INTERNAL RISK FACTORS

- 1. The object of making unidentified acquisitions may lead to significant investments in the businesses that may not be sustainable in the long run, which may result in financial losses and negatively impact the company's overall portfolio.**

We plan to use the proceeds of the Initial public offer for doing the unidentified business acquisitions that will be identified in the due course of time by the management and Audit Committee in the manner prescribed in SEBI (ICDR) Regulations, 2018 more fully set in the chapter "Object of issue Proceeds".

The business acquisitions carry the potential risk of significant investments in businesses that may not be sustainable in the long run. This may result in potential downside to our overall portfolio and can result in financial losses. We cannot provide guarantee that the business acquisitions to be made by the company will not be a failure. Therefore, identifying the potential business acquisition is crucial for our business. It is essential to take a cautious approach and carefully identifying the potential acquisitions that align with our strategic goals and present acceptable levels of risk. An amount of Rs. 5,00,00,000/- of proceeds of the Initial Public Offer is being allocated and will be utilised for such unidentified business acquisitions. If we are not able to make successful identification of potential business, it may adversely affect our business and can create financial loss and wealth reduction.

- 2. We have not yet placed orders in relation to the capital expenditure to be incurred for the proposed purchase of equipment / machineries. In the event of any delay in placing the orders, or in the event the vendors are not able to provide the equipment / machineries in a timely manner, or at all, the same may result in time and cost over-runs.**

We intend to utilize a portion i.e amount of Rs. 10,00,00,000/- out of the Net Proceeds for funding capital expenditure requirements for the purchase of equipment/machineries. While we have procured quotations from various vendors in relation to the capital expenditure to support our expanding operations, we have not placed any firm orders for any of them. For details in respect of the foregoing, please see "Objects of the Issue" on page 77. Such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. We cannot assure that we will be able to undertake such capital expenditure at the cost associated by such quotations or that there will not be cost escalations over and above the contingencies proposed to be funded out of the Net Proceeds. Further, the actual amount and timing of our future capital requirements may differ from our estimates as a result of, among other things, unforeseen delays or cost overruns, unanticipated expenses, regulatory changes, engineering design changes and technological changes.

- 3. We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions.**

We require certain statutory and regulatory permits, licenses and approvals to operate our business. There are few certificates for which we have applied but not received the certificates and the certificate which we did not yet applied., however, we are in the process for the same. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations. There can be no assurance that the relevant authorities will issue these approvals or licenses in a timely manner, or at all. In the event of any unanticipated delay in receipt of such approvals, the proposed capacity expansion plan may extend and any such delay could have an adverse impact on our growth, prospects, cash flows and financial condition. For details regarding pending approvals, please refer to section titled "Government and Other Approvals" beginning on page 306 of this Draft Red Herring Prospectus.

1	PUNE Branch, Ground and First Floor, H. No. 2705, Ranjangaon Ganpati, Tal- Shirur, Pune, MIDC, Pune, Maharashtra, 412209	Fire Safety Certificate	Not Applied

Note- The aforementioned licenses cannot be applied for until our company obtain the factory license for the Pune unit.

4. Our Company has given Corporate Guarantees of ₹ 18,34,42,047 in respect to the loan taken by its subsidiary company (“Wahren India Private Limited”). We cannot assure that there will be no default done by our subsidiary in the future.

Our company has extended Corporate Guarantees to support the borrowing activities of our subsidiary company. These guarantees serve as a commitment to fulfill the financial obligations of our subsidiary in the event they are unable to meet their loan repayments. By providing these guarantees, our company assumes the responsibility for repaying the loans on behalf of its subsidiary, thereby mitigating the risk for the lending institutions. The reasons for providing such guarantees can vary. It could be driven by the need to strengthen the financial position of the subsidiary, facilitate their access to financing at favourable terms. Providing guarantees is a common practice in corporate structures where the parent company supports the financial needs of its subsidiary. Our Company, as on September 30, 2023, has given a total sum of ₹ 18,34,42,047 as a corporate guarantee in respect to the loan taken by its subsidiary from the banks. We cannot assure you that there will be any default in the re-payment by our subsidiaries in the future. If any default commits by our subsidiaries, it may affect our business.

This would mean that we would have to pay off the loan on behalf of our subsidiaries or associates, which would impact our cash flows and financial position. Additionally, this could lead to a deterioration in our relationship with the banks extending the loan to our subsidiaries, making it harder for us to secure loans in the future. Beyond the financial implications, a default by our subsidiaries/associates could also dent our reputation and credibility in the market. Unforeseen events or financial difficulties faced by the subsidiary could potentially lead to the invocation of the guarantees. In such a scenario, our company would be required to honour the guarantee and make the repayments on behalf of its subsidiaries and associates.

5. Our Promoter/ Directors have mortgaged their properties and provided personal guarantees to secure certain of our loan facilities, which if revoked or invoked may require alternative guarantees, repayment of amounts due or termination of the facilities.

Our Promoter have mortgaged their properties and provided personal guarantees as security to secure some of our existing borrowings and may continue to provide similar guarantees in the future. In the event that any of these properties or guarantees are revoked by promoters, members of Promoter group or third party, the lenders for such facilities may require alternate properties as mortgages/guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities.

We may not be successful in procuring alternative properties/guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

6. *Our Company has availed unsecured loan which are repayable on demand. Any demand from the lenders for repayment of such unsecured loan may affect our cash flow and financial condition.*

As per the Restated Standalone Financial Information as on September 30, 2023, our Company has availed total sum of Rs. 5,26,72,120/- as unsecured loans which are repayable on demand. Any sudden recall of these unsecured loans may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition. For further details, please refer to the section "Financial Indebtedness" beginning on page no. 298 of this Draft Red Herring Prospectus

7. *Our lenders have charged over our fixed assets and book debts in respect of finance availed by us.*

We have provided security in respect of loans / facilities availed by us from banks and financial institutions by creating a charge over present and future Plant, Machinery, Furniture, Equipment's, tools, spares, accessories and all other assets. As on September 30, 2023, total amount outstanding and payable by us as secured loans are Rs. 12,45,06,642/-. In the event of default in repayment of the loans / facilities availed by company and any interest thereof, the properties may be subject to forfeiture by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. For further details of secured loans of our Company, please refer the chapter titled Financial Statements on page 183 of this Draft Red Herring Prospectus.

8. *Our company does not have direct-tie up or agreement with the big corporate house for our product, we are dependent on Intermediaries for Corporate Client Acquisition.*

One significant risk our company faces is its heavy reliance on intermediaries for acquiring corporate clients, as we lack direct agreements with major corporations. This dependency exposes us to challenges such as limited control over service delivery, revenue uncertainty due to intermediary performance, potential profit margin compression, competition and supplier dependence, difficulties in building direct client relationships, regulatory and legal complexities, and vulnerability to economic downturns that may impact intermediary outsourcing budgets. These risks collectively impact our business's stability, financial performance, and long-term growth potential, underscoring the importance of vigilantly managing these challenges and exploring strategies to diversify client acquisition channels.

However, our wholly-owned subsidiary Creative Graphics Premedia Private Limited works on this, for reducing the dependency on the intermediaries, which is directly contact with the big corporate houses such as ITC, TATA Consumers, T-Series, Haldiram, Dabur India, KRBL, Himalaya, Hamdard Laboratories, and many more.

9. *Discontinuance or non-availability of fiscal benefits enjoyed by our subsidiary ("Wahren") or inability to comply with related requirements may have an adverse effect on operations and results of operations on our subsidiary operation.*

Our subsidiary ("Wahren") currently enjoys certain fiscal benefits on account of policies of the GoI, including concessions under the Export Promotion Capital Goods Scheme (the "EPCG Scheme") of the GoI. Wahren has an export obligation of \$24,833.54 in respect to the actual duty saved by the company. The EPCG scheme allows import at zero custom duty and requires the importer to export equivalent to six times of duty saved on capital goods. Such equivalent amount is required to be fulfilled within six years from the date of issue of authorization. A 50% export obligation is required to be fulfilled within the first four years with the remaining 50% within the next two years. Non-fulfilment of such obligations may result in confiscation of capital goods imported under this scheme and other penalties as set out in this scheme. In the event of any default under the EPCG Scheme, the results of operations may be adversely affected. As we seek to export a larger proportion of our systems and components outside India, any changes in the policies of the GoI could have a material adverse effect on our results of operations and financial condition.

10. *We generally do business with our customers on purchase order basis and do not enter into long term contracts with them.*

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long-term contract with any of customers nor has any marketing tie up for our products. Further, our Company has not appointed any exclusive agents for handling its operations. Any change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect

on our revenues, cash flows and operations. We have not entered in any agreement with our customers, we work on the basis of purchase order basis.

- 11. We are primarily dependent upon few key suppliers for procurement of raw materials. Any disruption in the supply of these raw materials or fluctuations in their prices could have a material adverse effect on our business operations and financial conditions.**

One of our primary raw materials comprise polymer/ rubber sheet. The prices of polymer sheets may also fluctuate based on exchange rate, customs & duties levied on imports or changes in government policies with respect to these materials or the countries supplying the same. We may be unable to make adequate provisions for the price fluctuations and, consequently, any adverse fluctuations that we have not factored in or provided for may adversely affect the results of our operations and our financial conditions. At present, we purchase most of our raw material from limited number of suppliers.

(Amount in "000")

Particular	As on March 31, 2023	As on March 31, 2022	As on March 31, 2021
Total Purchases	5,51,270	3,98,886	2,88,056
Top 5 Suppliers	4,23,530	3,50,863	2,47,262
% of top 5 Suppliers to Total Purchases	76.83%	87.96%	85.84%

Inadequate supply of such raw materials caused either by a sudden change in the prices or imposition of any new taxes or for any other reason could have a material adverse effect on our business operations and financial condition. In case of loss of any of our existing major vendors for any reason, it would have a material adverse effect on our business operations and profitability.

- 12. Minimum Purchase Condition with the vendors for raw material procurement.**

Our company has entered into long term agreements with various vendors who has imposed a minimum purchase condition to purchase raw material requirements for manufacturing of flexographic printing plates. If our company do not meet the said obligation to purchase minimum quantity the agreements will be deemed as breach of terms and condition of the agreement in that case supplier may charge extra cost of raw material or may terminate the agreements. Those conditions represent a crucial aspect of our supply chain, and any breach of these agreements could have adversely affected for our business operations. It could disrupt our supply chain, compromise product quality, and ultimately impact our bottom line.

- 13. We generate our major portion of sales from our operations in certain geographical regions in India. Any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.**

For the year ended March 31, 2023, March 31, 2022, and March 31, 2021 our revenue from our certain geographical regions customers as per our Restated Financial Statements are as followed:

(Amount in "000")

Sr. No.	Particular	FY 2022-23		FY 2021-22		FY 2020-21

	Total	5,59,399	61.50	400136	58.58	2,78,570	58.55

Such concentration of revenue in limited states may have an adverse effect. Further, drastic change in taxes and other levies imposed by State Government as well as other financial policies and regulations, Political and deregulation policies, if changed, could harm business and economic conditions. However, the composition and revenue generated from various states might change as we continue to add new customers in the different parts of India.

- 14. There are certain discrepancies and non-compliances noticed in some of our corporate records relating to forms filed with the Registrar of Companies, taxation authorities and other public authorities.**

In the past, there have been some instances of delays in filing statutory forms with the ROC which includes MGT-7, AOC-4, ADT-3, ADT-1, CHG-1, SH-7, MGT-14 with the additional fees. Also, we have delayed in filing few of our TDS Returns, GSTR-3B, EPF Returns with the concerned offices on several instances and have accordingly been subjected to penalty and charged with interest for delayed deposit of tax on various instances as well. Further with the expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

*Subject to escalation rate of 5% after expiry of 11 months.

**Subject to escalation rate of 3% each year.

There can be no assurance that the term of the agreements will be renewed on commercially acceptable terms and in the event the Lessor/Licensor terminates or does not renew the agreements, we are required to vacate the said premises where operational activities are carried out. In such a situation, we have to identify and take alternative premises and enter into fresh

lease or leave and license agreement at less favourable terms and conditions to shift our registered office and operations. Such a situation could result in time overruns and may adversely affect our operations temporarily.

16. *There may be quality issues while printing flexographic printing plates which may adversely affect our business.*

The impact of poorly made or neglected flexographic plates on our business cannot be underestimated. These plates are the backbone of our printing operations, and any lapses in their quality or maintenance can set off a chain reaction of negative outcomes. Print defects, misregistration, and inconsistent print quality not only compromise the integrity of our work but also erode the trust and satisfaction of our valued clients. Such shortcomings can lead to lost business, as clients may seek more reliable alternatives. Moreover, a tarnished reputation can be challenging to rebuild, damaging our brand's credibility and market standing. The most severe consequence could be the threat of legal claims, putting our business in a precarious legal and financial position. It is imperative that we prioritize the quality and maintenance of our flexographic plates to safeguard our business's future and uphold our commitment to delivering top-notch printing services.

17. *Our inability to produce high-quality prints consistently can result in a competitive disadvantage in the market*

The inability to consistently produce high-quality prints in our business can significantly impact our competitive position within the market. In an industry where quality and consistency are paramount, any lapses can swiftly erode our competitive advantage. Clients and customers seek reliable partners who can deliver top-notch printed materials consistently, and any deviation from this expectation may drive them to seek alternatives. Moreover, our reputation, carefully built over time, could be jeopardized, making it more challenging to secure new clients and retain existing ones. In an increasingly competitive marketplace, the ability to consistently produce high-quality prints is not just a hallmark of professionalism; it's a strategic necessity to maintain and grow our business.

18. *Our negligence in cleaning and maintenance can cause damaging in plates which can adversely affect our business.*

The importance of regular cleaning and maintenance of our flexographic printing plates cannot be overstated, as neglecting these critical tasks could have profound repercussions for our business. Their condition directly influences the quality and longevity of our output. Overlooking maintenance not only shortens the lifespan of the plates but also jeopardizes the integrity of the prints they produce. This diminished print quality can lead to customer dissatisfaction, eroding trust in our services and potentially driving clients to competitors. Beyond the immediate impact on our reputation, the financial cost of replacing damaged plates and the potential disruptions to our production schedules can be substantial. It's imperative that we prioritize the upkeep and maintenance of our flexographic plates to safeguard our business's reputation, ensure consistent high-quality output, and maintain our competitive edge in the market.

19. *Our inability to store plates in unsuitable conditions can cause distortion or degradation, impacting plate integrity which may adversely affect our business.*

The storage of our flexographic printing plates is a critical factor that directly influences the integrity of our printing process and, subsequently, our business. Failing to maintain suitable storage conditions can lead to distortion or degradation of the plates, which can result in a host of negative consequences. Plate distortion can lead to inconsistent print quality, print defects, and registration issues. Plate degradation not only affects the lifespan of these crucial components but also increases the risk of financial strain due to the need for frequent replacements. Moreover, the damaged plates can disrupt production schedules, potentially leading to missed deadlines and customer dissatisfaction. To ensure our business remains competitive, efficient, and capable of delivering top-notch results, it is imperative that we prioritize proper storage conditions for our flexographic plates, safeguarding their integrity and the quality of our printed materials.

20. *The manufacturing process of flexographic plates generates environmental waste, potentially resulting in fines and penalties.*

Our company as engaged in the manufacturing of flexographic plates may face environmental risk factors related to regulatory compliance. During manufacturing of these plates, company generate various types of waste such as Chemical (Cylosol), E-Waste, PVC Drums, Waste Batteries that could have environmental impacts. Our company had taken all the licenses required for any manufacturing unit such as Factory License, fire NOC, air NOC, water NOC. Further, our company has also entered into an agreement with M/s Sheetala Waste Management Projects for waste disposal. Failure to adhere to environmental regulations or changes in these regulations can lead to fines, legal actions, and reputational damage.

21. *Any failure while using or selecting the ink for making flexographic printing plates may affect our business operations.*

The choice of ink in our flexographic printing process is a pivotal factor in the quality and reliability of our output. Using ink that is not compatible with the plate material poses a substantial risk to our business. Incompatibility issues, such as ink smudging and poor adhesion, can lead to subpar print results that compromise the professional image we strive to maintain. Clients expect pristine, high-quality prints, and any deviation from this standard can lead to dissatisfaction and erode their trust in our services. Beyond the potential loss of business and a damaged reputation, the financial implications of rework, wasted materials, and the additional resources required to rectify ink-related issues can be significant. To secure our competitive position and uphold our commitment to excellence, it is essential that we prioritize the use of ink that is fully compatible with our plate materials, ensuring consistent and top-tier print quality for our clients.

22. Any failure/ damage or any inevitable event to machinery may affect our business operations and financial conditions of our company.

Our business is dependent upon our ability to efficiently manage our manufacturing facilities, which are subject to various operating risks, including productivity of our workforce, breakdown of machinery, natural disaster and other inevitable incident. Any malfunction or breakdown of our machinery may require significant repair costs and consequently cause delays in our operations. Such incidents can be disruptive not only in terms of the financial resources required for repairs but also in terms of time lost in getting our machinery back to optimal working conditions. These delays may affect our ability to meet production schedules, fulfill customers' orders, and maintain overall operational efficiency. Therefore, it is imperative that we invest in preventive maintenance, monitoring, and swift response protocols to mitigate the impact of machinery issues on our business continuity.

Obsolescence, destruction, theft or breakdowns of our major plants or machineries may significantly increase our machineries purchase cost and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability. Such obsolescence, destruction, theft, breakdowns, repair or maintenance failures or price increases may not be adequately covered by the insurance policies availed by our Company and may have an effect our business, cash flows, financial condition and results of operations. The occurrence of any such event in the future could have an adverse effect on our business, results of operations, financial condition and cash flows.

23. Any failure to Embrace Digital Printing Could Erode Flexo Printing Market Share and our revenue growth.

The traditional flexo printing business model faces a substantial risk in the form of disruption caused by the rapid adoption of digital printing technologies. Failure to proactively embrace and integrate these digital advancements into the existing framework poses a clear and imminent threat. With the increasing demand for personalized and environmentally sustainable printing solutions, digital printing can outperform traditional flexo printing in these areas which may result in eroding our share in the market and may also impact our revenue growth.

24. Our operations may cause injury to people or property and therefore could subject us to significant disruptions in our business, legal and regulatory actions, costs, and liabilities which could materially and adversely affect our business, financial condition, and results of operations

Our operations necessitate that our employees and other workers work in potentially hazardous conditions. Our operations may result in mechanical and electrical failures as a result of improper component, accidents or malfunctions at our manufacturing units while manufacturing the flexographic printing plates. The operation of equipment and machinery can be hazardous, resulting in significant personal injury to our employees or other individuals, severe damage to and destruction of property, plant, and equipment, and contamination or damage to the environment. However, our company has not faced any such incident in the past years.

25. Our business involves usage of manpower and any unavailability of our employees or strikes, work stoppages, increased wage demands by workmen or changes in regulations governing labour may have an adverse impact on our cash flows and results of operations.

Our business involves usage of manpower and we are dependent on the availability of our permanent employees and the supply of a sufficient pool of labourers. Unavailability or shortage of such a pool of workmen or any strikes, work stoppages, increased wage demands by workmen or changes in regulations governing labour may have an adverse impact on our cash flows and results of operations. We may not be able to secure the required number of labourers required for the timely

execution of our projects for a variety of reasons including, but not limited to, possibility of disputes with labours strikes, less competitive rates. We are subject to laws and regulations relating to employee welfare and benefits such as minimum wage, working conditions, employee insurance, and other such employee benefits and any changes to existing labour legislations, including upward revision of wages required by such state governments to be paid to such contract labourers, limitations on the number of hours of work or provision of improved facilities, such as food or safety equipment, may adversely affect our business and results of our operations.

Further, there can be no assurance that disruptions in our business will not be experienced if there are strikes, work stoppages, disputes or other problems with sub-contractors or contract labourers deployed at our projects. This may adversely affect our business and cash flows and results of operations

26. Our raw-material procurement may be affected by change in the currency exchange fluctuations.

We use various type of raw material while manufacturing of flexographic plates such as Photopolymer Plates, Cross Fiber Tape, R Bag Cushion, Hangup Bar. We procure this raw material from various supplier situated in India. However, these raw materials may be imported by those suppliers from outside India. In case there is fluctuation in foreign currency the cost of raw material will increase to our supplier and consequently it will also affect us as we are end consumer of this raw material. It may lead to higher costs in INR terms, affecting the company's financial stability and pricing competitiveness.

27. Quality concerns and negative publicity, if any, would adversely affect the value of our brand, and our sales.

Our business is dependent on the trust our customers have in the quality of our products as well as on our ability to protect our brand value. Any negative publicity regarding our Company, brands or products, including those arising from a drop in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation, our brand value, our operations and our results from operations.

28. We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.

Our success heavily depends upon the continued services of our Key Managerial Personnel, along with support of our Promoters. We also depend significantly on our Key Managerial Personnel for executing our day-to-day activities. The loss of any of our Promoters and Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and Key Managerial Personnel, please refer to chapter —Our Management beginning on page 160.

29. If we are not successful in managing our growth, our profitability may decrease and result in adverse impact on our business, results of operations and financial condition.

A principal component of our strategy is to continuously grow by expanding the size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

30. Our inability to manage growth could disrupt our business and reduce profitability.

A principal component of our strategy is to continuously grow by expanding the capacity, size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

31. *The outbreak of COVID-19 or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

One significant risk factor related to COVID-19 is the disruption in supply chains. We heavily relies on a various suppliers for components, raw materials, and equipment. Due to the pandemic, many countries implemented lockdowns, travel bans, and restrictions on manufacturing activities. If for any reason the same situation arises in the upcoming areas, it may affect the production schedules of solar panel manufacturers, potentially leading to project delays or increased costs. Moreover, if certain components or raw materials are sourced from heavily affected regions, their production and distribution may be severely impacted, causing prolonged delays in fulfilling orders or even halting production altogether. The risk of disruption in supply chains highlights the importance for companies to diversify their supplier base geographically and establish contingency plans for alternative sources of essential components. However, the uncertainty and risk associated with COVID-19 cannot be completed ignored.

32. *We depend on our senior management team and a loss of any of our senior management may affect our ability to operate or grow our business.*

Our success depends to a large extent upon the continued services of our senior management team. Our senior management and executive officers are not bound by employment or non-competition agreements and we cannot assure you that we will be able to retain them or other executive officers. We could be affected by the loss of any of our senior management or other executive officers. The market for such qualified professionals is competitive and we may not continue to be successful in our efforts to attract and retain qualified people. Our success also depends, in part, on key client relationships forged by members of our senior management. If we were to lose these members of our senior management, we cannot assure you that we will be able to continue to maintain key client relationships or renew them. If we are unable to retain these members of our senior management, our business, results of operations and financial condition may be affected.

33. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company even after the Issue which will allow them to determine the outcome of matters submitted to shareholders for approval.*

Post this Issue, our Promoters and Promoter Group will collectively own 63.40% of our post issue equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over the Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

34. *Our Company has in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company's financial condition and results of operations.*

As on September 30, 2023, we have entered into related party transactions with our Promoters, Directors and Group Companies which are in compliance with applicable provisions of the Companies Act, 2013 and all other applicable laws. Whilst these related party transactions have been disclosed in our financial statements as per AS-18, and we believe that all such transactions have been conducted on an arms-length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. For further details kindly refer to the chapter titled 'Financial Statements' beginning on page 183 of this DRHP.

35. *Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.*

We are insured for a number of the risks associated with our business, such as insurance cover against loss or damage by fire and burglary. We believe we have got our assets and employees adequately insured; however, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, to cover all material losses.

To the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our business and results of operations could be adversely affected.

36. The average cost of acquisition of Equity Shares by our Promoters could be lower than the issue price.

Our Promoters' average cost of acquisition of Equity Shares in our Company is lower than the Issue Price of the shares proposed to be offered through this Draft Red Herring Prospectus. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company, please refer to page 22 of this Draft Red Herring Prospectus.

37. We have issued Equity Shares during the last one year at a price that may be below the Issue Price.

During the last one year we have issued Equity Shares at a price that is lower than the Issue Price as detailed in the following table:

At present none of our Promoter are engaged in any other business having object similar to the line of business of our Company. However, there can be no assurance that our Promoter or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

40. We have made dividend payment in the FY 22-23 and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.

In the past, we have made dividend payments to the shareholders of our Company. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors. For further details, please refer "Dividend Policy" on page 182 of this Draft Red Herring Prospectus.

41. There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.

42. *The Price of our Equity Shares may be volatile, or an active trading market may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. [•] is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. The fund requirement and deployment, as mentioned in the "Objects of the Issue" on page 77 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter "Objects of the Issue" is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter "Objects of the Issue" will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

ISSUE RELATED RISK

Though we shall make best of our efforts to comply with all applicable regulatory, financial and operational requirements for getting the equity shares proposed to be offered through this Draft Red Herring Prospectus listed on EMERGE platform of NSE in a time bound manner, yet on account of any change in applicable laws, economic conditions and/or any other reason/s beyond our control, the said shares may not get listed on the EMERGE platform of NSE Limited in a timely manner or at all, which may restrict your ability to dispose of the equity shares. However, even in such circumstances, the company shall stay fully committed to pay such interest and/or refund the full application amount, as may be required in accordance with the applicable regulatory directives.

45. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

46. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.*

The price of the Equity Shares on the Stock Exchange may fluctuate as a result of the factors, including

- a. Volatility in the Indian and global capital market;
- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors,
- d. Adverse media reports on Company or pertaining to our Industry;
- e. Changes in our estimates of performance or recommendations by financial analysts;
- f. Significant developments in India's economic and fiscal policies; and
- g. Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

47. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined by book building method. This price is based on numerous factors (For further information, please refer chapter titled "Basis for Issue Price" beginning on page 87 of this Draft Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues; Changes in revenue or earnings estimates or publication of research reports by analysts; Speculation in the press or investment community; General market conditions; and Domestic and international economic, legal and regulatory factors unrelated to our performance.

EXTERNAL RISK FACTORS

48. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

49. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs.1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

50. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include custom duties on imports of raw materials and components, Goods and Service. These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

51. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

52. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Red Herring Prospectus.*

While facts and other statistics in the Draft Red Herring Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled **“Industry Overview”** beginning on page 96 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

53. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

54. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

55. *The extent and reliability of Indian infrastructure could adversely affect our Company’s results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

56. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

57. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

58. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Russia, Ukraine, Indonesia, Madrid, London and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Detailed rationale for increase in working capital requirement during FY 21 to FY 23 and for increased estimated capital requirements for FY 24 and FY 25 (All the figures mentioned in the below paragraph are in thousands).

The working capital increased from ₹ (13,151.73) in 2021 to ₹77,717.49 in the year 2023. The increase in working capital is attributed to the following reasons:

- FY21 was impacted by COVID. To avoid market risks the business focused on reducing the credit extended to customers as well as reducing inventory levels. Inventory was also exceptionally impacted due to COVID induced supply chain global issues. Working capital was accordingly negative in FY21.
- As the pandemic has receded from FY21 to FY23, business has normalized and working capital requirements have increased. More so, as the topline has increased significantly from ₹4,75,769 in 2021 to ₹9,01,356 in 2023. This increase in sales volume requires a higher amount of working capital to support the larger scale of operations, including purchasing more materials and maintaining increased inventories.
- The cost of material consumed also experienced a significant increase, from ₹2,87,985 in 2021 to ₹5,11,782 in 2023. Higher material costs contribute to a higher working capital requirement. Lastly, there were also increases in wages and other expenses, further contributing to the overall working capital needs in 2022 and 2023.

In 2024 and 2025, the working capital is expected to increase due to expected increase in the total sales as the company is planning for the capex in the existing manufacturing units. Also, the company is planning for acquisitions from the issue proceeds. Higher sales volumes require increased working capital to manage larger inventories, finance higher account receivables, and support the expanded operations. Additionally, the cost of material consumed is projected to be increased in 2024 and 2025, reflecting the higher production requirements to meet the increased sales. These factors, along with other expenses such as wages, finance costs, contribute to the increased working capital requirement in 2024 and 2025.

2. Repayment/prepayment, in part or full, of certain of our borrowings:

Our Company has entered into various financial arrangements with banks, financial institutions and other entities. The loan facilities entered into by our Company include borrowing in the form of, inter alia, term loans and working capital facilities. For further details, including indicative terms and conditions, see "Financial Indebtedness" on page 305.

Our Company proposes to utilise an estimated amount of ₹ 11,00,00,000/- from the Net Proceeds towards repayment/prepayment, in part or full, of certain borrowings availed by our Company. The repayment/ prepayment will help reduce our outstanding indebtedness, debt servicing costs, assist us in maintaining a favourable debt-equity ratio and enable utilisation of funds from our internal accruals for further investment in business growth and expansion. Further, our Company shall pay the prepayment charges, if any, on the loans identified below, out of the portion of Net Proceeds available for repayment/prepayment, in part or full, of certain of our borrowings.

Given the nature of these borrowings and the terms of repayment/prepayment, the aggregate outstanding borrowing amounts may vary from time to time. Further, the amounts outstanding under these borrowings as well as the sanctioned limits are dependent on several factors and may vary with our business cycle with multiple intermediate repayments, drawdowns and enhancement of sanctioned limits. However, the aggregate amount to be utilised from the Net Proceeds towards repayment/prepayment of borrowings (including refinanced or additional borrowings availed, if any, or otherwise), in part or in full, would not exceed ₹ 11,00,00,000/-.

GLOBAL ECONOMIC OVERVIEW

GLOBAL ECONOMIC OUTLOOK IN FIVE CHARTS

Global economic activity is decelerating sharply as a result of synchronized monetary policy tightening to contain very high inflation, less favorable financial conditions, and disruptions from the Russian Federation’s invasion of Ukraine. According to the latest Global Economic Prospects report, global growth will slow from 2.9 percent in 2022 to 1.7 percent in 2023. The outlook has several downside risks, including the possibility of higher inflation, even tighter monetary policy, financial stress, and rising geopolitical tensions. To mitigate the impacts of recent negative shocks and promote a strong and inclusive recovery, policymakers need to prioritize reforms that support long-term growth prospects and bolster the resilience of vulnerable groups.

1. The global economy is perilously close to falling into recession

This year, the world economy is set to grow at the third weakest pace in nearly three decades, overshadowed only by the recessions caused by the pandemic and the global financial crisis. Growth has slowed to the extent that the global economy is perilously close to falling into recession—defined as a contraction in annual global per capita income. Major economies are undergoing a period of pronounced weakness, and the resulting spill overs are exacerbating other headwinds faced by emerging market and developing economies (EMDEs).

2. EMDEs are projected to experience subdued growth in 2023, with activity set to remain well below its pre-pandemic trend

In EMDEs, growth prospects have worsened materially, with the forecast for 2023 downgraded 0.8 percentage point to a subdued 3.4 percent. The downward revision results in large part from weaker external demand and tighter financing conditions. Downgrades to growth projections mean that EMDE activity is now expected to fall even further below its pre-pandemic trend over the forecast horizon. Moreover, per capita income growth is expected to be slowest where poverty is highest.

3. Headline inflation has started to abate but high core inflation in many countries has been unexpectedly persistent

Global inflation has been pushed higher by demand pressures, including from earlier policy support, and supply shocks, including disruptions to both global supply chains and the availability of key commodities. Inflationary pressures have begun to abate, reflecting softening demand and easing commodity prices, and inflation is rising in fewer countries. Although inflation is likely to gradually moderate through the year, high core inflation in many countries has been unexpectedly persistent.

4. Risks to the global outlook are tilted to the downside

The Global Economic Prospects report features model simulations to assess two downside scenarios for the global economy. In the first scenario, central banks tighten monetary policy more than expected in response to rising inflation expectations, resulting in global GDP growth falling to 1.3 percent in 2023. In the second scenario, major central banks’ policy rates are even more restrictive, and markedly tighter financial conditions lead to significant financing difficulties across EMDEs, leaving the world in recession.

5. Global cooperation and decisive national policies are needed to bolster investment and growth prospects

The overlapping negative shocks of the past three years have weighed on investment—which is set to experience a feeble recovery—and long-term growth prospects in EMDEs. Prioritizing structural reforms to stimulate investment, promote food security, and foster gender equality can help to reverse the impact of these negative shocks and buttress resilience of vulnerable populations. Global cooperation is also needed to mitigate the risk of global recession, debt distress in EMDEs, safeguard the global commodity trading system, and accelerate the clean energy transition.

Forces Shaping the Outlook

The global fight against inflation, Russia’s war in Ukraine, and a resurgence of COVID-19 in China weighed on global economic activity in 2022, and the first two factors will continue to do so in 2023.

In the fourth quarter of 2022, however, this uptick is estimated to have faded in most—though not all—major economies. US growth remains stronger than expected, with consumers continuing to spend from their stock of savings (the personal saving rate is at its lowest in more than 60 years, except for July 2005), unemployment near historic lows, and plentiful job opportunities. But elsewhere, high-frequency activity indicators (such as business and consumer sentiment, purchasing manager surveys, and mobility indicators) generally point to a slowdown.

COVID-19 deepens China’s slowdown.

Economic activity in China slowed in the fourth quarter amid multiple large COVID-19 outbreaks in Beijing and other densely populated localities. Renewed lockdowns accompanied the outbreaks until the relaxation of COVID-19 restrictions in November and December, which paved the way for a full reopening. Real estate investment continued to contract, and developer restructuring is proceeding slowly, amid the lingering property market crisis. Developers have yet to deliver on a large backlog of presold housing, and downward pressure is building on house prices (so far limited by home price floors). The authorities have responded with additional monetary and fiscal policy easing, new vaccination targets for the elderly, and steps to support the completion of unfinished real estate projects. However, consumer and business sentiment remained subdued in late 2022. China’s slowdown has reduced global trade growth and international commodity prices.

Monetary policy starts to bite.

Signs are apparent that monetary policy tightening is starting to cool demand and inflation, but the full impact is unlikely to be realized before 2024. Global headline inflation appears to have peaked in the third quarter of 2022 (Figure 1). Prices of fuel and nonfuel commodities have declined, lowering headline inflation, notably in the United States, the euro area, and Latin America. But underlying (core) inflation has not yet peaked in most economies and remains well above pre-pandemic levels. It has persisted amid second-round effects from earlier cost shocks and tight labor markets with robust wage growth as consumer demand has remained resilient. Medium-term inflation expectations generally remain anchored, but some gauges are up. These developments have caused central banks to raise rates faster than expected, especially in the United States and the euro area, and to signal that rates will stay elevated for longer. Core inflation is declining in some economies that have completed their tightening cycle—such as Brazil. Financial markets are displaying high sensitivity to inflation news, with equity markets rising following recent releases of lower inflation data in anticipation of interest rate cuts (Box 1), despite central banks’ communicating their resolve to tighten policy further. With the peak in US headline inflation and an acceleration in rate hikes by several non-US central banks, the dollar has weakened since September but remains significantly stronger than a year ago.

THE FORECAST BY IMF

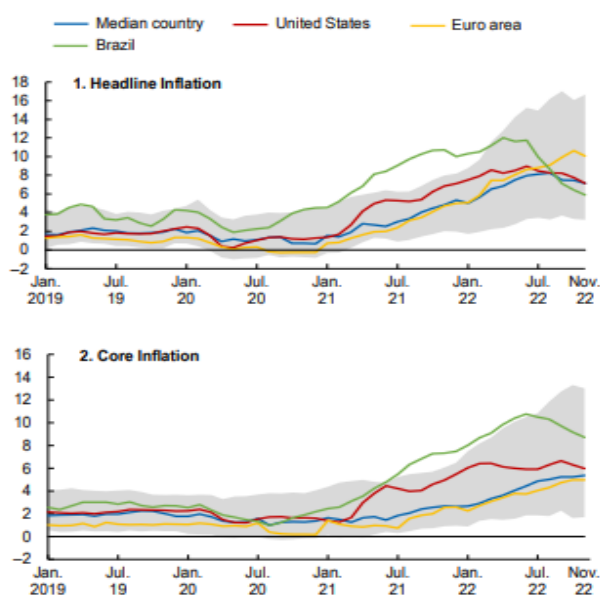

Global growth, estimated at 3.4 percent in 2022, is projected to fall to 2.9 percent in 2023 before rising to 3.1 percent in 2024 (Table 1). Compared with the October forecast, the estimate for 2022 and the forecast for 2023 are both higher by about 0.2 percentage point, reflecting positive surprises and greater-than-expected resilience in numerous economies. Negative growth in global GDP or global GDP per capita—which often happens when there is a global recession—is not expected. Nevertheless, global growth projected for 2023 and 2024 is below the historical (2000–19) annual average of 3.8 percent.

The forecast of low growth in 2023 reflects the rise in central bank rates to fight inflation—especially in advanced economies—as well as the war in Ukraine. The decline in growth in 2023 from 2022 is driven by advanced economies; in emerging market and developing economies, growth is estimated to have bottomed out in 2022. Growth is expected to pick up in China with the full reopening in 2023. The expected pickup in 2024 in both groups of economies reflects gradual recovery from the effects of the war in Ukraine and subsiding inflation. Following the path of global demand, world trade growth is expected to decline in 2023 to 2.4 percent, despite an easing of supply bottlenecks, before rising to 3.4 percent in 2024.

These forecasts are based on a number of assumptions, including on fuel and nonfuel commodity prices, which have generally been revised down since October, and on interest rates, which have been revised up. In 2023, oil prices are projected to fall by about 16 percent, while nonfuel commodity prices are expected to fall by, on average, 6.3 percent. Global interest rate assumptions are revised up, reflecting intensified actual and signaled policy tightening by major central banks since October. For advanced economies, growth is projected to decline sharply from 2.7 percent in 2022 to 1.2 percent in 2023 before rising to 1.4 percent in 2024, with a downward revision of 0.2 percentage point for 2024. About 90 percent of advanced economies are projected to see a decline in growth in 2023.

- In the United States, growth is projected to fall from 2.0 percent in 2022 to 1.4 percent in 2023 and 1.0 percent in 2024. With growth rebounding in the second half of 2024, growth in 2024 will be faster than in 2023 on a fourth-quarter-over-fourth-quarter basis, as in most advanced economies. There is a 0.4 percentage point upward revision for annual growth in 2023, reflecting carryover effects from domestic demand resilience in 2022, but a 0.2 percentage point downward revision of growth in 2024 due to the steeper path of Federal Reserve rate hikes, to a peak of about 5.1 percent in 2023.
- Growth in the euro area is projected to bottom out at 0.7 percent in 2023 before rising to 1.6 percent in 2024. The 0.2

(Percent, year over year)

Note: The figure shows the developments in headline and core inflation across 18 advanced economies and 17 emerging market and developing economies. Core inflation is the change in prices for goods and services, but excluding those for food and energy (or the closest available measure). For the euro area (and other European countries for which the data are available), energy, food, alcohol, and tobacco are excluded. The gray bands depict the 10th to 90th percentiles of inflation across economies.

percentage point upward revision to the forecast for 2023 reflects the effects of faster rate hikes by the European Central Bank and eroding real incomes, offset by the carryover from the 2022 outturn, lower wholesale energy prices, and additional announcements of fiscal purchasing power support in the form of energy price controls and cash transfers.

- Growth in the United Kingdom is projected to be –0.6 percent in 2023, a 0.9 percentage point downward revision from October, reflecting tighter fiscal and monetary policies and financial conditions and still-high energy retail prices weighing on household budgets.
- Growth in Japan is projected to rise to 1.8 percent in 2023, with continued monetary and fiscal policy support. High corporate profits from a depreciated yen and earlier delays in implementing previous projects will support business investment. In 2024, growth is expected to decline to 0.9 percent as the effects of past stimulus dissipate.
- For emerging market and developing economies, growth is projected to rise modestly, from 3.9 percent in 2022 to 4.0 percent in 2023 and 4.2 percent in 2024, with an upward revision of 0.3 percentage point for 2023 and a downward revision of 0.1 percentage point for 2024. About half of emerging market and developing economies have lower growth in 2023 than in 2022.
- Growth in emerging and developing Asia is expected to rise in 2023 and 2024 to 5.3 percent and 5.2 percent, respectively, after the deeper-than-expected slowdown in 2022 to 4.3 percent attributable to China’s economy. China’s real GDP slowdown in the fourth quarter of 2022 implies a 0.2 percentage point downgrade for 2022 growth to 3.0 percent—the first time in more than 40 years with China’s growth below the global average. Growth in China is projected to rise to 5.2 percent in 2023, reflecting rapidly improving mobility, and to fall to 4.5 percent in 2024 before settling at below 4 percent over the medium term amid declining business dynamism and slow progress on structural reforms. Growth in India is set to decline from 6.8 percent in 2022 to 6.1 percent in 2023 before picking up to 6.8 percent in 2024, with resilient domestic demand despite external headwinds. Growth in the ASEAN-5 countries (Indonesia, Malaysia, Philippines, Singapore, Thailand) is similarly projected to slow to 4.3 percent in 2023 and then pick up to 4.7 percent in 2024.
- Growth in emerging and developing Europe is projected to have bottomed out in 2022 at 0.7 percent and, since the October forecast, has been revised up for 2023 by 0.9 percentage point to 1.5 percent. This reflects a smaller economic contraction in Russia in 2022 (estimated at –2.2 percent compared with a predicted –3.4 percent) followed by modestly positive growth in 2023. At the current oil price cap level of the Group of Seven, Russian crude oil export volumes are not expected to be significantly affected, with Russian trade continuing to be redirected from sanctioning to non-sanctioning countries.
- In Latin America and the Caribbean, growth is projected to decline from 3.9 percent in 2022 to 1.8 percent in 2023, with an upward revision for 2023 of 0.1 percentage point since October. The forecast revision reflects upgrades of 0.2 percentage point for Brazil and 0.5 percentage point for Mexico due to unexpected domestic demand resilience, higher-than-expected growth in major trading partner economies, and in Brazil, greater-than-expected fiscal support. Growth in the region is projected to rise to 2.1 percent in 2024, although with a downward revision of 0.3 percentage point, reflecting tighter financial conditions, lower prices of exported commodities, and downward revisions to trading partner growth.
- Growth in the Middle East and Central Asia is projected to decline from 5.3 percent in 2022 to 3.2 percent in 2023, with a downward revision of 0.4 percentage point since October, mainly attributable to a steeper-than-expected growth slowdown in Saudi Arabia, from 8.7 percent in 2022 (which was stronger than expected by 1.1 percentage points) to 2.6 percent in 2023, with a negative revision of 1.1 percentage points. The downgrade for 2023 reflects mainly lower oil production in line with an agreement through OPEC+ (Organization of the Petroleum Exporting Countries, including Russia and other non-OPEC oil exporters), while non-oil growth is expected to remain robust.
- In sub-Saharan Africa, growth is projected to remain moderate at 3.8 percent in 2023 amid prolonged fallout from the COVID-19 pandemic, although with a modest upward revision since October, before picking up to 4.1 percent in 2024. The small upward revision for 2023 (0.1 percentage point) reflects Nigeria’s rising growth in 2023 due to measures to address insecurity issues in the oil sector. In South Africa, by contrast, after a COVID-19 reopening rebound in 2022, projected growth more than halves in 2023, to 1.2 percent, reflecting weaker external demand, power shortages, and structural constraints.

INDIAN ECONOMY

India is set to be the second-fastest growing economy in the G20 in FY 2022-23, despite decelerating global demand and the

tightening of monetary policy to manage inflationary pressures. GDP growth will slow to 5.7% in FY 2023-24, as exports and domestic demand growth moderate. Inflation will crimp private consumption but moderate at the end of the projection period, helping, along with improved global conditions, to boost growth to 6.9% in FY 2024-25, in line with the 20-year average (excluding the COVID-19 recession). After a spike in 2022, the current account deficit will narrow as import price pressures abate. High medium-term global uncertainty reinforces the importance of continued efforts to raise potential output growth and resilience. Macroeconomic stability should be pursued through monetary policy geared towards anchoring inflation expectations and fiscal policy oriented towards debt control and targeting of current and capital spending. Improvements in the business climate, when combined with financial deepening and skills development, can boost investment and infrastructure and create more and better jobs.

The strong recovery has slowed Economic growth has lost momentum over the summer, due to a combination of erratic rainfall, which impacted sowing activities, and falling purchasing power. Concerns over demand conditions are considerable in services and infrastructure sectors, while consumers have become cautious regarding non-essential spending due to higher prices for food and energy. Tighter financial market conditions are weighing on the demand for capital goods, a leading indicator for aggregate investment. Export growth remains well-oriented, especially for services, and the progressive entry into force of comprehensive trade agreements with major partners is helping to improve prospects. Nonetheless, the monthly energy and food import bill keeps rising and the current account deficit widened in the July-September quarter to 2.9% of GDP. Headline inflation remains above 6% (the central bank’s upper bound of the tolerance band), mostly due to the trend increase in the price of food (which in India accounts for a larger share of the consumer basket than in any other G20 country). Unemployment estimates suggest improving labour market conditions in both urban and rural areas, but there are few signs of a wage-inflation spiral.

Macroeconomic policies are turning restrictive

In line with the central bank's commitment to take calibrated action to bring headline inflation back within the 2-6% tolerance band and keep inflation expectations anchored, policy rates are expected to rise by 75bps, to reach 6.65% in February 2023 before the tightening cycle is paused. In fighting inflation, monetary policy is complemented by cuts in excise taxes and a series of measures taken by the government, such as the export bans on wheat, wheat flour, sugar and broken rice and a 20% export duty on some varieties of non-basmati rice. Such trade restrictions must be temporary, use transparent methodologies to determine their duration, and give due consideration to the effects on trading partners' food security.

Expanding infrastructure spending, such as on highways and railways, occupies a central position in the government strategy. These programmes are being successfully implemented, surmounting some technical obstacles at the state level. At the same time, prolonged targeted and non-targeted fiscal measures and rising interest rates weigh on the public debt. On current trends, tax collection will surpass the budgeted projections by the end of FY 2022-23, due to higher inflation and better compliance, thus reducing borrowing requirements. The projections assume fiscal tightening in the next biennium. There still remain considerable margins to improve efficiency, accountability, and transparency of public spending, devoting more resources to health and education and building fiscal space to enhance resilience.

The economy will not escape the global slowdown

After hitting 6.6% in FY 2022-23, GDP growth is expected to slow in coming quarters, to 5.7% in FY 2023-24, before reverting to around 7% in FY 2024-25. CPI inflation will remain above the central bank's upper limit target of 6% at least until early 2023 and then gradually recede as higher interest rates take effect. High inflation will slow household consumption and delay investment, as financing becomes more expensive, and exports will be affected by the economic slowdown in advanced countries and geopolitical tensions. Offsetting these forces, at least partially, some improvements can be expected as more contact-intensive services sectors normalise, including international tourism once borders are fully open and restrictions lifted.

Most risks to the projections are tilted to the downside and include a deterioration of banks' assets quality, despite enhanced provisioning and the establishment of a 'bad bank', as well as possible delays in fiscal consolidation and in concluding bilateral trade negotiations. Declining geopolitical uncertainty, on the other hand, would boost confidence and benefit all sectors, as would faster-than-expected conclusion of free-trade agreements with key partners and the incorporation therein of services.

Progress in financial inclusion and energy security can be further extended

India has recorded impressive progress in recent years in extending access to financial services to a larger portion of the

population, including disadvantaged socio-economic groups. Leveraging the country's competitive strength in ICT, the Unified Payments Interface (UPI) and other tools are easing the transition towards a cashless economy. Nonetheless, gaps and challenges in the usage of financial services are still considerable: in particular, roughly a third of bank accounts are inactive. In order to enhance energy security, the use of LED bulbs in private and public spaces can have sizeable effects (savings of more than 4% of electricity final consumption per year); important results have been achieved and further actions are needed to develop appropriate financial instruments (for example, the Treasury is expected to debut on the green bonds market with a forthcoming INR 160 billion issue), test new business models and strengthen institutional capacity.

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

It is the ideal technique for printing on the brown corrugated boxes used in shipping and storage businesses since it can print on a wide range of substrates and surfaces. Flexographic printing is useful when printing on rolls of material used for plastic and paper bags since it may be done on flexible, non-rigid materials. It is the ideal option for commercial converters who produce printed plastic and paper bags.

Global Market Outlook

The Flexographic Printing Market size is expected to grow from USD 190.28 billion in 2023 to USD 221.95 billion by 2028, at a CAGR of 3.13% during the forecast period (2023-2028).

The market for flexographic printing has gained significant attention in the packaging industry, where it is used for printing labels, cartons, and flexible plastics. The growth of industries such as food, beverage, and other packaging, is anticipated to aid the market for flexographic printing.

- Flexographic printing continues to be one of the fastest-growing print processes and is no longer reserved just for printing specialty items. The ability of flexography to print on a variety of substrates allows the process to be used for a wide range of printed products. Food packaging is an important market because of the ability of flexography to print on non-porous substrates.
- This ability makes it useful for printing on plastic bags, as well. The process is ideal for publishing packaging, wallpaper, calendars, books, laminated tetra paks, and food packaging. The material that receives the print, known as the substrate, can be paper, card, polymers, textiles, and even metalized films (polymers coated with a thin layer of metal).
- The increasing demand for a printing machine that can be used for a variety of substrates and other products with high versatility and ease of operation, particularly for rather long printing runs on all extensible plastic film, is expected to fuel the adoption of the flexographic printing machines, as flexographic printing machines can operate at high speeds and the have applicability on a different surface and water-based inks, as well as oil-based inks.
- Flexographic printing is one of the fastest-growing print processes and is no longer reserved for printing specialty items. containers, beverage containers, and disposable cups and containers.

- To their lightweight nature, folding cartons are witnessing an increased customer demand globally. Quality assurance is essential for the physical carton and the final package print. Printers are looking at multi-site operations to address this growth and meet demand. In such a multi-site operation, a critical challenge comes into play: print consistency.
- The rising consumer demand for packaged products due to changing eating habits and lifestyles may significantly impact the market for flexographic printing of folding cartons in food packaging. Due to high barrier properties, shelf life, and consumer safety, a rise in per capita disposable income and a growing population will aid in product demand. Printing is used on a variety of packaging materials. Direct printing is possible on plastics, paper, board, and cork.
- Flexographic printing has been used to print folding cartons for many years, but it has only been in the last few years that the industry has begun to use central impression presses for this application. Pizza cartons are an example of the type of work that was originally relegated to the flexoprocess. The ability to print multi-colors in close registers on the wide web, on the other hand, has made the process more appealing to other point-of-purchase folding carton applications.

Flexographic Printing Industry Segmentation

Flexographic printing is a printing process that utilizes flexible plates formed of rubber or plastic. Each plate, with its lightly raised image, is wheeled on a cylinder and spread with fast-drying ink. The substance to be printed on, or the substrate, is passed between the print plate and the impression roller, which uses pressure to keep the substrate against the plate. The study considers the revenue generated from selling various types of flexographic printing inks and equipment provided by vendors operating in the market.

The Flexographic Printing Market is segmented by Application (Corrugated Boxes, Folding Carton, Flexible Packaging, Labels, Print Media) and Geography (North America, Europe, Asia-Pacific, Latin America, Middle East and Africa). The market sizes and forecasts are provided in terms of value (USD million) for all the above segments.

Flexo printing is becoming more and more attractive to brands all over the world. Flexographic printing is an economical alternative to digital printing for medium-to-long print runs, simple designs, and color combinations. It uses flexible plates to transfer the ink onto a substrate and can achieve quick line speeds. Hence, they can be used to print large orders in short lead times. The production speed of flexographic label printers is high, and the inks cost less than digital label printers.

Flexographic printing also allows operators to alter labels without any additional expenses. Such benefits of flexographic printing have increased its usage in producing labels for applications such as packed food products, apparels, toiletries, health information labels, kitchenware, chemical labels, and others.

The Future of Flexographic Printing to 2023 tracks and quantifies these trends, from a global market value of \$35.76 billion in 2018 to \$40.11 billion in 2023, an annual increase of 2.6%.

Perceived to be a high-growth printing process; flexography is examined in depth to provide an understanding of opportunities and threats through 2020. A key focus area is flexible packaging (corrugated is excluded) for the food, beverage, medical, bag, industrial and other.

The flexographic printing market is one of the fastest growing print segments in North America. The market's need for flexible packaging is driving this growth. Flexible packaging appeals to consumers' preferences for convenience and portioning. Flexography is well positioned for growth, with trends in both product run length and substrate usage favoring flexo printing inks over gravure and litho. There have been many advances in flexographic printing over the past few years to improve its print quality and the types of substrates that can be printed.

The market of global flexographic printing technology is anticipated to be driven by increase in the demand for low cost packaging solutions primarily for food & beverage industry. Moreover, technological advancements in flexographic printing technology such as high quality digital flexographic plates and printing software optimization is mainly driving the consumer preference towards flexographic printing solutions. Besides this, flexographic printing process offers complete product at the end of the process as it includes varnishing, die cutting, lamination, embossing, foiling, etc. which has significantly impacted the growth of the market and is anticipated to be the major growth driver during the forecast period.

The major players identified across the value chain of global Flexographic Printing Technology market include BOBST, SOMA Engineering, Uteco Group, Focus Label Machinery, Consolidated Label Co, Flint Group, Flexographic Printing Plate Co., Inc., de Elliotte Co Inc., Ligum, 3M and others. The companies are emphasizing on research & development and new product development in order to maintain the competitive advantage in global flexographic printing technology market during the forecast period.

In order to meet the increasing demand of printing seamless motives and high resistance to solvent, companies all over the world are focusing towards the development of sleeves types and rollers in order to expand their product portfolio and increase global footprint. The companies are also focusing on different strategies in order to maintain the market share in the global flexographic printing technology market.

Indian Printing Industry

The Indian printing industry is increasingly being driven by growth in packaging and labels. The print media also continues to grow at a healthy annual pace of four percent. As its growth trends continue to be well over the world averages, in print volume terms, India is set to become the fifth largest market by 2018 moving up five notches from its present tenth slot. Therein lays a great opportunity for the Indian & International print suppliers.

The global printing industry is forecast to reach \$980 billion by 2018. Global printing markets are changing, many publishing products have electronic versions replacing previously printed volumes. E-books, on-line newspaper and magazines are taking significant sections of their respective markets, while directories, catalogues and brochures have electronic alternatives, more transactions are electronic reducing demand for currency and cheques and advertising spend is moving into new areas including on-line. These factors, alongside the continued growth of social networking, result in declining volumes of many print products, but not packaging and labels where demand is growing.

The greatest growth opportunities for print products are concentrated around revenues from print packaging and print publishing (specifically newspaper printing), with the growth potential in package printing, which is expected to increase 7.8% between 2012 and 2017.

The market size of the package printing sector is expected to increase from INR 53,374 crore in 2012 to 77,714 crore in 2017, and will make up 43% of total print product sales in 2017.

Within the package printing sector, label and tags printing is expected to grow the most quickly of any product, at a rate of 11%, a result of increased demand from the emerging middle class in the region and India itself.

Insert printing and corrugated package printing are also forecast to have high growth rates, again reflecting the expanding segment of the population in the region capable of, and interested in, greater consumer consumption. This factor also accounts for the rapid growth of magazine printing, which is expected to grow 8.4% between 2012 and 2017.

The publishing printing market size is supposed to grow from INR 20,859 crore in 2012 to 27,607 crore in 2017 with population increase, rising literacy rates and a growing economy.

Business Opportunities in Printing Sector

Flexography is a modern version of letterpress printing. This traditional method of printing can be used on almost any type of substrate, including corrugated cardboard, cellophane, plastic, label stock, fabric, and metallic film. The flexographic printing process uses quick-drying, semiliquid inks. In this age of digital printing, flexography holds its own in the areas of large orders

and long print runs, particularly of packaging products and labeling.

Flexographic printing uses flexible photopolymer printing plates wrapped around rotating cylinders on a web press. The inked plates have a slightly raised image and rotate at high speeds to transfer the image to the substrate. Flexography inks can print on many types of absorbent and nonabsorbent materials. Flexography is well-suited to print continuous patterns, such as for gift wrap and wallpaper.

Flexographic printing is a popular method for printing large orders of custom labels at rapid speeds by transferring ink onto the paper or film material using flexible printing plates mounted on fast-rotating cylinders. Flexographic printing plates allow customization options that aren't possible with some other types of presses. A variety of products can be printed on flexographic presses like pressure-sensitive labels, shrink sleeve labels, flexible packets, multi-ply labels, double-sided printed labels, and more.

Flexographic printing, or flexography, is a type of printing process that uses a flexible relief plate. This type of printing is mostly used for non-porous materials like food service paper, plastic, foil, brown paper, and packaging materials. Flexographic printing is unique because it adapts well to different materials and can use a wider range of inks, like water based rather than oil based inks. Because the type of printing holds up and is adaptable, it is used for flexible plastics, retail bags, and wallpaper and beverage cartons.

In addition, flexographic printing usually uses low viscosity inks to allow faster drying time and speedier production for lower costs.

Flexographic printing is used widely for the best printing of bold designs and extremely attractive effects can be achieved using 3 or 45 colors. Printing also depends on the printing inks properties. It is used widely for printing on paper, laminated Aluminium Foil, Cellophane Film, Polypropylene, and Polyethylene.

Here are some of the most common and important uses of flexographic printing:

Brown Corrugated Boxes

Flexographic printing's ability to print on a wide variety of substrates and surfaces make it an ideal method for printing on brown corrugated boxes used in shipping and storage businesses.

Flexible Packaging

The ability to print on flexible, non-rigid materials makes flexographic printing useful when printing on rolls of material used for plastic and paper bags. Flexographic printing is an ideal choice for industrial converters that make printed plastic and paper bags.

Food Packaging

Flexographic printing is quick drying and able to use non-toxic inks. These factors make flexographic printing desirable in the printing of food packaging. It can basically be used on packaging like milk cartons, beverage containers, food containers, as well as disposable cups and containers.

Medical Packaging

Since flexography is food safe with the right ink, it can also be used to print packaging for medicines and other medical supplies. Flexographic printing can be used on foil wrappers, hygienic bags, plastic, and cardboard packaging.

Newspaper and Other Print Media

Even with the prevalence of e-books and the internet, there is still a market for newspapers, magazines, and books. The production of flyers, posters, and newspaper inserts also greatly benefit from flexographic printing's ability to quickly print large print jobs.

These are not all the applications that flexographic printing can be used on. It can be also used to print envelopes, containers, and even wallpaper. Flexographic printing's capabilities are flexible enough that they can be used on other surfaces. Advances

are still being made in the manufacture of ink and plates to improve print quality. There is even research being done on the possibility of using flexographic printing to print electronic circuits and solar cells – an exciting future application of the technology.

OUR PRODUCT – FLEXOGRAPHIC PLATE

A flexographic printing plate is a special surface that is used to print images on the substrate such as paper, plastics, cans or similar variety of materials. These flexo plates are small sheets of nylon polymer that hold the design and can be used to create multiple copies of the artwork. These are available in various sizes and thicknesses, so client can choose one that works best for their project or as per their requirements.

These flexographic printing plates are made up of a rigid surface that can be coated with ink and coated with images that can be transferred from the plate to the substrate i.e plastic, paper, can etc... The plates react to the pressure of being pressed against the substrate by creating a negative image.

How it works in flexographic printing?

A flexographic printing made by creating a positive mirrored master of the required image as a 3D relief in a rubber or polymer material. The ink is transferred from the ink roll which is partially immersed in the ink tank. Then it transfers to the anilox or ceramic roll (or meter roll) whose texture holds a specific amount of ink since it is covered with thousands of small wells or cups that enable it to meter ink to the printing plate in a uniform thickness evenly and quickly (the number of cells per linear inch can vary according to the type of print job and the quality required). The doctor blade removes excess ink from the anilox roller before inking the printing plate. The substrate is finally sandwiched between the plate and the impression cylinder to transfer the image. The sheet is then fed through a dryer, which allows the inks to dry before the surface is touched again.

The USP of our flexographic plates are:

- ✓ Print smoother, higher-density solids without laying down more ink.
- ✓ Print with higher line screens.
- ✓ Print high-density white in a single pass.
- ✓ Reduce the number of colors per job without sacrificing print quality.
- ✓ Reduce press downtime and run presses faster.
- ✓ Reduce makeready waste and ink consumption.

Different types of Flexographic Printing Plates:

- Digital Flexo Printing Plates
- Conventional Flexo Printing Plates
- Letter Press Plates
- Metal Back Plates
- Coating Plates

1. Digital Flexo Printing Plates:

Digital flexo plates are flexographic plates which exposed using direct 'computer-to-plate' technology (CTP). In this case, the unexposed film negative is supplied pre-laminated onto the photopolymer sheet, so that both layers can be exposed in the same piece of equipment.

A laser is directed by a computer to first expose the negative layer, after which the photopolymer is then exposed to the UVA light source. This exposure technique produces a superior quality plate, compared with the traditional method. The exposed plate is then processed, using the washout method described on page no. 119 of this Draft Red Herring Prospectus.

Digital flexo plates are available with us in different specifications and grades as per the requirements of the clients. Photopolymer letterpress plate is a part of printing equipments products. It offers a comprehensive range of high sensitivity thermal and CTP plates.

Benefits of Digital Flexo Printing Plates:

1. An astounding tonal range with extended color gamut and improved solid densities.
2. Smooth vignettes – print to zero.
3. Reduction of correction and retouching of CT images.
4. Simplified conversion of printing processes.

2. Conventional Flexo Printing Plates:

Conventional Flexo Printing Plates are typically made of rubber or photopolymer material. The required image is first exposed onto a film negative, using a laser imagesetter. It is then placed directly onto the surface of the unexposed plate material and is held in place via a vacuum cover. The plate and film are then exposed to UV light in order to fix the image into the polymer material.

Conventional Flexo Printing Plate are designed with raised relief images or patterns that transfer ink onto substrates, such as paper, cardboard, plastic, or metallic materials. These plates are mounted on a printing cylinder or plate cylinder, and as the press runs, they come into contact with the substrate, transferring ink to create the desired image or text.

3. Letter Press Plates:

Letterpress printing is a traditional relief printing method where inked type or images are pressed onto paper or other substrates. Letterpress plates are typically made of metal, often photopolymer, magnesium, or copper, and they carry the raised or relief image that will be printed. These plates can be custom-made with the specific text or design to be printed. The letterpress plate is inked, and then paper is pressed against it to transfer the ink, creating a tactile and visually appealing printed result. This method is known for its crisp and high-quality impressions, making it popular for various applications, including wedding invitations and fine art printing.

4. Flexographic Coating Plates:

Flexographic coating plates are specialized plates used in the flexographic printing process to apply coatings and finishes to printed materials. Flexographic coating plates are typically made from flexible materials like rubber or photopolymer, just like regular flexo printing plates. However, they are specifically designed to carry the coating or finishing material instead of ink. These plates have raised areas that correspond to the areas where the coating will be applied on the substrate.

The flexo coating plate is mounted on the plate cylinder of the flexographic printing press. The substrate (e.g., paper, film, or packaging material) passes through the press. As the substrate contacts the coating plate, the coating material is transferred from the plate onto the substrate, creating a smooth, even coating or finish.

Flexographic coating plates are essential for adding protective or decorative finishes to printed materials, enhancing their appearance and durability. These finishes can provide qualities such as gloss, matte, or special effects, making them crucial in industries like label printing, packaging, and commercial printing where aesthetics and functionality are important.

5. Metal Backed Printing Plates

Metal back plates, also known as metal-backed printing plates, are a type of printing plate used in various printing processes. These plates have a metal backing layer, usually aluminum, which provides stability and support to the printing plate's surface.

In flexographic printing, metal-backed plates are used to apply ink or coatings to various substrates, including packaging materials and labels. These plates are made of rubber or photopolymer material mounted on a rigid metal backing. The raised image areas on the plate receive ink and transfer it to the substrate as it passes through the press.

The metal backing in these plates provides stability and ensures consistent and precise printing. It helps maintain the integrity of the printing surface, especially during high-speed printing processes. Metal back plates are known for their durability and the ability to produce high-quality prints over extended print runs.

These plates are essential components in commercial printing and packaging industries, where print quality, consistency, and longevity are crucial.

CTP (COMPUTER TO PLATE) PLATE MAKING PROCESS FOLLOWED BY OUR COMPANY:

The computer-to-plate (CTP) process for flexographic printing plates involves using digital technology to directly create printing plates without the need for film or manual plate-making processes. Here are the steps for CTP flexographic plate making:

Sr No.	Particular	Description
1.	<p>Pre-Press</p> 	<p>At Creative Graphics, we offer comprehensive pre-press services for flexographic printing. Our In-house artwork preparation team cater the need of customer requirement. Our dedicated team of designers specializes in crafting custom designs to meet client requirement. We utilize a range of industry-standard software tools, such as</p> <ul style="list-style-type: none"> ✓ Adobe Illustrator, ✓ Esko Merger, ✓ CorelDRAW, ✓ Imaging Engine, ✓ Kodak, <p>to ensure that the design is prepared as per the client requirement.</p>
2.	<p>Plate Imaging</p> 	<p>In our plate production procedure, we utilize the cutting-edge</p> <ul style="list-style-type: none"> ✓ ESKO CDI CRYSTAL 5080 ✓ ESKO CDI SPARK 5080 ✓ KODAK FLEXCEL NX 4260 <p>CTP flexographic plate imager to expose the plate material to UV - A light. This machine employs advanced laser technology to precisely engrave images on the plate material, much like an imagesetter in offset printing.</p>

3. Plate Exposure

Following image engraving, the plate undergoes exposure in the DuPont Digiflow 3000 ETL machine, where UV A light hardens the engraved or imaged areas of all the flexo plates and metal back plates. This process selectively hardens the plate sections corresponding to the design while keeping other areas soft.

4. Washout:

After exposure, the plate goes through the

- ✓ DuPont 3000 Processor,
- ✓ DuPont Washer 3000P-1
- ✓ Innovative Water Washer 3648
- ✓ SBR 600W Water Washer

which washes out the unexposed portions using a solvent and chemical solution called Cylosol. This process removes the soft, unexposed areas and preparing the photopolymer plate for the drying phase.

5. Development:

Following washing, the plate is exposed to the Vinord EVO DLF 3000, equipped with a Hot Air Blower to evaporate the chemicals used during washout. During the thermal development plates are exposed with warm air of approx. 60 degrees Celsius.

6. Post Exposure:

After Thermal Development the plates are exposed to UV-A and UV-C light again to complete photo curing in a combi processor and to eliminate the tackiness of the plate surface.

7.	Finished Plates (Quality Check): 	<p>After manufacturing of the plates, our technocrats carefully check the quality of each plate, whether the plate is manufactured as per the requirement of the clients or not.</p>

The maintenance of Books of Accounts and relevant supporting documents and registers are mandatory under the Act.

THE GOODS AND SERVICES TAX ACT, 2017:

Goods and Services Tax (GST) is considered to be the biggest tax reform in India since independence. It will help realise the goal of “One Nation-One Tax-One Market.” GST is expected to benefit all the stakeholders – industry, government and consumer. Goods and Services Tax (GST) is an indirect tax throughout India and was introduced as The Constitution (One Hundred and Twenty Second Amendment) Act 2017, following the passage of Constitution 122nd Amendment Bill. The GST is governed by GST Council and its Chairman is Union Finance Minister of India –Arun Jaitley. This Act has been made applicable with effect from July 1, 2017. With the introduction of GST all central, state level taxes and levies on all goods and services have been subsumed within an integrated tax having two components – central GST and a state GST. Thus, there will be a comprehensive and continuous mechanism of tax credits. The Central government passed four sets of GST Acts in the Budget session this year. These were Central GST Act, 2017; Integrated GST Act, 2017; Union Territory GST Act, 2017 and GST (Compensation to States) Act, 2017. The Acts were approved by the Parliament after they were introduced as the part of the Money Bill. Following the passage of GST Acts, the GST council has decided 4 tax rate slabs viz., 5%, 12%, 18% and 28% on supply of various goods and services. India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single State will be levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that State. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax; therefore, taxes are paid to the State where the goods or services are consumed and not the State in which they were produced. Under the Goods and Services Tax Act, 2017, our Company has acquired “**GST Certificate**”, for further details kindly refer to the Section X “*Legal and Other Information*”, page no. 306 of this DRHP.

COMPETITION ACT, 2002:

The Competition Act, 2002 “prohibits anti-competitive agreements, abuse of dominant positions by enterprises and regulates “combinations” in India. The Competition Act also established the Competition Commission of India (the “CCI”) as the authority mandated to implement the Competition Act. The provisions of the Competition Act relating to combinations were notified recently on March 4, 2011 and came into effect on June 1, 2011. Combinations which are likely to cause an appreciable adverse effect on competition in a relevant market in India are void under the Competition Act. A combination is defined under Section 5 of the Competition Act as an acquisition, merger or amalgamation of enterprise(s) that meets certain asset or turnover thresholds. There are also different thresholds for those categorized as Individuals and Group. The CCI may enquire into all combinations, even if taking place outside India, or between parties outside India, if such combination is Likely to have an appreciable adverse effect on competition in India. Effective June 1, 2011, all combinations have to be notified to the CCI within 30 days of the execution of any agreement or other document for any acquisition of assets, shares, voting rights or control of an enterprise under Section 5(a) and (b) of the Competition Act (including any binding document conveying an agreement or decision to acquire control, shares, voting rights or assets of an enterprise); or the board of directors of a company (or an equivalent authority in case of other entities) approving a proposal for a merger or amalgamation under Section 5(c) of the Competition Act. INDIAN CONTRACT ACT, 1872:

Indian Contract Act codifies the way we enter into a contract, execute a contract, and implement provisions of a contract and effects of breach of a contract. The Act consists of limiting factors subject to which contract may be entered into, executed and breach enforced as amended from time to time. It determines the circumstances in which promise made by the parties to a contract shall be legally binding on them. Each contract creates some right and duties upon the contracting parties. Indian contract deals with the enforcement of these rights and duties upon the parties. The Indian Contract Act also lays down provisions of indemnity, guarantee, bailment and agency. Provisions relating to sale of goods and partnership which were originally in the Act are now subject matter of separate enactments viz., the Sale of Goods Act and the Indian Partnership Act. The objective of the Contract Act is to ensure that the rights and obligations arising out of a contract are honored and that legal remedies are made available to those who are affected.

NEGOTIABLE INSTRUMENTS ACT, 1881:

In India, cheques are governed by the Negotiable Instruments Act, 1881, which is largely a codification of the English Law on the subject. The Act provides effective legal provision to restrain people from issuing cheques without having sufficient funds in their account or any stringent provision to punish them in the event of such cheque not being honored by their bankers and returned unpaid. Section 138 of the Act, creates statutory offence in the matter of dishonour of cheques on the ground of insufficiency of funds in the account maintained by a person with the banker which is punishable with imprisonment for a term which may extend to two years, or with fine which may extend to twice the amount of the cheque, or with both.

THE REGISTRATION ACT, 1908 (“REGISTRATION ACT”):

The Registration Act was passed to consolidate the enactments relating to the registration of documents. The main purpose for which the Registration Act was designed was to ensure information about all deals concerning land so that correct land records could be maintained. The Registration Act is used for proper recording of transactions relating to other immovable property also. The Registration Act provides for registration of other documents also, which can give these documents more authenticity. Registering authorities have been provided in all the districts for this purpose.

INDIAN STAMP ACT, 1899 (THE “STAMP ACT”):

Under the Indian Stamp Act, 1899 (the “Stamp Act”) stamp duty is payable on instruments evidencing a transfer or creation or extinguishment of any right, title or interest in immovable property. Stamp duty must be paid on all instruments specified under the Stamp Act at the rates specified in the schedules to the Stamp Act. The applicable rates for stamp duty on instruments chargeable with duty vary from state to state. Instruments chargeable to duty under the Stamp Act, which are not duly stamped are incapable of being admitted in court as evidence of the transaction contained therein and it also provides for impounding of instruments that are not sufficiently stamped or not stamped at all.

TRANSFER OF PROPERTY ACT, 1882 (“TP ACT”):

THE SPECIFIC RELIEF ACT, 1963:

The Specific Relief Act, 1963 is complimentary to the provisions of the Contract Act and the Transfer of Property Act, as the Act applies both to movable property and immovable property. The Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. “Specific performance” means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

Copyright registration may expedite infringement proceedings and reduce delay caused due to evidentiary considerations. Once registered, the copyright protection of a work lasts for sixty (60) years. The remedies available in the event of infringement of a copyright under the Copyright Act include civil proceedings for damages, account of profits, injunction and the delivery of the infringing copies to the copyright owner.

2.01 Property, plant and equipment

All items of property, plant and equipment are stated at historical cost less accumulated depreciation and accumulated impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Cost includes its purchase price including non-refundable taxes and duties, directly attributable costs of bringing the asset to its present location and condition.

Subsequent costs are included in the asset's carrying amount or Recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably.

The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to statement of profit or loss during the reporting period in which they are incurred.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

The residual values and useful lives of property, plant and equipment are reviewed at each financial year end and changes, if any, are accounted in the line with revisions to accounting estimates.

Depreciation

Depreciation on property, plant and equipment is provided on straight line method, which is in line with the estimated useful life as specified in Schedule II of the Companies Act, 2013.

Depreciation commences when the assets are ready for their intended use. The assets residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Gains and losses on disposals are determined by comparing net disposal proceeds with carrying amount. These are included in the statement of profit and loss.

The estimated use full lives are as follows :

Assets	Use full life (years)
Office equipment	10
Plant and Machinery	15
Building	30
Furnitures and Fixtures	10
Electric Installation	15
Computers	6
Vehicles	8
Land	-

2.02 Impairment of property, plant and equipment

Consideration is given at each balance sheet date to determine whether there is any indication of impairment of the carrying amount of the group ' each class of the property, plant and equipment. If any indication exists, an asset's recoverable amount is estimated. An impairment loss is recognized whenever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value based on an appropriate discount factor.

2.03 Current versus non-current classification

The group presents assets and liabilities in the balance sheet based on current/non-current classification. An asset is treated as current when it is:

- "▶ Expected to be realised or intended to be sold or consumed in normal operating cycle"
- "▶ Held primarily for the purpose of trading"
- "▶ Expected to be realised within twelve months after the reporting period, or"
- "▶ Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period "

All other assets are classified as non-current.

A liability is current when:

- "▶ It is expected to be settled in normal operating cycle"
- "▶ It is held primarily for the purpose of trading"

- "▶ It is due to be settled within twelve months after the reporting period, or "
- "▶ There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period"

The group classifies all other liabilities as non-current.

"Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The group has identified twelve months as its operating cycle."

2.04 Fair value measurement

The group measures financial instruments at fair value at each balance sheet date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- "▶ In the principal market for the asset or liability, or"
- "▶ In the absence of a principal market, in the most advantageous market for the asset or liability"

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- "▶ Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities "
- "▶ Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable"
- "▶ Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable"

For financial assets and liabilities maturing within one year from the balance sheet date and which are not carried at fair value, the carrying amount approximates fair value to due to short term maturity of these instruments.

The group recognises the transfer between the levels of fair value hierarchy at the end of the reporting period during which the changes has occurred.

"For the purpose of fair value disclosures, the group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summaries accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

- ▶ Quantitative disclosures of fair value measurement hierarchy (Note 31)
- ▶ Financial instruments (including those carried at amortised cost) (Note 31)"

2.05 Revenue from contract with customers

Revenue is recognised at an amount that reflects the consideration to which the group expects to be entitled in exchange for transferring services to a customer. The group identifies the performance obligations in its contracts with customers and recognises revenue as and when the performance obligations are satisfied.

Revenue from inter-group arrangement is recognised based on transaction price which is at arm's length based on transfer pricing arrangement.

Revenue is measured based on the transaction price, which is the consideration, adjusted for volume discounts, price concessions and incentives, if any, as specified in the contract with the customer. Revenue also excludes taxes collected from customers.

Sale of products :

Revenue from sale of goods is recognised, net of returns and trade discounts, deductions claimed and / or allowed on account of price difference, quantity discount and claims for shortages etc., if any, on transfer of significant risks and rewards of ownership to the buyer, which generally coincides with the delivery of goods. Sales excludes Goods & Services Tax (GST). When there is uncertainty about the ultimate collectability, the revenue recognition is postponed until such uncertainty is resolved.

Other income:

Revenue in respect of overdue interest, insurance claims, etc. is recognised to the extent the group is reasonably certain of its ultimate realisation.

Interest income:

Interest income is accounted on receipt basis. Dividend income is accounted for when the right to receive is established. Interest from customers on delayed payments are recognised when there is a certainty of realisation.

Export Incentive / Duty drawback :

Export incentives are recognised when there is reasonable assurance that the group will comply with the conditions and the incentive will be received.

2.06 Inventories

"Inventories are valued at the lower of cost and net realisable value.

Costs incurred in bringing each product to its present location and condition are accounted for as follows:

- ▶ Raw materials: Raw Materials and Packing Materials are valued at cost determined on Weighted Average method as the group believes that it will not sell the products at lower of the cost it incurs to manufacture it.
- ▶ Work in Progress: Work-in-process is valued at estimated cost.
- ▶ Finished goods: At Lower of Cost or Net Realisable Value. Cost includes Direct Material, Direct Labour and other Direct Costs.

Cost of inventories comprises of purchase price, cost of conversion and other costs including manufacturing overheads appropriated through the system, net of recoverable taxes incurred in bringing them to the point of sale \ consumption.

Initial cost of inventories includes the transfer of gains and losses on qualifying cash flow hedges, recognised in OCI, in respect of the purchases of raw materials.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale."

2.07 Taxes

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities in accordance with the Income Tax Act 1961. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis.

Deferred Tax

Deferred tax is recognised using balance sheet approach at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purpose at the reporting date.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured using the tax rates that are expected to apply in a year when asset is realised or the liability is expected to be settled based on the tax rates and tax laws that have been enacted or substantively enacted by the reporting date.

Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off assets against liabilities representing current tax where the deferred tax assets and deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

Current and deferred tax for the year

Current and deferred tax are recognised in the statement of profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.08 Foreign Currency translation

Functional and Presentation currency

Items included in the financial statements of the group are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The Financial statements are presented in Indian rupee (INR), which is functional and presentation currency of the Company.

Transaction and balances

Transactions in foreign currencies are initially recognised in the financial statements using exchange rates prevailing on the date of transaction. Monetary assets and liabilities denominated in foreign currencies are translated to the functional currency at the exchange rates prevailing at the reporting date and foreign exchange gain or loss are recognised in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions.

2.09 Provisions and Contingent Liabilities

"Provisions:

Provisions are recognised when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance sheet date. "

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent Liabilities:

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the group or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made. The group does not recognise a contingent liability but discloses its existence in the financial statements.

2.10 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assetsInitial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. With the exception of trade receivables that do not contain a significant financing component, the group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are attributable to the acquisition of financial asset. Trade receivables that do not contain a significant financing component are measured at the transaction price determined under Ind AS 115. Refer to the accounting policies in section 2.4 for Revenue from contracts with customers.

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows while financial assets classified and measured at fair value through OCI are held within a business model with the objective of both holding to collect contractual cash flows and selling.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the group commits to purchase or sell the asset.

2.11 Financial Instruments continued

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in following categories:

- "▶ Financial assets at amortised cost"
- "▶ Financial assets at fair value through profit or loss"
- "▶ Financial assets at fair value through other comprehensive income (FVTOCI) with recycling of cumulative gains and losses "
- "▶ Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition "

A 'financial asset' is measured at amortised cost if both the following conditions are met:

- "a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and"
- b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. The Company's financial assets at amortised cost includes loans and other financial assets.

A 'financial asset' is measured at FVOCI if both the following conditions are met:

- "a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and"
- "b) The asset's contractual cash flows represent SPPI."

"Upon initial recognition, the group can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under Ind AS 32 Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument-by-instrument basis. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS103 applies are classified as at FVTPL.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognised as other income in the statement of profit and loss when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment. "

Financial assets at fair value through profit or loss are carried in the balance sheet at fair value with net changes in fair value recognised in the statement of profit and loss. This category includes investments in mutual funds. Dividends on such investments are recognised in the statement of profit and loss when the right of payment has been established.

Derecognition

"A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from a Company's balance sheet) when:

- The rights to receive cash flows from the asset have expired, or
- The group has transferred its rights to receive cash flows from the asset and either (a) the group has transferred substantially all the risks and rewards of the asset, or (b) the group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset."

Impairment of financial assets

"A financial asset is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. A financial asset is considered to be impaired, if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

For trade receivables, the group applies a simplified approach in calculating ECLs. Therefore, the group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment."

Financial liabilities

Initial recognition and measurement

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs

Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:

- Financial liabilities at fair value through profit or loss
- Financial liabilities at amortised cost (loans and borrowings)

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

Derivative financial instruments

Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently re-measured to their fair value at the end of each reporting period. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged and the type of hedge relationship designated.

Forward contracts are used to hedge forecast transactions, the Group generally designates only the change in fair value of the forward contract related to the spot component as the hedging instrument. Gains or losses relating to the effective portion of the change in the spot component of the forward contracts are recognized in other comprehensive income in cash flow hedging reserve within equity. In some cases, the entity may designate the full change in fair value of the forward contract (including forward points) as the hedging instrument. In such cases, the gains and losses relating to the effective portion of the change in fair value of the entire forward contract are recognized in the cash flow hedging reserve within equity.

2.12 The group as a lessee

"The Company's lease asset classes primarily consist of leases for factory Plant and Machinery including factory building. The group assesses whether a contract contains a lease, at inception of the contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the group assesses whether:

- (i) the contract involves the use of an identified asset
- (ii) the group has substantially all of the economic benefits from use of the asset through the period of the lease and
- (iii) the group has the right to direct the use of the asset.

At the date of commencement of the lease, the group recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the group recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

The group recognises right-of-use asset representing its right to use the underlying asset for the lease term at the lease commencement date. The cost of the right -of-use asset measured at inception shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset or restoring the underlying asset or site on which it is located. The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any and adjusted for any remeasurement of the lease liability. The right-of-use assets is depreciated using the straight -line method from the commencement date over the lease term.

The group measures the lease liability at the present value of the lease payments that are not paid at the commencement date of the lease. The lease payments are discounted using the interest rate implicit in the lease. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the group changes its assessment as to whether it will exercise an extension or a termination option.

Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

The group does not have any lease contracts wherein it acts as a lessor.

Ind AS 116 will result in an increase in cash inflows from operating activities and an increase in cash outflows from financing activities on account of lease payments."

2.13 Cash and Cash Equivalents

Cash and cash equivalent in the balance sheet comprise of cash balances at banks, on hand cash balances and demand deposits with an original maturity of three months or less, that are readily convertible to a known amount of cash and subject to an insignificant risk of changes in value.

In the cash flow statement, cash and cash equivalents includes cash in hand, cash at bank, demand deposits with banks, other short-term highly liquid investments with original maturities of three months or less.

2.14 Earnings Per Share

Basic earnings per share is calculated by dividing the net profit for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. Earnings considered in ascertaining the Company's earnings per share is the net profit for the year after deducting any attributable tax thereto for the year. For the purpose of calculating diluted earnings per share, the net profit for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year is adjusted for the effects of all dilutive potential equity shares.

2.15 Segment Reporting

"Based on "Management Approach" as defined in Ind AS 108 - Operating Segments, the Chief Operating Decision Maker evaluates the Company's performance and allocates the resources based on an analysis of various performance indicators by business segments. Inter segment sales and transfers are reflected at market prices. Unallocable items includes general corporate income and expense items which are not allocated to any business segment.

Segment Policies

The group prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the standalone financial statements of the group as a whole. Common allocable costs are allocated to each segment on an appropriate basis. "

2.16 Significant accounting estimates, judgements and assumptions

The preparation of the Company's Standalone financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances existing when the Standalone financial statements were prepared. The estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates is recognized in the year in which the estimates are revised and in any future year affected.

In the process of applying the Company's accounting policies, management has made the following judgements which have significant effect on the amounts Recognized in the Standalone financial statements:

a. Useful lives of property, plant and equipment and intangible assets: Determination of the estimated useful life of tangible assets and intangible assets and the assessment as to which components of the cost may be Capitalized. Useful life of tangible assets is based on the life specified in Schedule II of the Companies Act, 2013 and also as per management estimate for certain category of assets. Assumption also need to be made, when group assesses, whether as asset may be Capitalized and which components of the cost of the assets may be capitalized.

b. Contingencies: Management judgement is required for estimating the possible outflow of resources, if any, in respect of contingencies/ claim/ litigation against group as it is not possible to predict the outcome of pending matters with accuracy.

"c. Fair value measurements and valuation processes : Some of the Companies assets and liabilities are measured at fair value for financial reporting purposes. The Management determines the appropriate valuation techniques and inputs for the fair value measurements. In estimating the fair value of an asset or a liability, the group used market-observable data to the extent it is available. Where Level 1 inputs are not available, the group engaged third party qualified valuers to perform the valuations in order to determine the fair values based on the appropriate valuation techniques and inputs to fair value measurements such as Discounted Cash Flow model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments."

d. Estimation of defined benefit plans : The obligation arising from defined benefit plan is determined on the basis of actuarial assumptions. Key actuarial assumptions include discount rate, trends in salary escalation, actuarial rates and life expectancy. The discount rate is determined by reference to market yields at the end of the reporting period on government bonds. The period to maturity of the underlying bonds correspond to the probable maturity of the post-employment benefit obligation.

"e. Tax expense : Tax expense is calculated using applicable tax rate and laws that have been enacted or substantially enacted. In arriving at taxable profit and all tax bases of assets and liabilities, the Group determines the taxability based on tax enactments, relevant judicial pronouncements and tax expert opinions, and makes appropriate provisions which includes an estimation of the likely outcome of any open tax assessments / litigations. Any difference is recognized on closure of assessment or in the period in which they are agreed.

Deferred income tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, unabsorbed depreciation and unused tax credits could be utilised. "

"f. Operating lease commitments - group as lessor The group has entered into lease agreement for certain plant and machinery. The group has determined based on an evaluation of the terms and conditions of the arrangements, such as the lease term not constituting a major part of the economic life of the asset and the fair value of the asset, that it retains all the significant risks and rewards of ownership of these properties and accounts for the contracts as operating leases."

2.17 Recent accounting pronouncements

"Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time.

On March 31, 2023, MCA amended the Companies (Indian Accounting Standards) Amendment Rules, 2023, as below:

Ind AS 1 - Presentation of Financial Statements : This amendment requires the entities to disclose their material accounting policies rather than their significant accounting policies. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The group has evaluated the amendment and the impact of the amendment is insignificant in the standalone financial statements.

Ind AS 8 - Accounting Policies, Changes in Accounting Estimates and Errors : This amendment has introduced a definition of 'accounting estimates' and included amendments to Ind AS 8 to help entities distinguish changes in accounting policies from changes in accounting estimates. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The group has evaluated the amendment and there is no impact on its standalone financial statements.

Ind AS 12 - Income Taxes : This amendment has narrowed the scope of the initial recognition exemption so that it does not apply to transactions that give rise to equal and offsetting temporary differences. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The group has evaluated the amendment and there is no impact on its standalone financial statement"

a. Deemed cost exemption: The Company has elected to continue with the carrying value of all of its property, plant and equipment as recognised in the financial statements as at the date of transition to Ind AS, measured as per previous GAAP and used it as its deemed cost at the date of transition.

b. Leases: Ind AS 116 supersedes Ind AS 17 'Leases'. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to recognise most leases on the balance sheet. The Company adopted Ind AS 116 using the modified retrospective method of adoption with the date of initial application of April 01, 2021 being the date of transition which resulted into recognition of right-of-use assets, lease liabilities and consequent changes in the statement of profit and loss and cash flows, Consequent to this change, the amount of ROU asset recognised by Rs. 12,019 Thousand as at March 31, 2022 (April 01, 2021: Rs. 14,213 Thousand) and the lease liabilities recognised by Rs. 12,795 Thousand as at March 31, 2022 (April 01, 2021: Rs. 14,279 Thousand) Also, interest free lease security deposits were recorded at their transaction value under the Indian GAAP. However, under Ind AS, all financial assets are required to be recognised at fair value. Accordingly, the Company has fair valued certain security deposits by discounting them over the lease period under Ind AS. Difference between the fair value and transaction value of the security deposit has been recognised as ROU asset which has been adjusted in the value of ROU asset. Consequent to this change, the amount of security deposits reduced by Rs. 188 Thousand as at March 31, 2022 (April 01, 2021: Rs. 228 Thousand) and the ROU asset is increased by Rs. 188 Thousand as at March 31, 2022 (April 01, 2021: Rs. 228 Thousand).

"c. Deferred Tax : Indian GAAP requires deferred tax accounting using the income statement approach, which focuses on differences between taxable profits and accounting profits for the period. Ind AS 12 requires entities to account for deferred taxes using the balance sheet approach, which focuses on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base.

The application of Ind AS 12 approach has resulted in recognition of deferred tax on new temporary differences which was not required under Indian GAAP.

In addition, the various transitional adjustments lead to temporary differences. According to the accounting policies, the Company has to account for such differences. Deferred tax adjustments are recognised in correlation to the underlying transaction either in retained earnings or a separate component of equity. The deferred tax liability is increased by Rs. 161 Thousand is on March 31, 2022 (April 1, 2021: Rs. 107 Thousand)."

"d. Trade recievable : As per Ind AS - 21 ""The effect of change in foreign Exchange Rate"" Foriegn currency monetry items are revalued at closing rate at each year end, earlier the company not revalued the same at closing rate consequent trade recievable are decreased by 2,279 thousand for the year ended March 31, 2022 (3,564 thousand for the April 01, 2021)."

The Company, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Board oversees how management monitors compliance with the Company's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company.

a). Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers.

Trade and other receivables

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the factors that may influence the credit risk of its customer base, including the default risk of the industry and country in which customers operate.

A default on a financial asset is when the counterparty fails to make contractual payments when they fall due. This definition of default is determined by considering the business environment in which Company operates and other macro-economic factors.

Credit quality of a customer is assessed based on its credit worthiness and historical dealings with the Company, market intelligence and goodwill. Outstanding customer receivables are regularly monitored. The management uses a simplified approach for the purpose of computation of expected credit loss for trade receivables and other receivables.

Cash and cash equivalents and other bank balances

The Company held cash and cash equivalents and other bank balances of Rs. 7,943 thousand as at September 30, 2023 Rs.12,104 thousand as at March 31, 2023, March 31, 2022 : Rs 11,431 thousand and March 31, 2021 : Rs 14,378 thousand. The credit worthiness of banks and financial institutions is evaluated by management on an ongoing basis and is considered to be good.

Loans

Loan is given to outside parties for which credit risk is managed by monitoring the recoveries of such amounts on regular basis and the Company does not perceive any credit risk related to these financial assets.

Other financial assets

Other financial assets measured at amortised cost includes deposits and fixed deposits with bank having original maturity period of more than 12 months. Credit risk related to these financial assets are managed by monitoring the recoveries of such amounts on regular basis and the Company does not perceive any credit risk related to these financial assets.

Other than trade and other receivables, the Company has no other financial assets that are past due but not impaired.

Also, interest free lease security deposits were recorded at their transaction value under the Indian GAAP. However, under Ind AS, all financial assets are required to be recognised at fair value. Accordingly, the Company has fair valued certain security deposits by discounting them over the lease period under Ind AS. Difference between the fair value and transaction value of the security deposit has been recognised as ROU asset which has been adjusted in the value of ROU asset. Consequent to this change, the amount of security deposits reduced by Rs. 188 Thousand as at March 31, 2022 (April 01, 2021: Rs. 228 Thousand) and the ROU asset is increased by Rs. 188 Thousand as at March 31, 2022 (April 01, 2021: Rs. 228 Thousand).

"c. Deferred Tax : Indian GAAP requires deferred tax accounting using the income statement approach, which focuses on differences between taxable profits and accounting profits for the period. Ind AS 12 requires entities to account for deferred taxes using the balance sheet approach, which focuses on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base.

The application of Ind AS 12 approach has resulted in recognition of deferred tax on new temporary differences which

was not required under Indian GAAP.

In addition, the various transitional adjustments lead to temporary differences. According to the accounting policies, the Company has to account for such differences. Deferred tax adjustments are recognised in correlation to the underlying transaction either in retained earnings or a separate component of equity. The deferred tax liability is increased by Rs. 161 Thousand is on March 31, 2022 (April 1, 2021: Rs. 107 Thousand)."

"d. Trade receivable : As per Ind AS - 21 ""The effect of change in foreign Exchange Rate"" Foreign currency monetary items are revalued at closing rate at each year end, earlier the company not revalued the same at closing rate consequent trade receivable are decreased by 2,279 thousand for the year ended March 31, 2022 (3,564 thousand for the April 01, 2021)."

e. Estimates :

While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India ("DPIIT").

The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular.
