## SECTION II: RISK FACTORS

An investment in our Equity Shares involves a certain degree of risk. You should carefully consider all the information in this Draft Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. The risks described below are not the only ones relevant to us or our Equity Shares or the industry in which we operate. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our businesses, results of operations, financial condition and cash flows. If any of the following risks or other risks that are not currently known or are currently deemed immaterial actually occur, our businesses, results of operations, financial condition and cash flows could suffer, the trading price of our Equity Shares could decline, and you may lose all or part of your investment. Prospective investors should read this section in conjunction with “**Business Overview**”, “**Industry Overview**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” beginning on pages 96, 84, and 218 respectively of this Draft Prospectus, as well as the financial and other information contained in.

Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is subject to a legal and regulatory environment which may differ in certain respects from that of other countries. This Draft Prospectus also contains forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus. For further details, please see the chapter titled “**Forward-Looking Statements**” beginning on page 13 of this Draft Prospectus.

Unless otherwise indicated or context requires otherwise, the financial statement included herein is derived from our Restated Financial Statement of the Company for the period ended September 30, 2023 and of the Sole proprietorship concern for the period ended June 30, 2023 and for the financial year ended on March 31, 2023, 2022 and 2021 included in this Draft Prospectus.

Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue including the merits and risks involved. You should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

### **Materiality**

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- Some events may not be material individually but may be found material collectively.
- Some events may have material impact qualitatively instead of quantitatively.
- Some events may not be material at present but may be having material impact in future.

### **INTERNAL RISK FACTORS**

**1. Our Company has been formed specifically for the purpose of acquisition of the business of Dr. Vyas’s Hospital (proprietorship concern of our Promoter i.e., Dr. Jaykumar Narendra Vyas) thus we have limited operating history as a Company which may make it difficult for investors to evaluate our historical performance or future prospects.**

Our Company was originally incorporated as a Private limited Company under the Companies Act, 2013 with Registrar of Companies, Central Registration Centre through a certificate of incorporation dated April 25, 2023 with a main object of our Company to acquire Dr. Vyas’s Hospital and Dr. Vyas’s Heart Hospital (sole proprietorship concern of our Promoter i.e., Dr. Jaykumar Narendra Vyas). We have very limited operating history from which may make it difficult to evaluate our business, future prospects and viability. Our future revenues and profitability are difficult to estimate and could fluctuate significantly and as a result the price of our Equity Shares may be volatile. Further our business prospects must be considered in light of the risks and uncertainties in respect of hospital services. The business of providing hospital services, were earlier carried by proprietorship firms which are recently acquired by our Company, although the proprietorship firms have placed the growth in past years, and will continue to place by our Company but there is no assurance that this growth will be met successfully in future. We may not be able to increase revenue or maintain profitability on a half year or an annual basis. If this occurs, our results of operations and financial condition will be adversely affected. Our growth exposes us to a wide range of increased risks. It will also place significant demands on our management, financial and other resources and will require us to continuously develop and improve our operational, financial and internal controls. There can be no assurance that we will be able to successfully pursue our growth strategies, or that pursuing these strategies will provide us the anticipated benefits in terms of growth and profitability. Further, we may be unable to develop adequate systems, infrastructure and technologies, devote sufficient financial resources or develop and attract talent to manage our growth. Our inability to pursue our growth strategies successfully or at all, or an

inability to manage our growth, may adversely affect our prospects. For further details, see the chapter titled “**History and Certain Corporate Matters**” and “**Restated Financial Statements**” on page 115 and 141 respectively of this Draft Prospectus.

**2. We are highly dependent on our doctors and other healthcare professionals, as well as other key personnel and the loss of, or inability to attract or retain, such persons could adversely affect our business and results of operations.**

We operate in an industry which is dependent on the availability of quality human resources, particularly doctors and other healthcare professionals. Our performance and the execution of our growth strategy depend substantially on our ability to attract and retain leading doctors and other healthcare professionals. There is no assurance that the attrition amongst our doctors will not increase in the future.

We compete for healthcare personnel with other healthcare providers. The market for doctors is highly competitive and there is a general shortage of doctors in India. The factors that doctors consider important before deciding where they will work include the level of compensation, the reputation of the hospital and its owner, the quality of the facilities, research opportunities and community relations. We may not compare favorably with other healthcare providers on these factors. Many of these healthcare professionals are well-known personalities in their fields and regions with large patient bases and referral networks, and it may be difficult to negotiate favourable terms and arrangements with them. Our performance also depends on our ability to identify, attract and retain other healthcare professionals, including nurses, to support the multi-speciality practices at our hospital. In particular, the worldwide nursing shortage makes it difficult for us to attract and retain nurses who may choose to pursue similar opportunities abroad and may also cause salaries and wages for nurses to rise. If we are unable to attract or retain doctors or other medical personnel as required, we may not be able to maintain the quality of our services and we could be forced to admit fewer patients to our hospitals. We are also highly dependent on members of our senior management team to manage our current operations and meet future business challenges.

Further, some of our doctors do not work exclusively with us and are permitted to engage in private practice outside of our business and to work at other hospitals that may compete with us. We may require to revise the compensation packages for our doctors and medical staff, to retain them for their professional services, which we may not be able to do in the event when the financial conditions of our hospitals are adversely affected. In such cases, there is no assurance that our medical staff will continue to provide services to us or devote the whole of their time to our hospitals. We may, as a result, be unable to effectively utilize their time and expertise in providing services to our patients. These arrangements may also give rise to conflicts of interest including with regard to how these doctors allocate their time and other resources between our hospitals and other clinics or hospitals at which they work and where doctors refer patients. Such conflicts may prevent us from providing a high quality of service at our hospitals and adversely affect the level of our patient intake which may have an impact on our business, results of operations and cash flows.

**3. We are significantly dependent on our Promoters, Dr. Jaykumar Narendra Vyas, Dr. Shachi Jaykumar Vyas, and any loss of their services could adversely affect our business and results of operations.**

The growth of our business and legacy has been, and is significantly dependent on our Promoters, Dr. Jaykumar Narendra Vyas and Dr. Shachi Jaykumar Vyas. They have a combined experience of over 15 years. Apart from our reliance on our Promoters for their expertise in the medical profession, we are also significantly dependent on them for setting our strategic direction and managing our business affairs. Accordingly, our Promoters are unable, or unwilling to be associated with us, our business and prospects could be severely impaired, and it would be difficult for us to find a suitable replacement. This could have an adverse impact on our future performance and results of operations.

**4. Our operations are geographically located in Bharuch and Ankleshwar in Gujarat at present and any localized social unrest, natural calamities, etc. could have material adverse effect on business and financial operations.**

Our operations are based in Bharuch and Ankleshwar in Gujarat. Any material impact on our revenues from our hospital in Bharuch and Ankleshwar, including by reason of a reduction in patient footfall, regulatory changes, reputational harm, liabilities on account of medical negligence, adverse publicity or natural calamities and increased competition, could have a material adverse effect on our business, financial condition and results of operations. Due to the geographical concentration of our hospital primarily in Gujarat, we are exposed to adverse economic or political circumstances that affect demand for healthcare services in the state. Any regional slowdown, political unrest, disruption, disturbance or sustained downturn in the economy of such regions could adversely affect our business, financial condition and results of operations.

**5. We are a boutique hospital, primarily provide services relating to interventional cardiac services. Any material impact on our earnings from these fields will impact our financial condition and results of operations significantly.**

We are a boutique hospital, primarily provide services relating to interventional cardiac services. Thus, our financial conditions and results of operations are dependent on our revenue from cardiology field. Due to our dependence on the field of cardiology, a number of factors could cause material fluctuations or decline in our revenue. These factors could

include our inability to use modern technology and infrastructure while undertaking interventional cardiac procedures or the innovation and implementation of modern techniques by other hospitals which we are unable to implement. This may lead to a decrease in the number of new patients registered, a loss of key experienced medical professionals, liabilities on account of medical negligence, or regulatory changes. A decline in our revenue could materially and adversely impact our business, prospects, financial condition and results of operations.

**6. We derive a significant portion of our revenues from our tie up arrangements with insurance companies, third party administrators and corporations. The loss of any one or more of our major customers would have a material effect on our business operations and profitability.**

Our revenue comes from in-patient and out-patient and also through tie-up arrangements, insurance companies, third party administrators and corporate entities. As on date, we have entered into empanelment agreement with 4 PSU insurance companies, 15 Private Insurance companies, 8 Third Party Administrator (TPA) companies to provide medical treatment and healthcare as per the terms of their agreement. While our in-patient and out patients cannot be categorised under the top ten category however based on the patients who come through insurance companies, TPA's and corporate entities under the tie-up arrangements, our income relating to such entities contribute to 10% ,20%, 55% and 42% of our total revenues during the three months ended June 30, 2023, financial year 2023, 2022 and 2021 respectively. Such contracts are typically for a specified term and we are exposed to the consequences of early termination. If at the time of contract renewal, our negotiations fail, including due to a failure to agree on the pricing for our services, our revenues and profitability would be affected due to significant loss incurred by us. Any commercial disputes with such parties or any inability to renew these contracts on favorable terms or at all, could have a material adverse impact on our business, financial condition and results of operations.

**7. Delay in receipt of payment from our patients / customers may affect our cash flows, which may, in turn affect our financial condition and results of operations.**

Our patients either pay for their medical expenses themselves or insurance Companies. We are dependent on the timely payment of outstanding dues by such third-party payers, and we may suffer from time lapses in recovering our fees and costs incurred from such insurance company. If we do not receive payments on a timely manner from such third-party payers, our cash flows could be affected, which may, in turn, materially and adversely affect our financial condition and results of operations.

**8. Our ability to provide affordable healthcare depends on the maintenance of a high volume of patients, occupancy rates, managing operating and effective capital management. Any increase in such costs could adversely affect our business, financial condition and results of operations.**

Patient volume is affected by various factors which is out of our control such as lifestyle of individuals, paying capacity etc. As a result, our hospitals may experience a decrease in in-patient volume in times of an economic downturn or stagnation. Our in-patient admissions and treatment contribute significantly to our revenue, compared to our out-patient consultative care. In the event there is a decline in the number of in-patients serviced by us, our financial condition and results of operations will materially stand impacted. Set out below are details in relation to our in-patient and out-patient volume and revenue for the periods indicated;

Particulars	Broach Lifecare Hospital Limited ("the Company")	Dr. Vyas's Hospital ("Sole Proprietorship Concern")			
		September 30, 2023	June 30, 2023	March 31, 2023	March 31, 2022
In-patient volume	75.65	57.86	156.21	315.07	334.86
Out-Patient Volume	14.44	4.54	25.36	24.10	31.49
In-patient volume (%)	84	93	86	93	91
Out-Patient Volume (%)	16	7	14	7	9

Our ability to effectively manage our capital is crucial to our ability to maintain our cost structure and any adverse development relating to patient volume and our operating cost may adversely affect our financial position and performance and require us to increase the fees charged to our patients, which may have a material adverse impact on our business, financial condition and results of operations. While we seek to manage our pricing model in light of these costs, we may not always be able to do so, including due to our fee arrangements and existing contracts, as well as regulatory restrictions.

There is no assurance that we will be able to maintain or improve our admissions and occupancy rates as compared to the increase in our total capital expenditures in the future. Any failure by us to maintain or improve our admissions or occupancy rates may result in an ineffective deployment of capital expenditure and reduced profit margins, which may have an adverse impact on our business, financial condition, and results of operations.

**9. *Our failure to compete effectively against existing and new competitors, other multispecialty and/or super specialty hospitals and/or medical practitioners, could adversely affect our market share, business, financial condition, results of operations and prospects.***

We are a boutique hospital, primarily provide services relating to interventional cardiac services. We operate in a competitive environment and compete on the basis of factors such as our specialty and other service offerings, quality and selection of healthcare professionals, affordability, quality of care, technology, quality of facilities, patient satisfaction, brand and reputation.

Some of our multi-specialty competitors offer services that we do not offer. Some of our competitors are owned or operated by governmental bodies or by private not-for-profit entities supported by endowments and charitable contributions, which can finance capital expenditures without incurring significant tax obligations. We may also face competition from new market entrants, such as established foreign healthcare companies which may enter the Indian market in the future. We are required to evaluate and increase our competitive position in each of our markets for example by offering competitive compensation to healthcare professionals and quality services with competitive rates to our patients. As a result, we may experience lower profitability as we strive to compete with our competitors on all fronts.

It is also possible that there will be significant consolidation in the medical industry. Our competitors may develop alliances, and these alliances may acquire significant market share. Concentration within the sector, or other potential moves by our competitors, could improve their competitive position and market share and may exert further pricing and recruiting pressure on us. Existing or new competitors may try to compete for patients by exerting pricing pressures on some or all of our services by pricing their services at a significant discount to ours or offering services with greater convenience or better quality. Further, our competitors may expand their healthcare networks, which may exert further pricing and recruiting pressure on us. If we are unable to compete effectively with our competitors, our market share, business, financial condition, results of operations and cash flows could be materially and adversely affected.

**10. *Our industry is highly regulated and requires us to obtain, renew and maintain statutory and regulatory permits, accreditations, licenses and comply with applicable safety, health, environmental, labour and other governmental regulations. Any regulatory changes or violations of such rules and regulations may adversely affect our business, financial condition and results of operations.***

Healthcare providers are subject to a wide variety of governmental, state and local environmental and occupational health and safety and other laws and regulations. Further, we are required to obtain and renew from time to time, a number of approvals, accreditations, licenses, registrations and permits from governmental and regulatory authorities such as in relation to establishment of hospitals, operation of our hospitals, procurement and operation of medical and other equipment. In particular, we are required to obtain certificate of registrations for carrying on certain of our business activities including from the Government of India, the State Governments and other such regulatory authorities that are subject to numerous conditions. For a description of the approvals and licenses obtained by us, see ***“Government and Other Statutory Approvals”*** on page 240. Moreover, health and safety laws and regulations in India have become increasingly stringent over time, and it is possible that they will become more stringent in the future. For detailed information in relation to the rules and regulations applicable to us, see ***“Key Industry Regulations and Policies”*** on page 108. The regulatory licenses that we require are typically granted for a limited term and are subject to renewal at the end of such terms. Further, we cannot assure you that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any failure to renew the approvals that have expired or apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to us, may impede our operations and may have an adverse effect on our business, financial condition and results of operations.

We also maintain certain accreditations, including accreditations from the National Accreditation Board for Hospitals and Healthcare Providers (“NABH”) for our hospital. Our accreditations from NABH have been expired and we are in process of making the application for renewal. For a description of the approvals and licenses expired and renewal yet to be applied for, see ***“Government and Other Statutory Approvals”*** on page 240. If we fail to renew such re-accreditations of our hospital by NABH or if we fail to obtain additional accreditations for our hospitals, our reputation, business operations could be adversely affected. Furthermore, in the event certain accreditations are made compulsory, either by law or as a condition for empanelment, our business, financial condition, results of operations and cash flows as we may not be able to obtain such accreditation in a timely manner, or at all.

Further, if we fail to comply with the requirements for applicable quality standards, or if we are otherwise unable to obtain or renew such quality accreditations in the future, in a timely manner, or at all, our business and prospects may be adversely affected. The qualifications and practice of our healthcare professionals is also strictly regulated by applicable laws, regulations, policies and guidelines, as well as by applicable codes of professional conduct or ethics. If our healthcare professionals fail to comply with applicable laws, regulations, policies or guidelines, they and/or we may be subject to penalties including fines, loss of licenses or restrictions on our healthcare facilities and operations, which could materially and adversely affect our business and reputation. We may incur substantial costs in order to comply with current or future laws, rules and regulations, and we may not be able to maintain, at all times, full compliance with such laws, regulations, policies and guidelines. These current or future laws, rules and regulations may also impede our operations and impact our continued growth. Any non-compliance with the applicable laws, rules and regulations may subject us to regulatory action, including penalties and other civil or criminal proceedings, which may materially and adversely affect our business, prospects and reputation. There is no assurance that we will not be subject to such actions in the future, which could materially and adversely affect our business and reputation.

**11. Our Company is dependent on limited number of external suppliers for its medicine and consumables requirements. Any delay or failure on the part of such suppliers to deliver products at acceptable prices, may adversely affect our business, profitability and reputation.**

We rely on the limited number of suppliers for purchasing of medicines and consumables, which in turn, rely on third-party suppliers for sourcing of products. Our reliance on a limited number of suppliers for our business exposes us to risks, that may include, but are not limited to, reductions, delay or failure on the part of our suppliers to deliver products in a timely manner, deterioration in the financial condition or business prospects of these suppliers, failure to negotiate favourable terms with our key suppliers, all of which could have a material adverse effect on the business, financial condition, results of operations and future prospects of our Company.

We do not have any long-term supply contracts with our suppliers. We generally make our purchases with suppliers through purchase orders. Thus, our suppliers may be unable to provide us with a sufficient quantity of medicines and consumables, at prices acceptable to us. Further, any unexpected rise in the prices of the medicines and consumables or shortage in supply or any adverse change in terms and conditions of supply would result in increase of our procurement cost. In case we are not able to pass on any such increase in cost to the patients because of competition or otherwise, it may affect the profitability of the Company. If we are required to identify alternative third parties for any of our required products, the process of qualification and approval could cause delays in providing services to clients. Any extended interruption in the supply of medicines and consumables could disrupt our operations and can have a material adverse effect on our business, results of operations or financial condition.

**12. Any negative cash flows in the future would adversely affect our cash flow requirements, which may adversely affect our ability to operate our business and implement our growth plans, thereby affecting our financial condition.**

We have in the past experienced, and may in the future, experience negative operating cash flows. The following table sets forth certain information relating to our cash flows on a standalone basis for the periods indicated:

(₹ in lakhs)

**13. We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.**

Our success heavily depends upon the continued services of our Key managerial personnel, along with support of our Promoters. We also depend significantly on our Key Managerial Persons for executing our day-to-day activities. The loss of any of our Promoters and Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to chapter titled “*Our Management*” on page 119 of this Draft Prospectus.

**14. We have not entered into tie-ups with Governmental agencies for providing medical services under various government schemes.**

We have not entered into tie-ups with Governmental agencies for providing medical services under various government schemes. However, we registered to provide medical services under various government schemes such as Ayushman Bharat - Pradhan Mantri Jan Arogya Yojana (AB-PMJAY), which would act an important source of new patient registrations and revenue. Any inability to get ourselves registered may adversely affect the number of new patient registrations and thus our revenue and profitability could be negatively affected.

**15. We are exposed to legal claims and regulatory actions arising from the provision of healthcare services and may be subject to liabilities arising from claims of malpractice and medical negligence which could materially and adversely affect our reputation and prospects.**

We are exposed to the risk of legal claims and regulatory actions arising out of the medical services provided by us. From time to time, we may be subject to claims alleging, among other things, medical negligence by our healthcare professionals and product liability for medical devices we use and pharmaceuticals we dispense. We could also be the subject of complaints from patients who are dissatisfied with the quality and cost of healthcare services. We may from time to time receive complaints from, or be involved in, disputes with our clients and patients with regard to medical services. This can be attributed to various factors, such as the negligence of medical personnel, failure of medical equipment, inaccurate results of medical tests conducted by outsourced laboratories, individual patient-specific conditions and disease complications. In addition, people may contract serious communicable diseases during their stay or visit at our facilities, which could result in significant claims for damages against us and, as a result of reports and press coverage, damage our reputation.

We rely on our healthcare professionals to make proper diagnoses, administer proper treatment and make other clinical decisions. However, we do not have direct control over the clinical activities of our healthcare professionals, as their diagnoses and treatments of patients are subject to their professional judgment, and in most cases, must be performed on a real time basis. In addition, some doctors who work are on a consultancy basis are subject to proceedings for medical negligence, which may lead to their removal from the register of medical practitioners for a period of time or permanently. Even though we are not a party to such proceedings, our reputation and business may be adversely impacted by their negative outcomes and publicity. Furthermore, our healthcare professionals are susceptible to contracting diseases that we treat in our facilities, and if our healthcare professionals become infected, it may significantly reduce the treatment and care capacity at our medical facilities. Current or former patients or their families may commence or threaten litigation for medical negligence or malpractice against us. If such claims succeed, we may become liable for damages and other financial consequences and may even be exposed to criminal liability, which may materially and adversely affect our reputation, financial condition, results of operations and cash flows. Regardless of their merit or eventual outcome, such liability claims could result in significant legal defence costs for us, damage to our reputation, and a material adverse effect on our business, financial condition and results of operation.

**16. Our Company has acquired sole proprietorship firms of our Promoter after its incorporation vide Business Transfer Agreement (BTA) dated July 17, 2023. Any future acquisition of other businesses could result in operating difficulties, integration issues and other adverse consequences due to our limited past experience in businesses.**

Our Company has recently acquired sole proprietorship firms of our Promoter after its incorporation vide BTA dated July 17, 2023. For details, see “**History and other Corporate Matters**” on page 115. Further, our Company is in process of making application for the transition or endorsement of the name of the Company on many of the documents, registration and other documents which are in the name of our Proprietor. Any delay in the said transition may require the company to pay any penalty or refusal from any authority of such transition or endorsement which may affect the financial position and operation of our Company. Further any future acquisition may not be beneficial to our Company, we may have to pay a certain amount of premium to the outgoing management / shareholders for synergic benefits that we may accrue compared to valuations of those firms / businesses / companies. Our inability to identify suitable acquisition opportunities in the future, or obtaining the necessary financing to make such acquisitions could adversely affect our future growth.

**17. There have been certain instances of non-compliances/ discrepancies, including with respect to certain secretarial/regulatory filings for corporate actions taken by our Company in the past. Consequently, we may be subject to regulatory actions and penalties for any such non-compliance/ discrepancies and our business, financial position and reputation may be adversely affected.**

Our company has not complied with certain statutory provisions of the Companies Act, 2013 in the past. In addition, there are few discrepancies noticed in some of our corporate records, such as some clerical error exists in the preparation and maintenance of Board minutes. While no legal proceedings or regulatory action has been initiated against us in relation to the unavailable filings and statutory lapses as of the date of this Draft Prospectus, we cannot assure you that such proceedings or regulatory actions will not be initiated against us in the future in relation to the missing filings and corporate records. We cannot assure you that any such proceedings will not have a material adverse effect on our financial condition or reputation.

**18. If we are unable to maintain bed occupancy rates at sufficient levels, we may not be able to generate adequate returns on our capital expenditure, could adversely affect our operating efficiencies and our profitability.**

Our ability to sustain current levels of profitability and operating efficiencies depends on our ability to maintain and increase bed occupancy rates, which in turn depends on factors such as brand recognition in the communities in which we operate, our ability to attract and retain quality healthcare professionals, our ability to develop super-specialty practices and our ability to compete effectively with other hospitals and clinics. Our average bed occupancy ratio was approx. 68 % for the Fiscal 2023 and 70 % for the three months period ended June 30, 2023. If we fail to maintain or improve our occupancy rates while we continue to incur significant capital expenditure, our business, financial condition, results of operations and prospects may be materially and adversely affected.

**19. If we are unable to keep pace with technological changes, new equipment and service introductions, changes in patients' needs and evolving industry standards, our business and financial condition may be adversely affected.**

The healthcare services industry is characterized by periodic technological changes, new equipment and service introductions, changes in patients' needs and evolving industry standards, including, for example, changes associated with diagnosis process, treatments and patient-doctor interactions, telemedicine offerings. Our continued success depends on our ability to anticipate industry trends and identify, develop and market new value-added services that meet client demands, to continually enhance our equipment and technologies in a timely and cost-effective manner.

Our assessment of the market and evolving customer preferences may not lead to new services that are commercially successful. We may also experience delays or failures in any stage of our service development, introduction or implementation. Our competitors may be more efficient at developing new services and may introduce those services to the market before us. The introduction of new or similar services by our competitors may result in reductions in our prices, profit margins, and market share. Further, as industry standards evolve, we may be required to enhance and develop our internal processes and procedures, as well as equipment and technologies, to comply with such standards and maintain the accreditations that we have received. The research, design and development of new services may also require significant resources, including financial and management time and attention. If we are unable to develop new services in a timely manner to meet market demand, or if there is insufficient demand for our services, our business, financial condition, results of operations and prospects may be materially and adversely affected.

Rapid changes in the medical and healthcare industry require sourcing for and investing in new medical equipment and technology. We may not be able to continually invest in, procure and integrate the latest equipment and technologies at commercially suitable terms and in a timely manner. We may not be able to recover the financial outlay for the medical equipment and systems that we invest in. We may incur significant costs in replacing or modifying equipment in which we have already made a substantial investment. New equipment and services based on new or improved technologies or new industry standards can lead to earlier than planned redundancy of our medical equipment and result in asset impairment charges in the future. We may experience short-term disruptions to our operations if our equipment is damaged or breaks down. Extended downtime of our medical equipment, and repair or replacement costs of such equipment, could result in loss of revenue, client dissatisfaction, and damage to our reputation. Injuries caused by medical equipment in our healthcare facilities due to equipment defects, improper maintenance or improper operation could also

subject us to liability claims, which may not be insured completely or at all. Regardless of their merit or eventual outcome, such liability claims could result in significant legal defence costs for us, damage to our reputation, and a material adverse effect on our business, financial condition and results of operation.

Our operations are also subject to risks inherent in the use of complex medical equipment. Some equipment we use in our hospital involves radioactive substances. Failures, accidents, defects, improper use or lack of maintenance of our equipment may lead to injury of our patients and healthcare professionals. We may incur significant repair and maintenance costs and may experience disruptions in our operations in the event of any material malfunction or breakdown of our equipment in the future. In addition, we may not be able to respond to such failures or malfunctions in a timely manner or with acceptable cost, which could adversely impact our ability to provide patients with necessary treatments and quality services, result in injury of our healthcare professionals, and damage our reputation.

**20. *We do not own the land on which our registered office and hospitals have been set-up. Any revocation or adverse changes in the terms of the lease may have an adverse effect on our business, prospects, results of operations and financial condition.***

We have entered into lease agreements, with our Promoter namely Dr. Jaykumar N. Vyas for use of premises as our registered office and our hospitals for a period of 11 months. Though our lease agreements are presently valid. However, in the event of the Promoter revoking the lease agreements or imposing terms and conditions that are unfavorable to us, we may suffer a disruption in our operations or have to pay increased rent, which could have a material adverse effect on our business, prospects, results of operations and financial condition.

**21. *We have not yet placed orders in relation to the capital expenditure to be incurred for the purchase of equipment / machinery. In the event of any delay in placing the orders, or in the event the vendors are not able to provide the equipment / machinery or other materials in timely manner, or at all, may result in time and cost overruns and our business, prospects and results of operations may be adversely affected.***

We intend to utilize portions of the Net Proceeds for funding capital expenditure requirements towards purchase of equipment / machinery. While we have procured quotations from vendors in relation to the capital expenditure to be incurred, we have not placed any firm orders for any of them. For details in respect of the foregoing, see “*Objects of the Issue*” on page 65. Such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations. Further, the actual amount and timing of our future capital requirements may differ from our estimates as a result of, among other things, unforeseen delays or cost overruns, unanticipated expenses, regulatory changes, engineering design changes and technological changes. In the event of any delay in placing the orders, or an escalation in the cost of acquisition of the equipment or in the event the vendors are not able to provide the equipment in a timely manner, or at all, we may encounter time and cost overruns. Further, if we are unable to procure the requisite materials from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternate vendors to provide us with the materials which satisfy our requirements at acceptable prices. Our inability to procure the machinery and equipment at acceptable prices or in a timely manner, may result in an increase in capital expenditure, the proposed schedule of implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations.

**22. *Lack of health insurance in India may affect our business, cash flows and results of operations.***

Penetration of health insurance providers in India is very low. In the absence of health insurance, procedures and diagnostics involving significant costs may not be affordable to a number of patients. Such patients may choose not to undergo such procedures, despite being in need of them, or may choose to undergo similar procedures from hospitals which are less costly. Further, most ty plans under health insurance policies in India are designed so that the insured is responsible to pay out-of-pocket expenses to the healthcare providers and then file a claim to get reimbursed. This reimbursement policy favours wealthier patients. In contrast, the lower income households are unable to afford the insurance premium or pay the medical fees upfront. Furthermore, most health insurance policies in India cover only inpatient care costs. Consequently, higher out-of-pocket expenses related to healthcare in India may make healthcare unaffordable for lower income households. Due to the lack of viable health insurance policies in India, demand for our medical services may not increase as expected. As a result, we may not be able to provide medical services and may not benefit from the revenue we may expect to realise from such services.

**23. *Most of our radiology and diagnostic imaging equipment contain radioactive and nuclear materials or emit radiation during operation which could make us liable for damages.***

Radioactive procedures are commonly used in medical applications. Our hospitals routinely use equipment that deal with radioactive substances. We are required by various regulations promulgated under the Atomic Energy Act, 1962, and administered by the Atomic Energy Regulatory Board (“**AERB**”), to obtain certifications, licences and registrations for various processes and medical applications involving radioactive substances. The AERB also imposes stringent control

requirements as to the use, handling and disposal of radioactive substances and procedures. A number of record maintenance requirements are also applicable to our Company. Despite precautions and compliance with regulations, the risk exists that accidents could occur during our operation of radiation generating equipment and use of radioactive material, resulting in the release of radiation or leakage of substances in a manner or to an extent unsafe for human beings or for the environment in general. Such accidents involving radioactive substances can be devastating to human life and well-being, including causing death. We may be liable for all such damage caused as a result of any accident and may be required to compensate persons suffering injury as a result of such exposure to radiation. Such damages may materially impact our business and financial condition.

**24. Our trademark and logo is not registered with the trademark registration authority, and we may be unable to protect our logo from being infringed by others which may adversely affect our business value, financial condition and results of operations.**

We have not yet obtained registration of our trademark and logo and hence we do not enjoy the statutory protection accorded to a registered trademark. Additionally, we have not made any application for the registration of our trademark and logo and there is possibility that such tradename or logo may be registered in the name of third parties and use of such trademark or logo may cause the third parties to initiate legal proceedings against us and we may be required to cease and desist the usage of such trademarks or logo. We may also remain vulnerable to infringement or passing-off by third parties, however, we will not be able to enforce any rights against them resulting to change our trademark or logo, which may adversely affect our reputation & business and could require us to incur additional costs. Although, we believe that our present systems are adequate to protect our confidential information and intellectual property, there can be no assurance that our intellectual property data will not be copied, infringed or obtained by third parties. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations.

**25. We are involved in certain legal proceedings, which, if determined adversely, may affect our business and financial condition.**

Our Promoter and Director are currently involved in tax proceedings in India. We cannot assure you that such proceedings will be decided in favour of our Promoter and Director. Any adverse decision in such proceedings may render our Promoter and Director to pay penalties. Additionally, during the course of our business we are subject to risk of litigation in relation to medical negligence, contractual obligations, employment and labour law related, personal injury, damage to property, etc.

A classification of the outstanding proceedings is given in the following table:

<b>Nature of Cases</b>	<b>Number of Cases</b>	<b>Total Amount Involved (in ₹ Lakhs)</b>

Decisions in such proceedings, adverse to interests of our Promoter and Director, may require them to pay penalty along with the interest. Even if our Promoter and Director are successful in defending such cases, they will be subject to legal and other costs relating to defending such litigation which may demand time and consequently their time may be diverted toward defending such cases. In addition, we cannot assure you that similar proceedings will not be initiated in the future. For further details, please refer to "*Outstanding Litigation and Material Developments*" on page 236.

**26. Any downtime for maintenance and repair of our medical equipment could lead to business interruptions that could be expensive and harmful to our reputation and to our business.**

Our machinery, including cathlab machines, require constant maintenance, including cleaning, sanitising and overhaul. Maintenance work on most equipment can be performed mostly by the manufacturer or a designated service provider and involves significant downtime to complete maintenance. At times, maintenance of some equipment cannot be performed at our hospitals and may have to be moved to the location of the manufacturer or service provider, adding to the downtime. Our equipment is subject to normal wear and tear and will be in need of repairs from time to time. Some repairs may be routine in nature, involving lower downtime, and some repairs may require replacement of parts of the equipment, which may be time consuming. During such times, we may not be able to put the equipment to use. We may, as a result, suffer losses by reason of not being able to use such equipment.

**27. Our Promoters and Promoter Group will be able to exercise significant influence and control over our operations after the issue and may have interests that are different from those of our other shareholders.**

As of the date of this Draft Prospectus, our Promoters and Promoter Group collectively hold 86.74% of our issued and outstanding equity share capital. Post the issue, our Promoters and Promoter Group will continue to hold [●]% of our issued and outstanding Equity Share capital. By virtue of their shareholding, our Promoters and Promoter Group will have the ability to exercise significant control and influence over our affairs and business, including the appointment of Directors, the timing and payment of dividends, the adoption of and amendments to our Memorandum and Articles of Association, the approval of a merger, amalgamation or sale of substantially all of our assets and the approval of most other actions requiring the approval of our shareholders. The interests of our Promoters and Promoter Group may be different from or conflict with the interests of our other shareholders and their influence may result in change of our management or in our control, even if such a transaction may not be beneficial to our other shareholders.

**28. Our insurance coverage may not adequately protect us against potential risk, and this may have a material adverse effect on our business.**

We strive to maintain insurance coverage for key risks relating to our business. However, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. In addition, not all risks associated with our operations may be insurable, on commercially reasonable terms or at all. Although we believe that we have obtained insurance coverage customary to our business, such insurance may not provide adequate coverage in certain circumstances and is subject to certain deductibles, exclusions and limits on coverage. To the extent that we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected. Natural disasters in the future or occurrence of any other event for which we are not adequately or sufficiently insured may cause significant disruption to our operations that could have a material adverse impact on our business and operations. The occurrence of an event for which we are not adequately or sufficiently insured could have an adverse effect on our business, results of operations, financial condition and cash flows. If we are subject to litigation or claims or our operations are interrupted for a sustained period, we cannot assure you that our insurance policies will be adequate to cover the losses that may be incurred as a result of such interruption.

**29. We have not independently verified certain data in this Draft Prospectus.**

We have not independently verified data from the industry and related data contained in this Draft Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled. Therefore, discussions of matters relating to India, its economy or the industry in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be

comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

**30. *We may be subject to labor unrest, slowdowns and work stoppages, which could affect our reputation, business, financial condition and results of operations.***

Healthcare is a manpower-intensive sector, and we employ doctors, staff and other people for providing care to our patients. Furthermore, India has stringent labor legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal, and legislation that imposes certain financial obligations on employers upon retrenchment. Presently, none of our employees of our facilities are unionized. In the event that employees seek to unionize, it may become difficult for us to maintain flexible labor policies and may increase our costs and adversely affect our business. While we have not experienced any major instance of labor unrest, slowdowns or work stoppages that has had a material adverse impact on our operations, results of operations and financial conditions in the last three financial years, there is no assurance such instances will not occur in the future and any disruption in services due to any potential strikes (including those by the contract labor employed through third-party contractors), may affect our reputation, business, financial condition and results of operations.

**31. *Our Promoter, Directors and Key Managerial Personnel may have interest in our Company, other than reimbursement of expenses incurred, remuneration or other benefits received***

Our Promoter, Directors and Key Managerial Personnel may be deemed to be interested to the extent of the Equity Shares held by them and benefits deriving from their shareholding in our Company, interest against the deposit on the use of the premises of registered office and hospitals. Our Promoters may be interested in the transactions entered into between our company. For further details, see, “*Business Overview*” and “*Our Promoters and Promoter Group*”, beginning on page 135 and 135 respectively.

**32. *The average cost of acquisition of Equity Shares by our Promoters may be lower than the Issue Price.***

Our Promoters average cost of acquisition of Equity Shares in our Company is lower than the Issue Price. The price at which Equity Shares have been issued by our Company in the immediately preceding one year is not indicative of the Issue Price at which the Equity Shares shall be issued and traded (subsequent to listing). For further details regarding such allotments, see “*Capital Structure*” on page 54.

**33. *We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.***

Our Company has entered into related party transactions with our Promoters, Directors and Group Entities. While our Company believes that all such transactions have been conducted on the arm’s length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, “*Related Party Transactions*” under chapter titled “*Financial Information*” on page 141.

**34. *We could be exposed to risks relating to the handling of personal information, including medical data.***

Our information technology system is critical systems are critical to our business. We rely on the information technology system to store the personal details data of our patients. The regulatory guidelines generally require medical institutions to protect the personal data, of their patients or clients and prohibit unauthorized disclosure or usage of personal information, including medical data. Compliance with new and evolving privacy and security laws, regulations and requirements may result in increased operating costs which may in turn affect our business, financial condition, results of operations and prospects. We are vulnerable to the failures of our information technology system, which could affect our business, deficiencies in managing our information systems and data security practices may lead to leaks of patient records, test results, prescriptions, lab records and other confidential and sensitive information which could adversely impact our business and damage our reputation.

**35. *We are vulnerable to failures of our information technology system, which could adversely affect our business.***

Our information technology system is critical to our business. We rely on our technology system to, among other things, manage accounting and financial reporting, facilitate consultations among healthcare professionals, prepare and manage medical records, financial records, training programs and inventory. If we experience an interruption or a reduction in the performance, reliability or availability of our technology architecture from natural or man-made causes, or from disruptions from our local service providers, our operations and ability to manage our administrative systems could be adversely impacted. Any technical failures associated with our information technology system, including those caused by power failures, computer viruses and other unauthorized tampering, may impair our ability to provide services to our patients. Corruption of certain information could also lead to delayed or inaccurate judgments or diagnoses in our

treatment of patients, and could result in damage to the welfare of our patients. Any failure of our IT systems could materially and adversely affect the operation of all of our hospital.

In addition, since we rely on our technology systems to manage our accounting and financial functions, including processing payments to network healthcare providers and invoicing our clients, any technical failures or errors, including errors in manual data entry or programming, could materially and adversely impact our financial reporting, results of operations and cash flows, as well as our reputation and relationships with our network healthcare providers and clients.

There can be no assurance that we will not encounter data migration or other errors, which could result in the loss of important data, interruptions, delays or cessations in the availability of our systems, any of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

**36. *We may not be successful in implementing our business strategies.***

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

**37. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.***

The proposed fund requirement for purchase of machinery as detailed in the chapter titled “*Objects of the Issue*” on page 65 of this Draft Prospectus is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 65 of this Draft Prospectus.

**38. *The Objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any variation between the estimation and actual expenditure as estimated by the management could result in execution delays or influence our profitability adversely.***

The deployment of funds as stated in the “*Objects of the Issue*” on page 65 of this Draft Prospectus is entirely at the discretion of our management and has not been appraised by any independent agency. Further, the purposes for which the Net Proceeds are to be utilised have not been appraised by an independent entity and are based on our estimates and on third-party quotations. In the event, for whatsoever reason, we are unable to execute our plans, we could have a significant amount of unallocated net proceeds. In such a situation, we would have broad discretion in allocating these net proceeds from the Issue without any action or approval of our shareholders. In case the assumptions on which these estimates have been made are not correct or they become un-realistic then there will be a variation in the estimates and the actual expenditure incurred which could result in execution delays and have an adverse effect on our operations and profitability.

**39. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.***

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the chapter “*Objects of the Issue*” on page 65 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and implementation plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

**40. *We may require additional funding to finance our operations, which may not be available on terms acceptable to us, or at all, and if we are unable to raise funds, the value of your investment in us may be negatively impacted.***

We operate in a capital-intensive industry and may need additional funding to finance our operations and growth strategies. Sources of additional financing may include commercial bank borrowings, supplier financing, or the sale of equity securities. There can be no assurance that we will be able to obtain any additional financing on terms acceptable to us, or at all. The cost of raising capital may be high. Any additional funding, we obtain may strain our cash flows and financial condition. If we raise additional funds through any additional equity or equity-linked financing, your equity interest in our Company may be diluted. Alternatively, if we raise additional funds by incurring debt obligations, we may be subject to various covenants under the relevant debt instruments that may, among other things, restrict our ability to pay dividends or obtain additional financing. Servicing such debt obligations could also be burdensome to our operations.

If we fail to service such debt obligations or are unable to comply with any of the covenants thereunder, we could be in default under such debt obligations and our liquidity and financial condition could be materially and adversely affected.

***41. Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements***

We have never declared or paid any cash dividends in the past. Our ability to pay dividends in the future will depend on our earnings, financial condition, cash flow, working capital requirements, capital expenditure and restrictive covenants of our financing arrangements. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and in accordance with the dividend distribution policy adopted by our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot assure you that we will be able to pay dividends in the future. For details, see “*Dividend Policy*” beginning on page 140 of this Draft Prospectus.

***42. Our hospital is susceptible to risks arising on account of fire and other incidents***

We store, handle and use certain chemicals, such as alcohol, sanitizers, gases, fuel and other inflammable materials at some of our hospital. Healthcare facilities are subject to risks associated with fires, power failures, telecommunications failure and other events. Such events could materially impact our business in the future. Furthermore, any short circuit of power supply for our equipment and machines including air conditioning plants, power supplies, could result in accidents and fires that could result in injury or death to our employees, our patients, and other persons present at our hospital. While we have not encountered any significant accidents in the past three years, there is no assurance such accident will not happen in the future. In the event of such an incident, we cannot assure you that our insurance coverage will be sufficient to cover all damages and losses we become liable for.

***43. If we are unable to establish and maintain an effective internal control, our business and reputation could be adversely affected.***

We are responsible for establishing and maintaining adequate internal measures commensurate with the size and complexity of operations. We periodically test and update our internal processes and systems and there have been no past material instances of failure to maintain effective internal controls and compliance system. However, we are exposed to operational risks arising from the potential inadequacy or failure of internal processes or systems, and our actions may not be sufficient to ensure effective internal checks and balances in all circumstances. We take reasonable steps to maintain appropriate procedures for compliance and disclosure and to maintain effective internal controls over our financial reporting so that we produce reliable financial reports and prevent financial fraud. As risks evolve and develop, internal controls must be reviewed on an ongoing basis. Maintaining such internal controls requires human diligence and compliance and is therefore subject to lapses in judgment and failures that result from human error. Any lapses in judgment or failures that result from human error can affect the accuracy of our financial reporting, resulting in a loss of investor confidence and a decline in the price of our equity shares.

***44. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.***

Since the Issue size is less than ₹ 10,000.00 Lakhs there is no mandatory requirement of appointing an independent monitoring agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials

***45. Certain key performance indicators for certain listed industry peers included in this Draft Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete***

Pursuant to the requirements of the SEBI ICDR Regulations, we have included certain key performance indicators, comprising financial and operational information, for certain listed industry peers, in the “*Basis for Issue Price*” beginning on page 72 of the Draft Prospectus. Although this information is sourced from and relied upon on the consolidated audited financial statements of the relevant listed industry peers as available on the websites of the Stock Exchanges, including the annual reports of the respective companies submitted to Stock Exchanges, there is no assurance that this information with respect to industry peers is either complete. There may be different methodologies and formulas used to compute the various ratios.

***46. Any future issuance of Equity Shares may dilute your shareholding and sale of Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares.***

We may in the future issue equity shares, debt securities and other kind of financing instrument to finance our future growth or fund our business activities. Any future equity issuances by us, may lead to the dilution of investors’

shareholdings in our Company. The trading price of the Equity Shares may be adversely affected by our future equity issuances (including under an employee benefits scheme), disposal of our Equity Shares by the Promoters or any of our other principal shareholders, changes in our shareholding structure to comply with minimum public shareholding norms applicable to listed companies in India, or any public perception regarding such issuance or sales, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. There can be no assurance that we will not issue additional Equity Shares at a price which is lower than the Issue Price or that our existing shareholders including our Promoters will not dispose of further Equity Shares after the completion of the Issue (subject to compliance with the lock-in provisions under the SEBI ICDR Regulations) or pledge or encumber their Equity Shares. Any future issuances could also dilute the value of shareholders' investment in the Equity Shares and adversely affect the trading price of our Equity Shares. Such securities may also be issued at prices below the Issue Price.

***47. The requirements of being a listed company may strain our resources***

We are not a listed company. We have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as an unlisted company. We will be subject to the equity listing agreement with the Stock Exchange which will require us to file audited annual and half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required.

As a result, our management's attention may be diverted from business concerns, which may adversely affect our business, prospects, financial condition, and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge but cannot assure that we will be able to do so in a timely and efficient manner.

***48. The Equity Shares have never been publicly traded, and, after the issue, the equity shares may experience price and volume fluctuations, and an active trading market for the equity shares may not develop. Further, the price of the equity shares may be volatile, and you may be unable to resell the equity shares at or above the issue price, or at all.***

Prior to the issue, there has been no public market for the equity shares, and an active trading market on the stock exchange may not develop or be sustained after the issue. Listing and quotation does not guarantee that a market for the equity shares will develop. The issue price of the equity shares is proposed to be determined through a book building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the equity shares at the time of commencement of trading of the equity shares or at any time thereafter. The market price of the equity shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

***49. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.***

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

**EXTERNAL RISKS**

***50. Changing laws, rules and regulations in India and legal uncertainties, including adverse application of tax laws, in the jurisdictions in which we operate may adversely affect our business and results of operations.***

The governmental and regulatory bodies may notify new regulations and/or policies, which may require us to requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, results of operations and financial condition. In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations, including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals.

The Government of India has notified four labour codes which are yet to completely come into force as on the date of this Draft Prospectus, namely, (i) The Code on Wages, 2019, (ii) The Industrial Relations Code, 2020, (iii) The Code on Social Security, 2020 and (iv) The Occupational Safety, Health and Working Conditions Code, 2020. Such codes will replace the existing legal framework governing rights of workers and labour relations. There can be no assurance that the Government of India will not implement new regulations and policies requiring us to obtain approvals and licenses from the Government of India or other regulatory bodies or impose onerous requirements and conditions on our operations. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and financial condition.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time-consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

***51. The occurrence of natural or man-made disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect the financial markets and our business.***

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19 and man-made disasters, including acts of war such as Russia's invasion of Ukraine, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations.

A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 virus. A worsening of the current outbreak of COVID-19 pandemic or future outbreaks of COVID-19 or a similar contagious disease could adversely affect the global economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have a material adverse effect on our business and the trading price of the Equity Shares.

Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

***52. A downgrade in ratings of India and other jurisdictions in which we operate may affect the trading price of the Equity Shares.***

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. Any further adverse revisions to credit ratings for India and other jurisdictions we operate in by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available. Further, a downgrading of India's credit ratings may occur, for example, upon change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favorable terms and consequently adversely affect our business and financial performance and the price of the Equity Shares.

***53. If inflation were to rise in India, we might not be able to increase the prices of our products at a proportional rate in order to pass costs on to our customers thereby reducing our margins.***

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of wages and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our customers, whether entirely or in

part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase the price of our products to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

***54. A third-party could be prevented from acquiring control of us post this Issue, because of anti-takeover provisions under Indian law.***

As a listed Indian entity, there are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeovers) Regulations, 2011 (“Takeover Regulations”); an ‘acquirer’ has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors / shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Issue. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of the Takeover Regulations.

***55. Certain data mentioned in this Draft Prospectus has not been independently verified.***

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

***56. Investors may not be able to enforce a judgment of a foreign court against us, our Directors, the LM or any of their directors and executive officers in India respectively, except by way of a lawsuit in India.***

Our Company is incorporated under the laws of India as a company limited by shares. As on the date of this Draft Prospectus, the majority of our Directors and Key Managerial Personnel are residents of India. A substantial portion of our Company’s assets and the assets of our Directors and executive officers resident in India are located in India. As a result, it may be difficult for investors to effect service of process upon us or such persons outside India or to enforce judgments obtained against our Company or such parties outside India.

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Recognition and enforcement of foreign judgments is provided for under section 13 of the Code of Civil Procedure, 1908 (“CPC”), on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognize the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record. However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction.

Section 44A of the CPC provides that where a foreign judgment has been rendered by a superior court, within the meaning of that section, in any country or territory outside of India which the GoI has by notification declared to be in a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. However, Section 44A of the CPC is applicable only to monetary decrees not being of the same nature as amounts payable in respect of taxes, other charges of a like nature or of a fine or other penalties but does not include an arbitration award, even if such an award is enforceable as a decree or judgment. The United Kingdom, United Arab Emirates, Singapore and Hong Kong, among others, have been declared by the GoI to be reciprocating territories for the purposes of section 44A of the CPC.

The United States and India do not currently have a treaty providing for reciprocal recognition and enforcement of judgments, other than arbitration awards, in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any federal or state court in the United States on civil liability, whether or not predicated solely upon the federal securities laws of the United States, would not be enforceable in India. However, the party in whose favour such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in the United States. The suit must be brought in India within three (3) years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India.

Further, there may be considerable delays in the disposal of suits by Indian courts. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgment if that court was of the view that the amount of damages awarded was excessive or inconsistent with public policy or Indian law. It is uncertain as to whether an Indian court would enforce foreign judgments that would contravene or violate Indian law. However, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI under the FEMA to execute such a judgment or to repatriate any amount recovered, and we cannot assure you that such approval will be forthcoming within a reasonable period of time, or at all, or that conditions of such approvals would be acceptable. Further, any such amount may be subject to income tax in accordance with applicable laws. Any judgment awarding damages in a foreign currency is required to be converted into Rupees on the date the award becomes enforceable and not on the date of payment.

**57. *A slowdown in economic growth in India could adversely affect our business.***

The structure of the Indian economy has undergone considerable changes in the last decade. These include increasing importance of external trade and of external capital flows. Any slowdown in the growth of the Indian economy or any future volatility in global commodity prices could adversely affect our business, financial condition and results of operations. India's economy could be adversely affected by a general rise in interest rates, fluctuations in currency exchange rates, adverse conditions affecting housing and tourism and electricity prices or various other factors. Further, conditions outside India, such as slowdowns in the economic growth of other countries, could have an impact on the growth of the Indian economy and government policy may change in response to such conditions. The Indian economy and financial markets are also significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States, Europe or China or Asian emerging market countries, may have an impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss of investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets, and could have an adverse effect on our business, financial condition and results of operations and the price of the Equity Shares.

**58. *Our Company may have issued Equity Shares during the preceding one year at a price lower than the Issue Price.***

Our Company has issued Equity Shares at a price that may be lower than the Issue Price during a period of 1 year preceding the date of this Draft Prospectus. For further details please see '*Capital Structure -Equity Share capital history of our Company*' on page 55.

**ISSUE SPECIFIC RISKS**

Risks relating to the Equity Shares and this Issue

**59. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.***

The Issue Price / Price of the Equity Shares will be determined by our Company and in consultation with the LM through the Fixed Price mechanism. This price will be based on numerous factors, as described under "*Basis for Issue Price*" on page 72 of this Draft Prospectus and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, problems such as temporary closure, broker default and settlement delays experienced by the Indian Stock Exchanges, strategic actions by us or our competitors, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. Consequently, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share price could fluctuate significantly because of market volatility. A decrease in the market price of our Equity Shares could cause investors to lose some or all of their investment.

**60. *The trading volume and market price of our Equity Shares may be volatile post the Issue.***

The market price of the Equity Shares may fluctuate as a result of the following factors, some of which are beyond our control:

- (i) General economic and stock market conditions;
- (ii) Quarterly variations in our results of operations;
- (iii) Changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- (iv) Announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital

commitments;

- (v) Announcements by third parties or governmental entities of significant claims or proceedings against us;
- (vi) New laws and governmental regulations applicable to our industry;
- (vii) Additions or departures of key management personnel;
- (viii) Changes in exchange rates;
- (ix) Public's reaction to our press releases, other public announcements and filings with the regulator;
- (x) Any additional investment or sale of investment by significant shareholders(s);
- (xi) Fluctuations in stock market prices and volume.

Changes as regards any of the factors above could adversely affect the price of our Equity Shares.

**61. *Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Applications (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application.***

Pursuant to the SEBI ICDR Regulations, Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application. While our Company is required to complete Allotment pursuant to the issue within three Working Days from the Bid/ Issue Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the applicant's ability to sell the Equity Shares Allotted pursuant to the issue or cause the trading price of the Equity Shares to decline on listing.

**62. *Future sales of Equity Shares by our Promoters and promoter group may adversely affect the market price of our Equity Shares.***

After the completion of the Issue, our Promoters and promoter group will own, directly and indirectly, approximately [●] % of our outstanding Equity Shares. Sales of a large number of the Equity Shares by our Promoters and/or significant shareholders could adversely affect the market price of the Equity Shares. Similarly, the perception that any such primary or secondary sale may occur could adversely affect the market price of the Equity Shares. Except as disclosed in "**Capital Structure**" on page 54 of this Draft Prospectus, no assurance may be given that our significant shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

**63. *Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.***

The Equity Shares will be listed on the Stock Exchange. Pursuant to the applicable Indian laws and practice, permission for listing of the Equity Shares will not be granted till the Equity Shares in this Issue have been issued and allotted and all relevant documents are submitted to the Stock Exchanges. Further, certain actions must be completed prior to the commencement of listing and trading of the Equity Shares such as the Investor's book entry or 'demat' accounts with the depository participants in India, expected to be credited within one (1) Working Day of the date on which the Basis of Allotment is finalized with the Stock Exchange. In addition, the Allotment of Equity Shares in the Issue and the credit of such Equity Shares to the applicant's demat account with the depository participant could take approximately 2 (two) Working Days from the Bid / Issue Closing Date and trading in Equity Shares upon receipt of listing and trading approval from the Stock Exchanges, is expected to commence within three (3) Working Days from Bid/ Issue Closing Date. Any failure or delay in obtaining the approval or otherwise commence trading in Equity Shares would restrict your ability to dispose of your Equity Shares. We cannot assure you that the Equity Shares will be credited to investors' demat accounts or that trading in the Equity Shares will commence in a timely manner (as specified herein) or at all. We could also be required to pay interest at the applicable rates if the allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

**64. *Significant differences exist between Ind AS and other accounting principles, such as U.S GAAP and IFRS, which investors may consider material to their assessment of our financial condition.***

Our Restated Financial Statements for September 30, 2023, 2023, FY 2022-23, 2021-22 and 2020-21, have been prepared and presented in conformity with Ind GAAP. Ind GAAP differs in certain significant respects from IND AS, IFRS, U.S. GAAP and other accounting principles with which prospective investors may be familiar in other countries. If our financial statements were to be prepared in accordance with such other accounting principles, our results of operations, cash flows and financial position may be substantially different. Prospective investors should review the accounting

policies applied in the preparation of our financial statements, and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should be limited accordingly.

**65. *Rights of shareholders of our Company under Indian law may be more limited than under the laws of other jurisdictions.***

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and wide-spread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder of our Company than as a shareholder of an entity in another jurisdiction.

**66. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under the current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax ("STT") is levied both at the time of transfer and acquisition of the equity shares (unless exempted under a prescribed notification), and the STT is collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long term capital gains tax in India. Such long-term capital gains exceeding ₹ 1 lakh arising from the sale of listed equity shares on the stock exchange are subject to tax at the rate of 10% (plus applicable surcharge and cess). Unrealized capital gains earned on listed equity shares up to January 31, 2018, continue to be tax-exempted in such cases. Further, STT will be levied and collected by an Indian stock exchange if the equity shares are sold on a stock exchange. With respect to capital gains arising in an off-market sale, long term capital gains are subject to tax at the rate of 10% (plus applicable surcharge and cess) without the exemption of ₹ 1 lakh. Short-term capital gains, arising from the sale of such equity shares on a stock exchange would be subject to tax at the rate of 15% (plus applicable surcharge and cess), while short term capital gains arising in an off-market sale would be subject to tax at a higher rate of 40% (plus applicable surcharge and cess) in the case of foreign companies and 30% (plus applicable surcharge and cess) in the case of other non-resident taxpayers.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020. It clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. As such, there is no certainty on the impact that the Finance Act, 2019 may have on our Company's business and operation.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Additionally, the Finance Act, 2020 does not require dividend distribution tax to be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident. Historically, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

**67. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.***

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions), if they comply with the valuation and reporting requirements specified by the RBI, from time to time. If a transfer of shares is not in compliance with such requirements and fall under any of the exceptions specified by the RBI, then the RBI's prior approval is required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms, or at all. In terms of Press Note 3 of 2020, dated April 17, 2020, issued by the Department for Promotion of Industry and Internal Trade ("DPIIT"), as consolidated in the FDI Policy with effect from October 15, 2020, all investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the GoI. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or

indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the GoI. Any such approval(s) would be subject to the discretion of the regulatory authorities. This may cause uncertainty and delays in our future investment plans and initiatives.

We cannot assure you that any required approval from the relevant governmental agencies can be obtained on any particular terms or at all. For further details, please see “*Restrictions on Foreign Ownership of Indian Securities*” on page 294 of this Draft Prospectus.

Moreover, the exchange control regulations we are subject to constrain our ability to remit dividends to our Shareholders. There is no assurance that your dividends will not be subject to any delay or deduction. In addition, the exchange control regulations we are subject to could affect the availability of cash and cash equivalents for use by our Company, which may adversely affect our business, results of operations, financial condition and cash flows.

**68. *The determination of the Price is based on various factors and assumptions and the Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.***

The determination of the Price is based on various factors and assumptions and will be determined by our Company, in consultation with the LM. Furthermore, the Issue Price of the Equity Shares will be determined by our Company in consultation with the LM, through the fixed price mechanism. These will be based on numerous factors, including factors as described under “*Basis for the Issue Price*” on page 72 of this Draft Prospectus and may not be indicative of the market price for the Equity Shares after the Issue. The factors that could affect the market price of the Equity Shares include, among others, broad market trends, financial performance and results of our Company post-listing, and other factors beyond our control. We cannot assure you that an active market will develop or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

**69. *Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (ASM) and Graded Surveillance Measures (GSM) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.***

SEBI and Stock Exchanges in order to enhance market integrity and safeguard interest of investors, have been introducing various enhanced pre-emptive surveillance measures. The main objective of these measures is to alert and advise investors to be extra cautious while dealing in these securities and advise market participants to carry out necessary due diligence while dealing in these securities. Accordingly, SEBI and Stock Exchanges have provided for (a) GSM on securities where such trading price of such securities does not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net-worth, price per equity multiple and market capitalization; and (b) ASM on securities with surveillance concerns based on objective parameters such as price and volume variation and volatility. On listing, we may be subject to general market conditions which may include significant price and volume fluctuations. The price of our Equity Shares may also fluctuate after the Issue due to several factors such as volatility in the Indian and global securities market, our profitability and performance, performance of our competitors, changes in the estimates of our performance or any other political or economic factor. The occurrence of any of the abovementioned factors may trigger the parameters identified by SEBI and the Stock Exchanges for placing securities under the GSM or ASM framework such as net worth and net fixed assets of securities, high low variation in securities, client concentration and close to close price variation. In the event our Equity Shares are covered under such pre-emptive surveillance measures implemented by SEBI and the Stock Exchanges, we may be subject to certain additional restrictions in relation to trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active market for and trading of our Equity Shares.

### INTRODUCTION

Healthcare has become one of India’s largest sectors, both in terms of revenue and employment. Healthcare comprises hospitals, medical devices, clinical trials, outsourcing, telemedicine, medical tourism, health insurance and medical equipment. The Indian healthcare sector is growing at a brisk pace due to its strengthening coverage, services, and increasing expenditure by public as well as private players.

India’s healthcare delivery system is categorised into two major components - public and private. The government, i.e., the public healthcare system, comprises limited secondary and tertiary care institutions in key cities and focuses on providing basic healthcare facilities in the form of Primary Healthcare Centers (PHCs) in rural areas. The private sector provides the majority of secondary, tertiary, and quaternary care institutions with a major concentration in metros, tier-I, and tier-II cities. India’s competitive advantage lies in its large pool of well-trained medical professionals. India is also cost-competitive compared to its peers in Asia and Western countries. The cost of surgery in India is about one-tenth of that in the US or Western Europe. The low cost of medical services has resulted in a rise in the country’s medical tourism, attracting patients from across the world. Moreover, India has emerged as a hub for R&D activities for international players due to its relatively low cost of clinical research.

## OUR PROCEDURES

The following are brief descriptions of some of the common super-specialty procedures performed at our hospitals:

### Cardiac Care

Open heart surgery includes any surgery where the chest is opened and surgery is performed on the heart, including on the heart muscle, valves, arteries and other cardiac structures. Coronary Artery Bypass Graft (“CABG”) surgery, which is open heart surgery, involves using a healthy blood vessel from one part of the body to construct a detour around the blocked coronary artery.

### *Electrocardiogram (ECG)*

An electrocardiogram (ECG) is one of the simplest and fastest tests used to evaluate the heart. Electrodes (small, plastic patches that stick to the skin) are placed at certain spots on the chest, arms, and legs. The electrodes are connected to an ECG machine by lead wires.

### *Echocardiogram*

An echocardiogram is an ultrasound test that checks the structure and function of your heart. An echo can diagnose a range of conditions including cardiomyopathy and valve disease. There are several types of echo tests, including transthoracic and transesophageal.

### *Coronary Angiography:*

In a coronary angiography (“CAG”) procedure, a thin plastic tube (a catheter) is guided through an artery in the arm or leg to the coronary arteries. A liquid dye is injected through the catheter, and is visible in X-rays that record the course of the dye as it flows through the arteries. This identifies the blocked areas in the coronary arteries and aids decisions about the best course of action. The procedure is conducted in a cardiac catheterization laboratory rather than an operating theater.

### *Coronary Angioplasty:*

Percutaneous Transluminal Coronary Angioplasty (“PTCA”) involves guiding a catheter with a small balloon on its tip to the blocked areas of arteries through another catheter and then inflating the balloon, which compresses the plaque build-up, widening the artery for blood flow.

### *Installation of a pacemaker*

A pacemaker is used to control or increase the heartbeat. It stimulates the heart as needed to keep it beating regularly. A pacemaker may have two parts (a) pulse generators; and (b) leads. To place a pacemaker, a doctor inserts one or more wires into a major vein under or near the collarbone. The doctor uses X-ray images to guide the wires to the heart. One end of each wire attaches to the proper area in the heart. The other end connects to the part of the pacemaker that delivers electrical pulses. That part is called a pulse generator. It usually is placed under the skin beneath the collarbone.

##### **(B) Basis of Preparation of Financial Statement**

The Restated Statement of Assets and Liabilities of the Company as on September 30, 2023, and the Restated Statement of Profit and Loss and Restated Statements of Cash Flows for the financial year / period ended on September 30, 2023, and the annexure thereto (collectively, the “Restated Financial Statements”) have been compiled by the management from the Financial Statements of the Company for the financial year / period ended on September 30, 2023.

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 (‘Act’) read with Rule 7 of the Companies (Accounts) Rules, 2014. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

##### **(C) Significant Accounting Policies**

###### **1) Use of Estimates:**

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to contingent liabilities as at the date of the financial statements and reported amounts of income and expenses during the period. Examples of such estimates include computation of percentage of completion which requires the Company to estimate the efforts or costs expended to date as a proportion of the total efforts or costs to be expended, provisions for doubtful debts, future obligations under employee retirement benefit plans, income taxes, post-sales customer support and the use-full lives of fixed tangible assets and intangible assets. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

###### **2) Fixed Assets & Depreciation:**

**Tangible Assets:**

All items of fixed assets are stated at historical cost less accumulated depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance expenses are charged to profit or loss during the reporting period in which they are incurred

Depreciation on fixed assets is provided on pro rata basis as per Straight Line Method based on the estimated useful life of various assets, as specified in Schedule II of the Companies Act, 2013.

**Intangible Assets:**

An intangible asset is recognized when it is probable that the future economic benefits attributable to the asset will flow to the enterprise and where its cost can be reliably measured. Intangible assets are stated at cost of acquisition less accumulated amortization and impairment losses, if any. Cost comprises the purchase price and any cost attributable to bringing the assets to its working condition for its intended use which includes taxes and allocated incidental expenditure during development / acquisition and exclusive of Input tax credit (IGST/CGST and SGST) or other tax credit available to the Company.

Subsequent expenditure relating to intangible assets is capitalized only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

**Assets Acquired as Lease:**

Leases under which the Entity assumes substantially all the risks and rewards of ownership are classified as finance leases. Such assets are capitalized at fair value of the asset or present value of the minimum lease payments at the inception of the lease, whichever is lower. Lease payments under operating leases are recognized as an expense in the Profit and Loss Account on a straight-line basis over the lease term.

The cost of leasehold land is amortized over the period of the lease. Leasehold improvements and assets acquired on finance lease are amortized over the lease term or useful life, whichever is lower.

**Advances paid towards the acquisition of Property, Plant and Equipment**

Advances paid towards the acquisition of Property, Plant and Equipment, outstanding at each balance sheet date are shown under capital advances. The cost of the Property, Plant and Equipment not ready for its intended use on such date, is disclosed under capital work-in-progress.

**3) Impairment of Assets:**

An asset is treated as impaired when the carrying cost of assets exceeds its recoverable value. Impairment loss is charged to the Statement of Profit and Loss in the year / period in which an asset is identified as impaired. The impairment loss recognized in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

**4) Investments:**

Investments, which are readily realizable and intended to be held for not more than 12 months from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments. On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

**5) Inventories :**

Inventories consisting of stock-in-trade are valued at the lower of cost and net realisable value. Cost comprises all cost of purchases and other cost incurred in bringing the inventories to their present location and condition. Cost is determined on the specific identification basis"

The comparison of cost and net realisable values made on an item-by-item basis.

The premium or discount on forward exchange contracts is recognized in the statement of profit and loss over the period of the contract.

**9) Accounting For Government Grants/Refunds:**

Government grants/subsidies and refunds due from Government Authorities are accounted when there is reasonable certainty of their realization.

## **10) Taxation**

Tax expenses comprise current tax (amount of tax for the period determined in accordance with the Income Tax Regulations in India) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the period).

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted by the Balance Sheet date, Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realized in future; however, when there is unabsorbed depreciation or carry forward losses under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realization of such assets. Deferred tax assets are reviewed at each Balance Sheet date and written down or written up to reflect the amount that is reasonably / virtually certain, as the case may be, to be realized

Tax credit is recognised in respect of Minimum Alternate Tax (MAT) as per the provisions of Section 115JAA of the Income Tax Act, 1961 based on convincing evidence that the Company will pay normal income tax within the statutory time frame and is reviewed at each Balance Sheet date.

Company has policy of not considering MAT tax credit available to them under the Income Tax Act.

## **11) Borrowing Cost:**

Borrowing Costs relating to the acquisition/construction of qualifying assets are capitalized until the time all substantial activities necessary to prepare the qualifying assets for their intended use are complete. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are charge to revenue.

## **13) Provisions, Contingent Liabilities & Contingent Assets:**

The company recognizes as provisions, the liability being present obligations arising from past events, the settlement of which is expected to result in outflow of resources and which can be measured only by using a substantial degree of estimation. Contingent liabilities are disclosed by way of a note to the financial statement after careful evaluation by the management of the facts and legal aspect of the matters involved. Contingent assets are being neither recognized nor disclosed.

## **14) Current Assets, Loans And Advances**

The balance under items of Sundry Debtors, Loans and Advances and current liabilities are subject to confirmation and reconciliation and consequential adjustments, wherever applicable. However, in the opinion of the Management, the realisable value of the current assets, loans and advances in the ordinary course of business will not be less than the value at which they are stated in the Balance Sheet.

1) The ratios have been computed as below:

a. Basic and Diluted earnings per share ( ` ) =

Net profit available for appropriation ( as restated)

Weighted average number of equity shares outstanding at the end of the period or year

b. Return on net worth (%) =	$\frac{\text{Net profit available for appropriation ( as restated)}}{\text{Net worth at the end of the period/year}}$
c. Net assets value per share =	$\frac{\text{Net Worth at the end of the period/year}}{\text{Number of equity shares outstanding at the end of the period/ year}}$

**2)** Weighted average number of equity shares is the number of equity shares outstanding at the beginning of the period/year adjusted by the number of equity shares issued during period/year multiplied by the time weighting factor. The time weighting factor is the number of days for which the specific shares are outstanding as a proportion of total number of days during the period/year.

**3)** Net Worth means the aggregate of the paid up share capital, share premium account, and reserves and surplus (excluding revaluation reserve) as reduced by the aggregate of miscellaneous expenditure (to the extent not adjusted or written off) and the debit balance of the profit and loss account.

**4)** The figures disclosed above are based on the standalone restated summary statements of the Company.

**5)** The above statement should be read with the significant accounting policies and notes to restated summary statements of assets and liabilities, profits and losses and cash flows appearing in Annexures 1, 2, 3 and 4.

**6)** EBITDA represents earnings (or profit / loss) before interest, income taxes, and depreciation and amortisation expenses.

##### **(B) Basis of Preparation of Financial Statement**

The Restated Statement of Assets and Liabilities of the Company as on March 31, 2021, March 31, 2022, March 31, 2023, and June 30, 2023, and the Restated Statement of Profit and Loss and Restated Statements of Cash Flows for the financial year / period ended on March 31, 2021, March 31, 2022, March 31, 2023, and June 30, 2023, and the annexure thereto (collectively, the “Restated Financial Statements”) have been compiled by the management from the Financial Statements of the Company for the financial year / period ended on March 31, 2021, March 31, 2022, March 31, 2023, and June 30, 2023.

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 (‘Act’) read with Rule 7 of the Companies (Accounts) Rules, 2014. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

##### **(C) Significant Accounting Policies**

###### **1) Use of Estimates:**

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to contingent liabilities as at the date of the financial statements and reported amounts of income and expenses during the period. Examples of such estimates include computation of percentage of completion which requires the Company to estimate the efforts or costs expended to date as a proportion of the total efforts or costs to be expended, provisions for doubtful debts, future obligations under employee retirement benefit plans, income taxes, post-sales customer support and the use-full lives of fixed tangible assets and intangible assets. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

## 2) Fixed Assets & Depreciation:

### **Tangible Assets:**

All items of fixed assets are stated at historical cost less accumulated depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance expenses are charged to profit or loss during the reporting period in which they are incurred.

Depreciation on fixed assets is provided on pro rata basis as per Straight Line Method based on the estimated useful life of various assets, as specified in Schedule II of the Companies Act, 2013.

### **Intangible Assets:**

An intangible asset is recognized when it is probable that the future economic benefits attributable to the asset will flow to the enterprise and where its cost can be reliably measured. Intangible assets are stated at cost of acquisition less accumulated amortization and impairment losses, if any. Cost comprises the purchase price and any cost attributable to bringing the assets to its working condition for its intended use which includes taxes and allocated incidental expenditure during development / acquisition and exclusive of Input tax credit (IGST/CGST and SGST) or other tax credit available to the Company.

Subsequent expenditure relating to intangible assets is capitalized only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

### **Assets Acquired as Lease:**

Leases under which the Entity assumes substantially all the risks and rewards of ownership are classified as finance leases. Such assets are capitalized at fair value of the asset or present value of the minimum lease payments at the inception of the lease, whichever is lower. Lease payments under operating leases are recognized as an expense in the Profit and Loss Account on a straight-line basis over the lease term.

The cost of leasehold land is amortized over the period of the lease. Leasehold improvements and assets acquired on finance lease are amortized over the lease term or useful life, whichever is lower.

### **Advances paid towards the acquisition of Property, Plant and Equipment**

Advances paid towards the acquisition of Property, Plant and Equipment, outstanding at each balance sheet date are shown under capital advances. The cost of the Property, Plant and Equipment not ready for its intended use on such date, is disclosed under capital work-in-progress.

## 3) Impairment of Assets:

An asset is treated as impaired when the carrying cost of assets exceeds its recoverable value. Impairment loss is charged to the Statement of Profit and Loss in the year / period in which an asset is identified as impaired. The impairment loss recognized in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

## 4) Investments:

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 (‘Act’) read with Rule 7 of the Companies (Accounts) Rules, 2014. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

**(C) Significant Accounting Policies**

**1) Use of Estimates:**

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to contingent liabilities as at the date of the financial statements and reported amounts of income and expenses during the period. Examples of such estimates include computation of percentage of completion which requires the Company to estimate the efforts or costs expended to date as a proportion of the total efforts or costs to be expended, provisions for doubtful debts, future obligations under employee retirement benefit plans, income taxes, post-sales customer support and the use-full lives of fixed tangible assets and intangible assets. Accounting estimates could change from period to period. Actual results could differ from those estimates. #### **PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE**

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working

days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

***Phase I:***

This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

***Phase II:***

This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

***Phase III:***

SEBI Circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 UPI Phase II was extended till March 31, 2020. Subsequently, the final reduced timeline of T+3 days for the UPI Mechanism for applications by UPI Bidders (“**UPI Phase III**”) and modalities of the implementation of UPI Phase III was notified by SEBI vide its circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 and made effective on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023. The Issue will be undertaken pursuant to the processes and procedures as may be prescribed by the SEBI from time to time. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Issue.

The Issue will be made under UPI Phase II of the UPI Circulars, unless Phase III of the UPI Circulars becomes mandatorily effective and applicable on or prior to the Issue Opening Date. If the Issue is made under UPI Phase III of the UPI Circulars, the same will be advertised in shall be advertised in all editions of [●] (a widely circulated English national daily newspaper), all editions of [●] (a widely circulated Hindi national daily newspaper), and all editions of Gujrati newspaper (Gujrati being the regional language of Gujarat, where our Registered Office is located), on or prior to the Issue Opening Date and such advertisement shall also be made available to the Stock Exchanges for the purpose of uploading on their websites.

All SCSBs offering the facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/or payment instructions of the UPI Bidders using the UPI.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints, the relevant SCSB as well as the post-Issue LM will be required to compensate the concerned investor.

Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the LM, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The responsibility of granting approval for foreign investment under the Consolidated FDI Policy and FEMA has been entrusted to the concerned ministries / departments.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry (formerly Department of Industrial Policy and Promotion), Government of India (“**DPIIT**”) issued the Consolidated FDI Policy, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. Under the current FDI Policy, 100% foreign direct investment is permitted in the service sector, under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that: (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations, (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy, and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“**Restricted Investor**”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction / purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Each Applicant should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

**The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, such Equity Shares are being offered and sold (i) outside of the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sales occur.**
