We cannot assure you that our net cash flows will be positive in the future. Negative operating cash flows over extended periods, or significant negative operating cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. If our Company is not able to generate sufficient cash flows to finance our projects, make new capital expenditure, pay dividends, make new investments or fund other liquidity needs which could have a material adverse effect on our business and results of operations.

5. ***Trade Receivables, Inventories and advances to suppliers form a substantial part of our current assets and net worth. Failure to manage our trade receivables and advances could have an adverse effect on our net sales, profitability, cash flow and liquidity.***

Our business is working capital intensive and hence, Trade Receivables and Advances to Suppliers form substantial part of our current assets and net worth. Our, Trade Receivables, Inventories and Advances to Suppliers as on December 31, 2023 were ₹ 2,332.65 lakhs, ₹ 459.17 lakhs and ₹ 588.49 lakhs respectively which comprises of

75.92% of Total Assets and as on March 31, 2023, were ₹ 1,642.57 lakhs, 362.63 and ₹ 455.86 lakhs respectively which comprises of 71.15% of Total Assets. Being a trading company, our company is not invested highly in Capital Assets thereby making us an asset-light business model. The results of operations of our business are dependent on our ability to effectively manage our inventory, advances to suppliers and trade receivables. We generally procure materials on the basis of management estimates based on past requirements and future estimates. In case we fail to sell the products we purchased from various supplier based on the specific requirement of our customers, we may be required to write-down our inventory or create additional vendor financing, all of which could have an adverse impact on our income and cash flows. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. We run a risk to accurately evaluate the credit worthiness of our customers moreover because they are foreign customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

6. Our company is significantly dependent on few customers for our revenue in a particular financial year. The loss of any one or more of such customer may have a material effect on our business operations and profitability.

The percentage of revenue derived from our top five and top ten customers for period ended December 31, 2023 and Financial Year 2022-23 are given below:

(₹ in lakhs)

Sr. No	Particulars	Period ended Dec 31, 2023		F. Y 2022-23	
		Revenue	Percentage (%)	Revenue	Percentage (%)
1	Income from Top 5 Customer	2,865.90	38.63%	3,371.31	36.33%
2	Income from Top 10 Customer	4,396.50	59.26%	4,962.20	53.47%

Our top five and ten customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. Since our business is dependent among few significant customers, we could experience a reduction in our results of operations, cash flows and liquidity if we lose one or more of these customers or the amount of business we obtain from them is reduced for any reason. Further, in the event of loss of one or more set of such customers on whom we are dependent for our business, we cannot assure you that we may be able to offset such loss of business by identifying a new customer of our products.

Further, we also cannot assure you that the customers which contribute to the major part of our revenue stream will pay us the amounts due to us on time, or at all. In the event any of our significant customers fail to fulfill their respective obligations, our business, financial condition and results of operations would be adversely affected. While we believe we have maintained good and long-term relationships with our customers, there can be no assurance that we will continue to have such long-term relationship with them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

7. Our Company may have potential Conflicts of interest with our Promoter Group Entities as they are engaged in similar line of business.

Our Promoters have interests in other companies and entities that may compete with us, including other Group Companies that conducts businesses of exporting FMCG products, Food Stuffs and Pharmaceuticals. Our Promoters have also promoted other companies and may continue to do so. For details, please refer to the Chapter titled “Our Management” and “Our Promoters and Promoter Group” on page no 121 and 135 respectively of this Draft Prospectus.

Further, our Company has not entered into any non- compete agreement with the group companies and hence there can be no assurance of any conflict of interests which may arise in allocating or addressing business opportunities and strategies amongst our Company and our Group Companies in circumstances where our interests differ from theirs. In cases of conflict, our Promoter may favour other Companies in which our Promoter has an interest. Hence, conflict of interest may occur between our business and the businesses of our Group Companies which could have an adverse effect on our business, financial condition, results of operations and prospects.

8. ***In addition to normal remuneration, other benefits and reimbursement of expenses our directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company. Further our promoter has interest in our property and in past we have entered in related party transaction with them.***

Some of our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding, loan and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. Our Promoters currently holds 99.97% of shareholding of our Company and will hold 64.34 % of post issue shareholding of our Company. We cannot assure you that our directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our directors will always act to resolve any conflicts of interest in our favor, thereby adversely affecting our business and results of operations and prospects.

We have entered into related party transactions which are at an arm's length basis from time to time with our promoters, directors and group companies. Some of the regular related party transactions involved in our company are explained below:

- Our company has obtained unsecured loans which are currently interest free from our directors. Further, our directors may be interested in interest earned on such loans in the future or repayment of the same. Outstanding details of such loan as on December 31, 2023 is given below:
- We have obtained unsecured loan from our promoter group entities in the past. Furthermore, it is likely that we will enter related party transactions in the future. Hence, they might be interested in interest and repayment of such loans.
- We have entered into leave and license agreement for our office no 58 and 50 at Juhu Supreme Shopping Centre, Mumbai for office use with our promoters which costs us a monthly rent of ₹ 0.96 lakhs.
- In addition our Promoter Group Entity is interested in purchases, sales and other transaction in course of business operation.

We cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on our results of operations and financial condition.

9. ***Our Promoters and Key Managerial Person play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that they remain associated with us.***

Our success also depends upon the continued services of our Promoters and Key Managerial Persons and our ability to retain them. They are actively involved in marketing of the Company, timely execution of the orders and ensures that the quality control standards are met as required by other companies. Our Promoters, along with the key managerial personnel, have over the years build relations with customers, government agencies, custom house agents, third party logistics and other persons who are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

Further, our Promoters have also promoted other companies and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Any inability to attract and retain talented employees or the resignation or loss of key management personnel, may have an adverse impact on our business, future financial performance and the price of our equity shares.

10. ***The average shelf life of our products ranges from six months to two years. Any actual or alleged contamination could lead to legal liability, damage to brand reputation, and adverse impact on our business, results of operations, financial condition and cash flows.***

Our operations are subject to various contamination related risks which typically affect the FMCG industry, including product tampering; relatively short shelf life of certain of our products; improper storage of our products; labeling and packaging errors; and non-compliance with food safety and quality control standards. We cannot assure you that contamination of our products will not occur during the transportation, distribution and sales processes due to reasons unknown to us or beyond our control. If our products are found to be spoiled, contaminated, tampered with, incorrectly labeled or reported to be associated with any such incidents, we may be forced to recall our products and we could incur expenses for the sale and may not be able to collect revenue on sale of such products, which we may not be able to fully recover from our suppliers or insurance coverages. Any actual or alleged contamination or

deterioration of our products, whether deliberate or accidental, could result in damage to our brand, reputation and may adversely affect our business, results of operations, financial condition and cash flows.

11. *Our products are semi-perishable in nature and the average shelf life of our products ranges from six months to two years. Inaccurate demand forecasting for our semi-perishable product can result in excess inventory and waste which, in turn, could have an adverse effect on our business, financial condition, results of operations and cash flows.*

We sell a wide variety of savoury products including ethnic snacks such as namkeen and gathiya, western snacks such as wafers, snack pellets and extruder snacks, along with fast-moving consumer goods that include papad, spices, gram flour or besan, noodles, rusk and soan papdi, which are semi-perishable in nature. These products are semi-perishable in nature and the average shelf life of our products ranges from three to nine months. As our products are semi-perishable, any inaccuracies in predicting demand could result in excess inventory and subsequent wastage of the products. This wastage could have an adverse effects on our business, financial condition, results of operations, cash flows, and reputation. While there has not been any instance in the last three Fiscals and in the nine months ended December 31, 2023 where our business, results of operations and cash flows were adversely affected on account of the aforesaid risks, we cannot assure you that such instance will not arise in the future.

12. *We have offered Equity Shares during the last one year at a price below the Issue Price.*

Our Company had issued Bonus shares of 38,82,000 equity shares on March 30, 2024 in ratio of 3:1 and Private Placement Issue of 7,54,100 shares on May 07, 2024 at price of Rs. 65/- in the last 12 months at price which might be lower than the Issue Price. The Equity Shares allotted to shareholders pursuant to this Issue may be priced significantly higher due to various reasons including better performance by the Company, better economic conditions and passage of time. For further details, see “Capital Structure” on page 54 of this Draft Prospectus.

13. *The market for FMCG product food stuff and non-food stuff is large and intensely competitive.*

We face intense competition in the Indian snack food market, not only from various domestic and multinational companies in India, but also the unorganised sector. We expect competition could increase with new entrants coming into the FMCG industry, who may have more flexibility in responding to changing business and economic conditions, and existing players consolidating their positions. Further, expansion of our brand in new markets will require substantial advertising and promotional expenditures and some of our competitors may have access to significantly greater resources, including the ability to spend more on advertising and marketing and hence the ability to compete more effectively. Competitors may, whether through consolidation or growth, present more credible integrated or lower cost solutions than we do, which may have a negative effect on our business. We cannot assure you that we can continue to compete effectively with our competitors. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising by competitors, may affect the competitiveness of our products, which may affect our business, results of operations, financial condition and cash flows.

14. *Our Company has availed unsecured loans which are repayable on demand.*

As of December 31, 2023, our Company had availed unsecured loans amounting to ₹ 59.41 lakhs, comprising 2.79% of the total borrowings of our Company. Out of this an amount of Rs.18.77 lakhs is obtained from related parties which are repayable on demand while remaining amount of Rs. 40.64 lakhs are from other parties and are being paid based on EMI Schedule month on month. As of March 31, 2023, our Company had availed unsecured loans amounting to ₹ 34.54 lakhs, comprising 2.39% of the total borrowings of our Company and is obtained completely from other parties. Any sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, if we are unable to raise funds at short notice, it may result in shortage of working capital fund. For further details, please refer to the section “Unsecured Loans” under “Financial Statements” beginning on page no 145 of this Draft Prospectus. Any demand for the repayment of such unsecured loan, may have affect on our cash flow and financial condition.

15. *We have applied for few trademarks which are pending registration, and few trademarks are registered in name of our promoter. A delay in, or failure to obtain, registration or may result in our inability to adequately defend intellectual property rights.*

Any infringement of our corporate logo or failure to get it registered in our Company’s name from the promoters may adversely affect our business. Our logo is registered with Registrar of Trademark in the name of our promoter and

application of transfer to our Company's name is in process and if transfer of registered owner name with the Trade Mark Registry doesn't take place within two years as mentioned in the agreement, it may impact our business operations. Further, any kind of negative publicity or misuse of our brand name and our logo could hamper our brand building efforts and our future growth strategy could be adversely affected. Our ability to protect our intellectual properties, namely our trademark / logo is restricted until we receive registered trademark from the appropriate authority. We have made the application for our Word mark "KHYATI" and the status still pending with the Trade Marks Registry, Mumbai. Further, the same may involve costly litigations and penal provisions if the case may be.

We believe that our future growth and competitiveness would depend on our ability to establish and strengthen our brand. We cannot guarantee that we will be able to make a lasting brand image with our customers and other people in the absence of a logo. Although, we believe that that our present systems are adequate to protect our confidential information and intellectual property, there can be no assurance that our intellectual property data, trade secrets or proprietary technology will not be copied, infringed or obtained by third parties. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations. For further details pertaining to our intellectual property, please refer to the chapter titled "Our Business" beginning on page no 94 of this Draft Prospectus.

16. *The deployment of the Net Proceeds from the Fresh Issue are based on management estimates and have not been independently appraised by any bank or financial institution and is not subject to any monitoring by any independent agency and our Company's management will have flexibility in utilizing the Net Proceeds from the Fresh Issue.*

The deployment of the funds towards the objects of the Issue is entirely at the discretion of the Board and our Board will monitor the utilization of Net Proceeds. As per Regulation 262 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Fresh Issue size is not in excess of ₹ 100 crores. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Issue. Given the dynamic nature of our business, we may have to revise our business plan from time to time and consequently our funding requirements and deployment on account of variety of factors such as our financial condition, business and strategy, including external factors such as market conditions, competitive environment, costs of commodities and interest/ exchange rate fluctuations which may not be within the control of our management. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our operational and financial performance.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the Objects of the Issue, at a price and manner as specified in the SEBI ICDR Regulations. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoters or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI. Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds.

17. *We are dependent on third party transportation providers for the delivery of our products to our customers.*

We rely substantially on third party transportation providers for the supply of our products to our customers. Transportation strikes or non-availability of transportation could have an adverse effect on our ability to deliver the same to our customers. Increase in transportation costs or unavailability of transportation services for our products, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects. In addition, transportation costs in India have been steadily increasing over the past several years. While usually the end consumer bears the freight cost, we may not always be able to pass on these costs to our customers. In addition, India's physical infrastructure is less developed than that of many developed nations, and problems with its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity, including delivery of our products to customers by third-party transportation providers. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition.

18. We face foreign exchange risks, primarily in our export business that could adversely affect our results of operations.

We are exposed to foreign currency exchange risk as we are engaged in export business. We deal with customer in foreign currency and are affected with its fluctuation. We have even recorded foreign fluctuation gain and losses in our financial statement. For period December 31, 2023 and Fiscals 2023, 2022 and 2021, revenue from export of goods was ₹ 6,772.28 lakhs, ₹ 8,229.34 lakhs, ₹ 8,567.12 lakhs and ₹ 8,263.48 lakhs, constituting 91.29%, 88.68%, 94.77% and 95.82%, respectively, of our revenue from operation. Fluctuation in currency exchange rates influences our results of operations. In future we may continue to export our products and generate revenue denominated in foreign currencies. The exchange rates between Rupee and USD and between Rupee and EUR have changed substantially in recent years and may continue to fluctuate significantly in the future. Accordingly, any increase in the value of the Rupee against the U.S. Dollar and Euro or any other foreign currency would decrease the Rupee income from such export. Although we closely follow our exposure to foreign currencies and buy forward of such exposure in an attempt to reduce the risks of currency fluctuations, these activities are not always sufficient to protect us against incurring potential losses if currencies fluctuate significantly. Any such losses on account of foreign exchange fluctuations may affect our results of operations.

19. Restrictions on the export of our products and other regulations could adversely affect our business, results of operations and financial condition.

We operate as an export hub for FMCG products, food stuffs, handicraft items etc of majorly Indian brand items. Limitation or withdrawal, if any (in the case, for example, of embargoes or geopolitical conflicts), of the authorization to export the products might have a negative impact on our operations and financial situation. Further, failure to comply with the regulations and requirements could result in contract modifications or termination and the imposition of penalties, fines and withdrawal of authorizations, which could negatively affect our business, results of operations and financial condition. Authorizations can be revoked which may change in response to international conflicts or other political or geopolitical factors. Such factors could have a material adverse effect on our business and results of operations.

20. Our Warehouse, Guest House and some of our some of our business offices are not owned by us and we have only leasehold rights. In the event we lose or are unable to renew such leasehold rights, our business, results of operations, financial condition and cash flows may be adversely affected.

Our Offices located at Office No 50 and 58, on the 2nd floor, Gulmohar Cross Road No.9, JVPD Scheme, Mumbai 400049, is on lease hold basis. Additionally, our guest house located at Flat No. 103, 1st floor of Vikram Apartment, Janki Vikram, C.H.S.L, Juhu Church Road, Juhu, Mumbai-400049 is on leasehold basis. Further, our warehouse located at W-160, TTC Industrial Area, Pawane MIDC, Navi Mumbai 400710, Maharashtra is on leasehold basis. We cannot assure you that we will be able to renew our leases on commercially acceptable terms or at all. In the event that we are required to vacate our current premises, we would be required to make alternative arrangements for our infrastructure and we cannot assure that the new arrangements will be on commercially acceptable terms. If we are required to relocate our business operations, we may suffer a disruption in our operations or have to pay increased charges, which could have an adverse effect on our business, results of operations, financial condition and cash flows.

21. Our Company has limited storage capacity which can result in stock out cost and loss of customer adversely affecting our business and results of operations.

Large warehousing capacity is the key growth driver in trading business. Large warehousing ensures a regular supply of goods into the marketplace by being able to procure goods in bulk quantities and then releasing them to various customers in the varied quantities required by them. Maintaining consistent stock levels helps prices to stay stable, making it easier for businesses to forecast profit and loss. Large warehousing facility also helps in attracting a variety of customers by providing them with a wide range of products and meeting their order requirements in a timely manner.

Though our Company has a warehouse space at W-160, TTC Industrial Area, Pawane MIDC, Navi Mumbai 400710, Maharashtra, where currently our entire stock is comfortably stored, we cannot guarantee that this space will be sufficient to store our future procurements. This may restrict our storing capacity and in turn restrict the variety of products which we can procure and store. Inability to meet customer demand due to inadequate storage may adversely affect our Company's reputation, business and results of operation.

22. *We have incurred indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations. We may also be unable to obtain future financing to fund our operations, expected capital expenditure and working capital requirements on favourable terms, or at all.*

As on Financial Years ended March 31, 2021, March 31, 2022, March 31, 2023 and for the period ended December 31, 2023 we have ₹ 1,822.09 lakhs, ₹ 1634.18 lakhs ₹ 1,671.71 lakhs and ₹ 2,126.92 lakhs respectively, of outstanding debt including current maturities of long- term Debts on our balance sheet. Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- limiting our ability to borrow more money both now and in the future; and
- increasing our interest expenditure and adversely affecting our profitability

If any of these risks were to fructify, our business and results of operations may be adversely affected. Our business requires funding for capital expenditure and working capital requirements in the future. In case there is insufficient cash flow to meet our working capital requirement or we are unable to arrange the same from other sources or there is delay in disbursement of arranged funds, or there is any increase in interest rate on our borrowings, it may adversely affect our operations and profitability. These factors may result in an increased amount of short-term borrowings.

Continuous increase of our working capital requirements may have an adverse effect on our results of operations and financial condition. Further our ability to arrange for additional funds on acceptable terms is subject to a variety of uncertainties, including future results of operations, financial condition and cash flows; economic, political conditions and market scenario for our products; costs of financing, liquidity and overall condition of financial and capital markets in India; issuance of necessary business/government licenses, approvals and other risks associated with our businesses; and limitations on our ability to raise capital in capital markets and conditions of the Indian and other capital markets in which we may seek to raise funds. Any such inability to raise sufficient funds could have a material adverse effect on our business and results of operations.

23. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

24. *If we are unable to manage our growth effectively or raise additional capital or if our estimates or assumptions used in developing our strategic plan are inaccurate or we are unable to execute our strategic plan effectively, our business and prospects may be materially and adversely affected.*

Our revenue and our business operations have grown in recent years. Although we plan to continue to expand our scale of operations, we may not be able to sustain these rates of growth in future periods due to a number of factors, including, among others, our execution capability, our ability to retain, our ability to maintain customer satisfaction, our ability to mobilise sufficient working capital, macroeconomic factors beyond our control such as decline in global economic conditions, availability of cheaper imported / domestic products / brands, competition within each product category from players in the organized and unorganized segments, the greater difficulty of growing at sustained rates from a larger revenue base, our inability to control our expenses and the availability of resources for our growth. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business operations.

Our development and expansion strategies will require substantial managerial efforts and skills and the incurrence of additional expenditures may subject us to new or increased risks. We may not be able to efficiently or effectively implement our growth strategies or manage the growth of our operations, and any failure to do so may limit future

growth and have an adverse effect on our business. For e.g. our strategy to increase operational efficiency is dependent on our ability to focus on better analysis of customer demand and accordingly managing our bulk supply of the various traded products. Further, our strategy to improve our debt – equity ratio may not materialise in the manner we intend to, and we may be required to obtain additional debt to meet immediate capital requirements, resulting in unfavourable ratios. Further, if the estimates or assumptions used in developing our strategic plan vary significantly from actual conditions, our sales, margins and profitability could be impacted. If we are unsuccessful in executing our strategic plan, or if the underlying estimates or assumptions used to develop our strategic plan are materially inaccurate, our business and financial condition would have an adverse impact.

25. *Our Company does business with customers on Purchase Order basis and do not enter into any agreement with our customer and we not have fixed customer base.*

Our Company operates on a purchase order (PO) basis without entering into long-term contracts, Since the company does not have long-term commitments from customers, there may be a higher level of uncertainty regarding future sales and revenue. This lack of contractual obligations can result in fluctuations in demand and potentially impact the company's financial performance.

The potential risks associated with relying solely on PO-based sales, as it may lead to a less predictable revenue stream. Additionally, without long-term contracts, there may be a higher level of competition and price volatility in the market, which could further impact the company's profitability

Conducting a comprehensive risk assessment and understanding the potential impact of the company's PO-based approach is crucial in determining the level of risk associated with it.

26. *Any delay or defaults in receipt of payments or dues from our customers could result in a reduction of our profits.*

We regularly commit resources prior to receiving payments from our customer. We may be subject to working capital shortages due to delays or defaults in receipt of payments or dues from such customers. If our customers default in their payments or if any order/ assignment in which we have invested significant resources is delayed, cancelled or curtailed, it could have a material adverse effect on our business, financial condition and results of operations.

27. *Our insurance coverage may not be sufficient or may not adequately protect us against any or all hazards, which may adversely affect our business, results of operations and financial condition.*

Our business and assets could suffer damage from fire, natural calamities and the goods transported to our customers by our supplier could suffer from damage, misappropriation or other causes, resulting in losses, which may not be covered / fully compensated by insurance. Legal proceedings or other actions may be initiated against us or any of our employees for acts and conduct of our employees which may occur due to various reasons including misconduct with customers. In the event of personal injuries, damage or other accidents suffered by our employees or our customers or other people, we could face claims alleging that we were negligent, provided inadequate supervision or be otherwise liable for the injuries. Our principal types of coverage include finished product insurance. While we believe that the insurance coverage which we maintain would be reasonably adequate to cover the normal risks associated with the operation of our businesses, we cannot assure you that any claim under the insurance policies maintained by us will be honored fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses.

In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage, or successful assertion of one or more large claims against us for events for which we are not insured, or for which we did not obtain or maintain insurance, or which is not covered by insurance which exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected.

28. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange(s) which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention

may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we might have to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. This could have an adverse effect on our profit and reputation.

29. The business operates on a high volume, low margin model, as evidenced by its average PAT (Profit after Tax) margin of less than 2% based on Restated Financial Statements, any economic downturns or market fluctuations, will have potentially impact its ability to generate returns for investors & company's growth.

A situation where a company experiences low profit margins despite high volume transactions can pose risks. The low profit margin indicates that the company's profitability is relatively slim compared to its revenue. This can make the business more vulnerable to economic downturns, increased competition, or fluctuations in input costs. Additionally, the company may have limited flexibility to absorb unexpected expenses or invest in growth opportunities; low profitability may raise concerns about the company's competitiveness, pricing strategy, or cost management. The reliance on high volume sales to generate revenue also means that any decline in demand or market conditions could significantly impact the Company's financial performance. Details of our Revenue, PAT & Average PAT (%) for the period ending on December 31, 2023, Fiscal 2023, 2022 and 2021 are as below:

(Rs. In lakhs)

Particulars	Period ending on December 31,2023	Fiscal 2023	Fiscal 2022	Fiscal 2021
Revenue from Operations	7,550.36	9,388.75	9,189.54	8,622.75
PAT	171.44	205.66	149.66	126.66
PAT (%)	2.27%	2.19%	1.63%	1.47%
Average PAT (%)		1.89%		

30. Non-compliance with and changes in safety, health and other applicable regulations, might adversely affect Our Company's results of operations and its financial condition.

We are subject to Indian laws and government regulations, including laws in relation to safety and health . Our products, including the process of storage and distribution of such products, are subject to numerous laws and regulations in relation to quality, safety and health. For further details, please see "Key Industry Regulation and Policies" on page no. 109 of this Draft Prospectus. Failure to comply with any existing or future regulations applicable to us might result in levy of fines, commencement of judicial proceedings and/or third party claims, and might adversely affect our results of operations and financial condition

Further, there can be no assurance that our Company will not be involved in future litigation or other proceedings or be held responsible in any litigation or proceedings including in relation to safety and health the costs of which would be material. Any personal injury and loss of life, substantial damage to or destruction of property would result in a suspension of operations. The loss or shutdown of operations over an extended period at our Company's warehouse facilities would have a material adverse effect on our Company's business and operations.

31. We have not made any alternate arrangements for financing the 'Objects of the Issue'. Any shortfall in raising or meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for our working capital requirements as per the Objects of the Issue. Over the period of time, we have met our capital requirements through funding from financial institutions and Directors and Promoter's group entity unsecured loans. Any shortfall in our net cash flows, internal accruals and our inability to raise institutional debt in future would result in us to borrow fund, which may be repayable on demand, which in turn may increase our financial costs, affect our Promoter's group entity's liquidity and restrict future funding from them in urgent situations, thus negatively affecting our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer "Objects of the Issue" on page no 68 of this Draft Prospectus.

32. Our Promoter has extended personal guarantees in connection with certain of our debt facilities.

There can be no assurance that such personal guarantees will be continued to be provided by our Promoters in the future or can be called at any time, affecting the financial. Our Company is susceptible to changes in interest rates and

the risks arising there from. Our sanction letters provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further the lenders are entitled to change the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company's credit risk rating. For further details of interest payable on our borrowings, please refer to the chapter titled "Financial Indebtedness" on page no 180 of this Draft Prospectus. Further, in recent years, the Government of India has taken measures to control inflation, which have included tightening the monetary policy by raising interest rates. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows and financial condition.

Risk factors related to equity shares

33. *There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.*

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Draft Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with our future performance;
- Adverse media reports about us or our shareholders;
- Future sales of the Equity Shares;
- Variations in our half-yearly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about the performance of companies engaged in industrial capital goods sector generally;
- Perception in the market about investments in the Industrial sector capital goods;
- Significant developments in the regulation of the trading and distribution industry in our key trade locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalization and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations.

There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share. Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

34. *Investors can be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of ₹ 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

35. *The ability of Indian companies to raise foreign capital may be constrained by Indian law.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under

development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

36. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

37. *Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.*

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

38. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

EXTERNAL RISK FACTORS

39. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

40. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

41. *System failures or inadequacy and security breaches in computer systems may adversely affect our business.*

Our business is increasingly dependent on our ability to process, on a daily basis, a large number of transactions. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communication services.

We may experience difficulties in upgrading, developing and expanding our systems quickly enough to accommodate our growing customer base and range of services our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security. Any failure to effectively maintain or improve or upgrade our systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we are located.

42. *With time we might be liable to other labor laws which were not applicable before leading to increase cost and time to be invested in its compliance.*

Employees form the integral part of the operation of our business. Any labor disputes or unrests could lead to lost production, increased costs or delays which could lead to penalties. We are subject to a number of stringent labor legislation that protects the interests of workers and defines our duties and obligations towards them in the capacity of principal employers, including legislations that sets forth detailed procedures for employee removal and dispute resolution and impose financial obligations on us. We are also subject to state and local laws and regulations. If labor laws become more stringent or are more strictly enforced, it may become difficult for us to maintain flexible human resource policies, discharge employees or downsize, any of which could have an adverse effect on our business, results of operations, financial condition and cash flows. Any organizational changes, including changes in salaries and wages and other employee benefits that are, or are perceived to be negative, could result in an increased attrition rate. We cannot assure you that there may not be incidences of labor unrest and absenteeism from work by some of our employees. Labour shortages could increase the cost of labor and hinder our productivity and ability to adhere to our delivery schedules for our work, which would materially and adversely affect our business, financial condition, results of operations and prospects.

43. *Our Company is subject to risk arising from changes in interest rates and banking policies.*

Increased interest rates will have a bearing on profitability and credit controls will have an effect on our liquidity and will have serious effects on adequate working capital requirements. We are dependent on various banks for arranging of our working capital requirement etc. Accordingly, any change in the existing banking policies or increase in interest rates may have an adverse impact on profitability of our company.

44. *If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate in order to pass costs on to our customers and our profits might decline.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and may adversely affect our business, cash flows and financial condition. In particular, we might not be able to reduce our costs or increase the amount of commission to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the Government of India has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

45. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse affects on our operations and financial performance.*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

46. *A decline in economic growth or political instability nationally or internationally or changes in the Government in India could adversely affect our business.*

Our performance and the growth of our business are necessarily dependent on the health and performance of the overall Indian economy. In the recent past, Indian economy has been affected by global economic uncertainties and liquidity crisis, domestic policy and political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, adverse conditions affecting agriculture, rising inflation rates and various other factors. Risk management initiatives by banks and lenders in such circumstances could affect the availability of funds in the future or the withdrawal of our existing credit facilities. The Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. Any downturn in the macroeconomic environment in India could adversely affect our business, financial condition, results of operation and the trading price of our Equity Shares. Volatility, negativity, or uncertain economic conditions could undermine the business confidence and could have a significant impact on our results of operations. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations.

Further, our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. The GoI has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. Our business, the market price and liquidity of the Equity Shares may be affected by changes in GoI policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

47. *Any disproportionate increase in labor costs including increase in wage/salary demand, labor unrest or labor claims arising from accidents may adversely affect our business operations and financial conditions.*

Our increasing business operations may require our employee strength to increase in future. In the past our Company has not experienced any labor unrest, but there is no assurance that it will not experience the same at any time in the future. Also, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if our Company is unable to pass on the increased costs to our customers, our business operations and financial conditions may be adversely affected.

48. *Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.*

Our Company is engaged in the trading and repackaging business, which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund, Employee State Insurance and Professional Tax. Any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

49. *Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.*

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Such activities in India may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in the world, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

A slight acceleration for advanced economies where growth is expected to rise from 1.6 percent in 2023 to 1.7 percent in 2024 and 1.8 percent in 2025 will be offset by a modest slowdown in emerging market and developing economies from 4.3 percent in 2023 to 4.2 percent in both 2024 and 2025. The forecast for global growth five years from now at 3.1 percent is at its lowest in decades. Global inflation is forecast to decline steadily, from 6.8 percent in 2023 to 5.9 percent in 2024 and 4.5 percent in 2025, with advanced economies returning to their inflation targets sooner than emerging market and developing economies. Core inflation is generally projected to decline more gradually.

Global Outlook : Stable But Slow

Global growth, estimated at 3.2 percent in 2023, is projected to continue at the same pace in 2024 and 2025. The projection for 2024 is revised up by 0.1 percentage point from the January 2024 WEO Update, and by 0.3 percentage point with respect to the October 2023 WEO forecast. Nevertheless, the projection for global growth in 2024 and 2025 is below the historical (2000–19) annual average of 3.8 percent, reflecting restrictive monetary policies and withdrawal of fiscal support, as well as low underlying productivity growth. Advanced economies are expected to see growth rise slightly, with the increase mainly reflecting a recovery in the euro area from low growth in 2023, whereas emerging market and developing economies are expected to experience stable growth through 2024 and 2025, with regional differences.

Disinflation amid Economic Resilience

Economic activity was surprisingly resilient during the global disinflation of 2022–23. Growth in employment and incomes has held steady as favorable demand and supply developments have supported major economies, despite rising central bank interest rates aimed at restoring price stability. As inflation converges toward target levels and central banks pivot toward policy easing, a tightening of fiscal policies aimed at curbing high government debt levels, with higher taxes and lower government spending, is expected to weigh on growth. The pace of expansion is also expected to remain low by historical standards as a result of factors including the long-term consequences of the COVID-19 pandemic, Russia’s invasion of Ukraine, weak growth in productivity, and increasing geo economic fragmentation.

In late 2023, headline inflation neared its pre pandemic level in most economies for the first time since the start of the global inflation surge. In the last quarter of 2023, headline inflation for advanced economies was 2.3 percent on a quarter-over-quarter annualized basis, down from a peak of 9.5 percent in the second quarter of 2022. For emerging market and developing economies, inflation was 9.9 percent in the last quarter of 2023, down from a peak of 13.7 percent in the first quarter of 2022, but this average was driven by high inflation in a few countries; for the median emerging market and developing economy, inflation declined to 3.9 percent. This progress notwithstanding, inflation is not yet at target in most economies.

INDIAN ECONOMIC OVERVIEW

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. India's gross domestic product (GDP) at current prices in the second quarter (Q2) of 2023-24 is estimated to be Rs. 71.66 trillion (US\$ 861.2 billion), as against Rs. 65.67 trillion (US\$ 789.2 billion) in Q2 of 2022-23, showing a growth rate of 9.1%. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. In 2023-24 (April-December), India's service exports stood at US\$ 247.92 billion. Furthermore, India's overall exports (services and merchandise) in 2023-24 (April-December) were estimated at US\$ 565.04 billion. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has largely demonstrated promise to boost growth

by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships. India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 296.58 trillion (US\$ 3.56 trillion) in 2023-24. Additionally, the Nominal GDP at current prices in Q2 of 2023-24 was Rs. 71.66 trillion (US\$ 861.2 billion), as against Rs. 65.67 trillion (US\$ 789.2 billion) in 2022-23, estimating a growth of 9.1%. As of 03rd October 2023, India is home to 111 unicorns with a total valuation of US\$ 349.67 Billion. Out of the total number of unicorns, 45 unicorns with a total valuation of US\$ 102.30 Billion were born in 2021 and 22 unicorns with a total valuation of \$ 29.20 Billion were born in 2022. India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. The current account deficit stood at US\$ 8.3 billion, or 1% of GDP, in the second quarter of fiscal 2023-24 as compared to US\$ 9.2 billion or 1.1% of GDP in the preceding quarter.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of January 19, 2024, India's foreign exchange reserves stood at US\$ 616.14 billion.
- In 2023, India saw a total of US\$ 49.8 billion in PE-VC investments.
- Merchandise exports in December 2023 stood at US\$ 38.45 billion, with total merchandise exports of US\$ 505.15 billion during the period of April-December (2023-24).
- India was also named as the 48th most innovative country among the top 50 countries, securing 40th position out of 132 economies in the Global Innovation Index 2023. India rose from 81st position in 2015 to 40th position in 2023. India ranks 3rd position in the global number of scientific publications.
- At the beginning of January 2024, the PMI Services comfortably remained in the expansionary zone, registering a value of 61.2.
- In December 2023, the gross Goods and Services Tax (GST) revenue collection stood at Rs.1,64,882 crore (US\$ 19.80 billion), of which CGST is Rs. 30,443 crore (US\$ 3.65 billion), SGST is Rs. 37,935 crore (US\$ 4.55 billion).
- Between April 2000–September 2023, cumulative FDI equity inflows to India stood at US\$ 953.14 billion.
- In November 2023, the overall IIP (Index of Industrial Production) stood at 141. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 131.1, 139.2 and 176.3, respectively, in November 2023.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 5.55% in November 2023.
- Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested Rs. 261,856 crore (US\$ 31.5 billion) in India during April-December (2023-24).
- The wheat procurement during RMS 2023-24 (till May) was estimated to be 262 lakh metric tonnes (LMT) and the rice procured in KMS 2023-24 was 385 LMT. The combined stock position of wheat and rice in the Central Pool is over 579 LMT (Wheat 312 LMT and Rice 267 LMT).

Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. Further, In the interim budget for FY24, Government increased FY25 Capex outlay to record Rs.11.11 lakh crore (US\$ 133.5 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

INDIAN FMCG SECTOR

The FMCG sector in India expanded due to consumer-driven growth and higher product prices, especially for essential goods. FMCG sector provides employment to around 3 million people accounting for approximately 5% of the total factory employment in India. FMCG sales in the country was expected to grow 7-9% by revenues in 2022-23. The key growth drivers for the sector include favourable Government initiatives & policies, a growing rural market and youth population, new branded products, and growth of e-commerce platforms. Resilience needs to be the key factor in the manufacturing process, daily operations, retail and logistic channels, consumer insights and communication that will help FMCG companies to withstand the test of time and create more value for consumers in the long run. India's fast-

moving consumer goods (FMCG) sector grew 7.5% by volumes in the April-June 2023 quarter, the highest in the last eight quarters, led by a revival in rural India and higher growth in modern trade.

Fast-moving consumer goods (FMCG) sector is India's fourth-largest sector and has been expanding at a healthy rate over the years because of rising disposable income, a rising youth population, and rising brand awareness among consumers. With household and personal care accounting for 50% of FMCG sales in India, the industry is an important contributor to India's GDP.

Growing awareness, easier access and changing lifestyles have been the key growth drivers for the sector. The urban segment (accounts for a revenue share of around 65%) is the largest contributor to the overall revenue generated by the FMCG sector in India. However, in the last few years, the FMCG market has grown at a faster pace in rural India compared to urban India. Semi-urban and rural segments are growing at a rapid pace and FMCG products account for 50% of the total rural spending.

Market Size

FMCG market reached US\$ 167 billion as of 2023. Total revenue of FMCG market is expected to grow at a CAGR of 27.9% through 2021-27, reaching nearly US\$ 615.87 billion. In 2022, urban segment contributed 65% whereas rural India contributed more than 35% to the overall annual FMCG sales. Good harvest, government spending expected to aid rural demand recovery in FY24. The sector had grown 8.5% in revenues and 2.5% in volumes last fiscal year. In the January-June period of 2022, the sector witnessed value growth of about 8.4% on account of price hikes due to inflationary pressures. In Q2, 2022, the FMCG sector clocked a value growth of 10.9% Y-o-Y higher than the 6% Y-o-Y value growth seen in Q1.

Indian food processing market size reached US\$ 307.2 billion in 2022 and is expected to reach US\$ 547.3 billion by 2028, exhibiting a growth rate (CAGR) of 9.5% during 2023-2028.

The Union government approved a new PLI scheme for the food processing sector, with a budget outlay of Rs. 109 billion (US\$ 1.46 billion). Incentives under the scheme will be disbursed for six years to 2026-27.

Digital advertising will grow to reach US\$ 9.92 billion by 2023, with FMCG industry being the biggest contributor at 42% share of the total digital spend.

India includes 780 million internet users, where an average Indian person spends around 7.3 hours per day on their smartphone, one of the highest in the world. Number of active internet users in India will increase to 900 million by 2025 from 759 million in 2022. In 2021, India's consumer spending was US\$ 1,891.90 billion. Indian villages, which contribute more than 35% to overall annual FMCG sales, are crucial for overall revival of the sector. E-commerce now accounts for 17% of the overall FMCG consumption among evolved buyers, who are affluent and make average spends of about Rs. 5,620 (US\$ 68).

The Indian e-commerce market is anticipated to grow from US\$ 83 billion in 2022 to US\$ 185 billion in 2026. By 2030, it is expected to have an annual gross merchandise value of US\$ 350 billion. Fuelling e-commerce growth, India is expected to have over 907 million internet users by 2023, which accounts for ~64% of the total population of the country.

The market has grown exponentially over the past five years due to the surge in internet and smartphone users, improved policy reforms, and increase in disposable income. Mobile wallets, Internet banking, and debit/credit cards have become popular among customers for making transactions on e-commerce platforms. As of 2021, there were 1.2 million daily e-commerce transactions. The total value of digital transactions stood at US\$ 300 billion in 2021 and is projected to reach US\$ 1 trillion by 2026.

The India online grocery market size has been projected to grow from US\$ 4,540 million in 2022 to US\$ 76,761.0 million by 2032, at a CAGR of 32.7% through 2032.

The FMCG market in India is expected to increase at a CAGR of 14.9% to reach US\$ 220 billion by 2025, from US\$ 110 billion in 2020. The Indian FMCG industry grew by 16% in CY21 a 9-year high, despite nationwide lockdowns, supported by consumption-led growth and value expansion from higher product prices, particularly for staples. The Indian processed food market is projected to expand to US\$ 470 billion by 2025, up from US\$ 263 billion in 2019-20. FMCG giants such as Johnson & Johnson, Himalaya, Hindustan Unilever, ITC, Lakmé and other companies (that have dominated the Indian market for decades) are now competing with D2C-focused start-ups such as Mamaearth, The

Moms Co., Bey Bee, Azah, Nua and Pee Safe. Market giants such as Revlon and Lotus took ~20 years to reach the Rs. 100 crore (US\$ 13.4 million) revenue mark, while new-age D2C brands such as Mamaearth and Sugar took four and eight years, respectively, to achieve that milestone.

Advertising volumes on television recorded healthy growth in the July-September quarter, registering 461 million seconds of advertising, which is the highest in 2021. FMCG continued to maintain its leadership position with 29% growth in ad volumes against the same period in 2019. Even the e-commerce sector showed a healthy 26% jump over 2020.

Road Ahead

Rural consumption has increased, led by a combination of increasing income and higher aspiration levels. There is an increased demand for branded products in rural India. On the other hand, with the share of the unorganised market in the FMCG sector falling, the organised sector growth is expected to rise with an increased level of brand consciousness, augmented by the growth in modern retail. Another major factor propelling the demand for food services in India is the growing youth population, primarily in urban regions. India has a large base of young consumers who form most of the workforce, and due to time constraints, barely get time for cooking. Online portals are expected to play a key role for companies trying to enter the hinterlands. The Internet has contributed in a big way, facilitating a cheaper and more convenient mode to increase a company's reach. The number of internet users in India is likely to reach 1 billion by 2025. It is estimated that 40% of all FMCG consumption in India will be made online by 2020. E-commerce share of total FMCG sales is expected to increase by 11% by 2030. It is estimated that India will gain US\$ 15 billion a year by implementing GST. GST and demonetisation are expected to drive demand, both in the rural and urban areas and economic growth in a structured manner in the long term and improved the performance of companies within the sector.

Major Export Destinations

India exported spices and spice products to 159 destinations worldwide as of 2023-24 (until February 2024). The top destinations among them were China, the USA, Bangladesh, the UAE, Thailand, Malaysia, Indonesia, the UK, and Sri Lanka. These nine destinations comprised more than 70% of the total export earnings in 2023-24 (until February 2024).

China imported spice valued at US\$ 725.76 million from India, while the USA imported spices worth US\$ 515.91 million. Bangladesh imported spices amounting to US\$ 296.55 million. Additionally, the UAE imported spices worth US\$ 214.76 million from India during 2023-24 (up to February 2024).

Government Initiatives

Export Development and Promotion of Spices

This initiative by the Spices Board of India aims to support the exporter to adopt high-tech processing technologies and upgrade the existing level of technology for the development of industry and to meet the changing food safety standards of the importing countries. The initiative provides benefits of infrastructure development, promoting Indian spice brands abroad, setting up infrastructure in the major spice growing centres, promoting organic spices and special programmes for north-eastern entrepreneurs.

Setting up and maintenance of infrastructure for common processing (Spices Parks)

Spices Board has launched eight crop-specific Spices Parks in key production/market centres intending to facilitate the farmers to get an improved price realization and wider reach for their produce. The purpose of the park is to have an integrated operation for cultivation, post-harvesting, processing, value-addition, packaging and storage of spices and spice products. The common processing facilities for cleaning, grading, packing, and steam sterilization will help the farmers to enhance the quality of the produce, resulting in better price realization.

Spice Complex Sikkim

Spices Board submitted a project proposal to the state’s cell for setting up a Spice Complex in Sikkim seeking financial assistance for facilitating and demonstrating common processing and value addition in spices to help farmers and other stakeholders in the state.

AGRICULTURAL AND FOOD INDUSTRY

Export Trend

India is one of the largest agricultural product exporters in the world. In April-January 2024, the overall value of export of agricultural products stood at US\$ 38.65 billion. In 2022-23, the agricultural exports from India stood at US\$ 52.50 billion. Higher exports of marine products, at US\$ 8.07 billion in 2022-23, are benefitting farmers in the coastal states of West Bengal, Andhra Pradesh, Odisha, Tamil Nadu, Kerala, Maharashtra, and Gujarat.

The government's commitment to increasing farmers' income can be seen through the significant rise witnessed in Agri-exports by giving thrust on boosting exports. Various initiatives taken by the government through APEDA such as organizing B2B exhibitions in different countries and exploring new potential markets through product-specific and general marketing campaigns have worked as catalysts for the growth of exports. The government of India has created a product matrix for 50 agricultural products with strong export potential and recognized 220 labs to provide services of testing a wide range of products to enable exporters across India.

Export Destinations

The largest importers of India's agricultural products, as of 2023-24 (until January 2024), were the USA, China, UAE, Bangladesh. Significant accounting policies

a) Use of estimates

The preparation of the financial statements in conformity with generally accepted accounting principles in India requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The Company's most significant estimates include those on the useful life of assets, deferred taxes and provision for taxes. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results could differ from these estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates.

b) Current and Non-current classification

Assets

An asset is classified as current when it satisfies any of the following criteria:

- a. it is expected to be realised in, or is intended for sale or consumption in, the company's normal operating cycle;
- b. it is held primarily for the purposes of being traded;
- c. it is expected to be realised within 12 months after the reporting date; or
- d. it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.

Current assets include the current portion of non-current financial assets. All other assets are classified as non-current.

Liabilities

- a. it is expected to be settled in the company's normal operating cycle;
- b. it is held primarily for the purposes of being traded;
- c. it is due to be settled within 12 months after the reporting date; or

All other liabilities are classified as non-current.

c) Property, plant and equipment

Property plant and equipment are stated at their cost of acquisition, less accumulated depreciation/ amortisation and impairment loss. Cost of an item of property, plant and equipment includes purchase price including non - refundable taxes and duties, borrowing cost directly attributable to the qualifying asset, any costs directly attributable to bringing the asset to the location and condition necessary for its intended use and the present value of the expected cost for the dismantling / decommissioning of the asset. Parts (major components) of an item of Property, plant and equipments having different useful lives are accounted as separate items of property, plant and equipments.

d) Depreciation method, estimated useful lives and residual value

Depreciation is provided over the estimated useful life of the assets using written down value method. The rates of depreciation used are those which have been calculated as per the method specified in Schedule II of the Companies Act, 2013. The new Companies Act prescribes that the asset should be written off over its useful life as estimated by the management and provides the indicative useful lives for the different class of assets. Other assets are depreciated over their balance useful life. The estimated useful lives considered are as under:

The impairment loss is recognized as an expense in the statement of profit and loss, unless the asset is carried at revalued amount, in which case any impairment loss of the revalued asset is treated as a revaluation decrease to the extent a revaluation reserve is available for that asset. When there is indication that an impairment loss recognized for an asset (other than a revalued asset) in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognized in the Statement of Profit and Loss, to the extent the amount was previously charged to the Statement of Profit and Loss. In case of revalued assets such reversal is not recognized.

f) Investments

If an investment is acquired, or partly acquired, by the issue of shares or other securities, the acquisition cost is the fair value of the securities issued. If an investment is acquired in exchange for another asset, the acquisition is determined by reference to the fair value of the asset given up or by reference to the fair value of the investment acquired, whichever is more clearly evident.

Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

RECENT DEVELOPMENT

Impact of COVID-19

The pandemic outbreak has caused an economic downturn on a global scale, including closures of many businesses and reduced consumer spending, as well as significant market disruption and volatility. The demand for our draft products is dependent on and directly affected by factors affecting industries where our products are supplied. Despite the impact of the COVID-19 Pandemic, our revenue from operations for the Fiscal 2022 and for Fiscals 2023 was Rs. 9,388.75 lakhs and Rs. 9,189.54lakhs respectively. We continue to closely monitor the impact that COVID-19 may have on our business and results of operations. It is difficult for us to predict the impact that COVID-19 will have on us, our customers or suppliers in the future.

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Economic conditions in the markets in which we operate

Our results of operations are dependent on the overall economic conditions in the markets in which we operate, including India. Any change in macro-economic conditions in these markets, including changes in interest rates, government policies or taxation and political, economic or other developments could affect our business and results of operations. The FMCG sector in India may perform differently and be subject to market and regulatory developments that are dissimilar to the markets in other parts of the world. While stronger international economic conditions tend to result into higher demand for our products, weaker economic conditions tend to result into lower demand. Change in demand in the market segments we currently supply or improvement/deterioration in the market or a change in regulations, customs, taxes or other trade barriers or restrictions could affect our operations and financial condition.

Relationship with key customers

We have historically derived, and may continue to derive, a significant portion of our income from our top 5 customers. In Fiscals 2023, our top 5 customers represented 36.33%, of our total revenues from operations in such periods. Any reduction in orders from our top five customers would adversely affect our income. The demand from our key customers, in particular our top 5 customers, determines our revenue levels and results of operations, and our sales are directly affected by the production and inventory levels of our customers. Our customers in turn are dependent on budget, economic condition of world, demand and growth in FMCG sector.. Over the years, we have developed strong relationships with a number of domestic and international corporations through which we have been able to expand our product offerings and also our geographic reach. Our business depends on the continuity of our arrangements with these customers. Our sales to such customers are typically conducted on the basis of purchase orders that they place with us from time to time.

Our ability to successfully implement its strategy and its growth and business expansion plans

Our revenue and our business operations have grown in recent years. Although we plan to continue to expand our scale of operations, we may not be able to sustain these rates of growth in future periods due to a number of factors, including, among others, our execution capability, our ability to retain, maintain & enter into new distribution agreement, our ability to maintain customer satisfaction, our ability to mobilise sufficient working capital, macroeconomic factors beyond our control such as decline in global economic conditions, availability of cheaper imported / domestic products / brands, competition within each product category from players in the organized and unorganized segments, the greater difficulty of growing at sustained rates from a larger revenue base, our inability to control our expenses and the availability of resources for our growth. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business operations. Our strategy and revenue plan may not work and might have adverse affect on financials.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of *inter alia*, equity shares and convertibles by introducing an alternate payment mechanism using UPI. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by UPI Bidders through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an Retail Individual Investor had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Under this phase, submission of the ASBA Form by Retail Individual Investor through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continued to be six Working Days during this phase. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice.

Phase III: This phase has become applicable on voluntary basis for all the issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("**T+3 Notification**"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Streamlining Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streaming Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post – Issue LM will be required to compensate the concerned investor.

The Issue will be made under UPI Phase III of the UPI Circular.

Our Company and the Selling Shareholders will be required to appoint one or more of the SCSBs as a Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Investors.

The processing fees may be released to the remitter banks (SCSBs) only after an application is made by the SCSBs to the LM with a copy to the Registrar, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”), which, with effect from October 15, 2020, subsumes and supersedes all press notes, press releases, clarifications, circulars issued by the DPIIT, which were in force as on October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular.
