SUMMARY OF OUR INDUSTRY

GLOBAL OVERVIEW OF EDTECH INDUSTRY:

EdTech has been around for longer than most people realize. Computer-aided education is simply a natural result of improved technology. Schools and training centers used existing technology in the mid-twentieth Century, including copy machines and media learning via training films. In the 1960s, schools began experimenting with computers for teaching spelling and math. Soon after internet connectivity was available, online courses were created. It is estimated that six million students enrolled in U.S.-based courses by 2010. Open University in the United Kingdom and the University of British Columbia in Canada pioneered online education. They allowed students to communicate with each other and teachers directly. EdTech has become more accessible and more efficient thanks to the development of better video conferencing programs and multimedia sources. EdTech now includes innovations such as EdTech "robots" for students to take notes, blockchain tools for educators to grade student work and tools for educators to grade.

Education technology has several benefits. According to educators, students learn at different speeds and in different ways. Some students learn best by reading information, but others find audio-visual information more helpful. EdTech allows students to learn from the most valuable and effective sources. Online learning students enjoy the advantage of accessing training and teaching at their own pace. Online learning allows students to study at their own pace and in a way that suits them best. This makes obtaining education and professional training for all kinds of people easier. This is especially helpful for people who have a full-time job and would find it difficult to take regular university courses. The enormous potential savings in education is an obvious and significant benefit of EdTech. Online e-learning is available at a fraction of the cost of attending a large university or small community college. Online learning is more affordable than traditional education, making obtaining a degree or professional certification easier.

Regional Insights

Asia Pacific is expected to grow rapidly during the forecast period. China led regional EdTech market growth, followed by India & Japan. Government-led programs, such as government-funded literacy expansion projects in rural areas, are predicted to increase the demand for smart education in India, Japan, and Australia. For instance,

The National Digital Library of India is an online library run by the Ministry of Human Resource Development that provides academic information arranged by topic area for various levels of smart education and learning. Furthermore, the Ministry of Education, Culture, Sports, Science, and Technology (MEXT) in Japan provides an e-learning forum organized by age and educational level.

International Cooperation and Training:

The International Cooperation and Training Division of MSDE collaborates with foreign countries by signing Memoranda of Understanding (MoUs)/Agreements for cooperation in skill sector including capacity building, Vocational Education and Training (VET), VET policy developments and reforms including career guidance and lifelong learning, VET in schools, exchange of interns, recognition of prior learning, recognition of skill qualifications, sharing of VET data and labour market information system, health sector job role mapping with countries facing shortage of health workers, identification of skill gaps in the labour markets, design bridge courses to equip the Indian skilled workers acceptable in foreign labour markets, focus on emerging technologies including green technology etc.

INDIAN OVERVIEW OF EDTECH INDUSTRY:

The Rise of Online Learning

Indian EdTech start-ups found their way into the spotlight at the beginning of the pandemic in 2020. But with restrictions easing in 2022 and educational institutions reopening, hybrid learning became part of the 'new normal'. EdTech firms that adapted their business models to include hybrid learning comprising of online and classroom have not only survived the business woes of the pandemic but thrived in its aftermath. Today, there are approximately over 4,450 Indian EdTech start-ups in India that are assisting over 300 million school students across the globe.

In line with this momentum, the Indian central government has rolled out several programs to boost the growth of the distance education market, besides focusing on techniques such as e-learning and m-learning. The government's focus on bringing the digital revolution to the education sector is evident with initiatives under the National Education Policy as well as the Union Budget 23- 24 that propose an improvement of digital infrastructure and regular training for teachers to encourage online and hybrid learning. While government support together with an impressive inflow of funding has helped Indian EdTech firms to thrive and expand offshore, digital payments have also played a key enabling role.

The need of India Upskilling

- **Affordable online education:**

Parents in India spend a lot of money on their children's education and additional skill learning. And, pursuing skill development offline is extremely costly. The edtech players offer learning programs which are readily available without paying high administrative fees. As a result, users benefit from the savings, which increase the courses' affordability, and according to KPMG research on online education in India in 2021, online skill learning courses are 53% less expensive than offline options.

- **Availability of quality education:**

Students are given access to high-quality education through online resources. Edtech companies are helping educational institutions not equipped with the latest digital infrastructure to bridge the gap to a considerable extent by supplementing them with the resources to support the e-learning model. Not only this, but online courses are also more successful in keeping up to date with the latest technological developments. These courses are well created with the help of subject matter experts. It is predicted that the online education market in India is expected to grow by US\$ 2.28 billion during 2021-2025, growing at a CAGR of almost 20%.

Conclusion:

India's young workers are poised for take-off; an additional 100 million people entering the workforce would not only substantially improve their own and their family's lives, but also has the potential to increase GDP by at least 20% and accelerate India towards becoming a USD 4 trillion economy. Given the heterogeneity of the

potential Indian workforce, upskilling to make these ambitious Indians employable, will need a granular, persona-based approach.

The road ahead

The rise of EdTech has made it possible to learn at anytime, anywhere. By embracing technologies like AI, ML, and IoT, edtech institutions and companies are adapting their pedagogies for online teaching and providing these cutting-edge courses through the digital medium for a fraction of the cost.

The edtech sector's potential to close the learning gap in the future appears to be quite promising given the trajectory of its expansion. Venture capital investments in India's edtech sector have increased 32 times over the past 12 years, from 500 million in 2010 to 16.1 billion in 2022 and the sector is expected to reach US\$ 30 billion by 2031.

[●]. Such perception can have negative impact on the image and identity of the company. Our company may face limitations when trying to diversify into new markets or industries and our students may be resistant to accept the brand in a context they don't associate it with, which can hinder expansion.

2. *There is outstanding litigation pending against our Promoters which, if determined adversely, could affect our business, results of operations and financial condition.*

7. *Subject matter teachers and content creation experts are the key to our business. Thus, Employees Benefit expenses and professional charges constitute a major portion of our expenses. Such a significant increase in this cost could lead to lower profitability.*

At present, we have 145 full- time employees and 444 full- time professionals/ consultants providing services in our company. Being an online education platform, a major percentage of our revenue is diverted towards the employee benefit expenses and legal and professional services. Our employees include the content creation team, marketing and sales management team and student support system.

We believe that these professionals are key to our success in business operations. In order to conduct our business, which includes providing a variety of courses spanning both the legal, non-legal and data analytics domain, we need highly specialized and efficient professionals. These professionals are experts of their area of work. If we experience a slowdown in student enrollments for our courses, we may not be able to efficiently reallocate our team to other courses and projects to keep their utilisation and productivity levels high.

Our Company’s ability to execute current and upcoming courses depends largely on their ability to attract, train, motivate and retain highly skilled professionals, particularly professionals. The attrition rates in the industry in which we operate have been high due to a highly competitive skilled labour market in India. We invest in training professionals that we hire to perform the services we provide.

The performance of our Company will be benefited on the continued service of these persons or replacement

of equally competent persons from the domestic or global markets. We may have difficulty in redeploying and retraining our professionals to keep pace with continuing changes in technology, evolving standards and changing customers.

August 26, 2023. For more information regarding “DataIsGood Edutech Private Limited”, please refer to the chapter titled “Our Group Entities” on page ____ of this Draft Red Herring Prospectus.

For further details regarding our business verticals, kindly refer to Chapter “Our Business” on page no [●] of the Draft Red Herring Prospectus.

11. We have entered into strategic partnership and collaboration with various universities and institutions for providing accreditation and certification.

Our company has entered into strategic partnerships with National Skill Development Corporation (NSDC), Texas A&M University, USA, Warsaw University, Poland, Swiss School of Management, Geneva as given in the chapter “Our Business” beginning on page no [●], for recognition of our courses at national and international levels. All our courses offered under the LawSikho brand are accredited by the National Skill Development Corporation (NSDC), which operates as a public-private partnership under the Ministry of Skill Development and Entrepreneurship of the Government of India. Upon successful course completion, our learners will receive a co-branded certificate bearing the names of NSDC and Skill India.

In addition to this, we also provide LLM degree program with Texas A&M University School of Law and Warsaw University, Poland and MBA- Data Protection and privacy management with Swiss School of Management, Geneva. We rely on the above-listed third parties for accreditations for these courses. Without the accreditations, we may not be able to attract the same enrollment numbers as we do with the accreditations.

12. We may be required to enter into strategic partnerships and acquisitions in the future, in relation to our growth strategy. If we are unable to successfully identify and integrate acquisitions, our growth strategy and prospects may be adversely affected.

We intend to utilise our IPO proceeds for unidentified and identified acquisitions. We have also mentioned in the chapter “Our Objects” beginning on page no. [●]. Our Company may enter into strategic acquisitions and takeovers that are complementary to our business operations, including opportunities that can help us further improve our technology system, profitability and market reach. We have limited experience in undertaking such strategic acquisitions and subsequent integrations of the same. These strategic acquisitions and subsequent integrations of newly acquired businesses would require significant managerial and financial resources and could result in a diversion of resources from our existing business, which in turn could have an adverse effect on our growth, profitability and business operations. Acquired businesses or assets may not generate expected financial results, integration opportunities, synergies and other benefits immediately, or at all, and may also incur losses. The cost and duration of integrating newly acquired businesses could also materially exceed our expectations, which could negatively affect our results of operation. We may also incur reputational or financial losses to resolve outstanding litigations, contractual liabilities or financial indebtedness we inherit from our strategic acquisitions. We may also face operational and structural integration challenges in integrating IT systems, retaining relationships with key employees of acquired businesses, and increased regulatory and compliance requirements. If any of such challenges are not resolved in our favour, we could lose opportunities in strategic acquisitions and alliances, and our business, financial condition and results of operations will be materially and adversely affected. We may face litigation, arbitral or other claims in connection with, or may inherit such claims or liabilities, as a result of any strategic transaction, including claims from erstwhile employees, distributors, customers, business partners or other third parties. Any inability to identify suitable acquisition, investment or other strategic growth opportunities or to complete such transactions on commercially viable terms in the future may adversely affect our competitiveness or growth prospects.

13. *Our brand name may not be easily acceptable out of India.*

Our brand name “LawSikho” comprises of “law”, which means legal area and “sikho”, which is a hindi term meaning learning. Our brand has been recognized in India however, such Indian name may not be easily acceptable abroad. The limited recognition of our brand outside India presents challenges that could impact our business operations and financial performance. A lack of brand familiarity may result in reduced consumer trust and preference, potentially affecting market share and revenue. To address this, we may need to launch new brands in foreign markets as per local sensibilities which may significantly increase marketing and advertising expenditures, potentially impacting our operational costs and profitability. Additionally, the competitive landscape and cultural differences in India and Foreign market can pose barriers to entry, requiring adaptation efforts and additional investment. Acquiring and retaining customers in a market where our brand is less recognized is an ongoing challenge that may require dedicated resources. The unpredictability of consumer sentiment in the foreign markets can expose us to market volatility and fluctuations in demand, affecting financial stability. Managing reputation-related risks and navigating regulatory compliance in a market where our brand is less known also poses potential challenges. While we are committed to addressing these issues, there is no assurance that our efforts will be entirely successful, and these factors may materially affect our financial results and growth prospects. Investors are encouraged to consider these risks in their assessment of our business.

14. *One of our Objects to the Issue includes development of new courses. If we are unable to attract students for new courses, we may not be able to justify the expenditure of the IPO proceeds.*

As on date of this Draft Red Herring Prospectus, we have forty-six (46) popular courses in different verticals ranging from legal courses, professional upskilling courses and related areas as mentioned in the chapter “Our Business” beginning on the page no. [●]. Our existing courses are well accepted by the students and we are earning good revenue from those courses. However, we have mentioned our intention to introduce and implement new courses. We intend to utilise 500.00 lakhs out of our IPO proceeds as mentioned in the chapter “Objects of the Issue” beginning on the page no. [●].

Based on the competitive nature of our industry, we are updating our services on a timely basis, which required adding and updating new courses as per market need. It may be possible that the new courses may not be able attract new enrolments or the course material may not be up to the student satisfaction which may expose us to financial risk.

If we are unable to utilise the Net Proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the IPO Proceeds and our business and financial results may suffer.

15. *One of our Objects to the Issue includes Identified Acquisition. If we are unable to fulfil the conditions of agreement, we may not be able to justify the expenditure of the IPO proceeds.*

As on the date of this Draft Red Herring Prospectus, we have entered into an agreement with Dataisgood Edutech Private Limited for acquisition of the company. The consideration shall be paid in combination of equity and cash. The cash component comprises of Rs. 336 lakhs, out of which 300 lakhs shall be paid through utilization of IPO proceeds over a specified period of one year. The remaining consideration shall be paid in the form of equity shares of Addictive Learning Technology Limited of the value of Rs. 1700 lakhs, to the existing shareholders of Dataisgood Edutech Private Limited over a period of 3 years, subject to fulfilment of the milestones and the conditions of the agreement. Further, 2.5% of the consideration

shares to be issued to the Existing Shareholders of Dataisgood Edutech Private Limited shall be reserved for the purpose of creation of an ESOP pool for the employees of the Company in accordance with a plan created by the Board of Directors.

In addition to this, as on the date of this Draft Red Herring Prospectus, 25% of the Consideration Shares has been issued to Mr. Ankit Maheshwari by issue of 3,37,260 equity shares.

The successful completion of the transaction depends on meeting specific milestones and fulfilling various conditions. If these milestones and conditions are not met, it could potentially hinder the transaction's finalization.

Further, the issue of shares shall be subject to the provisions of the SEBI Regulations, and stock exchange approval. In case of non-receipt of approval from the stock exchange, we may be exposed to significant risks to the company, including legal and financial consequences, damage to its reputation, and potential negative impacts on stakeholders' trust and confidence.

16. We are an online educational technology platform. We do not have any physical presence and maintain our business online on remote basis only.

Our company is a professional upskilling edtech platform which caters to senior & mid-career professionals and offers a comprehensive range of professional upskilling courses and training programs. We do not have any physical presence for providing our services, instead we are wholly online services aggregators. Due to which, customers may be skeptical of online businesses due to the prevalence of scams and fraud. Building trust and credibility is challenging in online businesses. There exist many people who may not trust online businesses due to concerns about privacy, security, or fraudulent activities. This lack of trust can deter them from engaging with online services.

In addition to this, not all potential customers have equal access to the internet or the necessary technology which can limit your market reach. In some areas, particularly in rural or remote regions, access to high-speed internet may be limited or unavailable. This geographic limitation means that people in these areas may have little or no access to online services, thus excluding a potentially significant customer base.

17. We use a Learning Management System (LMS) for providing our courses and programs to students. We rely on a third-party software for providing our services.

We use a third-party software for providing the courses and training programs. This software maintains the course content, test preparation materials, conducts tests and provide online classes to students. This is a kind of an online classroom. Building a strong online presence and actively managing your brand's image can also help you stand out in a crowded digital marketplace. However, relying on a third-party platforms or software providers, makes us vulnerable to their performance and any outages they experience. If these software suffer from performance, reliability, or security issues, it can negatively impact your business's reputation, especially if these issues affect your customers.

Any disruption, security breach or technology glitch in the operations of these third parties softwares could adversely affect our business and profitability. To mitigate the risks, it's essential to invest in robust cybersecurity measures, stay up to date with technology and software and have a contingency plan for technical disruptions.

- 18. We do not have any single software to check the cost and benefit of our human resources & to manage our day-to-day business activities such as accounting, procurement, project management, risk management and compliance, and supply chain operations. Failure to manage our resources could have an adverse effect on our sales, profitability, cash flow and liquidity.**

The results of the operations of our business are dependent on our ability to effectively manage our operations and clients. Each employee is dedicatedly providing services to our clients. Manually, it is not possible to allocate the cost, time and expense of each employee incurred on a particular client. Thus, this creates various challenges in invoicing charging the correct price of our services offered for our time allocation to that particular client. Having a single software which can have a check on cost incurred by us and benefits arose to the client can help us to effectively establish a cost and benefit system of our human resource, which will reduce duplication of work and over spending of our cost.

Due to lack of such a software any human error can cause a huge amount of data loss or financial loss or business loss or can even put our client's data at risk.

- 19. We have in past entered into related party transactions and we may continue to do so in the future.**

As of five months period ended August 31, 2023, we have entered into some related party transactions with our Promoters, forming a part of our promoter group relating to our operations. For further details, please refer to the chapter titled “Financial Information - Restated Financial Information – Annexure [●]-:Notes to the Related Financial Information” beginning on page [●]. While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationship with them in the future.

- 20. Our Company requires a significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.**

Our Business requires substantial requirement of working capital and financing to meet our working capital requirements. The details of our working capital for the period ended August 31, 2023, March 31, 2023 & 31st March 2022, 2021, are as under which is showing continuous increase:

Further, our company's focus is to create and build a strong course library, with a focus on creating a diverse range of content to meet the industry's demand. This strategy entails scaling up our course volume both with existing clients and new media ventures. Hence, increases the working capital requirement of the company. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance costs which will adversely impact our profitability. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and our results of operations.

21. *Our company has a policy for refund of fees, if the students are unwilling to continue the classes subject to certain terms and conditions.*

We have a policy for those students who are unwilling to continue the course, to refund the fees received. However, such refund shall be subject to certain prerequisite conditions. There is a clear deadline or timeline within which a student must request a refund. This timeline may vary based on the type of course or program. It ensures that students are treated fairly and equitably when they have valid reasons for discontinuing classes. This fairness can enhance the institution's reputation and foster goodwill among students.

However, such policy could create various financial and administrative risks. The refund of fees of unwilling students could have a direct impact on the revenue from operations of the company. Not only this, it would be an additional burden to manage the refund process including processing applications, verifying eligibility, and issuing refunds, can be administratively burdensome and costly. In order to avoid such situation, it is required to update ourselves with the current dynamic business environment by continuously monitoring student feedback and addressing concerns promptly to manage our reputation. At present, we have implemented student feedback during different stages of the course. In addition to this, the course anchor is also allotted a responsibility to maintain *Net Promoter Score* (NPS) up to an optimum level to ensure high standards and quality of services. If we will not be able to ensure such levels, we may not be able to attract more students for enrolment on our courses.

22. *We are dependent on our Individual Promoters and our management team and the loss of, or our inability to hire, retain, train, and motivate qualified personnel could adversely affect our business, results of operations and financial condition.*

Our ability to compete in this highly competitive industry depends upon our ability to attract, motivate, and retain qualified personnel. We are significantly dependent on the continued contributions and client relationships of our management and on our senior leadership led by our Promoters, management team and key managerial personnel. The loss of the services of our key personnel and any of our other executive officers, and our inability to find suitable replacements, could result in a decline in sales, delays in product development, and harm to our business and operations.

At times, we have experienced, and we may continue to experience, difficulty in hiring and retaining personnel with appropriate qualifications, and we may not be able to fill positions in a timely manner or at

all or may need to implement measures such as salary cuts due to external reasons. As of six months period ended August 31, 2023, we have 145 permanent employees. We cannot guarantee that we will be able to recruit and retain qualified and capable employees.

We may incur significant costs to attract and recruit skilled personnel, and we may lose new personnel to our competitors or other technology companies before we realise the benefit of our investment in recruiting and training them. If we fail to attract new personnel or fail to retain and motivate our current personnel who are capable of meeting our growing technical, operational, and managerial requirements on a timely basis or at all, our business may be harmed.

- 23. *Our Promoters and promoter group have significant controlling interest over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder. Further they have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.***

Upon completion of this Issue, our promoters along with the promoter group will collectively hold 67.27% of the post issue equity share capital of our Company and also continue to enjoy remuneration or benefits, reimbursements of expenses. As a result, our Promoter and promoter group will have the ability to exercise significant influence over all matters requiring shareholders' approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting.

There can be no assurance that our Promoters and Directors will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

- 24. *We operate in a significantly fragmented and competitive market and any failure on our part to effectively compete may adversely affect our profitability and market share.***

Competition in each of our business verticals, as well as in the education sector as a whole, is generally fragmented. In particular, we face significant competition from local or regional players in the business segments and geographical markets in which we operate, and our success depends to a significant extent on our ability to ensure the continued quality, relevance and innovation of our courses and services.

Our test prep and content development businesses also face significant competition from other online content provided through internet websites free and low cost. Free and low-cost content can create price sensitivity among our target audience. As a result, potential customers may be less willing to pay for our premium services or content, even if they offer higher quality or more comprehensive educational materials. Free content is not always of the same quality or reliability as paid offerings. However, it's crucial to ensure that our content is significantly superior in terms of accuracy, depth, and effectiveness, and communicate this to our audience.

25. *Significant security breaches in our software, data and network infrastructure and fraud could adversely impact our business.*

Our company maintains all the database online, thus we have to maintain a huge amount of private and personal data and network infrastructure. We collect and store student data, course data and other infrastructure to provide our services. We rely on third party tools for the security and authentication necessary to effect secure transmission of confidential customer information, such as customer names and passwords, and there can be no assurance that such security controls over customer data will be able to prevent, counter or respond to any security breach or the improper disclosure of confidential information in a timely manner, or at all. We have no control over the security measures put in place by such third-party channels to prevent such breaches and attacks or their actions in this respect.

In addition to this, the Digital Personal Data Protection Act 2023 provides certain rights to data principals, which include right to access information about personal data including a summary of personal data being processed, the underlying processing activities and any other information as prescribed, and identities of all data fiduciaries. We, as data fiduciaries have certain obligations towards data principal.

Breaches of cyber-security measures could result in misappropriation of information or data, deletion or modification of user information, or a denial-of-service or other interruption to our business operations. There could also be instances of misappropriation of user data by our employees or third-party service providers. We may be required to invest significant time and resources including financial resources to prevent such security breaches or to mitigate problems caused by such breaches. In addition to this, we may be exposed to penalties under DPDP Act 2023.

A breach of our security, compromise of data or resilience affecting its operations, or those of our customers, could lead to an extended interruption to its services as well as loss of subscriber information and other confidential data. The impact of such a failure could include immediate financial losses due to fraud and theft, termination of contracts, immediate loss of revenue and reputation.

26. *If we fail to maintain an effective system of internal controls, we may not be able to successfully manage or accurately report our financial risk.*

Effective internal controls are necessary for us to prepare reliable financial reports and effectively prevent and detect any frauds or misuse of funds. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may decline over time. There can be no assurance that additional deficiencies or lacks in our internal controls will not arise in the future, or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies or lacks in our internal controls. If internal control weaknesses are identified in a delayed manner, our actions may not be sufficient to correct such internal control weakness. Such instances may also adversely affect our reputation, thereby adversely impacting our business, results of operations and financial condition.

27. *Our Company may be subject to acquisition or actions relating to infringement or misappropriating intellectual property rights or confidential know-how of third parties.*

As on the date of this Draft Red Herring Prospectus, we own 1(one) intellectual property rights, the status of which is “objected”. The details of which are given on page no. [●] in the chapter “Our Business”. In addition to this, we have not applied for trademarks for some of our brands. Any claims by third parties that our Company is infringing or otherwise violating their proprietary technology or other intellectual property rights could harm our business. Also, anyone can use our brand names in their name, and we will not be

able to get any protection under Trademark and other IPR Acts. A considerable number of businesses in our industry have or have applied for a number of patents and have also taken measures protect their copyrights, trade secrets and other intellectual property rights, and there exists significant intellectual property development activity in our industry. We anticipate that online education companies will increasingly be subject to claims of infringement, misappropriation and other violations of intellectual property rights as the number of products grow and the functionality of products in different industry segments overlaps. As we face increasing competition, the possibility of receiving a larger number of intellectual properties claims against us grows.

Additionally, the intellectual property portfolios of our competitors are wider than ours, and this difference may increase the risk that our competitors may initiate action against us for intellectual property infringement and may limit our ability to counterclaim for such infringement. In such a situation, we may also have to additionally incur litigations expenses In addition, in the event we recruit personnel from our competitors; we may be subject to allegations that such personnel have divulged proprietary or other confidential information to us. Further, we may be unaware of the intellectual property rights of others that may cover some or all of our solutions or services and may be required to indemnify our client for liability arising from intellectual property infringement claims. These indemnification obligations could be significant and we may not have adequate insurance coverage to protect us against all claims.

Any sort of such action initiated against us, irrespective of such action having merit could require significant time and attention from our senior management or compel us to execute unfavourable royalty or license agreements which may not be on commercially reasonable terms, if at all or require us to indemnify our clients or third-party service providers. Any of the foregoing could adversely affect our business, financial condition and results of operations.

28. Our marketing and advertising activities may not be successful in increasing the popularity of our Company among domestic and international clients. If our marketing or advertising initiatives are not effective, this may affect the popularity of our Company.

Our company operates an online edtech platform. In order to increase our reach to maximum customers, our marketing and advertising strategies play a vital role. Marketing is a cornerstone for EdTech platforms to create awareness, attract and retain users, differentiate themselves in a competitive landscape, and ensure their offerings meet the ever-evolving needs of the education sector. Effective marketing not only leads to business growth but also contributes to the enhancement of educational experiences for students and educators.

In addition to this, we also intend to utilise our proceeds towards Marketing and Advertising activities as mentioned on page no [●] beginning on chapter “Objects of the Issue”.

Our Company undertakes certain marketing and advertising initiatives with the purpose of increasing the visibility of our Company and we also have an in-house marketing team. Further, our revenues are influenced by marketing and advertising of our services through various means. We rely to a large extent on our management’s experience in defining our marketing and advertising activities. If senior management leads us to adopt unsuccessful marketing and advertising activities or initiatives, we may fail to attract and engage new clients. If our marketing and advertising activities are unsuccessful, our results of operations could be materially adversely affected. We practice a number of marketing strategies as mentioned in the chapter “Our Business” beginning on page no. [●] of this Draft Red Herring Prospectus.

In addition, increased spending by our competitors on advertising and promotion could adversely affect our

results of operations and financial condition. Moreover, a material decrease in our funds earmarked for advertising or an ineffective advertising campaign relative to that of our competitors, could also adversely affect our business.

- 29. *Our funding requirements and proposed deployment of the Net Proceeds have not been appraised by a bank or a financial institution and if there are any delays or cost overruns, we may have to incur additional cost to fund the objects of the Issue because of which our business, financial condition and results of operations may be adversely affected.***

We intend to use the Net Proceeds for the purposes described in chapter titled “*Objects of the Issue*” on page [●]. The funding requirements mentioned as a part of the objects of the Issue have not been appraised by any bank or financial institution. While a monitoring agency will be appointed for monitoring utilisation of the Net Proceeds, the proposed utilisation of the Net Proceeds is based on current conditions and internal management estimates and are subject to changes in the external circumstances or costs, or in other financial condition, business or strategy as discussed further below.

Based on the competitive nature of our industry, we may have to revise our business plan and / or management estimate from time to time and consequently our funding requirements may also change. Our internal management estimates may exceed fair market value or the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our capital expenditure and may have an adverse impact on our business, financial condition, results of operations and cash flows. Further, pending utilisation of Net Proceeds towards the purposes described in the chapter titled “*Objects of the Issue*”, our Company will have the flexibility to deploy the Net Proceeds and to deposit the Net Proceeds temporarily in deposits with one or more scheduled commercial banks included in the Second Schedule of the Reserve Bank of India Act, 1939. Accordingly, prospective investors in the Issue will need to rely on our management’s judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilisation of the Net Proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the Net Proceeds and our business and financial results may suffer.

- 30. *Our Company may not have complied with certain statutory provisions of the Companies Act, 2013. Such non-compliances / lapses may attract penalties and prosecution against the Company and its directors which could impact on the financial position of the Company to that extent.***

We monitor compliances with applicable laws and regulations by implementing stringent internal checks and controls. Although we have generally been in compliance with applicable laws, there have been certain instances of discrepancies/ errors in statutory filings. Although no regulatory action has been taken against us with respect to the aforesaid non-compliances/errors, there can be no assurance that regulatory action shall not be taken by the relevant authorities against us in the future. In an event such an action is taken, we may be subject to penalties and other consequences that may adversely impact our business, reputation, and results of operation and there can be no assurance that we shall be able to successfully defend any action/allegation raised by such regulatory authorities. Our compliance team meticulously follows a detailed compliance calendar providing for compliances under various applicable laws, including but not limited to the Companies Act. As we continue to grow, there can be no assurance that deficiencies in our internal controls shall not arise, or that we shall be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all. There may be recurrences of similar discrepancies/errors in the future that could subject our Company to penal consequences under applicable laws. Any such action could adversely impact our business, reputation, and results of operation.

The details of non-compliances or delayed filings is given as follows:

| S.No. | Particulars | Due Date | Delayed days | Filing date |
|-------|--------------------|-------------------------|--------------|-------------|
| 1. | DPT-3 (FY 2022-23) | 31-07-2022* | 19 days | 19-08-2023 |
| 2. | ADT-1 (FY 2022-23) | 15 days from 19-09-2023 | - | - |
| 3. | AOC-4 (FY 2022-23) | 19-10-2023 | - | - |

**The last date of filing the form DPT-3 has been extended by the Ministry of corporate affairs from 30-06-2023 to 30-07-2023.*

The members of the company have approved the Audited Financials statement in its Annual General Meeting held on September 19, 2023. The last date of filing AOC-4 was October 19, 2023. The form has not yet been filled and is in the process of filing.

Furthermore, M/s K R A & Co., Chartered Accountants having FRN: 0020266N have been appointed in the Annual General Meeting and the from ADT-1 is in the process of filing.

31. *If we are not successful in executing our strategy to increase our sales to new customers and generate new engagements, our results of operations may suffer.*

An important part of our growth strategy is to increase sales of our services by acquiring new students. Our results of operations may fluctuate, in part, as a result of the nature of our sales efforts and the unpredictability of our sales. Our results of operations also significantly depend on sales to students. As part of our sales efforts, we invest considerable time and expenses in our Company's in-house sales team.

Our sales efforts typically require an extensive effort, a significant investment of human resources, expense and time, including by our senior management, and there can be no assurances that we will be successful in making a sale to a potential client. If our sales efforts to a potential client do not result in sufficient revenue to justify our investments, our business, financial condition, and results of operations could be adversely affected.

32. *Our profitability will suffer if we are not able to maintain our pricing, control costs or continue to expand our business through more students engagements.*

Our Company's profit margin and incidentally our profitability, is majorly dependent on our services and the rates we charge for providing the same. If we fail to maintain the pricing for our services without consistent cost reductions, our profitability and business will be affected. The pricing levels of provision of services that we are able to achieve are influenced by number of factors like the period of time to absorb and train new professionals on current and future courses offerings, our students feedback regarding our capability to add value through our courses, competition we face in the industry, the level of complexity of our students' requirements and needs and our ability to accurately forecast or estimate, avail and sustain revenue from students and general economic conditions prevailing at that time.

Our ability to manage our utilisation levels depends significantly on our ability to hire and retain professionals and to staff appropriately. If we are not able to maintain high resource utilisation levels without corresponding cost reductions or price increases, our profitability will be adversely affected. In the event of a slowdown due to any external factors, or if the number of our students reduces, we may be over-

staffed and required to carry excess employee-related expenses which could affect our financial condition. Employee shortages could prevent us from completing our commitments in a timely and effective manner, which could adversely affect our profit margin and profitability.

33. *Maintaining our Company image and reputation in the industry is critical to our success, and any failure to do so could damage our reputation and brand.*

We believe that our Company and brand name and reputation are important corporate assets that help distinguish our services from those of our competitors and also contribute to our efforts to recruit and retain talented professionals.

However, our corporate reputation is susceptible to damage by various factors such as actions or statements made by current or former employees or clients, competitors in legal proceedings, as well as members of the investment community and the media. There is a risk that negative information about our Company, even if based on false rumours or misunderstandings, could adversely affect our business. Any negative news relating to us might also affect our reputation, goodwill and brand value. In particular, damage to our reputation could be difficult and time-consuming to repair, especially due to the competitiveness in our industry, which could make potential or existing clients reluctant to select us for new engagements, resulting in a loss of business, and could adversely affect our employee recruitment and retention efforts. Damage to our reputation could also reduce the value and effectiveness of our brand name, could reduce investor confidence in us, affect the price of our Equity Shares and adversely affect our ability to grow our business and our results of operations and financial condition.

34. *Business operation and stability depends on many factors, we may not be able to effectively implement our business and growth strategy.*

The success of our business inter alia depends on our ability to effectively implement our business and growth strategy. In the past, we have generally been successful in the execution of our business plan but there can be no assurance that we will be able to execute our strategy effectively and within the estimated budget in the future.

Following are factors that can affect our ability to effectively implement our business strategy:

1. Intense competition from other edtech companies.
2. Changes in Industry demand.
3. Our ability to attract and retain qualified personnel.
4. Our ability to maintain quality of courses.
5. Our ability to maintain tie-ups and collaborations with national and international partners
6. Our ability to successfully implement Marketing strategies
7. Our ability to maintain brand image
8. Our ability to update and adapt new technology

If we are unable to address these factors, there could be a material adverse effect on our business and results of operations.

35. *The average cost of acquisition of Equity Shares by our Promoters is lower than the issue price.*

Our Promoter's average cost of acquisition of Equity Shares in our Company is lower than the Issue Price of the shares proposed to be offered through this Draft Red Herring Prospectus. For further details regarding the average cost of acquisition of Equity Shares by our Promoters in our Company, please refer to page no.

77 of this Draft Red Herring Prospectus.

36. *We are required to maintain certain approvals and licenses required in the ordinary course of business and the failure to obtain or renew them in a timely manner or at all may adversely affect our operations.*

Our Company's business is subject to government regulations, and we require certain approvals, licenses, registrations and permissions for operating our business, some of which might have expired and for which we may have either made or are in the process of making an application for obtaining the approval or its renewal. In addition, we may not be in compliance with certain conditions prescribed by such approvals or licences. Our failure to obtain such licences and approvals and comply with the applicable laws and regulations could lead to imposition of sanctions by the relevant authorities, including penalties. For further details, please refer to chapter titled "*Government and Other Approvals*" on page [●].

Further, renewal applications for approvals, licenses, registrations and permissions for operating our business need to be made within certain timeframes. While we have made fresh applications for few approvals and licenses, we cannot assure you that we will receive these approvals in a timely manner or at all. Further, in future we will be required to apply for the renewal of approvals and permits for our business operations to continue. If we are unable to make applications and renew or obtain necessary permits, licenses and approvals on acceptable terms, in a timely manner or at all, we may be required to face consequences due to which our business operations may be adversely affected.

37. *In addition to normal remuneration, other benefits and reimbursement of expenses some of our directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our directors or our Key Management Personnel would always exercise their rights as shareholders to the benefit and best interest of our Company, thereby adversely affecting our business and results of operations and prospects.

38. *Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders' approval.*

We propose to utilise the Net Proceeds towards the objects of the Company as mentioned in chapter titled "*Objects of the Issue*" beginning on page [●]. At this stage, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Sections 13(8) and 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations.

Further, our Promoters would be liable to provide an exit opportunity to shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement of our Promoters to provide an exit opportunity to such dissenting shareholders may deter the Promoters from agreeing to the variation of the

proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

39. *An inability to maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

We have obtained a number of insurance policies in connection with our operations, for further information, please refer to chapter titled “*Our Business – Insurance*” on page [●].

While we are of the opinion that the insurance coverage which our Company maintains would be reasonably adequate to cover the normal risks associated with the operations of our business, we cannot assure you that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. Our Company’s insurance policies may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance or exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial condition may be adversely affected.

40. *Our Company has issued Equity Shares during the last twelve months at a price which may be lower than the Offer Price.*

We have, in the 12 months preceding the filing of this Red Herring Prospectus, issued Equity Shares at prices that may be lower than the Offer Price to Promoters and other shareholders. For details of issues, please refer, page 67 of the chapter “Capital Structure”.

The details of the allotment made during the preceding 12 months are as follows:

| S.No. | Date of Allotment | Number of Equity Shares | Face value | Issue Price | Consideration | Type of Allotment |
|-------|-------------------|-------------------------|------------|-------------|-----------------|---------------------------|

| 2. | 07-10-2023 | 4,38,213 | 10 | 160 | Cash | Private Placement |

| 5. | 25-10-2023 | 3,37,260 | 10 | 126 | Cash | Acquisition of DataIsGood |

For details, please refer to the chapter titled “Capital Structure” on page ____ of this Draft Red Herring Prospectus.

- 41. *Significant differences exist between Ind AS and other accounting principles, such as Indian GAAP, IFRS and U.S. GAAP, which may be material to investors' assessments of our financial condition, result of operations and cash flows.***

Our restated summary statements of assets and liabilities, restated summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the six months period ended August 31, 2023, and Fiscals 2023, 2022 and 2021 have been prepared in accordance with the [●].

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Draft Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited.

- 42. *Certain Agreements, deeds or licenses may be in the previous name of the company.***

Our certain agreements, deeds or licenses may be in the name of the erstwhile name of the company Addictive Learning Technology Private Limited. In case we fail to change the name in the agreements, deeds or licenses it may cause adverse effect on Our Company's business & operations.

- 43. *We have not made any alternate arrangements in order to meet our capital requirements for the Objects of the Issue. Additionally, we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, our Company has not made any alternate arrangements for meeting the capital requirements for the Objects of the Issue. We are a debt free company and we meet our capital requirements through our internal accruals. Any shortfall in the same and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled "Objects of the Issue" on page [●] of this Draft Red Herring Prospectus.

- 44. *Our Company is subject to foreign exchange control regulations which can pose a risk of currency fluctuations.***

Our Company is involved in business transactions with international clients located globally and has to conduct the transactions in accordance with the rules and regulations prescribed under FEMA. Our international operations make us susceptible to the risk of currency fluctuations, which may directly affect our operating results. In case we are unable to adhere to the timelines prescribed under the applicable laws or are unable to mitigate the risk of currency fluctuation, it may adversely affect our business, results of operations, financial conditions and cash flows.

45. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital intensive and declaration of dividend will depend upon financial performance of our Company at the time of declaration. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements (if any) in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past and there can be no assurance that our Company will declare dividends in the future. For further details, please refer to the chapter titled “Dividend Policy” on pages [●] of this Draft Red Herring Prospectus.

46. *Industry information included in this Draft Red Herring Prospectus has been derived from an industry report from various websites. The reliability on the forecasts of the reports could be incorrect and would significantly impact our operations.*

We have relied on the reports of certain independent third parties for purposes of inclusion of such information in this Draft red Herring Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus.

47. *Our Company’s future funding requirements, in the form of further issue of capital or other securities and/or loans that might be availed by us, may turn out to be prejudicial to the interest of the shareholders depending upon the terms and conditions on which they are raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

This space has been left blank intentionally.

External Risk Factors

48. *The Terrorist attacks, communal disturbances and regional conflicts in South Asia may have a material adverse effect on our business and on the market for securities in India.*

Terrorist attacks, whether in India or another country may adversely affect Indian and worldwide financial markets. These acts may also result in a loss of business confidence and have other consequences that could adversely affect our business, results of operations and financial condition. Some parts of India have experienced communal disturbances and riots during recent years. If such events recur, our business and financial condition may be adversely affected.

South Asia has, from time to time, experienced instances of civil unrest. Military activity or terrorist attacks in the future could adversely affect the Indian economy, and the financial condition and results of operations of Indian companies, including us, which would have an adverse effect on the trading price of our Equity Shares.

49. *The outbreak and after-effects of COVID-19, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition, cash flows and results of operations.*

The outbreak, of any severe communicable disease, as seen in the recent outbreak and aftermath of COVID-19, could materially and adversely affect business sentiment and environment across industries. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and lockdowns. These measures have impacted and may further impact our workforce and operations and also the operations of our clients. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe.

During the lockdown period in response to the COVID-19 pandemic, our Company had certain interim measures in place to ensure business and operational continuity. Our employees worked remotely. However, certain of our operations are dependent on various information technology systems and applications which may not be adequately supported by a robust business continuity plan, which could impact our business in the event of a disaster of any nature. Although we continue to devote resources and management focus, there can be no assurance that these programs will operate effectively.

50. *Natural disasters, epidemics, pandemics, acts of war, terrorist attacks and other events could materially and adversely affect our business and profitability.*

Natural disasters (such as earthquakes, fire, typhoons, cyclones, hurricanes and floods), pandemics, epidemics, strikes, civil unrest, terrorist attacks and other events, which are beyond our control, may lead to global or regional economic instability, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations. Any of these occurrences could cause severe disruptions to our daily operations and may warrant a temporary closure of our facilities. Such closures may disrupt our business operations and adversely affect our results of operations. Our operation could also be disrupted if our clients are affected by such natural disasters or epidemics. An outbreak or epidemic, such as SARS, the H1N1 and H5N1 viruses or COVID-19 could cause general consumption or the demand

for various products to decline, which could result in reduced demand for our services. Such an outbreak or epidemic may significantly interrupt our business operations as health or governmental authorities may impose quarantine and inspection measures on us or our clients.

Moreover, certain regions in India have witnessed terrorist attacks and civil disturbances and it is possible that future terrorist attacks or civil unrest, as well as other adverse social, economic and political events in India could have a negative effect on us. Transportation facilities, including vehicles, can be targets of terrorist attacks, which could lead to, among other things, increased insurance and security costs. Regional and global political or military tensions or conflicts, strained or altered foreign relations, protectionism and acts of war or the potential for war could also cause damage and disruption to our business, which could materially and adversely affect our business, financial condition, cash flows and results of operations. Such incidents could create the perception that investments in Indian companies involve a higher degree of risk and such perception could adversely affect our business and the price of the Equity Shares.

51. Financial instability in other countries may cause increased volatility in Indian and other financial markets.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

52. Changing laws, rules and regulations and legal uncertainties in India and other countries may adversely affect our business and financial performance.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments

into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. The Government has enacted the GAAR which have come into effect from April 1, 2017.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

53. *Under Indian legal regime, foreign investors are subject to investment restrictions that limit our Company's ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares. Accordingly, our ability to raise foreign capital may be constrained.*

As a company incorporated in India, we are subject to exchange controls that govern the borrowings in foreign currencies. Further, under applicable foreign exchange regulations in India, transfer of shares between non-residents and residents are freely permitted (subject to compliance with sectoral norms and certain other restrictions), if they comply with the pricing guidelines and reporting requirements specified under applicable laws. If share transfer is not in compliance with such requirements and does not fall under any of the permissible exceptions, then prior approval of the relevant regulatory authority is required. Such regulatory restrictions limit our financing sources and could constrain our ability to obtain financings on competitive terms and refinance existing indebtedness.

54. *Investors outside India subscribing to this Issue may not be able to enforce any judgment of a foreign court against us, except by way of a suit in India.*

Our Company is a limited liability company incorporated under the laws of India. Our Company's assets are located in India. As a result, it may be difficult for investors to effect service of process upon us or such persons in India or to enforce judgments obtained against our Company or such parties outside India. India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. India has reciprocal recognition and enforcement of judgments in civil and commercial matters with a limited number of jurisdictions, including the United Kingdom, Singapore, UAE, and Hong Kong. A judgment from certain specified courts located in a jurisdiction with reciprocity must meet certain requirements of the Code of Civil Procedure, 1908, as amended ("Civil Procedure Code"). The United States has not been notified as a reciprocating territory.

In addition, any person seeking to enforce a foreign judgment in India is required to obtain the prior approval of the RBI to repatriate any amount recovered, and we cannot assure that such approval will be forthcoming within a reasonable period of time, or at all, or that conditions of such approvals would be acceptable. Such amount may also be subject to income tax in accordance with applicable law. Consequently, it may not be possible to enforce in an Indian court any judgment obtained in a foreign court, or effect service of process outside of India, against Indian companies, entities, their directors and executive officers and any other parties resident in India. Additionally, there is no assurance that a suit brought in an Indian court in relation to a foreign judgment will be disposed of in a timely manner.

55. Any adverse change or downgrading in ratings of India may adversely affect our business, results of operations and cash flows.

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

56. Regulatory, economic, political scenarios or other factors that are beyond our control may have an adverse effect on our business and financial performance.

Our economy and its securities markets are influenced by economic developments, any adverse economic developments or rising of fiscal or trade deficit may also affect investor confidence and cause increased volatility in securities markets and indirectly affect our economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition, and results of operations. Further financial disruption could also have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares

Also, a change in the government or change in deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business and high rates of inflation could increase our costs without proportionately increasing our revenues

57. The requirements of being a listed company may strain our resources.

We are not a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated by the virtue of being a listed company. As a listed company, we will incur considerable legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing compliances and reporting requirements to the Stock Exchanges on which equity shares of our Company will be listed, which require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

Risks related to the Issue.

- 58. *There are certain restrictions on daily movements in the price of Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Following the Issue, we will be subject to a daily circuit breaker imposed by NSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance can be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

- 59. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.***

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

1. Volatility in the Indian and global capital market;
2. Company's results of operations and financial performance;
3. Performance of Company's competitors,
4. Adverse media reports on Company or pertaining to our Industry;
5. Changes in our estimates of performance or recommendations by financial analysts; and
6. Significant developments in India's economic and fiscal policies;

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

- 60. *Equity Shares of our Company have never been publicly traded, and after the Issue, the Equity Shares may be subject to price and volume fluctuations, and an active trading market for the Equity Shares may or may not develop. Further, the Issue Price may not be indicative of the market price of the Equity Shares after the Issue.***

Prior to this Issue of our Company, no public market existed for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation of Equity Shares does not guarantee that a market for the same will develop, or if developed, the liquidity of such market for the Equity Shares cannot be guaranteed. The Issue Price of the Equity Shares is proposed to be determined through a book building process in compliance with Schedule XIII of the SEBI ICDR and the same may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The Issue Price will be based on numerous factors, as described in the section "*Basis for Issue Price*" beginning on page [●]. This price may not necessarily be indicative of the market price of our Equity Shares after the Issue is completed. The market price of the

Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the industry we operate in.

Our Equity Shares are expected to trade on NSE and BSE after the Issue, but there can be no assurance that active trading in our Equity Shares will develop after the Issue, or if such trading develops, that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

61. *You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.*

Capital gains arising from the sale of equity shares within 12 months in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gain being long term capital gain amounting to upto one lakhs rupees provided Securities Transaction Tax (“STT”) is paid on the transaction. STT is levied on and collected by a domestic stock exchange on which equity shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, is subject to long term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of equity shares is exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident.

Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

62. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after the submission of their Bid, and Retail Individual Investors are not permitted to withdraw their Bids after closure of the Bid/ Issue Closing Date.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Issue Period and withdraw their Bids until the Bid/ Issue Closing Date. While we are required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed, including Allotment, within six Working Days from the Bid/ Issue Closing Date or such other period as may be prescribed by the SEBI, events affecting the investors’ decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or financial condition may arise between the date of submission of the Bid and Allotment. We may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Investors’ ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

63. *Sale of Equity Shares by our Promoters or other significant shareholder(s) or any future issue of Equity Shares may dilute your shareholding and adversely affect the trading price of the Equity Shares.*

Any future equity issues by us, including in a primary offering, or any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of

our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

64. *Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.*

The Equity Shares will be listed on the Stock Exchanges. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited within one working day of the date on which the Basis of Allotment is approved by the Stock Exchanges. The Allotment of Equity Shares in the Issue and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately five Working Days from the Bid/ Issue Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges is expected to commence within six Working Days of the Bid/ Issue Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

65. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position*

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution. However, if the laws of the jurisdiction the investors are located in does not permit them to exercise their pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value the custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emption rights granted in respect of the Equity Shares held by them, their proportional interest in us would be reduced.

66. *A third-party could be prevented from acquiring control of us post this Issue, because of anti-takeover provisions under Indian law.*

As a listed Indian company, there are provisions in Indian legal regime that may delay, deter or prevent a future takeover or change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Issue. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of Takeover Regulations.

Justification:

Current Assets

Trade Receivables:

The dataset provided in the preceding information consistently reveals discernible patterns and valuable insights related to the company's Trade Receivables. This information is vital for assessing the company's financial performance, as it underscores the mechanisms by which revenue is acquired and the timing associated with these acquisitions. Understanding these patterns enables the company to effectively manage its cash flow and make informed financial decisions.

| Particulars | UOM | March 31, 2021 (A) | March 31, 2022 (A) | March 31, 2023 (A) | Stub Aug 31, 2023 (A) | March 31, 2024 (E) | March 31, 2025 (P) |
|-------------------------|------------------|--------------------|--------------------|--------------------|-----------------------|--------------------|--------------------|
| Trade Receivable | Rs. Lakhs | 0.86 | 0.01 | 2.41 | 11.80 | 110.75 | 193.82 |
| Change in Amount | Rs. Lakhs | - | (0.85) | +2.40 | +9.39 | +98.95 | +83.07 |
| Trade Receivable | Days | 0 | 0 | 0 | 1 | 5 | 5 |
| Change in Days | Days | - | - | - | +1 | +4 | - |

From fiscal year 2020-21, 2021-22 & 2022-23, company's Trade Receivables were Rs. 0.86 Lakhs, Rs. 0.01 Lakhs & Rs. 2.41 Lakhs respectively. For stub period 31st August 2023, the amount was Rs. 11.80 Lakhs which stood at 1 day of revenue. This suggests that the company was effectively managing its receivables during this period with settlement from payment processors also on time, possibly due to its advance payment model in the B2C segment.

It's important to emphasize that the company obtains funds from the sale of its courses primarily through two distinct methods:

a. Payment Processors: These are entities that handle electronic transactions, like credit card payments. When customers purchase courses, the payment processors facilitate the transfer of funds to the company.

b. Loan Partners: These are organizations that may provide loans to customers to finance their course purchases. The company receives the course fees from these loan partners.

Typically, the company receives these funds within a time frame that spans from 3 to 10 days after the initial transaction or approval of loan applications. In this context, the responsibility for timely payment largely lies with the payment partners, whether they are payment processors or loan partners. The company, in turn, receives these payments by generating and sending invoices to these entities.

Projected Period:

The data projects an increase in Trade Receivables i.e. Rs. 110.75 lakhs in March 31, 2024, and a projection of Rs. 193.82 lakhs by March 31, 2025. This projection is based on an assumption of 5 days of outstanding debt for both the estimated and projected years. This assumption aligns with the company's sales revenue collection pattern, where payments are received from payment processors and loan partners through invoicing and subsequent payment.

Despite this increase, the company's efficient collection process has kept the number of days it takes to collect payments relatively stable, which is indicative of sound financial management practices.

Other Current Assets

Other Current Assets include Advance payment of taxes & Other Current Assets

| Particulars | UOM | March 31, 2021 (A) | March 31, 2022 (A) | March 31, 2023 (A) | Stub Aug 31, 2023 (A) | March 31, 2024 (E) | March 31, 2025 (P) |

| Other Current Assets | Days | 1 | 11 | 78 | 51 | 78 | 81 |
| Change in Days | Days | | +10 | +68 | -27 | +27 | +3 |

The Other Current Assets includes:

- Deferred Revenue Expenditure – *Company spends a lot of content creation, modification & regular updating as per market scenario the revenue of which is to be booked in future period.*
- Prepaid Expenses (includes Advances to Suppliers, Advances to Employees etc.) – *A lot of content creators, market researchers, technology freelancers etc which are paid in advance at times to engage them thoroughly or get better rates on advance payments.*
- Other Current Assets i.e. “OCA” (Includes Advance Taxes Paid, Input Credit Available, TDS Receivable, Security Deposit etc.)

In the fiscal year 2020-21, the company reported OCA amounting to Rs. 1.71 lakhs. This figure increased to Rs. 55.81 lakhs in the fiscal year 2021-22 and further to Rs. 717.45 lakhs in the fiscal year 2022-23. Additionally, in the stub period ending on August 31, 2023, it grew to Rs. 819.46 lakhs.

Bifurcation of OCA for audited financial is as follows:

| Particulars (Rs. Lakhs) | March 31, 2021 (A) | March 31, 2022 (A) | March 31, 2023 (A) | Stub Aug 31, 2023 (A) |
|------------------------------|--------------------|--------------------|--------------------|-----------------------|
| Deferred Revenue Expenditure | - | - | 447.96 | 605.95 |
| Prepaid Expenses | - | - | 228.83 | 173.19 |
| Other Current Assets | 1.71 | 55.81 | 40.67 | 40.32 |
| TOTAL | 1.71 | 55.81 | 717.45 | 819.46 |

It's worth noting that as revenue increased, the amounts related to Deferred Revenue Expenditure and Prepaid Expenses also grew significantly. This is attributed to the company's plans to introduce new courses, create fresh content, and undertake marketing activities for these courses.

Looking ahead, the company is preparing for substantial growth through an Initial Public Offering (IPO) to raise capital. This IPO is expected to lead to a significant surge in revenue and a corresponding increase in profits. As part of this expansion strategy, the company anticipates that its Other Current Assets will also expand.

The projected revenue and profit growth will require the company to account for deferred revenue and advance payments to suppliers more extensively. These actions are intended to secure favorable pricing, ensure the availability of content for widespread distribution, and recruit high-quality faculty. Consequently, it is expected

that the balances in Other Current Assets will reach Rs. 1,727.57 lakhs and Rs. 3,023.57 lakhs in the fiscal years 2023-24 and 2024-25, respectively. This strategic approach reflects the company's proactive management of financial resources to effectively support its growth plans.

Company's trade payables majorly include suppliers of suppliers and printer of hard copies of books, notes or worksheets provided as complimentary with courses. The trade payables for the period fiscal year 2020-21, 2021-22, 2022-23 & stub period 31st August 2023 were Rs. 1.53 Lakhs, Rs. 95.73 Lakhs, Rs. 35.22 Lakhs & Rs. 133.20 Lakhs respectively. These formed payable days of 1 day, 20 days, 5 days & 10 days respectively.

Projected Period:

It is anticipated that the company's creditor days, which represent the average time it takes to pay its suppliers, will be 15 days for both of the projected years. This projection is based on the assumption that the company intends to maintain a minimum inventory of course materials for at least 15 days, to ensure it can fulfill its course offerings without delays. This projection suggests that the company aims to strike a balance between managing its payables and maintaining sufficient inventory to meet its course demand.

In summary, the company's trade payables have fluctuated over the years, and the projected creditor days for the upcoming years take into account the need for a 15-day inventory buffer to support its courses. This projection helps the company plan its financial commitments and maintain a favorable supplier relationship by ensuring timely payments while meeting customer demand for course materials.

It's essential that we strike a balance between ensuring we have the resources we need to operate effectively and efficiently, while also maintaining a healthy financial position by managing our trade payables effectively. Our ability to do so will directly impact our financial stability and profitability in the long run.

Firstly, it should be noted that Other current liability includes Advances from Customers & Other Current Liabilities. The financial data provided shows the evolution of a company's Other Current Liabilities and Short-Term Provisions over several years, including actual, estimated, and projected figures. Here is a summarized analysis with reasons:

Other Current Liabilities:

The Other Current Liabilities (OCL) have exhibited substantial fluctuations in recent years. It declined from Rs. 64.53 lakhs in 2021 to Rs. 48.20 lakhs in 2022, but then showed a significant increase to Rs. 596.01 lakhs in 2023. Furthermore, this amount increased to Rs. 777.49 lakhs in 2024 and reached Rs. 1,308.27 lakhs in 2025. This notable increase is primarily due to the growth in advances from customers.

The company's business model involves receiving advances for educational courses they offer, which are typically delivered over a specific time frame. As a result, when they sell a course, the payments received for services that are yet to be provided are recorded as advances from customers. This accounting practice explains the substantial rise in Other Current Liabilities as these advances accumulate over time.

Short Term Provisions

As the company's turnover and profits have grown, the amount of income tax owed has increased over time. Company had losses in fiscal year 2020-21 & 2021-22, thus provisions were miniscule or nil. In fiscal year 2022-23, provisions was set at Rs. 83.11 Lakhs and which increased to Rs. 211.28 Lakhs by the end of the stub period on August 31, 2023. For the projected period, it is expected to reach Rs. 259.16 Lakhs in 2024 and soared to Rs. 436.09 Lakhs in 2025.

Conclusion

Summarizing the entire dataset on working capital requirements, despite the company's current ability to receive most payments in advance, it is planning to expand its operations by introducing new courses, faculties, content, and payment models with a deferred payment cycle. Simultaneously, the company will be more stringent in making payments to its creditors. As a result, the increased working capital needs will be addressed through funds generated from the IPO. Specifically, Rs. 100 Lakhs will be allocated in 2024, and Rs. 700 Lakhs in 2025.

GLOBAL OUTLOOK

Global Growth:

The global economy remains in a precarious state amid the protracted effects of the overlapping negative shocks of the pandemic, the Russian Federation's invasion of Ukraine, and the sharp tightening of monetary policy to contain high inflation. Global growth is projected to slow significantly in the second half of this year, with weakness continuing in 2024. Inflation pressures persist, and tight monetary policy is expected to weigh substantially on activity. Recent banking sector stress in advanced economies will also likely dampen activity through more restrictive credit conditions. The possibility of more widespread bank turmoil and tighter monetary policy could result in even weaker global growth.

Rising borrowing costs in advanced economies could lead to financial dislocations in the more vulnerable emerging market and developing economies (EMDEs). The rise in central bank policy rates to fight inflation continues to weigh on economic activity. Global headline inflation is expected to fall from 8.7 percent in 2022 to 6.8 percent in 2023 and 5.2 percent in 2024. Underlying (core) inflation is projected to decline more gradually, and forecasts for inflation in 2024 have been revised upward.

Despite these headwinds, global economic activity was resilient in the first quarter of 2023, with that resilience driven mainly by the services sector. The post-pandemic rotation of consumption back toward services is approaching completion in advanced economies (including in tourism-dependent economies of southern Europe), and it accelerated in a number of emerging market and developing economies in the first quarter. However, as mobility returns to pre-pandemic levels, the scope for further acceleration appears more limited. At the same time, nonservices sectors, including manufacturing, have shown weakness, and high-frequency indicators for the second quarter point to a broader slowdown in activity. Amid softening consumption of goods, heightened uncertainties regarding the future geoeconomic landscape, weak productivity growth, and a more challenging financial environment, firms have scaled back investment in productive capacity. Gross fixed capital formation and industrial production have slowed sharply or contracted in major advanced economies, dragging international trade and manufacturing in emerging markets with them. International trade and indicators of demand and production in manufacturing all point to further weakness. Excess savings built up during the pandemic are declining in advanced economies, especially in the United States, implying a slimmer buffer to protect against shocks, including those to the cost of living and those from more restricted credit availability.

Acute stress in the banking sector has receded, but credit availability is tight. Thanks to the authorities' swift reaction, the March 2023 banking scare remained contained and limited to problematic regional banks in the United States and Credit Suisse in Switzerland. Accordingly, since the April 2023 WEO, global financial conditions have eased, a sign that financial markets may have become less concerned about risks to financial stability coming from the banking sector. But tight monetary policy continues to put some banks under pressure, both directly (through higher costs of funding) and indirectly (by increasing credit risk).

Growth Slowing, with Shifting Composition

Global growth is projected to fall from 3.5 percent in 2022 to 3.0 percent in both 2023 and 2024 on an annual average basis. Compared with projections in the April 2023 WEO, growth has been upgraded by 0.2 percentage point for 2023, with no change for 2024. The forecast for 2023–24 remains well below the historical (2000–19) annual average of 3.8 percent. It is also below the historical average across broad income groups, in overall GDP as well as per capita GDP terms. Advanced economies continue to drive the decline in growth from 2022 to 2023, with weaker manufacturing, as well as idiosyncratic factors, offsetting stronger services activity. In emerging markets and developing economies, the growth outlook is broadly stable for 2023 and 2024, although with notable shifts across regions. On a year-over-year basis, global growth bottomed out in the fourth quarter of 2022. However, in some major economies, it is not expected to bottom out before the second half of 2023.

World trade growth is expected to decline from 5.2 percent in 2022 to 2.0 percent in 2023, before rising to 3.7 percent in 2024, well below the 2000–19 average of 4.9 percent. The decline in 2023 reflects not only the path of global demand, but also shifts in its composition toward domestic services, lagged effects

of US dollar appreciation—which slows trade owing to the widespread invoicing of products in US dollars—and rising trade barriers.

INDIAN ECONOMY OVERVIEW

Stronger-than-expected growth in the fourth quarter of FY23, driven by robust domestic investment, drove the International Monetary Fund (IMF) to revise India's real GDP growth forecast for FY24 upward by 20 basis points in its July 2023 World Economic Outlook (WEO). The robustness of domestic investment is the result of the government's continued emphasis on capital expenditure, which is expected to drive growth in the coming years. The Union Government in FY24 Budget increased the capital outlay by 33.3 per cent, raising the share of capital expenditure in total expenditure from 12.3 per cent in FY18 to 22.4 per cent in FY24. Measures implemented by the Union Government have also incentivized States to increase their capex spending. States capital expenditure increased by 74.3 per cent YoY in Q1 of FY24 to complement the Centre's Capex increase of 59.1 % in the same quarter.

The early release of funds by the Centre to State governments under 'The Scheme for Special Assistance to States for Capital Investment' ensures that investments by States are spread evenly throughout the year, contributing to a substantial growth multiplier. Sustaining capital expenditure growth by the States in the coming months, along with rationalization of revenue expenditure, will help them in achieving the overall fiscal deficit target of 3.5 per cent of GDP for FY24. The focus of the central government on capex also pushed its departmental arms and Central Public Sector Enterprises (CPSEs) to accelerate their capital expenditure.

The data released by the Controller and Auditor General (CAG) for 23 States (which roughly account for 92 per cent of the Union Budget size of all the States) reflects that their capital expenditure has jumped by 74.3 per cent in Q1 of FY24, compared to the corresponding period of the previous year. Out of ₹1.3 lakh crore interest-free loans for States for FY24, a sum of ₹600 billion has been sanctioned so far. Of this, ₹300 billion has been disbursed. Further, 54 large CPSEs and five departmental arms have collectively met around 35 per cent of their annual capex target of ₹7.3 lakh crore in Apr-Jul 2023.

Private Investment

Realizing the importance of private investment in accelerating economic growth, the Government has been making various attempts to raise investment by the private sector. The Production-Linked Incentive (PLI)

scheme provides capital expenditure-linked incentives to 14 key sectors. The PM Gatishakti scheme, coupled with the National Infrastructure Pipeline (NIP), is expected to encourage private-sector participation in creating new infrastructure and help in onboarding major private-sector infrastructure players. Research by CRISIL highlights that the industrial investment by the private sector between FY18 and FY22 registered a CAGR of 7 per cent. This augurs well for still higher growth in the upcoming years.

As per RBI's Order Books, Inventories and Capacity Utilisation Survey, capacity utilisation (CU) in the manufacturing sector increased for the third successive quarter to 76.3 per cent in Q4 of FY23 from 74.3 per cent recorded in the previous quarter. Bank credit to the infrastructure sector was 1.7 per cent higher in Q1 of FY24, compared to the corresponding period of the previous year, with the most remarkable increase in credit availability to cargo ports and airports. Higher capacity utilisation along with double-digit growth in non-food bank credit signals positive intent of the private sector to undertake fresh investment going forward.

Enhanced provision for capital expenditure by the government is now leading to crowding in of private investment, as evident in the performance of various high-frequency indicators and industry reports which highlight the emergence of the green shoots of a private capex upcycle. The recent increase in capital expenditure of the Government is reflected in an increase in Gross Fixed Capital Formation (GFCF). GFCF as per cent of GDP (at Constant Prices) stood at 34 per cent in FY23, the highest since FY14. The increase in GFCF supported India's GDP growth even during the uncertain global economic scenario. A study by

CRISIL showcases that supported by an increase in Government spending; infrastructure capex is expected to register a compound annual growth rate (CAGR) of 11 per cent between FY23 and FY27, 67 per cent higher compared to CAGR between FY18 and FY22.

As per the data released in National Accounts Statistics 2021-22, GFCF by the Private sector rose from ₹17.4 lakh crore in FY18 to ₹23.7 lakh crore in FY22. Multiple high-frequency indicators and industry reports point towards the emergence of the green shoots of a private capex upcycle. The IIP data shows that the capital goods index and infrastructure/construction goods index saw robust growth of 12.9 per cent and 8.4 per cent, respectively, in FY23. The indices have carried forward their momentum thus far into FY24 and have grown by 6.5 per cent and 14.5 per cent, respectively, on a cumulative basis till May 2023. Robust investment activity is also evident in the increasing imports of capital goods, which grew by 20.3 per cent in FY23 and are up by 4.2 per cent on a YoY basis in Q1 of FY24.

Human Development

The robustness of India's economic fundamentals is accompanied by strides made in human development. The recently released National Multidimensional Poverty Index Report by Niti Aayog demonstrates a remarkable decline in the prevalence of multidimensional poverty in India, attributable to the government's strategic focus on achieving universal access to basic amenities. With the national MPI nearly halving between 2015-16 and 2019-21, India is likely to achieve the SDG Target on multidimensional poverty much ahead of the stipulated timeline of 2030. The results are reinforced by India-related findings in the Global MPI report by UNDP and OPHI. From an economic growth perspective, the 13.5 crore Indians escaping poverty between 2015-16 and 2019-21 and graduating to the middle class will boost the engine of self-sustained growth through consumption, savings, and human capital accumulation.

Foreign Investment

As a result of robust foreign inflows and a decline in imports, India's foreign exchange reserves have strengthened over the past months and stood at USD 603.9 billion at the end of July 2023, sufficient to provide an import cover of more than 10 months.

Persistent geopolitical concerns continue to shadow the world trade growth which is expected to decline to 2 per cent in 2023 from 5.2 per cent in 2022. Yet, India's external sector has displayed resilience with strong services export growth and robust investment inflows highlighting investors' confidence in India's growth story.

Despite the weak global growth forecast, new avenues for India to expand exports can open up

The WEO (July 2023) expressed optimism about inflation coming down faster than expected, allowing for more liquidity through accommodative monetary policy, thereby spurring world demand and, thus, trade. Continued recovery in supply chains can complement this trend. For India, on the supply side, the RBI's survey of the industrial outlook of the manufacturing sector suggests that it is expected that production, as well as exports, are likely to increase in Q2 of FY24. However, on the demand side, a review of the region-wise global growth forecasts for the year 2023 by the WEO, in light of India's destination-wise export shares in FY23, suggests that demand for India's exports is likely to be weaker during 2023 in line with the general forecast of a decline in global growth. However, the decoupling of trade between China and the United States can open up avenues for India to expand exports. (UNCTAD, Global Trade Update, June 2023).

ROAD AHEAD

Going forward, while domestic consumption and investment demand are expected to continue driving growth, global and regional uncertainties and domestic disruptions may keep inflationary pressures elevated for the coming months, warranting greater vigilance by Government and the RBI. Monsoon rains in August have been deficient at the time of writing. The government has already taken pre-emptive measures to restrain food inflation which, along with the arrival of fresh stock, is likely to subside price pressure in the market soon.

The external sector requires monitoring for further strengthening the prospects in the face of active pursuit of industrial policies globally. Services exports continue to do well and are likely to continue doing so as the preference for remote working remains unabated, typically manifested in the proliferation of Global Capability Centers. At the same time, from a medium-term perspective, it is important to monitor the impact of new technologies, such as Artificial Intelligence, on the external demand for Indian services exports and the consequent impact on employment.

GLOBAL OVERVIEW OF EDTECH INDUSTRY

INTRODUCTION

EdTech has been around for longer than most people realize. Computer-aided education is simply a natural result of improved technology. Schools and training centers used existing technology in the mid-twentieth Century, including copy machines and media learning via training films. In the 1960s, schools began experimenting with computers for teaching spelling and math. Soon after internet connectivity was available, online courses were created. It is estimated that six million students enrolled in U.S.-based courses by 2010. Open University in the United Kingdom and the University of British Columbia in Canada pioneered online education. They allowed students to communicate with each other and teachers directly. EdTech has become more accessible and more efficient thanks to the development of better video conferencing programs and multimedia sources. EdTech now includes innovations such as EdTech "robots" for students to take notes, blockchain tools for educators to grade student work and tools for educators to grade.

Education technology has several benefits. According to educators, students learn at different speeds and in different ways. Some students learn best by reading information, but others find audio-visual information more helpful. EdTech allows students to learn from the most valuable and effective sources. Online learning students enjoy the advantage of accessing training and teaching at their own pace. Online learning allows students to study at their own pace and in a way that suits them best. This makes obtaining education and professional training for all kinds of people easier. This is especially helpful for people who have a full-time job and would find it difficult to take regular university courses. The enormous potential savings in education is an obvious and significant benefit of EdTech. Online e-learning is available at a fraction of the cost of attending a large university or small community college. Online learning is more affordable than traditional education, making obtaining a degree or professional certification easier.

KEY MARKET INSIGHTS

The global edtech and smart classroom market size was valued at USD 115.80 billion in 2022 and is projected to grow from USD 133.55 billion in 2023 to USD 433.17 billion by 2030, exhibiting a CAGR of 18.3% during the forecast period.

The education sector has immense opportunities for growth today. It is a fast-evolving industry as institutes and learners have realized the value of a holistic learning environment and are continuously investing in it. According to the education intelligence provider HolonIQ, around 3% of global education expenditure is allocated to digital infrastructure. It also states that digital transformation's significant potential is expected to reach USD 10 trillion by 2030, up from USD 6 trillion in 2018. This is likely to support the adoption of edtech and smart classroom solutions in the coming years.

COVID-19 IMPACT

Mobile Learning Gained Traction amid COVID-19

Innovators and governments invested billions of dollars in the education sector, enabling the edtech and smart classroom industry to gain pace during the pandemic. Online learning applications are becoming increasingly popular, with millions of users worldwide. Other types of educational technology, such as e-textbooks, curriculum management software, administration, and communication platforms, have improved

their effectiveness. In addition, the price of edtech gadgets and the internet data required to use them has been reduced.

Social Distancing Prompts Stakeholders to Focus on Distance Learning Programs

Distance learning became one of the most significant developments in the e-classroom industries due to the closure of educational institutes during the COVID-19 crisis. The pandemic has significantly changed the way information is taught and learned. Learners are transitioning to digital learning concepts via digital platforms as a result of social distancing norms. Despite the reopening of several educational institutions, the trend of distance learning is likely to continue over the next few years. As a result, the demand for online educational platforms is growing. Distance learning might take the form of a slide-based online activity or an online course that helps learners gain the necessary skills.

Top Trends in Global EdTech Market

- The development of artificial intelligence in education and the teaching of STEM and programming are emerging trends.
- Immersive technologies in teaching and learning are also a growing trend.
- Online tuition and language learning are likely to continue to grow in popularity thanks to the Covid-19 pandemic.
- EdTech products that use adaptive learning algorithms and neural networks are more likely to succeed than traditional learning software, as they offer greater possibilities for personalized learning and parent feedback.
- As technology becomes more affordable and accessible, virtual and augmented realities will continue to grow and develop.
- Asia will likely continue to grow as a market because of its large educated population. This creates an apparent demand for EdTech innovation.

DRIVING FACTORS

➤ **Growing Investments in the Education Sector to Spur Market Opportunities**

The global market has witnessed a rapid shift in recent years, owing to the widespread adoption of mobile technology and increased education spending. For instance, investments in VC-backed education firms increased in 2020, when USD 14.6 billion was committed globally. This is an increase from USD 7 billion in 2019. Articulate raised USD 1.5 billion for corporate training technology, while BYJU'S raised USD 460 million for K-12 individualized learning programs, extending the momentum into 2021. Similarly, education tech startups focused on skill development have received a bunch of costs. For instance, Roblox, an online gaming platform that teaches programming, raised USD 150 million in investment in February 2020. Such major investments and budgets are likely to drive the edtech and smart classroom market growth during the projected period.

➤ **Reduced Costs of Internet Data and Online Learning Material to Accelerate Market Growth**

Increasing mobile penetration and the low cost of e-learning materials are seen as game-changer in the education industry's growth. In terms of mobile and internet penetration, Europe, the U.S., and emerging countries lead the trend. Meanwhile, significant growth is expected from emerging markets, with mobile as an essential device for acquiring knowledge. Therefore, the market is anticipated to witness booming growth in the near future.

RESTRAINING FACTORS

➤ Rising Cyber Threats in Education: Urgent Need for Enhanced Security Measures to Safeguard Learning Platforms

Microsoft Security Intelligence reported that the education sector was responsible for 61% of the nearly 7.7 million enterprise malware incidents in the past month. This makes it the most vulnerable industry. These cyberattacks require enterprises to create a robust system to protect Education Technology, Gamification, and other platforms for students.

➤ High Cost of Infrastructure and Lack of Technical Skills to Impede the Market Growth

Smart classroom infrastructure is expensive, such as smart equipment, including PCs, projectors, tablets, and various complex software. Furthermore, to stay up to date with software advancements and modifications, educational institutions may need to acquire a tech professional, which is an additional cost. Thus, the adoption of these solutions is likely to be hampered by such increased expenditures.

SEGMENTATION

➤ Mobile Learning Segment to Gain Traction Backed by Implementation of Online Learning Programs

Based on instructional aid, the market is classified into smart classroom and mobile learning. In the coming years, mobile learning is likely to grow in popularity. To reduce the impact of the COVID-19 threat on the education system, governments have created online learning programs, tests, and distance learning programs for students as part of security measures. These factors are expected to increase the usage of mobile learning services, resulting in attractive prospects for market-leading players.

The smart classroom segment is expected to account for a considerable share of the market. However, due to the COVID-19 pandemic, schools, universities, and other educational institutions were closed. Owing to this, the global market experienced a revenue decline for the financial year 2020-2021.

By Smart Classroom Hardware Analysis

➤ Ongoing Technological Advancements to Drive the Interactive Whiteboards Segment

By smart classroom hardware, the market is categorized into interactive projectors, interactive whiteboards, and others (interactive displays, tables, and audio systems). Interactive whiteboards, also called smart boards, are expected to grow at a significant CAGR over the forecast period. The segment's growth is mainly attributed to the rising demand for e-learning and interactive learning among colleges and schools.

Moreover, interactive projectors are anticipated to grow at a moderate CAGR during the forecast period, as they are the most preferred solutions for classrooms & collaborative office meetings.

REGIONAL INSIGHTS

- **Asia Pacific** is expected to grow rapidly during the forecast period. China led regional EdTech market growth, followed by India & Japan. Government-led programs, such as government-funded literacy expansion projects in rural areas, are predicted to increase the demand for smart education in India, Japan, and Australia. For instance,

The National Digital Library of India is an online library run by the Ministry of Human Resource Development that provides academic information arranged by topic area for various levels of smart education and learning. Furthermore, the Ministry of Education, Culture, Sports, Science, and Technology (MEXT) in Japan provides an e-learning forum organized by age and educational level.

Work from home & remote work - Statistics & Facts

Working from home prior to the coronavirus (COVID-19) outbreak in 2020 had been a luxury. However, the advancement of digitalization and the shift to a more knowledge-based economy have made the option of remote work and hybrid work possible for employers and employees. The world has changed. Currently, the ability to work remotely has become of crucial importance for employment decisions.

The perks of working from home

Companies worldwide have experienced significant reductions in the fixed costs of supporting a workplace environment, while upper management levels have gained confidence in their employees' home office performance. Aside from a more flexible schedule and the possibility of working from anywhere, employees stated that home office environments were also better for them from a financial perspective.

Technology tools enable remote work.

Collaboration tools are proof of the important role played by modern technologies in enabling different remote work concepts. Since 2020, information technology decision-makers have allocated significant resources to improve their company's IT infrastructure, security technologies and work from home (WFH) capabilities. Collaboration software became an essential pillar in supporting remote and hybrid workforce environments, by enabling new communication channels and improving team cohesion. As of the second quarter of 2022, Microsoft accounted for nearly 40 percent of the global unified communications and collaboration market.

In 2021, companies' main IT investment priorities to support WFH were cloud-enabled technologies and digital collaboration tools. By the end of 2022, companies switched their approach from enabling home office, to securing it.

Size of the legal services market worldwide.

In 2023, the global legal services market is projected to have recovered and reach roughly 840 billion U.S dollars three years after the COVID-19 outbreak, which led to an economic slowdown all over the world.

The legal services market includes both dedicated law firms and in-house legal teams. Developed countries dominate the industry; in 2017, the United States accounted for almost half of the global market and Europe for just over one quarter. However, growth in the Asian market is expected to outpace that of North America and Europe over coming years. Some analysts link this to growth in the Chinese market and the increasing outsourcing of legal services by North American and European companies to countries with lower costs (notably India).

Size of the legal services market in the U.S.

Spending on outside legal counsel is the largest segment of the U.S. legal services industry, totaling 71.2

billion U.S. dollars in 2021. This figure has been steadily growing since 2015, and is expected to reach 76.2 billion U.S. dollars in 2021. These values only include spending on legal services by companies with over one billion U.S. dollars in revenue.

The legal services industry

Globally, the legal services industry was worth 849 billion U.S. dollars in 2017 and is expected to become a trillion-dollar industry by 2021. Once all spending on legal services is included, the U.S. accounts for almost half of the global legal services market, making it by far the largest market in the world. One of the reasons why the U.S. has a disproportionately large legal services market, relative to the population and economy of other actors such as Europe and China, is the connection many of the global Big Law firms have with the United States. Of the largest law firms in the world in 2018, only three were not founded in the United States (Dentons, Clifford Chance and Allen & Overy).

INDIAN OVERVIEW OF EDTECH INDUSTRY

The use of the latest educational technology, or edtech, in school settings has increased dramatically around the world in an effort to support teaching and learning and enhance student learning outcomes. Education Technology has transformed the way people access and consume education all over the world. Today, learning has been made more obtainable, flexible, and personalized, enabling people across the spectrum to acquire new skills and knowledge anytime, anywhere.

In India, edtech has played an important role and contributed significantly to uplifting the standard of education over the last few years. The breakout of the Covid-19 pandemic has also initiated the growth of the e-tech industry in the country which was growing at a moderate pace and is expected to record an exponential growth of US\$ 30 billion by 2031. India has also become the second-largest market for e-learning after the U.S. With the increasing adoption of AI, ML, IoT, and blockchain technologies, Indian EdTech is expected to hold an important position in the global education industry.

The Indian education market is expected to be a US\$ 225B opportunity by 2025, with online/digital education growing faster (~27%) to reach US\$ 5.7B by 2025.

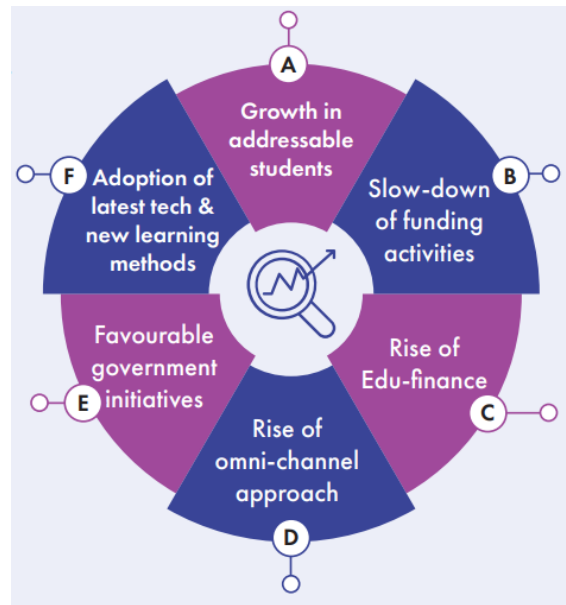

The Rise of Online Learning

Indian EdTech start-ups found their way into the spotlight at the beginning of the pandemic in 2020. But with restrictions easing in 2022 and educational institutions reopening, hybrid learning became part of the 'new normal'. EdTech firms that adapted their business models to include hybrid learning comprising of online and classroom have not only survived the business woes of the pandemic but thrived in its aftermath. Today, there are approximately over 4,450 Indian EdTech start-ups in India that are assisting over 300 million school students across the globe.

In line with this momentum, the Indian central government has rolled out several programs to boost the growth of the distance education market, besides focusing on techniques such as e-learning and m-learning. The government's focus on bringing the digital revolution to the education sector is evident with initiatives under the National Education Policy as well as the Union Budget 23- 24 that propose an improvement of digital infrastructure and regular training for teachers to encourage online and hybrid learning. While government support together with an impressive inflow of funding has helped Indian EdTech firms to thrive and expand offshore, digital payments have also played a key enabling role.

New trends within Indian Edtech Space

- Learners from non-metros demand high-quality faculty and content, which is driving higher enrolment on edtech apps
- Increase in # of students is expected to create demand for edtech solutions like upskilling and job-ready courses
- Offline educational institutes are exploring online avenues to increase student / parental engagement and increase the convenience of learning
- Start-ups are providing an option of “pay after placement”, thereby providing more opportunities for students to pursue higher education
- Emergence of hybrid business models to leverage the advantages of both offline and online learning
- Decrease in investments and mandates to turn profitable has led to layoffs among key players in the edtech space
- While top edtech players continue to receive funding, investor focus has shifted to new / smaller start-ups
- Fundings in overseas education consulting start-ups increased by 3X
- Edtech players are shifting their focus to omnichannel models as a higher number of K12 and test prep edtech players expand via offline centers
- Edtech players are experimenting with new technologies like AI, AR, etc. to enhance the experience of learners and teachers
- Gamification is deeply penetrated across major plays; It is interactive, promotes fun and offers real-time feedback to the learners
- Tech adoption has enabled changes in the learning methods of students, thereby leading to the emergence of newer methods like “Micro and Nano Learning”, “Adaptive learning” and “Analytical learning”
- Government policies are focusing on making youth career ready
- PM eVIDYA - for multi-mode digital/online education access
- Increase in budget allocation by 18% in the education sector from FY21 to FY22

Growth Drivers for Indian EdTech

The boom in Indian EdTech can be attributed to multiple factors such as an increase in online content consumption, high penetration of internet and smart devices, and the demand for skilled professionals in the global workforce.

The fast-growing popularity of mobile and online content consumption, coupled with digital-first lifestyles, has created a sustainable network of digital users leading to a massive opportunity for EdTech firms. A dynamic mix of educational content comprising textual, visual, and video formats, highly appeals to this set of digital users.

▪ Increase in Number of students & colleges.

- Rising primary education enrolments, with NER currently at 92.7%

- Increase in colleges and students to drive enrolment for online upskilling and job-ready courses
- Increase in nuclear families and working women – need for edtech solutions

■ **Higher Accessibility**

- ~2.5M IIT and NEET aspirants from smaller cities due to lower cost and quality content
- 624M active internet users in India as of Feb 21
- Approximately 60% of lower to middle-income students possess at least one smartphone.
- BYJU's witnessed a 150% surge in new enrolments by providing free app access amid the lockdown.

■ **Affordable online education:**

Parents in India spend a lot of money on their children's education and additional skill learning. And, pursuing skill development offline is extremely costly. The edtech players offer learning programs which are readily available without paying high administrative fees. As a result, users benefit from the savings, which increase the courses' affordability, and according to KPMG research on online education in India in 2021, online skill learning courses are 53% less expensive than offline options.

■ **Availability of quality education:**

Students are given access to high-quality education through online resources. Edtech companies are helping educational institutions not equipped with the latest digital infrastructure to bridge the gap to a considerable extent by supplementing them with the resources to support the e-learning model. Not only this, but online courses are also more successful in keeping up to date with the latest technological developments. These courses are well created with the help of subject matter experts. It is predicted that the online education market in India is expected to grow by US\$ 2.28 billion during 2021-2025, growing at a CAGR of almost 20%.

■ **Lack of educational infrastructure and qualified faculty:**

The reach of educational institutions may be constrained by the growing population, but the expansion of the edtech sector offers an alternative, such as intellectual infrastructures like libraries and qualified, well-trained teachers, for a seamless experience to serve many students without the need for physical school infrastructure.

■ **Upskilling demand among working professionals and job seekers:**

Due to automation and a recession in the global economy, the Indian job market is straining under the dual pressure of layoffs and a lack of available jobs. Players in the edtech industry are making it possible for professionals and job seekers to progress their careers and acquire new skills. The online skill courses by the edtech companies are affordable, provide hands-on knowledge, which can be completed in a shorter time than an offline course, and offer flexibility in terms of personal schedule to upskill or reskill at their convenience.

■ **Rise in the use of internet and smartphones:**

The adoption of smartphones and the internet has increased dramatically in India in recent years. Around 830 million people had internet access in 2021, and it is predicted by 2026, 1 billion people will be using smartphones in the country. For the younger age, and aspiring students coming from tier-3 cities and

remote locations who have limited accessibility to such skill development courses, enrolling in distance education is incredibly accessible because of the internet. These groups could use smartphones and the internet in order to complete their educational obligations and learn career skills without leaving their homes, workplaces, or cities. Digital-friendly government policies: The government has introduced a number of initiatives, including Digital India and Skill India, to promote digital literacy, build a society based on knowledge, and put into practice the three guiding principles of access, equity, and quality of education policy. Furthermore, 100% FDI through an automatic route is permitted in the Indian education sector by the government to allow entry of new edtech players.

As new-age technologies continue to permeate every echelon of society, reskilled and upskilled talent has become the need of the hour. For tech talent to continue to stay relevant, they will have to acquire new skills by unlocking the potential of online learning. This has also bolstered the demand for Indian EdTech.

An Indian EdTech's success

The country's large and talented pool of teachers who are well-versed in English, along with being experts in Math and Science, has been one of the major influencers for the global demand for Indian EdTech.

A pertinent enabler for Indian EdTech is its price leverage. For instance, courses in the U.S. and the Middle East cost more than three times and double, respectively, compared to India. Moreover, online post-graduate programs by Indian EdTech firms can be availed at one-tenth the cost of a master's degree in the US. The cost-effectiveness of Indian EdTech, therefore, allows students to overcome the paywall between them and premium educators, and the virtual nature of this learning erases geographical constraints.

So How Are Digital Payment Platforms Propelling the Rise of EdTech Firms?

First, the digital payment platforms make access to online learning secure by offering a safe way to transfer funds and protecting customers' data from fraud and theft. Second, they allow consumers, in this case, students and/or their parents, to make payments in different currencies, and provide options to pay as per local preferences.

The payment processes for school fees and online learning platforms are often found to be tedious and unreliable due to limited and traditional payment options. Digital payment platforms provide a simplified option for parents as well as professionals looking for upskilling courses as they sign up on EdTech platforms. PayPal simplifies the payments process for EdTech companies by solving issues from multiple parties engaging on the EdTech platform (parents, tutors, etc.). Furthermore, its buyer and seller protection covers both parties in the event of unauthorized payment or a product/service issue, respectively.

Enabling EdTech

India continues to be poised for growth in its journey to becoming a global EdTech hub, fueled by increasing reliance and trust in digital tools. The acceleration of EdTechs is testimony to this. With digital payment platforms offering an opportunity of easing transactions between EdTech companies and students, India will continue to contribute to the bright and promising future of the global EdTech industry.

The road ahead

The rise of edTech, has made it possible to learn at anytime, anywhere. By embracing technologies like AI, ML, and IoT, edtech institutions and companies are adapting their pedagogies for online teaching and providing these cutting-edge courses through the digital medium for a fraction of the cost.

The edtech sector's potential to close the learning gap in the future appears to be quite promising given the trajectory of its expansion. Venture capital investments in India's edtech sector have increased 32 times over the past 12 years, from 500 million in 2010 to 16.1 billion in 2022 and the sector is expected to reach US\$ 30 billion by 2031.

By globally integrating labor markets, the rise of remote work can have a profound impact on the levels and dynamics of wages across the world. **Web-based job platforms match employers and workers located around the world who trade tasks that are delivered remotely, providing a window into a globalized market for remote work.** The number of such platforms has tripled over the past decade.

By 2020, hundreds of web-based job platforms had facilitated millions of international transactions totaling over 50 billion US\$ (ILO 2021). The emergence of these platforms coincided with the dramatic growth in ICT-Enabled Service trade, which quadrupled in the US since the year 2000 and now accounts for 70% (800 billion US\$) of all US service trade.

Workers are located around the world and compete for the same jobs. These jobs can be done remotely, require little capital other than a computer, and encompass a wide range of occupations, ranging from accountants to web developers.

The wages of Indian workers are, on average, a third of those of US workers. In fact, the country of the workers accounts for at least a quarter of the variance of wages in the data. Furthermore, remote wages are strongly correlated with the GDP per capita in the worker's country: the elasticity of wages to GDP per capita is 0.22.

Establishment of the Ministry and its Role in Skill Development and promotion of Entrepreneurship

India is paving the way towards becoming the Skill Capital of the world. With one of the youngest populations in the world, India can realise its demographic dividend through a workforce that is trained in 'employable' skills and is industry ready. Skill development is undoubtedly essential, but its impact will be limited unless it goes hand in hand with employment generation.

Challenges in Skilling and Entrepreneurship Landscape in India

Skills and knowledge are driving forces of economic growth and social development for any country. Countries with higher levels and better standards of skills adjust more effectively to the challenges and opportunities in domestic and international job markets. There exist several challenges in the skilling and entrepreneurship landscape in the country, a few of the many are enumerated below:

- Paucity of trainers, inability to attract practitioners from industry as faculty
- Mismatch between demand and supply at the sectoral and spatial levels
- Limited mobility between skill and higher education programmes and vocational education
- Lack of assured wage premium for skilled people

National Policy for Skill Development & Entrepreneurship, 2015

The National Policy for Skill Development and Entrepreneurship (NPSDE), launched in 2015, acknowledges the need for an effective roadmap for promotion of skilling and entrepreneurship as the key to a successful growth strategy. The Vision of the Policy is "to create an ecosystem of empowerment by Skilling on a large Scale at Speed with high Standards and to promote a culture of innovation-based entrepreneurship which can generate wealth and employment so as to ensure Sustainable livelihoods for all citizens in the country".

Mission of NPSDE is to:

Create a demand for skilling across the country; Correct and align skilling with required competencies; Connect the supply of skilled human resources with sectoral demands; Certify and assess in alignment with global and national standards; and Catalyse an ecosystem wherein productive and innovative entrepreneurship germinates, sustains and grows leading to creation of a more dynamic entrepreneurial economy and more formal wage employment.

The Policy addresses key obstacles to skilling, including low aspirational value, lack of integration with formal education, lack of focus on outcomes, low quality of training infrastructure and trainers, etc. Further, the Policy seeks to align supply and demand for skills by bridging existing skill gaps, promoting industry engagement, operationalising a quality assurance framework, leverage technology and promoting greater opportunities for apprenticeship training. Equity is also a focus of the Policy, which targets skilling opportunities for socially/ geographically marginalised and disadvantaged groups. Skill development and entrepreneurship programmes for women are a specific focus of the Policy. In the entrepreneurship domain, the Policy seeks to educate and equip potential entrepreneurs, both within and outside the formal education system. It also seeks to connect entrepreneurs to mentors, incubators and credit markets, foster innovation and entrepreneurial culture, improve ease of doing business and promote a focus on social entrepreneurship.

A number of initiatives have been taken by the Government to meet the objectives of the Policy. These, inter-alia, include –

- Launching of the Pradhan Mantri Kaushal Vikas Yojana (PMKVY), for imparting short-term skill training to the youth.
- Notification of common norms for bringing about uniformity and standardization in implementation of various skill development schemes by different Central Ministries/ Departments.
- Setting up of Sector Skill Councils (SSCs) as industry-led bodies to develop National Occupation Standards (NOSS).
- Implementation of Skills Acquisition and Knowledge Awareness for Livelihood Promotion (SANKALP), an outcome-oriented World Bank supported project for strengthening institutional mechanisms at both national and state levels.
- Implementation of Skills Strengthening for Industrial Value Enhancement (STRIVE) scheme, a World Bank assisted project launched with the objective of improving the relevance and efficiency of skills training provided through Industrial Training Institutes (ITIS) and apprenticeships.
- Launching of Skill India Portal to provide information of trainees, training providers and trainers.
- Mobilisation/ outreach activities through Kaushal/Rozgar Melas, Skills Career Counselling Scheme in making skilling aspirational.

In the area of long-term training, under Directorate General of Training (DGT), the New Age Course is one of the newly designed courses and delivered nationwide through a network of ITIS. The objective of New Age Course is to improve trending new age skills to cater to the needs of new age industries. Some of new courses are Smart Agriculture (Internet of Things), Smart Healthcare (Internet of Things), Smart City (Internet of Things), Remotely Piloted Aircraft, etc. Presently, there are 142 ITIs with a total of 5.644 seats that provide new age courses

Apprenticeship Training under the Apprentices Act, 1961 and NAPS

Background

Apprenticeship offers a unique combination of education and on-the-job training which helps in education to world of work transition. Therefore, Government's focus on apprenticeship training as a preferred model of skill development has increased manifolds in the recent years.

The National Policy on Skill Development and Entrepreneurship (2015) focuses on apprenticeship as one of the key components for creating skilled manpower in India. Apprenticeship training can play a major role where youth can acquire skills by working at actual work place and simultaneously earn some stipend to financially support himself. Globally too, apprenticeship is considered as the best model for skill acquisition and earning while learning.

With the hon'ble Prime Minister's vision of 'Atma Nirbhar Bharat' the government has taken various administrative, economic and governance reforms to sustain high growth rates in apprenticeship training. With the changing markets and growing digitalization, India displays high skill intensity and the demand for skilled manpower. At this juncture, apprenticeship presents a great opportunity for enterprises in all sectors where global competitiveness is to be achieved to train, engage and benefit from the potential of

apprenticeship.

Skills Acquisition and Knowledge Awareness for Livelihood Promotion (SANKALP)

Introduction

SANKALP was launched in January, 2018 as a World Bank loan aided Centrally Sponsored Scheme to decentralize skilling initiatives in the ecosystem, strengthen institutional mechanisms for skill development, and increase access to quality and market-relevant training for youth across the country. SANKALP has a six-year implementation period and aims to address the ongoing challenges like bringing about convergence, infusing quality into skill development programs, making them market-relevant and accessible, while ensuring private participation in the context of short-term training.

SANKALP is an outcome-oriented project aligned with the overall objectives of the National Skill Development Mission (NSDM). It is designed to enhance the existing proficiency of the system to handle skill development initiatives and develop targeted pilots to help test scalable solutions to different challenges in the ecosystem.

These outcomes are measured through the Results Framework and Disbursement Linked Indicators (DLIs) agreed between MSDE and the World Bank. The World Bank has so far undertaken one mid-term review mission, seven implementation support missions, one state expenditure review and two restructuring missions for the project.

Some of the major initiatives under SANKALP are as follows:

Mahatma Gandhi National Fellowship

Mahatma Gandhi National Fellowship is a two-year academic program that combines classroom sessions at IIMs with intensive field immersion at the district level. It promotes decentralized skill planning and management by placing the fellows in District Skill Committees. The fellows get an opportunity to identify the challenges in the district skill ecosystem and work closely with the district administration to help address them. It is an opportunity for young, dynamic individuals to enhance skill development and promote economic development. With the success of the first phase, where 69 fellows were deployed in 69 districts across six states, MSDE expanded the program in Phase II with the deployment of 650 fellows across the country jointly with nine IIMs (namely IIM Ahmedabad, IIM Bangalore, IIM Jammu, IIM Kozhikode, IIM Lucknow, IIM Nagpur, IIM Ranchi, IIM Udaipur, and IIM Visakhapatnam) that have come onboard as academic partners. Mahatma Gandhi National Fellowship Phase-II was inaugurated in October 2021 by the Hon'ble Minister of Education and Minister of Skill Development and Entrepreneurship.

Currently, 604 fellows have finished their academic modules with the IIMs and are deployed across 31 States/ UTs in the country. They will provide states and districts with catalytic support to improve skill development program planning and delivery and create a cadre of development professionals who will be available to District Skill Committees for comprehensive skill development planning and implementation in their respective districts.

International workforce mobility:

A Global Skill Gap study has been undertaken to identify the gaps in demand and supply of skilled manpower as well as overseas employment opportunities for skilled workers from India. Accordingly,

MSDE through NSDC is now implementing a project namely “International Workforce Mobility” to identify international opportunities for the Indian workforce. As part of this initiative, multiple interventions are being undertaken, including studies to facilitate demand assessment, profiling and interventions required in various destination countries to enable mobility of trained and certified Indians, strengthening skill institutions to match global or destination country standards, establishing branch offices in identified destination countries, advocacy and branding, and the development of training and course materials.

OUR PROMOTERS

RAMANUJ MUKHERJEE

Mr. Ramanuj Mukherjee holds the positions of “Promoter” and “Managing Director” within the company. He is a co-founder of “**Addictive Learning Technology Limited**”, the entity behind “**LawSikho**”. He is a graduate of the West Bengal National University of Juridical Sciences with a B.Sc. LL.B. degree. He pioneered ventures like iPleaders and SuperLawyer. He has more than 12 years of experience in legal education and content creation. He started his career as a student freelancer & went on to become Associate- Private Equity, M&A in Trilegal followed by founding various startups.

ABHYUDAYA SUNIL AGARWAL

Mr. Abhyudaya Agarwal, an entrepreneur in the legal field, assumes the role of co-founder and Whole-time Director within “**Addictive Learning Technology Limited**”. With a legal background, Abhyudaya completed his LL.B. from National University of Juridical Sciences (NUJS) in Kolkata. His time at NUJS instilled a vision to align legal education more closely with industry requirements, motivating his contributions to legal academia and entrepreneurship.

JOURNEY SO FAR

Following their graduation, Ramanuj Mukherjee and Abhyudaya Sunil Agarwal initiated their career as corporate lawyers. However, they soon realized that there was a significant gap in the practical training provided to law students in India. Traditional legal education focused heavily on theoretical knowledge, often neglecting the practical skills required in the real world. This realization became the catalyst for their entrepreneurial journey. They started “iPleaders”, during their college days, a legal blog that aimed to provide practical legal insights to a diverse audience, including law students and professionals. However, they want to expand their offerings to include online courses, successfully competing with funded counterparts and global entities.

Thereafter, with the vision of bridging the gap between theoretical knowledge and industry practices, they established “Addictive Learning Technology Limited”, under which they build a brand called “LawSikho”. Under Ramanuj’s and Abhyudaya’s leadership, LawSikho has witnessed significant growth, serving students

and professionals. The platform has partnerships with industry experts, law firms, and universities to develop a comprehensive curriculum catering to the evolving demands of the legal sector.

While initially they started out by catering to law students and law graduates, they soon understood that a much bigger market need exists in upskilling lawyers with more than 5 years of experience in practicing. A major moment of inflection happened after they focused on empowering Indian lawyers to work across borders, in the remote format, by teaching the laws of more advanced economies with higher compensation levels. They were also able to expand their vision from upskilling in law to other adjacent professions such as accounting, finance, compliance, human resources and business consulting.

LawSikho added new brands like Skill Arbitrage and acquired Dataisgood to reflect this growth.

OUR BRANDS:

Our portfolio consists of three (3) brands that we own. These brands are essential in expanding the range of courses we offer to our learners.

LAWSIKHO:

LawSikho: Bridging the Gap Between Theory and Practice:

Identifying flaws within the Indian legal system that created a disconnect between academic knowledge and practical application, LawSikho was established to bridge this gap. With a focus on practical relevance, LawSikho offers a wide range of online courses in various legal areas, integrating experiential learning through simulations, live exercises, and real-world case studies.

LawSikho's Collaborative Approach:

LawSikho adopts a collaborative approach, partnering with legal firms, practitioners, and industry experts to ensure course alignment with industry needs. The platform's extensive course catalog accommodates learners at all career stages, from introductory modules to advanced specializations.

Beyond professionals, LawSikho empowers aspiring law students with internship opportunities, mentorship programs, and placement assistance. While deeply rooted in the Indian legal landscape, LawSikho maintains a global outlook, offering international courses and fostering comparative law studies.

Recognizing the evolving legal landscape, LawSikho adapted swiftly to the pandemic, incorporating lessons on virtual courtrooms, AI driven legal tools, digital documentation, and online dispute resolution into their curriculum.

These courses cater to individuals interested in the legal profession, including law students and legal practitioners, aiming to enhance their legal knowledge and expertise, ultimately enabling career advancement.

While LawSikho catered to the legal upskilling sector, the promoters were always on the lookout for new avenues of expansion. They launched a new brand called "Skill Arbitrage", aimed at diversifying their educational offerings. By entering domains like compliance, HR, finance, bookkeeping, content writing and business consultancy, they showcased their commitment to holistic professional education.

We drive our strengths from the following factors:

Prioritizing skill development, with remote presence and a focus on Innovation:

Our company prioritizes skill development and career outcome over purely theoretical pursuits. It provides a wide range of educational products and services, including courses, training programs, live workshops, practical assignments, outreach initiatives, profile building initiatives, performance coaching and networking opportunities. This ensures that learners receive a well-rounded education that not only imparts theoretical knowledge but also fosters practical skills crucial for professional success. Training sessions, practical exercises, mentorship, and real-world case studies come together to create a dynamic and immersive learning environment.

Our remote presence is instrumental in reaching a diverse and vast audience, bridging geographical gaps and making quality education accessible to learners across the country. This extensive reach enhances its impact, contributing to the empowerment of individuals from diverse backgrounds and regions. It also generates employment in Tier-2 and Tier-3 cities of India.

Crucially, our focus on knowledge creation sets us apart. It doesn't merely disseminate existing knowledge; it actively engages in generating new insights, methodologies, and perspectives. This innovation enriches the educational content and methodologies, ensuring that learners are equipped with cutting-edge knowledge aligned with industry trends.

Synergistic AI Integration for Enhanced Customer Engagement and Sales Excellence:

Our strength comes from our AI-based business approach, which seamlessly combines artificial intelligence with effective teaching methods. Our business is firmly rooted in the synergy between AI technology that make our processes more scalable, provide guardrails for human operators and a personalized human touch. We are using proprietary AI technology to make our personalised assignment evaluation process more scalable. Our marketing and sales techniques also use AI. We've introduced AI-based sales software to improve our sales team's performance. This software analyses the emotions in sales calls and creates written records of these calls. Through sentiment analysis of sales calls, our AI software adeptly gauges customer interactions, while simultaneously generating comprehensive call transcripts. Right now, our AI software is approximately 85% accurate. After AI evaluates the calls, we also have humans to check the calls that are highlighted by AI to improve the performance of our sales team. This shows our commitment to providing accurate and quality service using both AI technology and human input. As our AI-based model continues to grow, it shapes the future of education by blending AI and human expertise in a unique way.

P. Segment reporting

The Company identifies primary segments based on the dominant source, nature of risks and returns and the internal organisation and management structure. The operating segments are the segments for which separate financial information is available and for which operating profit/loss amounts are evaluated regularly by the executive Management in deciding how to allocate resources and in assessing performance. However the company is currently dealing in only one primary segment..

Q. Taxes on income

Tax expense comprises current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with Income Tax Act, 1961. Deferred income tax reflects the impact of current year timing differences between taxable income that originates in one period and are capable of reversal in one or more subsequent periods

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent

periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantially enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognised only if there is virtual certainty that there will be sufficient future taxable income available to realise such assets. Deferred tax assets are recognised for timing differences of other items only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each Balance Sheet date for their realisability. "

R. Impairment of assets

The carrying values of assets / cash generating units are reviewed at each Balance Sheet date for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor. When there is indication that an impairment loss recognised for an asset in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognised in the Statement of Profit and Loss.

S. Provisions and contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.

A contingent liability is disclosed where, as a result of past events, there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made."

T. Insurance claims

Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and to the extent that there is no uncertainty in receiving the claims.

Leases

a) Finance lease

Assets taken on finance lease are capitalised at fair value or net present value of the minimum lease payments, whichever is less.

Lease payments are apportioned between the finance charges and outstanding liability in respect of assets taken on lease.

b) Operating lease

Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased term are classified as operating lease. Lease rent are recognized as an expense in the Statement of Profit and Loss on a straight line basis over the lease term.

U. Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. Partly paid equity shares are treated as a fraction of an equity share to the extent that they were entitled to participate in dividends relative to a fully paid equity share during the reporting year. For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

V. Discontinuing Operations

A discontinuing operation is a component of an enterprise: (a) that the enterprise, pursuant to a single plan, is: (i) disposing of substantially in its entirety, such as by selling the component in a single transaction or by demerger or spin-off of ownership of the component to the enterprise's shareholders; or (ii) disposing of piecemeal, such as by selling off the component's assets and settling its liabilities individually; or (iii) terminating through abandonment; and (b) that represents a separate major line of business or geographical area of operations; and (c) that can be distinguished operationally and for financial reporting purposes. However, the company doesn't have any discontinued operation.

W. The Previous Year figures have been regrouped/rearranged wherever necessary to make them comparable.

◆ **Total Income**

Total Income for the period ended March 31, 2023, stood at Rs. 3,354.47 Lakhs whereas in Financial Year 2021-22 it stood at Rs 1,859.34 Lakhs representing an increase of 80.41%.

Reason: The significant increase in revenue at is because of two key drivers contributing to this success: a substantial rise in the number of course enrollments and the strategic introduction of a new vertical.

In 2022, our company has introduced a new vertical called professional upskilling vertical (Skill Arbitrage) which operates under our brand called “Skill Arbitrage”. Earlier our company was only a legal upskilling platform offering career opportunities to our learners, with the introduction of this new vertical our company introduced new range of professional courses in the fields of Finance, Accounting & Bookkeeping, Human Resources, Business Consulting, Artificial Intelligence, Compliance, Content Writing and others. The comparison of vertical wise revenue and number of enrollments for the Financial Year ended 31 March 2023 and 31 March 2022 is given below:

| S. No. | Course Category | Number of Enrollments | Revenue (In Lakhs) | Number of Enrollments | Revenue (In Lakhs) |

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a. Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual applicant, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b. Phase II: This phase commenced on completion of Phase I i.e. with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.
- c. Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Issue.

All SCSBs offering the facility of making applications in public issues are required to provide a facility to make applications using the UPI Mechanism. Further, in accordance with the UPI Circulars, our Company has appointed [●] as the Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Investors into the UPI mechanism.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to Rs. 5,00,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than Rs. 200,000 and up to Rs. 5,00,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.
