Internal Risks

Risks Relating to the Business of our Company

- 1. We are dependent on original equipment manufacturers for the telecommunication products we distribute. Any delay or failure on part of such global technology brands to supply products may materially and adversely affect our business, profitability and reputation.***

We do not manufacture any of the telecommunication products we distribute. Presently, our Company derive our majority of revenue from the distribution of Apple's range of devices, including the iPhone, iPad, MacBook, Apple Watch, and allied accessories, as an exclusive regional distributor of Apple products for the state of Madhya Pradesh & Chhattisgarh, some cities of the state of Uttar Pradesh and for majority of cities in Gujarat. Apart from being the distributor of Apple, the Company has recently obtained the distribution rights brand called 'Nothing' for the state of Gujarat. However, the Company at present derives more than 80% of its revenue from distribution of Apple products and remaining from distribution of other brands equipment and accessories, including JIO Recharge, JIO Phones, INFINIX Mobiles, VIVO YIS Mobiles, etc. Our business is, therefore, dependent on our relationships with such original telecom equipment manufacturers and the national distributor of such original telecom equipment manufacturers. In the event the original telecom equipment manufacturers or national distributor, we serve reduce the number of products they offer through our distribution network, or are unwilling to continue to do business with us or intend to terminate or modify the terms of their contracts to our detriment, there could be an adverse effect on our business. The loss or deterioration of our relationship with any of our original telecom equipment manufacturers or national distributors or the authorisation by original equipment manufacturers or national distributor of additional regional distributors, the sale of products by original telecom equipment manufacturers or national distributor to our Channel Partners, customers and end users (instead of using us as the distributor of products), or our failure to establish relationships with new original equipment manufacturers or national distributor or to expand the distribution and supply chain services that we provide, could adversely affect our business, results of operation and financial condition. Any instances or termination by any original telecom equipment manufacturers whose products we distribute or the national distributor through whom we procure products could have an adverse impact on our results of operations. Further, any delay or failure on the part of the original telecom equipment manufacturers or national distributor whose products we distribute, to supply products in a timely manner or any deterioration in the quality of products supplied by the original telecom equipment manufacturers, may adversely affect our business, profitability and reputation.

We typically enter into exclusive and non-exclusive distribution agreements with original telecom equipment manufacturers or national distributor which often contain provisions permitting termination without cause with notice periods. and there is no conflict of interest between the suppliers of the raw materials and third-party service providers and our Company, Promoters, Promoter Group, Key Managerial Personnel, Directors and the Subsidiary/ Group Companies and its directors. Generally, each original telecom equipment manufacturers or national distributor has the ability to an extent to modify the terms and conditions of their agreements with us, such as ability to re-adjust our inventories and receivables. Additionally, the national distributor, we engage with may choose to undertake direct distribution or sale of products either by themselves or they may appoint other distributors for territories in which we distribute products. Any such alteration of distribution Agreement which is not favouring our business model may adversely affect our business, profitability and reputation.

- 2. Our business is dependent on telecommunication brands effectively maintaining, promoting or developing their brands and maintaining standard quality products including launching new information and communications technology products at regular intervals.***

Our Company derive our majority of revenue from the distribution of Apple's range of devices, including the iPhone, iPad, MacBook, Apple Watch, and allied accessories, as an exclusive regional distributor of Apple products for the state of Madhya Pradesh & Chhattisgarh, some cities of the state of Uttar Pradesh and for majority of cities in Gujarat. Our revenue from sale of Apple Inc. products in total revenue from our operations is detailed below:

(Rs. in Lakhs)

Particulars	September 30, 2024	March 31, 2024	March 31, 2023	March 31, 2022
Revenue from operations	58123.28	105891.92	63,750.83	29,204.04
Revenue from sale of Apple	50812.92	89759.41	57,381.96	23,069.62

Products				
% of Revenue from sale of Apple Products in Revenue from operations	87.42%	84.77%	90%	79%

Many factors are important for maintaining, developing and enhancing brands, and retaining customers of a brand, including increasing brand awareness through brand building initiatives and ensuring customer satisfaction by providing quality customer service. In the event of further development of technology or growing popularity of alternate products which our brands partners are unable to counter, the products of brands partners may become obsolete. In order to remain competitive, the brands we distribute would need to develop, test, manufacture and commercialize new products in a timely manner. Since we do not manufacture the products that we distribute, there can be no assurance that the brands whose products we distribute will be able to effectively promote, develop their brands or maintain standard quality of the products. Further, if the brands whose products we distribute do not launch new products or innovate to keep up with evolving requirements and demands of customers, the demand for products of such brands may witness a decline. A slowdown in demand for existing products in our inventory could result in a write-down in the value of inventory on hand relating to such products. Further, we are not involved in the innovation of products, or in quality control of products manufactured by the brands that we distribute. However, if any of the offerings which we distribute from time to time do not meet standards for quality and performance or customers' subjective expectations, our reputation and customer retention may be impacted, and the demand for such products, which we may already have inventory of, may decrease and may lead to deterioration of business, financial condition and results of operations may be adversely affected.

3. Our Company, our Promoters and Directors are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.

Our Company, our Promoters and Directors are party to certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and legal forums. A summary of outstanding litigation proceedings involving our Company, our Promoters, and our Directors, as on the date of this Prospectus as disclosed in “*Outstanding Litigations and Material Developments*” on page 177 of this prospectus, in terms of the SEBI ICDR Regulations and the Materiality Policy is provided below:

*** The Amount involved in the proceedings may vary at the time of settlement/as per order.*

There can be no assurance that litigations involving our Company, our Promoters and Directors will be decided in favour of our Company, Promoters and Directors and consequently it may divert the attention of our management and Promoters and consume our corporate resources and we may incur significant expenses in such proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against Company, our Promoters and Directors, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares.

Furthermore, we may not be able to quantify all the claims in which we are involved. Failure to successfully defend these or other claims or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subjected to legal and other costs relating to defending such litigation, and such costs could be substantial. In addition, we cannot assure that similar proceedings will not be initiated in the future. This could adversely affect our business, cash flows, financial condition, and results of operation. For further details, pertaining to material pending outstanding litigations involving our Company, our Promoters and Directors, see “***Outstanding Litigations and Material Developments***” on page 177.

4. If we are unable to maintain our relationships with our customers or if any of these parties change the terms of their arrangements with us, our business could be materially and adversely affected.

We distribute our products to customers, who are B2B end-customers. Accordingly, our sales are subject to demand variability by our customers. We do not enter into long-term agreements with our customers for purchase of our products or provision of solutions. Since our customers are generally not obliged to continue purchasing products and/or services from us, or otherwise retain their business relationships with us, there is no assurance that their purchase orders or engagements will remain constant or increase or that we will be able to maintain or add to our existing customer base. While the level and timing of orders we receive vary for multiple reasons, including seasonal buying by end-users and general economic conditions, we may also witness reduced orders owing to our customers receiving better prices, terms and conditions from our competitors.

If we are unable to anticipate and respond to the demands of our customers, we may lose customers because we have an inadequate supply of products to cater to their particular requirements. If the customers wish to change the terms of their typical contracts with us, we may not be able to negotiate terms which are beneficial to us or which are financially viable. If we are unable to negotiate mutually agreeable terms with such parties, we may lose our customers. We may be unable to maintain or grow the size of our customer base or the level of engagement of our customer. This could materially and adversely affect our business, financial condition, cash flows and results of operations.

5. We could be subject to product liability claims, which may have a material adverse impact on us.

Due to the nature of our business, we face a risk of the products that we distribute containing quality issues or undetected errors or defects. These may result from the design or manufacture of the product, or from the software or other parts used in the product, over which we have no control. We may face the risk of legal proceedings and claims being brought against us by our customers on account of sale of any defective products. While the brands are generally accountable for defective products, our ability to avoid such liabilities may be limited as a result of differing factors, such as the inability to exclude such damages due to applicable laws of the specific jurisdiction where the business of original equipment manufacturer is conducted. While we have not been subject to any product liability or defect claims in the past, we cannot assure you that we will not be subject to such claims in the future. Our business and reputation may be adversely affected as a result of a significant quality or performance issue in the products sold by us, if we are required to pay for the associated damages. Further, any defect in the products may lead to losing customers if their claims are not addressed to their satisfaction. In addition, serious quality issues can expose us to product liability or recall claims in the event that the products we distribute fail to meet the required quality standards, or are alleged to cause harm to customers. While we are generally not held accountable for such claims, we may face the risk of legal proceedings and product liability claims being brought against us, legitimate or otherwise, by various entities including consumers, redistributors and government agencies for various reasons including for defective products sold.

6. The reputation and goodwill associated with our brand name is critical to the success of our business. An inability to maintain or enhance the popularity of our brand among brands and customers may adversely impact our business prospects and financial performance.

As more than 80% of our revenue comes from the distribution of Apple products in the designated territories. Being associated with the Apple brand enhances the distributor's credibility and attracts customers seeking premium technology products. Our brand is critical to our business success, and affects our ability to maintain and enhance the popularity of our Company. Our ability to develop our brand name and retain goodwill is dependent on the perception the brands specially the Apple Brand, we serve or the customer have of us, and recognition of product quality, variety of products, market penetration, accessibility of products that we distribute.

Any negative publicity or perception of customers relating to the quality of products that we supply, range of the portfolio of products supplied by us, pricing strategy, among others, may adversely impact public perception of the products that we distribute. As on date of this we have not registered our trademark and thus unauthorized use of our brand name or logo by third parties could adversely affect our reputation, which could in turn adversely affect our business, financial condition, cash flows and results of operations. As our business expands into new markets and regions and as the industry in which we operate becomes increasingly competitive, maintaining and enhancing the image of our brand name may become increasingly difficult and expensive. An inability to enhance the visibility of our brand name may adversely impact consumer goodwill and brand recall, and consequently our business prospects and financial performance.

7. The business premises from where we operate are not owned by us.

Our business premises including our registered office is not owned by us and are taken on lease/rent basis. If any such lease/rent agreements under which we occupy or use the premises are not renewed on terms and conditions that are favourable to us, or at all, we may suffer a disruption in their operations which could have a material adverse effect on our business, financial condition and results of operations. If we do not comply with certain conditions of the lease, the lessor may terminate the lease, which could have an adverse effect on their operations. While we have not experienced any issue in renewing the lease arrangement in the past, there can be no assurance that renewal of lease/rent agreements with the owner will be entered into. there is no conflict of interest between the lessor of the immovable properties and our Company, Promoters, Promoter Group, Key Managerial Personnel, Directors and the Subsidiary/ Group Companies and its directors. In the event of non-renewal of lease/rent arrangements, we may be required to shift their business premises to a new location and there can be no assurance that the arrangement we would enter into in respect of new premises would be on such terms and conditions as the present one.

8. We extend credit to our customers for a significant portion of our sales to them. Any negative trends in their businesses could cause us significant credit loss and negatively impact our cash flow and liquidity position.

We extend credit to our Channel Partners and other customers for a significant portion of our sales to them. Set forth below are details of our products sold on credit;

(Rs. in Lakhs)

Particulars	September 30, 2024	March 2024	March 2023	March 2022
Value of products initially sold on credit	58123.28	105891.92	63,750.83	29,204.04
Value of products initially sold on credit, as a percentage of our revenue from operations (%)	100	100	100	100
Average trade receivable days	12	19	13	29

We generally extend a credit period of time, after the date of invoice, to make payment. As a result, we are susceptible to the risk that our customers will not pay for the products they purchase. While we try to mitigate such incidents by conducting diligence on our customer's financial condition and market feedback to minimize our credit exposure of any non-payments, we cannot assure you that such measures will be successful or that we will be able to recover our trade receivables and monies owed to us. Our credit exposure risk may increase due to liquidity or solvency issues experienced by our customers as a result of various reasons such as an economic downturn, etc. If we are unable to collect payment for products distributed by us to customers or if such customers are unable to pay for the products in a timely manner, it may negatively impact our cash flow and

liquidity position.

9. ***We have experienced negative cash flows from operating activities and may do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.***

The Company has reported negative cash flow from operating activities in Financial year 2022 and Financial year 2024, and for sixmonths ended September 30, 2024 as per the Restated Consolidated Financial Information as given below:

(₹ In Lakhs)

Particulars	For nine months ended September 30, 2024	For year ended March 31,		
		2024	2023	2022
Net cash flow generated from/ (utilized in) operating activities (A)	616.49	(2,565.32)	725.30	(462.89)

(Figures in brackets are negative)

For details, see “*Restated Financial Statement –*” on page .127

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. We may continue to have negative operating cash flows in future. If our Company is not able to generate sufficient operating cash flows, it may adversely affect our business and financial operations. For further details, see “*Restated Financial Statement*” on page 127

10. ***We purchase inventory in anticipation of sales, and if we fail to manage our inventory effectively during that period or if the inventory value declines, our business and results of operations could be adversely affected.***

We purchase inventory on projected sales and demand forecasts and if we fail to manage our inventory effectively, our business and results of operations may be adversely affected. As such, we provide partial payments in order to secure our inventory. In Fiscal 2022, 2023, 2024 and the six months ended September 30, 2024, our purchases of stock-in-trade amounted to ₹28684.25 lakhs, ₹63118.80 lakhs, ₹115147.64 lakhs and ₹55001.71 lakhs, and accounted for 98.22%, 99.01%, 108.74% and 94.63%, respectively, of our revenue from operations. In the event that there is an abrupt and substantial decline in demand for one or more of the products that we supply, a change in product development plans, or an unanticipated change in technological requirements for any of the products that we distribute, we may be required to record additional accruals for cancellation fees that may be payable with respect to such orders, which would adversely affect our results of operations. The products we source may become obsolete or less relevant if we fail to predict accurately future development trends or adapt to the evolving market demand. Our reputation and results of operations will continue to depend on our ability to anticipate these changes accurately and to expand our product portfolio and solution offerings to meet end customers’ evolving needs.

We may fail to accurately predict order quantities, and may experience significant inventory overhang in the event demand for a particular product or brand whose products we distribute declines. While we perform a detailed review of our inventory based on multiple factors including demand forecasts, product life cycle status, product development plans, current sales levels and component cost trends, certain of our inventories may lose value in the future due to circumstances including future demand or market conditions for our products being less favourable than forecasted, unforeseen technological changes or changes to the product development plans of the brands whose products we distribute, that negatively impact the utility of any of our inventories. While we have not had significant inventory overhang, write-downs or pricing markdowns in the past, we cannot assure you that this will continue to be the case in the future. Further, we are exposed to the risk that our inventory value may decline, and protective terms under our brand agreements may not adequately cover the decline in value, which in turn may affect our business, results of operation and financial condition.

We might also underestimate the demand for certain products, and be unable to supply such products in the required quantities, leading our customers to purchase these products from our competitors.

11. ***Our business requires working capital. Any failure in arranging adequate working capital for our operations may adversely affect our business, results of operations, cash flows and financial condition.***

Our business is working capital intensive. Our company's net working capital consisted of ₹11812.62 lakhs, ₹6906.56 lakhs, ₹3388.33 lakhs and ₹12828.73 lakhs for the financial year ended 2024, 2023, 2022 and for the period ended September 30, 2024, respectively. We meet part of the working capital requirements through borrowings. We have high working capital requirements to maintain sufficient inventory of products for steady supply. We intend to utilize ₹3,000.00 lakhs toward funding working capital requirement of the Company. For details, see "*Objects of the Issue*" on page 64 of this prospectus. A significant amount of our working capital is required for meeting operating expenses of our business, before payment is received for the sale of such products to our customers. Our working capital requirements may increase if the payment terms in our arrangement with customers include reduced advance payments or longer payment schedules. These factors may result in increases in the amount of our receivables, short-term borrowings and the cost of availing such working capital funding.

Growth in our operations may result in increase in the quantum of current assets, particularly trade receivables. Our inability to obtain adequate amount of working capital at such terms which are favourable to us, in a timely manner or at all, may also have an adverse effect on our financial condition. Continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations. We cannot assure you that we will be successful in arranging adequate working capital through borrowings or cash flows from operations. Our inability to maintain sufficient cash flows, credit facilities and other sources of funds, in a timely manner or at all, to meet our working capital requirements may adversely affect our operations and financial condition.

12. We rely on end consumers using one or more of our products, and are thus vulnerable to changes in consumer preferences and behavior that could adversely affect our profitability and financial condition.

As we rely on end consumers using one or more of our products through our customers, our business may be affected by rapidly-changing end consumer preferences. Our results of operations depend on our ability to attract end customers by anticipating, gauging and responding to such changes in consumer preferences. In ascertaining consumer preferences, we may rely on information furnished to us by or on behalf of our customers. We cannot assure you that we would be able to receive updated and accurate information, and be able to interpret it appropriately. If we are unable to anticipate, gauge and respond to changing consumer preferences, or if we are unable to adapt our services to such changes in a timely manner, we may lose or fail to attract customers, who may prefer our competitors. This may adversely affect our business, financial condition, results of operations and cash flows.

13. Any disruption or shutdown of our warehouse facility, or failure to achieve optimal capacity utilisation at such facility could adversely affect our business, results of operations and financial condition.

We store our inventory in our store having storage space and two warehouse situated in Bhiwandi, Maharashtra and Noida, Uttar Pradesh from where products are distributed. We store our inventory at our warehouses, and transport the procured products from warehouses to our customers, based on orders received. While we monitor the inventory at our warehouses and closely track capacity and utilisation of our warehouse, if there is any disruption to the operations at our warehouse, or if we experience any shutdowns of our warehouses due to factors beyond our control, our supply chain and operations will be adversely affected, impacting our ability to honour our contractual obligations, which may expose us to legal claims.

14. We are required to obtain, renew or maintain statutory and regulatory permits, licenses and approvals to operate our business and any delay or inability in obtaining, renewing or maintaining such permits, licenses and approvals could result in an adverse effect on our results of operations

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous.

Additionally, we have applied and are in the process of applying for certain approvals, licenses, registrations and permits, which are necessary for us to continue our business and need to be updated pursuant to conversion from private to public Company. For instance, our Company has applied for: Trade License for its establishment at Raipur; Professional tax registration certificate for our establishment in Rajkot, Gujarat; ; and Professional tax registration certificate for our establishment in Mumbai, Maharashtra. Furthermore, we are required to obtain

certain approvals, licenses, registrations and permits, which are necessary for us to continue our business, however, we have not obtained certain approvals, licenses, registrations and permits which we are required to obtain and company is in process of applying the same. For instance, we are yet to make an application for Professional Tax Registration Certificate for our establishment in Karnataka; Shops and Establishment Registration Certificate for our establishment in Rajkot, Gujarat and Vapi, Gujarat. However, we cannot assure you that upon making such applications, we will be in a position to obtain such approvals. For further information on the nature of approvals and licenses required for our business and details of approvals and licenses applied for and or yet to be applied for, see “**Government and Other Statutory Approvals**” on page 183. In addition, we have, and may need to in the future, apply for certain additional approvals, including the renewal of approvals, which may expire from time to time in the ordinary course.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations. For further details regarding the material approvals, licenses, registrations and permits, which are, pending receipt or renewal, see “**Government and Other Statutory Approvals**” on page 183 of this Prospectus.

15. Our lenders have charge over our movable and immovable properties in respect of finance availed by us.

We have provided security in respect of loans / facilities availed by us from banks and financial institutions by creating a charge over our movable and immovable properties. The total amount outstanding and payable by us as secured loans based on our Restated Financial Statements was ₹10,514.32 lakhs, as on September 30, 2024. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our assets may be subject to forfeiture by lenders, which in turn could have significant adverse effect on our business, financial condition or results of operations. For further details of the secured loans availed by us, see “**Financial Indebtedness**” on page 168 of this Prospectus.

16. We are dependent on third-party transportation providers for the delivery of products distributed by us.

Our success depends on the uninterrupted supply and transportation of products that we distribute. We further deliver products from our warehouses to our customers. For the purposes of delivery of products to and from our warehouses, we substantially rely on third-party transportation and logistics providers. Although we have not encountered any significant disruption to the supply and transportation of products in the past, the operating restrictions/ lockdowns consequent to the outbreak of the COVID-19 pandemic temporarily affected our ability to transport products in the first quarter of Fiscal 2021. There can be no assurance that any such disruptions will not occur in the future as a result of these or other factors and that such disruptions will not be material. Although we do not rely on limited operators for transportation of our products, transportation strikes may have an adverse effect on supplies and deliveries. In addition, products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. A failure to deliver our products in an efficient and reliable manner could have an adverse effect on our business, financial condition and results of operations.

17. Any inability to maintain or manage our workforce could have an impact on our profitability. Further, wage pressures and increases in operating costs may reduce our profit margins.

We are dependent on our workforce for the operation of our business. As on September 30, 2024, we had 07 permanent employees and 84 employees on contractual basis. For further details, see “**Our Business – Human Resource**” on page 87. We maintain a workforce based upon our current and anticipated workloads. At our company, we firmly believe in the fundamental role our employees play in the advancement of our business objectives. To ensure operational efficiency and excellence, we entered into an agreement with Communication Merchant on April 25, 2024, for the supply of manpower specifically tailored to support our office operations.

We may also be required to increase our levels of employee compensation, more frequently than in the past to remain competitive in attracting employees that our business requires. If we are unable to retain talent required for our business, or hire employees with similar talents and experience in the same cost, or unable to continue the contract with the Communication Merchant for the supply of manpower, we may incur additional costs or we may face difficulties in our operations and performance due to lack of skilled and experienced workforce which could have a material adverse effect on our profitability, financial condition and results of operations.

18. We are dependent upon the business experience and skill of our promoters and management personnel. Loss of our senior management or our inability to attract or retain such qualified personnel, could adversely affect our business, results of operations and financial condition.

We believe that our management team plays a key role in the development of our business and we benefit from their industry knowledge and expertise, vision and leadership. We believe the stability of our management team and the industry experience brought on by our individual Promoters and Directors enables us to continue to take advantage of future market opportunities. We believe that our management team is well qualified to leverage our market position with their collective experience and knowledge in the industry, to execute our business strategies and drive our future growth.

Our ability to meet continued success and future business challenges depends on our ability to attract, recruit and retain experienced, talented and skilled professionals. The loss of the services of our key personnel or our inability to recruit or train sufficient number of experienced personnel or our inability to manage the attrition levels in different employee categories may have an adverse effect on our financial results and business prospects. If we are unable to hire additional qualified personnel or retain our existing qualified personnel, our ability to expand our business may be impacted. Our Company's profitability, financial condition and results of operations may also be impacted due to lack of experienced and talented workforce.

19. A significant majority of our revenues from operations are derived from a limited number of customers.

For the six months period ended September 30, 2024 and during the Financial Year 2024, Financial Year 2023 and Financial Year 2022, the contribution towards revenue from our top 10 customers is as follows:

(in ₹ Lakhs)

Sr. No.	Particulars	As at September 30, 2024		FY 2023-24		FY 2022-23		FY 2021-22	
		Revenue	%	Revenue	%	Revenue	%	Revenue	%
1	Revenue from Top 10 customers	58123.28	19.82	1,05,891.92	28.03	63,750.83	29.85	29,204.04	38.40

However, the composition of revenue generated from these customers might change as we continue to add new customers in the normal course of business. Our revenues may be adversely affected if there is an adverse development with such customer, including as a result of a dispute with or our disqualification by such major customers which may lead to decline in our revenue, cash flows and liquidity and there is no conflict of interest between the suppliers of the raw materials and third-party service providers and our Company, Promoters, Promoter Group, Key Managerial Personnel, Directors and the Subsidiary/ Group Companies and its directors. Further, if our customers are able to fulfil their requirements through any of our existing or new competitors providing services with better quality and lower commission and fee, we may lose significant portion of our business and revenue.

20. Our ability to access capital at attractive costs depends on our credit ratings. Non-availability of credit ratings or a poor rating may restrict our access to capital and thereby adversely affect our business and results of operations.

The cost and availability of capital, among other factors, are influenced by our credit ratings. As of July 26, 2023, CARE Ratings Ltd. has assigned our Company a rating of CARE BB; Stable for long-term borrowings and CARE A4+ for short-term borrowings. These ratings reflect the agency's assessment of our financial strength, operating performance, strategic position, and ability to meet our obligations. While our credit ratings have remained stable over the past three financial years without any downgrades, any future adverse changes in our

credit ratings or borrowing limits could impact our ability to raise additional funds and may increase the cost of borrowing. This, in turn, could adversely affect our business and operational results. Additionally, we have not obtained ratings from any other credit rating agencies.

21. *We may not be able to successfully manage the growth of our operations and execute our growth strategies which may have an adverse effect on our business, financial condition, results of operations and future prospects.*

As we continue to grow, we must continue to improve our managerial, technical and operational knowledge and allocation of resources, and implement an effective information technology and management system. In order to fund our ongoing operations and future growth, we need to have sufficient internal sources of liquidity or access to additional financing from external sources, including debt or equity. Further, we will be required to manage relationships with a greater number of clients, distributors, lenders and other third parties. We will need to further strengthen our internal control and compliance functions to ensure that we will be able to comply with our legal and contractual obligations and minimize our operational and compliance risks. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business and operations and training an increasing number of personnel to manage and operate the expanded business. There can be no assurance that we will be able to successfully manage our growth, strategies or that our expansion plans will not adversely affect our existing operations and thereby have an adverse effect on our business, financial condition, results of operations and prospects.

22. *We have in past entered into related party transactions and we may continue to do so in the future*

As of September 30, 2024, we have entered into several related party transactions with our Promoter and individuals and entities forming a part of our Promoter Group. In addition, we have in the past also entered into transactions with other related parties. We confirm that the transactions with Related Parties entered into by our Company in the preceding three years have been carried out at arms' length price and are in compliance with the Companies Act 2013 and the applicable laws. Further, we confirm that the transactions are not prejudicial to the interest of our Company. A summary of the related party transactions during the six months period ended September 30, 2024 and Financial Year 2024, 2023, and 2022 as per applicable Ind GAAP is derived from our Restated Financial Statements. For further details, see "**Restated Financial Information**" on page 127. We hereby confirm that the company's related party transactions in the future shall be done in compliance with Companies act 2013 and applicable laws.

While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

23. *Our Company's insurance coverage may not be adequate to protect us against all material hazards which may result in disruptions of operations/monetary loss on account of stoppage of work.*

We procure insurance for our operations which we believe are sufficient as per industry standards. Our existing insurance coverage may be insufficient to cover all the risks associated with our business and operations and generally do not cover losses from business interruption. We also cannot assure you that we will renew our existing insurance policies in a timely manner or at all. In the case of an uninsured loss, a loss in excess of insured limits or a loss for which we do not have coverage or coverage is prohibitively expensive, including those caused by natural disasters and other events beyond our control, we may be required to pay for losses, damages and liabilities out of our own funds, which could materially and adversely affect our business, financial condition and results of operations. Even if our insurance coverage is adequate to cover our direct losses, we may not be able to take remedial actions or other appropriate measures. Furthermore, our claim records may affect the premiums which insurance companies may charge us in the future.

24. *We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights.*

As on date of this Prospectus, we have not registered our trademark. Any failure to obtain and thereafter renew registration of our trademark may affect our right to use such trademark in future. Further, our efforts to protect our intellectual property in India and abroad may not be adequate and any third-party claim on any of our unprotected intellectual property may lead to erosion of our business value and our reputation, which could adversely affect our operations. Third parties may also infringe or copy our registered brand name in India and abroad which has been registered by us in India. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks in India and abroad.

Moreover, our ability to protect, enforce or utilize our tradename is subject to risks, including general litigation risks. Furthermore, we cannot assure you that such tradename will not be adversely affected in the future by actions that are beyond our control, including customer complaints or adverse publicity from any other source. Any damage to our tradename, if not immediately and sufficiently remedied, could have an adverse effect on our business and competitive position.

- 25. *Our management will have broad discretion in how we apply the Net Proceeds, including interim use of the Net Proceeds, and there is no assurance that the objects of the Issue will be achieved within the time frame expected or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment.***

We intend to use Net Proceeds from the Issue towards; (i) funding the working capital requirements of the company; and (ii) general corporate purposes. For details of the objects of the Issue, see “*Objects of the Issue*” on page 64. Our management will have broad discretion to use the Net Proceeds, and investors will be relying on the judgment of our management regarding the application of the Net Proceeds. Moreover, we cannot undertake any material deviation in the utilisation of the Net Proceeds as disclosed in this Prospectus without obtaining the approval of shareholders of our Company through a special resolution. Our Company may have to revise its management estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment, costs of commodities and interest or exchange rate fluctuations and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in its business.

- 26. *Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval.***

We propose to utilize the Net Proceeds as stated under “*Objects of the Issue*” on page 64. However, our funding requirements and the deployment of Net Proceeds are based on management estimates and have not been independently appraised.

As per section 27 of the Companies Act, the objects of utilization of the Net Proceeds from the fresh issue as disclosed in this Prospectus can only be varied after obtaining the shareholders’ approval vide a special resolution. In the event, the Company wishes to vary the objects for which the net proceeds from the fresh issue are required to be varied, our Company may not be able to obtain the Shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders’ approval may adversely affect our business or operations. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our ability to respond to any change in our business or financial condition, and thus, adversely affecting our business and results of operations.

Further, our Promoters would be required to provide an exit opportunity to Shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders may deter our Promoters from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI. In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, or vary the terms of any contract referred to in the Prospectus, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial

condition by re-deploying the unutilised portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

27. *One of our Group Company is engaged in activities which is similar to our business. This may be a potential source of conflict of interest for us and which may have an adverse effect on our business, financial condition and results of operations*

HV Connecting Infra (India) Private Limited, our Group Company have some objects similar to that of our business. Accordingly, it may compete with us like any other third-party competitor. While necessary procedures and practices may be adopted as permitted by law to address any instances of conflict of interest, if and when they may arise, we cannot assure you that these or other conflicts of interest will be resolved in an impartial manner. There can be no assurance that our Promoters or our Group Company or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition. Thus, in future conflicts of interests may arise in allocating business opportunities amongst our Company and our Group Companies and member of Promoter Group. In cases of conflict, our Promoters may favour other companies or ventures in which our Promoters have interest.

28. *We may be affected by competition law, the adverse application or interpretation of which could adversely affect our business.*

The Competition Act, 2002 (“**Competition Act**”) seeks to prevent business practices that have an Appreciable Adverse Effect on Competition (“**AAEC**”) in the relevant market in India. Under the Competition Act, any arrangement, understanding or action in concert between enterprises, whether formal or informal, which causes or is likely to cause an AAEC in India is void and attracts substantial monetary penalties. The Competition Act also prohibits abuse of a dominant position by any enterprise. The combination regulation (merger control) provisions under the Competition Act require that the acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to, and pre-approved by CCI. However, the applicability or impact of the provisions of the Competition Act on any future acquisition or arrangement entered into by us cannot be predicted with certainty at this stage.

29. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “**Dividend Policy**” on page 126.

30. *The average cost of acquisition of Equity Shares by our Promoter could be lower than the Issue Price.*

Our Promoter’s average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price. For further details regarding average cost of acquisition of Equity Shares by our Promoter in our Company and build-up of Equity Shares by our Promoter in our Company, please refer to the chapters “**Capital Structure**” beginning on page 55.

31. *None of the Directors of the Company have experience of being a director of a public listed company.*

The Directors of the Company do not have the experience of having held directorship of public listed company. Accordingly, they have limited exposure to management of affairs of the listed company which inter-alia entails several compliance requirements and scrutiny of affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, the Company will require to adhere strict standards pertaining to accounting, corporate governance and reporting that it did not require as an unlisted

company. The Company will also be subject to the SEBI Listing Regulations, which will require it to file audited annual and unaudited half-yearly reports with respect to its business and financial condition. If the Company experiences any delays, we may fail to satisfy its reporting obligations and/or it may not be able to readily determine and accordingly report any changes in its results of operations as promptly as other listed companies.

Further, as a publicly listed company, the Company will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of the Company's disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, the Board of Directors of the Company may have to provide increased attention to such procedures and their attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

32. *Proposed objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.*

The objects of the Issue for which the funds are being raised have not been appraised by any bank or financial institution. In the absence of such independent appraisal, the requirement of funds raised through this issue, as specified in the chapter titled "***Objects of the Issue***" are based on the company's estimates and internal research. We may have to revise our management estimates from time to time and consequently our funding requirements may also change. This may result in rescheduling of our expenditure plans and an increase or decrease in our proposed expenditure for a particular object. Deployment of these funds is at the discretion of the management and the Board of Directors of the company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

33. *We operate in a competitive business environment. Competition from existing players and new entrants and consequent pricing pressures could have a material adverse effect on our business growth and prospects, financial condition and results of operations.*

Our business is highly competitive. We expect that competition will continue to intensify both through the entry of new players and consolidation of existing players. Our competitors, may have greater financial resources, better distribution network, technical and marketing resources and generate greater revenues, and therefore may be able to respond better to market changes than we can. The industry in which we operate have low entry barriers and therefore we cannot assure you that our current or potential competitors will not provide products comparable or superior to those we provide or adapt more quickly than we do to changing consumer preferences and market requirements, at prices equal to or lower than those of our products. Increased competition may result in our inability to differentiate our products from those of our competitors, which may lead to a loss of market share. Our ability to compete also depends on a number of factors beyond our control, including the ability of our competitors to attract, train, motivate and retain highly skilled technical employees, the price at which our competitors offer comparable products and the extent of our competitor's responsiveness to customer needs. Our inability to adequately address competitive pressures may have a material adverse effect on our business, prospects, financial condition and results of operations.

34. *Our Promoters and some of our Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses.*

Some of Promoters and our Directors are interested in our Company to the extent of their respective shareholding in our Company as well as to the extent of any dividends, bonus or other distributions on such Equity Shares. We cannot assure you that our Directors will exercise their rights as shareholders to the benefit and best interest of our Company. Further, our Promoters holding Equity Shares may take or block actions with respect to our business which may conflict with the best interests of our Company or that of minority shareholders. For further information on the interest of our Promoters and Directors, other than reimbursement of expenses incurred or normal remuneration or benefits, see "***Our Management***" and "***Our Promoters and Promoter Group***" on pages 113 and 123, respectively.

35. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation and goodwill of our Company. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

36. *We are subject to restrictive covenants under our financing agreements that could limit our flexibility in managing our business or to use cash or other assets. Any defaults could lead to acceleration of our repayment obligations, termination of one or more of our financing agreements or force us to sell our assets, which may adversely affect our cash flows, business, results of operations and financial condition.*

We have entered into agreements for secured short term borrowings with certain banks. As on September 30, 2024 an aggregate of ₹10,514.32 lakhs, was outstanding towards loans availed from banks. The credit facilities availed by us are secured by way of mortgage of fixed assets and hypothecation of current assets (both present and future). In case we are not able to pay our dues in time, the same may amount to a default under the loan documentation and all the penal and termination provisions therein would get triggered. This could severely affect our operations and financial condition. Our financing agreements include certain covenants that require us to obtain lender consents prior to carrying out certain corporate activities and entering into certain transactions, such as, incurring any additional borrowings, undertaking capital expenditure, effect any change in shareholding pattern and management control of the Company amongst others. In addition, any breach of financial or non-financial covenant may qualify as an event of default under financing agreements.

We cannot assure you that the lenders will not seek to enforce their rights in respect of any breach by us under our financing agreements. Any failure to comply with any condition or covenant under our financing agreements that is not waived by the lenders or is not otherwise cured by us, may lead to a termination of our credit facilities and/or acceleration of all amounts due under the relevant credit facility. Further, if the obligations under any of our financing agreements are accelerated, we may have to dedicate a substantial portion of our cash flow from operations to make payments under the financing documents, thereby reducing the availability of cash for our operations. In addition, the lenders may enforce their security interest in certain of our assets. Moreover, during the period in which we are in default, we may face difficulties in raising further loans. Any future inability to comply with the covenants under our financing agreements or to obtain the necessary consents required thereunder may lead to termination of our credit facilities, levy of penal interest, acceleration of all amounts due under such financing agreements and enforcement of any security provided. Any of these circumstances may have an adversely affect our business, results of operation and financial condition. Further, the said credit facilities can be renewed/enhanced/cancelled/suspended/reduced and the terms and conditions of the same can be altered by the lending banks, at their discretion. In the event, the lenders refuse to renew / enhance the credit facilities and/or cancel / suspend / reduce the said credit facilities and/or alter the terms and conditions to the derogation of our Company, then our existing operations as well as our future business prospects and financial condition may be severely affected.

37. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

After completion of the Issue, our Promoters and Promoter Group will collectively own a majority of the Equity Shares of our Company. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our AoA. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

- 38. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Prospectus.***

While facts and other statistics in the Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various governmental and organizational web site data that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled **“Industry Overview”** beginning on page 79. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

- 39. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our management and our board of Directors, though it shall be monitored by our Audit Committee.***

As per SEBI ICDR Regulations, as amended, appointment of monitoring agency is required only for Issue size above 10,000 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public. For details, please refer Chapter titled **“Objects of the Issue”** beginning on page 64.

ISSUE SPECIFIC RISKS:

- 40. *Subsequent to the listing of the Equity Shares, we may be subject to surveillance measures, such as the Additional Surveillance Measures and the Graded Surveillance Measures by the Stock Exchanges in order to enhance the integrity of the market and safeguard the interest of investors***

Subsequent to the listing of the Equity Shares, we may be subject to Additional Surveillance Measures (“ASM”) and Graded Surveillance Measures (“GSM”) by the Stock Exchanges and the Securities and Exchange Board of India. These measures have been introduced to enhance the integrity of the market and safeguard the interest of investors. The criteria for shortlisting any security trading on the Stock Exchanges for ASM is based on objective criteria, which includes market-based parameters such as high low-price variation, concentration of client accounts, close to close price variation, market capitalization, average daily trading volume and its change, and average delivery percentage, among others. A scrip is subject to GSM when the share price is not commensurate with the financial health and fundamentals of the company. Specific parameters for GSM net worth, net fixed assets, PE, market capitalization and price to book value, among others. Factors within and beyond our control may lead to our securities being subject to GSM or ASM. In the event our Equity Shares are subject to such surveillance measures implemented by SEBI and the Stock Exchanges, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

- 41. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time

of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

42. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares will be determined by fixed price method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. For details, see “**Basis for Issue Price**” on page 70. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

43. *Any future issuance of Equity Shares, or convertible securities or other equity linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. Any sale of our Equity Shares by our Promoters or major shareholders or future equity issuances, by us may adversely affect the trading price of our Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. We cannot assure you that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

44. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

45. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities, and shareholders’ rights may differ from those that would apply to a company in another jurisdiction. Shareholders’

rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

46. *QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Issue Period and withdraw their Bids until Bid/ Issue Closing Date. While our Company is required to complete Allotment pursuant to the Issue within 3 Working Days from the Bid/Issue Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

EXTERNAL RISK FACTORS:

47. *Our business and results of operations could be adversely affected by disruptions in global economic and geo political conditions.*

As we derive majority of our revenue from export sales, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax including antidumping duties and countervailing duties, trade, and monetary policies; occurrence of natural or man- made disasters; downgrade in debt rating; and adverse global economic conditions due to various reasons such as, effect of COVID Pandemic, ongoing dispute between Russia and Ukraine etc. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of its large agricultural and manufacturing sectors, trade deficits, recent initiatives by the Indian government and other factors. Unfavourable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

48. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in India is evolving and subject to change. Such changes in applicable law and policy in India, including the instances described below, may adversely affect our business, financial condition, results of operations, performance and prospects in India, to the extent that we are not able to suitably respond to and comply with such changes.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs relating to compliance with such new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

49. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.*

Under the Companies Act, 2013, a company having share capital and incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of our Equity Shares voting on such resolution.

However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted.

50. *Investors may not be able to enforce judgments obtained in foreign courts against us.*

We are a public limited company under the laws of India. All of our directors and officers are Indian nationals and all or a significant portion of the assets of all of the directors and officers and a substantial portion of our assets are located in India. As a result, it may be difficult for investors to effect service of process outside India on us or on such directors or officers or to enforce judgments against them obtained from courts outside India, including judgments predicated on the civil liability provisions of the United States federal securities laws.

India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, which includes the United Kingdom, United Arab Emirates, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements of the Indian Code of Civil Procedure, 1908 (the “**Civil Code**”). The Civil Code only permits the enforcement of monetary decrees, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgment in such a jurisdiction against us, our officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court. However, the party in whose favour such final judgment is rendered may bring a fresh suit in a competent court in India based on a final judgment that has been obtained in a non-reciprocating territory within three years of obtaining such final judgment. It is unlikely that an Indian court would award damages on the same basis or to the same extent as was awarded in a final judgment rendered by a court in another jurisdiction if the Indian court believed that the amount of damages awarded was excessive or inconsistent with public policy in India. In addition, any person seeking to enforce a foreign judgment in India is required to obtain prior approval of the Reserve Bank of India to repatriate any amount recovered pursuant to the execution of the judgment.

51. *We are a public limited company under the laws of India. All of our directors and officers are Indian nationals and all or a significant portion of the assets of all of the directors and officers and a substantial portion of our assets are located in India. As a result, it may be difficult for investors to effect service of process outside India on us or on such directors or officers or to enforce judgments against them obtained from courts outside India, including judgments predicated on the civil liability provisions of the United States federal securities laws. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the industry in which we operate, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, and our business, prospects, financial condition and results of operations, in particular.

52. *We are subject to regulatory, economic and social and political uncertainties and other factors beyond our control.*

We are incorporated in India and we conduct our corporate affairs and our business in India. Our Equity Shares are proposed to be listed on the Emerge platform of NSE, subject to the receipt of the final listing and trading approvals from the NSE. Consequently, our business, operations, financial performance and the market price of our Equity Shares will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- political instability, terrorism, military conflict, epidemic or public health issues in India or in countries in the region or globally, including in India's various neighbouring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- Instability in financial markets and volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- changes in India's tax, trade, fiscal or monetary policies; and
- other significant regulatory or economic developments in or affecting India or its logistics sector.

Moreover, a fall in the purchasing power of our customers, for any reason whatsoever, including rising consumer inflation, availability of financing to our customers, changing governmental policies and a slowdown in economic growth may have an adverse effect on our customers' revenues, savings and could in turn negatively affect their demand for our products. In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

53. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue. India has experienced high inflation relative to developed countries in the recent past. Continued high rates of inflation may increase our expenses related to costs of raw material, rent, salaries or wages payable to our employees or any other expenses. There can be no assurance that we will be able to pass on any additional expenses to our customers or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

54. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There

can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

55. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

56. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

57. *The occurrence of natural or man-made disasters may adversely affect our business, financial condition, results of operations and cash flows.*

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19 and man-made disasters, including acts of war such as Russia's invasion of Ukraine, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations.

A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 virus. A worsening of the current outbreak of COVID-19 pandemic or future outbreaks of COVID-19 or a similar contagious disease could adversely affect the global economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have a material adverse effect on our business and the trading price of the Equity Shares.

Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

58. *Our ability to raise foreign capital may be constrained by Indian law.*

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions limit our financing sources and could constrain our ability to obtain financings on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that any required regulatory approvals for borrowing in foreign currencies will be granted to us without onerous conditions, or at all. Limitations on foreign debt may have an adverse effect on our business growth, financial condition and results of operations.

59. *Rights of shareholders under Indian laws may be different from laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as our shareholder than as a shareholder of an entity in another jurisdiction.

INDIA'S ELECTRONICS MANUFACTURING AND EXPORT MARKET

The Electronics Sector in India

The Indian electronics industry is one of the most rapidly growing industries worldwide. Electronic products have continuously impacted and shaped our lifestyles in the current digital era. The advent of technology has led to seamless activities and accelerated the digital revolution to the next level. Furthermore, demand for electronic devices is anticipated to rise steadily and continue to be a key economic driver worldwide.

Global market share of key product segments in 2020-21 (US\$ billion)

The global electronics industry was estimated at US\$ 2.9 trillion in 2020. The Indian government has widely recognised the strategic importance and growth potential of this industry in its National Policy for Electronics (NPE) 2019. NPE was unveiled with a vision to make the country a comprehensive hub for Electronics System Design and Manufacturing (ESDM) by developing a supportive environment for the industry to compete with global peers. Moreover, the ESDM industry is one of the top 25 priority sectors in the government's Make in India initiative; therefore, it is a crucial contributor to economic growth. Indian policymakers have put great emphasis on developing sustainable manufacturing and exports of electronic devices. Overall, electronics manufacturing saw exponential growth to reach US\$ 67.3 billion in 2020-21 from US\$ 37.1 billion in 2015-16. However, the COVID-19 pandemic caused serious disruptions across the globe, but the industry has shown strong signs of recovery.

According to the 'A call to action for broadening and deepening electronics manufacturing' report by the Ministry of Electronics and IT, India aims to achieve electronics manufacturing worth US\$ 300 billion by 2026. Furthermore, the report highlights various segments established to add substantially to this objective, including contributions from India's electronic goods exports. The report demonstrates an execution strategy by proposing short and long-term actions required to achieve the desired goal.

India has been one of the pioneers of the Local Goes Global movement. The country is focusing on developing its share in the global value chain, establishing export hubs in different states, constructing a high-quality and seamless supply chain, and increasing its overall market share in the electronics export market.

Importance of India in Global Electronics Market

The Indian economy accounts for nearly 3.2% of the global economy, and its population is almost 3.2% of the total global population. The Government of India aspires to make the country a substantial manufacturing and design hub for electronics as part of its Aatmanirbhar Bharat scheme. The Digital India Programme has led to a paradigm transition towards digitisation and e-governance in India. India's market share in the global electronics manufacturing industry increased to 3.6% in 2020 from 1.3% in 2012. The Production Linked Incentive (PLI) scheme has effectively enticed international champions while giving an impetus to domestic manufacturers and creating national champions with global ambitions. India's electronic manufacturing industry has witnessed a sharp transition in the last few years with various initiatives to market electronics manufacturing. The government's lucrative plans and initiatives have led the electronic manufacturing industry to a high growth trajectory. Additionally, the availability of skilled labour, large domestic market and low-cost labour have contributed to its sharp rise.

Technology has been a crucial driver across industries, influencing all spheres of life. The electronics market share in India is on the rise. In the past few years, India has captured a sizeable market share of the electronics manufacturing ecosystem that drives the technology sector. For the country to be the global electronics production unit of the future and become a US\$ 5 trillion economy by 2025-26, it shall aim to be a US\$ 1 trillion digital economy. Furthermore, special focus will be given to exports in order to accomplish the objectives.

India's Long-term Vision

- Make in India for the world
- Make India the number one exporter and manufacturer of electronics
- Become a substantial player in the global value chain
- Build a comprehensive ecosystem of more than US\$ 1 trillion in the next decade for mobile phones, consumer electronics and IT hardware

India's Short-term Vision

The government aims to make electronics one of the top three export categories by 2025-26. A US\$ 1 trillion digital economy target is projected to boost demand for electronics, which may stand at around US\$ 180 billion by 2025-26. If India can accomplish the manufacturing goal of US\$ 300 billion for electronics, the local market requirement may be fully met by such manufacturing. The US\$ 300 billion target also requires US\$ 120 billion of exports in the global market. Global competitiveness with optimum scale would be pivotal in achieving the

aforsaid targets. Adequate fiscal measures, along with policy measures, would help in meeting the objectives of NPE 2019.

Categories of Electronic Manufacturing

Smartphone Manufacturing

India is one of the largest mobile handset manufacturing countries globally and the second-largest smartphone market in the world. Manufacturing of mobile phones rose to 290 million units in 2020-21 from 60 million units in 2014-15; thus, making the domestic manufacturing of cellular phones and its sub-assemblies one of the core sectors under the Make in India initiative. The Ministry of Electronics and Information Technology (MeitY) unveiled the Phased Manufacturing Programme (PMP) for cellular handsets and other sub-assemblies with an aim to scale up domestic value addition.

Information and Communication Technology (ICT) Hardware

The first use of electronics was in the communication and computing domain. With the rise of integrated circuits, the world witnessed the evolution of the digital computing era. With the introduction of microprocessors, the world saw significant growth in the ICT industry. The advent of ICT has been such that many countries have declared it an indispensable commodity. With a pool of skilled technicians and massive manpower, India has proven its design capabilities for numerous global hardware companies. Additionally, the country is ready to be a worldwide leader and an end-to-end player in the ICT hardware design and development space. India has considerable opportunity for export-led manufacturing and import substitution in the ICT hardware domain.

Moreover, ICT hardware will add high value to India's electronics manufacturing. Emerging domains of artificial intelligence, machine learning and the internet of things, among others, are becoming more popular and are responsible for driving the growth of the ICT hardware segment. Such domains require developing and designing specialised sensors, servers and semiconductors. Large-scale data centres have also evolved in recent years.

In 2020, India witnessed a surge in ICT hardware demand due to COVID-19-led disruptions. Due to the remote working trend, households and individual customers purchased tablets and computers. Enterprises have heavily spent on their data centre infrastructure (to ensure steady demand amid work-from-home and online dealings), and telecommunication service providers have been modernising their infrastructure to cater to surging broadband demand.

Consumer Electronics

Consumer electronics covers any device that contains an electric circuit board that is handy in everyday use by people for the purpose of recreation, entertainment and communication. This encompasses a large category of electronic products, including cameras, digital cameras, visions, calculators, audio devices, clocks, headphones and various home products. Prominent drivers for this market's expansion are easier access, rising awareness, changing lifestyles, dropping unit price and increasing disposable income. Television is a useful device in the home consumer electronics segment and has been recognised as one product for which the country can become the global manufacturing hub. According to the Federation of Indian Chambers of Commerce & Industry (FICCI), India's television production was US\$ 4.24 billion in 2020-21 and is anticipated to reach US\$ 10.22 billion by 2025-26, expanding at a Compounded Annual Growth Rate (CAGR) of 20%. The kind of television sets available in the market includes a wide variety of LCDs, plasma, LEDs and so on, offering high resolution and sharp picture quality. Additionally, a decreasing trend in the pricing of LED and LCD televisions is fuelling the penetration of such televisions in the market. A few initiatives taken by the government include increasing the basic customs duty on multiple consumer electronics goods in order to push companies into replacing imported goods. Furthermore, the government has permitted 100% Foreign Direct Investment (FDI) in the consumer electronics manufacturing segment through the direct route and offered capital expenditure subsidy under the Modified Special Incentive Package Scheme (M-SIPS). Such efforts have attracted foreign companies to establish manufacturing facilities in the consumer electronics domain without establishing a joint venture or other forms of partnerships with domestic entities. A domestic partner is practically and legally needed to distribute consumer electronic goods to end users.

Electronic Components

According to statistics presented by the Global Industry Analyst Inc., the worldwide market for electronic components is estimated to reach US\$ 191.8 billion by 2022, of which Asia Pacific is expected to capture a significant share. In line with global trends, India's electronic components market is ready to grow considerably. Consumer electronics, mobile phones and industrial electronics contribute 82% to demand for electronic components in India. This is observed by the need for electronic components in strategic electronics, computer hardware and light industry sectors. Industries such as mobile phones, strategic electronics and industrial electronics are likely to see significant growth in the near future.

The Future of the Electronics Industry in India

The importance of the electronic industry in India is significant. Global demand for electronic components is currently met by manufacturers based out of India. Considering India's skill set, expertise, demographic dividend and favourable government policies, these manufacturers are encouraged to establish component ecosystems in India. This will help the country in showcasing its technical prowess and setting an example to attract other foreign investors. India's FDI norms have been investor-friendly and will open doors to multiple global manufacturing companies. Additionally, India has been focusing on increasing its research and development capabilities while developing digital and technical proficiency among the people.

Electronics manufacturing needs large-scale operations to be competitive globally. Moreover, different processes in electronics manufacturing are labour intensive and, therefore, would require adequate labour in developing the requirement for plug-and-play facilities like dormitories with optimum facilities. For reducing turnaround time and ensuring rapid operationalisation of electronics manufacturing units, it is essential for the government to construct dormitories on the lines of plug-and-play simulation. Such challenges bring in opportunities for countries like India and will help set the right foundation for its US\$ 5 trillion economy goal. India has the potential to be among the top electronics exports by country, and the government is dedicated to making India a global hub for exports.

India is set to become the largest wearable market in 2023: Report

According to a report by International Data Corporation (IDC) India, India will become one of the largest markets for wearables in 2023. India will account for 130-135 million units out of 504.1 million units that will be shipped by the end of 2023. It will account for 26% of the total units shipped around the world.

Out of a total of 492 million units sold last year, India shipped 100 million, placing it third behind China and North America.

According to a survey released by Counterpoint Research, the Indian wearables market grew by 121% year-on-year (Y-o-Y) in the first quarter of 2023. Low-cost wearables from companies like Fire-Boltt, Noise, and boAt were the major contributors to this. Counterpoint concurred with IDC India's analysis but predicted that India would account for 27% of all units rather than 26%.

Both research firms agreed that the increase was spurred on by the number of smartphone users who also owned a smartwatch, compared to other regions in the world.

According to IDC, India's market size has now surpassed that of China and the US and will keep expanding while Counterpoint stated in the report that a smartwatch was also sold in India for every smartphone.

- During the year ended March 31, 2024, the company has witnessed a sudden spike in other income, which is largely due to the “Scheme and Discount (Non-GST)” income. During Q2 and Q3 of the said period, Apple Inc. suddenly dropped the prices of several products. To compensate the distributor (the company), Redington (India) Limited and Ingram Micro India Private Limited, who are the company's suppliers and super distributors of Apple Inc., issued credit notes of Rs. 739.68 lakhs to the company, and the same has resulted in a fall in closing stock of the company by such an amount.
- The remaining scheme and discount/credit note consist of routine incentives and discounts given by the super distributors to the company.

The company was incorporated in 2011 and is engaged in the trading of mobile phones and accessories.

B. Significant Accounting Policies & Notes on Accounts

1. Basis of preparation:

The financial statements of the Company have been prepared in accordance with the generally accepted accounting principles in India (Indian GAAP). The Company has prepared these financial statements to comply in all material respects with the accounting standards notified under section 133 of the Companies Act 2013 read together with the Companies (Accounting Standards) Rules, 2021 and presentation requirements of Division I of Schedule III to the Companies Act, 2013. The financial statements have been prepared on an accrual basis and under the historical cost convention.

These financial statements have been prepared on a going concern basis.

2. Use of estimates:

The preparation of financial statements is in conformity with Indian GAAP (Generally Accepted Accounting Principles) which requires the management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent liabilities as on the date of the financial statements. The estimates and assumptions made and applied in preparing the financial statements are based upon management's best knowledge of current events and actions as on the date of financial statements. However, due to uncertainties attached to the assumptions and estimates made actual results could differ from those estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

3. Revenue recognition:

The primary business of the company is to wholesale trade of mobile phones, tablets and other ancillary telecom products. Issuance of CN/DN for passing/receiving the scheme and discount related to goods sold is a general modus operandi of this business. Due to various different schemes for the different product for the different period are received and passed on in such a manner that it is not possible to co-relate which one another.

- (i) Revenue from sale of goods is recognized when significant risk and rewards of ownership of the goods have been passed to the buyer and it is reasonable to expect ultimate collection.
- (ii) Sale of goods is recognized net of GST and other taxes as the same is recovered from customers and passed on to the government.
- (iii) Interest on FD is recognized on the basis of Interest certificate provided by Bank(s).
- (iv) Gain on Mutual Fund is recognized on the basis of Mutual Fund report provided.
- (v) Rental income is recognized when services are rendered.
- (vi) Other items of income and expenses are recognized on an accrual basis.

4. Foreign currency transactions:

There were no foreign currency transactions made by the company during the period of restated financial statements.

5. Investments:

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments. On initial recognition, all investments are measured at cost. The cost comprises the purchase price and directly attributable acquisition charges such as brokerage, fees and duties. Current

investments are carried at the lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

6. Tangible Fixed Assets:

Fixed assets are stated at cost less accumulated depreciation and impairment losses if any. Cost comprises the purchase price and directly attributable cost of bringing the asset to its working condition for its intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.

Borrowing costs relating to acquisition of tangible assets which take substantial period of time to get ready for its intended use are also included to the extent they relate to the period till such assets are ready to be put to use. Assets under installation or under construction as at the Balance Sheet date are shown as Capital Work in Progress.

7. Intangible Fixed Assets:

Intangible assets are recognized when it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. The company does not have any intangible fixed assets.

8. Impairment of Assets:

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset. Net selling price is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

9. Depreciation and Amortization:

Depreciation on the fixed assets is provided under WDV method as per the rates prescribed in Schedule II to the Companies Act, 2013 or at rates permissible under applicable local laws so as to charge off the cost of assets to the Statement of Profit and Loss over their estimated useful life.

10. Inventories:

Stock in consumables, trade, stores and spares are valued at the lower of the cost or net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale as per income computation and disclosure standard. Closing Stock in terms of quantity as well as in terms of value are taken, valued and certified by the management.

11. Employee Benefits:

The majority of the employees are on an outsourced-manpower contract basis. During each financial year in the period of restated financial statements (01-04-2021 to 30-09-2024), there are less than 10 employees under the direct payroll of the company. Hence, provisions of the Payment of Gratuity Act, 1972, are not applicable, and therefore no provision for gratuity is made.

The entity that supplies the labour handles the PF and other employee benefit-related compliances of employees on an outsourced-manpower contract basis. Confirmations of timely compliance with the same are taken annually by the management.

12. Borrowing Costs:

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur. Borrowing costs consist

of interest, exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost and other costs that an entity incurs in connection with the borrowing of funds.

13. Earnings per share:

The earnings in ascertaining the Company's EPS comprises the net profit after tax attributable to equity shareholders and includes the post tax effect of any extraordinary items. The number of shares used in computing basic EPS is the weighted average number of shares outstanding during the year. Diluted earnings per share is computed by dividing the profit/(loss) after tax attributable to Equity Shareholders (including the post tax effect of extra ordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares which could have been issued on conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. Dilutive potential equity shares are determined independently for each period.

14. Taxation:

- Tax expense comprises current and deferred tax. Current income tax expense comprises taxes on income from operations in India determined in accordance with the provisions of the Income Tax Act, 1961.
- Deferred tax expense or benefit is recognized on timing differences being the difference between taxable incomes and accounting income that originate in one period and are capable of reversal in one or more subsequent periods.
- Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. Deferred income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit and loss. Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the taxes on income levied by the same governing taxation laws.
- Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits. In the situations where the Company is entitled to a tax holiday under the Income realized against future taxable profits. In the situations where the Company is entitled to a tax holiday under the Income tax Act, 1961 enacted in India, no deferred tax (asset or liability) is recognized in respect of timing differences which reverse during the tax holiday period, to the extent the Company's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of timing differences which reverse after the tax holiday period is recognized in the year in which the timing differences originate.
- At each balance sheet date, the Company re-assessed recognized and unrecognized deferred tax assets. The Company writes- down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which the deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available. The Company recognizes unrecognized deferred tax assets to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized

The movement of deferred tax account is as follows:	Sep 2024 (Rs. In Lacs)	2023-24 (Rs. In Lacs)	2022-23 (Rs. In Lacs)	2021-22 (Rs. In Lacs)
Opening balance of deferred tax assets	2.23	1.52	1.23	1.13
Provision for the current year deferred tax assets/(liabilities)	0.61	0.71	0.29	0.10

15. Provisions

A provision is recognized when the Company has a present obligation as a result of past event, if it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation.

Provisions are not discounted to present value and are determined based on best estimates required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

16. Contingent liabilities:

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably; the Company does not recognize a contingent liability but discloses its existence in the financial statements.

17. Contingent assets:

Contingent assets are neither recognized nor disclosed in the financial statements.

18. Cash and cash equivalent:

Cash and cash equivalents for the purposes of cash flow statement comprise cash at bank and in hand and interest-bearing deposits with banks and other institutes.

19. Revaluation Reserve:

Revaluation Reserve created in FY 2019-20 has been reversed during the year FY 2022-23 in the original financial statement as per the following particulars:

The movement in revaluation reserve account is as follows:	Amount (Rs. In Lacs)
Opening Balance of Revaluation Reserve	149.71
Reversal of Revaluation Reserve to the extent created in relation to Mutual Fund that are redeemed and Office Buildings.	(149.71)
Closing Balance of Revaluation Reserve	00.00

However, in the restated financial statements, the revaluation reserve has been reversed in parts in FY 2020–21 and FY 2022–23, bringing the value of investment in mutual funds and the value of office buildings at cost, respectively.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued a circular no. SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the "**UPI Circulars**") in relation to streamlining the process of public issues of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and the continuation of this phase has been extended until March 31, 2020. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Further, pursuant to SEBI circular dated March 30, 2020, this phase has been extended till further notice.

Phase III: This phase has become applicable on a mandatory basis for all public issues opening on or after December 1, 2023 as per the SEBI circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI from time to time.

All SCSBs issuing facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Investors into the UPI payment mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Applicants to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the LM will be required to compensate the concerned investor.

The Issue will be made under UPI Phase III of the UPI Circular. All SCSBs issuing facility of making application in public issues shall also provide facility to make application using UPI.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 read with SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 02, 2021 and such payment of processing fees to the SCSBs shall be made in compliance with SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022. NPCI vide circular reference no. NPCI/UPI/OC No. 127/ 2021-22 dated December 09, 2021, inter alia, has enhanced the per transaction limit in UPI from more than ₹2,00,000 to ₹5,00,000 for UPI based ASBA in initial public offerings.
