start-up fee and annual licensing fees. The relationship between the franchisor and franchisee is governed by the franchise agreement. There are essentially three different types of business models:

- Company Owned Company Operated – COCO
- Franchise Owned Company Operated – FOCO
- Franchise Owned Franchise Operated – FOFO

The FOCO franchise model, short for Franchise-Owned, Company-Operated, is a unique approach to franchising where the franchisee owns the business, but the franchisor handles the day-to-day operations. This model combines the investment benefits of franchise ownership with the operational expertise of the franchisor.

The FOFO (Franchise Owned Franchise Operated) model allows a franchise investor to own and operate a store under a brand's name for a non-refundable franchise fee for a specified duration. The brand sets the prices and merchandise, while the franchisee bears all operational costs. In return, the franchisee must also pay a royalty, which is a percentage of the store's revenue, to the brand.

SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

According to D&B Report, the Indian retail sector is experiencing a significant transformation owing to a range of shifting socio-economic factors, increasing digital and new age technology influence along with a rapidly transforming consumer landscape. SECTION III - RISK FACTOR

An investment in Equity Shares involves a high degree of risk. Potential investors should carefully consider all the information in this Red Herring Prospectus, including the risks and uncertainties described below, before making an investment in the Equity Shares. The risks described below are not the only ones relevant to us or our Equity Shares, the industry in which we operate. Additional risks and uncertainties, not currently known to us or that we currently do not deem material may also adversely affect our business, results of operations, cash flows and financial condition.

If any of the following risks, or other risks that are not currently known or are not currently deemed material, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the price of our Equity Shares could decline, and investors may lose all or part of their investment. In order to obtain a complete understanding of our Company and our business, prospective investors should read this section in conjunction with “Business Overview”, “Industry Overview”, “Management’s Discussion and Analysis of Financial Condition and Results of Operations”, “Restated Financial Information”, “Object of the Issue”, “Capital Structure”, “Our Management” and “Our Promoters and Promoter Group” on pages 162, 144, 276, 233, 115, 92, 206 and 225 respectively as well as the other financial and statistical information contained in this Red Herring Prospectus. In making an investment decision, prospective investors must rely on their own examination of us and our business and the terms of the Issue including the merits and risks involved.

Prospective investors should consult their tax, financial and legal advisors about the particular consequences of investing in the Issue. Unless specified or quantified in the relevant risk factors below, we are unable to quantify the financial or other impact of any of the risks described in this section. Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is subject to a legal and regulatory environment, which may differ in certain respects from that of other countries.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1. Some events may have material impact quantitatively;*
- 2. Some events may not be material individually but may be found material collectively;*
- 3. Some events may have material impact qualitatively instead of quantitatively;*
- 4. Some events may not be material at present but may have a material impact in the future.*

INTERNAL RISKS

- 1. All of our stores are presently located in Gujarat. However, we plan to expand into new geographies and may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.**

All our existing stores are located and our entire revenue from operation is concentrated in the state of Gujarat as our entire revenue is generated from the Gujarat i.e. ₹ 4,735.28 lakhs, ₹ 3,338.68 lakhs and ₹ 3,268.96 lakhs, constituting whole of the total revenue from operations the financial year ended March 31, 2025, 2024 and 2023, respectively.

While all of our stores are presently concentrated in certain regions of Gujarat, we plan to expand into new geographies in the future. As a part of our strategy, our Company has opened Seventeen stores till the date of Red Herring Prospectus and intends to expand further in the said areas including Anand, Jamnagar, Palanpur, Junagadh, Mansa, Bhavnagar, Gandhidham, Bhuj, Anjar, Bhachau, Nadiad, Valsad, Navsari, Godhra, Lunawada etc, and in future, to other untapped markets. Further, major part of our revenue is generated from twin city of Ahmedabad and Gandhinagar only. The table below set out our revenue contribution during the years as indicated below, in these mentioned cities:

(₹ in lakhs)

Particulars	For Financial Year Ended March 31					
	2025		2024		2023	
	Amount	% of Total Income	Amount	% of Total Income	Amount	% of Total Income
Gandhinagar	2,405.25	50.74%	1,843.55	55.17%	1,876.27	57.39%
Ahmedabad	1,207.71	25.48%	615.77	18.43%	877.27	26.83%
Visnagar	646.72	13.64%	461.38	13.81%	431.76	13.21%
Himmatnagar	375.85	7.93%	263.89	7.90%	83.67	2.56%
Bhuj	99.74	2.10%	-	-	-	-
Ananad	-	-	154.09	4.61%	-	-
Total Revenue from Operations	4,735.28	99.90%	3,338.68	99.92%	3,268.96	99.99%

We are heavily dependent for our revenue on certain few Stores including Kudasan, Visnagar, Sargasan, Himmatnagar and Gota as substantial part of our revenue is generated from these stores. The aforesaid table shows the revenue generated from certain stores during the Financial Years 2025, 2024 and 2023:

(₹ in lakhs)

Particulars	For Financial Year Ended March 31					
	2025		2024		2023	
	Amount	% of Total Income	Amount	% of Total Income	Amount	% of Total Income
Kudasan, Gandhinagar	1,604.51	33.85%	1414.37	42.33%	1,403.49	42.93%
Visnagar	646.72	13.64%	461.38	13.81%	431.76	13.21%
Sargasan, Gandhinagar	459.43	9.69%	271.77	8.13%	178.32	5.45%
Himmatnagar	375.85	7.93%	263.89	7.90%	83.67	2.56%
Gota, Ahmedabad	337.96	7.13%	406.76	12.17%	551.70	16.88%

Pursuant to such a growth strategy, we may be exposed to risks, which may arise due to lack of familiarity and understanding of the economic conditions, demography, trends, consumer tastes and preference and culture of such areas. The risks involved in entering new geographies and expanding operations in those areas, may be higher than expected. As we enter new locations, we will face competition from regional or national players, who may have an established local presence, and may be more familiar with local customers' design preferences, business practices and customs.

By expanding into new geographical regions, we could be subject to additional risks associated with establishing and conducting operations, including:

- compliance with a wide range of laws, regulations and practices, including uncertainties associated with changes in laws, regulations and practices and their interpretation in that region;
- ability to understand consumer preferences and local trends in such new regions;
- exposure to expropriation or other government actions; and political, economic and social instability; and
- right location for opening the store.

Further, there can be no assurance that even if we are able to successfully implement our geographical expansion plans, we may be able to effectively manage our expanded operations. If we are not able to manage the risk of such expansion it could have a material adverse effect on our operations.

2. **All the properties on which we run our stores are taken on rent/lease by us and many of them have been taken by us from third parties on short term lease/rent basis. Any disruption of rent agreements so entered by us or any objections from the owners of these properties to let us continue our operations or vacate those properties on short notice may have a material and adverse impact on the business of our Company. Further, some of our lease agreements may have certain irregularities because of which we may be unable to effectively enforce our leasehold rights which may have a material and adverse impact on the business of our Company.**

As on the date, our company has 17 stores for which lease agreement are entered with lessors and out of which our company operates 10 stores are owned and operated directly by the company under the COCO (Company Owned, Company Operated) model, while 2 stores are Franchise Stores managed under the FOCO (Franchise Owned, Company Operated) model. The effect of inadequate stamping and non-registration is that the document is not admissible as evidence in legal proceedings, and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping and non-registration. In the event of any dispute arising out of such unstamped or inadequately stamped and/or unregistered lease agreements, we may not be able to effectively enforce our leasehold rights arising out of such agreements and might need to vacate the premises immediately which may have a material and adverse impact on the business of our Company.f

While no prosecution has been initiated or demand raised by the appropriate authorities under the Registration Act, 1908 and the Indian Stamp Act, 1899, we cannot assure that such actions will not be taken or that prosecution will not be initiated against the company for non-compliance with the provisions of the Registration Act, 1908 or the Indian Stamp Act, 1899. Should such actions be initiated or demands raised, it could adversely affect the business operations, profitability, and goodwill of our company.

Further, in the event of termination/non-renewal of said rent agreements, we may be required to vacate the said property which may cause disruption in our operations, which could temporarily impact our business operations until we get suitable alternative premises.

There can be no assurance that we will, in the future, be able to renew the agreements for the existing location on same or similar terms, or will be able to find alternate location for our registered office on similar terms favorable to us, or at all. We may also fail to get continued use of our registered office premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations. In the event that the said rent agreements are terminated or they are not allowed to be continued for use by us on commercially acceptable terms, we may suffer a disruption in our operations which could materially and adversely affect our business, financial condition and results of operations. However, no such instance has ever happened so far since the incorporation of our company.

3. We have significant working capital requirements and our inability to meet the working capital requirements may have an adverse effect on our results of operations.

Our business requires a significant amount of working capital as there is considerable time lag between purchase and realisation from sale of the products. Thus, we are required to maintain sufficient stock at our stores. Consequently, there could be situations where the total funds available to us may not be sufficient to fulfil our commitments, and hence we may be required to incur additional indebtedness or utilize internal accruals to meet our working capital requirements. The working capital requirements may increase if there is a requirement to pay higher price for stock or to pay excessive advances for procurement of stock. Some of these factors may result in an increase in our short-term borrowings. There can be no assurance that we will continue to be successful in arranging adequate working capital for our existing or expanded operations on acceptable terms or at all, which may adversely impact our business and prospects. In the event, that we are required to repay any working capital facilities upon receipt of a demand from any of the lenders, we may experience negative cash flows in the future and we will be unable to satisfy our working capital requirements.

Working capital for each year is funded through borrowings and internal accruals. The table below displays net working capital against source of funds i.e., Borrowings from Bank and Financial Institutions and Internal Accruals of the company including Security Deposit for the year indicated.

(₹ in lakhs)

Particulars	Fiscal 2025	Fiscal 2024	Fiscal 2023
Working Capital Requirement of the company	1,777.69	1,271.81	732.68
Borrowings from Bank and Financial Institutions	851.09	843.65	418.31
Internal Accruals of the company including Security Deposit	926.59	428.15	314.37
Total	1,777.69	1,271.81	732.68

Our sources of additional financing, where required to meet our capital expenditure plans or working capital requirements, may include the incurrence of debt or the issue of equity or a combination of both. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, would result in a dilution of your shareholding.

4. If we are unable to maintain an optimal level of inventory, our business, results of operations, financial condition and cash flows may be adversely affected.

The success of our business depends on our ability to anticipate and forecast consumer demand and trends. We plan our inventory and estimate our sales based on forecasted demand. An optimal level of inventory allows us to maintain a full range of products at our stores to respond to consumer demand across our channels in a capital efficient manner.

While we aim to avoid under-stocking and over-stocking through our allocation system, our estimates and forecasts may not always be accurate, which may result in either a shortage of products available for sale or excess inventory levels across our stores. The table below sets forth details of our inventory days for the Financial Years 2025, 2024, and 2023:

Particulars	Financial Year		
	2025	2024	2023
Inventories (₹ in lakhs)	1,895.46	1,353.61	1,141.32
Inventory Day	138	149	92

The inventory level as on March 31, 2025, 2024 and 2023 was ₹ 1,895.46 lakhs, ₹ 1,353.61 lakhs and ₹ 1,141.32 lakhs, respectively, which works out to 138 days, 149 days and 92 days of inventory level for the years ended March 31, 2025, 2024 and 2023, respectively.

While we have not faced any such material instances in the past three Financial Years, any shortage of products may result in unfulfilled consumer orders, which may adversely affect our business, results of operations and cash flows. Any unsold inventory may have to be sold at a discount or discarded, potentially leading to losses. As some of our products, especially food products, are perishable, any such unsold products might be sold at a discount when approaching expiry or discarded if already expired. We cannot assure you that we will be able to sell surplus stock in a timely manner, or at all, or that we will be able to satisfy all our consumer orders, which may adversely affect our business, results of operations, cash flows and financial condition.

- We intend to utilise a portion of the Net Proceeds for funding our capital expenditure requirements. This includes Purchase of Existing Store of the company located at Nana Chiloda, Ahmedabad and Purchase of fit-outs for Three (3) new stores, which may be subject to the risk of unanticipated delays in implementation, cost overruns and other project risks and uncertainties.**

We are constantly evaluating opportunities to strategically grow our operations, to continue to expand our number of stores in various towns and cities. We have continuously increased our number of stores from 10 stores in Fiscal 2023, to 17 stores as on the date of the Red Herring Prospectus. We plan to further increase our number of stores by commencing new stores at Lunawada (Mahisagar) and Mansa (Gandhinagar) by 2026. Apart from these stores, our company is further planning to increase the number of stores by penetrating other untapped cities and towns from the internal accruals of the company. For details, see “*Business Overview– Our Strategy – Expand Our Store Network*” on page 166. Further, we plan to use the Net Issue Proceeds for Purchase of Existing Store of the company located at Nana Chiloda, Ahmedabad in order to obtain various advantages including Business Stability, Long term Cost saving and Operational Control.

The total estimated cost for purchase of fit outs for new proposed stores is ₹ 522.71 lakhs, based on the Quotations received from various vendors from which the Board of Directors has relied on the Quotation provided by Dhyani Interio Exterio Private Limited, being L1 in nature, which has been certified by Infomerics Analytics and Research Private Limited, Cost vetting agency, pursuant to their report dated September 01, 2025 (“**Cost Vetting Report**”). Out of total estimated cost, ₹ 463.32 lakhs are to be funded from Net Issue Proceeds, while rest of the amount has already been paid by the company from its existing borrowings.

The Quotation provided by Dhyani Interio Exterio Private Limited is valid for a certain period of time and may be subject to revisions, and other commercial and technical factors, including financial and market condition, business and strategy, competition, negotiation with suppliers, variation in cost estimates on account of factors, including changes in design or configuration of the equipment and interest or exchange rate fluctuations and other external factors including changes in the price of the equipment due to variation in commodity prices which may not be within the control of our management. Although we have entered into rent and lease agreements for the stores located at Lunawada (Mahisagar) and Mansa (Gandhinagar), we may be required to reallocate these stores if they do not prove to be viable. In such an event, we will execute new agreements with the respective parties for operating the stores at alternate locations, and the proposed fit-outs will be installed at the new premises.

Any delay in delivery of products or services by the vendor required for the proposed capital expenditure could lead to time and cost overruns and may have a material adverse effect on our business, results of operations and financial condition. The completion of the proposed capital expenditure is also dependent on the performance of external agencies which are responsible for inter alia Furniture & Fixtures, Electrical and Electronics, Sign Board Works and HVAC (Heating, ventilation, and air conditioning). If the performance of these agencies is inadequate, it may result in incremental cost and time overruns which could adversely affect our business and results of operations.

Further, the proposed capital expenditure require our company to obtain certain government approvals. In the event of any unanticipated delay in receipt of such approvals, the proposed schedule of implementation and deployment of the Net Proceeds may be extended or may vary accordingly. Our inability to procure such approvals, may result in the extension of the proposed schedule implementation and deployment of Net Proceeds. Expanding our current operations can be risky and expensive, and we cannot assure you that we may be successful in meeting the desired cost-efficiencies and any consequent growth in our business. There can be no assurance that we will be able to complete the proposed capital expenditure or start the commercial operation in accordance with the proposed schedule of implementation and any delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

6. There are certain proceedings involving our Company, our Directors, Promoters and KMP/SMP which if determined against us, may have an adverse effect on our business, cash flows and results of operations.

There are outstanding legal proceedings involving our Company. We are also involved in certain consumer cases in the ordinary course of our business. Brief details of material outstanding litigation that have been initiated by and against our Company are set forth below:

For details, see “*Outstanding Litigation and Material Developments*” on page 314 of the Red Herring Prospectus.

We cannot assure you that these proceedings will be decided in our favour. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions that could increase our expenses and current liabilities. Further, such proceedings could divert management time and attention and consume financial resources in their defense or prosecution. We cannot assure you that any of these matters will be settled in our favour or that no additional liability will arise out of these proceedings. An adverse outcome in any of these proceedings could have an adverse effect on our business, results of operations, cash flows and financial condition.

7. There have been certain instances of delays and discrepancies in relation to certain statutory filings made or required to be filed by our Company with the RoC under applicable law and certain other non-compliances under Indian company law.

In the past, our corporate records have experienced delays in filing of statutory e-forms to the Registrar of Companies (RoC). Instances of such delays necessitated subsequent filings, accompanied by the payment of additional fees as mandated by the RoC. Further, there are certain errors in the information provided in the attachments provided with certain E-Forms.

The delays in filing statutory forms with the Registrar of Companies (ROC) were primarily attributed to a combination of unintentional administrative omissions and periodic technical glitches encountered on the filing portal of MCA, which inadvertently hindered the timely submission of the requisite forms.

Despite the Company's continuous efforts to maintain compliance with regulatory requirements, unforeseen challenges

including system-related inefficiencies and operational constraints, led to unintended lapses in meeting statutory deadlines.

Notwithstanding these challenges, the Company has ensured full compliance with its regulatory obligations by filing all the required forms with the payment of additional fees as applicable.

To ensure strict regulatory compliance and prevent delays in statutory filings, the Company has implemented comprehensive measures aimed at strengthening internal processes, improving oversight, and enhancing operational efficiency. A qualified Company Secretary has been appointed to oversee compliance-related matters, ensuring adherence to statutory deadlines and regulatory requirements. The key steps taken by the Company include:

1. Appointment of a Company Secretary and Compliance Officer - A dedicated professional has been engaged to manage compliance obligations, provide regulatory guidance and ensure timely filing of statutory forms. A specialized compliance team has been established to monitor statutory obligations, coordinate timely filings and act as a liaison with regulatory authorities to address any procedural challenges. In this regard, the company has appointed Ms. Renuka Trikha as Company Secretary and Compliance Officer of the company, in the Board Meeting held on March 18, 2025, effective from March 19, 2025.

2. Engagement with Professional Advisors like Practicing Company Secretaries (PCS) - The Company collaborated with professional consultants to ensure adherence to evolving statutory requirements and regulatory frameworks.

As of the present, our Company has not received any show cause notices related to these instances, and no regulatory authority has imposed penalties or fines. However, it cannot be guaranteed that similar instances will not occur in the future, and our Company may encounter further delays or defaults in meeting reporting requirements, potentially resulting in penalties or fines imposed by regulatory authorities.

In respect of the aforesaid violations, applicable interest, penalties, late fees, and damages have been paid at the time of making the respective statutory payments. Except the penalty paid as mentioned in Risk Factor No. 9, there is no separate penalty has been imposed by the statutory authorities. Further, no compounding application was required to be made in this regard. At present, the management believes that such past delays do not pose any material risk to the operations, financial condition, or governance of the Company as the Company has duly paid penalty.

The Company, during its initial growth phase, experienced certain delays in filing of returns and payment of statutory dues. The delays were primarily on account of shortage of qualified staff, which resulted in delays in preparation of reconciliations, coupled with limited familiarity with certain compliance processes and administrative challenges. The delays were purely inadvertent and without any malafide intention. The Company has since strengthened its internal compliance framework by recruiting qualified personnel, implementing better monitoring mechanisms, and streamlining internal processes to ensure timely compliance going forward. Additionally, the Company has implemented internal monitoring systems, including periodic reconciliations, management reviews, and compliance checklists, to ensure timely and accurate compliance with all applicable laws, rules, and regulations.

As of the date of this Red Herring Prospectus, no-show cause notice has been issued against our Company till date, in respect of above. In the event of any cognizance being taken by the concerned authorities in respect of above,

actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected.

For further details of certain material legal proceedings involving our Company, see “*Outstanding Litigations and Material Developments*” beginning on page 293 of this Red Herring Prospectus.

9. Any negative cash flows in the future would adversely affect our cash flow requirements, which may adversely affect our ability to operate our business and implement our growth plans, thereby affecting our financial condition.

As per our Restated Financial Information, our cash flows from operating, investing and financing activities are as set out below:

(₹ in lakhs)

Particulars	Financial Year		
	2025	2024	2023
Net cash generated from/(used in) operating activities	(304.79)	(167.08)	(311.00)
Net cash generated/(used in) investing activities	(101.66)	(18.05)	(130.75)
Net cash generated/(used in) financing activities	265.11	323.63	386.51
Cash and Cash Equivalents at the end of the year	37.13	178.47	39.97

Our Company has negative cash flows from operating activities for the Fiscals 2025, 2024 and 2023, primarily on account of increase in Inventory levels on account of opening of new stores requiring higher inventory holding for customer engagement and business development. Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our cash flows, business, future financial performance and results of operations could be materially and adversely affected. For further details, see “*Financial Information*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on pages 217 and 274, respectively.

10. The restated financial statements have been provided by peer reviewed chartered accountants who is not statutory auditor of our Company.

The restated financial statements of our Company for the financial year ended March 31, 2025, 2024 and 2023 have been furnished by M/s. S J V P & Associates, Chartered Accountants, Ahmedabad a peer-reviewed chartered accountant who is not the statutory auditor of our Company.

Since, our statutory auditor M/s. Jay M. Shah & Co., Chartered Accountants does not possess a valid peer-reviewed certificate as on date of filing this Red Herring Prospectus. Therefore, restated financial statements was entrusted to the aforementioned peer-reviewed chartered accountant.

11. We operate in a competitive industry and our market share may be adversely impacted in case we do not keep ourselves apprised of the latest consumer trends and technology and if we fail to compete effectively in the markets in which we operate.

We operate in a competitive industry which is characterized by rapid shifts in consumer trends and technology and our market share may be adversely impacted at any time by the significant number of competitors in our industry that may compete more effectively than us. These frequent changes and their impact on consumer demand may result into both price and demand volatility, leading to change in the competitive scenario. Due to the expensive nature of our business, we face competition from various kinds of players including, players operating in retail, wholesale and e-commerce space. We compete with national and local department stores, independent retail stores and internet businesses that market similar lines of merchandise as us. Many of our competitors are, and many of our potential competitors may be, larger, and may have substantially greater financial, marketing and other resources and, therefore, may be able to adapt to changes in customer requirements more quickly and devote greater resources in marketing and sale of their products or adopt more aggressive pricing policies than we can. We face a variety of competitive challenges, including:

- (i) pricing our products to remain competitive while achieving a customer perception of comparatively higher

value;

- (ii) anticipating and quickly responding to changing consumer demands;
- (iii) maintaining favorable brand recognition and effectively marketing our products to consumers in diverse markets;
- (iv) providing strong and effective marketing support;
- (v) maintaining high levels of consumer traffic to our retail stores; and
- (vi) local stores which may have a fixed clientele base and wider penetration in certain geographical areas.

Similarly, some of our organized competitors may also have advantages over us on account of, more prominent locations of their stores, more efficient distribution networks, better trained employees, greater geographic reach, broader product ranges or access to a large pool of financial resources. Further, certain regional and national competitors have already expanded in untapped new markets. As a result, we will need to put in efforts to create brands and propositions that will provide access to high value products and also create a customer connect to our brand identity. Our business is highly dependent on the brand owners effectively maintaining, promoting or developing their brands and maintaining standard quality products including launching new electronic products at regular intervals. In case any of our brand partners is unable to do so, our sales would get impacted which would have an adverse impact on the operations and financial performance of our Company.

Many factors are important for maintaining, developing and enhancing the brands, including by increasing brand awareness through brand building initiatives and ensuring customer satisfaction by providing quality customer service. There can be no assurance that companies which are owners of various leading consumer goods will be able to effectively promote, develop their brands or maintain standard quality of their products. If any of the offerings which we launch from our stores from time to time do not meet standards for quality and performance or customers' subjective expectations, our Company's reputation and customer retention may be impacted. If we fail to maintain our reputation or increase positive awareness of the products, or the quality of the the products declines due to our brand partners unable to maintain the required quality at their end, our business, financial condition, cash flows and results of operations may be adversely affected.

12. Our business is operating under various laws which require us to obtain approvals from the concerned statutory/regulatory authorities in the ordinary course of business, and if we are unable to obtain these approvals and the renewals, our business operations could be adversely affected thereby impacting our revenues and profitability.

We are governed by various laws and regulations for carrying out our business activities. We require certain approvals, licenses, registrations and permissions for operating our business, some of which may have expired and for which we may have either made, or are in the process of making, an application for obtaining the approval for its renewal or for some of which we might have made or are in the process of making a fresh registration application.

As on the date of filing this Red Herring Prospectus ("RHP") with the Stock Exchanges, we have received the requisite approvals, licenses, registrations, and permissions that were pending or under process at the time of filing the Draft Red Herring Prospectus ("DRHP"). Specifically, registrations under the Gujarat Shops and Establishments (Regulation of Employment and Conditions of Service) Act, 2019 for the applicable stores have been obtained. Fresh registrations and renewals of Food Safety and Standards Authority of India (FSSAI) licenses for relevant stores have been completed. Fire No Objection Certificates (NOCs) have been received for stores where such approvals were required under applicable laws except that of Prahlad nagar store which was applied in the month of May 2025 but is yet to be received. Professional Tax registrations for the concerned locations have also been secured. Further, sub-code registrations under the Employees' State Insurance Act, 1948 for our stores situated at Gandhinagar, Himmatnagar, and Visnagar have been completed, ensuring compliance with applicable ESI regulations. Accordingly, as on the date of this RHP, we are in compliance with the applicable regulatory requirements necessary for the continued operation of our business. However, we are yet to apply for the applicable approvals for our new store recently opened at IIT Gandhinagar, Gujarat on July 21, 2025.

Further for our stores at Randasan and Sector 6 at Gandhinagar and at Visnagar we have not taken specific Fire NOC from the Gujarat Fire Safety Department as our stores at these locations are less than 15 meter in height and less than 500 Sq Meters in size and therefore, as per our understanding of the Gujarat Fire Safety Act and rules and notifications issued thereunder, we are not required to seek the Fire NOC. We have, however, placed adequate number of fire hydrants in these stores to meet any fire emergency. For further details on the statutory approvals, licenses obtained and/or applied for or yet to be applied by us and for exemptions in any such approvals in particular regions, see

chapter titled “Government Approvals” on page 320 of this Draft Red Herring Prospectus.

If we do not receive or obtain the timely registration/renewal of the required statutory and regulatory permits and approvals that are required to carry on our operations, we may need to shut our operations in that particular store which may have a material adverse effect on our business and on our results of operations. Further, expansion to new geographies might also get delayed if the required statutory and regulatory permits and approvals are not obtained in a timely manner, thereby leading to delay in the expansion plans of our Company. Additionally, we cannot assure you that the approvals, licenses, registrations or permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If we fail to comply or a Regulator claim that we have not complied with these conditions, our business, prospects, financial condition and results of operations may be adversely affected.

13. Our Company may not be able to grow at the same rate as it has done in the previous Financial Years. Any inability on our part to manage our growth or implement our strategies effectively could have a material adverse effect on our business, results of operations and financial condition.

We have experienced reasonable growth in recent periods. Table showing the growth in the net profit of the Company during last three years is mentined hereunder. Net profit of the Company has increased at a CAGR of 179.30 % from Fiscal 2023 to Fiscal 2025 which we may not be able to continue in further due to various factors some of which may be beyond our control. The key details of our financial information for for the Fiscal 2025, 2024 and 2023 is provided below:

Particulars	Financial Year		
	2025	2024	2023
Revenue from Operations (₹ in lakhs)	4,735.28	3,338.68	3,268.96
Net Profit/(Loss) for the Year (₹ in lakhs)	275.37	154.89	35.30
Net profit ratio	5.82%	4.64%	1.08%

The number of stores in Fiscal 2024 remained same as Fiscal 2023 leading to stagnant revenue growth. However, the net profit margin of the company surged from 1.08% in Fiscal 2023 to 4.64% in Fiscal 2024 due to change in product mix of the company as well as decrease in purchase of goods on account of higher closing inventory at the end of previous Fiscal i.e, Fiscal 2023.

After Fiscal 2024, the number of stores further increased to 15 stores in the Fiscal 2025. Such increase in number of stores required additional inventory, due to which the change in inventory for the Fical 2025 was higher as compared to Fiscal 2024, leading to high net profit margins

Our growth strategies are subject to and involverisks and difficulties, many of which are beyond our control and, accordingly, there can be no assurancethat we will be able to implement our strategy or growth plans, or complete them within the budgeted cost and timelines. Further, on account of changes in market conditions, industry dynamics, changes in regulatory policies or any other relevant factors, our growth strategy and plans may undergo substantial changes and may even include limiting or foregoing growth opportunities if the situation so demands. An increase in the number of stores will also increase our fixed operating costs, and there can be no assurance that we will able to offset the increased cost with the incremental revenue. Any inability on our part to manage our growth or implement our strategies effectively could have a material adverse effect on our business, results of operations and financial condition.

14. If we are unable to effectively manage our growing operations or pursue our growth strategy of opening new stores, our business, results of operations, financial condition and cash flows may be adversely affected.

As part of our growth strategy, we plan to expand our store footprint in existing and new cities and towns. Our Board has passed a resolution dated September 01, 2025 approving our plan to expand our store footprint in existing and new cities and towns. As we expand our store network in new cities and towns, we may be exposed to a variety of challenges, including those relating to identification of suitable store locations, ability to enter into long-term leasehold arrangements for stores, different consumer preferences, trends, local regulatory regimes and business practices and lack of brand recognition and reputation in these new cities and towns. For details, see “Business Overview– Our Strategy – Expand Our Store Network” on page 166.

Our business and operations have grown significantly in recent years, as detailed in the table below Our revenue from operations have increased at a CAGR of 20.36% from Fiscal 2023 to Fiscal 2025:

Particulars	Financial Year		
	2025	2024	2023
Number of Stores	15	10	10
Revenue from Operations (₹ in lakhs)	4,735.28	3,338.68	3,268.96

We have an asset-light business model with all our stores leased from third parties, and our products procured from third-party vendors or sourced from third party brands. Our expansion plans may place significant demands on our managerial, operational and financial resources, and our growing operations will require the training and induction of new employees. Further, our expansion plans may be subject to regulatory and other unanticipated delays. In addition, as we enter new cities and towns, we face competition from both organized and unorganized retailers, who may have an established local presence, and may be more familiar with local consumers' preferences and needs.

Successful operation of our new stores will depend on a number of factors, including:

- our ability to strategically locate new stores in existing and new cities and towns;
- our ability to successfully integrate the new stores with our existing operations (including in particular, operations relating to supply chain, inventory management and hyper-local delivery services) and achieve related synergies;
- our ability to continue to offer an optimal mix of products which successfully meets local consumer preferences at attractive prices;
- our ability to obtain and maintain all relevant approvals required to operate stores;
- the effectiveness of our advertisements and marketing campaigns; and
- our ability to hire, train and retain skilled personnel.

Our stores are typically located in densely populated areas and neighbourhoods. Sales at our stores are derived primarily from the volume of footfalls in these locations. Our store locations may become unattractive in the future due to competition from nearby retailers or nearby developments that affect footfall at our stores, as well as changing consumer preferences in a particular market.

15. We have, in the last twelve months, issued Equity Shares at a price that may be lower than the Offer Price.

Issue price for this issue is ₹ [●]/-. However, our company has issued 25,253 and 146465 equity shares on preferential allotment basis on December 25, 2024 and January 14, 2025 respectively at ₹ 198/- to public. The issue price at which the shares were allotted to public may be lower than the issue price. For more details, please refer chapter titled "Capital Structure" on page no 69 on of the Red Herring Prospectus.

16. Our Company has applied for assignment of the registered trademark of our business  in its name from M/s Jay Ambe Trading. Until such registrations are granted, we may not be able to prevent unauthorised use of such trademarks by third parties, which may lead to the dilution of our goodwill.

We have filed application for the assignment of the trademark being used by our company  registered under class 35 of the Trade Marks Act, 1999. The trademark stated above is registered in the name of the partnership firm of the promoters of the company whose business was taken over in the company after incorporation of the company namely M/s Jay Ambe Trading. The company has signed a Deed of assignment of trademark dated June 14, 2022 with said firm and has applied to the Trademarks registry for registration of assignment vide application dated July 06, 2022. The Trademarks Registry [TMR] vide its letter dated July 11, 2024 has intimated the partnership firm at its address with notice of 30 days to raise any objection to the assignment of trademark to the company. Though the Firm has not raised any objections to the said assignment so far, the matter is yet pending before TMR.

There can be no assurance that our trademark assignment application will be accepted and the trademark will be registered in the name of our company. Pending the registration of assignment of this trademark in the name of our company, we do not enjoy the proprietary rights in this trade mark and in case there are any difference between the present promoters of the company who were also the partners of the said firm, we may have a lesser recourse to initiate legal proceedings to protect our intellectual property. For further details on the trademarks, registered or pending registration, please refer to the chapters titled "Business Overview" and "Government Approvals" on pages 156 and 320, respectively, of this Red Herring Prospectus.

17. We may in the future face potential liabilities from lawsuits or claims from customers, should they perceive any deficiency in the products we sell in our stores. We may also face the risk of legal proceedings initiated against our Company which may result in loss of business and reputation.

Our Company believes in providing quality products and due care is taken to mitigate the associated risks which may happen due to factors beyond our control. We may face the risk of legal proceedings and claims being brought against us by our customers amongst others on account of sale of any defective or misbranded products. Further, we could also face liabilities should our customers face any loss or damage due to any unforeseen incident such as fire, accident, etc. in our stores, which could cause financial and other damage to our customers. Though no such incident of lawsuits from our customers have happened so far, future occurrence of any such event may result in lawsuits and / or claims against our Company, which may materially and adversely affect the results of our operations and may also result in loss of business and reputation. For details, see “*Outstanding Litigation and Material Developments*” on page 314 of the Red Herring Prospectus.

18. Any failure to maintain quality of customer service, products and deal with customer complaints and to further attract and retain customers and maintain consistency in customer service could materially and adversely affect our business and operating results.

Our business is significantly affected by the overall size of our customer base, which is determined by our ability to provide quality customer service. We provide complete support to our customers through customer friendly policies like ‘no questions asked returns policy’. If we fail to provide quality customer service, our customers may be less inclined to buy our products and services or recommend us to new customers, and may channel their purchase through our competitors. Our ability to ensure satisfactory customer experience depends on our suppliers’ ability to provide high-quality products and our staff to provide them friendly environment and associated services. Our business can also be adversely affected by customer complaints relating to the defective or expired products, and quality of products. Failure to maintain the appropriate quality of products being sold by us and quality customer services, or satisfactorily resolving customer complaints, could harm our reputation and our ability to retain existing customers and attract new customers, which may materially and adversely affect our business, financial condition, cash flows and results of operations. Further, negative customer feedback, complaints or claims against us in consumer forums or otherwise, can result in diversion of management attention and other resources, which may adversely affect our business operations. However, no such event has ever happened so far.

19. Some of our stores were closed due to some reasons and we can not assure that similar event will not happen in the future which may have an adverse effect on our business, results of operations, cash flows and financial condition.

Our Shela, Ahmedabad and Anand Stores were closed in the past within a year of its opening due to certain commercial reasons. Brief reason for closure of each store has been provided below:

1. Satadhar Store (Ahmedabad)

This store operated as a joint venture with Hindustan Petroleum Corporation Limited (HPCL), under the *HPCL – Happy Shop* brand, and was located within an existing HPCL fuel station in Ahmedabad. Despite operating successfully for nearly a year, the store faced multiple challenges including a suboptimal location, high operating costs, limited parking at the fuel station, a relatively small average transaction size, and the need for continuous management oversight. In light of these operational inefficiencies, the closure was mutually agreed upon by both parties.

2. Shela Store (Ahmedabad)

The Shela Store was established within a residential society comprising over 200 units, targeting the daily convenience needs of residents. However, the store encountered ongoing operational difficulties due to the absence of a standardized operating procedure (SOP) for such setups within residential societies. Additionally, internal disputes and excessive interference by society members in day-to-day management created significant challenges. Due to these persistent operational hurdles and internal politics, the Company decided to discontinue operations at this location.

3. Anand Store

The Anand Store was closed following the issuance of two loan recovery notices by HDFC Bank to the building developer for outstanding dues. While the developer initially assured the Company of timely resolution, no action was taken after the first notice. Upon receipt of a second notice, which included a warning of potential sealing of the premises, and in the absence of any clear repayment commitment from the developer, the Company took a prudent decision to wind up operations to mitigate the risk of business disruption.

Such incidents lead to the loss of expenses already incurred and also loss of the future business. Though, we take all the necessary precautions to ensure that such events are not repeated in future, we cannot assure that similar events will not happen in future also which may have an adverse effect on our business, results of operations, cash flows and financial condition.

20. Our Company’s business relies on the reliable performance of its information technology systems and any interruption or abnormality in the same may have an adverse impact on our business operations and profitability.

Our Company has an ERP system which integrates and collates data of purchase, sales, reporting, accounting, stocks, etc. from all the 17 stores in different cities/urban agglomerates. Our Company also relies on third party providers for providing data hosting services and internet links. Our Company also has a separate POS system at each of its stores.

Our Company utilizes its information technology systems to monitor all aspects of its businesses and relies to a significant extent on such systems for the efficient operation of its business, including, the monitoring of inventory levels, the allocation of products to our stores and budget planning. Our Company’s information technology systems may not always operate without interruption and may encounter temporary abnormality or become obsolete, which may affect its ability to maintain connectivity with our stores. We cannot assure that we will be successful in developing, installing, running and migrating to new software systems or systems as required for its overall operations. Even if our Company is successful in this regard, significant capital expenditures may be required, and we may not be able to benefit from the investment immediately. All of these may have a material adverse impact on our Company’s operations and profitability. Also, our Company cannot guarantee that the level of security it presently maintains is adequate or that its systems can withstand intrusions from or prevent improper usage by third parties.

Further, our computer networks may be vulnerable to unauthorised access, computer hackers, computer viruses, worms, malicious applications and other security problems caused by unauthorised access to, or improper use of, systems by third parties or employees. Although we have not experienced such attacks in the past, we cannot assure you that our security systems in place can prevent any such attacks in the future or that we will be able to handle such attacks effectively.

Our Company’s failure to continue its operations without interruption due to any of these reasons may adversely affect our Company’s results of operations.

21. In spite of being in the retail trading business, our Company is having trade receivables and any delay or default in receipt of payments from customers could adversely affect our business, results of operations, financial condition and cash flows.

Though most of our sales is cash sales only, a part of our sales is also on credit basis. For certain customers, we have to extend credit facilities, which sometimes results to a high level of trade receivables. Consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. Although there have been no instances in the last three financial years, where defaults in payments from our clients affected our results of operations and cash flows, we cannot assure you that such instance will not arise in the future. Any prolonged delays in collections or non-payment by customers could adversely affect our cash flows and ability to meet our financial obligations.

The following table sets forth details of our trade receivables for the periods indicated:

(₹ in lakhs)

Particulars	As At 31-March-2025	As At 31-March-2024	As At 31-March-2023
Outstanding for a period exceeding six months from the date they are due for payment (Unsecured and Considered Good)	33.96	3.04	0.00
Outstanding for a period exceeding six months from the date they are due for payment (Unsecured and Doubtful)	-	-	-
Outstanding for a period less than six months from the date they are due for payment (unsecured and Considered Good)	138.77	238.58	16.43
Total	172.73	241.62	16.43

Further, details of the Trade receivables Turnover Ratio (in times) & Trade receivables Turnover Ratio (no of days) are as under:

(₹ in lakhs)

Particulars	Financial Year		
	2025	2024	2023
Revenue from Operations (₹ in lakhs)	4,735.28	3,338.68	3,268.96
Total revenue	4,740.00	3,341.29	3,269.15
Trade receivables	172.73	241.62	16.43
Trade receivables Turnover Ratio (In times) *	22.88	25.90	100.07
Trade receivables Turnover Ratio (no of days)**	15.95	14.09	3.65

* Trade receivables Turnover Ratio calculated as Total Revenue divided by Average Trade receivables.

** Trade receivables Turnover Ratio calculated by dividing average trade receivables by total revenue and multiplied by numbers of days in the year.

Given our reliance on credit sales, any disruptions in customer payments may require us to allocate additional resources toward credit monitoring and collection efforts, potentially affecting our operational efficiency. While we take measures to manage our receivables and mitigate credit risk, we cannot assure that such risks will not materially impact our business, financial condition, and future growth.

22. Our inability to continue to implement our marketing and advertising initiatives and brand building exercises could adversely affect our business and financial condition.

The ability to differentiate our brand and stores from our competitors through our branding, marketing and advertising programs is an important factor in attracting customers. We undertake regular advertising and marketing activities to create visibility, stimulate demand and promote our stores, through various mediums of mass communication. Creating and maintaining public awareness of our brand is crucial to our business and we accordingly invest in various marketing and advertising campaigns. If these campaigns are poorly executed or fail to elicit interest in potential customers, or customers lose confidence in our brand for any reason, it could harm our ability to attract and retain customers. Developing, promoting and positioning our brand will depend largely on the success of our marketing and advertising initiatives, the relationships we have with our customers and our ability to provide a consistent, high quality experience for our customers. To promote our brand and products, we have incurred, and expect to continue to incur, substantial expenses related to advertising and other marketing initiatives, including advertisements in newspapers and social media.

Our expenses in relation to the advertisement expenses are as follows for Fiscals 2025, 2024 and 2023, respectively.

(₹ in lakhs)

Particulars	Financial Year		
	2025	2024	2023
Advertisement expenses	28.90	25.70	20.78
Total other expenses	509.37	427.41	341.50
Percentage of Total other expenses (%)	5.67%	6.01%	6.08%

Furthermore, there can be no assurance that our marketing efforts will succeed in maintaining our brand and its perception with customers.

23. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.

We constantly evaluate the risks involved in the business of our company, in an effort to be sufficiently covered for all known risks. Our Company has insurance coverage which we consider reasonably sufficient to cover all normal risks associated with our operations and which we believe is in accordance with the industry standards. We have taken Fire and burglary Policies/Shopkeepers Insurance policy covering Fire and allied perils for all our retail stores which are operated by the company which covers for the physical loss or damage of stock due to fire and burglary, Sookshma

Udyam Suraksha Policy, vehicle insurance. However, we have not taken any insurance policies for the medical expenses, personal accident or for gratuity payment to our employees.

The table below sets forth particulars of our insurance coverage on as at March 31, 2025:

Particulars	As at March 31, 2025
Insured Assets (Rs. In Lakhs)	5,103.80
Insured Assets as % of Gross Block of Property, Plant & Equipment and Inventories	216.80%

Accordingly, there can be no assurance that our insurance policies will be adequate to cover the losses that may be incurred as a result of any such interruption which is not so insured by us. If we suffer a large uninsured loss or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and result of operations may be affected materially and adversely.

We would also like to mention that there has been an incident of fire at our Visnagar Store on June 19, 2023 resulting in loss of approximately Rs. 131.03 lakhs for which company had filed an insurance claim of Rs.120 lakhs with the Insurance Company which has been rejected and against which a consumer complaint has been filed with Consumer Dispute Redressal Commission, Gandhinagar, which is currently pending. For further details regarding said litigation, see “*Outstanding Litigation and Material Developments*” on page 293 of this Red Herring Prospectus. Similarly, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that our insurance policies will be adequate to cover the losses incurred. Notwithstanding the insurance coverage that we carry, we may not be fully insured against certain business risks such as the occurrence of an event that causes losses in excess of limits specified under the relevant policy or losses arising from events not covered by the insurance policies and insurance policies that we procure may not be adequate to cover all the risks associated with our business. Additionally, there may be various other risks and losses for which we are not insured because such risks are either uninsurable or not insurable on commercially acceptable terms.

Our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at an acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance or exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial condition may be adversely affected.

24. We have incurred indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations.

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on March 31, 2025 our total outstanding indebtedness was ₹ 870.54 Lakhs.

The following table sets forth our debt-to-equity ratio for the periods indicated:

(₹ in lakhs)

Particulars	Financial Year		
	2025	2024	2023
Total Outstanding debt	870.54	856.36	746.94
Shareholder Funds	1,357.06	755.31	309.42
Debt Equity Ratio (In times)	0.64	1.13	2.41
Debt Service Coverage Ratio (In times)*	6.96	5.10	4.77

* Debt service coverage ratio is calculated by dividing profit before tax plus depreciation and finance cost by interest expense plus current maturity of long-term loans.

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to increasing our vulnerability to general adverse economic, industry and competitive conditions; limiting our flexibility in planning for, or reacting to, changes in our business and the industry; affecting our credit rating; limiting our ability to borrow more money both now and in the future; and increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a shorter notice, we may be required to arrange for funds to fulfil the necessary requirements.

The occurrence of these events may have an adverse effect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see “*Business Overview- Indebtedness*” on page 191 of this Red Herring Prospectus.

25. The average cost of acquisition of Equity shares by our Promoters may be substantially lower than the Issue price.

The table below provides details of the Equity Shares held by our Promoters and their respective average cost of acquisition, which may be lower than the Issue Price:

Sr. No.	Name of Promoter	No. of Equity Shares held	Average Cost of Acquisition per equity share (in ₹) *
1.	Bhikhabhai Shivdas Patel	6,78,000	3.58
2.	Jignesh Amratbhai Patel	6,56,000	2.61
3.	Harshal Daxeshkumar Patel	4,68,000	3.63
4.	Rutwijkumar Maganbhai Patel	4,20,000	3.68
Total		22,22,000	

* The average cost of acquisition by promoter has been arrived by considering only the cost of shares allotted to the promoters on account of allotment and acquisition from secondary market, i.e., cost paid by promoter for acquisition by way of subscription of shares, further issue of shares made by the company and acquisition of shares from secondary market whether for cash or other than cash, divided by the total number of equity shares acquired by the above transactions. The selling price of the shares transferred by the respective promoters whether for consideration as cash or other than cash, to others is not netted off while calculating the weighted average cost of acquisition.

For further details regarding the average cost of acquisition of Equity Shares by our Promoter in our Company and build-up of Equity Shares of our Promoter in our Company, please see Chapter titled “*Capital Structure*” beginning on 92 of this Red Herring Prospectus.

26. Our ability to attract customers is dependent on the location of our stores and any adverse development impairing the success and viability of our stores could adversely affect our business, financial condition and results of operations.

Our stores are typically located in densely populated residential areas and neighbourhoods keeping in mind accessibility and potential for future development. Sales are derived, from the volume of footfalls in the stores located in these locations. Store locations may become unsuitable and our sales volume and customer traffic generally may be adversely affected by, among other things, change in primary occupancy in a particular area from residential to commercial, competition from nearby retailers, changing customer demographics, changing lifestyle choices of customers in a particular market and the popularity of other businesses located near our stores.

Changes in areas around our store locations that result in reduction in footfalls or otherwise render the locations unsuitable, could result in reduced sales volume, which could materially and adversely affect our business, financial condition and results of operations.

27. Our inability to manage losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on our profitability and our reputation.

Our business and the industry we operate in are vulnerable to the problem of product shrinkage. Shrinkage at our stores may occur through a combination of shoplifting by customer, pilferage by employees, damages, obsolescence and expiry and error in documents and transactions that go un-noticed. The retail industry also typically encounters some inventory loss on account of vendor fraud, credit card fraud and general administrative error.

An increase in product shrinkage levels at our existing and future stores may force us to install additional security and surveillance equipment, which will increase our operational costs and may have an adverse impact on our profitability. Further, we cannot assure you whether these measures will successfully prevent product shrinkage. Furthermore, although we have cash management procedures and controls in place, there are inherent risks in cash management including, theft and robbery, employee fraud and the risks involved in transferring cash from our stores to banks. Though, there have not been instances of employee misconduct in the past which have been material, we cannot assure you that we will be able to completely prevent such incidents in the future.

28. Our funding requirements and proposed deployment of the Net Proceeds have not been appraised by a bank or a financial institution and if there are any delays or cost overruns, we may have to incur additional cost to fund the project because of which our business, financial condition and results of operations may be adversely affected.

We intend to use the Net Proceeds for the purposes described in the “*Objects of the Issue*” on page 85. The funding requirements mentioned as a part of the objects of the Issue have not been appraised by any bank or financial institution. No monitoring agency will be appointed for monitoring utilisation of the Net Proceeds. The proposed utilisation of the Net Proceeds is based on current conditions, internal management estimates, estimates received from the third party agencies and are subject to changes in the external circumstances or costs, or in other financial condition, business or strategy as discussed further below.

Based on the competitive nature of our industry, we may have to revise our business plan and / or management estimate from time to time and consequently our funding requirements may also change. Our internal management estimates may exceed fair market value or the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our capital expenditure and may have an adverse impact on our business, financial condition, results of operations and cash flows. Further, pending utilisation of Net Proceeds towards the Objects, our Company will have the flexibility to deploy the Net Proceeds and to deposit the Net Proceeds temporarily in deposits with one or more scheduled commercial banks included in the Second Schedule of the Reserve Bank of India Act, 1939. Accordingly, prospective investors in the Issue will need to rely on our management’s judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilisation of the Net Proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the Net Proceeds and our business and financial results may suffer.

29. Our business is subject to seasonal and cyclical volatility due to which there may be fluctuation in the sales of products which could lead to higher closing inventory position, which may adversely affect our business.

We offer products at our stores that our consumers require and our success is dependent on our ability to meet our consumers’ requirements. The retail consumer spending is heavily dependent on the economy and, to a large extent, on various occasions such as festivals, seasonal changes, weddings, etc. We typically experience seasonal fluctuations in the sale of products across our three product categories, with higher sales volumes associated with the festive sale period in the third quarter of each Financial Year, which encompasses holiday events such as Durga Puja, Diwali, annual sales events, other national and regional festivals etc. Any year also has phases of lean sales. We have historically experienced seasonal fluctuation in our sales, with higher sales volumes associated with the festive period. As a result, our revenue and profits may vary during different quarters of the financial year and certain periods may not be indicative of our financial position for a full financial year or future quarters or periods and may be below market expectations. Further, any unanticipated decrease in demand for our products during our peak selling season could result into higher closing inventory position, which may lead to sale and liquidation of inventory getting delayed against the trajectory under normal course of business, which could adversely affect our financial position and business operations.

Also, since our business is seasonal in nature, we are vulnerable to non-availability of products during the peak season where there are higher number of footfalls. Such instances may lead to our customers approaching our competitors. This may lead to a reduction in our customer base. Further, we will be vulnerable to demand and pricing shifts and to suboptimal selection and timing of merchandise production. If sales do not meet expectations, too much inventory may lower planned margins. Our brand image may also suffer if customers believe we are no longer able to offer the latest products. The occurrence of these events could adversely affect our cash flows, financial condition and business operations.

30. The success of our business depends substantially on our management team and other key personnel. Our inability to attract or retain such manpower or any loss of members of our Senior Management Personnel or Key Managerial Personnel could significantly delay or prevent the achievement of our business objectives, and could adversely affect our business and operations.

Our business and financial performance depends largely on the efforts and abilities of our Directors, Senior Management Personnel and Key Managerial Personnel. Our success and growth depend upon consistent and continued performance of our employees with direction and leadership from our Directors, Senior Management Personnel and Key Managerial Personnel. Our success also depends on our ability to recruit, develop and retain qualified and skilled personnel. We compete in the market to attract and retain skilled personnel with knowledge of the local market and the retail and consumer industry to operate our stores.

There may be changes in our management team or other key employees to enhance the skills of our teams or as a result of attrition, from time to time. We cannot assure you that we will continue to retain any or all of the key members of our management. Further, we cannot assure you that if one or more key members of our management are unable or unwilling to continue in their present positions, that we would be able to replace such member(s) in a timely and cost effective manner.

As of March 31, 2025, we had 115 employees. The table sets forth below attrition rate of our employees for last three fiscal year:

Particulars	Fiscal 2025	Fiscal 2024	Fiscal 2023
Number of Employees at the beginning (A)	110	65	43
Number of Employees at the end (B)	115	110	65
Average Number of Employees in a particular fiscal (C= (A+B)/2)	113	88	54
Number of Employees left (D)	16	12	7
Attrition Rate (D/C)	14.22%	13.71%	12.96%

While we adhere to all employee statutory provident fund requirements and have undertaken initiatives (such as providing bonuses and monthly incentives to our employees) to reduce attrition of our employees, the attrition rate for our employees is high. This is primarily due to the nature of our business which often involves high-demand periods and entry-level positions with relatively low wages. This leads to a higher employee turnover as compared to other industries with a higher wage structure and a minimum professional qualification requirement for employees.

If we fail to identify, recruit and integrate strategic personnel, our business could be adversely affected. Any loss of members of our Senior Management Personnel or Key Managerial Personnel could significantly delay or prevent the achievement of our business objectives, affect our succession planning and could harm our business. We may need to invest significant amounts of cash and equity to attract and retain new employees, and we may never realize returns on these investments. If we are not able to retain and motivate our current personnel or effectively integrate and retain employees, our ability to achieve our strategic objectives, and our business and operations could be adversely affected.

31. Our agreements with various banks for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.

As on March 31, 2025 our total outstanding indebtedness was ₹ 870.54 Lakhs. Some of the financing arrangements entered into by our Company contain restrictive covenants and / or events of default that limit our ability to undertake certain types of transactions. While we have obtained the prior consent from our working capital and term loan lenders for the Issue, we cannot assure you that we will be able to comply with these financial or other covenants. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that is not waived by our lenders or is not otherwise rectified by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. Further, the banks may change the extant banking policies or increase the interest rates/levy penal interest for non-compliances, if any.

This may adversely affect our ability to conduct our business and impair our future growth plans. For further information of outstanding indebtedness, see the chapter titled “*Financial Indebtedness*” on page 309 of this Red Herring Prospectus.

In view of the foregoing, you may not be able to seek legal recourse for any losses resulting from undertaking any investment in the Issue pursuant to reliance on the information in this Red Herring Prospectus based on, or derived from, the Company Commissioned Report. You should consult your own advisors and undertake an independent assessment of information in this Red Herring Prospectus based on, or derived from, the Company Commissioned D & B Report before making any investment decision regarding the Offer.

33. Significant Increase in the Valuation of Our Equity Shares in the Recent Past May Not Be Indicative of Future Performance or Valuation

The valuation of our equity shares has increased significantly over the past few years. The price per equity share increased from ₹83.85 in June 2022 and April 2023 to ₹136.88 in November 2023, primarily due to a substantial increase in our Profit after Tax (“PAT”) in Fiscal 2023, which rose by 556.13% from ₹5.38 lakhs in Fiscal 2022 to ₹35.30 lakhs in Fiscal 2023. Further, the valuation increased from ₹136.88 in November 2023 to ₹198.00 in January 2025, primarily due to a 338.78% increase in our PAT from ₹35.30 lakhs in Fiscal 2023 to ₹154.89 lakhs in Fiscal 2024.

While the increase in valuation has been primarily driven by our improved financial performance, particularly the rise in profitability, there can be no assurance that such growth in profits or valuation will be sustained in the future. Any adverse change in our financial performance, growth prospects, business operations, or market conditions may negatively impact the valuation of our equity shares going forward. Further, any significant discrepancy between past valuations and the Issue Price in the Issue may affect investor perception and could have a material adverse effect on our reputation and the market price of our equity shares post listing.

34. Our Company has not paid any dividends in the past and we may not be able to pay dividends in the future.

Our Company has not declared dividends for any financial year in the past and our Company may not be able to declare dividends in the future. The declaration, payment and amount of any future dividends is subject to the discretion of the Board and Shareholders, and will depend upon various factors, *inter alia*, our earnings, financial position, capital expenditures and availability of profits, restrictive covenants in our financing arrangements and other prevailing regulatory conditions from time to time. Any of these factors may thus restrict our ability to pay dividends in the future. If we are unable to pay dividends in the future. Realization of a gain on Shareholders’ investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

35. Our Promoters and Promoter Group members have provided personal guarantees for loans availed by us from Bank of India. In the event of default of the debt obligations, the personal guarantees may be invoked thereby adversely affecting our Promoters’ ability to manage the affairs of our Company and our Company’s profitability and consequently this may impact our business, prospects, financial condition and results of operations.

Our Company has availed loans from Bank of India in the ordinary course of business for the purpose of working capital requirements. Our Promoters and our Promoter Group, have provided personal guarantees for these working capital facilities obtained by our Company, for details please see the sections titled “*Our Promoters and Promoter Group*” and “*Financial Indebtedness*” on pages 211 and 309, respectively. In the event of default in repayment of these loans by the Company in a timely manner or at all, the personal guarantees may be invoked by our lenders thereby adversely affecting our Promoters’ ability to manage the affairs of our Company and this, in turn, could adversely affect our business, prospects, financial condition and results of operations of our company. Further, if any of these guarantees are revoked by our Promoters or promoter group members, our lenders may require alternate securities or guarantees and may seek early repayment or terminate such facilities. Any such event could adversely affect our financial condition and results of operations of our company.

36. Our Company has availed unsecured loans which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows.

As on March 31, 2025, our Company has unsecured loans from directors Jignesh Amratbhai Patel, Harshal

Daxeshkumar Patel and Rutwijkumar Maganbhai Patel amounting to ₹19.44 lakhs, which are repayable on demand to them. Such loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lenders at any time. Any such unexpected demand or acceleration of such loan repayment may have a material adverse effect on the business, cash flows, and financial condition. For further details of the unsecured loans of our Company, please refer chapter titled “*Restated Financial Information Note 29: Related Party Disclosures*” beginning on page 233 of this Red Herring Prospectus.

37. Our Promoters, Directors, Key Management Personnel (KMP) and Senior Managerial Personnel (SMP) may have interests in our Company other than normal remuneration or benefits and reimbursement of expenses incurred.

Our Promoters, Directors, Key Management Personnel (KMP), and Senior Managerial Personnel (SMP) may be regarded as having an interest in our Company other than reimbursement of expenses incurred and normal remuneration or benefits, to the extent of Equity Shares, held by them and their relatives (if any) and their dividend or bonus entitlement, and other benefits arising from their shareholding in our Company and are also interested to the extent of sitting fee payable to them for attending each of our Board and Committee Meetings. Further, our Company has entered into leave and license agreements with our Promoter Jignesh Amratbhai Patel, for the usage of certain commercial properties located in Randesan, District Gandhinagar. For further details about interest of our Promoters, Directors, Key Management Personnel (KMP), and Senior Managerial Personnel (SMP) in shares held by them and their relatives, properties and other matters, see “*Capital Structure*”, “*Our Management – Interests of Directors*”, “*Our Management - Interest Of The Key Management Personnel And Senior Management Personnel*” and “*Our Promoters and Promoter Group – Interest of our Promoters*” and on pages 92, 224, 224 and 228 of this Red Herring Prospectus, respectively. We cannot assure you that our Promoters, Directors, Key Management Personnel (KMP), and Senior Managerial Personnel (SMP) to the extent of Equity Shares, held by them (if any) will exercise their rights as shareholders to the benefit and best interest of our Company.

38. Our Company has entered into, and will continue to enter into, related party transactions which may not always enable us to achieve the most favourable terms.

In the past, we have entered into related party transactions with various parties. While we believe that our past related party transactions have been conducted on an arm’s length basis, there can be no assurance that we could not have achieved more favourable terms if such transactions had not been entered into with related parties. Furthermore, it is likely that we will continue to enter into related party transactions in the future. There can be no assurance to you that such transactions in the future or any other future related party transactions that we may enter into, individually or in the aggregate, will not have an adverse effect on our business, cash flows, financial condition, and results of operations. Further, these transactions in the future or any future transactions with our related parties, either individually or in the aggregate, may potentially involve conflicts of interest. Additionally, there can be no assurance that any dispute that may arise between us and related parties will be resolved in our favour.

39. We have made certain delays in payment to MSME vendors beyond the statutory requirement as prescribed under MSME Act, 2006.

Our company has made certain delays in payment to MSME vendors beyond the statutory requirement as prescribed under MSME Act, 2006. The details of number of vendors to whom delayed payment has been made and the amount of the same for the reporting period has been disclosed below:

Particulars	Fiscal 2025	Fiscal 2024	Fiscal 2023
No. of Vendors to whom delayed payment has been made.	11	9	12
Amount of delayed payment (Rs. In Lakhs)	7.08	10.95	2.06

The above disclosure relates to trade payables as on end of respective fiscal year. Any delay in payments to MSMEs by our Company may lead to financial liabilities in the form of interest payments, adversely affecting our financial condition and results of operations. Further, non-compliance with the MSME Act may result in reputational risk and may also lead to litigation, which could adversely impact our business operations. However, no such litigation or liability has been incurred during the reporting period that could have a material adverse effect on our financial condition or results of operations.

40. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no assurance that we will be able to do so consistently in the future. Factors such as market dynamics, competition, operational challenges, and regulatory changes may impact our ability to implement these strategies within the projected timelines and budget. Additionally, we may face challenges in meeting the expectations of our target customers. Any failure or delay in executing our business strategies could have a material adverse effect on our operations, financial condition, and overall business growth.

41. Our Promoters and Promoter Group will continue to have significant shareholding in our Company after the Issue, which will allow them to exercise significant influence over the Company.

After the completion of the Issue, our Promoters and Promoter Group will have significant shareholding in our Company. Accordingly, our Promoters and Promoter Group will continue to exercise significant influence over our business and all matters requiring shareholders' approval, including the composition of our Board of Directors, the adoption of amendments to the constitutional documents of our Company, the approval of mergers, strategic acquisitions or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditures. This concentration of ownership may also delay, defer or even prevent a change in control of our Company and the completion of certain transactions may become more difficult or impossible without the support of our Promoters and Promoter Group. Further, the SEBI Takeover Regulations may limit the ability of a third party to acquire control of our Company. The interests of our Promoters, as our Company's controlling shareholders, could conflict with our Company's interests, your interests or the interests of our other shareholders.

42. There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds and same is entirely at the discretion of Our Company.

As per Regulation 262(1) of SEBI (ICDR) Regulations, 2018, as amended, the appointment of monitoring agency is required only for an Issue size above ₹ 5,000 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

43. In the event there is any delay in the completion of the Issue, or delay in the implementation schedule, there would be a corresponding delay in the completion of the objects of this Issue which, which, in turn, could affect our revenues and results of operations.

The funds that we receive would be utilized for the objects of the Issue as has been stated in the chapter titled "*Objects of The Issue*" on Page no. 115 of this Red Herring Prospectus. The proposed implementation schedule for the objects of the Issue is based on our management's estimates. If the implementation schedule is delayed for any other reason whatsoever, including any delay in the completion of the Issue, it may adversely affect our revenues and results of operations.

44. We have not identified any alternate source of raising the funds required for the object of the Issue and the deployment of funds is entirely at our discretion and as per the details mentioned in the section titled "Objects of the Issue".

Our Company has not identified any alternate source of funding for our objects of the Issue and hence any failure or delay on our part to mobilize the required resources, or any shortfall in the Issue proceeds, could adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds may result in inadequacy of funds or may result in borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings.

For further details of Please refer chapter titled "*Objects for the Issue*" beginning on page 115 of this Red Herring Prospectus.

45. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The issue price of our Equity Shares is ₹ [●]. The issue price of the equity shares has been based on many factors and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares

could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

For further information, please refer the section titled “*Basis for Issue Price*” beginning on page no 115 of this Red Herring Prospectus

EXTERNAL RISK FACTORS

Risks in relation to India

46. Governmental actions and changes in policy with respect to foreign investment in the Indian retail industry and adverse change in taxes could adversely affect our business.

The Government of India and the Government of each State of India (each a “**State Government**”), have broad powers to regulate the Indian economy which may impact our business. In the past, the Government of India and State Governments have used such powers to influence, directly and indirectly, the Indian retail industry and the local manufacturing activities. Examples of such measures include:

- (i) permission for foreign investment in Indian retail industry,
- (ii) granting tax concessions for operation of new businesses in a particular region, and
- (iii) value added tax/sales tax regulations.

With respect to permission for foreign investment in India, the Indian government has in the past permitted FDI up to 51% in multi-brand retail under approval route subject to fulfilment of specified conditions. Until then FDI in retail trading was prohibited except FDI in single brand product retail trading which could be undertaken through the government route up to 100%. While such decisions of allowing FDI in multi-brand retail may prove beneficial to the Indian economy, this move has also attracted severe competition for us. There can be no assurance that the current levels of FDI limit in multi-brand retail under automatic route will not increase in the future, or that State Governments will not introduce additional measures, each of which could adversely affect our business.

There can be no assurance that the current levels of taxes, tariffs and duties will not increase in the future, or that State Governments will not introduce additional levies, each of which may result in increased operating costs and lower income. To the extent additional levies are imposed, there can be no assurance that we will be able to pass such cost increases on to our partner brands.

47. Changing laws, rules and regulations and legal uncertainties in India may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by unfavourable changes in, or interpretations of existing laws, or the promulgation of new laws, rules and regulations applicable to us and our business. Please see “*Key Regulations and Policies*” on page 179.

The regulatory and policy environment in which we operate is evolving and subject to change. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government and other regulatory bodies, or impose onerous requirements, conditions, costs and expenditures on our operations. Any changes in international treaties or export technological restrictions in other countries and the related uncertainties with respect to the implementation of any such regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations and cash flows. Any changes to such laws may adversely affect our business, financial condition, results of operations, cash flows and prospects.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. Further, if we are affected, directly or indirectly, by the application or interpretation of any provision of such laws and regulations or any related proceedings or are required to bear any costs in order to comply with such provisions or to defend such proceedings, our business and financial performance may be adversely affected.

48. Our business is affected by economic, political and other prevailing conditions in India.

We are incorporated in India, and our operations are solely in India. As a result, our results of operations and cash flows

are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations and cash flows, may include:

- any increase in interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing, resulting in an adverse impact on economic conditions and scarcity of financing for our expansions;
- prevailing income conditions among consumers and corporates;
- changes in tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in the region or globally, including in various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in the relevant country's principal export markets;
- epidemic, pandemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries;
- any downgrading of the Government's debt rating by a domestic or international rating agency;
- instability in financial markets;
- other significant regulatory or economic developments in or affecting India or the emerging markets; and
- logistical and communications challenges.

We cannot predict whether any tax laws or regulations impacting our products will be enacted, what the nature and impact of the specific terms of any such laws or regulations will be or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition, cash flows and results of operations. Prospective investors should consult their own tax advisors in relation to the consequences of investing in the Equity Shares.

49. Any adverse change or downgrade in ratings of India may adversely affect our business, results of operations and cash flows.

Our borrowing costs and our access to the debt funds depend significantly on the credit ratings of India. India's sovereign rating is Baa3 with a "stable" outlook (Moody's), BBB- with a "stable" outlook (S&P) and BBB- with a "stable" outlook (Fitch). Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available,

including raising any overseas additional financing. A downgrading of India's credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

50. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Financial turmoil in Asia, U.S., Russia and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the trading price of the Equity Shares.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections in recent years. In particular, sub-prime mortgage loans in the United States have experienced increased rates of delinquency, foreclosure and loss. Since September 2008, liquidity and credit concerns and volatility in the

global credit and financial markets increased significantly with the bankruptcy or acquisition of, and government assistance extended to, several major U.S. financial institutions.

Developments in the Eurozone have exacerbated the ongoing global economic crisis. Large budget deficits and rising public debts in Europe have triggered sovereign debt finance crises that resulted in the bailouts of European economies and elevated the risk of government debt defaults, forcing governments to undertake aggressive budget cuts and austerity measures, in turn underscoring the risk of global economic and financial market volatility. Financial markets and the supply of credit could continue to be negatively impacted by ongoing concerns surrounding the sovereign debts and/or fiscal deficits of several countries in Europe, the possibility of further downgrades of, or defaults on, sovereign debt, concerns about a slowdown in growth in certain economies and uncertainties regarding the stability and overall standing of the European Monetary Union. Following the United Kingdom's exit from the European Union ("Brexit"), there remains significant uncertainty around the terms of their future relationship with the European Union and, more generally, as to the impact of Brexit on the general economic conditions in the United Kingdom and the European Union and any consequential impact on global financial markets.

Trade tensions between the U.S. and major trading partners, most notably China, continue to escalate following the introduction of a series of tariff measures in both countries. Although China is the primary target of U.S. trade measures, value chain linkages mean that other emerging markets, primarily in Asia, may also be impacted. China's policy response to these trade measures also presents a degree of uncertainty. There is some evidence of China's monetary policy easing and the potential for greater fiscal spending, which could worsen existing imbalances in its economy. This could undermine efforts to address already high debt levels and increase medium-term risks. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have a material adverse effect on our business, financial condition, cash flows and results of operation.

These and other related factors such as concerns over recession, inflation or deflation, energy costs, geopolitical issues, slowdown in economic growth in China and Renminbi devaluation, commodity prices and the availability and cost of credit have had a significant impact on the global credit and financial markets as a whole, including reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the United States, Europe and the global credit and financial markets. A lack of clarity over the process for managing the exit and uncertainties surrounding the economic impact could lead to a further slowdown and instability in financial markets. This and any prolonged financial crisis may have an adverse impact on the Indian economy, and in turn on our business.

A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian financial markets and indirectly in the Indian economy in general. Any worldwide financial instability could influence the Indian economy. In response to such developments, legislators and financial regulators in the United States, Europe and other jurisdictions, including India, have implemented several policy measures designed to add stability to the financial markets. In addition, any increase in interest rates by the United States Federal Reserve will lead to an increase in the borrowing costs in the United States, which may in turn impact global borrowing as well. Furthermore, in several parts of the world, there are signs of increasing retreat from globalization of goods, services and people, as pressure for the introduction of a protectionist regime is building and such developments could adversely affect Indian exports. However, the overall impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. In the event that the current adverse conditions in the global credit markets continue or if there is any significant financial disruption, this could have an adverse effect on our business, future financial performance and the trading price of the Equity Shares.

51. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic or epidemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil

disturbances in recent years, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

Risks in relation to the Issue

52. Our Equity Shares have never been publicly traded, and after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the Issue Price may not be indicative of the market price of the Equity Shares after the Issue.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares was determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. Consequently, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all.

There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share price could fluctuate significantly because of market volatility. A decrease in the market price of our Equity Shares could cause investors to lose some or all of their investment.

53. The determination of the Price Band is based on various factors and assumptions and the Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue. Further, the current market price of some securities listed pursuant to certain previous issues managed by the BRLMs is below their respective issue prices.

The determination of the Price Band is based on various factors and assumptions and was determined by our Company in consultation with the BRLMs. Furthermore, the Issue Price of the Equity Shares was determined by our Company in consultation with the BRLMs through the Book Building Process. These will be based on numerous factors, including factors as described under “*Basis for Issue Price*” beginning on page 101 and may not be indicative of the market price for the Equity Shares after the Issue.

In addition to the above, the current market price of securities listed pursuant to certain previous initial public offerings managed by the BRLMs is below their respective issue price. For further details, see “*Other Regulatory and Statutory Disclosures – Price information of past issues handled by the BRLMs*” on page 329. The factors that could affect the market price of the Equity Shares include, among others, broad market trends, financial performance and results of our Company post-listing, and other factors beyond our control. We cannot assure you that an active market will develop, or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

54. All categories of Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, all categories of Bidders are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. While our Company is required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Issue within Three Working Days from the Bid/Issue Closing Date, events affecting the Bidders’ decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation, cash flows or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders’ ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

55. The requirements of being a listed company may strain our resources.

We are not a listed company and have historically not been subjected to the compliance requirements and increased scrutiny of our affairs by shareholders, regulators and the public at large associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the Listing Regulations which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations or cash flows as promptly as other listed companies.

56. The sale of Equity Shares by our Promoters in future may adversely affect the market price of the Equity Shares.

After the completion of the Offer, our Promoters will still own a significant percentage of our issued Equity Shares. The sale of a large number of the Equity Shares by our Promoters could adversely affect the market price of the Equity Shares. Similarly, the perception that any such primary or secondary sale may occur, could adversely affect the market price of the Equity Shares. No assurance may be given that our Promoters will not dispose of, pledge or encumber their Equity Shares in the future.

57. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The issue price of the equity shares has been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. For further information, please refer the section titled “*Basis for Issue Price*” beginning on page 115 of the Red Herring Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

Further, as a listed company, we will be required to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management’s attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition, results of operations and cash flows. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

58. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution. However, if the laws of the jurisdiction where the investors are located in, do not permit them to exercise their pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor’s benefit. The value the custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in our company would be reduced.

59. Any future issuance of Equity Shares or convertible securities or other equity linked securities by our Company may dilute your shareholding and any sale of the Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of the Equity Shares.

Any future equity issuances by us, including a primary offering, may lead to the dilution of investors’ shareholdings in us. Any disposal of Equity Shares by our Promoters or Promoter Group or the perception that such issuance or sales may occur, including to comply with the minimum public shareholding norms applicable to listed companies in India may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of the Equity Shares or incurring additional debt. There can be no assurance that we will not issue further Equity Shares or that the Promoters or Promoter Group will not dispose of the Equity Shares. Any future issuances or sale of Equity Shares could also dilute the value of your investment in the Equity

Shares. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of the Equity Shares.

60. Foreign investors are subject to foreign investment restrictions under Indian laws that may limit our ability to attract foreign investors, which may have a material adverse impact on the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. For further details, see “*Restrictions on Foreign Ownership of Indian Securities*” on page 361. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, Government of India, investments where the beneficial owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in FDI Policy. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

61. Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors’ fiduciary duties, responsibilities and liabilities, and shareholders’ rights may differ from those that would apply to a company in another jurisdiction. Shareholders’ rights under Indian law may not be as extensive and widespread as shareholders’ rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as a shareholder of an entity in another jurisdiction.

62. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will be subject to long term capital gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the stock exchanges, the quantum of gains and any available treaty exemption. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of Securities Transaction Tax (“STT”), on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India.

Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. Additionally, pursuant to the Finance Act, 2020, dividend distribution tax (“DDT”) is not required to be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident.

Similarly, any business income realized from the transfer of Equity Shares held as trading assets is taxable at the applicable tax rates subject to any treaty relief, if applicable, to a non-resident seller. Additionally, in terms of the Finance Act, 2018, which has been notified on March 29, 2018 with effect from April 1, 2018, the tax payable by an assessee on the capital gains arising from transfer of long term capital asset (introduced as section 112A of the Income Tax Act, 1961) shall be calculated on such long-term capital gains at the rate of 10%, where the long-term capital gains exceed ₹100,000, subject to certain exceptions in case of a resident individuals and HUF.

Earlier, the Finance Act, 2019 has made various amendments in the taxation laws and has also clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. These amendments were

notified on December 10, 2019 and have come into effect from July 1, 2020.

63. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI Takeover Regulations.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%

2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

Key assumptions and justifications for estimated working capital requirement

Holding levels

On the basis of our existing working capital requirements, the details of our Company's holding period (with days rounded to the nearest number) and justifications for holding period levels on the basis of our Company's restated financial statements, as approved by our Board pursuant to a resolution dated September 02, 2025, are as provided below:

(Holding period in days)

Particulars	Projected		Restated		
	Fiscal 2027	Fiscal 2026	Fiscal 2025	Fiscal 2024	Fiscal 2023
Trade receivables Days	11	11	16	14	4
Inventory (Stock-in-Trade) Days	136	132	138	149	92
Trade Payable Days	13	16	32	62	49

Note: Based on Certificate dated August 07, 2025, from peer reviewed Auditors of the company M/s. S J V P & Associates.

Justification for holding period

The working capital projections made by our Company are based on certain key assumptions and justifications, as set out below:

Sr No	Particulars	Assumptions
Current Assets		
1.	Trade Receivable	Historically, our trade receivable days for Fiscal 2023, 2024 and 2025, have been 4 Days, 14 Days and 16 Days, respectively. Our trade receivable holding days is estimated to decrease from 16 days in Fiscal 2025 to 11 Days in Fiscal 2026 and Fiscal 2027.
2.	Inventory (Stock-in-Trade)	<p>Our Inventories include goods purchased as Stock-in-trade for the purpose of our stores. Our Stock-in-trade consists of FMCG products, Garments and Apparels and other general merchandise. Our Inventory Days for 2023, 2024 and 2025, was 92 Days, 149 Days and 138 Days, respectively. It is evident from the Inventory Days that the holding period has increased over period of time due to substantial increase in number of stores from 10 stores in Fiscal 2023 to 15 stores as at Fiscal 2025.</p> <p>As our company expanded its footprints by opening more stores, there is a proportional increase in the inventory levels required to adequately stock each new location. This expansion necessitates holding larger quantities of inventory, which, while essential for ensuring that all stores are adequately supplied, can result in longer periods of inventory turnover.</p> <p>Further, during the establishment phase of new stores, there is often an accumulation of unsold stock as the store builds brand awareness and customer demand. This transitional phase can result in slower inventory turnover and an increase in the holding period as the new locations gain traction in the market.</p> <p>For the Fiscal 2026 and 2027, our inventory holding period is estimated to be in the range of 132 Days to 136 Days based on historical trend of last fiscal year i.e. Fiscal 2025.</p>
Current Liabilities		
3	Trade Payables	Historically, our trade payable days for the Fiscal 2023, 2024 and 2025, have been 49 Days, 62 Days and 32 days, respectively. Our trade payable holding period is estimated to decrease from 32 days in Fiscal 2025 to 16 Days in Fiscal 2026 and subsequently to 13 Days in Fiscal 2027. By reducing the time it takes to settle our payables, we aim to negotiate more favorable terms and conditions with our suppliers, enabling us to access competitive pricing for the products and uninterrupted supply of products.

Apart from above there are other working capital requirements such as Inventories, Cash and cash equivalents, Other Assets, Loans and advances, short term provisions and other Liabilities. Details of which are given below.

Cash and Cash Equivalents	Cash and cash equivalents include cash in hand and balance in current account including demand draft held in hand, and excluding Fixed Deposits held under lien.

GLOBAL ECONOMY

The global economy, which grew by 3.3% in 2023, is expected to record a sluggish growth of 3.2% in 2024 before rising modestly to 3.3% in 2025. Between 2021-2022 global banks were carrying a historically high debt burden after COVID-19. Central banks took tight monetary measures to control inflation and spike in commodity prices. Russia's war with Ukraine further affected the global supply chains and inflated the prices of energy and other food items. These factors coupled with war-related economic sanctions impacted the economic activities in Europe. Any further escalation in the war may further affect the rebound of the economy in Europe.

China, the largest manufacturing hub of world, was facing a crisis in the real estate sector and prices of properties were declining between 2020 - 2023, with the reopening of the economy, consumer demand is picking up again.

Global headline inflation is set to fall from an estimated 6.8% in CY 2023 to 5.8% in CY 2024 and to 4.4% in CY 2025. This fall is swifter than anticipated across various areas, amid the resolution of supply-related problems and tight monetary policies. Reduced inflation mirrors the diminishing impact of price shocks, particularly in energy, and their subsequent influence on core inflation. This decrease also stems from a relaxation in labour market pressure, characterized by fewer job openings, a slight uptick in unemployment, and increased labour availability, occasionally due to a significant influx of immigrants.

The global economy started to rise from its lowest levels after countries started to lift the lockdown in 2020 and 2021. The pandemic lockdown was a key factor as it affected economic activities resulting in a recession in the year CY 2020, as the GDP growth touched -3.3%. In CY 2021 disruption in the supply chain affected most of the advanced economies as well as low-income developing economies. The rapid spread of Delta and the threat of new variants in mid of CY 2021 further increased uncertainty in the global economic environment.

Global economic activities experienced a sharper-than-expected slowdown in CY 2022. One of the highest inflations in decades, seen in 2022, forced most of the central banks to tighten their fiscal policies. Russia's invasion of Ukraine affected the global food supply resulting in a further increment in the cost of living.

Further, despite initial resilience earlier in 2023, marked by a rebound in reopening and progress in curbing inflation from the previous year's highs, the situation remained precarious. Economic activity lagged behind its pre-pandemic trajectory, particularly in emerging markets and developing economies, leading to widening disparities among regions. Numerous factors are impeding the recovery, including the lasting impacts of the pandemic and geopolitical tensions, as well as cyclically driven factors such as tightening monetary policies to combat inflation, the reduction of fiscal support amidst high debt levels, and the occurrence of extreme weather events. As a result, global growth declined from 3.5% in CY 2022 to 3.3% in CY 2023.

Historical GDP Growth Trends

(Source – IMF Global GDP Forecast Release July 2024)

In the current scenario, global GDP growth is estimated to have recorded a moderate growth of 3.3% in CY 2023 as compared to 3.5% growth in CY 2022. While high inflation and rising borrowing costs are affecting private consumption, on the other hand, fiscal consolidation is affecting government consumption.

Slowed growth in developed economies will affect the GDP growth in CY 2024 and global GDP is expected to record a flat growth of 3.2% in CY 2024. The crisis in the housing sector, bank lending, and industrial sectors are affecting the growth of global GDP. Inflation forced central banks to adopt tight monetary policies. After touching the peak in 2022, inflationary pressures slowly eased out in 2023. This environment weighs in for interest rate cuts by many monetary authorities.

GDP Growth Across Major Regions

GDP growth of major regions including Europe, Latin America & the Caribbean, Middle East & Central Asia, and Sub-Saharan Africa, were showing signs of slow growth and recession between 2020-2023, but leaving Latin America & the Caribbean, 2024 is expected to show resilience and growth. Meanwhile, GDP growth in Emerging and Developing Asia (India, China, Indonesia, Malaysia etc.) is expected to decrease from 5.4% in CY 2023 to 5.2% in CY 2024, while in the United States, it is expected to decrease from 2.5% in CY 2023 to 2.1% in CY 2024. Although Europe experienced a less robust performance in 2023, the recovery in 2024 is expected to be driven by increased household consumption as the impact of energy price shocks diminishes and inflation decreases, thereby bolstering real income growth. Meanwhile, India and China saw greater-than-anticipated growth in 2023 due to heightened government spending and robust domestic demand, respectively. Sub-Saharan Africa's expected growth in 2024 is attributed to the diminishing negative impacts of previous weather shocks and gradual improvements in supply issues. Except for Emerging and Developing Asia, Latin America & the Caribbean and the United States, all other regions are expected to record an increase in GDP growth rate in CY 2024 as compared to CY 2023. GDP growth in Latin America & the Caribbean is expected to decline due to negative growth in Argentina. Further, growth in the United States is expected to come down at 2.1% in CY 2024 due to lagged effects of monetary policy tightening, gradual fiscal tightening, and a softening in labour markets slowing aggregate demand.

Global Economic Outlook

At the midpoint of the year, so far in 2024 we have seen divergence in outcomes and prospects around the world in terms of economic growth, inflation, and policy responses. On balance, global short-term economic prospects have improved over the course of the year. We expect this momentum to continue through the second half of 2024 and into 2025 as inflation eases further and monetary policy continues to loosen, supporting steady growth. Macroeconomic risks, in our view, have become more balanced. The U.S. has performed better than other developed economies, particularly those in Europe where the consumer sentiment has been relatively weak – though the picture in Europe has been varied. A sustained recovery in tourism this year has boosted the economies of Greece and Spain, whereas Germany, France, and Italy have been held back by the slower recovery of manufacturing. Nonetheless, the European Central Bank (ECB) lowered the three key interest rates in June – for the first time since September 2019 – which will support stronger regional growth.

Growth in the Chinese Mainland has held up well so far this year despite challenges from the property market amid ongoing rebalancing, and the export cycle is supporting growth in the rest of Asia. In Latin America, larger economies, such as Brazil and Mexico, tend to be performing more moderately than smaller economies, such as Chile and Peru, indicating slower regional growth overall.

Globally, industrial production has been relatively sluggish because of restrictive trade policies, persistent supply chain disruptions, high interest rates, and anemic growth. We expect industrial production to gather steam later this year and into 2025 on the back of a gradual recovery in global trade, stimulated by stronger domestic demand for goods.

Policy responses have diverged so far this year and are set to remain so in the near term. Central banks have begun rate cutting cycles in several developed economies, including the Eurozone, Canada, Sweden, and Switzerland. However not every economy has followed suit. Disinflation has not been as predictable as it was in 2023, and underlying price pressures mean inflation is likely to remain bumpy this year – hence, policy will remain more restrictive than was anticipated at the start of the year. With relatively stronger economic growth and stickier inflation, the timing of the first interest rate cut by the U.S. Federal Reserve (the Fed) and the onward path of interest rates remains ambiguous.

Forecasted GDP Growth across major regions (%)
 (Source-IMF, OECD, and World Bank, D&B Estimates)

The global economy is showing signs of stabilizing, yet growth will remain subdued this year before picking up pace in 2025. We forecast global growth of around 2.5% in 2024, half a percentage point softer than in the decade following the financial crisis. The weaker outlook reflects fiscal consolidation, lagged tight monetary policy, restrictive trade policies, and elevated levels of geopolitical uncertainty. Looking ahead to 2025, global growth is likely to pick up slightly to 2.8% as the impact of these factors declines and stronger growth becomes more entrenched.

Emerging economies look set for softer growth in general this year. On a regional basis, growth is likely to be markedly slower in Eastern Europe, but only slightly softer in Asia Pacific and Latin America, with growth only moderately slower in key economies such as the Chinese Mainland, India, and Brazil. Outcomes in developed economies are also mixed but largely remain subdued because of tight policy settings.

INDIAN ECONOMY

India Macroeconomic Analysis

GDP Growth Scenario

India's economy showed resilience with GDP growing at 8.2% in CY 2023. The GDP growth in CY 2023 represents a return to pre pandemic era growth path. Even amidst geopolitical uncertainties, particularly those affecting global energy and commodity markets, India continues to remain one of the fastest growing economies in the world. There are few factors aiding India's economic recovery – notably its resilience to external shocks and rebound in private consumption. This rebound in private consumption is bringing back the focus on improvements in domestic demand, which together with revival in export demand is a precursor to higher industrial activity.

The capital expenditure of the central government increased by 37.4% increase in capital expenditure (budget estimates), to the tune of INR 10 trillion in the Union Budget 2023-2024. The announcement also included a 30% increase in financial assistance to states at INR 1.3 trillion for capex. The improvement was accentuated further as the Budget 2024-2025 announced an 11.1% increase in the capital expenditure outlay at INR 11.11trillion, constituting 3.4% of the GDP. This has provided much-needed confidence to the private sector, and in turn, attracted private investment.

On the lending side, the financial health of major banks has witnessed an improvement which has helped in improving the credit supply. With capacity utilization improving, there would be demand for credit from the corporate sector to fund the next round of expansion plans. The banking industry is well poised to address that demand. Underlining the improving credit scenario is the credit growth to the micro, small, and medium enterprise (MSME) sector as the credit outstanding to the MSME sector by scheduled commercial banks in the fiscal year 2024 grew by 14% to INR 10.31 trillion compared to INR 9.02 trillion as on 24 March 2023. The extended Emergency Credit Linked Guarantee Scheme (ECLGS) by the Union Government has played a major role in improving this credit supply. As per the provisional estimates 2023-24, India's GDP in FY 2024 grew by 8.2% compared to 7.0% in the previous fiscal on the back of solid performances in manufacturing, mining, and construction sectors. The year-on-year increase in growth rate is also partly due to by a strong growth in investment demand led by public capital expenditure.

Sectoral Contribution to GVA and annual growth trend

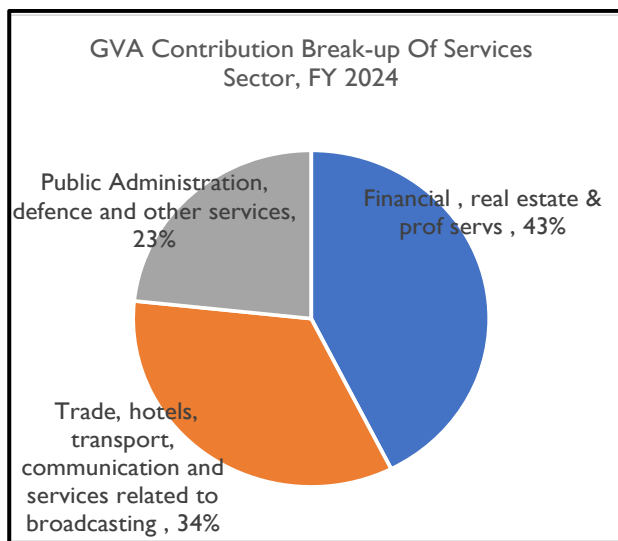

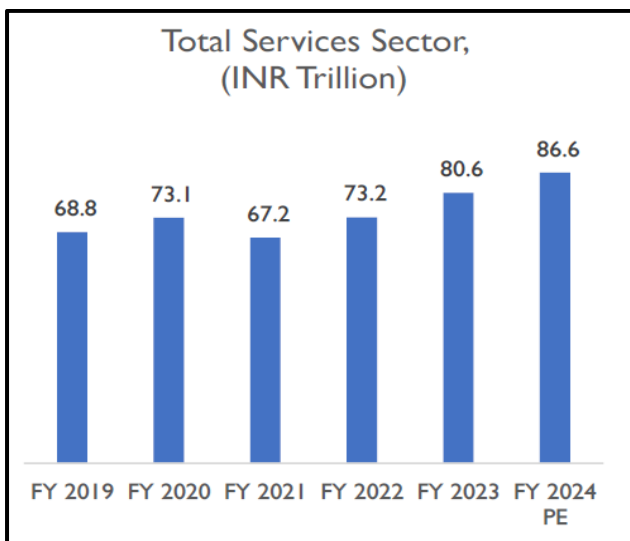

(Source: Ministry of Statistics & Programme Implementation (MOSPI))

Sectoral analysis of GVA reveals industrial sector recovered sharply registering 9.5% y-o-y increase in FY 2024 against 2.1% in the previous fiscal. In the industrial sector, growth across major economic activity such as mining, manufacturing and construction sector rose significantly and it registered a growth of 7.1%, 9.9% and 9.9% in FY 2024 against a y-o-y change of 1.9%, -2.20%, and 9.44% in FY 2023, respectively. Utilities sector observed a marginal moderation in y-o-y growth to 7.5% against 9.44% in the previous years.

Talking about the services sector's performance, with major relaxation in covid restriction, progress on COVID-19 vaccination and living with virus attitude, business in the service sector gradually returned to normalcy in FY 2023. Economic recovery was supported by the service sector as individual mobility returned to the pre-pandemic level. The trade, hotel, transport, communication, and broadcasting segment continued to strengthen in FY 2023 and grow in FY 2024, although the growth hasn't shown substantial increases. In FY 2024, services sector grew by 7.6% against 10% y-o-y growth in the previous year.

Expansion in Service Sector

Services sector is a major contributor to the country's overall economic growth. In absolute terms, services sector GVA has increased from INR 68.78 trillion in FY 2019 to INR 86.6 trillion in FY 2024 (as per the provisional estimated), registering a CAGR of nearly 5%. Within Services sector, the GVA by financial, real estate and professional services-the largest contributing segment observed 6.3% CAGR while Public Administration, defence and other services1 observed 4.5% CAGR and Trade, hotels, transport, communication, and services related to broadcasting witnessed 3.1% CAGR between FY 2019-24.

(Sources: MOSPI, CMIE Economic Outlook and Dun & Bradstreet Research Estimates)

India's HSBC Services Purchasing Managers' Index, an important indicator to track service sector performance, measured 60.3 in July 2024 against 60.5 in the previous month. Since August 2021, the services sector has consistently remained above the threshold of 50, which distinguishes growth from contraction.

Investment & Consumption Scenario

Other major indicators such as Gross fixed capital formation (GFCF), a measure of investments, gained strength during FY 2024 as it grew by 9% on a y-o-y basis against 7% yearly growth in the previous fiscal, while GFCF to GDP ratio measured an all-time high settled higher at 34%.

Capital investment in India trend (Sources: MOSPI)

Private consumption trend in India (PFCE growth)
(Sources: MOSPI)

Private Final Expenditure (PFCE) a realistic proxy to gauge household spending, observed decelerated and registered 4% y-o-y growth in FY 2024 against 7% in FY 2023.

Inflation Scenario

The inflation rate based on India's Wholesale Price Index (WPI) exhibited significant fluctuations across different sectors from March 2023 to July 2024. Overall WPI saw a sharp decline to -1.2% in July 2023, primarily driven by steep drops in Fuel & Power and Manufactured Products, reflecting reduced global demand and falling input costs. However, a recovery was noted by June 2024, with WPI reaching 3.4%, supported by a strong rise in Primary Articles and a rebound in Fuel & Power prices. By July 2024, while Primary Articles growth moderated to 3.1%, the WPI remained positive at 2.0%, indicating stabilization in the market after earlier volatility.

Y-O-Y growth in monthly consumer price indices
(Source: CMIE Economic Outlook)

Retail inflation rate (as measured by the Consumer Price Index) in India showed notable fluctuations between March 2023 and July 2024. Rural CPI inflation peaked at 7.63% in July 2023, before declining to 4.10% in July 2024. Urban CPI inflation followed a similar trend, rising to 7.20% in July 2023 and then dropping to 2.98% in July 2024. Overall, the national CPI inflation rate increased to 7.44% in July 2023 but moderated to 3.54% by July 2024, indicating a gradual easing of inflationary pressures across both rural and urban areas over the period. CPI measured below 6% tolerance limit of the central bank since September 2023. As a part of an anti-inflationary measure, the RBI has hiked the repo rate by 250 bps since May 2022 to the current 6.5% while it has been holding the rate at 6.5% since 8 Feb 2023.

India’s Growth Outlook

India's economy has exceeded expectations, registering an 8.2% growth in FY24. High-frequency indicators such as automobile sales, e-way bills, cargo traffic, and exports signal sustained growth momentum into Q2 FY25. However, the rural demand outlook is tied to the monsoon, where inconsistent rainfall could impact the agriculture sector and inflation. The government is proactively boosting grain storage capacity to mitigate these risks. On the credit front, the Reserve Bank of India (RBI) has kept the policy rate unchanged, with inflation expected to average around 5% in FY25. Despite stable policy rates, lending rates may rise due to the incomplete transmission of earlier hikes, while strong credit growth in the private sector suggests potential capacity expansion. Supply-side challenges persist, particularly in food storage infrastructure. The government has launched a massive initiative to enhance grain storage capacity by 70 million tonnes over the next five years. The recent long-term agreement for operating Iran's Chabahar Port is also set to bolster trade and supply chain resilience.

In terms of trade, India's recent agreements, particularly with the European Free Trade Association (EFTA) and Oman, are opening new markets and opportunities for exports. The proposed mega-distribution hub in the UAE by 2025 will further support India's global trade ambitions, particularly in Africa, Europe, and the US.

Politically, the continuation of the National Democratic Alliance (NDA) government signals sustained reforms, with optimism around labour and land reforms. The government is also taking steps to control retail inflation by managing food prices and import duties. The external environment remains cautious, with geopolitical tensions, particularly in Gaza, posing potential risks to global stability.

Overall, India's short-term growth outlook remains positive, underpinned by strong domestic demand, proactive government measures, and expanding global trade relationships, despite some challenges in the rural economy and supply chain infrastructure.

India’s Projected Economic Growth

India’s real GDP projected growth (in%)
(Source: IMF)

India’s projected GDP growth of 6.8% in 2024, stands out as the fastest among major emerging markets, significantly outpacing China’s 4.6% and Brazil’s 2.2%. This robust growth trajectory is expected to sustain at of 6.5% annually from 2025 to 2029, reflecting strong economic fundamentals and continued momentum. This decent growth momentum in near term (CY 2024) is accompanied by a slowdown in inflation, as well as various other factors in the medium to long term that will support the economy. These include enhancements in physical infrastructure, advancements in digital and payment technology, improvements in the ease of doing business and a higher quality of fiscal expenditure to foster sustained growth.

On the demand side, improving employment conditions and moderating inflation are expected to stimulate household consumption. Further, the investment cycle is gaining traction, propelled by sustained government capital expenditure, increased capacity utilization and rising credit flow. Additionally, there are positive signs of improvement in net external

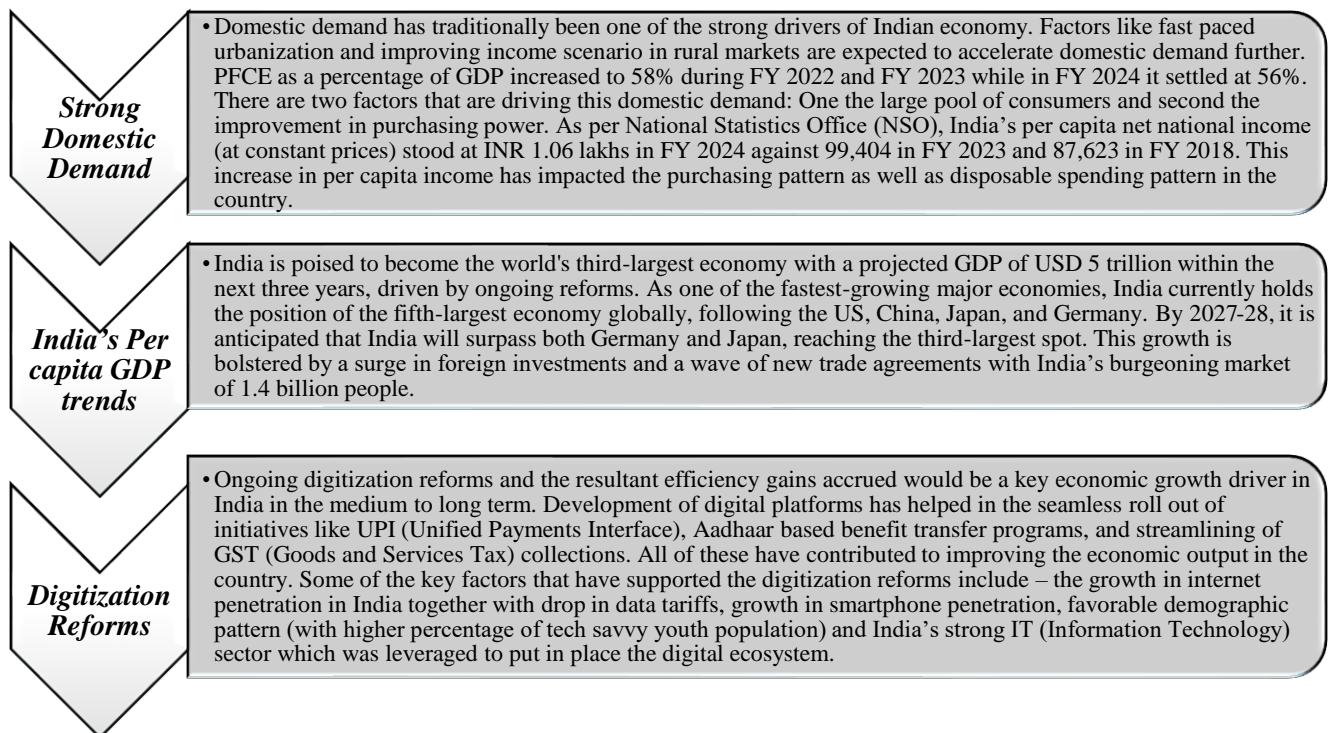

demand, as reflected in the narrowing merchandise trade deficit. Despite the supply disruptions, exports clocked positive y-o-y growth in December 2023 and January 2024.

From uplifting the underprivileged to energizing the nation's infrastructure development, the Government has outlined its vision to propel India's advancement and achieve a 'Viksit Bharat' by 2047 in the interim budget announced on 1st Feb 2024. Noteworthy positives in the budget include achieving a lower-than-targeted fiscal deficit for FY2024 and setting a lower-than-expected fiscal deficit target for FY2025, proposing dedicated commodity corridors and port connectivity corridors, providing long-term financing at low or nil interest rates to the private sector to step up R&D (Research & Development) in the sunrise sectors.

Achieving a reduced fiscal deficit of 5.8% in FY2024 and projecting a lower than-anticipated fiscal deficit of 4.9% as announced in the interim budget in July 2024 for the current fiscal year (FY 2025) are positive credit outcomes for India. This showcases the country's capability to pursue a high-growth trajectory while adhering to the fiscal glide path. There has been a significant boost to capital expenditure for two consecutive years; capital expenditure – which is budgeted at 3.4% of GDP (INR 11.1 trillion/USD 134 billion) for fiscal year 2024-25 – is at a 21-year high (3.3% of GDP in fiscal year 2023-24). The enhancement of port connectivity, coupled with the establishment of dedicated commodity corridors (energy, mineral and cement), is poised to enhance manufacturing competitiveness. This strategic move aims to fulfil India's export targets and reduce logistics costs.

India's optimistic economic outlook is underpinned by its demographic dividend, which brings a substantial workforce that boosts labor participation and productivity. The burgeoning middle class and urbanization contribute to increased domestic consumption, driven by rising incomes and purchasing power. Extensive investments in infrastructure, encompassing roads, railways, ports, and digital connectivity, are enhancing productivity and efficiency, with government initiatives like the Smart Cities Mission and PM Gati Shakti creating a conducive growth environment. This digital transformation, catalyzed by initiatives such as Digital India, is fostering a tech-driven economy marked by enhanced internet penetration, digital payments, and e-governance, thereby fueling growth in sectors like fintech, e-commerce, and digital services. The push to position India as a global manufacturing hub through Make in India and PLI (Production Linked Incentive) schemes is further boosting industrial output, exports, and domestic production capabilities. Compared to other major emerging markets facing demographic and economic challenges, India's combination of demographic strengths, policy reforms, and strategic initiatives positions it as a standout performer and a significant driver of global economic growth in the foreseeable future.

However, India experienced a serious setback in 2020 as spread of Covid-19 pandemic impacted normal life and resulted in 10% y-o-y growth between 2020-22. The retail sector was severely impacted as consumer demand shifted away from discretionary spending. Even demand for essential goods remained constrained as consumer footfalls decreased during the lockdown period in April 2020. The lower disposable income, subdued sentiment and economic uncertainty led to a constrained consumption expenditure, both for essential and non-essential goods.

But later, revival of e-commerce activities since Unlock Phase -1 since June 2020 contributed some pick up in the pent-up demand for both essential and non-essential goods facilitated by digital payments. Also, the swift government action including widespread vaccination and other containment measures helped in restoring economy back to normalcy in the subsequent years. As per Retailers Association of India (RAI), the organized retail sector witnessed a significant growth of 34% in FY 2022-23, surpassing pre-pandemic sales figures of FY2020.

Major Market Segmentation

The segments of FMCG (Fast-Moving Consumer Goods) and Groceries, General Merchandise, Consumer Durables, Fruits and Vegetables, and Garments and Footwear are among the most significant drivers of India's retail industry. The transition to modern retail formats, increasing urbanization, and growing internet penetration are reshaping consumer behaviour in these sectors, making them essential components of India's retail landscape.

Organized Vs Unorganised retail in India and Growth trend in organized retail in India

The unorganized retail sector includes local Kirana stores, owner-operated general stores, convenience stores etc. The unorganized retailing is a highly fragmented segment with per unit space relatively low. However, this segment is too experiencing a significant transformation after the digitization push.

On the other hand, the organized retailers include corporate backed hyper markets / super markets and privately owned large retail businesses which operate with modern retailing format both in offline and online mode. The major factors supporting and accelerating the growth of the organized sector are increasing levels of internet penetration, digital maturity, and developing infrastructure to back online transactions.

The organized retail is gaining ground at a brisk pace in India where a balance is emerging across shopping format that include hypermarkets, supermarket, and other large retail format like specialty store. Major retail chains are expanding their presence beyond metros and Tier-1 cities to tier-2, tier-3 cities and even in tier-4 cities owing to lower rental rates and operating costs. This is translating in to overall increase in nation’s consumer power and benefitting the growth of organised retail in India. As per AT Kearney report, the organised retailing segment was estimated to value at USD 110 Bn in 2022 and is projected to grow to USD 230 Bn by 2030.

Thus, the evolving customer preferences for a safe, contactless, and sophisticated technology enable shopping experience is driving the growth of experiential retail, where the shopping experience is equally important to product sale. Beside above, underlying factor such as rapid urbanization, increasing disposable income, transforming lifestyle, increasing consumerism and supportive regulatory environment are few additional prominent factors that are propelling the growth of organized retail in India. As per, Deloitte India and the Shopping Centre Association of India (SCAI), malls and shopping centres play is projected to grow at 17% CAGR from 2022 to 2028, outpacing the overall growth of the retail industry.

As per industry sources, India is projected to witness the opening of approximately 60 shopping malls, totalling 23.25 million square feet during FY 2023-24.

Key Demand Driver

Urbanization

India, boasting a staggering population exceeding 1.428 billion in 2023, represents about 17.2% of the world's total inhabitants, with a consistent 1.39% annual growth rate over the past 25 years. Furthermore, according to the Handbook of Urban Statistics 2022, India's urban population has been steadily rising, reaching over 469 million in 2021 and is projected to exceed 558 million by 2031, with estimates soaring to over 600 million by 2036.

As the country experiences rapid urban growth, with more people migrating from rural to urban areas, there is a fundamental shift in consumer behaviour and preferences. Urban dwellers typically lead fast-paced lifestyles characterized by hectic work schedules and limited time for traditional shopping practices. This demographic segment values convenience, efficiency, and a seamless shopping experience.

Organized retail stores cater precisely to these urban consumer needs by offering a modern and structured shopping environment for FMCG (Fast-moving consumer goods). These stores are strategically located in urban centers, making them easily accessible to a large population base. Additionally, organized retail outlets leverage their scale and operational efficiencies to stock a wide range of products, from FMCG daily essentials to specialty items, thereby providing consumers with a one-stop destination for their shopping needs.

Changing consumer preferences

Changing consumer preferences play a crucial role in driving the demand for organized Fast-moving consumer goods (FMCG) retail stores in India. One of the key aspects of these changing preferences is the shift towards cleanliness, hygiene, and well-organized shopping environments. Organized retail stores excel in this aspect by maintaining high standards of cleanliness, ensuring neat aisles, and providing a pleasant ambiance for shopping. This focus on cleanliness is particularly important in the current global context, where health and safety considerations have become paramount.

Additionally, organized retail stores are designed to optimize space, display FMCG products attractively, and provide clear signage for easy navigation. This organized layout enhances the overall shopping experience, making it more convenient and enjoyable for consumers. Moreover, organized stores often categorize products logically, making it easier for shoppers to find what they need quickly.

Increase in disposable income

As people's incomes rise, they have more money available for discretionary spending, including on FMCG groceries and other products retail items. This increase in disposable income enables consumers to afford the convenience and premium offerings often found in organized retail outlets.

With higher incomes, consumers place greater value on time-saving benefits and convenience. Organized retail shops and supermarkets offer a wide range of products under one roof, saving customers the time and effort of visiting multiple stores. Additionally, these outlets often provide services like home delivery, online ordering, and loyalty programs, further enhancing convenience for busy consumers.

Quality Assurance

Quality assurance is a crucial factor that drives demand for organized retail shops and supermarkets in India. Consumers are increasingly concerned about the authenticity, safety, and overall quality of products they purchase. Organized retail outlets play an important role in meeting these expectations by implementing robust quality control measures throughout their supply chains.

One key aspect of quality assurance is the sourcing of products from reputable suppliers and brands. Organized retail shops and supermarkets often have partnerships with well-known manufacturers and distributors, ensuring that the FMCG products they offer are genuine, of high quality, and compliant with industry standards and regulations. This gives consumer's confidence in the products they buy and reduces the risk of purchasing counterfeit or substandard items.

Furthermore, organized retailers invest in maintaining the freshness and integrity of perishable goods such as fruits, vegetables, dairy products, meats and FMCG Products. They adhere to strict storage, handling, and refrigeration standards to preserve the quality and nutritional value of these items. This focus on freshness and quality sets organized retail apart from traditional unorganized stores, attracting discerning consumers who prioritize product quality.

In addition to product quality, organized retail outlets also prioritize customer service and satisfaction. They often have well-trained staff who can provide information about products, assist with inquiries or issues, and ensure a pleasant shopping experience. This emphasis on customer-centric services enhances the overall perceived quality of the retail outlet and encourages repeat business from satisfied customers.

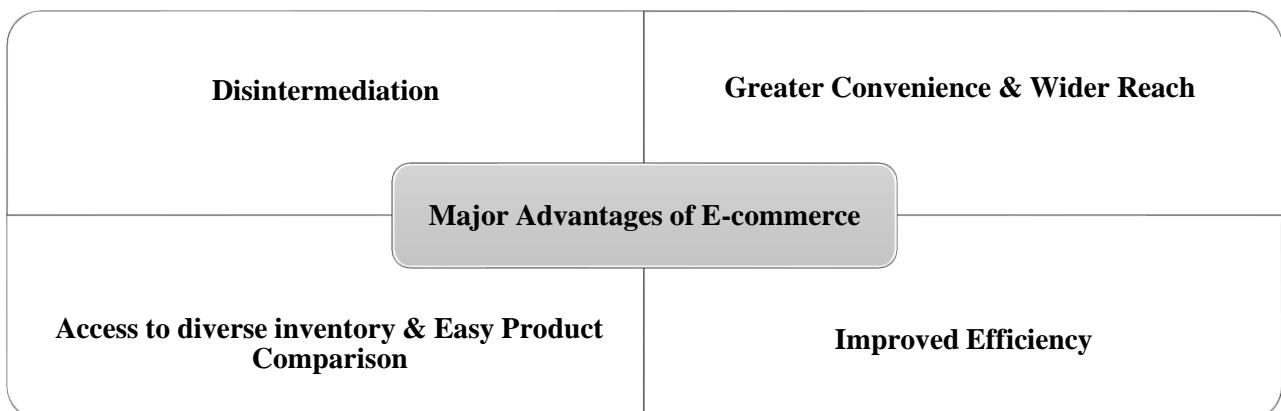

E-Commerce and its impact on the Indian Retail Sector

E-commerce industry has exhibited significant transformation in terms of scope of products/service delivered over the just a click of button. Indian e-Commerce industry has steadily grown riding on a booming internet subscriber base and smartphone users complimented by better connectivity and availability of cheap data services apart from the country’s favourable demographics. Access to large population base particularly having young aspirational population age between 15-34 years, income growth, rising urbanization and increasing in working women segment, are few of the favourable demographic factors that have propelled the e-commerce industry growth in India.

But its share increased significantly to 9% during 2022 and is likely to accelerate further to 17% by 2030 as most business is embracing digitization to reach out and service their customers. The total e-commerce market (GMV) is projected to grow to USD 350 Bn by 2030. The retail brands are putting conscious effort on increasing their online presence and direct sales as customers continue to shop online. Now, corporates are harnessing digital platforms not only to sell but also to promote their brand and engage with consumers.

Growing Demand from Tier 2 and Tier 3 cities

The growing demand from tier 2 and tier 3 cities is a significant driver of the increased popularity and demand for organized retail shops and supermarkets in India. Tier 2 and tier 3 cities are experiencing rapid urbanization, economic growth, and infrastructure improvements, leading to changes in consumer behaviour and preferences.

One key factor contributing to the demand from these cities is the rising middle-class population with increasing disposable incomes. As incomes rise in tier 2 and tier 3 cities, consumers have more purchasing power and a growing appetite for FMCG products convenience, and a modern shopping experience. Organized retail outlets are well-positioned to meet these evolving consumer needs by offering a wide range of branded products, superior quality, and convenient services under one roof.

This accessibility and availability of products contribute significantly to the growing demand for organized retail in tier 2 and tier 3 cities.

Growth Forecast

The resumption in retail activity – as the spread of pandemic was brought under control – have helped in reviving the sale of various consumer product. With restrictions being lifting, demand for all consumer products witnessed revival as pent-up demand kicked. However, inflationary pressures impacted post-pandemic spending recovery in FY 2023 but the same is expected to bounce back as inflation exhibited some moderation in FY 2024 and support the overall retail industry growth in FY 2024.

In long term, harnessing the advantage of a large and diverse population base, India is steadily evolving as a consumer driven economy where such large population base of 1.43 Bn is hard to ignore by global and domestic retailers. As the country socio-economic transformation continues, India is witnessing an expanding presence of leading international and consumer retail brand making their way in organized retail segment These brands are continuously striving for innovations, supported by data-driven insights of consumer preference analysis.

Traditionally, the Indian retail basket has been dominated by essentials like Fast-moving consumer goods (FMCG). Future growth in this segment growth hinges on personalization, with retailers leveraging data analytics and prescriptive algorithms to enhance customer experiences. Tailored services such as personalized cart preparation, streamlined checkout processes, and direct delivery of out-of-stock items are crucial for customer retention. Moreover, agility, adaptability, and investment in omnichannel capabilities are imperative for success in the rapidly evolving grocery retail landscape. Retailers must prioritize upskilling, digital infrastructure development, and building robust supply chain networks to thrive, remain competitive, and ensure long-term profitability in the dynamic retail environment.

Additionally, supportive regulatory landscape and several schemes launched by the government to enhance the farm income have made consumer retail product especially FMCG products more affordable and finding increasing penetration in rural sector. In the FMCG sector, Government’s initiatives to improve supply chain for transportation of perishable commodities reduce wastages and increase processing level of food products will also help the Food and retail sector to grow.

Going forward, a shift towards discretionary spending on categories like apparel, electronics, and personal care products will be observed. The retail basket will see an increase in discretionary spending categories. This presents an opportunity for retailers to cater to evolving consumer preferences and introduce new product lines. India's young population (over 65% under 35) is driving a rise in disposable incomes. According to industry report, household spending in India is expected to reach USD 3.6 trillion by 2025. This growing disposable income will translate into increased consumer spending, creating a larger market for the retail sector. Additionally, the expanding middle class will fuel demand for a wider variety of products beyond basic necessities.

In the light of abovementioned factor, India’s retail market overall retail industry is expected to grow to USD 2 trillion by 2032, growing at 10.3% CAGR between 2022-32.

Threat & Challenges

- ❖ **Unorganized Markets:** The predominance of unorganized retail in India, lacking standard processes and scalability, poses a significant challenge to large retailers. Small and medium-sized outlets continue to attract customers due to their accessibility and personalized services.

- ❖ **High Supply Chain Costs:** A fragmented supply chain, compounded by the involvement of middlemen, escalates costs for organized retailers. This affects their pricing competitiveness, especially when local stores offer similar products at lower prices.
- ❖ **Maintenance Expenses:** Organized retail incurs high operational costs, including rent, utilities, and salaries for large teams, which smaller retailers manage more efficiently. This cost disparity can impact profitability.
- ❖ **Consumer Mindset:** Indian consumers exhibit strong loyalty toward neighbourhood stores, which offer a sense of trust and familiarity. Changing these ingrained preferences requires sustained engagement and superior value delivery.
- ❖ **Lack of Personalization:** While small retailers excel in offering personalized recommendations, larger retail formats often lack this human touch, diminishing their appeal to customers who value customized shopping experiences.
- ❖ **Technological Adaptation:** The rise of e-commerce has transformed retail, and brands need to adopt a strong digital presence to remain competitive. Integrating technology in production processes, inventory management, and digital marketing is essential, but smaller brands may lack the resources for such investments. Moreover, the fast-evolving tech landscape requires ongoing innovation, pushing companies to continuously invest in new tools, from customer analytics to augmented reality experiences, to keep up with consumer expectations.

Despite these challenges, the Indian retail sector holds immense potential for growth, driven by technological adoption, evolving consumer behaviour, and government support. Addressing these hurdles will be key to sustaining growth and fostering a balanced ecosystem that benefits both organized and unorganized retail players.

MISSION, VISION AND VALUES:

BUSINESS OVERVIEW

City Square Mart is a brand owned by our company Jay Ambe Supermarkets Private Limited. our journey began in August 2018 with the establishment of our first store in Kudasana, Gandhinagar. In just six years, the company expanded to 17 stores across Gujarat, establishing itself as a fast-growing retail chain in the region.

The origins of our company trace back to June, 2016, when M/s Jay Ambe Trading was established as a partnership firm and lately our promoters Mr Jignesh Amratbhai Patel, Mr Rutwikumar Maganbhai Patel, Mr Bhikhabhai Shivdas Patel and Mr Harshal Daxeshkumar Patel along with other three partners joined the firm as new partners vide an alteration deed executed as on July 02, 2018 making the total partners of the firm to ten. After incorporation of our company on November 23, 2020, we took over the business of the firm Jay Ambe Trading vide a Business Sale and Purchase Agreement dated January 25, 2021, leading to the full transfer of all assets and liabilities of the firm to the company.

Our company is engaged in the business of trading of FMCG material, grocery, Home Textile, Home Décor, Cloths, or Apparels, Toys, Gift Articles, Footwear and other house hold items, via supermarkets.

The Company is carrying on its business through retail marts via franchise model as well. A franchise is a type of license that grants a franchisee access to a franchisor's proprietary business knowledge, processes, and trademarks, thus allowing the franchisee to sell a product or service under the franchisor's business name. In exchange for acquiring a franchise, the franchisee usually pays the franchisor an initial start-up fee and annual licensing fees. The relationship between the franchisor and franchisee is governed by the franchise agreement. There are essentially three different types of business models:

- Company Owned Company Operated – COCO
- Franchise Owned Company Operated – FOCO
- Franchise Owned Franchise Operated – FOFO

The FOCO franchise model, short for Franchise-Owned, Company-Operated, is a unique approach to franchising where the franchisee owns the business, but the franchisor handles the day-to-day operations. This model combines the investment benefits of franchise ownership with the operational expertise of the franchisor. In FOCO model, Company receives percentage of sales which is based on per sqft sales as a franchisee revenue from Franchisor per month.

The FOFO (Franchise Owned Franchise Operated) model allows a franchise investor to own and operate a store under a brand's name for a non-refundable franchise fee for a specified duration. The brand sets the prices and merchandise, while the franchisee bears all operational costs. In return, the franchisee must also pay a royalty amount, which is a percentage of the store's revenue, to the brand.

Our business model dwells on lease rental model, as we focus to secure retail spaces which ensures high visibility and easy accessibility to customers.

City Square Mart has a strong presence in Gujarat with multiple store outlets situated at various locations across the state. Out of our total 17 stores at present, 10 stores are owned and operated by the company while 7 stores are Franchise Stores situated at Amin Marg (Rajkot), Bhuj, Mavdi (Rajkot), Mehsana, New Chandkheda and Ognaj. Among these 7 stores, the Bhuj and New Chandkheda follows the FOCO (Franchise Owned, Company Operated) model, while the remaining outlets are managed under the FOFO (Franchise Owned, Franchise Operated) model, reflecting the company's diverse approach to business operations in the region.

1. Strong Vendor Relationships: -

Expanding on the company's strong vendor relationships, these partnerships go beyond mere business transactions. By fostering long-term alliances with over 1700 direct manufacturers and suppliers spread across India, the company creates a robust supply chain. These strategic partnerships are built on mutual trust and cooperation, allowing the company to secure access to high-quality products. This reliable supply chain ensures that the company can consistently meet customer demands without compromising on the quality of the products offered. Furthermore, the extensive network of vendors provides the company with leverage to negotiate better prices, which in turn helps maintain competitive pricing for customers.

Additionally, the diverse range of products sourced through these vendor relationships enables the company to cater to a wide array of customer preferences. Whether it's everyday essentials or niche items, the company can offer a broad selection of products, ensuring that customers find what they need. This variety not only enhances customer satisfaction but also positions the company as a one-stop-shop for diverse shopping needs.

2. Wide Range of Products:

The company takes pride in offering an extensive range of products that cater to a wide variety of customer needs and preferences. This comprehensive product portfolio includes Fast-Moving Consumer Goods (FMCG), toys, artificial jewellery, crockery, apparel, household items, and more. By stocking such a diverse array of products, the company can attract a broad and varied customer base, ensuring that shoppers can find products of their daily needs under one roof. This helps us build brand recognition and customer loyalty.

One of the key benefits of having such a wide range of products is the ability to meet the needs of different customer segments. For example, families can purchase groceries and household items, while fashion-conscious shoppers can explore the latest trends in apparel and artificial jewellery. This versatility helps the company appeal to a diverse audience, increasing foot traffic and customer retention.

Additionally, this extensive product range opens up numerous opportunities for cross-selling and up-selling. Cross-selling involves recommending complementary products to customers based on their initial purchase. For instance, a customer buying crockery might be interested in purchasing matching table linens or kitchen gadgets. Up-selling, on the other hand, involves encouraging customers to buy a higher-end version of a product they are considering. For example, a customer looking at basic apparel might be persuaded to buy a premium line with better quality and features.

When customers know that they have the option to return or exchange products easily, their hesitation during purchases is significantly reduced. This peace of mind encourages them to make purchases with confidence, knowing that they are not taking a risk if the product does not meet their expectations.

One of the key benefits of a customer-friendly refund policy is the enhancement of customer satisfaction. When customers have a positive experience with returns or exchanges, they are more likely to view the company favourably. - Home Delivery Services:** Offering delivery options for online orders caters to busy customers who prefer the convenience of having groceries delivered to their doorstep within the vicinity of 5 kms of our stores.

In order to create our brand presence and to create awareness of our product portfolio and stores, we engage in various marketing and promotional campaigns. Our key marketing initiatives are summarized below:

- The business of our Company is seasonal in nature and experiences two major seasons, the Indian festival season and the summer season. It is crucial for our business operations that we capitalise the market opportunities offered in these seasons and therefore, we market and advertise mostly in prominent media about our products and the prevailing offers on them. We also invest in marketing activities specific to certain days/ events by advertising our products and stores in multiple channels for a shorter duration.
- We consider our store launches as the most prominent time to capture the attention of our local customer base and to further this strategy, we use various advertising channels to reach out to them.

- c) We organise marketing events during Indian festivals like Dusshera and Diwali by organising different contests in which a customer can win cash prizes and other offers. During this contest, we provide our customers with offers where they can enter into a lucky draw. We often invite a celebrity or a publicly known personality to draw the name of the winner from the dropbox.

Details of our Marketing expenses for the last three fiscals is provided below:

Particulars	Financial Year		
	2025	2024	2023
Advertisement expenses	28.90	25.70	20.78
Total other expenses	509.37	427.41	341.50
Percentage of Total other expenses (%)	5.67%	6.01%	6.08%

The quality of our products and our associations with renowned brand partners is also a key marketing technique. We believe that our innovative marketing techniques acts as a driving force for our growth and building our brand name in the market.

Our sourcing capability, efficient logistics network and robust technological infrastructure have enabled us to deliver on our value retailing promise and create a brand presence among our customers and brand partners. Our core competencies lie in our efficient inventory management which complements our logistics network.

COMPETITION:

We face strong competition from local kirana shops, supermarkets, national retail chains, and e-commerce platforms. Direct competitors offer competitive pricing, discounts, and wide product ranges, while e-commerce platforms provide the convenience of home delivery. Malls and shopping centres also attract customers with integrated shopping experiences. To stay competitive, City Square Mart needs to focus on pricing, product variety, and enhanced customer experiences through loyalty programs and personalized services to build strong relationships with local consumers. For details of our listed peers, please refer the Section '*Basis of Issue Price*' on page 115 of this Red Herring Prospectus.

We believe that the principal factors affecting competition in our business include relative quality, technical competence, client relationships, reputation, the abilities of employees, market focus, Pricing and timely delivery of the products and services. We believe that our cost effective and integrated offerings, our focus on customer satisfaction and our reliability combined with our quality consciousness, provide us with a competitive advantage in our business.

EXISTING CAPACITY AND CAPACITY UTILISATION:

Being in retail business segment, the details of existing capacity and capacity utilisation are not applicable to our company's business.

UTILITIES AND INFRASTRUCTURES:

- a) **Material/products** - Timely supply of products is one of the most crucial elements of serving our client's needs satisfied timely. The material requirement of our company depends on the market trend, customer requirements in general and specific requirements of our clients in the area of operation of our stores. All of our purchases are governed from the head office of the company through direct contact with approved manufacturers/vendors to ensure timely supply of required products/materials as per specifications and as per demand from the customers. We maintain the stock of our goods in our stores using SKU coding systems. SKU stands for "stock keeping unit". It's a unique code that retailers use to identify and track products in their inventory. SKUs are often used as barcodes or QR codes.

We have categorized all of our SKUs in core and noncore categories and department wise in our software. Core category includes FMCG, DAIRY, FROZEN & FRESH FOODS, GROCERY, STAPLES ETC. all the products in FMCG comes with unique barcode (EAN no.) for each SKU and our software considers each EAN as separate SKU for billing, reports, data analysis etc. i.e. Colgate 500gm. Strong teeth will have separate and unique barcode on the product which can never be changed and we use the same on permanent basis. Whereas our noncore category includes rest of the departments like house hold, home textile, garments, footwear, bed & bath, toys & luggage. Products in all of these departments rarely come with unique barcode from the brand or company, so for all of these products our backend team creates our own unique code which can never be changed. Same as FMCG all of these barcodes works as separate SKUs to produce reports, data analysis and billing purpose.

- b) **Power** – Our Company requires power for the normal requirement of the Office and our small and/or mid-size stores for lighting, computers etc. Our bigger retail marts require separate high voltage connection. The company has

adequate power connection in place. The company's present power requirement is being sourced through power sanctioned by Uttar Gujarat Vij Company Limited and Torrent Power Limited.

- c) **Water** – Water requirement at our retail stores for washing and other purposes are fully met at the existing premises by internal supply from borewells.
- d) **Manpower** - We believe that our ability to maintain growth depends to a large extent on our strength in attracting, training, motivating and retaining employees. As on December 31, 2024 we have 110 employees on our payroll.

A. CORE BUSINESS/TRADE RELATED LAWS

Food Safety & Standards Act, 2006 [“Food Act”]

Food Safety and Standards Act, 2006 is an integrated law that seeks to consolidate the laws relating to food and establish the Food Safety and Standards Authority of India (FSSAI).

It lay down science-based standards for articles of food and regulates their manufacture, storage distribution, sale and import, to ensure availability of safe and wholesome food for human consumption and for matters connected therewith or incidental thereto.

The Food Act seeks to harmonise Indian standards with international standards like CODEX and facilitates international trade in food articles. Under Section 31 of the Food Act, no person may carry on any food business except under a license granted by the FSSAI. The Food Act sets forth the requirements for licensing and registering food businesses in addition to laying down the general principles for safety, responsibilities and liabilities of food business operators.

The Enforcement of the Food Act is generally facilitated by ‘state commissioners of food safety’ and other officials at local level.

Under section 51 of the Food Act, any person who manufactures sub-standard food for human consumption is liable to pay a penalty which may extend up to Rs. 5.00 lakh. The Food Act has defined sub-standard food as an article of food which doesn’t meet the specified standards but not so as to render the article of food unsafe.

The provisions of the Food Act require every distributor to be able to identify any food article by its manufacturer, and every seller by its distributor that should be registered under the Food Act and every entity in the sector is bound to initiate recall procedures if it finds that the food marketed by the entity has violated specified standards. Food business operators are required to ensure that persons in their employment do not suffer from infectious or contagious diseases. The Food Act also imposes liabilities upon manufacturers, packers, wholesalers, distributors and sellers requiring them to ensure that inter alia unsafe and misbranded products are not sold or supplied in the market.

In order to address certain specific aspects of the Food Act, the FSSAI has framed several regulations such as the following:

- a) Food Safety and Standards (Contaminants, Toxins and Residues) Regulations, 2011;
- b) Food Safety and Standards (Food Products Standards and Food Additives) Regulations, 2011;
- c) Food Safety and Standards (Licensing and Registration of Food Businesses) Regulation, 2011;
- d) Food Safety and Standards (Packaging and Labelling) Regulations, 2011; and
- e) Food Safety and Standards (Prohibition and Restrictions on Sales) Regulations, 2011.

- f) Food Safety and Standards (Laboratory and sampling analysis) Regulations, 2011.

In addition to the six principal regulations as stated above, notified on 1st August 2011, following new regulations are notified. These include:

- a) Food Safety and Standards (Food or Health Supplements, Nutraceuticals, Foods for Special Dietary Uses, Foods for Special Medical Purpose, Functional Foods and Novel Food) Regulations, 2016
- b) Food Safety and Standards (Food Recall Procedure) Regulation, 2017
- c) Food Safety and Standards (Import) Regulation, 2017
- d) Food Safety and Standards (Approval for Non-Specified Food and Food Ingredients) Regulations, 2017.
- e) Food Safety and Standards (Organic Food) Regulation, 2017.

The Central Government has also framed the Food Safety and Standards Rules, 2011 (the “FSSR”) which have been operative since August 5, 2011. The FSSR provides the procedure for registration and licensing process for food business and lays down detailed standards for various food products. The FSSR also sets out the enforcement structure of ‘commissioner of food safety’, ‘the food safety officer’ and ‘the food analyst’ and procedures of taking extracts, seizure, sampling and analysis.

The Food Safety and Standards (Food Products Standards and Food Additives) Regulations, 2011 (the “Regulation”)

These Regulation lists various additives, which are recognised as suitable to be added in foods and have been assigned the label of ‘Acceptable Daily Intake’ or on the basis of other criteria mentioned in the Regulation, have been considered as safe for intake. The use of additives is required to be made in accordance with the principles of Good Manufacturing Practice (“GMP”) which includes limiting the quantity of the food additive to a level which is necessary to accomplish the desired effect whilst ensuring that the additive is of appropriate food grade quality and handled in the same way as the food ingredient. The Regulations provides for specifications regarding the use of various anti-caking agents, bulking agents, emulsifying agents and stabilizing agents, among other substances.

Legal Metrology Act, 2009(“Legal Metrology Act”)

The Legal Metrology Act came into effect on January 14, 2010 and has repealed and replaced the Standards of Weights and Measures Act, 1976 and the Standards of Weights and Measures (Enforcement) Act, 1985. The Legal Metrology Act seeks to establish and enforce standards of weights and measures, regulate trade and commerce in weights, measures and other goods which are sold or distributed by weight, measure or number and for matters connected therewith or incidental thereto. The Legal Metrology Act provides that for prescribed specifications for all weights and measures used by an entity to be based on metric system only. Such weights and measures are required to be verified and re-verified periodically before usage. Under the provisions of the Legal Metrology Act, pre-packaged commodities are required to bear statutory declarations and entities are required to obtain a registration of the instruments used before import of any weight or measure. Approval of model is required before manufacture or import of any weight or measure. Without a license under the Legal Metrology Act, weights or measures may not be manufactured, sold or repaired.

Legal Metrology (Packaged Commodities) Rules, 2011 (the —Packaged Commodities Rules)

The Packaged Commodities Rules were framed under Section 52(2) (j) and (q) of the Legal Metrology Act and lays down specific provisions applicable to packages intended for retail sale, whole sale and for export and import. A —pre -packaged commodity| means a commodity which without the purchaser being present is placed in a package of a pre-determined quantity. The key provisions of the Packaged Commodities Rules are:

- It is illegal to manufacture, pack, sell, import, distribute, deliver, offer, expose or possess for sale any pre -packaged commodity unless the package is in such standard quantities or number and bears thereon such declarations as prescribed;
- All pre-packaged commodities must conform to the declarations provided thereon as per the requirement of Section 18(1) of the Legal Metrology Act; and
- No pre-packaged commodity shall be packed with error in net quantity beyond the limit prescribed in the first schedule of the Packaged Commodity Rules.

The Prevention of Food Adulteration Act, 1954 and rules thereunder

The Prevention of Food Adulteration Act, 1954 (“Prevention of Food Adulteration Act”) regulates the quality of food manufactured in India by specifying set standards on various articles of food. The Prevention of Food Adulteration Act proscribes the manufacture for sale, storage, sale, distribution or import of certain articles of food into India including any adulterated or misbranded food. It further empowers the food inspector to sample articles of food from persons selling, conveying, delivering or consigning the said food. The Prevention of Food Adulteration Act further provides for imprisonment of not less than 6 months which may be extended to 3 years or a fine of Rs 1,000 for contravention of the provisions therein.

Essential Commodities Act, 1955

The Essential Commodities Act, 1955 vests Government of India with the authority to issue notifications for controlling the production, supply and distribution of certain essential commodities, which include seeds.

The ECA was enacted in 1955, and has since been used by the Government to regulate the production, supply, and distribution of a whole host of commodities that it declares ‘essential’ in order to make them available to consumers at fair prices. Additionally, the government can also fix the minimum support price (MSP) of any packaged product that it declares an “essential commodity”. This act was modified by the Essential Commodities (Amendment) Act, 2020 as part of the 2020 Indian farm reforms.

The Amended law allow the Government of India to delist certain commodities as essential, allowing the government to regulate their supply and prices only in cases of war, famine, extraordinary price rises, or natural calamities. The commodities that have been deregulated are food items, including cereals, pulses, potato, onion, seeds, and oils. These can only be regulated in the extraordinary circumstances previously mentioned, by imposing limits on the number of stocks of such items that can be held by persons. The law states that government regulation of stocks will be based on rising prices, and can only be imposed if there is a 100% increase in retail price (in the case of horticultural produce) and a 50% increase in retail price (in the case of non-perishable agricultural food items). These restrictions will not apply to stocks of food held for public distribution in India.

The Companies Act plays the balancing role between these two competing factors, namely, management autonomy and investor protection.

The definition of “consumer” has been expanded under the Consumer Protection Act to include persons engaged in offline or online transactions through electronic means or by tele-shopping or direct-selling or multi-level marketing. One of the substantial changes introduced by Consumer Protection Act is inclusion of the e-commerce industry under Consumer Protection Act with “e-commerce” defined to refer to the buying and selling of goods or services over digital or electronic network. It amalgamates and subsumes four imperative labour laws - the Payment of Wages Act, 1936; the Minimum Wages Act, 1948; the Payment of Bonus Act, 1965 and the Equal Remuneration Act, 1976. The date of implementation of the Code is yet to be notified.

SIGNIFICANT FACTORS AFFECTING OUR RESULTS OF OPERATIONS AND FINANCIAL CONDITION

Our results of operations and financial condition are affected by a number of important factors including:

Availability of Commercial Real Estate

As of the date of this Red Herring Prospectus, our company operates through 17 stores of which 10 is on COCO (Company owned, Company operated) Model and 07 is on Franchise Model with mix of FOCO (Franchise Owned, Company Operated) model, while the remaining outlets are managed under the FOFO (Franchise Owned, Franchise Operated) Model. Further, we are planning to acquire new stores at Lunawada and Mansa from the Net Issue Proceeds. These new stores will be operated on COCO Model. Our ability to increase our sales and our profitability is directly affected by the total number of stores we operate. Most of our stores operate from premises which we either own or have acquired on a long-term leasehold basis.

Our ability to continue to secure densely populated residential neighborhood locations is a key factor in our success. As we expand our store network, we will need to secure more locations that meet our business needs whether on an ownership, long-term leasehold or rental basis, as we determine on a case-by-case basis. We have no control over future increases in real estate prices. If real estate prices increase, we will require greater capital to buy land or incur higher operational costs due to higher leasing or rental costs.

If there is limited availability of real estate in the future, competition for such real estate may increase which may result in a further increase in prices. This may lead to delays and cost overruns in opening new stores.

Our Ability to Attract New Consumers and Retain Existing Consumers

Our product assortment and consumer-centric approach aims to fulfil the daily and aspirational requirements of our consumers with a focus on variety, affordability, quality and convenience. The continued growth of our business relies on our ability to attract new consumers and retain existing consumers. We aim to do so by ensuring the consistent quality, affordability and variety of our products, and a convenient shopping experience to our consumers. This has also helped us build consumer trust and appeal.

We maintain quality control protocols for our vendor relationships, including thorough inspections and testing for raw materials and finished goods. Additionally, we have a network of pre-approved suppliers for the procurement of raw materials required for the manufacturing of our products. We also remain committed to ensuring ease of convenience to our consumers. For convenience of our consumers, our stores are located in visible and easily accessible locations across India with consistent store layouts that are easy to navigate.

Our Existing Store Presence and the Growth in the Number of our Stores

Since establishing the company in November, 2020, we have expanded our network to a total of 17 stores as of the date of this Red Herring Prospectus. We have expanded our store network from 10 stores in Fiscal 2023 to 15 stores in in Fiscal 2025. Our total revenue increased at a Compounded Annual Growth Rate (CAGR) of 20.36% between Fiscal 2023 and 2025 and an important factor in this revenue growth has been the continued expansion of our store network.

Furthermore, our revenue growth can vary according to the level of maturity of our stores. The revenue a store generates depends on its stage of operation. Generally, revenue generated by a new store is lower at its initial stage of operation and tends to increase after the first few years of operation as the store gains customer loyalty and market recognition. Following this initial stage, growth in the revenue of a store will also depend on various factors such as the level of customer traffic, quality of store management, extent of redecoration and renovation, and rate of growth in the local economy.

Urbanization

India, boasting a staggering population exceeding 1.428 billion in 2023, represents about 17.2% of the world's total inhabitants, with a consistent 1.39% annual growth rate over the past 25 years. Furthermore, according to the Handbook of Urban Statistics 2022, India's urban population has been steadily rising, reaching over 469 million in 2021 and is projected to exceed 558 million by 2031, with estimates soaring to over 600 million by 2036.

As the country experiences rapid urban growth, with more people migrating from rural to urban areas, there is a fundamental shift in consumer behaviour and preferences. Urban dwellers typically lead fast-paced lifestyles characterized by hectic work schedules and limited time for traditional shopping practices. This demographic segment values convenience, efficiency, and a seamless shopping experience.

Organized retail stores cater precisely to these urban consumer needs by offering a modern and structured shopping environment for FMCG (Fast-moving consumer goods). These stores are strategically located in urban centers, making them easily accessible to a large population base. Additionally, organized retail outlets leverage their scale and operational efficiencies to stock a wide range of products, from FMCG daily essentials to specialty items, thereby providing consumers with a one-stop destination for their shopping needs.

Changing consumer preferences

Changing consumer preferences play a crucial role in driving the demand for organized Fast-moving consumer goods (FMCG) retail stores in India. One of the key aspects of these changing preferences is the shift towards cleanliness, hygiene, and well-organized shopping environments. Organized retail stores excel in this aspect by maintaining high standards of cleanliness, ensuring neat aisles, and providing a pleasant ambiance for shopping. This focus on cleanliness is particularly important in the current global context, where health and safety considerations have become paramount.

Additionally, organized retail stores are designed to optimize space, display FMCG products attractively, and provide clear signage for easy navigation. This organized layout enhances the overall shopping experience, making it more convenient and enjoyable for consumers. Moreover, organized stores often categorize products logically, making it easier for shoppers to find what they need quickly.

Increase in disposable income

Higher disposable incomes among consumers in India have a significant impact on the demand for organized retail shops and supermarkets. As people's incomes rise, they have more money available for discretionary spending, including on FMCG groceries and other products retail items. This increase in disposable income enables consumers to afford the convenience and premium offerings often found in organized retail outlets.

With higher incomes, consumers place greater value on time-saving benefits and convenience. Organized retail shops and supermarkets offer a wide range of products under one roof, saving customers the time and effort of visiting multiple stores. Additionally, these outlets often provide services like home delivery, online ordering, and loyalty programs, further enhancing convenience for busy consumers.

Product Assortment

We offer an extensive range of products in a number of categories at our stores including Foods, Non-Foods (FMCG) and General Merchandise & Apparel. We strive to provide products at value for money for our customers and to respond to the needs and tastes of our customers by optimising the range of products we offer in order to attract and maintain a large base of customers. We focus on providing our customers with basic, everyday products rather than luxury products or those which require discretionary spending. Our success in part depends upon our continued ability to understand evolving customer trends and accordingly achieving the correct product assortment. We will continue to manage the changing requirements of our customers by changing our product assortment, as necessary. Changes in the assortment of products we sell can impact our sales and operating profit and our profit margins also may vary across different product categories and different product sub-categories within each category.

Operational Expenses and Costs

Most of our stores are operated from premises we either own or have acquired on a long-term leasehold basis. For those stores where we pay rentals, we will continue to be affected by any future rental increases. Furthermore, when our current leases expire we will need to re-negotiate these leases with the relevant lessors, who may seek to impose higher costs or more onerous conditions on us.

Our store operating costs include, among others, human resource costs, utilities, and maintenance. These costs and expenses can fluctuate and also differ from store to store depending on a variety of factors. For example, regulations affecting manpower costs such as rules relating to minimum wages, may also vary from state to state. The details of our operational cost for the Fiscal 2025, 2024 and 2023 is provided below:

Particulars	For the fiscal ended		
	2025	2024	2023
Rent Expenses	305.43	193.76	151.98
Electricity Expenses	73.18	76.53	54.35
Repair and Maintenance Expenses	2.53	22.18	19.43
Employee Benefit Expenses	233.86	214.10	193.63
Security Expenses	21.59	15.98	9.28
Total Operational Expenses	636.59	522.55	428.68
% of Total Expenses	14.61%	16.70%	13.30%

**Not Annualised*

Fixed operating costs increase as we open new stores. In general, we expect our operational expenses as a percentage of sales to be higher for new stores. However, in absolute terms, our older stores tend to have higher operational costs as these costs also include repairs which are not capitalised. In addition, we carry out periodic renovations of our stores, which we believe are important in maintaining and enhancing the image of our stores and in attracting customers. During renovations, we will incur expenses and experience temporary disruptions to our normal operations which may affect our revenues. The details of repair and maintenance expenses for the Fiscal 2025, 2024 and 2023 is provided below:

Particulars	For the fiscal ended		
	2025	2024	2023
Repair and Maintenance Expenses	2.53	22.18	19.43
% of total other expenses	0.50%	4.93%	5.19%

**Not Annualised*

Competition

The Indian retail market has become increasingly competitive in recent years and this may increase in the future. Currently, our key direct competitors include other organised retailers including Osia Mart, Big Bazaar and Reliance Retail, and unorganised retailers such as local departmental stores and kirana shops. For more details regarding competition, refer to the chapter titled “*Business Overview*” beginning from page 162. Increased competition may lead to a fall in prices and a consequent fall in our margins. Each of the aforementioned organised retailers has an established presence in the markets in which we operate and they may continue to open additional stores in the same cities where we have opened or intend to open our stores in the future. This may require us to change our strategy, delay expansion plans or be more selective in opening of new stores.

Changes in Inventories of Stock-in-trade

The changes in inventories of stock-in-trade were ₹ 541.85 lakhs for the Fiscal 2025. Depreciation and amortisation expenses

Our Depreciation and amortisation expenses increased by 11.69% to ₹ 32.67 lakhs in Fiscal 2025 (representing 0.69% of total income in that year) from ₹ 29.25 lakhs in Fiscal 2024 (representing 0.88% of total income in that year).

- 57.63% increase in rent expenses from ₹ 193.76 lakhs in Fiscal 2024 to ₹ 305.43 lakhs in Fiscal 2025, on account of increase in number of stores.
- 35.08% increase in Security Expenses Expense from ₹ 15.98 lakhs in Fiscal 2024 to ₹ 21.59 lakhs in Fiscal 2025.

*Other Operating revenue primarily includes Franchisee fees, Listing & Display Charges and Royalty Income

Our revenue from operations in Fiscal 2024 has shown stagnation compared to the previous year. A key contributing factor to this lack of growth is the absence of an increase in the number of stores, which has remained unchanged in Fiscal 2024. However, our company has received increased other operating revenue leading to better margins than Fiscal 2023.

Our entire revenue is generated from domestic operations, entirely within the state of Gujarat. We operate stores across several cities in Gujarat, including Ahmedabad, Gandhinagar, Visnagar, Himmatnagar and Anand. The revenue bifurcation from each city for Fiscal 2024 and 2023 is provided below:

Total Revenue from Operations	3,338.68	99.92%	3,268.96	99.99%

*Other Operating revenue primarily includes Franchisee fees, Listing & Display Charges and Royalty Income

Other income

Our other income increased by 1,273.68% to ₹ 2.61 lakhs in Fiscal 2024 (representing 0.08% of our total income in that year) from ₹ 0.19 lakhs in Fiscal 2023 (representing approximately 0.01% of our total income in that year), primarily due to increase in interest term deposit.

Expenses

Our total expenses decreased by 2.95% to ₹ 3,128.64 lakhs in Fiscal 2024 (representing 93.64% of our total income in that year) from ₹ 3,223.85 lakhs in Fiscal 2023 (representing 98.61% of our total income in that year). The primary reasons for this decrease are discussed below:

Purchase of Goods (Stock-in-trade)

Our Purchase of Goods (Stock-in-trade) decreased by 20.97% to ₹ 2,593.38 lakhs in Fiscal 2024 (representing 77.62% of our total income in that year) from ₹ 3,281.70 lakhs in Fiscal 2023 (representing 100.38% of our total income in that year). The primary reason for decrease in purchase of goods (stock-in-trade) is due to high closing stock at the end of previous year i.e., Fiscal 2023. Due to such high closing stock, the purchase of goods decreased significantly in Fiscal 2024.

Changes in Inventories of Stock-in-trade

The changes in inventories of stock-in-trade were ₹ 212.29 lakhs for the Fiscal 2024. We had inventories aggregating to ₹ 1,141.32 lakhs at the beginning of the Fiscal 2024 and inventories aggregating to ₹ 1,353.61 lakhs at the end of the Fiscal 2024. For the Fiscal 2023, We had inventories aggregating to ₹ 469.13 lakhs at the beginning of the Fiscal 2023 and inventories aggregating to ₹ 1,141.32 lakhs at the end of the Fiscal 2023.

The increase in Closing stock in Fiscal 2025 is on account of opening of new stores in that fiscal as during the establishment phase of new stores, there is often an accumulation of unsold stock as the store builds brand awareness and customer demand.

Employee Benefit Expenses

Our employee benefit expenses increased by 10.57% to ₹ 214.10 lakhs in Fiscal 2024 (representing 6.41% of our total income in that year) from ₹ 193.63 lakhs in Fiscal 2023 (representing 5.92% of our total income in that year). The increase in employee expenses was due to annual wage increments as well as an increase in the headcount of our employees from 65 employees in Fiscal 2023 to 110 employees in Fiscal 2024.

Finance Cost

Our finance cost increased by 35.53% to ₹ 76.79 lakhs in Fiscal 2024 (representing 2.30% of our total income in that year) from ₹ 56.66 lakhs in Fiscal 2023 (representing 1.73% of our total income in that year). The primary reason for decrease in finance cost is due to increase in total borrowing from ₹ 746.94 lakhs in Fiscal 2023 to ₹ 856.36 lakhs in Fiscal 2024

Depreciation and amortisation expenses

Our Depreciation and amortisation expenses increased by 29.65% to ₹ 29.25 lakhs in Fiscal 2024 (representing 0.88% of total income in that year) from ₹ 22.56 lakhs in Fiscal 2023 (representing 0.69% of total income in that year).

Other Expenses

Our other expenses increased by 25.16% to ₹ 427.41 lakhs in Fiscal 2024 (representing 12.79% of our total income in that year) from ₹ 341.50 lakhs in Fiscal 2023 (representing 10.45% of our total income in that year). The increase in other expenses is primarily due to:

- 27.49% increase in rent expenses from ₹ 151.98 lakhs in Fiscal 2023 to ₹ 193.76 lakhs in Fiscal 2024.
- 40.81% increase in Electricity Expenses from ₹ 54.35 lakhs in Fiscal 2023 to ₹ 76.53 lakhs in Fiscal 2024.
- 72.20% increase in Security Expenses Expense from ₹ 9.28 lakhs in Fiscal 2023 to ₹ 15.98 lakhs in Fiscal 2024.

Profit before tax

As a result of the factors outlined above, our profit before tax increased by 369.43% to ₹ 212.65 lakhs in Fiscal 2024 from ₹ 45.30 lakhs in Fiscal 2023 which, as a percentage of our total income, represented approximately 6.36% in Fiscal 2024 compared with 1.39% in Fiscal 2023.

Tax expense

Our total tax expense increased by 477.50% to ₹ 57.75 lakhs in Fiscal 2024 (representing 1.73% of our total income in that period) from ₹ 10.00 lakhs in Fiscal 2023 (representing 0.31% of our total income in that period). This increase was primarily due to an increase in current tax expenses for the current year to ₹ 57.20 lakhs in Fiscal 2024 from ₹ 8.50 lakhs in Fiscal 2023. The increase in current tax expenses was in commensurate with our increase in Profit Before Tax.

Profit for the year

The Net Profit Margin of the company increased by 356 bps to 4.64% in Fiscal 2024 as compared to 1.08% in Fiscal 2023. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 read with its circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, had introduced an alternate payment mechanism using Unified Payments Interface (“UPI”) and consequent reduction in timelines for listing in a phased manner. From January 1, 2019, the UPI Mechanism for RIBs applying through Designated Intermediaries was made effective along with the existing process and existing timeline of T+6 days. (“UPI Phase I”). The UPI Phase I was effective till June 30, 2019.

Subsequently, for applications by Retail Individual Investors through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds has been discontinued and only the UPI Mechanism with existing timeline of T+6 days is applicable for a period of three months or launch of five main board public issues, whichever is later (“UPI Phase II”), with effect from July 1, 2019, by SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, read with circular (SEBI/HO/CFD/DIL2/CIR/P/2019/85) dated July 26, 2019. Further, as per the SEBI circular (SEBI/HO/CFD/DCR2/CIR/P/2019/133) dated November 8, 2019, the UPI Phase II had been extended until March 31, 2020. However, due to the outbreak of COVID-19 pandemic, UPI Phase II has been further extended by SEBI until further notice, by its circular (SEBI/HO/CFD/DIL2/CIR/P/2020/50) dated March 30, 2020. Thereafter, the final reduced timeline of T+3 days may be made effective using the UPI Mechanism for applications by Retail Individual Investors (“UPI Phase III”), as may be prescribed by SEBI. Further, SEBI, vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021, and circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, has introduced certain additional measures for streamlining the process of initial public offers and redressing investor grievances. This circular is effective for initial public offers opening on/or after May 1, 2021, except as amended pursuant to SEBI circular SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, and SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022, and the provisions of this circular are deemed to form part of this Red Herring Prospectus. Furthermore, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/P/2022/45 dated April 5, 2022, all Individual Investors in initial public offerings (opening on or after May 1, 2022) whose application sizes are up to ₹ 500,000 shall use the UPI Mechanism.

Furthermore, SEBI vide press release bearing number 12/2023 has approved the proposal for reducing the time period for listing of shares in public issue from existing 6 working days to 3 working days from the date of the closure of the issue. The revised timeline of T+3 days shall be made applicable in two phases i.e. voluntary for all public issues opening on or after September 1, 2023 and mandatory on or after December 1, 2023. Further, SEBI has vide its circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 reduced the time taken for listing of specified securities after the closure of a public issue to three Working Days. Accordingly, the Issue will be made under UPI Phase III on a mandatory basis, subject to any circulars, clarification or notification issued by the SEBI from time to time.

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.
- c) Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("**T+3 Notification**"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchange and NPCI in order to facilitate collection of requests and/ or payment instructions of the Individual Bidders using the UPI.

The processing fees for applications made by Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

The list of Banks that have been notified by SEBI as Issuer Banks for UPI are provided on <https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes&intmId=40>.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“**FEMA**”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy upto any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“**RBI**”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”).

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“**FDI**”) through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”), has issued consolidated FDI Policy Circular of 2020 (“**FDI Policy 2020**”), which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular. The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Direction on Foreign Investment in India dated January 04, 2018 as updated from time to time by RBI. In terms of the Master Direction, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to *inter-alia*, the pricing guidelines prescribed under the Master Direction. The Indian company making such fresh issue of shares would be subject to the reporting requirements, *inter-alia* with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

Under the current FDI Policy of 2020, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 51 % foreign direct investment through government route is permitted in the sector in which our Company operates. Therefore, applicable foreign investment upto 51% is permitted in our company under government route.

Further, Foreign Portfolio Investment in our Company up to aggregate foreign investment level of 49% or sectoral/statutory cap, whichever is lower, will not be subject to either Government approval or compliance of sectoral conditions, if such investment does not result in transfer of ownership and control of Indian entities from resident Indian citizens or transfer of ownership or control to persons resident outside India. Other investments by a person resident outside India shall be subject to conditions of Government approval and compliance of sectoral conditions as laid down in Schedule I of Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 (“**NDI Rules**”). The total foreign investment, direct and indirect, in the issuing entity will not exceed the sectoral/statutory cap.

In case of investment in sectors through Government Route approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2020 has to be obtained by the Company. The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time. Such conditions include: (i) where the transfer of shares requires the prior approval of the Government as per the extant FDI policy provided that: a) the requisite approval of the Government has been obtained; and b) the transfer of shares adheres with the pricing guidelines and documentation requirements as specified by the Reserve Bank of India from time to time.; (ii) where the transfer of shares attract SEBI (SAST) Regulations subject to the adherence with the pricing guidelines and documentation requirements as specified by reserve Bank of India from time to time.; (iii) where the transfer of shares does not meet the pricing guidelines under the FEMA, 1999 provided that: a) The resultant FDI is in compliance with the extant FDI policy and FEMA regulations in terms of sectoral caps, conditionality’s (such as minimum capitalization, etc.), reporting requirements, documentation etc.; b) The pricing for the transaction is compliant with the specific/explicit, extant and relevant SEBI regulations/guidelines (such as IPO, Book building, block deals, delisting, exit, open offer/substantial acquisition/SEBI SAST); and Chartered Accountants Certificate to the effect that compliance with the relevant SEBI regulations/guidelines as indicated above is attached to the form FC-TRS to be filed with the AD bank and iv) where the investee company is in the financial sector provided that: a) Any ‘fit and proper/due diligence’ requirements as regards the non-resident investor as stipulated by the respective financial sector regulator, from time to time, have been complied with; and b) The FDI policy and FEMA regulations in terms of sectoral caps, conditionality’s (such as minimum capitalization, pricing, etc.), reporting requirements, documentation etc., are complied with. As per the existing policy of the Government of

India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.

Investment conditions/restrictions for overseas entities

Any equity holding by a person resident outside India resulting from conversion of any debt instrument under any arrangement shall be reckoned as foreign investment under the composite cap. Portfolio Investment upto aggregate foreign investment level of 49% or sectoral/statutory cap, whichever is lower, will not be subject to either Government approval or compliance of sectoral conditions, if such investment does not result in transfer of ownership and control of Indian entities from resident Indian citizens or transfer of ownership or control to persons resident outside India. Other foreign investments will be subject to conditions of Government approval and compliance of sectoral conditions as laid down in Schedule I of NDI Rules. The total foreign investment, direct and indirect, in the issuing entity will not exceed the sectoral/statutory cap.
