SECTION II – SUMMARY OF OFFER DOCUMENT

The following is a general summary of the terms of the Issue. This summary should be read in conjunction with and is qualified in its entirety by, the more detailed information appearing elsewhere in this Draft Red Herring Prospectus, including the sections entitled “*Risk Factors*”, “*Industry Overview*”, “*Outstanding Litigation and Material Developments*”, “*Our Promoter and Promoter Group*”, “*Financial Information*”, “*Objects of the Issue*”, “*Our Business*”, “*Offer Procedure*” and “*Description of Equity Shares and Terms of Articles of Association*” beginning on Page Nos. 28, 88, 164, 140, 145, 72, 102, 201 and 232 respectively of this Draft Red Herring Prospectus.

1. Summary of Industry in which the Company is operating

The Power Equipment Market size is estimated at USD 33.16 billion in 2025, and is expected to reach USD 42.06 billion by 2030, at a CAGR of 4.87% during the forecast period (2025-2030).

The Latin American power equipment market is experiencing significant transformation driven by rapid industrialization and urbanization across major economies. Countries like Brazil, Argentina, Mexico, and Chile are actively strengthening their transmission and distribution networks through the construction of new transmission lines and substations to bridge the energy supply-demand gap. This expansion is particularly evident in Colombia, which surpassed Chile in power generation with a remarkable 5% growth between 2022 and 2023, significantly above its decade average of 3%. The region's commitment to infrastructure development is further demonstrated by Brazil's projected electricity consumption, which is expected to exceed 590 TWh by 2027, necessitating substantial investments in power equipment and distribution systems.

The market is witnessing a notable shift towards renewable energy integration and grid modernization. Chile's power sector exemplifies this transition, with an installed power capacity of 34.27 GW in 2023, of which 41% comes from renewable sources. This transformation is supported by significant investments from major industry players, as evidenced by WEG's announcement in December 2023 to invest USD 243.45 million over three years to expand its transformer production in Brazil, Mexico, and Colombia, aiming to boost production capacity by approximately 50%.

Recent developments in the wind energy sector are reshaping the power equipment industry landscape. In December 2023, Mingyang Smart Energy secured a 240 MW preferred supplier agreement for an onshore wind project in Brazil, while ACCIONA Energía successfully commissioned the 135.7 MW San Juan de Marcona wind farm in Peru. These developments are complemented by strategic equipment supply agreements, such as Eletrobras Furnas' acquisition of power transformers from WEG in June 2024 for the expansion of the West Zone Substation in Rio de Janeiro, demonstrating the region's commitment to enhancing grid infrastructure.

The market is characterized by increasing technological sophistication and efficiency improvements in power equipment. Peru's power sector demonstrates this progression, generating 30.22 TWh of electricity between January and July 2024, marking a 2.57% increase from the previous period's 29.46 TWh. This growth is supported by the implementation of advanced technologies in power equipment, including smart transformers, efficient wind turbines, and modern stationary engines, which are crucial for maintaining grid stability and improving power distribution efficiency across the region's diverse geographical terrain.

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all the information in this Draft Red Herring Prospectus, including the risks and uncertainties described below, before making an investment in the Equity Shares. In making an investment decision, prospective investors must rely on their own examination of us and the terms of the Issue including the merits and risks involved. The risks described below are not the only ones relevant to us, our Equity Shares, the industry or the segment in which we operate. Additional risks and uncertainties, not presently known to us or that we currently deem immaterial may arise or may become material in the future and may also impair our business, results of operations and financial condition. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the trading price of our Equity Shares could decline, and as prospective investors, you may lose all or part of your investment. You should consult your tax, financial and legal advisors about particular consequences to you of an investment in this Issue. The financial and other related implications of the risk factors, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors.

To obtain a complete understanding, you should read this section in conjunction with the sections “Industry Overview”, “Our Business” and “Management’s Discussion and Analysis of Financial Position and Results of Operations” on pages 88, 102 and 151 of this Draft Red Herring Prospectus, respectively. The industry-related information disclosed in this section that is not otherwise publicly available is derived from industry sources as well as Government Publications. Industry sources as well as Government Publications generally state that the information contained in those publications has been obtained from sources believed to be reliable but that their accuracy and completeness and underlying assumptions are not guaranteed and their reliability cannot be assured.

This Draft Red Herring Prospectus also contains forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and, in the section titled “Forward-Looking Statements” on page 20 of this Draft Red Herring Prospectus.

Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Unless the context requires otherwise, the financial information of our Company has been derived from the Restated Financial Information.

Materiality:

The Risk Factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality of Risk Factors:

- *Some events may not be material individually but may be found material collectively;*

In this section, unless the context requires otherwise, any reference to “we”, “us” or “our” refers to JD Cables Limited.

The risk factors are classified as under for the sake of better clarity and increased understanding.

INTERNAL RISK FACTORS

- 1. Any shortfall in the supply of our raw material or an increase in raw material costs or other input costs may adversely impact the pricing and supply of our products and have an adverse effect on our business.***

Aluminium Rod, PVC & XLPE Compound and Armouring Strip are the main raw material used to produce cables and conductors. These raw materials are subject to supply disruptions and are very volatile due to price fluctuations resulting from, domestic and foreign trade policies, shifts in supply and demand, competition and other factors beyond our control. Any adverse movement in the price of the raw material will impact our cost of production which we may not be able to pass on to the customer which may affect our profitability of even lead to losses. Further our suppliers may be unable to provide us with a sufficient quantity of our raw material at a suitable price for us to meet the demand for our products. Additionally, there is a risk that one or more of these existing suppliers could discontinue their operations, which could adversely impact our ability to source raw materials at a suitable price and meet our order requirements. Identifying a suitable supplier or any delay, interruption or increased cost in the supply of raw materials pertaining to our products arising from a lack of long-term contracts could have an adverse effect on our ability to meet customer demand for our products and result in lower revenue from operations both in the short and long term.

- 2. We operate in the electrical equipment industry which is a highly technical and regulated sector and if we fail to comply with the regulations prescribed or standards set by our customers, our business, results of operations, cash flows and financial condition could be adversely affected.***

Our operations of manufacturing cables and conductors, forming part of the electrical equipment industry, are operated in a highly technical and regulated sector and are subject to stringent quality standards. The products manufactured by us need to comply with certain standards as prescribed by the Bureau of Indian Standards (BIS). The registration requires our Company to comply with the specific provisions of the various acts enforceable by the BIS for electrical equipment's, most of which are stringent and they may continue to be stricter in the future. The penalties for non-compliance with these regulations can vary from revocation or suspension of the registration to imposition of fines or confiscation of the products manufactured, stored or sold.

These regulations are not only required to be adhered to as part of our regulatory mandate but also technical specifications and pre-qualifications of our products is a substantial issue for our customers. Our customers, who are into the electrical, telecommunication and other industrial sector, prefer products that adhere to strict standards and regulations and hence variations in product quality could result in loss of a substantial customer.

We hold license from the Bureau of Indian Standards confirming that all our products meet the specified requirements. However, we cannot guarantee that these licenses will be available to us in future or they will be renewed in proper time. Consequently, there is an increased risk that we may inadvertently fail to comply with such regulations or procedures, which could lead to a variety of sanctions being imposed by the relevant authorities, as well as withholding or delay in further production process. Further, any adverse change in the regulatory environment or client procedures in the future may subject us to increased obligations and may adversely affect our business, cash flows and results of operations.

- 3. Our Registered Office and Factory Unit I from where we operate is not owned by us.***

Our Registered Office premise situated at Arch Square X2, 14th Floor, 1401, Salt Lake Sector V, Near College More, Sech Bhawan, North 24 Parganas, Salt Lake, West Bengal, India, 700091 and Factory Unit I premise situated at 26/1, F Road, Belgachia, Howrah-711101 are not owned by us, it is taken on rental basis from third party, being the owner of the property. We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new office, factory and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

- 4. We rely on third-party transportation providers for all of our input materials and product distribution. Failure by any of our transportation providers to deliver our input materials and products on time or at all, could result in loss in sales.***

We depend on third-party transportation to receive input materials required for our products and to deliver our finished products to our customers. This makes us dependent on such third-party transportation providers. Weather-related problems, strikes, or other events which affects third-party transportation could impair our ability to receive the raw materials and/or deliver the requisite quantities of products in time to our customers, which may result in cancellation or non-renewal of purchase orders, and could adversely affect the performance of our business, results of operations and cash flows. Additionally, if we lose one (1) or more of our transportation providers, we may not be able to obtain terms as favorable as those we receive from the third-party transportation

providers that we currently use, which in turn would increase our costs and thereby adversely affect our operating results. Whilst our Company has obtained goods in transit insurance policies for outward goods and inward goods are supplied mostly on CIF terms, our transportation providers do not carry any such insurance coverage. There can be no assurance that we will receive compensation for any claims in a timely manner or at all, and consequently, any such loss may adversely affect our business, financial condition, results of operations and cash flows.

5. *Our business is dependent and will continue to depend on our manufacturing facilities, and we are subject to certain risks in our manufacturing process. Any slowdown or shutdown in our manufacturing operations or strikes, work stoppages or increased wage demands by our employees that could interfere with our operations could have an adverse effect on our business, financial condition and results of operations.*

We conduct our operations through our manufacturing facilities situated at Howrah District and Dankuni, Hooghly in West Bengal. The core of our business relies on efficient management of the manufacturing facility, however our operations face a spectrum of operational risks, some of which are beyond our control, such as the breakdown, failure of equipment or industrial accidents and natural disasters. Any significant malfunction or breakdown of our machinery, may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair our assets and systems in a timely manner or at all, our operations may need to be suspended until we procure the appropriate assets to replace them. In addition, we may be required to carry out planned shutdowns of our facilities for maintenance, customer audits and testing, or may shut down certain facilities for capacity expansion and equipment upgrades.

Success of our operations depend on availability of labour and good relationships with our labour force. As of the date of this Draft Red Herring Prospectus, our employees are not members of any organized labour unions. Strikes and lockouts as a result of disputes with our labour force may adversely affect our operations. While we have not had instance of strikes, lockouts or labour disputes in the past, we cannot assure you that we shall not experience any strikes or lockouts on account of labour disputes in the future. Such events could disrupt our operations and may have a material adverse effect on our business, financial condition and results of operations. Although we have not experienced any significant disruptions at our manufacturing facilities in the past, we cannot assure you that there will not be any disruptions in our operations in the future. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shutdown of our operations or the under-utilization of our manufacturing facility, which in turn may have an adverse effect on our business, financial condition and results of operations.

The concentration of all of our manufacturing operations in Howrah and Hooghly exposes us to adverse developments related to regulation, as well as political or economic, demographic and other changes in West Bengal as well as the occurrence of natural and man-made disasters in West Bengal, which may adversely affect business, financial condition and results of operations. Our manufacturing operations require significant labour and are also reliant on government policies in terms of taxes, duties and incentives made applicable by the state government. As a result, any unfavorable policies of the state government or state or local governments in this region, could adversely affect our business, financial condition and results of operations.

6. *The loss, shutdown or slowdown of operations at any of our facilities or the under-utilization of any such facilities may have a material effect on our results of operations and financial condition.*

Our business and results of operations are dependent on our ability to effectively plan our manufacturing processes and on our ability to optimally utilize our manufacturing capacities for the various industrial components we manufacture. Any disruption to our manufacturing process or the operation of our production facilities may result from various factors beyond our control, including, among others, the following:

- Utility supply disturbances, particularly power supply;
- Forced close down or suspension of our manufacturing facilities due to factors such as breakdown or failure of equipment, performance below expected levels of output or efficiency, facility obsolescence or disrepair, labour disputes such as strikes and work stoppages, natural disasters and industrial accidents;
- Other production or distribution problems, including limitations to production capacity due to regulatory requirements, changes in the types of components produced or physical limitations that could impact continuous supply.

If we fail to take adequate steps to mitigate the potential impact of these events, or to effectively respond to these events if they occur, our business, results of operations and financial condition could be materially affected. Further, we depend upon our suppliers and vendors to provide the necessary equipment and machinery that we need for our continuing operations and maintenance of our facilities, plant and machinery. We cannot assure you that we will be able to continue to obtain equipment on commercially acceptable terms, or at all, or that our vendors will continue to enter into or honor the contracts for their services. Our inability to continue to obtain equipment and enter into contracts with our vendors in a timely manner, or at all, could affect our business and results of operations.

7. *Our company is engaged in the manufacturing of cables and conductors, a segment that forms an integral part of Engineering, Procurement, and Construction (EPC) activities and is inherently working capital intensive.*

Our company is engaged in the manufacturing of cables and conductors, which plays a critical role in supporting Engineering, Procurement, and Construction (EPC) activities, particularly in the power and infrastructure sectors. This line of business is

inherently working capital intensive due to the scale and complexity of operations involved. The EPC environment in which our products are deployed is subject to a range of risks, including extended project execution timelines, volatility in the prices of raw materials and equipment, and the possibility of cost overruns caused by delays in project completion. Such delays are often attributed to external factors beyond the Company's control, notably the availability of Right of Way (ROW) and other statutory clearances, which are generally the responsibility of the client. In instances where project progress is hindered due to such delays, the Company is typically granted an extension of time to complete the project. To proactively address these challenges and support the seamless delivery of our products and services, we have established a robust project review and monitoring mechanism aimed at identifying and mitigating potential risks that could impact timelines. For further insights into our business operations and working capital requirements, please refer to the chapters titled “*Our Business*” and “*Restated Financial Information*” beginning on pages 102 and 145 of the Draft Red Herring Prospectus.

8. *Our business significantly relies on ongoing relationships with our customers, many of which are not formalized through long-term contracts. Additionally, we are an approved vendor for several State Electricity Boards, and any failure to maintain this approved status could negatively affect our revenue and profitability.*

Our Company is an approved vendor for various State Electricity Boards. Our supply network spans across multiple states, including Assam, Odisha, Jharkhand, Bihar, Manipur, Tripura, Arunachal Pradesh, Madhya Pradesh, Chhattisgarh, Meghalaya, Mizoram and West Bengal. We are currently empanelled as an approved vendor with several State Electricity Boards and government bodies, which enables us to supply our products. Our approved vendor status is contingent upon meeting certain regulatory, technical, and financial criteria and is subject to periodic review. Our Company has had long standing business relationships with certain customers and has been supplying our products to such customers, for several years. We have a strong client base in India. However, we have not entered into any contracts with any of our customers and we cater to them on an order-by-order basis. Any failure to renew, maintain, or comply with such requirements could result in the loss of approved vendor status, limiting our ability to secure contracts, and may have a material adverse effect on our business prospects, revenue generation, and profitability.

As a result, our customers can terminate their relationships with us without any notice, which could materially and adversely impact our business. There is no assurance that we will be able to obtain continuous business, get awarded with tenders every time or at all. The loss of interruption of work, by a significant customer or a number of significant customers or the inability to procure tender contracts on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

9. *Our top five customers contribute majority of our revenues from operations. Any loss of business from one or more of them may adversely affect our revenues and profitability.*

Our top five customers have contributed 66.24%, 73.14%, 45.29% and 37.74% of our revenues for the period ended December 31, 2024 and year ended March 31, 2024, March 31, 2023 and March 31, 2022 respectively based on Restated Financial Statements. However, our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. Since our business is concentrated among relatively few significant customers, we could experience a reduction in our results of operations, cash flows and liquidity if we lose one or more of these customers or the amount of business, we obtain from them is reduced for any reason, including but not limited on account of any dispute or disqualification. While we believe we have maintained good and long-term relationships with our customers, there can be no assurance that we will continue to have such long-term relationship with them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

10. *Our individual Promoters plays key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoter and Executive Directors remain associated with us. Our success also depends upon the services of our key managerial personnel and our ability to attract and retain key managerial personnel and our inability to attract them may affect our operations.*

We benefit from our relationship with our individual Promoters and our success depends upon the continuing services of our Promoters and executive Directors who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters and executive Directors have been actively involved in the day to day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters and executive Directors. If our Promoters and executive directors are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, it may take reasonable time to locate suitable or qualified replacements and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Our Promoters and executive Directors, along with the key managerial personnel, have over the years built relations with various customers and other persons who form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

11. *Our ability to attract, train and retain executives and other qualified employees is critical to our business, results of operations and future growth.*

Our business and future growth is substantially dependent on the continued services and performance of our key executives, senior management and skilled personnel, especially personnel with experience in our industry. In particular, our executive directors management are critical to the overall management of our Company. Their inputs and experience are also valuable for the development of our services, our work culture and the strategic direction taken by our Company. Further, our business depends upon our employees for its successful execution. Some of our key management has been with our Company since long; however, any of them may choose to terminate their employment with us at any time. We cannot assure you that we will be able to retain these employees or find equally qualified and experienced replacements in a timely manner, or at all. We may require a long period of time to hire and train replaced personnel when skilled personnel terminate their employment with our Company. Our ability to compete effectively depends on our ability to attract new employees and to retain and motivate our existing employees. We may be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting skilled employees that our business requires. If we do not succeed in attracting well-qualified employees or retaining or motivating existing employees, our business and prospects for growth could be adversely affected.

12. Any inability to comply with repayment and other covenants in the financing agreements or otherwise meet our debt servicing obligations could adversely affect our business, financial condition, cash flows and credit rating.

Our Company has entered into agreements in relation to financing arrangements with certain banks for working capital facilities, term loans and bank guarantees. As of December 31, 2024, we had total outstanding borrowings of Rs. 4673.85 lakhs. The agreements with respect to our borrowings contain restrictive covenants, including, but not limited to, requirements that we obtain consent from the lenders prior to undertaking certain matters including, among others, effecting a merger, amalgamation or scheme of arrangement, change in capital structure of our Company subject to the threshold prescribed for the shareholding of certain shareholders of our Company and effecting change in the constitutional documents or management of our Company. For further details, see “*Financial Indebtedness*” beginning on page 148. As on December 31, 2024, our total secured borrowings amounted to Rs. 4234.08 lakhs, comprising of 90.59% of our total indebtedness. Under the terms of our secured borrowings, we are required to create a charge by way of hypothecation on the assets of our Company, together with cash in hand and bank accounts. As these assets are hypothecated in favour of lenders, our rights in respect of transferring or disposing of these assets are restricted. Many of our financing agreements also include various conditions and covenants that require us to obtain lender consents prior to carrying out certain activities or entering into certain transactions. Typically, restrictive covenants under our financing documents relate to obtaining prior consent of the lender for, among others, change in the capital structure, availing additional borrowings, change in ownership or management control, changes in shareholding pattern and management set-up including its constitution and composition, amalgamation, demerger, merger, acquisition, corporate or debt restructuring or similar action. Our Company is yet to receive consent from lenders in relation to a borrowing availed by us. If we fail to meet our debt service obligations or covenants (or do not receive approvals from our lenders to undertake certain transactions) under the financing agreements, the relevant lenders could declare us to be in default of our agreements, accelerate the maturity of our obligations, enforce security, take possession of the assets. As a result, we may be forced to sell some or all of our assets if we do not have sufficient cash or credit facilities to make these repayments.

13. Our Company has availed certain unsecured loans.

Our Company has availed certain unsecured loans of which an amount of ₹ 223.28 lakhs and ₹ 439.77 lakhs is outstanding for the Financial Year ended March 31, 2024 and period ended December 31, 2024. In the event, any of such unsecured lenders seek a repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. Therefore, any such demand may adversely affect our business, financial condition and results of operations. For further details, see “*Financial Indebtedness*” on page 148 of this Draft Red Herring Prospectus.

14. Our Promoters and certain members of our Promoter Group have extended personal guarantees with respect to various loan facilities availed by our Company. Revocation of any or all of these personal guarantees may adversely affect our business operations and financial condition.

Our Promoters and certain members of our Promoter Group, have extended personal guarantees in favour of certain banks with respect to various facilities availed by our Company from them. Our financial position and future ability to avail loans are dependent on our promoters to honour the guarantee. There is no guarantee about the willingness and ability of our promoters to honour the said guarantees, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. In the event any of these guarantees are revoked, our lenders may require us to furnish alternate guarantees or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative guarantees in a timely manner or at all. If our lenders enforce these restrictive covenants or exercise their options under the relevant debt financing agreements, our operations and use of assets may be significantly hampered and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations. For further details please refer to the chapter titled — “*Financial Indebtedness*” on page 148 of this Draft Red Herring Prospectus.

15. Risks inherent to power sector projects could materially and adversely affect our business, financial condition and results of operations

Power sector projects have long gestation periods before they become operational and carry project-specific as well as general risks. These risks are generally beyond our control and include:

- Changes in government and regulatory policies relating to the power sector;
- Delays in the construction of projects we are engaged on;
- Adverse changes in demand for, or the price of, power generated or distributed by the projects we are engaged on;
- The willingness and ability of consumers to pay for the power produced by projects we are engaged on;
- Increased project costs due to environmental challenges and changes in environmental regulations;
- Failure of third parties such as contractors, sub-contractors and others to perform on their contractual obligations in respect of projects we are engaged on;
- Economic, political and social instability or occurrences such as natural disasters, armed conflict and terrorist attacks, particularly where projects are located or in the markets they are intended to serve;
- Delay in obtaining/renewing regulatory or environmental clearances and suspension or cancellation due to non-conformity with conditions stipulated under the clearance; and

In addition, any significant change in the project plans of our clients or change in our relationship with these existing clients may affect our business prospects. Furthermore, successful implementation of the projects we are engaged on are dependent on our client's financial condition, as any adverse change in their financial condition may affect the financing and consequently the implementation of the projects. In the event the power projects we are engaged on are cancelled or delayed or otherwise adversely affected, our results of operations and financial condition could be affected.

For further details of our Business, please refer chapter titled “*Our Business*” beginning on Page 102 of Draft Red Herring Prospectus.

If such claims are determined against Company, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares.

Furthermore, we may not be able to quantify all the claims in which we are involved. We require several statutory and regulatory permits, licenses and approvals to operate our business, some of which are either received or applied for. Many of these approvals are subject to periodical renewal. Any failure to renew the approvals that may expire, or to apply for the required approvals, licences, registrations or permits, or any suspension or revocation of any of the approvals, licences, registrations and permits that have been or may be issued to us, could result in delaying the operations of our business, which may adversely affect our business, financial condition, results of operations and prospects.

Further, we have applied for certain approvals, licenses, registrations and permits, which are necessary for us to continue our business. For instance, our Company has made application for Fire NOC for Unit I located at Belgachia, Howrah. Further, our application for the registration of trademark may be opposed by third parties, and we may have to incur significant cost in relation to these oppositions. In the event we are not able to obtain registration due to opposition by third parties or if any injunctive or other adverse order is issued against us in respect of the trademark, we may not be able to use such trademark and / or avail the legal protection or prevent unauthorized use of such trademark by third parties, which may adversely affect our goodwill and business.

For further details see “**Our Business - Intellectual Property**” and “**Government and Other Approvals**” on pages 102 and 168 respectively.

19. Our Company's manufacturing activities are labour intensive and depend on availability of labour. In case of unavailability of such labour, our business operations could be affected.

Our operations and manufacturing process are labour intensive and depends on our ability to retain labour. In case such labour is unavailable or we are unable to identify and retain such labour our business could be adversely affected. But, we cannot guarantee that we may be able to continue with the same on favourable terms or at all. Any such failure may impact the operations, business process and profitability. In case of any action being taken against our Company by any competent authority for hiring labour through Job work basis may adversely affect our business operations and financials.

Additionally, we have seen an increasing trend in manpower costs in India, which has had a direct impact on our employee costs and consequently, on our margins. Further, the minimum wage laws in India may be amended leading to upward revisions in the minimum wages payable in one or more states. We may need to increase compensation and other benefits in order to attract and retain key personnel in the future and that may materially affect our costs and profitability. We cannot assure you that as we continue to grow our business in the future, our employee costs coupled with operating expenses will not significantly increase.

20. Our Company has in the past not complied with the certain provisions of the Companies Act, 2013.

Our company had not complied with certain statutory provisions of the Companies Act, 2013 in the past including but not limited to the details mentioned in this risk factor. The company had made noncompliance of Section 135 of Companies Act, 2013 pertaining to Corporate Social Responsibility (CSR) in the FY 2024-25. The company had attracted CSR applicability in the FY 2024-25, however, our Company has failed to spend the CSR amount during the F.Y. 2024-25. In the past, there have been certain instances of delays in filing of statutory forms as per the reporting requirements under the Companies Act, 2013 with the ROC and Company has made additional fees payment.

We cannot assure you that no regulatory action will be initiated against us in the future and that no penalties will be imposed on us on account of these lapses.

21. Reliance has been placed on declarations and affidavits furnished by one of our Director for details of their profiles included in this Draft Red Herring Prospectus.

One of our Director, Mr. Rajesh Jhunjhunwala have been unable to trace copies of documents pertaining to his educational qualifications. Accordingly, reliance has been placed on affidavit furnished by him of educational qualifications in this Draft Red Herring Prospectus and we have not been able to independently verify these details. Therefore, we cannot assure you that all information relating to the educational background of Ms. Fatima Begum included in the section and “Our Management” beginning on page 128 of this Draft Red Herring Prospectus is complete, true and accurate.

22. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, any failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations may adversely affect our operations.

We require several statutory and regulatory permits, licenses and approvals to operate our business, some of which are either received or applied for. Many of these approvals are subject to periodical renewal. Any failure to renew the approvals that may expire, or to apply for the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to us, could result in delaying the operations of our business, which may adversely affect our business, financial condition, results of operations and prospects.

Additionally, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals which may result in the interruption of our operations and may have a material adverse effect on our business, financial condition, cash flows and results of operations. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, see “Key Industry Regulations and Policies” and “Government and Other Statutory Approvals” for permits/licenses required for the business on pages 119 and 168 respectively.

23. We have had negative cash flows from Operating activities in the past and a consequent net decrease in cash and cash equivalents in some of the recent years.

As per our Restated Financial Statements, our cash flows from operating activities were negative in the recent Fiscals and period ended December 31, 2024 as set out below:

(₹ in Lakhs)				
Particulars	December 31, 2024	March 31, 2024	March 31, 2023	March 31, 2022
Net Cash Flow from/(used in) Operating Activities	(2061.71)	(1274.69)	122.49	9.08

Such negative cash flows led to a net decrease in cash and cash equivalents for respective years. Any negative cash flow in future could adversely affect our operations and financial conditions and the trading price of our Equity Shares. For further details, see “Financial Information” on page 145.

24. In past, there has been instances of delayed filing of Statutory Returns.

In past, there have been instances where the Company has delayed to file Employees Provident Fund (EPF) Returns, GST in specified time. The delays in filings are as follows:

Employees Provident Fund (PF) Returns:

Tenure	Interest/Late Fees	Reason for delay
July, 2024	Rs. 1742	Technical issue faced in the portal at the time of submission

GST Returns:

Tenure	Interest/Late Fees	Reason for delay
May, 2021	Rs. 50	Primarily due to the COVID-19 pandemic

The Company has paid the above penalties and taken the steps to improve the internal system for payment of EPF and GST to mitigate the technical difficulties. However, we cannot assure that we will not be subject to any legal proceeding or regulatory actions, including monetary penalties by statutory authorities on account of any inadvertent discrepancies in our filling in future, which may adversely affect our reputation and goodwill of the company.

25. Inventories and trade receivables form a major part of our current assets and net worth. Failure to manage our inventory and trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.

We are in the business of manufacturing of cables and conductors. Our Company's business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets and net worth. The results of operations of our business are dependent on our ability to effectively manage our inventory (traded goods, raw materials and finished goods) and trade receivables. To effectively manage our inventory, we must be able to accurately estimate customer demand / potential orders and supply requirements and purchase new inventory accordingly. However, if our management misjudges expected customer demand / potential orders, it could cause either a shortage of products or an accumulation of excess inventory. Further, if we fail to convert the inventory we purchase by manufacturing our products, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, all of which could have an adverse impact on our income and cash flows. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and dealers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in case of increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

26. We sell our products in highly competitive markets and our inability to compete effectively may lead to lower market share or reduced operating margins, and adversely affect our results of operations.

India is our primary market and we face competition in our business from local as well as nationwide manufacturers of cables and conductors. The products that we sell are of industrial nature, i.e. there are a large number of players manufacturing same or similar products. Thus, competition in these markets is based primarily on demand and price. As a result, to remain competitive in our market, we must continuously strive to reduce our procurement, transportation and distribution costs, improve our operating efficiencies and secure our materials requirements. If we fail to do so, other manufacturers and suppliers of similar products may be able to sell their products at prices lower than our prices, which would have an adverse effect on our market share and results of operations. Increased consolidation in the electrical equipment industry means that many of our competitors may benefit from greater economies of scale, including the ability to negotiate preferential prices for products or receive discounted prices for bulk purchases of goods that may not be available to us. Our export market is equally competitive and we compete with various international manufacturers based on quality, durability and pricing of our products. Further, we cannot assure you that our current or potential competitors will not offer products comparable or superior to our products. Failure to match our product quality and consistency accordingly might have an adverse effect on our operations and financial results.

27. If we are unable to manage our growth effectively and further expand into new markets our business, future financial performance and results of operations could be materially and adversely affected.

The success of our business will depend on our ability to effectively implement our business and growth strategy. As part of our growth strategy, we aim to, among other things, continue to grow our businesses as and when opportunities exist including by Continuing to strengthen our existing product portfolio with attractive growth and profitability prospects, to strive for cost efficiency, attracting and retaining talented employees and focusing on consistently meeting quality standards.

As we continue to grow our business and expand into newer markets, we may face several challenges, including as set forth below:

- acquiring new customers;

- identifying customer requirements and preferences in such markets;
- obtaining approvals and certifications for our products in such jurisdictions;
- making accurate assessments of the resources we will require;
- preserving a uniform culture, values and work environment;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, internal control and other internal systems;
- recruiting, training and retaining sufficient skilled management, technical and marketing personnel;
- maintaining high levels of customer satisfaction; and
- adhering to expected performance and quality standards.

In pursuing our growth strategy, we will require additional capital investments and cash outlays, which may have a material impact on our cash flows and results of operations.

Our operating expenses and capital requirements may increase significantly pursuant to our expansion plans. Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and manufacturing capacity and to expend funds to improve our operational, financial and management controls, reporting systems and procedures. An inability to implement our future business plan, manage our growth effectively, further expand into new markets or failure to secure the required funding on favourable terms or at all could have a material and adverse effect on our business, future financial performance and results of operations.

28. The cost of implementing new technologies for our operations could be significant and could adversely affect our business, financial condition and results of operations.

Our future success may depend in part on our ability to respond to technological advances and emerging standards and practices on a cost effective and timely basis. We cannot assure you that we will be able to successfully make timely and cost-effective enhancements and additions to the technology, keep up with technological improvements in order to meet our customers' needs or that the technology developed by others will not render our products less competitive or attractive. In addition, rapid and frequent technology and market demand changes can often render existing technologies and equipment obsolete, requiring substantial new capital expenditures or write-down of assets. Our failure to successfully adopt such technologies in a cost effective and a timely manner could increase our costs (in comparison to our competitors who are able to successfully implement such technologies) and lead to us being less competitive in terms of our prices or quality of services we provide. Further, implementation of new or upgraded technology may not be cost effective, which may adversely affect our profitability. Any of the above events may adversely affect our business, financial condition, results of operations and prospects.

29. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.

Our operations are subject to risks inherent in manufacturing facilities such as risk of equipment failure, work accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions including hazards that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environmental damage. Our significant insurance policies consist of, among others, industry care package policy for our factory premises in respect of building, stock & plant & machinery, keyman insurance and vehicle insurance. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks such as machinery breakdown, product liability insurance and insurance in respect of assets situated at Registered office. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

30. Activities involving our manufacturing process can cause injury to people or property in certain circumstances. A significant disruption at any of our manufacturing facilities may adversely affect our production schedules, costs, sales and ability to meet customer demand.

Although we employ safety procedures in the operation of our manufacturing facilities and maintain what we believe to be adequate insurance, there is a risk that an accident may occur at any of our manufacturing facilities. Although, no injury to people or property in the Company in the past 3 financial years, an accident may result in personal injury to our employees, destruction of property or equipment, environmental damage, manufacturing or delivery delays, or may lead to suspension of our operations and/or imposition of liabilities. Any such accident may result in litigation, the outcome of which is difficult to assess or quantify, and the cost to defend such litigation can be significant. As a result, the costs to defend any action or the potential liability resulting from any such accident or death or arising out of any other litigation, and any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations, cash flows and prospects. In particular, if operations at our manufacturing facility were to be disrupted as a result of any significant workplace accident, equipment failure, natural disaster, power outage, fire,

explosion, terrorism, adverse weather conditions, labour dispute, obsolescence or other reasons, our financial performance may be adversely affected as a result of our inability to meet customer demand or committed delivery schedules for our products.

31. We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company's financial condition and results of operations.

Our Company has entered into various transactions with our directors, promoters, promoter group and group entities. These transactions, inter-alia includes purchases, remuneration, loans and advances etc. For details, please refer to “Annexure of Related Party Transactions” under Section titled “Financial Information” and Chapter titled “Capital Structure” beginning on page 145 and 59 respectively of this Draft Red Herring Prospectus. Our Company has entered into such transactions due to easy proximity and quick execution in accordance with Companies Act 2013 and other applicable laws. Although all related-party transactions that we may enter into in the future are subject to approval by our Audit Committee, Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions are not entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

32. Under-utilization of our manufacturing capacities may have an adverse effect on our business, future prospects and future financial performance. Moreover, information relating to capacity utilization of our production facility included in this Draft Red Herring Prospectus is based on certain assumptions and has been subjected to rounding off, and future production and capacity utilization may vary.

Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing facilities as well as on the market demand of the products sold by us. Among others, the capacity utilization also depends upon the availability of raw materials, labour, industry/ market conditions and procurement practice followed by our customers. During the period ended December 31, 2024, Fiscals 2024, 2023 and 2022, our overall capacity utilization is detailed below: -

Facility	Product	For the nine months period ended December 31, 2024 [#]			Fiscal 2024			Fiscal 2023			Fiscal 2022

In the event we are unable to achieve considerable capacity utilization of our current manufacturing facility, it would result in operational inefficiencies which could have a material adverse effect on our business, results, financial condition and future prospects. Under-utilization of our manufacturing capabilities over extended periods, or significant under-utilization in the short term, could materially and adversely impact our business, growth prospects and future financial performance.

33. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

34. Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows and working capital requirements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section “Dividend Policy” on page 144 of this Draft Red Herring Prospectus.

35. The deployment of funds raised through this Offer shall be subject to any Monitoring Agency and shall also be dependent on the discretion of the management of our Company.

As the issue size shall be more than ₹5000 Lakhs, under Regulation 262 of the SEBI ICDR Regulations it is required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilization of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilization of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same. For further details, please refer to the chapter titled — “Objects of the Issue” on page 72 of the Red Herring Prospectus.

36. Our Promoters and promoter group have significant controlling interest over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder. Further they have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.

Upon completion of this Issue, our promoters along with the promoter group will collectively hold [●]% of the post issue equity share capital of our Company and also continue to enjoy remuneration or benefits, reimbursements of expenses. As a result, our Promoter and promoter group will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting.

There can be no assurance that our Promoters and Directors will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

37. The average cost of acquisition of Equity Shares by our Promoters is lower than the issue price.

Our Promoters average cost of acquisition of Equity Shares in our Company is lower than the Issue Price of the shares proposed to be offered through this Draft Red Herring Prospectus. For further details regarding the average cost of acquisition of Equity Shares by our Promoters in our Company, please refer to page no. 21 of this Draft Red Herring Prospectus.

38. Our inability to collect receivables and defaults in payment from our customers could result in the reduction of our profits and affect our cash flows.

The majority of our sales are to customers on a purchase order basis, with standard payment terms. However, for our domestic orders, we typically rely on our monitoring of the ability of our customers to pay under open credit arrangements. While we limit the credit, we extend to what we believe is reasonable based on an evaluation of each customer’s financial condition and payment history, we may still experience losses in the event our customers are unable to pay. As a result, while we maintain what we believe to be a reasonable allowance for doubtful receivables for potential credit losses based upon our historical trends and other available information, there is a risk that our estimates may not be accurate. The table below sets forth our trade receivables and receivable turnover days as of the dates stated:

Particulars	December 31, 2024	As of March 31, 2024	As of March 31, 2023	As of March 31, 2022
Trade receivables (in ₹ Lakhs)	5555.01	2542.84	991.36	988.09
Trade receivables days (in days)*	66	64	88	63

Trade receivables days has been calculated as = (Average Trade receivables/ revenue) *No. of days in the period/year)
*(Based on Restated financials statements).

If we are unable to collect customer receivables or if the provisions for doubtful receivables are inadequate, it could have a material adverse effect on our business, financial condition, and results of operations.

39. Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and our Promoters or controlling Shareholders will be required to provide an exit opportunity to the Shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

40. We have issued Equity Shares during the last one year at a price that may be below the Issue Price.

During the last one year we have issued Equity Shares at a price that may be lower than the Issue Price. For further details, see "Capital Structure" on page 59. The prices at which Equity Shares have been issued by us in last one year should not be taken to be indicative of the Price Band, Issue Price and the trading price of our Equity Shares after listing.

41. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations.

There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

42. We have not independently verified certain data in this Draft Red Herring Prospectus.

We have not independently verified data from the Industry and related data contained in this Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

43. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholder of a corporation in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

44. Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

45. Our inability to effectively implement our business and growth strategy may have an adverse effect on our operation and growth.

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

46. In the event there is any delay in the completion of the Offer, or delay in schedule of implementation, there would be a corresponding delay in the completion of the objects of this offer which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the objects of the offer as has been stated in the chapter titled "Objects of The Issue" on Page no. 72 of this Draft Red Herring Prospectus. The proposed schedule of implementation of the objects of the Offer is based on our Management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, it may adversely affect our revenues and results of operations.

47. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time

Following the Issue, we will be subject to a daily "Circuit Breaker" imposed by BSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares.

48. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE Limited in a timely manner, or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

49. Our Company operation and growth is dependent upon successfully implementation our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively, like expansion of our product range with a focus on value added products. We have successfully executed our business strategies in the past but there can be no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and the results of operations.

ISSUE RELATED RISK

50. We cannot assure you that our Equity Shares will be listed on the SME Platform of BSE Limited in a timely manner or at all, which may restrict your ability to dispose of the equity shares.

Though we shall make best of our efforts to comply with all applicable regulatory, financial and operational requirements for getting the equity shares proposed to be offered through this Draft Red Herring Prospectus listed on SME Platform of BSE Limited in a time bound manner, yet on account of any change in applicable laws, economic conditions and/or any other reason/s beyond our control, the said shares may not get listed on the SME Platform of BSE Limited in a timely manner or at all, which may restrict your ability to dispose of the equity shares. However, even in such circumstances, the company shall stay fully committed to pay such interest and/or refund the full application amount, as may be required in accordance with the applicable regulatory directives.

51. Any future issuance of Equity Shares or convertible securities, including options under any stock option plan or other equity linked securities may dilute your shareholding, and significant sales of Equity Shares by our major shareholders, may adversely affect the trading price of our Equity Shares.

Future issuances of Equity Shares by our Company after this Offer will dilute investors holdings in our Company. Further, any significant sales of Equity Shares after this Issue may adversely affect the trading price of our Equity Shares. In addition, the perception that such issuance or significant sales of Equity Shares may occur may adversely affect the trading price of our Equity Shares and impair our future ability to raise capital through offerings of Equity Shares.

52. After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop

The price of the Equity Shares on the Stock Exchange may fluctuate as a result of the factors, including

- Volatility in the Indian and global capital market;
- Company's results of operations and financial performance;
- Performance of Company's competitors,
- Adverse media reports on Company or pertaining to our Industry;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India's economic and fiscal policies; and
- Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

53. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to Sell your Equity Shares at or above the Issue Price

The Issue Price of our Equity Shares has been determined by book building method. This price is based on numerous factors (For further information, please refer chapter titled "Basis for Issue Price" beginning on page 79 of this Draft Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

54. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Offer Closing Date

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise or withdraw their Bids during the Bid/Offer Period. While our Company is required to complete Allotment pursuant to the Issue within such period as may be prescribed under applicable law, events affecting the Bidders' decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

55. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

56. Delay in raising funds from the IPO could adversely impact the implementation schedule

The proposed fund requirement, for working capital requirement, general corporate purposes and issue expenses, primarily, as detailed in the chapter titled "Objects of the Issue" beginning on page 72 is to be funded from the proceeds of this IPO. We have

not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

57. We propose to utilize the Net Proceeds for purposes identified in the section titled “Objects of the Issue” in this Draft Red Herring Prospectus. Any variation in the utilization of the Net Proceeds as disclosed in this Draft Red Herring Prospectus shall be subject to certain compliance requirements, including prior Shareholders” approval.

We intend to use Net Proceeds towards meeting the funding of the Setting Up a new manufacturing facility of the Company and General corporate purposes. We intend to deploy the Net Proceeds in financial year 2024-25 and 2025-26 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Net Proceeds, please refer chapter titled Objects of the Issue beginning on page 72 of this Draft Red Herring Prospectus. The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has been appraised by banks. Accordingly, within the parameters as mentioned in the chapter titled Objects of the Issue of this Draft Red Herring Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue. However, Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, and relevant provisions of SEBI ICDR Regulations, 2018, a company shall not vary the objects of the Issue without our Company being authorize to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoter and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition, and may adversely affect our business and results of operations.

58. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs.1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

EXTERNAL RISK FACTOR

59. Natural calamities and force majeure events may have an adverse impact on our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

60. The Indian tax regime is currently undergoing substantial changes which could adversely affect our business.

The goods and service tax (“GST”) that has been implemented with effect from July 1, 2017 combines taxes and levies by the GoI and state governments into a unified rate structure, and replaces indirect taxes on goods and services such as central excise duty, service tax, customs duty, central sales tax, state VAT, cess and surcharge and excise that were being collected by the GoI and state governments.

As regards the General Anti-Avoidance Rules (“GAAR”), The general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18. The GAAR provisions intend to declare an arrangement as an “impermissible avoidance arrangement”, if the main purpose or one of the main purposes of such arrangement is to obtain a tax benefit, and satisfies at least one of the following tests (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm’s length; (ii) results, directly or indirectly, in misuse, or abuse, of the provisions of the Income Tax Act, 1961; (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or (iv) is entered into, or carried out, by means, or in a manner, that is not ordinarily engaged for bona fide purposes. If GAAR provisions are invoked, the tax authorities will have wider powers, including denial of tax benefit or a benefit under a tax treaty. In the absence of

any precedents on the subject, the application of these provisions is uncertain. As the taxation regime in India is undergoing a significant overhaul, its consequent effects on economy cannot be determined at present and there can be no assurance that such effects would not adversely affect our business, future financial performance and the trading price of the Equity Shares.

61. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Red Herring Prospectus.

While facts and other statistics in the Draft Red Herring Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Industry Overview*” beginning on page 88 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

62. A third party could be prevented from acquiring control of us because of the anti-takeover provisions under Indian law

There are provisions in Indian law that may discourage a third party from attempting to take control over us, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Under the Takeover Regulations an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. These provisions may discourage or prevent certain types of transactions involving an actual or threatened change in control of us.

63. Our ability to raise foreign capital may be constrained by Indian law

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Regulatory restrictions may limit our financing sources for our projects under development and hence could constrain our ability to obtain financings on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that an adverse effect on our ability to raise foreign capital, which in turn may affect our business, prospects, financial condition and results of operation.

64. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.

A public limited company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain their existing ownership, prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by a three-fourths majority of the equity shareholders voting on such resolution.

If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted.

65. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.

Our Company is incorporated in India, and the majority of our assets are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India’s principal stock exchanges;
- changes in India’s tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India’s principal export markets;
- other significant regulatory or economic developments in or affecting India or its ER&D sector; international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;

66. Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

67. We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

68. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfer of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company and the Promoter Selling Shareholders in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Justification for “Holding Period” levels

The table below sets forth the key justifications for holding levels:

Sr. No.	Particulars	Details
Current Assets		
1.	Inventories	<p>The company is in the business of manufacturing cables and conductors. The increase in inventory holding days for the company from 22 days in FY 21-22 to 36 days in December 2024 was due to raw material being bought in bulk to avoid supply chain disruptions and to meet anticipated market growth. High fluctuation in FY 2022-23 was due to decrease in sales because of which the inventory buildup increased, thus increasing the number of days in FY 2022-23. The sales decreased due to unexpected machine breakdown.</p> <p>The decrease in FY 24-25 to 34 days from 36 days in December 2024 was due to higher growth in sales which led to faster inventory consumption.</p> <p>Further the increase of number of days from 41 in FY 25-26 to 45 in FY 26-27 will be due to competitive pricing pressures which may force the company to maintain safety stocks to avoid price fluctuations. The company might also be investing in capacity expansion to capture future market opportunities which may lead to increase in buffer stocks and higher inventory holding levels.</p>
2.	Trade Receivables	<p>The trade receivables holding days was increased from 63 in FY 21-22 to 66 in December 2024. This was mainly due to the company has prioritized customer retention over aggressive collection and balancing sales growth with credit risk.</p> <p>The sudden increase in number of days in FY 2022-23 was due to delayed payment by debtors. The stability in number of days of 66 in FY 24-25 was due to the company maintain a standardized credit period and adhering to that by constants communications with the customers. The projected increase from 66 days in FY 25-26 to 71 days in FY 25-26 and 76 days in FY 26-27 will be due to company's plans to acquire to new customers where by the potential growth in these markets may simultaneously increase the credit period to help us in these diversifications and be competitive.</p>
Current liabilities		
1.	Trade Payables	<p>The increase from 32 to 37 days by December 2024 was due to Extended payment terms with suppliers which reflects stronger relationships enabling delayed payments without supply risks. Delaying payments helps manage cash flow amid fluctuating raw material costs, contributing to the rise in payables days. The higher increase in FY 2022-23 was due to combination of factors of decrease in sales and delayed payment by customers because of which the payment to our suppliers were delayed.</p> <p>The increase in number of days from 37 days in December 2024 to 39 days in FY 24-25 was due to slight increase in delay of payment so that the working capital of the company as a whole can be managed accordingly.</p> <p>The stability at 41 days for FY 2026-27 and FY 2026-27 will be due the company's planned credit term maximization with supplier trust which will help us in getting right material availability at right time.</p>

GLOBAL ECONOMY

Macroeconomic Environment

Global growth is projected at 3.3 percent both in 2025 and 2026, below the historical (2000–19) average of 3.7 percent. The forecast for 2025 is broadly unchanged from that in the October 2024 World Economic Outlook (WEO), primarily on account of an upward revision in the United States offsetting downward revisions in other major economies. Global headline inflation is expected to decline to 4.2 percent in 2025 and to 3.5 percent in 2026, converging back to target earlier in advanced economies than in emerging market and developing economies. Medium-term risks to the baseline are tilted to the downside, while the near-term outlook is characterized by divergent risks. Upside risks could lift already-robust growth in the United States in the short run, whereas risks in other countries are on the downside amid elevated policy uncertainty. Policy-generated disruptions to the ongoing disinflation process could interrupt the pivot to easing monetary policy, with implications for fiscal sustainability and financial stability. Managing these risks requires a keen policy focus on balancing trade-offs between inflation and real activity, rebuilding buffers, and lifting medium-term growth prospects through stepped- up structural reforms as well as stronger multilateral rules and cooperation.

(Source: <https://www.imf.org/en/Publications/WEO/Issues/2025/01/17/world-economic-outlook-update-january-2025>)

In the Euro area, growth is expected to pick up but at a more gradual pace than anticipated in October, 2024, with geopolitical tensions continuing to weigh on sentiment. Weaker-than-expected momentum at the end of 2024, especially in manufacturing, and heightened political and policy uncertainty explain a downward revision of 0.2% point to 1.0% in 2025. In 2026, growth is set to 1.4%, helped by stronger domestic demand, as financial conditions loosen, confidence improves, and uncertainty recedes somewhat. In other Advanced Economies, two offsetting forces keep growth forecasts relatively stable. On the one hand, recovering real incomes are expected to support the cyclical recovery in consumption. On the other hand, trade headwinds-including the sharp uptick in trade policy uncertainty are expected to keep investment subdued.

In Emerging Market and Developing Economies, growth performance in 2025 and 2026 is expected to broadly match that in 2024. With respect to the projection in October, growth in 2025 for China is marginally revised upward by 0.1% point to 4.6%. This revision reflects carryover from 2024 and the fiscal package announced in November largely offsetting the negative effect on investment from heightened trade policy uncertainty property market drag. In 2026, growth is projected mostly to remain stable at 4.5%, as the effects of trade policy uncertainty dissipate and the retirement age increase slows down the decline in the labor supply. In India, growth is projected to be solid at 6.5% in 2025 and 2026, as projected in October and in line with potential.

WORLD ECONOMIC OUTLOOK

Where inflation is proving more sticky, central banks are moving more cautiously in the easing cycle while keeping a close eye on activity and labor market indicators as well as exchange rate movements. A few central banks are raising rates, marking a point of divergence in monetary policy.

Global financial conditions remain largely accommodative, again with some differentiation across jurisdictions.

Equities in advanced economies have rallied on expectations of more business-friendly policies in the United States. In emerging market and developing economies, equity valuations have been more subdued, and a broad-based strengthening of the US dollar, driven primarily by expectations of new tariffs and higher interest rates in the United States, has kept financial conditions tighter.

Economic policy uncertainty has increased sharply, especially on the trade and fiscal fronts, with some differentiation across countries. Expectations of policy shifts under newly elected governments in 2024 have shaped financial market pricing in recent months. Bouts of political instability in some Asian and European countries have rattled markets and injected additional uncertainty regarding stalled

progress on fiscal and structural policies. Geopolitical tensions, including those in the Middle East, and global trade frictions remain elevated.

In the Middle East and Central Asia, growth is projected to pick up, but less than expected in October. This mainly reflects a 1.3%-point downward revision to 2025 growth in Saudi Arabia, mostly driven by the extension of OPEC+ production cuts. In Latin America and Caribbean, overall growth is projected to accelerate slightly in 2025 to 2.5%, despite an expected slowdown in the largest economies of the region. Growth in sub-Saharan Africa is expected to pick up in 2025, while it is forecast to slow down in emerging and developing Europe.

GDP at Current Prices, Global, 2018-2028F

(Source: World Economic Outlook-October 2024)

Conversely, Advanced Economies are anticipated to record a comparatively more modest CAGR of 4.0%. Nevertheless, this marks an improvement from past figures, driven by positive employment prospects in the United States and rising consumption trends in Europe. This optimistic long-term economic outlook is poised to stimulate global investments and bolster demand in vital sectors, such as healthcare.

INDIA MACROECONOMIC OVERVIEW

India's GDP was at US\$ 3,732b In CY23 and is estimated to reach US\$ 5,944b in CY28, growing at a CAGR of 9.8% from CY23 To CY28

India is the fifth largest economy in CY23 and is expected to be the third largest by CY30. India's GDP (at current prices) grew from US\$ 2,651B to US\$ 3,732B between CY17 and CY23. The increase can be attributed to the robust reforms like GST, corporate tax revision, revised FDI limit, and growth across sectors. The real GDP growth is expected to reach 5.9% Y-o-Y growth in CY23, and eventually stabilize and maintain a growth rate of 6% till CY28.

Source(s): International Monetary Fund

Over the next 10-15 years, India is anticipated to be among the top economies of the world on the back of rising demand, robust growth in various manufacturing and infrastructure sectors, and an increase in private consumption. India's manufacturing sector is on a robust growth trajectory, with output surging to its highest levels in nearly three years, with the Manufacturing Purchasing Managers' Index reaching an impressive 58.6 in August CY23. Key economic indicators such as steel production, cement production, and vehicle sales continue to show strong growth, indicating positive momentum in the manufacturing sector.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. India's Current Account Deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at Rs. 96,790 crore (US\$ 11.2 billion) for Q2 of FY25 from Rs. 97,655 crore (US\$ 11.3 billion) in Q2 of FY24 or 1.3% of GDP. This was largely due to decrease in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.
(Source: <https://www.ibef.org/economy/indian-economy-overview>)

India's economy in 2025 is poised for substantial growth, supported by strategic policy reforms, strong domestic demand, and increasing foreign investment. The Union Budget 2025-26, presented by Finance Minister Nirmala Sitharaman, introduced significant reforms, including a new Income Tax Bill aimed at simplifying compliance and providing relief to middle-class taxpayers. Additionally, the budget focused on boosting manufacturing, consumption, and the startup ecosystem, with enhanced credit access for MSMEs and incentives for innovation.

Economic growth projections remain optimistic, with the International Monetary Fund (IMF) forecasting a 6.5% GDP growth rate for both 2025 and 2026, while the United Nations expects a 6.6% expansion. Deloitte estimates growth between 6.5% and 6.8%, driven by rising domestic demand and increased government spending. Meanwhile, India's retail inflation eased to a five-month low of 4.31% in January 2025, primarily due to declining food prices, potentially allowing the Reserve Bank of India (RBI) to implement rate cuts to further stimulate the economy.

Corporate performance in the December quarter showed mixed results. A sample of 3,400 companies reported an aggregate revenue increase of 6.9%, while net profit grew by 12.6% year-on-year. Sectors such as banking, finance, IT, healthcare, and real estate witnessed positive earnings growth, whereas the automobile, cement, consumer goods, and oil and gas industries experienced declines.

India is also taking significant steps in energy and international trade. The government is pushing for nuclear energy expansion by amending liability laws to attract private and foreign investment, with long-term plans to scale up nuclear power production. On the global stage, Prime Minister Narendra Modi recently met with U.S. President Donald Trump to discuss strengthening military and trade ties, including potential defense deals and efforts to double bilateral trade to \$500 billion by 2030.

FISCAL DEFICIT IN RELATION TO GDP(%)

(Source: <https://www.statista.com/statistics/802020/india-gross-fiscal-deficit-in-relation-to-gdp/>)

Despite these positive developments, Indian stock markets have faced recent downturns due to high valuations, modest corporate earnings, and global trade uncertainties. Both the Nifty 50 and BSE Sensex indices experienced declines, and market analysts project a cautious outlook for the near future. Nonetheless, India's overall economic trajectory remains strong, with continued policy support and structural reforms expected to sustain growth momentum in the coming years.

TREND IN CAPITAL EXPENDITURE

(Source: <https://www.financialexpress.com/policy/economy-indias-capex-sees-sharp-boost-budget-estimates-at-15-for-fy25-3539513>)

These figures indicate a consistent increase in capital expenditure relative to GDP, reflecting the government's focus on infrastructure development and economic growth.

Additionally, the Financial Express reports that the government's capital expenditure has seen a significant boost, with the budget allocation for FY25 around Rs 15 lakh crore, approximately 3.4% of GDP.

FOREX RESERVES (IN US \$ BILLION)

Forex reserves as of the end of March 2024 were sufficient to cover 11 months of projected imports. The Survey underscores that the Indian Rupee has also been one of the least volatile currencies among its emerging market peers in FY24. India's external debt vulnerability indicators also continued to be benign. External debt as a ratio to GDP stood at a low level of 18.7 per cent as of end-March 2024. The ratio of foreign exchange reserves to total debt stood at 97.4 per cent as of March 2024 as per the Economic Survey 2023- 24. The Direct Benefit Transfer (DBT) scheme and Jan Dhan Yojana-Aadhaar-Mobile trinity have been boosters of fiscal efficiency and minimization of leakages, with ₹36.9 lakh crore having been transferred via DBT since its inception in 2013.

The Survey underscores that the Indian Rupee has also been one of the least volatile currencies among its emerging market peers in FY24. Road ahead for the Indian Economy

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and High-Frequency Indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of FY24 highlighted the unwavering support the government gave to its capital expenditure, which, in FY24, stood 37.4% higher than the same period last year. In the Union Budget of 2024-25, capital expenditure took lead by steeply increasing the capital expenditure outlay by 17.1 % to Rs. 11 lakh crore (US\$ 133.51 billion) over Rs. 9.48

lakh crore (US\$ 113.91 billion) in 2023-24. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

The outlook for 2025 depends on how effectively India addresses its economic challenges.

Key priorities include:

- **Boosting Consumption:** Wage growth, employment initiatives, and targeted welfare programs are essential to reviving domestic demand.
- **Encouraging Private Investment:** Streamlined policies, reduced tariffs, and greater ease of doing business can attract both domestic and foreign investors.
- **Expanding Global Trade:** Lowering trade barriers and enhancing export competitiveness are crucial to capturing a larger share of global markets.
- **Sustaining Reforms:** Addressing inefficiencies in the informal sector, agriculture, and traditional industries will ensure more balanced growth.
- **Monetary Policy Adjustments:** While rate cuts may provide short-term relief, they must be complemented by structural measures to stimulate demand and investment.

POWER & ELECTRICAL EQUIPMENT INDUSTRY

GLOBAL POWER EQUIPMENT MARKET

The Power Equipment Market size is estimated at USD 33.16 billion in 2025, and is expected to reach USD 42.06 billion by 2030, at a CAGR of 4.87% during the forecast period (2025-2030).

Power Equipment Market
Market Size in USD Billion
CAGR 4.87%

The Latin American power equipment market is experiencing significant transformation driven by rapid industrialization and urbanization across major economies. Countries like Brazil, Argentina, Mexico, and Chile are actively strengthening their transmission and distribution networks through the construction of new transmission lines and substations to bridge the energy supply-demand gap. This expansion is particularly evident in Colombia, which surpassed Chile in power generation with a remarkable 5% growth between 2022 and 2023, significantly above its decade average of 3%. The region's commitment to infrastructure development is further demonstrated by Brazil's projected electricity consumption, which is expected to exceed 590 TWh by 2027, necessitating substantial investments in power equipment and distribution systems.

The market is witnessing a notable shift towards renewable energy integration and grid modernization. Chile's power sector exemplifies this transition, with an installed power capacity of 34.27 GW in 2023, of which 41% comes from renewable sources. This transformation is supported by significant investments from major industry players, as evidenced by WEG's announcement in December 2023 to invest USD 243.45 million over three years to expand its transformer production in Brazil, Mexico, and Colombia, aiming to boost production capacity by approximately 50%.

Recent developments in the wind energy sector are reshaping the power equipment industry landscape. In December 2023, Mingyang Smart Energy secured a 240 MW preferred supplier agreement for an onshore wind project in Brazil, while ACCIONA Energía successfully commissioned the 135.7 MW San Juan de Marcona wind farm in Peru. These developments are complemented by strategic equipment supply agreements, such as Eletrobras Furnas' acquisition of power transformers from WEG in June 2024 for the expansion of the West Zone Substation in Rio de Janeiro, demonstrating the region's commitment to enhancing grid infrastructure.

The market is characterized by increasing technological sophistication and efficiency improvements in power equipment. Peru's power sector demonstrates this progression, generating 30.22 TWh of electricity between January and July 2024, marking a 2.57% increase from the previous period's 29.46 TWh. This growth is supported by the implementation of advanced technologies in power equipment, including smart transformers, efficient wind turbines, and modern stationary engines, which are crucial for maintaining grid stability and improving power distribution efficiency across the region's diverse geographical terrain.

Power Equipment Market Trends

Growing Electricity Demand & Infrastructure Development

The escalating global electricity demand, driven by rapid population growth, urbanization, and industrialization, continues to be a primary driver for the power equipment market. This increasing demand necessitates substantial investments in power transmission equipment and distribution infrastructure. For instance, in March 2024, EIB Global and Ecuador's state-owned Empresa Pública Estratégica Corporación Eléctrica del Ecuador (CELEC EP) signed a USD 125 million loan agreement for developing the Ecuadorian segment of a power interconnection project linking Ecuador with Peru. The project includes a 550 km high-voltage transmission line stretching from Ecuador's Chorrillos substation to Peru's Nueva Piura substation, demonstrating the scale of infrastructure development required to meet growing demand.

The expansion of transmission and distribution networks across Latin America further exemplifies this trend. In July 2024, Chile's Transelec Holdings Rentas partnered with GE Vernova for the delivery of synchronous condensers and high-voltage substations for the Ana Maria and Monte Mina substation projects in Northern Chile. Similarly, in April 2024, the Colombian National Environmental License Authority (ANLA) approved the Amanecer Solar Park project with a 150 MW generation capacity, which includes a 230 kV transmission line connecting to the National Interconnected System. These developments highlight the continuous investment in power distribution equipment to ensure reliable electricity supply and meet growing demand.

Renewable Energy Integration & Grid Modernization

The global push towards renewable energy integration is driving significant demand for power equipment, particularly in transmission and distribution infrastructure. According to the International Renewable Energy Agency, the global renewable energy installed capacity reached 3,371.8 GW in 2022, representing a substantial 9.5% growth from 2021. This transition necessitates specialized power systems to handle the intermittent nature of renewable energy sources. For example, in December 2023, Mingyang Smart Energy secured a 240 MW preferred supplier agreement for an onshore wind project in Brazil, which includes 30 units of MySE 4.0-156 model and 19 MySE 6.25-172 machines, demonstrating the growing demand for advanced power equipment in renewable energy projects.

The need for grid modernization to accommodate renewable energy sources is driving investments in smart grid technologies and power equipment upgrades. In May 2024, Centrosur in Ecuador established a technology collaboration with Gridspertise to revamp and digitize its distribution network, emphasizing smart metering and grid infrastructure initiatives. Similarly, in June 2024, ENGIE Chile received environmental approval for its electrical transmission project in Rengo, marking the company's first transmission project in the region. These developments underscore the growing importance of modern power systems in facilitating the integration of renewable energy sources while maintaining grid stability and reliability.

Industrial Growth & Urbanization

The rapid pace of industrialization and urbanization across Latin America is creating substantial demand for industrial power equipment across various sectors. In February 2024, Freudenberg Medical commenced construction of its second production site in Costa Rica with a USD 25 million investment, highlighting the industrial expansion driving power equipment demand. Additionally, the proliferation of data centers, exemplified by Amazon Web Services' USD 205 million data center project in Santiago, Chile, announced in January 2024, demonstrates the growing need for reliable commercial power equipment to support digital transformation.

The construction sector's growth is another significant driver for power equipment demand. In Costa Rica alone, the National Institute of Statistics and Censuses (INEC) reported 44,265 construction projects in 2022, marking a 9.2% increase from the previous year, with 24,418 housing units approved. This construction boom necessitates substantial power infrastructure development, including transformers, distribution systems, and backup power solutions. Similarly, Panama's maritime authority unveiled a USD 3 billion project portfolio for port infrastructure development through 2040, encompassing 26 ports and requiring significant power machinery installations for operational efficiency.

Government Policies & Investments

Government initiatives and policies supporting renewable energy adoption and grid modernization are driving significant investments in power equipment. In Colombia, the government's commitment to increasing unconventional renewable energy contribution from 1% to 12% by 2030 has catalyzed numerous power infrastructure projects. This is evidenced by Enel securing a USD 300 million loan from the International Finance Corporation in December 2023 for transmission and distribution projects in Colombia, including the development of 4.1 km of high-voltage transmission lines and 50 km of medium-voltage distribution lines. The implementation of supportive regulatory frameworks and investment incentives continues to drive market growth. For instance, Ecuador's electricity master plan unveiled in 2019 sets ambitious targets of including 1.4 gigawatts of new renewable energy capacity in the grid by 2031, supported by significant investments in grid infrastructure. The government has invested USD 241 million for the National Transmission System and USD 340 million for three new high-voltage transmission lines projects since 2022. Similarly, Chile's commitment to generating 70% of its electricity from renewables by 2030 has led to substantial investments in power equipment infrastructure, with the Chilean Association for Renewable Energy (ACERA) projecting the addition of over 5.0 gigawatts of renewable power annually between 2022 and 2025.

India Wire and Cable Market

The India wires and cables market size was valued at USD 9.32 billion in 2024. The market is projected to grow from USD 10.01 billion in 2025 to USD 17.08 billion by 2032, exhibiting a CAGR of 7.94% during the forecast period.

India has observed a substantial rise in the demand for wires and cables due to the country's ambitious renewable energy goals and the growing awareness of the potential of renewable energy, such as solar and wind power. In solar power plants, photovoltaic (PV) projects require a high-quality cabling system that connects all electrical components with minimal energy loss. The significant growth of solar panels in India is creating a considerable demand for solar cables. According to industry standards, a 1 MW solar project will use about 50 km of solar cable. Considering the Indian government's target of 100 GW of installed solar capacity by 2022, India's solar cable requirement alone is more than 5 million kilometers.

The spread of the COVID-19 pandemic affected almost every country worldwide. Some countries were at the peak of infection and were urgently building surge capacity in their health systems. The impact of the COVID-19 pandemic on the wires and cables market growth was moderate, as it hampered consumption in many end-use industries. However, as countries emerge from the pandemic and industries recover, there are opportunities for the wire and cable market to rebound. Infrastructure development projects, investments in 5G networks, and the expansion of renewable energy sources could drive the demand for wires and cables in the coming years.

Growing Need for Transmission of Data at Increasingly Faster Speed

Rapid advancements in cable and connection technology are occurring alongside the shift toward digital technology. One of the key trends is that increasing volumes of data must be transmitted at increasingly faster speeds. Specialty cable designs with thermal insulation and space-saving engineering are being tested. Therefore, the trend is moving toward the frequent use of hybrid cables, which combine power cables, data cables, and even pneumatic and hydraulic hoses in a single sheath. When large volumes of data are transmitted, high-speed Cat.7 industrial Ethernet cables can replace some of the slower cables, and fiberglass cables can replace even more copper cables. Along with cables, connectors are also getting thinner. A modular connector system combines multiple contact points for different cable types in a single housing.

Increasing Investments in Smart Grid Projects and Upgradation of Power Transmission and Distribution Systems to Drive Market Growth

Energy storage is crucial to achieving the country's goal of integrating a large share of renewable energy into the electricity system. Clean, reliable, and sustainable power systems increasingly need smart grids. India views smart grid technology as a strategic infrastructure investment that will fund its long-term economic prosperity and help achieve its carbon reduction goals. In India, the main application areas of the smart grid system are energy arbitrage by storing excess renewable energy to reduce constraints, 24/7 and seasonal storage, smart metering, energy accounting, and renewable energy (RA) outage management.

The government launched Revamped Distribution Sector Scheme (RDSS) with an outlay of 3.03 trillion for the next five years from 2021-22 to 2025-26. This scheme aims to provide financial support to Power Distribution Companies (DISCOMs) for the modernization and strengthening of distribution infrastructure, aiming to improve the quality, reliability and affordability of power supply

Fluctuation in the Raw Material Prices May Hinder the Wires and Cables Market Pace

The India wires and cables market highly depends on materials such as copper, aluminum, steel, and PVC for the efficient conduction of power. The conductive material, copper/aluminum, makes up about 40-60% of the cable's raw material. Polymers such as PVC, polyethylene, and other engineering plastics contribute significantly to the cost. Metal supplies from Indian copper/ aluminum producers are almost stagnant, which is mainly due to restrictions on mining bauxite used to produce aluminum. Furthermore, the pollution and environmental concerns arising at copper and aluminum refineries are negatively influencing the supply of these metals in India hindering the India wires and cables market growth.

India Wires and Cables Market Segmentation

By Voltage Analysis: Low Voltage Cable Segment Dominated the Indian Market Owing to Rapid Development in Infrastructure
Based on voltage, the market is segmented into low voltage, medium voltage, high voltage, and extra high voltage. The low voltage segment held the largest India wires and cables market share in 2023 owing to its wide application in multiple sectors.

As India continues to urbanize and develop its infrastructure, there is a significant demand for low-voltage cables to support residential and commercial construction projects. These cables are used for electrical wiring in buildings and infrastructure. The construction of new homes, office buildings, and commercial spaces often requires extensive low-voltage wiring for lighting, power outlets, HVAC systems, and other electrical components.

By End-User Analysis: Construction Emerged as a Dominant Consumer of Wires and Cables Owing to Rapid Urbanization in India
Based on end-user, the market is segmented into aerospace and defense, construction, IT & telecommunications, power transmission & distribution, oil & gas, consumer electronics, manufacturing, automotive, and others. The construction segment held the largest share in 2023 owing to the increasing installation of electrical appliances in the commercial and residential sectors.

The construction industry in India has experienced substantial expansion in recent years, and it is likely to continue rising at double-digit rates in the foreseeable future. The construction of residential and commercial facilities requires a substantial amount of wiring and cabling for power distribution and control systems. Moreover, the expansion of renewable energy projects, such as wind and solar farms, often requires specialized cables for power transmission and connectivity.

OUR MANUFACTURING PROCESS

A. CABLES

The manufacturing process of cables involves several stages, including material selection, conductor formation, insulation, and quality testing. Below is a step-by-step breakdown of the process:

1. Raw Material Selection

The raw material selection process includes conductors, typically made of copper or aluminum for electrical conductivity; insulation and sheathing materials such as PVC, XLPE, PE, or rubber for insulation and protection; and, if required, armoring using steel wire or tape to ensure mechanical protection in high-stress environments.

2. Wire Drawing

Wire drawing involves pulling copper or aluminum rods through dies to reduce their diameter to the required size, ensuring smoothness, uniformity, and consistent electrical conductivity.

3. Stranding (Bunching or Twisting)

Stranding, also known as bunching or twisting, involves twisting individual drawn wires together to enhance flexibility and strength, with configurations such as concentric, rope-lay, or sectoral depending on the cable type.

4. Core Embossing or printing

Core embossing or printing involves marking the cable cores with identification codes, numbers, or colors to distinguish individual conductors within a multicore cable. This process ensures easy identification, reduces installation errors, and enhances safety during wiring and maintenance. The markings are typically applied using inkjet printing, embossing, or laser technology, depending on the cable type and industry requirements.

5. Core Insulation

Core insulation involves applying a protective layer of insulating material, such as PVC, XLPE, or PE, over the conductors to prevent electrical leakage and ensure safe transmission of power or signals. This process enhances the cable's dielectric strength, thermal resistance, and durability, making it suitable for various applications. The insulation is typically extruded onto the conductor using specialized machines to ensure uniform thickness and adherence to industry standards.

6. Core Laying Process

Core laying is the process of arranging and assembling multiple insulated conductors in a specific formation to form a multicore cable. The arrangement, which can follow configurations such as circular or sectoral, ensures optimal space utilization, flexibility, and mechanical stability. This step is crucial for maintaining the cable's structural integrity and performance, especially in high-voltage and industrial applications.

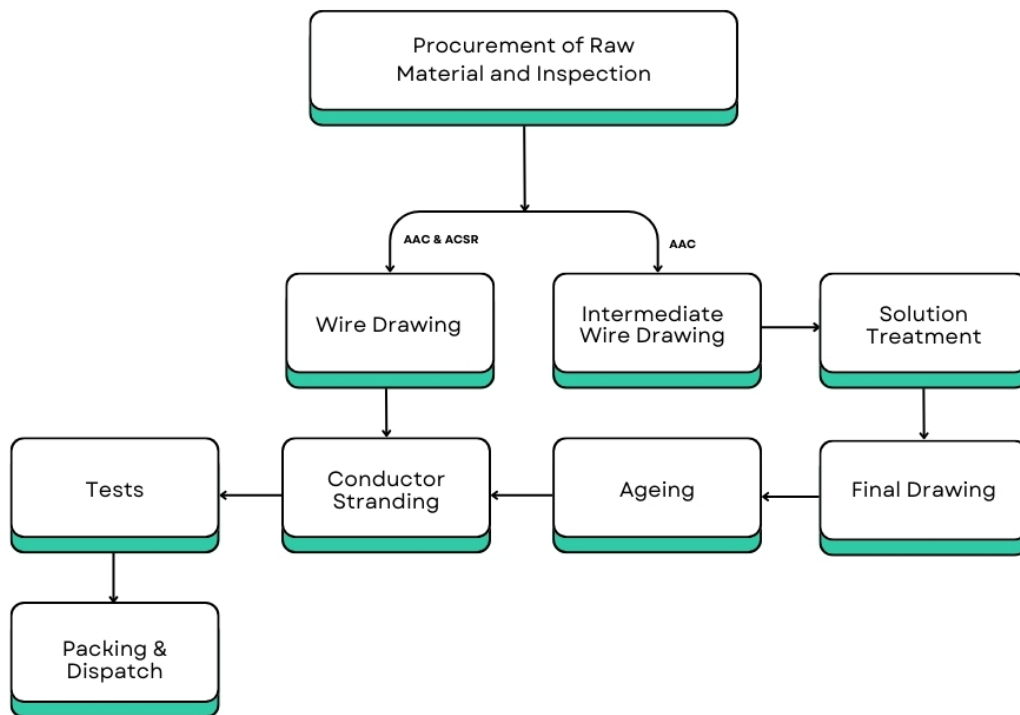

7. Testing & Quality Control

Various tests are conducted to ensure the cable meets industry standards such as IEC, ASTM, IS, and BS. These include the conductor resistance test to assess electrical conductivity, the high voltage test to verify insulation integrity, the tensile strength test to evaluate mechanical durability, and the flame retardancy test to ensure fire resistance.

8. Packaging & Dispatch

The cables are cut to the required lengths and then either coiled or wound onto drums to ensure safe handling and efficient transportation. This process helps prevent tangling, damage, and facilitates easy installation at the destination.

B. CONDUCTORS

1. Procurement of Raw Material and Inspection:

The major Raw Material used for manufacture of cables and conductors comprise of Aluminium, Copper or Alloys Rod. Our manufacturing process is Aluminium or Cooper Rod. The first step involved is procurement of this raw material from various suppliers. Procured Raw Material is opened for inspection and testing of the quality and quantity check.

2. Wire Drawing:

Wire Drawing is a metalworking process used to reduce the cross section of a wire by pulling the rod through a single or a series of drawing die(s). There are many applications for wire drawing, including electrical wiring, cables etc. The rods once inserted into the wire drawing machine are passed through various sections of fixed dimensions. This is to gradually decrease the thickness of the rods turning them into wire.

The wires are then tested in the in-house laboratory for wire tensile strength. Testing process enables us to check that the wires are of good quality.

3. Intermediate Wire Drawing:

For Solution Treatment of the material, the size of aluminium alloy rod is reduced.

4. Solution Treatment:

In this process, the coil is put into the furnace and heated at 500° C for required time and then put into water for cooling.

5. Final Drawing:

The final wire size is drawn as per the final size of the conductor.

6. Ageing:

It is a process wherein the drawn wires are put into an ageing furnace and temperature given is 150° C for required time to improve the tensile strength.

7. Conductor Stranding:

A small wire before concentric stranding adds the most flexibility. Electrical cables may be made more flexible by stranding the wires. In this process, smaller individual wires are twisted together to produce larger wires and are more flexible than solid wires of smaller size. This Stranded group of wires is called conductor. The drawn wires are fed into the stranding machines. Here, a number of wires are stranded together on the stranding machines. These stranded wires are called conductors which are of specified cross- section area. The process of manufacturing conductor is finished at this stage. If a conductor is to be turned into cable, manufacturing process is continued and the below mentioned activities are carried out.

8. Tests:

In order to guarantee high quality required by customers, the cables undergo extensive quality control checks in laboratories, therefore ensuring that all cables are free from defects and ready to be sold. In case of conductors, the manufactured conductors are tested in our in-house laboratory as per relevant specifications and are then packed for dispatch. Whereas, in case of cables, the finished lot of cable samples are taken and tested for required physical, mechanical, chemical and electrical properties as per relevant IS specifications.

9. Packing and Dispatch:

If the cables meet the customer requirements and specifications, they are sent to the dispatch area for supply. The customer also sent their officials for checking the products before taking the delivery of the same.

As per the Notification, any construction of new projects or activities or the expansion or modernization of existing projects or activities as listed in the Schedule attached to the notification entailing capacity addition with change in process and or technology can be undertaken only after the prior environmental clearance from the Central government or as the case may be, by the State

However, in 2016, MoEF issued a notification for integrating standard and objectively monitorable environmental conditions with building permissions for buildings of different sizes with rigorous monitoring mechanism for implementation of environmental concerns and obligations in building projects. This is in line with the objective of the Central government to streamline the permissions for buildings and construction sector so that affordable housing can be provided to weaker sections in urban area under the scheme 'Housing for All by 2022' and is proposing to remove the requirement of seeking a separate environment clearance from the MoEF for individual buildings having a total build up area between 5,000 square metre and 150,000 square metre, apart from adhering to the relevant bye-laws of the concerned State authorities.

Air (Prevention and Control of Pollution) Act, 1981 (the “Air Act”) The Air Act requires that any industry or institution emitting smoke or gases must apply in a prescribed form and obtain consent from the state PCB prior to commencing any activity. The state PCB is required to grant, or refuse, consent within four months of receipt of the application. The PLI Act provides for public liability insurance for the purpose of providing immediate relief to the persons affected by accident occurring while handling any hazardous substance and imposes liability on the owner of hazardous substances for any damage arising out of an accident involving such hazardous substances. The government by way of a notification has enumerated a list of hazardous substances. The FTDRA empowers the Central Government to formulate and amend the foreign trade policy. The FTDRA prohibits any person from making an import or export except under an Importer-exporter Code Number (“IEC”) granted by the director general or any other authorized person in accordance with the specified procedure. The IEC may be suspended or cancelled if the person who has been granted such IEC contravenes, amongst others, any of the provisions of the FTDRA, or any rules or orders made thereunder, or the foreign policy or any other law pertaining to central excise or customs or foreign exchange. The FTDRA also prescribes the imposition of penalties on any person violating its provisions. The FTRR prescribes the procedure to make an

application for grant of a license to import or export goods in accordance with the foreign trade policy, the conditions of such license, and the grounds for refusal of a license. The Foreign Trade Policy came into effect in 2017 and requires all importers and exporters to obtain an IEC. Further, pursuant to the policy, the Director General of Foreign Trade may impose prohibitions or restrictions on the import or export of certain goods, for reasons including the protection of public morals, protection of human, animal or plant life or health, and the conservation of national resources. The Foreign Trade Policy also prescribes restrictions on imports or exports in relation to specific countries, organisations, groups, individuals or products. The Foreign Trade Policy also provides for various schemes, including the export promotions capital goods scheme and duty exemption/remission schemes. India's current Foreign Trade Policy (2015-20) (as extended until September 30, 2022 and thereafter, extended till March 31, 2023) envisages helping exporters leverage benefits of GST, closely monitoring export performances, increasing ease of trading across borders, increasing realization from India's agriculture-based exports and promoting exports from MSMEs and labour-intensive sectors.

Foreign Exchange Management Act, 1999 ("the FEMA") and Rules and Regulations thereunder

The Foreign Exchange Management (Export of goods and services) Regulations, 2000 have been superseded by the Foreign Exchange Management (Export of Goods and Services) Regulations, 2015 ("Export of Goods and Services Regulations 2015") issued by the RBI on January 12, 2016 (last amended on June 23, 2017). The RBI has also issued a Master Circular on Export of Goods and Services. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in this Draft Red Herring Prospectus and the Risk Factors given in the Draft Red Herring Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Regulatory Framework

We have obtained all regulatory permissions which are necessary to run our business, Further, some of the approvals are granted for fixed periods of time and need renewals, which are obtained in the course of business, however, there may be change in statutory regulations at any time which cannot be predicted by us. There can be no assurance that the change in regulations will not impact our operations in the future.

Ability of Management

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of any member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition.

Market & Economic conditions

India is one of the largest economies and is growing at a rapid pace. But in this globalised economy, all the businesses face an uncertain level of volatility from unexpected global events which ranges from global pandemics to wars, to weather changes to supply chain disruption, which may change the economic dynamics and the purchasing capability of the end customers. At the time of market slowdown, the demand falls which has adverse impact on our business.

Competition

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Our Company may face stiff competition from domestic as well as global market as the dynamic changes. Some of our competitors may have greater resources than those available to us. While service quality, technical ability, performance records, etc. are key factors in client decisions among competitors, however, price & quality are the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. Further, there are no entry barriers in this industry and any expansion in capacity of existing market players would further intensify competition. Moreover, as we seek to diversify into new geographical areas, new territories, new emerging markets, we may face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue. These competitive factors may force us to reduce rates, and to pursue new market opportunities. Increased competition could result in reduced demand for our products, increased expenses, reduced margins and loss of market share. Failure to compete successfully against current or future competitors could harm our business, operating cash flows and financial condition.

COVID-19 Pandemic

Since the onset of the COVID-19 pandemic in March 2020, our Company's operations have been affected as our employees faced the threat of getting infected. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national and global economies. To prevent the spread of Covid-19 and to comply with the restrictions, we had to temporarily suspend our operations in order to follow the Government's norms. We continuously monitored the economic conditions and have outlined sufficient measures to combat the pandemic situation at our business premises. Once the lockdown was lifted, our operations restarted in full swing. Initially we did find a little hiccup in finding workers but because of our enterprising organization, we were able to source quality workforce and we were able to train them and we restarted our operations. After lifting the lockdown and resuming our operations the demand in our industry abruptly increased from the different sectors and we attained the highest production during the partial year 2020-21 and FY 2021-22. The demand after pandemic ultimately nullified the impact of shutdown during COVID 19 pandemic. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in the chapter "Risk Factors" beginning on Page No. 28. We are continuing to closely monitor the economic conditions and the effect of COVID-19 and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

Red Sea Crisis

The Israel and Palestine was resulted in getting the commercial cargo stopping the Suez Canal route and taking the longer route resulting in transit time of cargo and also the freight cost being higher than standards for the export shipments. Although there was

minimal effect on the export orders due to this situation but any similar situation which can affect international cargo movement can also affect the company's export performance.

Significant Developments after December 31, 2024 that may affect our Future Results of Operations

The Directors confirm that there have been no other events or circumstances since the date of the last financial statements as disclosed in the Draft Red Herring Prospectus which materially or adversely affect or is likely to affect the business or profitability of our Company or the value of our assets, or our ability to pay liabilities within next twelve months.

h. Borrowing Costs

Borrowing cost includes interest, amortization of ancillary cost incurred in connection with the arrangement of borrowings and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

i. Provisions, Contingent Liabilities and Contingent Assets

Provisions involving substantial degree of estimation in measurement are recognized when there is a present obligation as a result of past events and it is probable that there will be outflow of resources. Contingent Liabilities are not recognized, but are disclosed in the notes. Contingent assets are neither recognized nor disclosed in the financial statements.

j. Earnings Per Share

The basic earnings per share is calculated by dividing the net profit after tax for the year by the weighted average number of equity shares outstanding during the year. For the purpose of calculating diluted earnings per share, net profit after tax during the year and the weighted average number of shares outstanding during the year are adjusted for the effect of all dilutive potential equity shares. The dilutive potential equity shares are deemed converted as of the beginning of the year unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Anti-dilutive effect of any potential equity shares is ignored in the calculation of earnings per share.

k. Cash Flow Statements

Cash flow are reported using indirect method, whereby net profit before tax is adjusted for the effects of transaction of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flow from regular revenue generating, investing and financing activities of the Company are segregated.

l. Operating Cycle

Based on the nature of products/activity of the company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

m. Use of estimates

The preparation of financial statements in conformity with Indian GAAP requires managements to make judgments, estimates and assumption that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by Individual Investors through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to upto three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase is applicable from January 1, 2019 and will continue up to June 30, 2019. Under this phase, a Individual Investor would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing would continue to be six Working Days.

Phase II: This phase commenced on completion of Phase I, i.e., with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular No. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular No. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount will be continued till further notice. Under this phase, submission of the Application Form by a Individual Investor through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is notified pursuant to SEBI press release bearing number 12/2023 and as per the SEBI Circular No. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 09, 2023, where the revised timeline of T+3 days shall be made applicable in two phases i.e. (i) voluntary for all public issues opening on or after September 01, 2023; and (ii) mandatory on or after December 01, 2023. The issue will be made under UPI Phase III of the UPI Circulars.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the SCSBs only after such banks provide a written confirmation, in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law. Accordingly, the Offer has been undertaken pursuant to the processes and procedures under UPI Phase III, subject to any circulars, clarification or notification issued by the SEBI pursuant to the T+3 Notification. The Offer will be advertised in all editions of [●] (a widely circulated English national daily newspaper), all editions of [●] (a widely circulated Hindi national daily newspaper) and Bengali editions of [●] (a widely circulated Bengali daily newspaper, Bengali being the regional language of West Bengal, where our registered office is located), on or prior to the Bid/Offer Opening Date and such advertisement has also been made available to the Stock Exchange for the purpose of uploading on their websites.

All SCSBs offering the facility of making applications in public issues are required to provide a facility to make applications using the UPI Mechanism. Further, in accordance with the UPI Circulars, our Company has appointed [●] as the Sponsor Bank to act as a conduit between the Stock Exchange and NPCI in order to facilitate collection of requests and / or payment instructions of the Individual Investors into the UPI mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful applicants to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the Book Running Lead Manager will be required to compensate the concerned investor.

SEBI through its circular SEBI/HO/CFD/DIL2/CIR/P/2022/45 dated April 05, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 01, 2022, where the application amount is up to ₹5,00,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than ₹2,00,000 and up to ₹5,00,000, using the UPI Mechanism, shall provide their UPI ID in the Bid- cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (*earlier known as Department of Industrial Policy and Promotion*) (“**DPIIT**”), issued the FDI Policy, which is effective from October 15, 2020, which subsumes and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. Under the current FDI Policy, 100% foreign direct investment is permitted in the Manufacturing Sector, under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI. For further details of the aggregate limit for investments by NRIs and FPIs in our Company, see “**Issue Procedure – Bids by Eligible NRIs**” and “**Issue Procedure – Bids by FPIs**” on page 201, respectively.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue. For further details, see “**Issue Procedure**” on page 201.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“**Restricted Investor**”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction / purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Each Applicant should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period. As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, such Equity Shares are being offered and sold (i) outside of the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sales occur.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Bids may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The above information is given for the benefit of the Applicants. Our Company, and the Book Running Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Red Herring Prospectus.
