Prior to making an investment decision, prospective investors should carefully consider all of the information contained in the section titled “Restated Financial Information” beginning on page number 117 of this Draft Red Herring Prospectus.

If any one or more of the following risks as well as other risks and uncertainties discussed in the Draft Red Herring Prospectus were to occur, our business, financial condition and results of our operation could suffer material adverse effects and could cause the trading price of our Equity Shares and the value of investment in the Equity Shares to materially decline which could result in the loss of all or part of investment. Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India, and is therefore subject to a legal and regulatory environment that may differ in certain respects from that of other countries.

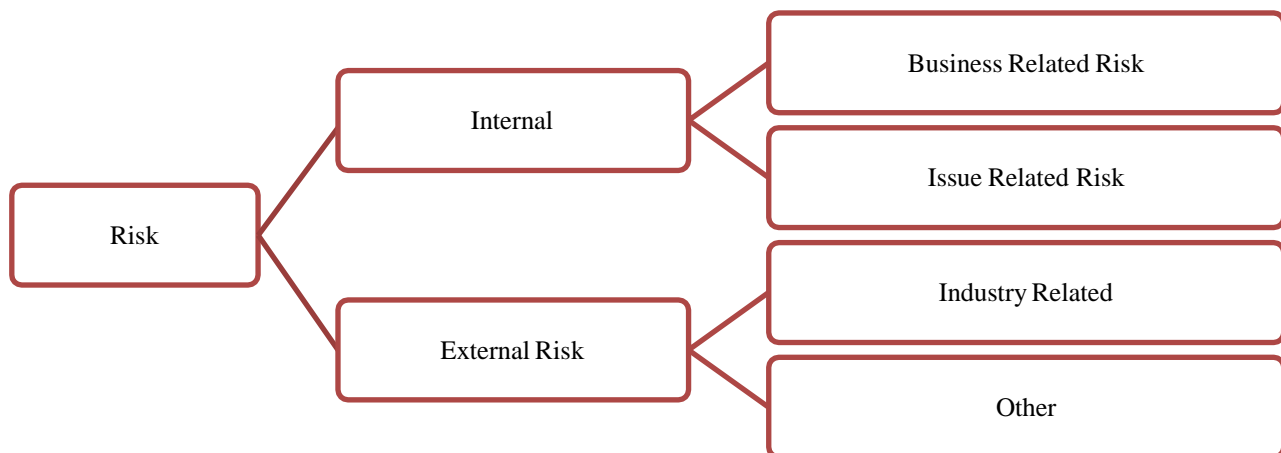

This Draft Red Herring Prospectus also contains forward looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of many factors, including the considerations described below and elsewhere in the Draft Red Herring Prospectus. These risks are not the only ones that our Company face. Our business operations could also be affected by additional factors that are not presently known to us or that we currently consider to be immaterial to our operations. INTERNAL RISK FACTORS

- 1. The income tax department for the Assessment Year 2017-18 has made an addition of the entire turnover of ₹.626.63 Lakhs and demanded tax of the ₹.484.07. The Company has filed an appeal before the Division Bench of the Hon'ble Calcutta High Court against the demand of the Income Tax Department.***

The National Faceless Assessment Centre, Delhi, of the income tax department for the Assessment Year 2017-18 has made an addition of the entire turnover of ₹626.63 Lakhs and demanded tax of the same amount. This is done arbitrarily ignoring the material gathered by the department in the course of assessment proceedings and erroneously making addition of an exorbitant amount of ₹ 626.63 which is totally contrary to the income disclosed by the Company and also contrary to the income assessed by the Income Tax Department in the earlier and as well as in the subsequent Assessment Years. The total amount demanded by the Income Tax Dept. was ₹.1,031.07 Lakhs which included tax of ₹.484.07 and ₹.547.00 as interest. The Company has filed an appeal before the Division Bench of the Hon'ble Calcutta High Court against the demand of the Income Tax Department and the same is pending. In case the appeal is not allowed by the Hon'ble Calcutta High Court, the same may have an adverse impact on the on Company's financial condition, cash flow and results of operations.

- 2. We are dependent on our ability to develop new services and products, and enhance our existing services and products. If our products and services do not gain market acceptance, our operating results may be negatively affected.***

Rapid technological advances, changing delivery models and evolving standards in software development and maintenance, increasing customer needs, frequent new product introductions and enhancements characterize the industry in which we operate. Digitization is driving major changes in the global business software market, with IT leaders looking to adopt new technologies and software platforms to meet business needs, including revenue growth driven through new products and services, better customer experience and delivery mechanisms, and growth in revenue and profits. Our success depends upon our ability to anticipate, design, develop, test, market and support new software products, services, and enhancements of current products and services in response to evolving industry requirements.

To effectively meet customer demand, it is important that we continue to enhance our products and service offerings. The markets for our offerings are rapidly evolving due to which the level of acceptance of such products and services is not certain.

If we are unable to develop new or sufficiently differentiated products and services, enhance our product offerings and support services in a timely manner or position and price our products and services to meet demand including in response to new industry standards, it may have an adverse impact on our business.

If the markets for our services fail to develop, develop slower than expected or experience increased competition, our business may suffer. As a result, we may be unable to successfully market our existing services and products, develop and successfully launch new products and services and enhancements to existing products and services, complete customer implementations on a timely basis, or complete products and services currently under development. If our services are not accepted by our customers, our business, operating results and financial condition will be materially adversely affected. For further details regarding our business, please refer to chapter titled "Our Business" beginning on page 78 of this Draft Prospectus.

- 3. The length of our sales cycle may fluctuate significantly and depends on several external factors which may result in significant fluctuations in our revenues.***

A customer's decision to purchase our services or products often involves a comprehensive implementation process across the customer's network(s) which includes customer education, evaluation by a number of employees in our customers' organisation and, often, a significant strategic or operational decision by our customers. Our sales efforts involve educating our customers about the use and benefits of our products and solutions, including any potential cost savings achievable by organisation that partner with us.

Customers sometimes undertake a significantly long evaluation process which also involves evaluation of our competitors' services and can result in a lengthy sales cycle. Moreover, a purchase decision by a potential customer typically requires extended evaluation, testing and the approval of senior decision makers. We spend substantial time, effort and money on our sales efforts without any assurance that our efforts will produce any sales. Additionally, implementing our products and any related services may entail a significant commitment of resources by prospective customers, accompanied by the risks and delays frequently associated with significant technology implementation projects. Such delays and fluctuations could cause our revenues and results of operation to fluctuate significantly across time periods, and we may not be able to adjust our costs quickly enough to offset such lower revenues, potentially adversely impacting our business, operating results and financial condition.

4. *We may become liable to our customers and lose customers if we have defects or disruptions in our service or if we provide poor service.*

We deliver technology as a service, and errors or defects in the software applications underlying our services, or a failure of our hosting infrastructure, may make our services unavailable to our customers. Majority of our contracts or service agreements involve projects that are critical to the operations of our clients' businesses. Any failure in a client's system and any direct damages, expenses, costs, obligations could result in a claim for substantial damages against us depending on the terms agreed in the contracts or service agreements. In the past, we have never been subjected to any such direct damages, expenses, costs, obligations. However, any errors, defects, disruptions in service or other performance problems with our services, whether in connection with the day-to-day operation of our services, upgrades or otherwise, could damage our customers' businesses. Such events may also give rise to complaints and actions against us. All these factors could adversely affect our business and results of operation.

5. *Our business is dependent on the contractual arrangements entered into by us. Many of our client contracts can be terminated with or without cause by providing notice and without termination-related penalties.*

We enter contracts with our clients which impose several contractual obligations upon us. If we are unable to meet these contractual obligations and / or our clients perceive any deficiency in our services, we may face legal liabilities and consequent damage to our reputation which may in-turn adversely impact our business, financial condition and results of operations. There are also some contracts, which terminable by our clients in writing upon committing any breach or non-observance of any conditions of the Agreements entered into viz. fraud by our Company or any misconduct of our associate employees which could adversely affect the reputation of our clients.

While, we consider all factors internally prior to entering into such contractual agreements, we cannot assure you that such clients may choose to terminate their agreements with our Company based on the terms stated above. Further, the non-compliance or breach of the terms of the contractual arrangements by either party to the agreements may lead to, among other things, damages, penalties or termination of the agreements, which may consequently result in our inability to attract further business in the future.

6. *We are registered with Webel Technologies Limited which is a nodal agency for the Government of West Bengal for implementation of IT and ITes. In case we lose our registration with Webel Technologies Limited, our business and results of operations may be adversely affected.*

We are registered with Webel Technologies Limited which is a nodal agency for the Government of West Bengal for implementation of IT and ITes. We participate in the orders floated by Webel Technologies Limited for its IT and ITes and similar jobs from the different departments of the Government of West Bengal. While, we consider all factors internally prior to taking such orders, we cannot assure you that we could continue to be rewarded with such orders from Webel Technologies Limited. In case of loss of orders or de-registration of our Company by Webel Technologies Limited, our business, operating results and financial condition will be materially adversely affected.

7. *Our Company requires several statutory and regulatory permits, licenses and approvals for its operations. Our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business may have a material adverse effect on our business & operations.*

We require various statutory and regulatory licenses, permits and approvals to operate our business. We need to make compliance and applications at appropriate stages of our business to continue our operations. Any failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

We believe that we have complied considerably with such laws and regulations, as are applicable to us however, statutory/regulatory authorities may allege non-compliance and we cannot assure you that we will not be subjected to any such regulatory action in the future, including penalties, and other civil or criminal proceedings. For further details, please refer to section titled "Government and Other Approvals" beginning on page 171.

8. *Our Promoter play key role in our functioning and we heavily rely on his knowledge and experience in operating our business and therefore, it is critical for our business that our Promoter remain associated with us.*

Our success also depends on our key managerial personnel and our ability to attract and retain them. Any loss of our key person could adversely affect our business, operations and financial condition. The success of our business operations is attributable to our Promoter, Directors and the technical team. We believe that our relation with our Promoter, who have rich experience in markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. Our Promoter have been actively involved in the day-to-day operations and management since the incorporation

of the Company. In case our Promoter disassociates himself from our Company, we may have to incur additional costs to replace the services of our promoter or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

We also depend significantly on the expertise, experience and continued efforts of our technical team; hence, our performance and success substantially depend on the ability to attract and retain our key employees, including our management team and experienced personnel. There can be no assurance that any member of our senior management or other experienced personnel will not leave us in the future. The lack of or loss of the services of such key persons in the organization could seriously impair our ability to continue to manage and expand our business. Our success is also dependent on our continuous ability to identify, hire, train retain and motivate R&D team, technical team, servicing team and sales and marketing personnel. Competition for personnel in our industry is intense, and the availability of suitable and qualified candidates is limited. If we fail to hire and retain our employees, the loss of their services could harm our business operations and financial condition could be adversely affected.

9. *Any IT system failures or lapses on part of any of our employees may lead to operational interruption, liabilities or reputational harm.*

The success of our businesses depends in part upon our ability to effectively deploy, implement and use information technology systems and advanced technology initiatives in a cost effective and timely basis. Our information technology systems include multiple applications, coding, configuration and other systems that allocate resources and facilitate internal and external communications, enabling us to coordinate and make quick decisions across our business. Our computer networks may be vulnerable to unauthorised access, computer hacking, computer viruses, worms, malicious applications and other security problems caused by unauthorised access to, or improper use of, systems by our employees, subcontractors or third-party vendors. Any systems failure or security breach or lapse on our part or on the part of our employees and other ecosystem participants that results in the release of user data could harm our reputation and brand and, consequently, our business, in addition to exposing us to potential legal liability. Any such legal proceedings or actions may subject us to significant penalties and negative publicity, require us to change our business practices, increase our costs and severely disrupt our business.

10. *Our failure to adapt to technological developments or industry trends could affect the performance and features of our products and services and reduce our attractiveness to our customers.*

As our operations grow in scope and size, whether through offering of new services or expansion into new markets, we must continuously improve, upgrade, adapt and expand our systems and infrastructure to offer our customers enhanced services, features and functionality ahead of rapidly evolving customer demands, while maintaining the reliability and integrity of our systems and infrastructure in a cost-efficient and competitive manner. The systems, infrastructure and technologies we currently employ may become obsolete or be unable to support our increased size and scale. Even if we are able to maintain, upgrade or replace our existing systems or innovate or customize and develop new technologies and systems, we may not be as quick or efficient as our competitors in upgrading or replacing our systems. We may be unable to devote adequate financial resources or obtain sufficient financing on commercially acceptable terms in time, or at all, which may have a material adverse effect on our business, prospects, results of operation and financial condition.

Further, we may also not be able to attract talent to continue with the required upgrades and improvements to our systems. Our new systems, infrastructure and technologies may not perform satisfactorily, or be used effectively and we may also fail to adapt our products and services to our increased size and scale, customer requirements or emerging trends and industry standards. Further, there is no assurance that we will be able to downsize and scale back our systems and platforms quickly and efficiently enough to reduce unnecessary costs and expenses in the event that user demand falls below our expectations. In addition, to effectively manage our growth, we will also need to continue to improve our operational, financial and management controls, and our reporting systems and procedures.

Continued growth increases the challenges involved in, inter alia, continuous training and development of skilled and competent personnel and employees and developing and improving internal administrative infrastructure. These systems, enhancements and improvements will require significant capital expenditures and management resources. Failure to implement these improvements could adversely affect our ability to manage our growth. If we do not effectively manage our growth or appropriately expand and upgrade or downsize and scale back our systems and platforms, as the case may be, in a timely manner or at a reasonable cost, or both, or at all, we may lose market opportunities or damage our attractiveness and reputation with our customers, which may adversely affect our business, financial condition and results of operations.

11. *Our business is dependent on developing and maintaining continuing relationships with our clients and customers. The loss of any significant client or customer could have a material adverse effect on our business, financial condition and results of operations.*

Although, we generally do not enter into long-term supply contracts with our customers, our business is dependent on

developing and maintaining a continuing relationship with our key clients and customers. In the event of a significant decline in the demand for our products or services by our key clients, our business, results of operations and financial condition may be materially and adversely affected. There can be no assurance that we will be able to maintain the historic levels of business from these clients and customers or that we will be able to replace these clients in case we lose any of them. For further details of our clients, please refer to section titled 'Our Business' beginning on page 78.

12. *In execution of our projects, we collect information and data which are highly sensitive with regard to maintenance of secrecy of the projects and its data and information. Any failure on our part to maintain secrecy of our projects, will have an adverse effect on our results of operations and financial condition.*

We operate in an industry which is highly sensitive with regard to maintenance of secrecy of the projects and the data and information collected during the course of our operations. We provide our services to recruitment related exam management for government department and other academic exams, tax payer data management for Urban Development and Municipal Affairs and other urban local bodies. We have put in place firewall, security systems and procedures to protect the projects and its contents. Privacy of project content, its information, data including internet piracy, may decrease revenue from the exploitation of our projects. There was no incident of breach of our firewall, security systems and procedures in the past. However, there is no assurance that such breach will not occur in future also. Any failure on our part to maintain secrecy of our projects, will have an adverse effect on our results of operations and financial condition.

13. *There have been instances of delays of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 2013 to the Registrar of Companies (RoC). Further, there are certain forms which are pending for filing with RoC.*

In the past, there have been certain instances of delays in filing statutory forms which have been subsequently filed by payment of an additional fee as specified by the Registrar of Companies (RoC). It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays or defaults in relation to its reporting requirements. The happening of such event may cause imposition of fine / penalty which will affect results of our operations and financial position. Further, there are certain forms which are pending for filing with the RoC including forms for filing of appointment of Company Secretary due to technical glitches in MCA V3 portal. The failure on part of the Company to complete pending filing may have adverse effect on our results of operations and financial condition.

14. *We have substantial working capital requirements and may require additional financing to meet working capital requirements in the future. A failure in obtaining such additional financing at all or on terms favorable to us could have an adverse effect on our results of operations and financial condition.*

Our business requires significant amount of working capital and major portion of our working capital is utilized towards employee cost. As on March 31, 2023, we have ₹.155.09 Lakhs outstanding working capital loan. Our growing scale and expansion may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high inventories and outstanding amount due from our debtors which may adversely affect our cash flows and our business operations.

For further details regarding working capital requirement, please refer to the section "Objects of the Issue" beginning on page 59.

15. *If we are unable to attract new clients or our existing clients do not renew their contract, the growth of our business and cash flows will be adversely affected.*

Our top 10 (Top) clients contributed approximately 99% of our revenue from operations based on Restated Financial Statements for the year ended March 31, 2022. To increase our revenue and cash flows, we must regularly add new clients. If we are unable to generate sufficient sales leads through our marketing programs, or if our existing or new clients do not perceive our services to be of sufficiently high value and quality, we may not be able to increase sales and our operating results would be adversely affected. In addition, our existing clients have no obligation to repeat contracts / award new projects to us due to various factors including clients' satisfaction with our services, collection of data and information as desired by our clients, our prices and the prices of competing service providers. If we fail to achieve repetitive projects from existing clients or to add new clients, our operating results will suffer, and our revenue growth, cash flows and profitability may be materially and adversely affected. For further details of our clients, please refer to section titled 'Our Business' beginning on page 78.

16. *Interruptions or performance problems associated with our technology and infrastructure may harm our business and results of operations.*

Our continued growth depends in part on the ability of our existing and potential customers to access our solutions at any

time. Although there were no instances in the past where interruptions or problems with our technology and infrastructure have caused performance issues, we may in future experience disruptions, data loss, outages and other performance problems with our technology infrastructure due to a variety of factors, including infrastructure changes, introductions of new functionality, human or software errors, capacity constraints, denial of service attacks or other security-related incidents. In some instances, we may not be able to identify the cause or causes of these performance problems within an acceptable period of time. It may become increasingly difficult to maintain and improve our performance, especially during peak usage times and as our products and websites of our customers become more complex and user traffic increases. If our products and websites of our customers are unavailable or if users of such products and websites are unable to access products and websites within a reasonable amount of time, or at all, our business would also be harmed. Any disruptions in these services, including as a result of actions outside of our control, would significantly impact the continued performance of our products. Any loss of the right to use any of these services could result in decreased functionality of our products until equivalent technology is either developed by us or, if available from another provider, is identified, obtained and integrated into our infrastructure. To the extent that we do not effectively address capacity constraints, upgrade our systems as needed, and continually develop our technology and network architecture to accommodate actual and anticipated changes in technology, our business, results of operations and financial condition could be harmed.

17. We may not be able to sustain effective implementation of our business and growth strategy.

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business plan but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

18. Our Promoter, Directors and Key Management Personnel have interest in our Company, other than reimbursement of expenses incurred or remuneration.

Our Promoter, Directors and Key Management Personnel can be deemed to be interested to the extent of the Equity Shares held by them, or their relatives, dividend entitlement, or loans advanced, provided by them for our Company, and benefits deriving from the directorship in our Company. Our Promoter is interested in the transactions entered into our Company and our Promoter Group. For further information, please refer to the chapters/section titled “Our Business”, “Our Promoter and Promoters’ Group” and “Related Party Transactions”, beginning on pages 78, 111 and 116 respectively.

19. Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.

Our Company had experienced negative net cash flow from operations during the Financial Years ended March 31, 2022, the details of which are provided below:

(₹ in lacs)	
Particulars	March 31, 2022
Net cash from Operating Activities	(13.66)

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

20. There may be potential conflicts of interest if our Promoter or Directors get involved in any business activities that compete with or are in the same line of activity as our business operations.

At present our Promoter is not engaged in any other business having object similar to the line of business of our Company. However, there can be no assurance that our Promoter or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

21. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule

The proposed fund requirement for our expansion plan, as detailed in the section titled “Objects of the Issue” is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “Objects of the Issue” beginning on page 59.

22. If we are unable to maintain and enhance our brand and reputation, the sales of our products may suffer which would have a material adverse effect on our business operations.

Our business depends significantly on the strength of our brand and reputation in industry we operate. We also believe that

maintaining and enhancing the “  ” brand, are critical to maintaining and expanding our customer base. We believe that continuing to develop awareness of our brand, through focused and consistent branding and marketing initiatives is important for our ability to increase our sales volumes and our revenues, grow our existing market share and expand into new markets. Consequently, product defects, consumer complaints, or negative publicity or media reports involving us, or any of our products could harm our brand and reputation and may dilute the impact of our branding and marketing initiatives and adversely affect our business and prospects. In addition, adverse publicity about any regulatory or legal action against us could damage our reputation and brand image, undermine our consumers’ confidence in us and reduce long-term demand for our products, even if the regulatory or legal action is unfounded or immaterial to our operations.

23. We are exposed to the risk of delays or non-payment by our clients and other counterparties, which may also result in cash flow mismatches.

We are exposed to counter party credit risk in the usual course of our business dealings with our clients or other counterparties who may delay or fail to make payments or perform their other contractual obligations. The financial condition of our clients, business partners, suppliers and other counterparties may be affected by the performance of their business which may be impacted by several factors including general economic conditions. We cannot assure you of the continued viability of our counterparties or that we will accurately assess their creditworthiness. We also cannot assure you that we will be able to collect the whole or any part of any overdue payments. Any material non-payment or non-performance by our clients, business partners, suppliers or other counterparties could affect our financial condition, results of Operations and cash flows. For further details of our business and clients, please refer chapter titled “Our Business” and “Management Discussion & Analysis Conditions and Result of Operations” beginning on page 78 & 158 of this Draft Red Herring Prospectus.

24. We have issued Equity Shares during the last one year at a price that may be below the Issue Price.

During the last one year we have issued Equity Shares at a price that is lower than the Issue Price as detailed in the following table:

Date of allotment	Number of Equity Shares allotted	Face value(₹)	Issue Price (₹)	Nature of Consideration	Nature of allotment

For further details regarding average cost of acquisition of Equity Shares by our Promoter in our Company, please refer to page no. 48 of this Draft Red Herring Prospectus.

26. We have not made any dividend payments in the past and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.

In the past, we have not made dividend payments to the shareholders of our Company. The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows and requirement to fund operations and expansion of the business. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors. For further details, please refer “Dividend Policy” on page 117 of this Draft Red Herring Prospectus.

There can be no assurance that our Equity Shares will appreciate in value. For details regarding our dividend policy, please see “Dividend Policy” on page no 117 of this Draft Red Herring Prospectus.

- 27. *There have been instances of delays in payment of statutory dues, i.e. EPFO and ESIC, by the Company. In case of any delay in payment of statutory due in future by our Company, the Regulatory Authorities may impose monetary penalties on us or take certain punitive actions against our Company in relation to the same which may have adverse impact on our business, financial condition and results of operations.***

In the past, there have been certain instances of delays in payment of statutory dues, i.e. EPFO and ESIC, by the Company. Our Company has already made provisions in the financials of the Company for such delay payments. It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays or defaults in relation to payment of statutory dues. The happening of such event may cause imposition of fine / penalty which may have adverse effect on the results of our operations and financial position.

- 28. *In case of any inability arise to source business opportunities effectively, we may not achieve our financial objectives.***

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees, expand our sales channel and to implement systems capable of effectively accommodating our growth. However, we cannot assure that any such employees or marketing agents will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analysis of market conditions and other data or the strategies that we may use in future to use will be successful under various market conditions.

- 29. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.***

The issue price of the equity shares has been based on many factors and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled “Basis for Issue Price” beginning on page 63. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

- 30. *The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles “Objects of the Issue”.***

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 59 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

- 31. *Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

- 32. *The requirements of being a public listed company may strain our resources and impose additional requirements.***

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business

and operations.

There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

33. *Our operations could be adversely affected by disputes with employees.*

We believe we maintain good relationships with our workforce, there can be no assurance that the Company will not experience future disruptions to its operations due to disputes or other problems with its work force.

34. *Interest rate fluctuations may adversely affect the Company's business.*

The Company have outstanding borrowings of ₹. 155.09 Lakhs as on March 31, 2023, to finance its capital requirements in the ordinary course of business for general working capital purposes. In the event interest rates increase, the Company's costs of borrowing will increase, and its profitability and results of operations may be adversely affected.

35. *Industry information included in this Draft Red Herring Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Red Herring Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics.

Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Red Herring Prospectus.

36. *Our inability to manage growth could disrupt our business and reduce profitability.*

A principal component of our strategy is to continuously grow by expanding the capacity, size and geographical reach of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

37. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian Company are generally taxable in India. Any gain realized on the sale of listed Equity Shares on a stock exchange held for more than 12 months shall be subject to capital gains tax in India at 10% of such capital gain exceeding ₹.1.00 lakh if Securities Transaction Tax (STT) has been paid on both acquisition and transfer of such shares. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realised on the sale of Equity Shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. However, any gain realized on the sale of listed Equity Shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India. For more details, please refer to “*Statement of Tax Benefits*” beginning on page 66.

38. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. [●] is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Maker, please refer to the section titled "General Information" Details of the Market Making Arrangement, for this Issue beginning on page 38.

However, even in such circumstances, the Company shall stay fully committed to pay such interest and/or refund the full application amount, as may be required in accordance with the applicable regulatory directives.

41. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

42. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.*

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- a. Volatility in the Indian and global capital market;
- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors,
- d. Adverse media reports on Company or pertaining to our Industry;
- e. Changes in our estimates of performance or recommendations by financial analysts;

There can be no assurance that an active trading market for the Equity Shares will develop or

43. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined by book building method. This price is based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 63 of this Draft Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;

All the figures included under the Objects of the Issue are based on our own estimates. There has been no independent appraisal of the project. We have not entered into any definitive agreements to utilize a portion of the Issue.

EXTERNAL RISK FACTORS

45. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

46. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of ₹. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

47. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- Custom duties on imports of raw materials and components;
- Goods and Service Tax

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any

of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

48. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

49. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Red Herring Prospectus.*

While facts and other statistics in the Draft Red Herring Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Industry Overview*” beginning on page 69 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

50. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

51. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

52. *The extent and reliability of Indian infrastructure could adversely affect our Company’s results of operations and financial condition.*

India’s physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company’s normal business activity. Any deterioration of India’s physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company’s business operations, which could have an adverse effect on its results of operations and financial condition.

53. *Any downgrading of India’s sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may

adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

54. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

55. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

GLOBAL OUTLOOK

It is two years into the COVID-19 pandemic and the global community still confronts extreme social and economic strain as the human toll rises and millions remain unemployed. Yet, even with high uncertainty about the path of the pandemic, a way out of this health and economic crisis is increasingly visible. Thanks to the ingenuity of the scientific community hundreds of millions of people are being vaccinated and this is expected to power recoveries in many countries later this year. Economies also continue to adapt to new ways of working despite reduced mobility, leading to a stronger-than-anticipated rebound across regions. Additional fiscal support in large economies, particularly the United States, has further improved the outlook.

The global economy enters 2022 in a weaker position than previously expected. As the new Omicron COVID-19 variant spreads, countries have reimposed mobility restrictions. Rising energy prices and supply disruptions have resulted in higher and more broad-based inflation than anticipated, notably in the United States and many emerging market and developing economies. The ongoing retrenchment of China’s real estate sector and slower-than-expected recovery of private consumption also have limited growth prospects.

Global growth is expected to moderate from 5.9 in 2021 to 4.4 percent in 2022—half a percentage point lower for 2022 than in the October World Economic Outlook (WEO), largely reflecting forecast markdowns in the two largest economies. A revised assumption removing the Build Back Better fiscal policy package from the baseline, earlier withdrawal of monetary accommodation, and continued supply shortages produced a downward 1.2 percentage-points revision for the United States.

In China, pandemic-induced disruptions related to the zero-tolerance COVID-19 policy and protracted financial stress among property developers have induced a 0.8 percentage-point downgrade. Global growth is expected to slow to 3.8 percent in 2023. Although this is 0.2 percentage point higher than in the previous forecast, the upgrade largely reflects a mechanical pickup after current drags on growth dissipate in the second half of 2022. The forecast is conditional on adverse health outcomes declining to low levels in most countries by end-2022, assuming vaccination rates improve worldwide and therapies become more effective.

Elevated inflation is expected to persist for longer than envisioned in the October WEO, with ongoing supply chain disruptions and high energy prices continuing in 2022. Assuming inflation expectations stay well anchored, inflation should gradually decrease as supply-demand imbalances wane in 2022 and monetary policy in major economies responds.

Risks to the global baseline are tilted to the downside. The emergence of new COVID-19 variants could prolong the pandemic and induce renewed economic disruptions. Moreover, supply chain disruptions, energy price volatility, and localized wage pressures mean uncertainty around inflation and policy paths is high. As advanced economies lift policy rates, risks to financial stability and emerging market and developing economies' capital flows, currencies, and fiscal positions—especially with debt levels having increased significantly in the past two years may emerge. Other global risks may crystallize as geopolitical tensions remain high, and the ongoing climate emergency means that the probability of major natural disasters remains elevated.

With the pandemic continuing to maintain its grip, the emphasis on an effective global health strategy is more salient than ever. Worldwide access to vaccines, tests, and treatments is essential to reduce the risk of further dangerous COVID-19 variants. This requires increased production of supplies, as well as better in-country delivery systems and fairer international distribution. Monetary policy in many countries will need to continue on a tightening path to curb inflation pressures, while fiscal policy—operating with more limited space than earlier in the pandemic will need to prioritize health and social spending while focusing support on the worst affected. In this context, international cooperation will be essential to preserve access to liquidity and expedite orderly debt restructurings where needed. Investing in climate policies remains imperative to reduce the risk of catastrophic climate change.

Downside surprises in the second half of 2021: Supply disruptions continued into the fourth quarter, hindering global manufacturing—especially in Europe and the United States. A resurgence in COVID cases (particularly in Europe) also held back a broader recovery. In China, disruptions from COVID outbreaks, interruptions to industrial production from power outages, declining real estate investment, and a faster-than-expected withdrawal of public investment all contributed to a second-half slowdown. Although there were signs of a global turnaround in November—with a pickup in international trade and upside surprises for services activity and industrial production data—this only partially offset earlier declines.

The pandemic's continued grip: Since the start of October, COVID-19 deaths have averaged about 7,000 a day worldwide, down from about 10,000 in late August. The diffusion of vaccines—although still uneven—has played a major role, with over 55 percent of people having received at least one dose. Yet the emergence of the Omicron variant in late November threatens to set back this tentative path to recovery. As of mid-January, Omicron appeared to be more transmissible than Delta, but its symptoms are perhaps less severe. The baseline forecast is conditioned on adverse health outcomes—severe illness, hospitalizations, and deaths—coming down to low levels in most countries by the end of 2022. This assumes that most countries achieve vaccination rates consistent with the IMF's pandemic proposal by end-2022, therapies become widely accessible, and the combination proves effective in protecting against Omicron and any other variants that emerge. Some emerging market and developing economies are anticipated to fall short of the vaccination target in 2022 and achieve sufficiently broad coverage only in 2023.

Global Growth Set to Moderate and Inflation to Persist Longer

Global growth is estimated at 5.9 percent in 2021 and is expected to moderate to 4.4 percent in 2022, half a percentage point lower than in the October 2021. The baseline incorporates anticipated effects of mobility restrictions, border closures, and health impacts from the spread of the Omicron variant. These vary by country depending on susceptibility of the population, the severity of mobility restrictions, the expected impact of infections on labour supply, and the importance of contact-intensive sectors. These impediments are expected to weigh on growth in the first quarter of 2022. The negative impact is expected to fade starting in the second quarter, assuming that the global surge in Omicron infections abates and the virus does not mutate into new variants that require further mobility restrictions. Forecasts are based on information up to January 18, 2022.

The 2022 forecast downgrade also reflects revisions among a few large emerging markets. In China, disruption in the housing

sector has served as a prelude to a broader slowdown. With a strict zero-COVID strategy leading to recurrent mobility restrictions and deteriorating prospects for construction sector employment, private consumption is likely to be lower than anticipated. In combination with lower investment in real estate, this means that the growth forecast for 2022 is revised down relative to October by 0.8 percentage point, at 4.8 percent, with negative implications for trading partners' prospects.

The upward revision to global growth in 2023 is mostly mechanical. Eventually, the shocks dragging 2022 growth will dissipate and—as a result—global output in 2023 will grow a little faster. Among prominent revisions not due to the pandemic, India's prospects for 2023 are marked up on expected improvements to credit growth—and, subsequently, investment and consumption—building on better-than-anticipated performance of the financial sector. The upward revision to 2023 global growth is, however, not enough to make up ground lost due to the downgrade to 2022. Cumulative global growth over 2022 and 2023 is projected to be 0.3 percentage point lower than previously forecast.

INDIAN ECONOMIC

The last two years have been difficult for the world economy on account of the COVID-19 pandemic. Repeated waves of infection, supply-chain disruptions and, more recently, inflation have created particularly challenging times for policy-making. Faced with these challenges, the Government of India's immediate response was a bouquet of safety-nets to cushion the impact on vulnerable sections of society and the business sector. It next pushed through a significant increase in capital expenditure on infrastructure to build back medium-term demand as well as aggressively implemented supply-side measures to prepare the economy for a sustained long-term expansion.

The Indian economy grew 8.7 per cent in 2021-22, with the gross domestic product (GDP) expanding 4.1% in the March quarter from a year ago. The GDP growth for 2021-22 takes the economy above its pre-pandemic level and is an improvement after contracting 6.6% in 2020-21. But the January-March quarter expansion was the weakest in the previous fiscal year. It is lesser than the 5.4% growth seen during the December quarter of 2021-22. Incidentally, the economic growth during the entire fiscal of 2021-22 has gradually spiralled downwards with each quarter.

In the first quarter of 2021-22, the economic growth had been a stupendous 20.1%, which however was mainly due to the low base effect. In the second quarter it was 8.4%, while it was 5.4% in third quarter. Now for the fourth quarter it has slid down to 4.1%. The GDP for 2021-22 though is lesser than the 8.9% growth estimated by the Ministry of Statistics and Programme Implementation (MoSPI), which releases the GDP data. The 8.7% growth also falls way short of the Reserve Bank of India's (RBI) estimation of 9.5% of GDP growth for 2021-22. Even the March quarter growth of 4.1% is much lesser than RBI's projection for the period, which was estimated to be at 6.1%.

The overall value of global trade reached the value of \$28.5 trillion in FY 2021, 25 per cent higher than FY 2020. India's exports of both goods and services have been good in 2021-22. Despite rising trade costs, merchandise exports have crossed the US\$30 billion mark in eight consecutive months in FY 2021-22. The reasons for rising trade costs are global supply constraints such as fewer operational shipping vessels, exogenous events such as blockage of the Suez Canal and the Covid-19 pandemic in China's port city, Shenzhen, etc.

India has also been witnessing significant inflationary pressures similar to the global economy.

India has been consistently emphasizing on supply-side reforms, rather than a total reliance on demand management. These reforms include deregulation of numerous sectors, simplification of processes, removal of legacy issues like 'retrospective tax', privatization and production-linked incentives, higher rural income, and the boost from pent-up household savings in addition to continued emphasis on infrastructure spending by the government. Vaccination has played an important role in minimizing loss of lives, boosting confidence in the economy towards the resumption of activity and containing the sequential decline in output due to the second wave. Government CAPEX is budgeted to grow to 2.9% of GDP in FY 2022-23 the highest in nearly two decades. Private corporate investment is also expected to pick up in the second half of the year with improvement in demand leading to increased manufacturing sector capacity utilization and rollout of the Production-Linked Incentive Scheme

The outlook stands to be impacted given sustained inflation pressures in the next few quarters including the impact of Russia – Ukraine conflict, quicker tightening of financial conditions with RBI's rate hikes, high oil prices impacting current account balance and fiscal deficit and subsequent Covid-19 outbreaks. However the Indian economy is well prepared for any challenges that it might face in FY 2022-23.

Road Ahead

Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution, on January 21, 2022 said that Indian industry to raise 75 unicorns in the 75 weeks leading up to the country's 75th anniversary next year.

Mr. Piyush Goyal said that India will achieve exports worth US\$ 650 billion in the financial year 2021-22.

India's electronic exports are expected to reach US\$ 300 billion by 2025-26 this will be nearly 40 times the FY2021-22 exports (till December 2021) of US\$ 67 billion.

As per the data published in a Department of Economic Affairs report, in the first quarter of FY22, India's output recorded a 20.1% YoY growth, recovering >90% of the pre-pandemic output in the first quarter of FY20. India's real gross value added (GVA) also recorded an 18.8% YoY increase in the first quarter of FY22, posting a recovery of >92% of its corresponding pre-pandemic level (in the first quarter of FY20). Also, in FY21, India recorded a current account surplus at 0.9% of the GDP. The growth in the economic recovery is due to the government's continued efforts to accelerate vaccination coverage among citizens. This also provided an optimistic outlook to further revive industrial activities.

As per RBI's revised estimates of July 2021, the real GDP growth of the country is estimated at 21.4% for the first quarter of FY22. The increase in the tax collection, along with government's budget support to states, strengthened the overall growth of the Indian economy.

India is focusing on renewable sources to generate energy. It is planning to achieve 40% of its energy from non-fossil sources by 2030, which is currently 30% and have plans to increase its renewable energy capacity from to 175 gigawatt (GW) by 2022. In line with this, in May 2021, India, along with the UK, jointly launched a 'Roadmap 2030' to collaborate and combat climate change by 2030.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behavior and expenditure pattern, according to a Boston Consulting Group (BCG) report. It is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by 2040 as per a report by PricewaterhouseCoopers.

INDIAN IT INDUSTRY

Introduction

The IT & BPM sector has become one of the most significant growth catalysts for the Indian economy, contributing significantly to the country's GDP and public welfare. The IT industry accounted for 7.4% of India's GDP in FY22, and it is expected to contribute 10% to India's GDP by 2025.

As innovative digital applications permeate sector after sector, India is now prepared for the next phase of growth in its IT revolution. India is viewed by the rest of the world as having one of the largest Internet user bases and the cheapest Internet rates, with 76 crore citizens now having access to the internet.

The current emphasis is on the production of significant economic value and citizen empowerment, thanks to a solid foundation of digital infrastructure and enhanced digital access provided by the Digital India Programme. India is one of the countries with the quickest pace of digital adoption. This was accomplished through a mix of government action, commercial innovation and investment, and new digital applications that are already improving and permeating a variety of activities and different forms of work, thus having a positive impact on the daily lives of citizens.

India's rankings improved six places to the 40th position in the 2022 edition of the Global Innovation Index (GII).

MARKET SIZE

According to National Association of Software and Service Companies (Nasscom), the Indian IT industry's revenue touched US\$ 227 billion in FY22, a 15.5% YoY growth.

According to Gartner estimates, IT spending in India is expected to increase to US\$ 101.8 billion in 2022 from an estimated US\$ 81.89 billion in 2021.

Indian software product industry is expected to reach US\$ 100 billion by 2025. Indian companies are focusing on investing internationally to expand their global footprint and enhance their global delivery centres.

The data annotation market in India stood at US\$ 250 million in FY20, of which the US market contributed 60% to the overall value. The market is expected to reach US\$ 7 billion by 2030 due to accelerated domestic demand for AI.

Exports from the Indian IT industry stood at US\$ 149 billion in FY21. Export of IT services has been the major contributor,

accounting for more than 51% of total IT export (including hardware). BPM and engineering and R&D (ER&D) and software products export accounted for 20.78% each to total IT exports during FY21. The ER&D market is expected to grow to US\$ 42 billion by 2022.

The IT industry added 4.45 lakhs new employees in FY22, bringing the total employment in the sector to 50 lakhs employees.

OUR BUSINESS STRATEGIES

Our overall strategy is structured around our Self-Service Products & Content, and its successful exploitation to ensure that it can be monetized through diversified platforms and multi-copy selling within India and on a worldwide basis. Our strategy is designed to address predictability, scalability and sustainability, ultimately resulting in profitability.

The key elements of our strategy are as follows:

1. *Acquire new clients and deepen key account relationships*

Over the years we have developed long standing relationships with our customers. We devote significant attention to being able to understand the behavior, preferences and trends of our customers through research and a consultation process. We believe that this gives us a distinct perspective that we bring to our engagements.

We are focused on continuing to expand our relationships with existing customers by helping them solve new problems

and become more engaging, responsive and efficient. We have a demonstrated track record of expanding our work with customers after an initial engagement. As we have done previously, we aim to sustain the annual revenue contribution of a customer in subsequent years after the year of customer acquisition. Expansion of our relationships with existing active customers will remain a key strategy going forward as we continue to leverage our domain expertise and knowledge of emerging technology trends in order to drive incremental growth for our business.

We believe that we continue to have opportunities to add new customers to our portfolio. We use next-generation technologies, including AI, to help our customers transform areas ranging from technical IT processes to complex business processes. Leveraging our creative and engineering capabilities, we work with our customers to create complete solutions, often involving custom, task-oriented user interfaces, integration and continuous delivery pipelines. We often use a blend of open source, commercial and custom technologies in order to optimize for cost, flexibility, sophistication and long-term sustainability requirements unique to our customers' environments. Where appropriate, we also work with the cloud delivery providers with respect to both their infrastructure-as-a-service and SaaS offerings.

Our customers often choose us for creation of their digital roadmap and proof-of-concept of their digital journey due to our specialization in disruptive technologies and digital focus. Successful execution of these high-value assignments leads to larger implementation projects and long-term relationships.

2. Diversify our Business Portfolio

Based on the continuous upward growth of technology and modulation of the needs of the clients, we intend to expand further indifferent sectors with innovative ideas. We have traditionally focused on enterprises that are technology- and information-centric, where we believe our software development expertise is valued in the same vertical such as Custom Development, Indigenous Development and Artificial Intelligence. We now intend to diversify the business activity by inclusion of new domain such as product development, training and capacity building, project management and fintech. We believe that expanding our business in the same industry at different vertical in the process chain will enable to deliver our services efficiently. We plan to continue enhancing our expertise in different verticals by recruiting IT professionals with industry expertise.

3. Enhancing existing technology and thrive to make people centric policies and practices

IT sector being the most revolutionizing sector, it directly or indirectly affects other sectors who are dependent on internet and technology. In the digital era, innovation, entrepreneurial dynamism, and information and ICT production will drive India's competitive edge. We intend to come up with innovative techniques that enables to create innovative trends to retain the client by providing services that are user friendly and develop systems according to the needs of the people in the changing world. Adopting people centric policies and practices not only does it enable us to retain clients by creating efficiency in their business activities but it also helps in creating a different software model which becomes beneficial to our business profile.

A spike in consumer demand for flexible pay-as-you-go models coupled with large IT companies integrating costly cloud-based tools with enterprise systems has brought the cloud to the mass market. Ambient experience, exponential intelligence, and quantum are the nascent macro forces we currently see on the distant horizon.

4. Increase in Productivity and Efficiency

Our Company are into development of reusable components with a moto to reduce the timeframe of delivery by at least 40%. This will lead to improve the productivity and efficiency of our softwares for the clients. Not only do these innovations help businesses assimilate into the digital ecosystem, but small businesses' willingness to invest in these capabilities and other IT-related services exposes them to better local market opportunities and profit margins.

Decreasing transaction costs have also levelled the playing field by significantly lowering barriers to entry and allowing local and regional producers to operate on a global scale, which is critical to creating the sharing economy. Technologies help to democratize production, allowing small- and medium-sized producers access to previously unavailable processes and know-how. We believe that investing in new hardware and software tools and entering into resale markets of hardware shall make it easier than ever to turn a creative idea into a functional prototype. Innovative software and integration tools have further simplified the creation of complex parts. Digital enablement has thus had a direct impact on reducing inefficiencies in transaction costs and information asymmetries inherent in traditional vertical value chains.

5. Enhance customer base by entering new geographies

We intend to cater to the increasing demand of our existing customers and also to increase our existing customer base by enhancing our geographical reach. Presently, we are concentrated in the state of West Bengal. Enhancing our presence in additional regions will enable us to reach out to a larger market and have direct access to the clients which will allow us to have better understanding of their requirement. d. PROPERTY, PLANT & EQUIPMENT

Items of property, plant and equipment are measured at cost, less accumulated depreciation and accumulated impairment losses.

The cost of an item of property, plant and equipment comprises: (a) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates; (b) any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management; (c) the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

The cost of a self-constructed item of property, plant and equipment comprises the cost of materials and direct labour, any other cost directly attributable to bringing the item to working condition for its intended use.

The cost of improvements to leasehold premises, if recognition criteria are met, are capitalized and disclosed separately under leasehold improvement.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal and retirement of an item of property, plant and equipment is determined as the difference between the sale proceeds and the carrying amount of the asset is recognized in Statement of profit and loss.

Subsequent cost

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with expenditure will flow to the Company and the cost of the item can be measured reliably. All other subsequent cost are charged to Statement of profit and loss at the time of incurrence.

Depreciation

Depreciation on PPE is provided on the Straight Line method computed on the basis of useful life prescribed in Schedule II to the Companies Act, 2013 ('Schedule II') on a pro-rata basis from the date the asset is ready to put to use.

The residual values, useful lives and methods of depreciation of property plant and equipment are reviewed by management at each reporting date and adjusted prospectively, as appropriate.

e. INVENTORIES

Inventories of finished goods are valued at cost or net realizable value ('NRV'), whichever is lower. Costs of inventories has been determined using weighted average cost method and comprise all costs of purchase after deducting non-refundable rebates and discounts and all other costs incurred in bringing the inventories to their present location and condition. Provision is made for items which are not likely to be consumed and other anticipated losses wherever considered necessary. The comparison of cost and NRV for traded goods is made on at item Company level basis at each reporting date. However, there is no inventory of any products.

f. LEASES

Lease payments in respect of assets taken on operating lease are charged to the Statement of profit and loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with the expected general inflation to compensate the lessor's expected inflationary cost increases, if any. However, there is no lease payments during the period under consideration.

g. BORROWING COSTS

Borrowing costs attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for intended use. All other borrowing costs are recognized as an expense in the period in which they are incurred. Capitalization of borrowing costs is suspended during the extended period in which active development is interrupted. Capitalization of borrowing costs is ceased when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete. Other borrowing costs are charged to statement of profit and loss as and when incurred.

g. IMPAIRMENT OF ASSETS

At each reporting date, the Company reviews the carrying amounts of its non-financial assets to determine whether there is any indication of impairment. If any such indication of impairment exists, then the asset's recoverable amount is estimated. For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or cash generating units ('CGU').

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its estimated recoverable amount.

Impairment losses are recognized in the Statement of profit and loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU and then to reduce the carrying amounts of the other assets in the CGU on a pro-rata basis.

For other assets, an impairment loss is reversed only if there has been a change in the estimates used to determine the recoverable amount. Such a reversal is made only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized

h. PROVISIONS AND CONTINGENT LIABILITIES AND ASSETS

Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of a past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Contingent liabilities

Contingent liabilities are possible obligations that arise from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote.

i. EMPLOYEE BENEFITS

Employee benefit liabilities such as salaries, wages and bonus, etc. that are expected to be settled wholly within twelve months after the end of the reporting period in which the employees render the related service are recognized in respect of employee's services up to the end of the reporting period and are measured at an undiscounted amount expected to be paid when the liabilities are settled.

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any relating to income taxes. It is measured using tax rates enacted for the relevant reporting period. It is determined as the amount of tax payable under the provisions of Income Tax Act, 1961, in respect of taxable income for the year.

Deferred Tax

Deferred income taxes reflect the impact of current year timing difference between taxable income and accounting income for the year and reversal of timing difference of earlier year. Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date.

Current Tax for the year

Current Tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

Monetary foreign currency assets and liabilities remaining unsettled on reporting date are translated at the rates of exchange prevailing on reporting date. Gains/(losses) arising on account of realisation/settlement of foreign exchange transactions and on translation of monetary foreign currency assets and liabilities are recognised in the Restated Consolidated Statement of profit and loss.

Foreign exchange gains / (losses) arising on translation of foreign currency monetary loans are presented in the Restated Consolidated Statement of profit and loss on net basis. However, foreign exchange differences arising from foreign currency monetary loans to the extent regarded as an adjustment to borrowing costs are presented in the Restated Consolidated Statement of profit and loss, within finance costs.

31 Disclosure pursuant to Accounting Standard - 15 'Employee Benefits' as notified u/s 133 of the Companies Act, 2013

31.1 Defined Benefit Plan:

The following are the types of defined benefit plans:

a Gratuity Plan

15 days salary for every completed year of service. Vesting period is 5 years and payment is restricted to Rs. 20 lacs. The present value of defined obligation and related current cost are measured using the Projected Credit Method with actuarial valuation being carried out at each balance sheet date.

b Risk Exposure

Through its defined benefit plans, the company is exposed to a number of risks, the most significant of which are detailed below:

Interest Rates Risk	The defined benefit obligation calculated uses a discount rate based on government bonds. If bond yields fall, the defined benefit obligation will tend to increase. Thus, the plan exposes the Company to the risk of fall in interest rates. Sometimes, the fall can be permanent, due to a paradigm shift in interest rate scenarios because of economic or fiscal reasons. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability (as shown in financial statements). Even for funded schemes, a paradigm downward shift in bond yields may affect the reinvestment yields and may increase ultimate costs.
Salary Inflation Risk	The present value of the defined benefit plan is calculated with the assumption of salary escalation rate(SER), which is applied to find the salary of plan participants in future, at the time of separation Higher than expected increases in salary will increase the defined benefit obligation and will have an exponential effect.
Demographic Risk	Demographic assumptions are required to assess the timing and probability of a payment taking place. This is the risk of volatility of results due to unexpected nature of decrements that include mortality, attrition, disability and retirement. The effects of this decrement on the DBO depend upon the combination salary increase, discount rate, and vesting criteria and therefore not very straight forward. It is important not to overstate withdrawal rate because the cost of retirement benefit of a short serving employees will be less compared to long service employees.
Actuarial Risk	It is the risk that benefits will cost more than expected. This can arise due to one of the following reasons: Adverse Salary Growth Experience: Salary hikes that are higher than the assumed salary escalation will result into an increase in Obligation at a rate that is higher than expected. Variability in mortality rates: If actual mortality rates are higher than assumed mortality rate assumption than the Gratuity benefits will be paid earlier than expected. Since there is no condition of vesting on the death benefit, the acceleration of cash flow will lead to an actuarial loss or gain depending on the relative values of the assumed salary growth and discount rate. Variability in withdrawal rates: If actual withdrawal rates are higher than assumed withdrawal rate assumption than the Gratuity benefits will be paid earlier than expected. The impact of this will depend on whether the benefits are vested as at the resignation date.
Liquidity Risk	Employees with high salaries and long durations or those higher in hierarchy, accumulate significant level of benefits. If some of such employees resign / retire from the company there can be strain on the cash flows.
Asset Liability Mismatch:	This will come into play unless the funds are invested with a term of the assets replicating the term of the liability
Investment Risk:	For funded plans that rely on insurers for managing the assets, the value of assets certified by the insurer may not be the fair value of instruments backing the liability. In such cases, the present value of the assets is independent of the future discount rate. This can result in wide fluctuations in the net liability or the funded status if there are significant changes in the discount rate during the inter-valuation period.
Market Risk:	Market risk is a collective term for risks that are related to the changes and fluctuations of the financial markets. One actuarial assumption that has a material effect is the discount rate. The discount rate reflects the time value of money. An increase in discount rate leads to decrease in Defined Benefit Obligation of the plan benefits &

	vice versa. This assumption depends on the yields on the corporate / government bonds and hence the valuation of liability is exposed to fluctuations in the yields as at the valuation date.
Legislative Risk/Regulatory Risk:	Legislative risk is the risk of increase in the plan liabilities or reduction in the plan assets due to change in the legislation / regulation. The government may amend the Payment of Gratuity Act thus requiring the companies to pay higher benefits to the employees. This will directly affect the present value of the Defined Benefit Obligation. The new labour code is a case in point. And the same will have to be recognized immediately in the year when any such amendment is effective.

h Sensitivity Analysis

The sensitivity analyses below have been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period. Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below:

Particulars	Gratuity (31.03.2023)		
	% Increase in Defined Benefit Obligation	Liability	Increase / Decrease in Defined Benefit Obligations
Effect on DBO due to 1% increase in Discount Rate	-8.73%	14,42,940	(1,37,957)
Effect on DBO due to 1% decrease in Discount Rate	10.18%	17,41,788	1,60,891
Effect on DBO due to 1% increase in Salary Escalation Rate	9.80%	17,35,849	1,54,972
Effect on DBO due to 1% decrease in Salary Escalation Rate	-8.53%	14,46,006	(1,34,891)
Effect on DBO due to 1% increase in Attrition Rate	-0.29%	15,76,280	(4,617)
Effect on DBO due to 1% decrease in Attrition Rate	0.33%	15,86,173	5,276
Mortality rate 10% Up	0.01%	15,80,696	(201)

While one of the parameters mentioned above is changed by 100 basis points, other parameters are kept unchanged for evaluating the DBO. While there is no change in the method used for sensitivity analysis from previous period, the change in assumptions now considered are with reference to the current assumptions. Although the analysis does not take account of the full distribution of cash flows expected under the plan, it does provide an approximation of the sensitivity of the assumptions shown.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
