SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

GLOBAL OUTLOOK

World Economic Outlook: Global growth appears to be decelerating, with several key advanced economies slowing in the third quarter. Gross domestic product (GDP) contracted in Japan (-2.1% annualised) and the eurozone (-0.2%). Meanwhile, GDP growth slowed in the United Kingdom (UK; 0% vs 0.2% previous quarter). The United States (US) was a notable exception, with its real GDP growth accelerating sharply (4.9% annualised vs 2.1% previous quarter).

Central banks in many advanced economies-maintained interest rates during their latest policy meetings. While inflation remains above targets, it has eased significantly over the past year. Central banks will closely monitor the impact of past rate hikes on economic growth and inflation.

US growth accelerates

Real GDP in the US expanded an annualized 4.9% in the third quarter (vs 2.1% previous quarter), the fastest since the fourth quarter of 2021. Higher consumer spending (4% vs 0.8%) drove the growth, supported by exports, government spending, private inventory investment, and residential fixed investment.

The US economy added 150,000 jobs in October (vs an average of 258,000 in the previous 12 months). The unemployment rate edged up to 3.9% (vs 3.8% the previous month), its highest since January 2022.

Asset prices have been in broad, synchronous decline, investment growth has weakened substantially, and housing markets in many countries are worsening rapidly. Shockwaves continue to emanate from the Russian Federation’s invasion of Ukraine, especially in energy and other commodity markets. Against this backdrop, confidence has fallen precipitously. The worlds three major engines of growth—the United States, the euro area, and China—are undergoing a period of pronounced weakness, with adverse spillovers for emerging market and developing economies (EMDEs), many of which are already struggling with weakening domestic conditions.

Inflation eased to 3.2% in October (vs 3.7% the previous month), led by a 4.5% on-year slide in energy prices (vs 0.5% decline). Core inflation moderated marginally to a two-year low of 4% (vs 4.1%).

The Federal Reserve maintained the funds rate at 5.25-5.5% for the second consecutive time at its November meeting. The committee noted it will factor in tightening of monetary policy, the lags with which it affects the economy and further developments for additional policy firming.

The trade deficit widened \$2.9 billion on-month to \$61.5 billion in September, as the rise in imports outpaced the increase in exports.

INDIAN ECONOMY

INTRODUCTION

Indian Economy Outlook: The effects of the slowdown in global economic growth resulting from high inflation and the continuing war between Russia and Ukraine are also seen to be affecting India’s economic performance. The country recorded muted growth of 4.4% in Q4 2022 compared to 6.3% in Q3 2022, with sluggish private consumption and exports being the major reasons behind that. The country’s real GDP growth in the fiscal year 2022-23 is estimated at 7.0% in comparison to 9.1% in the prior year. However, some demand indicators such as record sales of 3.8 million in the passenger vehicles segment in 20221, strong growth in tractor sales, and a rise in domestic air travel, continue to support economic growth.

Despite the sluggish growth in the latest quarter, we still expect India to be one of the major beacons of growth in 2023, driven by strong domestic demand and government expenditure. The efforts of the Union Budget 2023-24 to improve the disposable income of taxpayers in the country are expected to boost consumption via an increase in discretionary spending. In addition, the strong capital expenditure push provided by the Union Budget, with an increased outlay of 37.4% in comparison to the fiscal year 2022-23, is expected to drive growth, investments, and job creation. The government’s reduction of over 39,000 compliances and decriminalization of over 3,400 legal provisions will also foster the ease of doing business in the country.2 Strong credit growth and resilience in financial markets are further expected to create an environment that supports investments.

FIBC Market Outlook (2023 to 2033)

The global FIBC market size is expected to top a valuation of US\$ 12.6 billion by the end of 2033, with a CAGR of 5.4% during the forecast period. In the year 2023, the market is expected to generate revenue of US\$ 7.5 billion. The global FIBC market is estimated to hold a 1/3rd value share of the global IBC market worth US\$ 22 billion in 2022.

Attribute	Details
Market Size (2023)	US\$ 7.5 billion
Projected FIBC Market Size (2033)	US\$ 12.6 billion
Value CAGR (2023 to 2033)	5.4%
Historical CAGR (2018 to 2022)	4%

Flexible intermediate bulk containers (FIBC) that carry at least 750 kg are the most preferred type, estimated by Future Market Insights (FMI). As per the study, the FIBC industry is projected to grow steadily as manufacturers introduce lightweight containers.

The expansion of the food and pharmaceutical industries as well as the growing requirement to lower the total weight of bulk packaging is one of the key factors driving the demand for FIBC. Industries are projected to use FIBCs to transport grains, rice, and liquid chemicals used in biological products.

FMI predicts this sector is anticipated to witness a compound annual growth rate of 5.8% from 2023 to 2033. FMI predicts this sector is anticipated to witness a compound annual growth rate of 5.8% from 2023 to 2033.

What is the Historical and Forecast Outlook for FIBC Market?

Over the historical period of 2018 to 2022, FIBCs were built to be reusable and were intended for specific goods. Nowadays, several types of specialized FIBC gaining traction across diverse industries, boosting the market.

The growing inclination of end users towards FIBC in place of traditional packaging and transportation is one of the factors propelling the demand. The need for high durability had a minor impact on the adoption rate of FIBC, hence manufacturers are developing new product lines to cater to the growing demand from end users.

As per FMI, the industrial sector is predicted to experience steady growth due to the integration of machine learning and the adoption of robotics, which, in turn, is projected to fuel the growth of the FIBC industry.

The industry holds a prominent position in the Indian economy contributing about 30 percent of total gross value added in the country. In FY23, the Indian industry faced some extraordinary challenges as the Russian-Ukraine conflict broke out. That led to a sharp rise in the prices of many commodities. Prices of edible oil, crude oil, fertilisers and food grains rose sharply. They remained at elevated levels for several months. The risk of another round of supply chain disruptions emerged, but they were not as severe as feared. Nonetheless, both the price and the availability of essential commodities had the potential to dent the industry’s optimism on consolidating the recovery of FY22 and further accelerating it. It is fair to say that the Indian industry acquitted itself rather well under trying circumstances. Overall Gross Value Added (GVA) by the Industrial Sector, based on data available for the first half of the FY23, rose 3.7 per cent, which is higher than the average growth of 2.8 per cent achieved in H1 of the last decade.

Robust domestic conditions since FY22 have provided a demand stimulus to industrial growth. Private Final Consumption Expenditure (PFCE) as a share of GDP in H1 of FY23 was the highest among all half years, H1 or H2, since FY15. Further, the strong export performance of FY22 continued somewhat in the first half of FY23. In this half of the year, exports of goods and services as a share of GDP have been the highest since FY16. However, the performance began to wane in the first half itself as the Year-on-Year (YoY) growth of exports declined from Q1 to Q2 due to persistently high inflation and rising interest rates in the advanced economies. The increase in investment demand has emerged as another powerful stimulus to industrial growth. It has been triggered by the augmented capex of the central government in the current and the previous year as compared to the pre-pandemic years. The leap also has crowded in private investment, already upbeat on the pent-up demand, export stimulus, and strengthening of the corporate balance sheets.

The pandemic and the Russia-Ukraine conflict have demonstrated the risk of supply chain shocks to the global economic order. As companies adapt their manufacturing and supply chain strategies to build resilience, India has a unique opportunity to become a global manufacturing hub this decade. In this context, the government’s Make-in-India initiative has facilitated investment, fostered innovation and built world-class infrastructure while addressing the gaps in domestic manufacturing capabilities. The Production Linked Incentive (PLI) schemes across 14 categories has further complemented it with an estimated Capex of around ₹3 lakh crore over the next five years and the potential to generate over 60 lakh jobs. In the medium term, the scheme will help reduce net imports by building domestic manufacturing capacity that will cater to domestic and global needs.

INTERNAL RISK FACTORS

1. Our Manufacturing Unit, Registered Office and Labour Colony, from where we operate are not owned by us.

Moreover, Registered Office premise is taken on lease basis from Mrs. Uma Mahendra Gopalka, person forming part of Promoter Group of our company. We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new office and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

2. The operations of our company are limited to selected regions such as in Gujrat domestically and in USA overseas. Any adverse development affecting our operations in this region could have an adverse impact on our business, financial condition and results of operations.

- Major Crackdown, force majeure situation;
- Vulnerability to change of policies, laws and regulations or the political and economic environment; and
- constraint on our ability to diversify across states;
- Currency Fluctuations;
- Supply Chain Disruptions;
- Cultural and Language Differences;
- Trade Barriers and Tariffs;

Any adverse situation in Gujrat & USA may affect our operational efficiency and ultimately profitability of our company.

3. The Company is dependent on few suppliers for purchase of product. Loss of any of these large suppliers may affect our business operations.

Our top ten suppliers contribute more than 98% of our total purchases for the period/year ended on December 31, 2023, March 31, 2023, 2022 and 2021. Additionally, more than 95% of our total purchases were from our Group Company “Umasree Texplast Private Limited”. We cannot assure that we will be able to get the same quantum and quality of supplies, or any supplies at all, and the loss of supplies from one or more of them may adversely affect our purchases of stock and ultimately our revenue and results of operations. However, the composition and amount of purchase from these suppliers might change as we continue seek new suppliers for our product for better quality and price in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new suppliers, there can be no assurance that we will be able to maintain long term relationships with such suppliers or find new suppliers in time.

4. The Company is dependent on few numbers of customers for sales. The loss of any of this large customer may affect our revenues and profitability.

Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant

customers or that we will be able to significantly reduce customer concentration in the future. Any decline in our quality standards, growing competition and any change in demand may adversely affect our ability to retain them. We cannot assure you that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations. However, the composition and revenue generated from these customers might change, as we continue to add new customers in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers, there can be no assurance that we will be able to maintain long term relationships with such customers or find new customers in time.

5. *Business of our company is dependent on our Manufacturing facilities. Continues operations of our manufacturing facility is critical to our business and any disruption in the operation of our manufacturing facility may have a material adverse effect on our business, results of operations and financial condition.*

As on the date of this Draft Red Herring Prospectus, our manufacturing facility is located at Changodar, Ahmedabad which is admeasuring in area of 6695 Square Mtr. Our manufacturing facility is subject to operating risks, such as unavailability of spare parts of the machinery, break- down, obsolescence or failure of machinery, performance below expected levels of efficiency, any local social unrest, natural disaster or breakdown of services and utilities in these areas could have material adverse effect on the business, financial position and results of our operations. In the event, we are forced to shut down our manufacturing unit for a prolonged period; it would adversely affect our earnings, our other results of operations and financial condition as a whole. Spiralling cost of living around our unit may push our manpower costs in the upward direction, which may reduce our margin and cost competitiveness.

In addition to the above if our manufacturing facility suffers losses as a result of any industrial accident, we may be forced to shut down our manufacturing unit which could result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition. Further, any contravention of or non-compliance with the terms of various regulatory approvals applicable to our manufacturing unit may also require us to cease or limit production until such non-compliance is remedied to the satisfaction of relevant regulatory authorities. We cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees and the labor involved in our manufacturing unit, which may hinder our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations.

Our company has expanded its installed capacity by installing new machineries at the premises adjacent to our existing manufacturing facility. Due to expansion, installed capacity of our company manufacturing facility has doubled from 2400 MTPA to 4800 MTPA. For details related to our manufacturing facilities please refer to heading titled as “*Properties*” on page 124.

6. *Our operations are subject high level of hygiene & safety standards.*

For a food-grade Flexible Intermediate Bulk Container (FIBC) bag manufacturing company, maintaining proper levels of hygiene is crucial to ensure product safety and compliance with regulatory standards. Failure to maintain adequate hygiene levels poses several risks to the 'ompany's operations and reputation. Here are some key risk factors:

- Contamination
- Regulatory Non-Compliance:
- Product Rejection;
- Health Risks;
- Loss of Customer Trust; and
- Operational Disruptions

Although we have implemented robust hygiene protocols and quality assurance measures throughout the production process. This includes regular cleaning and sanitization of equipment and facilities, training of personnel on hygiene practices, implementing pest control measures, and conducting thorough inspections and audits to ensure compliance with regulatory standards.

Failure to maintain proper hygiene levels can result in non-compliance, leading to fines, penalties, product recalls, and potential legal action. Non-compliance can also damage the company's reputation and relationships with customers and regulatory authorities.

7. We are subject to foreign currency exchange rate fluctuations which could have a material and adverse effect on our results of operations and financial conditions.

Exports have accounted for more than 70% of our total revenue from operations for the period/year ended on December 31, 2023, March 31, 2023, 2022 and 2021. Major amount of our exports is to USA. Therefore, we are subject to foreign currency fluctuation risk.

Any changes in value of foreign currencies with respect to the rupee may cause fluctuations in our operating results expressed in rupees. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Fluctuations in the exchange rates may affect our company to the extent of cost of services sold in foreign currency terms. Any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our Company's results of operations.

8. We will continue to be controlled by our Promoters after the completion of the Issue.

As of the date of this Draft Red Herring Prospectus, our Promoters and Promoter Group hold approx 98.10% of the issued, subscribed and paid-up equity share capital of our Company. The interests of our Promoters and certain members of the Promoter Group may conflict with your interests and the interests of our other shareholders, and our Promoters and certain members of the Promoter Group could make decisions that may adversely affect our business operations and hence the value of your investment in the Equity Shares.

9. Our Company, Promoter, Directors and Group Company are involved in certain legal proceedings. Any adverse decision in such proceedings may render us/them liable to liabilities/penalties and may adversely affect our business and results of operations.

Our Company, Promoter, Directors and Group Company are currently involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. Amount mentioned to the extent quantifiable. The amount may be subject to additional interest/other charges being levied by the concerned authorities which are unascertainable as on date of this Draft Red Herring Prospectus. For further details, please refer to the chapter titled “OUTSTANDING LITIGATIONS AND MATERIAL DEVELOPMENTS” on page 185 of this Draft Red Herring Prospectus.

Decisions in any of the aforesaid proceedings adverse to our interests may have a material adverse effect on our business, results of operations, financial condition and prospects. If the courts or tribunals rule against us or our Company, Group Company, our Directors and Promoter, we may face monetary and/or reputational losses and may have to make provisions in our financial statements, which could increase our expenses and our liabilities.

10. The Company has not entered into any agreements/contracts for the supply of raw material and other utilities. Risks related to shortfall or non-availability of raw material and other utilities may adversely affect our manufacturing processes and have an adverse impact on our operations and financial condition.

We do not have long term arrangements with our vendors/suppliers and we operate on a purchase order basis. Although more than 95% of our purchases are from our group company i.e. “Umasree Texplast Private Limited”, there are no long-term supply agreements for our raw material and other utilities. Our inability to obtain high quality raw materials in a timely and cost-effective manner would cause delays in our production and delivery schedules besides increasing cost of production, which may result in us losing some customers and hence could lead to reduction in revenues. Hence, we also face market risks for each of these products.

11. Increases in the prices of raw materials, their availability, quality and cost overruns could have adverse effect on us.

The key raw material required in manufacturing of FIBC bags is fabric. These fabrics, in turn, are made from polypropylene granules. The pricing of polypropylene is influenced primarily by two factors: the quantity ordered, and the credit period availed. The cost of our raw material depends upon timely payment to our suppliers and amount of quantity ordered with them. If we are not able to make timely Payments or if we could not order sufficient quantity with our suppliers our cost of raw materials may increase resulting in decrease in overall profitability of the Company.

Our Company procures raw materials domestically. The cost of raw materials constitutes significant part of our operating expenses. We are vulnerable to the risks of rising/fluctuating prices of raw materials, which are determined by demand and supply conditions in Indian Market. Any unexpected price fluctuations after placement orders, shortage, delay in delivery, quality defects or any factors beyond our control may result in interruption in the supply of raw materials.

12. Our failure to perform in accordance with the standards prescribed in work order of our client could result in loss of business or payment of liquidated damages.

We receive orders from our clients. Certain of these orders may require us to comply with the code of conduct and rules and regulations prescribed by our clients, which may increase our operational costs. We may be unable to effectively address service constraints or accurately predict product requirements, as a result of which our clients may experience service shortfalls. Any disruptions to our businesses, including as a result of actions outside of our control, could significantly impact the continued performance of our obligations to meet the quality or performance standards set out in our client contracts which may in-turn harm and cause clients to terminate their contracts with us, impair our ability to obtain renewal of our contracts from existing clients and impair our ability to grow our client base, any of which could affect our business, financial condition and results of operations. In the event that we are unable to meet the prescribed obligations, we may also be required to pay compensation or liquidated damages to our clients on the terms set out in our contracts. In certain instances, we may also be required to bear consequential liability.

Certain orders may also require us to provide indemnities to our clients with respect of any negligent act or omission by or misconduct of our employees. In the event there is an increase in claims against us for which we are not insured, our business, financial condition and results of operations may be affected.

13. There is an increased awareness towards controlling pollution and many economies including India have joined in the efforts to ban plastic product. In case any plastic packaging products manufactured by us are banned in India it could have a material and adverse effect on our business and results of operations.

Plastic takes many years to decompose and is very dangerous for other living beings. Many countries around the world

are finding alternatives to the use of plastic products. While none of the measures taken so far have directly impacted our business, our Company cannot assure that future measures will not have a negative impact on our business. If the Government of India legislates against the use of plastic products or if regulations for the manufacture and use of our packaging products are made more stringent, it could have a material and adverse effect on our business and results of operations.

14. There are certain discrepancies and non-compliances noticed in some of our corporate records relating to forms filed with taxation authorities and other public authorities.

In the past, there have been some instances of delays in filing statutory forms with our GSTR3B on several instances, and have accordingly been subjected to penalty and charged with interest for delayed deposit of tax on various instances as well. Further, with the expansion of our operations, there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

15. There are certain discrepancies and non-compliances noticed in some of our corporate records relating to forms filed with taxation authorities and other public authorities.

In the past, there have been some instances of delays in filing EPF Returns with the concerned offices on several instances and have accordingly been subjected to penalty and charged with interest for delayed payment on various instances as well. Further with the expansion of our operations, there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

16. Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause its cancellation. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customers discretion or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed.

Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, cancellation, execution difficulty, payment postponement or payment default with regard to the orders placed with us, or disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income.

17. Our Sales are on credit basis and hence receivables may be converted into bad debts due to change in economic conditions or our client's inability to pay.

Our sales are on credit basis and hence receivables may be converted into bad debts due to change in economic conditions or our client's inability to pay.. Any changes in general economic conditions or clients inability to pay may hamper our receivables and could in turn have an adverse effect on our sales. Furthermore, any downturn in general or local economic conditions in the markets in which we operate may affect our credit terms, thereby affecting our sales. It would also adversely affect the collection of outstanding credit accounts receivable, the net bad debt charge and hence income. For more details, please refer chapter titled "***Restated Financial Statements***" on page 166 of this Draft Red Herring Prospectus.

18. We have a logo which is used for our business purpose and we depend on brand names and our corporate name and logo that we may not be able to protect and/or maintain.

Our ability to market and sell our products depends upon the recognition of our brand names and associated consumer goodwill. Currently, we do not have registered trademarks for our own nor our corporate name and logo under the Trade Marks Act, 1999. We have applied for trademark registration however we have not received any registration from Trademark Authority. Consequently, we do not enjoy the statutory protections accorded to registered trademarks

in India for the corporate name and logo of our company, which are currently pending. In the absence of such registrations, competitors and other companies may challenge the validity or scope of our intellectual property right over these brands or our corporate name or logo. As a result, we may be required to invest significant resources in developing new brands or names, which could materially and adversely affect our business, financial condition, results of operations and prospects.

19. We have unsecured loans from directors & relatives of directors and inter corporate deposits, which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our liquidity and business operations.

Our Company have Long Term Unsecured Loans from its Directors, their relatives and inter corporate deposits amounting to ₹ 292.47 Lakhs, as on December 31, 2023, which are repayable on demand. Although there are no terms and condition prescribed for repayment of unsecured loan from our Directors and their relatives and inter corporate deposits, loan can be recalled at any given point of time during ordinary course of business. Further, such lenders are currently not charging any interest on the loan provided to the company but if in future they start charging interest on the loan provided by them, then this may affect the profitability, business operations and financial performance of our Company. For further details regarding loans availed by our Company, please refer “*Restated Financial Statement*” on page 166 of this Draft Red Herring Prospectus.

20. We have experienced significant working capital requirements in past and may continue to experience in future also. If we experience insufficient cash flows from our operations or are unable to borrow to meet our working capital requirements, it may materially and adversely affect our business, cash flows and results of operations.

The business of our company is working capital intensive. The successful operation of our business heavily relies on significant working capital, which is essential for various aspects, including financing project operations, inventory management, and the purchase of raw materials and may continue to so in future also. However, changes in credit terms and payment delays can adversely impact our working capital, resulting in lower cash flows and increased funding requirements. Inadequate financing of our working capital needs may arise due to several factors, such as delays in disbursements under financing arrangements, higher interest rates, increased insurance costs, or borrowing and lending restrictions. Such circumstances could have a material adverse effect on our overall business, financial condition, and prospects.

Our major requirement of working capital arises due to Inventory, Trade Receivables and Trade Payables. The Major raw material of our product is Fabric. These fabrics, in turn, are made from polypropylene granules. The pricing of polypropylene is influenced primarily by two factors: the quantity ordered, and the credit period availed. The cost of our raw material depends upon timely payment to our suppliers and amount of quantity ordered with them. If we are not able to make timely Payments or if we could not order sufficient quantity with our suppliers our cost of raw materials may increase resulting in decrease in overall profitability of the Company.

As such, we continually strive to enhance our financial management practices to effectively address working capital challenges. By closely monitoring credit terms, payment schedules, and contract agreements, we aim to mitigate risks associated with fluctuations in working capital requirements. Additionally, prudent financial planning, exploring diverse financing options, and maintaining strong relationships with financial institutions are key factors in managing our working capital efficiently. Despite our proactive measures, there can be no assurance that working capital fluctuations will not impact our business operations or financial performance. For details related to working capital requirement, please refer to chapter titled as “*Object of the Issue*” on page 83 of this Draft Red Herring Prospectus.

21. Our insurance coverage may not adequately protect us against certain operating risks and this may have an adverse effect on the results of our business.

We are insured for a risk associated with our business, through policies. We believe that we have got our assets and stock adequately insured, however our policy of covering these risks through insurance may not always be effective or adequate, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part or on time, to cover all material losses. To the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our business and results of operations could be adversely affected. For details on insurance policies taken by our company please page no. 111 in chapter titled “Our Business” of this Draft Red Herring Prospectus.

22. *We are subject to risks associated with expansion into new markets.*

Expansion into new markets, including in India and overseas, subjects us to various challenges, including those relating to our lack of familiarity with the culture, legal regulations and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions. The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets.

By expanding into new markets, we could be subject to additional risks associated with establishing and conducting operations, including compliance with a wide range of laws, regulations and practices, including uncertainties associated with changes in:

- Laws, regulations and practices and their interpretation; local preferences and service requirements;
- Fluctuations in foreign currency exchange rates;
- Inability to effectively enforce contractual or legal rights and adverse tax consequences;

23. *We are dependent on third party transportation providers for procuring raw material from our suppliers and delivery of products to our clients. Any failure on the part of such service providers to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.*

We are dependent on third party transportation for raw material and Goods Manufactured by us. As Manufacturing is our main activities, our success depends on the smooth supply and transportation of the Raw Material from our suppliers and transportation of our trading materials from our suppliers to us/ or our buyers/clients, both of which are subject to various uncertainties and risks. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business.

In addition, materials may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of materials which may also affect our business and our results of operation negatively. A failure to maintain a continuous supply of materials to us as well as to our clients in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations.

24. *The industry segments in which we operate being fragmented, we face competition from other players, which may affect our business operations and financial conditions.*

The market for our products is competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as technical competence, quality of products, distribution network, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

25. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

26. *Failure to manage appropriate Inventory level could have an adverse effect on our net sales, profitability,*

cash flow and liquidity.

We are engaged in the business of manufacturing and supply of Flexible Intermediate Bulk Container (“FIBC”) bags. We are required to maintain sufficient level of raw materials and finished goods for uninterrupted manufacturing process and delivery of goods to our clients. Insufficient inventory increases the risk of stockouts, where the company is unable to fulfill customer orders due to lack of available products. This can lead to lost sales opportunities, damaged customer relationships, and potential reputational harm. Fluctuations in demand are common in the manufacturing industry. Failure to maintain sufficient inventory levels can make it difficult for the company to respond quickly to changes in customer demand, leading to missed sales opportunities or excess inventory during periods of low demand. In case of Emergency procurement of materials or components due to low inventory levels often comes with higher costs. Rush orders, expedited shipping, and premium prices for scarce items can significantly increase expenses and reduce profit margins. When inventory levels are low, the company may need to order materials or components on short notice, resulting in longer lead times. This can cause delays in production and delivery, negatively impacting customer satisfaction.

Moreover, maintaining excess inventory ties up valuable capital that could be invested elsewhere in the business. Conversely, insufficient inventory levels may result in lost sales or increased costs, affecting cash flow and overall financial health.

27. We could be exposed to risks arising from misconduct, fraud and trading errors by our employees and Business Associates.

Frauds or other delinquencies by employees could include indulging in transactions that exceed authorized limits or present unacceptable risks to us, hiding unauthorized or unsuccessful activities from us or the improper use of confidential information. Such misconduct could result in unexpected business risks, losses, invite regulatory sanctions and seriously harm our reputation and could even lead to litigation. The precautions we take to prevent and detect these activities may not be effective. Any delinquencies or trading errors on the part of our employees could materially affect our business operations, financial position and/or reputation.

28. A shortage or non-availability of power facilities may adversely affect our manufacturing operations and have an adverse effect on our business, results of operations and financial condition.

Our manufacturing processes requires substantial amount of power facilities. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented/ augmented by alternative/ independent sources of power supply since it involve significant capital expenditure and per unit cost of electricity produced is very high in view of oil prices and other constraints. We are mainly dependent on State Government for meeting our electricity requirements. Any defaults or non compliance of the conditions may render us liable for termination of the agreement or any future changes in the terms of the agreement may lead to increased costs, thereby affecting the profitability. Further, since we are majorly dependent on third party power supply; there may be factors beyond our control affecting the supply of power. Our company intends utilize part of the Net issue proceeds to commission Solar Power plant which will suffice to significant power requirement of our company.

Any disruption / non availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

Additionally, our Company may enter in related party transactions in future subject to necessary compliances in accordance with relevant acts, rules and regulations. For details on the transactions entered by us, please refer to **Annexure - IX – “Related Party Transactions”** on page F 34 under chapter titled as **“Restated Financial Statement”** beginning on page 162 of the Draft Red Herring Prospectus.

31. Dependence on debt and outflow of finance cost leads to outflow of cash flows and reduce overall profitability.

Due to manufacturing activities, our business requires significant working capital. We depend on internal accrual, creditors and borrowed fund to meet out finance for working capital. We may also be required to depend on the additional borrowed capital to fund the working capital in future with increase in volume of operations and production. The additional borrowed fund may require us to dedicate a substantial portion of our cash flow from operations to payments of interests, thereby reducing the availability of our cash flow to fund capital expenditures and other general corporate expenditures. It limits our borrowing ability and places us at a competitive disadvantage relative to competitors that have less debt or greater financial resources. There can be no assurance that we will be able to generate enough cash flow from operations or that we will be able to obtain enough capital to service our debt or fund our planned capital expenditures. In addition, we may need to refinance some or all of our indebtedness.

32. Our Company had negative cash flow from operating activity in recent financial year, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

33. Our manufacturing activities are dependent upon availability of skilled and unskilled labour.

We have made arrangement of labour requirements at our all manufacturing facility through our on-roll employees, wherever required by our Company by arranging contract labour based on requirement. Our manufacturing activities are dependent on availability of skilled and unskilled labour. Though our business has not experienced any disruptions due to non-availability of labour or any disputes with them in past, we cannot assure you the same in future which may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects. For further details about business of our Company, please refer chapter titled **“Our Business”** beginning on page 111 of this Draft Red Herring Prospectus.

34. Our success depends on our ability to attract and retain our key and senior management personnel. If we are unable to do so, it would adversely affect our business and results of operations.

Our future success substantially depends on the continued service and performance of the members of our senior management team and other key personnel in our business for management, running of our daily operations, and the planning and execution of our business strategy. There is intense competition for experienced senior management and other key personnel with technical and industry expertise in our business and if we lose the services of any of these or other key individuals and are unable to find suitable replacements in a timely manner, our ability to realize our strategic

objectives could be impaired. We face specific disadvantages in our efforts to attract and retain our management. As a public sector undertaking, Government of India policies regulate and control the emoluments, benefits and perquisites that we pay to our employees, including our key managerial and technical personnel and these policies may not permit us to pay at market rates.

Additionally, we may not have in place the necessary systems and processes to develop key personnel internally. The loss of key members of our senior management or other key team members, particularly to competitors, could have an adverse effect on our business and results of operations. Our performance also depends on our ability to attract and train highly skilled personnel. If we are unable to do so, it would materially and adversely affect our business, prospects and results of operations.

Our Company in future may enter in related party transactions subject to necessary compliances.*

Our Promoters, Directors, KMPs and SMPs are interested in our Company to the extent of their shareholding and associated dividend entitlements thereon in our Company, in addition to regular remuneration or benefits and expenses reimbursement. Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

36. *Strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees/workmen in future could adversely affect our business and results of operations.*

Our Company has a total of 195 employees as of May 31, 2024, with an increase in our operation capacities or execution of any expansion projects in future, we expect increase in such number of employees and labors. Historically, we have enjoyed a good relationship with our employees, labors and have not experienced any lockouts, strikes, or any disruptions of any sort due to labour unrest. However, there can be no assurance that we may not experience any disruptions in our operations in future as well. “Our business operations require us to obtain and renew, from time to time, certain approvals, licenses, registrations and permits under central, state, and local government rules in India, generally for carrying out our business. Most of these approvals are granted for a limited duration. While we are required to obtain several approvals for legally conducting our business operations and we submit the applications for renewal of such approvals, as and when required, during the course of our business operations, we cannot assure you that we will be able to obtain approvals in respect of such applications, or any application made by us in the future. Any failure by us to comply with the applicable regulations in the future, or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which need to be updated pursuant to change of name from ‘Bulkcorp International Private Limited’ to ‘Bulkcorp International Limited’.

In case we fail to comply with these requirements, or a regulator alleges non-compliance with these requirements, we may be subject to penalties and proceedings may be initiated against us. The introduction of additional government control or newly implemented laws and regulations, depending on the nature and extent thereof and our ability to make corresponding adjustments, may adversely affect our business, results of operations and financial conditions. These laws and regulations and the way in which they are implemented and enforced may change from time to time and there can be no assurance that future legislative or regulatory changes will not have an adverse effect on our business, financial condition, cash flows and results of operations.

Failure on our part to renew or maintain such permits, licences or approvals may result in the interruption of our operations and may have a material impact on our business. In the future, we may also be required to obtain new permits and approvals for our proposed operations. While we believe that we will be able to obtain such permits and approvals as and when required, there can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Compliance with, and changes in these laws may increase our compliance costs and as such adversely affect our results of operations and financial condition.

39. *One of our Group Company is engaged in similar line of business. Any conflict of interest in future may occur between our group company or our promoter group entities and us may adversely affect our business, prospects, results of operations and financial condition.*

Our Company is engaged in the business of manufacturing and supply of Food Grade FIBC Bags. Our group company and also Promoter Group Entity viz. Umasree Texplast Private Limited is also engaged in the similar business. It is pertinent to note that Umasree Texplast Private Limited is engaged in the business of manufacturing of nonfood grade FIBC Bags whereas company is engaged in the business of manufacturing of food grade FIBC Bags. We have not executed any Non-Compete Agreement with our Group Company undertaking not to engage in businesses similar to that of our Company. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company, our other Promoter, Group Entities/Company in circumstances where our respective interests diverge. In cases of conflict, our Promoters may favour our Group Entities/Company in which our Promoters have interests. There can be no assurance that our Promoters/Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our business, results of operations and financial condition. For further details please refer to chapter titled “**Our Group Company**” beginning on page no. 161 of this Draft Red Herring Prospectus.

40. *We are subject to the restrictive covenants of banks in respect of the Loan/Credit Limit and other banking facilities*

availed from them.

We have entered into agreements for availing debt facilities from lenders. Certain covenants in these agreements require us to obtain approval/permission from our lenders in certain conditions. In the event of default or the breach of certain covenants, our lender has the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business. In the event we breach any financial or other covenants contained in certain of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact the results of operations and cash flows.

41. If we are unable to service our debt obligations in a timely manner or to comply with various financial and other covenants and other terms and conditions of our financing agreements, it may adversely affect our business, prospects, results of operations and financial condition.

As of December 31, 2023 our Company had total indebtedness in the form of short term and long-term borrowings of ₹ 763.06 lakhs on restated basis. Our indebtedness could have several important consequences, including but not limited to the following:

- A portion of our cash flows may be used towards repayment of our existing debt, which will reduce the availability of our cash flows to fund working capital, capital expenditures and other general corporate requirements;
- Our ability to obtain additional financing in the future at reasonable terms may be restricted;
- Fluctuations in market interest rates may affect the cost of our borrowings, as some of our indebtedness is at variable interest rates;
- There could be a material adverse effect on our business, financial condition and results of operations if we are unable to service our indebtedness or otherwise comply with financial and other covenants specified in the financing agreements;

Many of our financing agreements also include various conditions and covenants that require us to obtain consent of the lenders prior to carrying out certain activities or entering into certain transactions. Certain covenants in these agreements require us to obtain approval/permission from our lenders in certain conditions. In the event of default or the breach of certain covenants, our lender has the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business. For further details in this regard, please refer to *Terms & Conditions of Loans for Annexure 1.3 & 1.7* on page F 15 under chapter titled “*Restated Financial Statement*” beginning on page 166 and in chapter titled as “*Financial Indebtedness*” on page 181 of this Draft Red Herring Prospectus.

42. Our lenders have charge over our movable in respect of finance availed by us and our group company, promoters, Directors and member of promoters group have provided their personal guarantee and mortgage their immovable properties for such debt facility availed by us.

We have secured outstanding debt of ₹ 470.60 lakhs as on December 31, 2023 and we have secured our lenders by creating charge over our movable and our group company, promoters and directors have provided their personal guarantee and mortgage their immovable properties for such debt facility availed by us. In the event we default in repayment of the loans availed by us and any interest thereof, our properties may be forfeited by lenders.

Moreover, In the event that any of these guarantees are revoked by promoters, members of promoters group or third party, the lenders for such facilities may require alternate properties as mortgages/guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities.

We may not be successful in procuring alternative properties/guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

For further information on the financing and loan agreements along with the total amounts outstanding, please refer to section titled “*Restated Financial Statement*” on page 166 of this Draft Red Herring Prospectus.

43. Our contingent liabilities as stated in our Restated Financial Statements could affect our financial condition.

Our Contingent liabilities as on December 31, 2023 were ₹ 41.08 Lakhs related to Taxation matter and Bank Guarantee. If these contingent liabilities materialize, fully or partly, the financial condition of our Company could be affected.

For more information, regarding our contingent liabilities, please refer “Annexure XI” on page F 36 in chapter titled “Restated Financial Statement” beginning on page 166 of this Draft Red Herring Prospectus.

44. Changes in technology may render our current technologies obsolete or require us to make substantial investments.

To remain competitive and efficient, modernization and technology upgradation are crucial for reducing costs and increasing output. Our business heavily relies on technology and machinery to deliver quality products. However, there is a risk of our technology and machinery becoming obsolete over time or not being upgraded timely, which can adversely impact our operations and financial condition. While we believe that we have implemented updated technology, we understand the importance of continuous improvement. We are committed to staying abreast of the latest technological standards and trends to enhance our capabilities. In the event of a new technology emerging in our industry, we may be required to invest in adopting that technology or upgrading our existing machinery and equipment to remain competitive.

The costs associated with upgrading technology and modernizing machinery are significant, and they can have a substantial impact on our finances and operations. These investments may lead to higher capital expenditures and can temporarily affect our profitability and cash flow. We must carefully assess the potential benefits and returns on such investments to ensure they align with our long-term growth objectives.

Our ability to successfully implement technology upgrades and modernization efforts depends on various factors, including availability of skilled technicians, compatibility of new technology with existing systems, and adequate financial resources. Delays or challenges in adopting new technology can hinder our operational efficiency and competitiveness in the market.

45. The average cost of acquisition of Equity shares by our Promoters is lower than the Issue price.

Our Promoter’s average cost of acquisition of Equity shares in our Company is lower than the Issue Price of Equity shares as given below:

Sr. No	Name of Promoters	No. of Equity Shares Held	Average Cost of acquisition per equity share (in ₹)
1.	Mr. Punit Mahendra Gopalka	16,96,200	4.38
2.	Mr. Anup Mahendra Gopalka	16,96,200	3.75
3.	Mr. Sanjay Pandurang Sadavarte	14,79,000	2.04

46. Fraud, theft, employee negligence or similar incidents may adversely affect the results of operations and financial condition.

Our company faces potential risks related to incidents of theft or damage to inventory. While we have not encountered such situations in the past, we acknowledge that there is a possibility of experiencing inventory losses due to various factors such as employee theft, vendor fraud, and general administrative errors. These incidents could have a negative impact on the results of operations and financial condition. Despite implementing security measures and internal controls, there is no guarantee that we will completely avoid instances of fraud, theft, employee negligence, or security lapses in the future. Any such occurrence could lead to significant financial losses and affect our overall business performance.

Although we have insurance coverage against losses due to theft, fire, breakage, or damage caused by other casualties, the extent of coverage may not fully mitigate the financial impact of such incidents on our operations and financial condition. In some cases, the losses incurred may exceed the insurance coverage, resulting in additional financial strain for the company.

47. Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we

may not declare dividends in the foreseeable future. As such our company has not paid any dividend in past. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

48. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

49. *Any variation in the utilization of the Net Proceeds as disclosed in this Draft Red Herring Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.*

We propose to utilize the Net Proceeds towards utilization for the Capital Expenditure, working capital requirement and General Corporate Purposes. For further details of the proposed objects of the Issue, see Chapter titled as “*Objects of the Issue*” beginning on page 83 of this Draft Red Herring Prospectus. However, these objects of the Issue have not been appraised by any bank, financial institution or other independent agency. Further, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with the Companies Act, 2013 and the SEBI ICDR Regulations, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Red Herring Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations.

Further, our Promoters would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement to provide an exit opportunity to such dissenting shareholders of our Company may deter our Promoters from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition, if any, which may adversely affect our business and results of operations.

50. *Any future issuance of our Equity Shares may dilute prospective investors’ shareholding, and sales of our Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financing could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders.

We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or

at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy. Any issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

51. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue price of the equity shares will be based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled "***Basis for Issue Price***" beginning on page 95 of the Draft Red Herring Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

52. The Objects of the Issue for which funds are being raised, are based on our management estimates and the same have not been appraised by any bank or financial institution or any independent agency. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titled as "Objects of the Issue".

The fund requirement and deployment, as mentioned in the chapter titled as "***Objects of the Issue***" on page 83 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter titled "Objects of the Issue" on page 83 of this Draft Red Herring Prospectus is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation under chapter titled "***Objects of the Issue***" will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control and will be subject applicable rules and regulations. The occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

53. In the event there is any delay in the completion of the Issue, or delay in schedule of implementation, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the objects of the Issue as has been stated in the chapter titled "***Objects of The Issue***" on Page no. 83 of this Draft Red Herring Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management 's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, it may adversely affect our revenues and results of operations.

54. We have not identified any alternate source of raising the funds required for the object of the Issue and the deployment of funds is entirely at our discretion and as per the details mentioned in the section titled "Objects of the Issue".

Our Company has not identified any alternate source of funding for our object of the Issue and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. For further details of Please refer chapter titled "***Object for the Issue***" beginning on page 83 of this Draft Red Herring Prospectus.

55. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge, and we cannot assure that we will be able to do so in a timely manner. The failure of our Company to meet the listing requirements of stock exchange could lead to imposition of huge penalties, if any including suspension of trading, imposed by Stock Exchange.

56. *Certain data mentioned in this Draft Red Herring Prospectus has not been independently verified.*

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

EXTERNAL RISK FACTORS

After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

The price of the Equity Shares on the stock exchange may fluctuate as a result of the factors, including:

- Volatility in the India and global capital market;
- Company's results of operations and financial performance;
- Performance of Company's competitors;
- Adverse media reports on Company;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India's economic and fiscal policies; and
- Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

1. *An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our business, results of operations and financial condition.*

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

2. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

3. *Any changes in the regulatory framework could adversely affect our operations and growth prospects.*

Our Company is subject to various regulations and policies. For details see section titled “**Key Industrial Regulations and Policies**” beginning on page no. 126 of this Draft Red Herring Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

4. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

5. *We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.*

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

6. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company has appointed Swastika Investmart Limited as Book Running Lead Manager for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

7. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder’s ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index - based –market - wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

8. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include various taxes introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates / slab will continue in the future. Any changes in these tax rates / slabs could adversely affect our financial condition and results of operations.

9. *NSE may not grant Approval for listing of equity shares of our Company.*

Our company will apply for In-principle approval to NSE for its proposed public issue. There is a risk that the National Stock Exchange of India Limited (NSE) may not grant approval for our proposed public issue. The approval process involves rigorous scrutiny of our company's financials, compliance with regulatory requirements, and overall suitability for listing. Despite our best efforts to meet all regulatory standards and provide comprehensive disclosures, there is no guarantee that the NSE will find our application satisfactory. Non-approval by the NSE would significantly impact our ability to access the capital markets and raise the necessary funds for our planned expansions and operations. This could adversely affect our financial condition and future growth prospects. Investors should consider this risk before making any investment decisions. Previously our company had filed Draft Red Herring Prospectus on March 27, 2024 with NSE, However said DRHP was withdrawn and our company is in the process of refiling it with NSE.

10. *You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Emerge Platform of NSE. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

11. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the Trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

12. *The Equity Shares have never been publicly traded, and the Issue may not result in an active or liquid market for the Equity Shares. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price.*

Prior to the issue, there has been no public market for the Equity Shares, and an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, there will be liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Issue. The market price of the Equity Shares after the Issue can be volatile as a result of several factors beyond our control, including volatility in the Indian and global securities markets, our results of operations, the performance of our competitors, developments in the Indian and global machine tools industry, changing perceptions in the market about investments in this sector in India, investor perceptions of our future performance, adverse media reports about us or our sector, changes in the estimates of our performance or recommendations by financial analysts, significant developments in India's economic liberalisation and deregulation policies, and significant developments in India's fiscal regulations. In addition, the Stock Exchanges may experience significant price and volume fluctuations, which may have a material adverse effect on the market price of the Equity Shares. General or industry-specific market conditions or stock performance or domestic or international macroeconomic and geopolitical factors unrelated to our performance may also affect the price of the Equity Shares. In particular, the stock market as a whole in the past has experienced extreme price and volume fluctuations that have affected the market price of many companies in ways

that may have been unrelated to the companies' operating performances. For these reasons, investors should not rely on recent trends to predict future share prices, results of operations or cash flow and financial condition.

13. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

14. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

15. Terrorist attacks or war or conflicts involving India or other countries could adversely affect consumer and business sentiment and the financial markets and adversely affect our business.

Terrorist attacks and other acts of violence or war may adversely affect global equity markets and economic growth as well as the Indian economy and stock markets. Such acts negatively impact business and economic sentiment, which could adversely affect our business and profitability. Also, India has from time to time experienced, and continues to experience, social and civil unrest and hostilities with neighboring countries. Armed conflicts could disrupt communications and adversely affect the Indian economy. Such events could also create a perception that investments in Indian companies involve a high degree of risk. This, in turn, could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares. The consequences of any armed conflicts are unpredictable and we therefore may not be able to foresee events that could have an adverse effect on our business.

For further details on the method and procedure for Bidding, please see section entitled “*Issue Procedure*” on page 223 of this Draft Red Herring Prospectus.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20.00 to ₹24.00 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Amount (₹)	Cumulative Quantity	Subscription
500	24.00	500	16.67%
1000	23.00	1500	50.00%
1500	22.00	3000	100.00%
2000	21.00	5000	166.67%
2500	20.00	7500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

- Our key current assets to turnover ratio remained at 35.00%, 27.14%, 27.71%, 46.71% and 46.54% as on March 31, 2021, 2022, 2023, December 31, 2023 and March 31, 2024 respectively. The same is estimated to be 43.78% and 43.89% for March 31, 2025 and March 31, 2026 respectively.
- With increase / decrease in turnover and change in market dynamics, key current assets i.e. inventory, and receivables changes accordingly while other current assets may or may not vary simultaneously.
- Level of trade creditors are not directly related to variation in turnover but based on funding pattern of current assets, adopted by Company. For higher trade creditors, we have to forgo various discounts. Keeping the same in mind, although with increase in turnover, we have been reducing our creditors over the period. The creditors in absolute term, declined from Rs. 1,102.51 Lakhs as on March 31, 2021 to Rs. 806.67 Lakhs as on March 31, 2022 and further to Rs. 662.63 Lakhs as on March 31, 2023 and ₹ 463.71 Lakhs on December 31, 2023. Inventory of Raw Materials and Finished Goods and Others (due to higher purchases during the period January 2024 to March 2024).

Reason for reduction in trade payable amount in projections period:

We would like to inform you that company is engaged in the production of Food Grade Flexible Intermediate Bulk Container (FIBC) bags, for which major raw material is fabrics. These fabrics, in turn, are made from polypropylene granules, a byproduct for crude oil processing companies.

The pricing of polypropylene is influenced primarily by two factors: the quantity ordered and the credit period availed. Oil Processing companies publishes their rate card for polypropylene based two factors one for sales on a credit basis and the other for cash sales. The price difference between these two transaction types is such that it results price variation of 16% to 18% p.a.

Major reason for increase in working capital is due to decrease in Trade payables of the Company. Price of Raw material depends on amount of credit period availed by our company. Level of trade creditors is not directly related to variation in turnover but based on funding pattern of current assets, adopted by Company. For higher trade creditors, Company has to forgo various trade discounts and cash discounts.

Company has already incurred capital expenditure for increase in installed capacity, therefore company is raising amount from Initial public offer to fund *inter alia* its working capital requirement. Company intends to avail trade and cash discounts which ranges between 1.4%-1.5% monthly bases.

ECONOMIC GROWTH

World Economic Outlook: Global growth appears to be decelerating, with several key advanced economies slowing in the third quarter. Gross domestic product (GDP) contracted in Japan (-2.1% annualised) and the eurozone (-0.2%). Meanwhile, GDP growth slowed in the United Kingdom (UK; 0% vs 0.2% previous quarter). The United States (US) was a notable exception, with its real GDP growth accelerating sharply (4.9% annualised vs 2.1% previous quarter).

Central banks in many advanced economies-maintained interest rates during their latest policy meetings. While inflation remains above targets, it has eased significantly over the past year. Central banks will closely monitor the impact of past rate hikes on economic growth and inflation.

US growth accelerates.

Real GDP in the US expanded an annualized 4.9% in the third quarter (vs 2.1% previous quarter), the fastest since the fourth quarter of 2021. Higher consumer spending (4% vs 0.8%) drove the growth, supported by exports, government spending, private inventory investment, and residential fixed investment.

The US economy added 150,000 jobs in October (vs an average of 258,000 in the previous 12 months). The unemployment rate edged up to 3.9% (vs 3.8% the previous month), its highest since January 2022.

Inflation eased to 3.2% in October (vs 3.7% the previous month), led by a 4.5% on-year slide in energy prices (vs 0.5% decline). Core inflation moderated marginally to a two-year low of 4% (vs 4.1%).

The Federal Reserve maintained the funds rate at 5.25-5.5% for the second consecutive time at its November meeting. The committee noted it will factor in tightening of monetary policy, the lags with which it affects the economy and further developments for additional policy firming.

The trade deficit widened \$2.9 billion on-month to \$61.5 billion in September, as the rise in imports outpaced the increase in exports.

UK trade deficit narrows

Real GDP growth was flat in the UK in the third quarter (vs 0.2% previous quarter). Output in the services sector contracted 0.1%, which was largely offset by 0.1% growth in output in the construction sector. Manufacturing output remained steady. Inflation fell sharply to 4.6% in October (vs 6.7% previous month), the lowest rate since October 2021, led by the housing and household services category (-3.5% vs 6.9%). The Bank of England held rates steady at 5.25% for the second consecutive time at its November meeting. The committee raised its inflation forecast, as it believes that risks are tilted to the upside. It also cut its GDP forecasts, citing weaker-than-expected activity data. The UK's trade deficit narrowed to £1.57 billion in September (vs £2.7 billion previous month), as the fall in imports (-3.7%) outpaced the decline in exports (-2.2%).

The eurozone economy contracted a seasonally adjusted 0.1% in the third quarter (vs expansion of 0.2% the previous quarter). Inflation declined sharply to 2.9% in October (vs 4.3% the previous month), the lowest rate since 2021. Energy prices fell at a sharper pace (-11.1% vs -4.6%), while food inflation eased (7.5% vs 8.8%). Core inflation, which excludes energy, food, alcohol and tobacco, softened to 4.2% (vs 4.5%). The European Central Bank held interest rates steady in October, following 10 consecutive rate hikes since July 2022. The central bank believes maintaining rates at current levels for a sufficient duration will significantly contribute to achieving its target inflation.

Bank of Japan loosens yield curve control

Japan's GDP contracted 2.1% in the third quarter (vs 4.5% growth the previous quarter) following two straight quarters of growth. The IHS Markit Japan Manufacturing PMI (Purchasing Managers' Index) increased to 48.7 (vs 48.5). It remained below the neutral level of 50 for the fifth consecutive month, indicating contracting manufacturing activity. Inflation eased to 3% in September (vs 3.2%), led by a greater fall in prices of fuel, light and water (-14.3% vs -12.3%). However, food inflation accelerated to 9% (vs 8.6%), the highest rate since 1976. The Bank of Japan adjusted its yield curve control policy, allowing the yield on the 10-year Japanese government bond to rise above 1%. It kept the policy rate unchanged at 0.1%. Japan's trade deficit narrowed sharply to JPY 662.6 billion in October (vs JPY 2205.9 billion in the same month last year), as imports contracted sharply (-12.5%) while exports rose (+1.6%).

Manufacturing activity contracts in China

The official National Bureau of Statistics Manufacturing PMI decreased to 49.5 in October (vs 50.2 previous month). It has been below the threshold level of 50 for six of the last seven months, reflecting weakness in the manufacturing sector. The non-manufacturing PMI also fell in October but remained above 50, indicating expansion in the services sector.

Inflation in China turned negative to -0.2% in October (vs 0% the previous month). Food inflation declined to -4% (vs -3.2%), led by pork prices. Core inflation, which excludes food and energy, also slowed to 0.6% (vs 0.8%). Despite low inflation, the People's Bank of China held the key policy rate steady at 3.45% in November. However, the central bank ramped up liquidity injection in the banking system.

China's trade surplus fell to \$56.5 billion in October (vs \$82.4 billion in the same month last year), as exports declined (-6.4%) while imports rose (+3%).

Energy prices decline

Energy prices declined 1.8% month in October. Brent crude fell 3.1% on-month to average \$91.1/barrel (bbl) in October (vs \$94/bbl the previous month). Crude oil prices were volatile in October as conflict in the Middle East led to fears of supply disruption. Prices eased as Saudi Arabia pledged to help stabilize the oil market. Prices of Australian coal fell 12.5% on-month to \$142.1/metric tonne. Prices of European natural gas rose 26.2% on-month but fell 62.7% on-year. Non-energy prices fell a softer 1.6% on-month.

Indian Economy Outlook: The effects of the slowdown in global economic growth resulting from high inflation and the continuing war between Russia and Ukraine are also seen to be affecting India's economic performance. The country recorded muted growth of 4.4% in Q4 2022 compared to 6.3% in Q3 2022, with sluggish private consumption and exports being the major reasons behind that. The country's real GDP growth in the fiscal year 2022-23 is estimated at 7.0% in comparison to 9.1% in the prior year. However, some demand indicators such as record sales of 3.8 million in the passenger vehicles segment in 20221, strong growth in tractor sales, and a rise in domestic air travel, continue to support economic growth.

India's quarterly GDP growth

Despite the sluggish growth in the latest quarter, we still expect India to be one of the major beacons of growth in 2023, driven by strong domestic demand and government expenditure. The efforts of the Union Budget 2023-24 to improve the disposable income of taxpayers in the country are expected to boost consumption via an increase in discretionary spending. In addition, the strong capital expenditure push provided by the Union Budget, with an increased outlay of 37.4% in comparison to the fiscal year 2022-23, is expected to drive growth, investments, and job creation. The government's

reduction of over 39,000 compliances and decriminalization of over 3,400 legal provisions will also foster the ease of doing business in the country. Strong credit growth and resilience in financial markets are further expected to create an environment that supports investments.

A high unemployment rate, however, remains a concern for India, standing at 7.5% in February 2023. Inflation, which was falling since October 2022, spiked again to 6.5% in January 2023 driven by high food prices, breaking the Reserve Bank of India’s (RBI) upper tolerance limit, though still below the elevated levels seen during the first half of 2022-23. The RBI is focused on the withdrawal of accommodation aimed at controlling inflation, with policy repo rates hiked six times since May 2022. The ongoing global geopolitical tensions and higher demand from various countries lifting Covid-19-related mobility restrictions are also expected to affect commodity prices. Core inflation is expected to be affected by the continued transfer of input costs to output prices, particularly in the services sector. However, input costs and output prices are expected to ease in the manufacturing sector. Taken together, the RBI projects inflation at 6.5% for 2022-23 and 5.3% for 2023-24. A robust domestic demand and favorable government initiatives are expected to help India remain as one of the fastest-growing major economies globally. However, external challenges, such as a slowdown in the global economy and monetary tightening in advanced economies, are factors that could affect the country’s growth.

FIBC Market Outlook (2023 to 2033)

The global FIBC market size is expected to top a valuation of US\$ 12.6 billion by the end of 2033, with a CAGR of 5.4% during the forecast period. In the year 2023, the market is expected to generate revenue of US\$ 7.5 billion. The global FIBC market is estimated to hold a 1/3rd value share of the global IBC market worth US\$ 22 billion in 2022.

Attribute	Details
Market Size (2023)	US\$ 7.5 billion
Projected FIBC Market Size (2033)	US\$ 12.6 billion
Value CAGR (2023 to 2033)	5.4%
Historical CAGR (2018 to 2022)	4%

Flexible intermediate bulk containers (FIBC) that carry at least 750 kg are the most preferred type, estimated by Future Market Insights (FMI). As per the study, the FIBC industry is projected to grow steadily as manufacturers introduce lightweight containers.

The expansion of the food and pharmaceutical industries as well as the growing requirement to lower the total weight of bulk packaging is one of the key factors driving the demand for FIBC. Industries are projected to use FIBCs to transport grains, rice, and liquid chemicals used in biological products.

FMI predicts this sector is anticipated to witness a compound annual growth rate of 5.8% from 2023 to 2033.

FMI predicts this sector is anticipated to witness a compound annual growth rate of 5.8% from 2023 to 2033.

What is the Historical and Forecast Outlook for FIBC Market?

Over the historical period of 2018 to 2022, FIBCs were built to be reusable and were intended for specific goods. Nowadays, several types of specialized FIBC gaining traction across diverse industries, boosting the market.

The growing inclination of end users towards FIBC in place of traditional packaging and transportation is one of the factors propelling the demand. The need for high durability had a minor impact on the adoption rate of FIBC, hence manufacturers are developing new product lines to cater to the growing demand from end users.

As per FMI, the industrial sector is predicted to experience steady growth due to the integration of machine learning and the adoption of robotics, which, in turn, is projected to fuel the growth of the FIBC industry.

FIBC Market in India

Favorable Make-in-India Initiatives to Surge the Demand for FIBC in Food and Agriculture Industries.

The Indian Flexible Intermediate Bulk Container Association states that the FIBC market in India has increased by almost 38% in the last 10 years. The food-grade FIBC is gaining immense traction, registering prominent growth rates. FIBC industry is expected to grow at a CAGR of 6.9%

As per the association, FIBC production in India is recorded as 306,996 MT in 2021. The food-grade FIBC production was nearly 28% of the total production of FIBC in India. The total export sales of FIBC from India increased 3 times over the past decade and reached US\$ 708.48 million from 2020 to 2021. The expansion of various industries and increasing trade activities are propelling the demand for FIBC.

Several industries, including food products & agriculture, pharmaceutical products, and chemicals & fertilizers, have experienced substantial industrialization. This is due to the increased international commerce and several favorable measures by the Indian government.

Make-in-India initiatives and industry-specific incentives are boosting the establishment of numerous manufacturing enterprises in India. Hence, the demand for FIBC for effective storage and transportation of goods is surging with the rise of such end-user industries.

According to the FMI study, India is predicted to grow [w at a rate of 2x during the forecast period.](#)

Our Competitive Strengths:

We believe that we possess a number of competitive strengths, which enable us to successfully execute our business strategies, including the following:

b. Wide Range of Products

Our product portfolio of FIBC Bags has the following eight varieties:

i. 4 loop FIBC Bags

This standard bag includes builder bags, tunnel lift bags, corner and cross-corner loop bags with various top and bottom attachment options. They are designed to carry load ranging from 500 kgs to 2000 kgs, with safe workload (SWL) of 5:1/ 6:1. These bags are an efficient alternative for storage and transportation in comparison to the traditional woven sacks. Builder bags are primarily used to store construction materials like gravel, sand, stone etc. and have open top and flat bottom construction. Tunnel lift bags have an enhanced design in contrast to the builder bags which make them an ideal choice to reduce labour costs as comparatively less time is required to fill these bags. These bags are primarily used in chemical, food and pharmaceutical sector.

ii. Q FIBC Bags

The unique stitching of Q bag design prevents the sides of the bag from bulging out or falling over when being stored or transported. This ensures that the bag maintains its straight shape. These bags allow 30% more material to be filled per bag as compared to the standard FIBC because of uniform material flow to all four corners. These bags are primarily used in chemical, food and pharmaceutical sector.

iii. UN certified bags

UN Bags are designed to carry hazardous products and their use is regulated by the UN Association, commonly known as the orange book. UN Bags are also classified according to the Hazard level of goods they carry. All UN Bags are treated as multi-trip bags. UN bags are not classified by safety factors. They are instead classified by packing groups I, II or III. Several tests are applied to the UN Certified Big Bags in order to verify UN requirements such as the top lift test, tear test, stacking test, drop test, topple test, and righting test. These tests are conducted by the certified test houses before the issue of the certificates. This report will describe in detail not only the specification of the FIBC tested but the test levels which the FIBC has passed. The certificate is unique to the type of FIBC tested and may only be used to cover the carriage of products within the limit of the UN test.

iv. Ventilated bags

These Bags are specially designed to store perishable food produce. The ventilated fabric permits required air flow into the bag, thus preventing mold build-up. The common supply chain issues which the clients face while using 25 kg or 50 kg woven sack bags are eliminated when the ventilated bags are used. This is an economical and effective alternative to the traditional woven sack bags.

v. Conductive bags – (Type C bags)

Our company manufactures an exclusive range of conductive bags in various colours, sizes and dimensions. These bags are made with specially designed conductive fabrics with interwoven conductive yarns. Conductive bags are provided with grounding tabs, which are to be earthed in order to dissipate the static charge created around the jumbo bag during the filling and discharge operations. These bags undergo quality tests as per predefined parameters to ensure that only quality bags are delivered to the customers.

vi. Type D bags

Type D Bags are produced using anti-static and static dissipative fabrics which prevent any occurrence of sparks or brush discharges. These bags are different from conductive bag as they are not required to be connected to the ground for dissipating the static charge. These bags are used to pack and handle combustible products in a combustible environment. Our company is licensed to manufacture Type D Crohmiq FIBC Bags. CROHMIQ is internationally recognized for Type D static protective bulk bag packaging technology. Worldwide technical support is available to all users of CROHMIQ FIBC.

vii. One two loop FIBC bag

These bags are produced from single tubular fabric. Compared to the standard four loop bags, these bags have different construction. The body-fabric of the bag itself is extended into a lifting loop which gives the bag a higher breaking strength and makes the FIBC easier to lift. The loops can be wrapped with coloured sleeves which provides assistance in separating different bags as per their application. These bags are primarily used in the agriculture sector but they are also used for storing and transporting powdered goods and minerals.

viii. Container liner

Container liner is a bag which fits a standard 20 feet or 40 feet ISO container. These bags are made from polypropylene fabric which lines the inside of the container walls. The liner bag is placed inside the container and fixed using loops which are provided on all sides of the container. The filling and discharge options are customisable as per the requirement of the customer. Container liners are used for packaging any kind of dry bulk materials such as petrochemicals, urea, soda ash, foodgrains, coffee, fertilisers etc. These liners substantially

reduce packaging and handling costs and at the same time provide the customers with a safe and clean packaging option.

Raw Material Procurement:

The first step involves sourcing raw materials like fabric and threads necessary for FIBC bag production. It is crucial to select high-quality materials that meet the required specifications to ensure the durability and performance of the final product.

IQC Inspection of Raw Material:

Upon receipt of raw materials, an Incoming Quality Control (IQC) inspection is conducted to assess the quality and specifications of the materials, ensuring they meet the required standards.

Storage of Raw Material:

Inspected raw materials are stored in designated areas under controlled conditions to prevent contamination and damage. Proper storage practices help maintain the quality and usability of the materials throughout the manufacturing process.

Bifurcation of Raw Material into Different Grades (Antistatic):

Raw materials are categorized into different grades based on properties like antistatic characteristics, ensuring they meet specific application requirements. This step ensures that the final FIBC bags possess the desired properties and performance attributes.

Transfer Raw Material to Cutting Division:

Once categorized, raw materials are transferred to the cutting section for further processing. This step marks the transition from raw material preparation to the manufacturing process itself.

Cutting and Printing:

In this process, the raw materials are cut into the appropriate sizes according to the specifications of the FIBC bags. Additionally, if required, printing is done on the FIBC sheets to include branding, labeling, or any necessary information as per customer requirements.

Sampling Inspection after Printing and Cutting:

Following cutting and printing, a sampling inspection is carried out to verify the accuracy of the printing and cutting processes. This step ensures that the FIBC bags meet the required standards and specifications, identifying and rectifying any defects or deviations.

Sewing of FIBC Bags:

The cut pieces of fabric are sewn together using industrial sewing machines to form the body of the FIBC bags. Handles, lifting loops, and other components are also attached during this process, ensuring the bags are sturdy and functional.

Sample or 100.00% Inspection with metal detection after Sewing:

After sewing, either a sample inspection or 100% inspection is performed to assess the quality of the sewn FIBC bags. This step involves checking for defects, ensuring proper stitching, and verifying overall integrity to meet quality standards. After the same, a metal detection process is employed to ensure no metallic impurities are present.

Packing of FIBC Bags:

Inspected FIBC bags are packed into bundles or pallets according to customer orders and shipping requirements. Proper packing ensures the protection of the bags during transportation and storage.

Dispatch of FIBC Bags:

The final step involves preparing the packed FIBC bags for dispatch, including labeling, documentation, and arranging transportation to the designated delivery locations. This ensures timely delivery of the products to customers while maintaining traceability and compliance with shipping regulations.

RAW MATERIALS:

Our major raw materials are PP Woven fabric, PP Narrow Woven fabric, PP Limer and Yarn. We source more than 95% of our raw materials from our group company viz. Umasree Texplast Private Limited which is also located in Gujrat.

Difference between the actual results and estimates are recognized in the year in which the results are known / materialized..

4. Property, Plant and Equipment and Depreciation

Property, Plant and Equipment are stated at cost less accumulated depreciation and impairment losses, if any. Cost comprises of all expenses incurred to bring the assets to its present location and condition. Borrowing cost directly attributable to the

Capital assets (including expenditure incurred during the construction period) under erection / installation are stated in the Balance Sheet as “Capital Work in Progress.”

Depreciation on Fixed Assets is provided to the extent of depreciable amount on the Straight Line Method (SLM) Method. Depreciation is provided based on useful life of the assets as prescribed in Schedule II to the Companies Act, 2013. The carrying amount of assets is reviewed at each balance sheet date if there is any indication of impairment based on internal or external factors. An impairment loss is recognised wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the assets, net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

Intangible Assets:

These assets are stated at cost of acquisition net of accumulated amortization/ depletion and impairment loss, if any. The cost comprises purchase price, borrowing costs, and any cost directly attributable to bringing the asset to its working condition for the intended use and net of charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the intangible assets. Intangible assets like software licenses etc. are amortized over a period of its three years of useful life.

Impairment of Property, Plant And Equipments

The carrying value of assets of the Company’s cash generating units are reviewed for impairment annually or more often if there is an indication of decline in value based on internal/external factors. If any indication of such impairment exists, the recoverable amounts of those assets are estimated and impairment loss is recognized, if the carrying amount of those assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the estimated future cash flows to their present value based on appropriate discount factor. Net selling price is the estimated selling price in the ordinary course of business less estimated cost of completion and to make the sales.

5. Foreign currency Transactions:

Transactions in foreign currency are recorded at the rates of exchange in force at the time the transactions are effected. PHASED IMPLEMENTATION OF UPI FOR BIDS BY RETAIL INDIVIDUAL BIDDERS AS PER THE UPI CIRCULAR

SEBI has issued circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019, and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to the mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure a complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediaries and use his/ her UPI ID for the purpose of blocking funds. The time duration from public issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019, and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Furthermore, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

Phase III: The commencement period of Phase III is notified pursuant to SEBI press release bearing number 12/2023 and as per the SEBI Circular No. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023, where the revised timeline of T+3 days shall be made applicable in two phases i.e. (i) voluntary for all public issues opening on or after September 1, 2023; and (ii) mandatory on or after December 1, 2023. The Issue has been considered to be made under UPI Phase III, subject to any circulars, clarification or notification issued by the SEBI from time to time.

Pursuant to the SEBI UPI Circular, SEBI has set out specific requirements for the redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the SEBI UPI Circular include the appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints in this regard, the relevant SCSB as well as the post-issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make applications using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate the collection of requests and/or payment instructions of the Retail Individual Applicants into the UPI payment mechanism.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks make an application as prescribed in Annexure I of SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022, and provide written confirmation on compliance with SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, read with SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Further, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/45 dated April 5, 2022, all UPI Bidders applying in public Offers where the application amount is up to ₹ 500,000 shall use the UPI Mechanism and shall also provide their UPI ID in the Bid cum Application Form submitted with any of the entities mentioned herein below:

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off

Bids are valid Bids and are considered for allocation in the respective categories.
