SECTION II: SUMMARY OF ISSUE DOCUMENT

A. OVERVIEW OF INDUSTRY

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalization of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

2. ***Our Company has been formed specifically for the purpose of acquisition of the business of M/s Owais Ali Overseas (Proprietorship firm of our Promoter) thus we have limited operating history as a Company which may make it difficult for investors to evaluate our historical performance or prospects.***

Our Company was originally incorporated as a Private Limited Company under the Companies Act, 2013 with Registrar of Companies, Central Registration Centre through a certificate of incorporation dated December 16, 2022. After incorporation, company has taken-over the running business of Proprietorship firm of our Promoter i.e., M/s Owais Ali Overseas for expansion of the business of Company. We have very limited operating history in terms of a company from which one can evaluate our business, prospects and viability. Our future revenues and profitability are difficult to estimate and could fluctuate significantly and as a result the price of our Equity Shares may be volatile. The business of manufacturing and processing of various metals and minerals was earlier carried by proprietorship firm which is recently taken over by our Company, although the proprietorship has placed the growth in past years, and will continue to place by our Company but there is no assurance that this growth will be met successfully in future. We may not be able to increase revenue or maintain profitability on a quarterly or an annual basis. If this occurs, our results of operations and financial condition will be adversely affected. Our growth exposes us to a wide range of increased risks. It will also place significant demands on our management, financial and other resources and will require us to continuously develop and improve our operational, financial and internal controls. There can be no assurance that we will be able to successfully pursue our growth strategies, or that pursuing these strategies will provide us the anticipated benefits in terms of growth and profitability. Further, we may be unable to develop adequate systems, infrastructure and technologies, devote sufficient financial resources or develop and attract talent to manage our growth. Our inability to pursue our growth strategies successfully or at all, or an inability to manage our growth, may adversely affect our prospects. For further details, see the section titled “**Our History and Certain Other Corporate Matters**” and “**Financial Statements as Restated**” on page 135 and 168 respectively of the Draft Prospectus.

3. ***Our Registered Office is not owned by us. The same is occupied by us on a lease basis. Disruption of our rights as lessee or termination of the agreements with our lessor would adversely impact our operations and, consequently, our business.***

Our Registered Office is located in Ratlam, Madhya Pradesh and is used by our company for administrative purpose. Our Company has been occupying the Registered Office at C/O Sayyad Akhtar Ali, Vahid Nagar, Old Bypass Road, NA Ratlam – 457001, Madhya Pradesh India, on lease basis through a lease entered into by our Company with Mr. Sayyad Akhtar Ali, for a period of 12 months. We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new office and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business through franchise, prospects, results of operations and financial condition.

4. ***Substantial portion of our revenues has been dependent upon few customers, with which we do not have any firm commitments. Loss of our key customers or significant reduction in demand from, our significant customers may materially and adversely affect our business and financial performance.***

Our top 10 customers accounted for approximately 98.00% of our revenue from operations in period ended on August 31, 2023. Since we are dependent on certain key customers for a significant portion of our sales, the loss of one or more of such customers or a reduction in demand from such customers, for any reason, including due to loss of contracts, delay in fulfilling existing orders, failure to negotiate or agree upon acceptable terms in negotiations, disputes or a loss of market share or a downturn in the spending on healthcare by them, if not suitably replaced with another customer, could adversely affect our business, financial condition and results of operations. Our revenues and profitability may also be adversely affected if there's a significant reduction in the volume of our business with such customers, or if our customers prefer our competitors over us, and we may not remain the preferred products and solutions provider for certain of our customers. For instance, if there is any change in the treatment methodology adopted by a medical practitioner, this may lead to cancellation of orders or loss of business and consequently reduce our sales and affect our estimates of anticipated sales, which could materially and adversely affect our business, financial condition and results of operations. Further, our future growth is also linked to the addition of new customers and failure to do so could materially and adversely affect our business, financial condition and results of operations. In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honour their outstanding amounts in time and whether they will be able to fulfil their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

5. ***Our business involves usage of manpower and any unavailability of our employees or shortage of contract labour or any strikes, work stoppages, increased wage demands by workmen or changes in regulations governing contractual labour may have an adverse impact on our cash flows and results of operations.***

Our business involves usage of manpower and we are dependent on the availability of our permanent employees and the supply of a sufficient pool of labourers. Unavailability or shortage of such a pool of workmen or any strikes, work stoppages, increased wage demands by workmen or changes in regulations governing contractual labour may have an adverse impact on our cash flows and results of operations. We may not be able to secure the required number of labourers required for the timely execution of our functions for a variety of reasons including, but not limited to, possibility of disputes with sub-contractors, strikes, less competitive rates. We are subject to laws and regulations relating to employee welfare and benefits such as minimum wage, working conditions, employee insurance, and other such employee benefits and any changes to existing labour legislations, including upward revision of wages required by such state governments to be paid to such contract labourers, limitations on the number of hours of work or provision of improved facilities. Further, there can be no assurance that disruptions in our business will not be experienced if there are strikes, work stoppages, disputes or other problems with sub-contractors or contract labourers deployed at our projects. This may adversely affect our business and cash flows and results of operations.

6. ***Any failure to maintain quality control systems for our goods could have a material adverse effect on our business, reputation, results of operations and financial condition.***

The quality and timely delivery of the goods we provided is critical to our success. Maintaining consistent goods quality and timely delivery depends significantly on the effectiveness of the quality control systems, policies and guidelines that our suppliers have in place, which in turn depends on a number of factors, including the design of the quality control systems and employee implementation and compliance with those quality control systems. There can be no assurance that the quality control systems that our suppliers have in place will prove to be effective. Any significant failure or deterioration of these quality control systems could have a material adverse effect on our business, reputation, results of operations and financial condition and can cause negative publicity that can affect our brand. We could also be subject to civil and/or criminal liability and other regulatory consequences in the event that a health hazard was to be found at our office as a result of a failure of the quality control systems that our suppliers have in place. We may be the subject of public interest litigation in India relating to allegations of such hazards, as well as in cases having potential criminal and civil liability filed by regulatory authorities. If such cases are determined against us, there could be an adverse effect on our reputation, business, results of operations and financial condition.

7. ***The Company have undertaken business activities not contained into the Main Object clause of the MOA. Although due rectification of the MOA non-compliance has been made, we are not sure if the Company may be subjected to penalties for any of our past actions in this respect.***

The Company has been doing the business of manufacturing and dealing in wood charcoal as other operating activities without having obtained approval of the shareholders of the Company in this respect and having the same inserted in the main object clause of the Company thus violating the provisions of Section 4(1)(c) of the Companies Act, 2013. Although the Company have vide shareholders resolution dated September 27, 2023 inserted the above activities in the main object clause of the Company and although we have not received any show cause notice or have been levied with any penalty in respect of above non-compliance nor have been sued by any of our dealers for dealing in with them in respect of business activities not included in the Main Object Clause of the MOA, we are not sure that any penalty in this respect shall not be levied on us or at all and that any such non-compliance shall not occur in future. Accordingly, the Company have vide a resolution passed in the meeting of Board of Directors held on September 28, 2023 have decided to file for an application for compounding of the above non-compliance, and the same is under process as on the date of this Prospectus.

8. ***We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them.***

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long-term contract with any of customers nor has any marketing tie up for our products. Further, our Company has not appointed any exclusive agents for handling its operations. Any change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations. We have not entered in any agreement with our customers, we work on the basis of purchase order basis.

9. ***We do not generally enter into agreements with our raw material suppliers or traded goods suppliers. Any disruption in supplies from them may adversely affect our production process.***

Our Company meets its demand of raw material i.e., Manganese Ore, Wood, Quartz and other minerals, etc. by purchasing the same from the domestic market. Our dependence on local suppliers may adversely affect our purchase and thus affect profitability in future. We do not have long term agreements with any of our raw material suppliers and we purchase such raw materials on spot order basis. Though we maintain good relations with them, there can be no assurance that we shall be able to continue such relations with any or all of them. Any disruption in supplies from these parties may require us to find additional suppliers. There can be no assurance that we shall be able to find additional suppliers in time or transact business with them on favorable terms and conditions or the quality of products supplied by these suppliers will be at par with those of our existing suppliers. Further, our suppliers are not contractually bound to deal with us exclusively for a particular contract entered between us for supply of material and we may face the risk of losing their services to our competitors. Any disruption in supplies from our suppliers due to inexistence of contracts may adversely affect our production process, trading activity and consequently our results of operations.

10. ***Our continued operations are critical to our business and any shutdown of our manufacturing unit may adversely affect our business, results of operations and financial condition.***

Our manufacturing unit is in Madhya Pradesh and also in Rajasthan. As a result, any local social unrest, natural disaster or breakdown of services and utilities in these areas could have material adverse effect on the business, financial position, and results of our operations. Our manufacturing unit is subject to operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, obsolescence, natural disasters, industrial accidents, and the need to comply with the directives of relevant government authorities. In the event, we are forced to shut down our manufacturing unit for a prolonged period; it would adversely affect our earnings, our other results of operations and financial condition. Spiralling cost of living around our unit may push our manpower costs in the upward direction, which may reduce our margin and cost competitiveness. In addition to the above if our manufacturing unit suffers losses because of any industrial accident, we may be forced to shut down our manufacturing unit which could result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition. Further, any contravention of or non-compliance with the terms of various regulatory approvals applicable to our manufacturing unit may also require us to cease or limit production until such non-compliance is remedied to the satisfaction of relevant regulatory authorities. We cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees and the labour involved in our manufacturing unit, which may hinder our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations.

- 11. We are dependent upon few suppliers for our raw material for our current manufacturing facilities. In an eventuality where our suppliers are unable to deliver us the required materials in a time-bound manner it may have a material adverse effect on our business operations and profitability.**

Our top 10 suppliers for the period ended on August 31, 2023 have contributed 44.03% respectively, of our total purchases. While we are not significantly dependent on any single raw material supplier, raw material supply and pricing can be volatile due to a number of factors beyond our control, including demand and supply, general economic and political conditions, transportation and labour costs, labour unrest, natural disasters, competition, import duties, tariffs and currency exchange rates, and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use. Therefore, we cannot assure you that we will be able to procure adequate supplies of raw materials in the future, as and when we need them on commercially acceptable terms. Further, there may be volatility in prices of our raw material and if we are not able to compensate for or pass on our increased costs to customers, such price increases could have a material adverse impact on our result of operations, financial condition and cash flows. Additionally, we may not be able to pass on every instance of increase in input cost and may have to pursue internal cost control measures.

- 12. We require a number of approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Some of the approvals are required to be obtained by our Issuer Company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.**

We require several statutory and regulatory permits, licenses, and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Presently, we have applied for updating licenses and approvals in the name of **“Owais Metal and Mineral Processing Limited”** from **“Owais Metal and Mineral Processing Private Limited”**. Non-obtaining or non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. Further we require to keep already obtained valid key approvals such as Tax Registrations, Shops and Establishment Act License, for running our operations in a smooth manner. Some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses, or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension, or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please see chapters titled **“Key Industry Regulations and Policies”** and **“Government and Other Statutory Approvals”** at pages 124 and 187 respectively of this Draft Red Herring Prospectus.

- 13. There are certain Operational, Geopolitical and Trade Risks involved in the manufacturing activities carried on by our company.**

Processing operations involve complex machinery, equipment, and processes. Operational risks such as equipment failure, production disruptions, supply chain disruptions, labour, disputes, or logistical challenges can impact the company's ability to meet production targets, fulfil customer orders and generate revenue. Geopolitical events, trade disputes, tariffs, sanctions, and changes in government policies or regulations (domestic or international) can create uncertainties and risks for the company's operations, supply chain, and market access. Charcoal wood which the raw material like the wood which is procured from Rajasthan has different risks related to it, as the government conducts auctions for clearing out the trees. Those trees have thorns in them, so it is not easy to cut them normally. So, there are various problems related to the procurement of raw material for Charcoal Wood. Also, the raw material such as Manganese Ore, and Quartz are being supplied by the mines and environment safety issue in such mines may cause disruption in availability of raw materials and which may in turn impact the financials of the company.

- 14. Environmental and Regulatory Compliance**

The metals and mineral processing industry is subject to strict environmental regulations and permitting requirements. Failure to comply with environmental standards, obtain necessary permits, or address environmental risks adequately can lead to fines, penalties, legal actions, reputational damage, and operational disruptions.

- 15. Our business is capital intensive. If we experience insufficient cash flows to meet required payments on our debt and working capital requirements, there may be an adverse effect on our operations.**

Our business requires a significant amount of working capital which is based on certain assumptions, and therefore, any change of such assumptions would result in changes to our working capital requirements. In many contracts, significant amounts of working capital are required to finance the purchase or manufacturing of materials, mobilization of resources

and other work on projects before payment is received from clients. Our working capital requirements may increase due to an increase in the size of our operations and the number and size of projects that are required to be executed within a similar timeframe. Our growth strategy thus requires continued access to significant amounts of capital on acceptable terms. We cannot assure you that market conditions and other factors will permit future project and acquisition financings, debt or equity, on terms acceptable to us. Our ability to arrange financing and the costs of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from financial institutions, the amount and terms of our existing indebtedness, investor confidence, the continued success of current projects and laws that are conducive to our raising capital in this manner.

- 16. *The Company is yet to place orders for 100% of the plant & machineries for our proposed object, as specified in the Objects of the Issue. Any delay in placing orders, procurement of plant & machineries may delay our implementation schedule and may also lead to increase in price of these plant & machineries, further affecting our revenue and profitability.***

Our Company have identified the type of plant and machineries required to be bought from the proceeds of the Initial Public Offer. However, we are yet to place orders for 100% of the Plant & Machinery worth Rs. 1,978.09 Lakhs as detailed in the “*Objects of the Issue*” beginning on page 75 of this Draft Red Herring Prospectus. These are based on our estimates and on third-party quotations, which are subject to a number of variables, including possible cost overruns, changes in management’s views of the desirability of current plans, change in supplier of plant & machineries, Equipment among others, which may have an adverse effect on our business and results of operations. Further, we cannot assure that we would be able to procure these plant and machineries, or procure the same within budgeted costs and timelines. Delays in acquisition of the same could result in the cost and time overrun, which would have a material adverse effect on our business, results of operations and financial condition. For further details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 75 of this Draft Red Herring Prospectus.

- 17. *Our business is subject to various operating risks at our sites, the occurrence of which can affect our results of operations and consequently, financial condition of our Company.***

Our business operations are subject to operating risks, such as breakdown or failure of equipment’s used at the project sites, weather conditions, interruption in power supply, shortage of consumables, performance below expected levels of output or efficiency, natural disasters, obsolescence, labour disputes, accidents, our inability to respond to technological advancements and emerging realty industry standards and practices along with the need to comply with the directives of relevant government authorities. The occurrence of these risks, if any, could result in stoppage of work along with penalty in monetary terms. Any stoppage of work may result in a delay in completing our projects leading to failure to deliver the furniture to the customers within the time frame. Further, any of the aforesaid risks may also result in our contractors compromising on the quality standards in order to finish the work within the given timelines, which may in turn affect our reputation and ability to attract new customers. If any of the above were to occur, it would significantly affect our operating results, and the slowdown of business operations may have a material adverse effect on our business operations and financial conditions.

- 18. *Too much Geographical concentration of our Business in one location can impact our Business.***

The major portion of our revenue is from sale in the state of Madhya Pradesh. Such geographical concentration of our business heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. Factors such as competition, culture, regulatory regimes, business practices and customs, industry needs, transportation, in other markets where we may expand, our operations may differ from those in which we are currently offering. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local distributors, dealers, relevant government authorities, and are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand more into areas outside these states markets may adversely affect our business prospects, financial conditions and results of operations.

- 19. *Majority of our revenue is dependent on two products i.e., MC Manganese and Processing of Ferro Alloys inability to anticipate or adapt to evolving upgradation of products or inability to ensure product quality or reduction in the demand of such products may adversely impact our revenue from operations and growth prospects.***

Majority of our revenue is dependent on two products i.e., MC Manganese and Processing of Ferro Alloys. Our continued reliance on single business segment for substantial portion of our revenue exposes us to risks, including but not limited to, reduction in the demand of the products in the particular segment in the future; increased competition from regional and national players; the invention of superior and cost-effective technology; fluctuations in the price and availability of

the raw materials; changes in regulations and import duties and the general economic conditions. Any occurrences of such event could significantly reduce our revenues, thereby materially adversely affecting our results of operations and financial condition.

20. *Brand recognition is important to the success of our business, and our inability to build and maintain our brand names will harm our business, financial condition and results of operation.*

Brand recognition is important to the success of our business. Establishing and maintaining our brand name in the industry or for people relying on services is critical to the success of the customer acquisition process of our business. Although, we expect to allocate significant number of resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brand names will be effective in attracting and growing user and client base for our businesses or that such efforts will be cost-effective, which may negatively affect our business, financial condition and results of operations.

21. *We may not be able to realise the amounts, partly or at all, reflected in our Order Book which may materially and adversely affect our business, prospects, reputation, profitability, financial condition and results of operation.*

As of August 31 2023, our Company's Order Book was ₹743.25 Lakh. Future earnings related to the supply of our products in the order book may not be realized and although the orders in the order book represent business that is considered firm, cancellations or scope or schedule adjustments may occur. We may also encounter problems executing the order or executing it on a timely basis. Moreover, factors beyond our control or the control of our clients may postpone the delivery or cause its cancellation, including delays or failure to obtain necessary permits, authorizations, permissions, right-of-way, and other types of difficulties or obstructions. Due to the possibility of cancellations or changes in scope and schedule of projects, resulting from our clients' discretion or problems we encounter in execution of such contracts or reasons outside our control or the control of our clients, we cannot predict with certainty when, if or to what extent an order forming part of our order book will be performed. Delays in the completion of a delivery can lead to clients delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such project. Even relatively short delays or difficulties in the execution of a project could result in our failure to receive, on a timely basis or at all, all payments due to us on a project.

22. *Our success depends in large part upon our qualified personnel, including our senior management, directors and key personnel and our ability to attract and retain them when necessary.*

Our operations are dependent on our ability to attract and retain qualified personnel. While we believe that we currently have adequate qualified personnel, we may not be able to continuously attract or retain such personnel, or retain them on acceptable terms, given the demand for such personnel. The loss of the services of our qualified personnel may adversely affect our business, results of operations and financial condition. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting the qualified employees that our business requires. Furthermore, our senior management team is integral to the success of our business. However, we cannot assure you that we will be able to retain any or all of our management team. Any loss of our senior management or key personnel or our inability to recruit further senior managers or other key personnel could impede our growth by impairing our day-to-day operations and hindering our development of ongoing and planned projects and our ability to develop, maintain and expand customer relationships.

23. *We face competition in our business from domestic competitors. Such competition would have an adverse impact on our business and financial performance.*

The industry, in which we are operating, is highly and increasingly competitive due to presence of many small-size players in unorganized sector. Our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

24. *Our Company had not made any provision for payment of gratuity to our employees.*

As per provision of Payment of Gratuity Act, 1972 (Act) a scheme for the payment of gratuity to employees shall be made upon applicability of the Act. Our company failed to determine the applicability of the act although the number of employees of the company has crossed the threshold limit as mentioned in the Act. Since the company was not aware of the applicability, the company failed to maintain any provisions for gratuity in any of the past financials' years. Upon

identification of this non-compliance the same was rectified in the restated financials by taking actuarial valuation and making appropriate provisions for gratuity. Although no complaint had been filed against our company for non-compliance under any section of Act, and also no-show cause notice in respect of the above has been received by the Company till date. But if the company is found to be in default in complying with any of the provisions of this Payment of Gratuity Act, 1972 or any rule or order made thereunder the employer shall be punishable with imprisonment for a term which may extend to one year, or with fine which may extend to one thousand rupees, or with both. Upon any such action the financial position of the company may be impacted.

25. *We are yet to obtain consent from our lender banks for the Issue, the same is under process and are subject to certain conditions and restrictions in terms of our financing arrangements.*

Our Company has entered several types of borrowing facilities of varying terms and tenures from lenders. Our Company sought to obtain the relevant consents from the respective lenders in advance of the date of this Draft Red Herring Prospectus. We are yet to receive consent from our lender banks and the same is under process. Our Company proposes to obtain such consents prior to filing the Red Herring Prospectus with the ROC. Undertaking any of the above including the Issue without such consent constitutes a default under the relevant financing documents and will entitle the lender to declare a default against our Company and enforce remedies under the terms of the financing documents. A default by our Company under the terms of any financing document may have an adverse effect on our operations, financial position, and credit rating. For further details of our Company's borrowings, see "**Financial Indebtedness**" on page 181.

26. *Heavy dependence on our Promoter for the continued success of our business through his continuing services, strategic guidance, and support.*

We are heavily dependent upon the continued services of our Promoter, along with support of our management team for the continuous success and growth of our organization. Our promoters are responsible for the execution of our day-to-day business affairs. The loss of our Promoters or failure to recruit suitable or comparable replacements could have an adverse effect on our business operations and growth strategies. For Details of our Promoters, please refer chapter titled "**Our Promoters and Promoter Group**" beginning on Page 159 of this Draft Red Herring Prospectus.

27. *Significant security breaches in our computer systems and network infrastructure and fraud could adversely impact our business.*

We seek to protect all the computer systems and network infrastructure in our offices from physical break-ins as well as security breaches and other disruptive problems. Computer break-ins and power disruptions could affect the security of information stored in and transmitted through these computer systems and networks. To address these issues and to minimise the risk of security breaches we employ security systems, including firewalls and intrusion detection systems, conduct periodic penetration testing for identification and assessment of potential vulnerabilities and, use encryption technology for transmitting and storing critical data such as passwords. However, these systems may not guarantee prevention of frauds, break-ins, damage and failure. A significant failure in security measures could have an adverse effect on our business.

28. *Our lenders have imposed certain restrictive conditions on us under our financing arrangements. Under our financing arrangements, we are required to obtain the prior, written lender consent for, among other matters, changes in our capital structure, formulate a scheme of amalgamation or reconstruction and entering into any other borrowing arrangement.*

Further, we are required to maintain certain financial ratios. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the consents necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that is not waived by our lenders or is not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. In such situation, Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. For further information, see the chapter titled "**Statement of Financial Indebtedness**" on page no. 181 of the Draft Red Herring Prospectus. Though these covenants are restrictive to some extent for us, however it ensures financial discipline, which would help us in the long run to improve our financial performance. For further details, please see the section titled Financial Indebtedness on page 181.

29. *Delay in delivery of the products due to breakdown of machinery.*

Any breakdown or defect in the machinery and / or the equipment used for the purpose of our manufacturing process may delay the production process as a whole and result in missing deadlines in delivery of product if we are able to repair the

machines or replace it within relevant timelines. Any such delays may have an adverse effect on the business of the Company.

- 30. *We are dependent on third party vendors for delivery of materials required to us from our suppliers and delivery of our products to our clients. Any failure on part of such vendors to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.***

We are engaged in the business of manufacturing of metals and processing of minerals. We also require certain materials which we source from third party vendors. Our success depends on the smooth supply and transportation of the various materials required for our projects delivered to our customers which are subject to various uncertainties and risks. In addition, these materials may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of raw materials which may also affect our business and our results of operation adversely. A failure to maintain a continuous supply of materials in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations.

- 31. *The shortage or non-availability of power facilities may adversely affect our business and have an adverse impact on our results of operations and financial condition.***

Our business processes require power facilities. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented/ augmented by alternative/ independent sources of power supply since it involves significant capital expenditure and per unit cost of electricity produced is very high in view of increasing oil prices and other constraints. We are mainly dependent on State Government for meeting our electricity requirements. Any defaults or non-compliance of the conditions may render us liable for termination of the agreement or any future changes in the terms of the agreement may lead to increased costs, thereby affecting the profitability. Further since we are majorly dependent on third party power supply; there may be factors beyond our control affecting the supply of power.

Any disruption / non-availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

- 32. *Our business may be affected by severe weather conditions and other natural disasters.***

Our business activities may be materially and adversely affected by severe weather conditions, which may force us to evacuate personnel or curtail services, or suspend our operations or postpone delivery of materials to our worksites. Heavy or sustained rainfalls or other extreme weather conditions such as cyclones could result in delays or disruptions to our operations during the critical periods of our projects and cause severe damages to our operations. High temperatures during summer months and the monsoon season could limit our ability to carry on our activities or to fully utilize our resources.

- 33. *General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.***

Our business is highly dependent on economic and market conditions in India and other jurisdictions where we operate. General economic and political conditions in India, such as macroeconomic and monetary policies, industry-specific trends, mergers and acquisitions activity, legislation and regulations relating to the financial and securities industries, household savings rate, investment in alternative financial instruments, upward and downward trends in the market, business and financial sectors, volatility in security prices, perceived lack of attractiveness of the Indian capital markets, inflation, foreign direct investment, consumer confidence, currency and interest rate fluctuations, availability of short-term and long-term market funding sources and cost of funding, could affect our business. Global economic and political conditions may also adversely affect the Indian economic conditions. Market conditions may change rapidly and the Indian capital markets have experienced significant volatility in the past. The Indian economy has had sustained periods of high inflation in the recent past. If inflation or real interest rates were to rise significantly, the trends towards increased financial savings might slow down or reverse, our employee costs may increase and the sales of many of our products and services may decline.

- 34. *Major fraud lapses of internal control or system failures could adversely impact the company's business.***

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company's operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

35. *We continue to explore the diversification of our business and the implementation of new products. These diversifications and our other strategic initiatives may not be successful, which may adversely affect our business and results of operations.*

In order to achieve our goal, we are constantly evaluating the possibilities of expanding our business through new models, innovations and/or starting new products. Although we believe that there are synergies between our current business and our expansion plans, we do have experience or expertise in these new areas. These new businesses and modes of delivery and the implementation of our strategic initiatives may pose significant challenges to our administrative, financial and operational resources, and additional risks, including some of which we are not aware of. The early stages and evolving nature of some of our businesses also make it difficult to predict competition and consumer demand therein. Our strategic initiatives require capital and other resources, as well as management attention, which could place a burden on our resources and abilities. In addition, we cannot assure you that we will be successful in implementing any or all of our key strategic initiatives. If we are unable to successfully implement some or all of our key strategic initiatives in an effective and timely manner, or at all, our ability to maintain and improve our leading market position may be negatively impacted, which may have an adverse effect on our business and prospects, competitiveness, market position, brand name, financial condition and results of operations.

36. *Our inability to manage growth could disrupt our business and reduce our profitability. We propose to expand our business activities in coming financial years.*

We expect our future growth to place significant demands on both our management and our resources. This will require us to continuously evolve and improve our operational, financial and internal controls across the organisation. In particular, continued expansion increases the challenges we face in:

- Our ability to acquire and retain clients for our product;
- Services, products or pricing policies introduced by our competitors;
- Capital expenditure and other costs relating to our operations;
- The timing and nature of, and expenses incurred in, our marketing efforts;
- Recruiting, training and retaining sufficient skilled technical and management personnel;
- Adhering to our high quality and process execution standards;
- Maintaining high levels of customer satisfaction;
- Developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems.

You should not rely on yearly comparisons of our results of operations as indicators of future performance. It is possible that in some future periods our results of operations may be below the expectations of public, market analysts and investors. If we are unable to manage our growth it could have an adverse effect on our business, results of operations and financial condition.

37. *We have entered into related party transactions in the past and may continue to do so in the future.*

We have in the course of our business entered into, and will continue to enter into, several transactions with our related parties. For further information, see ***“Financial Statements – Annexure XXVIII “Related Party Disclosure”*** on page 163 We cannot assure you that we will receive similar terms in our related party transactions in the future. While we believe that all such related party transactions that we have entered into in last three fiscals are legitimate business transactions conducted on an arms’ length basis, in compliance with the requirements stipulated in Companies Act, 2013, and relevant Accounting Standards and other statutory compliances, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. Any further transactions with our related parties could involve conflicts of interest. While we have not had any conflict of interest in relation to our equity shareholders in the past, we cannot assure you that such conflicts will not arise in the future. Further, we cannot assure you that such transactions, individually or in the aggregate, will not have any adverse effect on our business and financial results, including because of potential conflicts of interest or otherwise. For further information on our related party transactions, see ***“Financial Statement – Annexure- XXVIII “Related Party Disclosure”***.

- 38. The nature of our business exposes us to liability claims and contract disputes and our indemnities may not adequately protect us. Any liability in excess of our reserves or indemnities could result in additional costs, which would reduce our profits.**

Time is often of the essence in our business work. In the event there are delays in our current or future service, we will not be able to get extensions from our customers. Further, in some contracts, in case of delay due to deficiency in services by us, clients may have the right to complete the work at our risk and cost by engaging a third party. In the event we fail to perform under the terms of a particular contract, that could adversely affect our financial conditions and business operations. Failure to effectively cover ourselves against any of these reasons could expose us to substantial costs and potentially lead to material losses. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us.

- 39. Employee fraud or misconduct could harm us by impairing our ability to attract and retain clients and subject us to significant legal liability and reputational harm.**

Our business is exposed to the risk of employee misappropriation, fraud or misconduct. Our employees could make improper use or disclose confidential information, which could result in regulatory sanctions and serious reputational or financial harm. While we strive to monitor, detect and prevent fraud or misappropriation by our employees, through various internal control measures, we may be unable to adequately prevent or deter such activities in all cases. Our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. While we have not been able to identify such issues in the past, there could be instances of fraud and misconduct by our employees, which may go unnoticed for certain periods of time before corrective action is taken. In addition, we may be subject to regulatory or other proceedings, penalties or other actions in connection with any such unauthorized transaction, fraud or misappropriation by our agents or employees, which could adversely affect our goodwill, business prospects and future financial performance. We may also be required to make good any monetary loss to the affected party. Even when we identify instances of fraud and other misconduct and pursue legal recourse or file claims with our insurance carriers, we cannot assure you that we will recover any amounts lost through such fraud or other misconduct.

- 40. Our operations may be adversely affected in case of industrial accidents at our working sites.**

Usage of heavy machinery, handling of sharp parts of machinery by labor during production processor otherwise, short circuit of power supply for machines, etc. may result in accidents and fires, which could cause indirect injury to our labor, employees, other persons on the site and could also damage our properties thereby affecting our operations. Further, our plant and machinery and personnel may not be covered under adequate insurance for occurrence of particular types of accidents which could adversely hamper our cash flows and profitability.

- 41. Our operating expenses include overheads that may remain fixed in the medium term. In case there is any decline in our operating performance, we may be unable to reduce such expenses.**

Our operating expenses include various fixed costs, which are as such, not dependent on sales revenue. Any shortfall in sales may cause significant variations in operating results in any particular quarter, as we would not be able to reduce our fixed operating expenses in the short term. The effect of any decline in sales may thereby be magnified because a portion of our earnings are committed to paying these fixed costs. Accordingly, we believe that period-to-period comparisons of our results may not necessarily give a correct presentation of the performance and should not be relied upon as indications of future performance.

- 42. Our Company has a negative cash flow in its operating activities for the period ended August 31, 2023 and for the financial year ended on March 31, 2023 and investing activities for the period ended August 31, 2023, details of which are given below. Sustained negative cash flow could impact our growth and business.**

Our Company had negative cash flows from our operating activities as well as investing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

(₹ in lakh)

Particulars	For the period ended August 31, 2023	For the financial year ended on March 31, 2023
Net cash (used in) / generated from Operating Activities	(1,386.17)	(368.56)
Net cash (used in) / generated from Investing Activities	(709.05)	0.00
Net cash (used in) / generated from Financing Activities	2,176.20	378.56
Net increase / (decrease) in Cash and Cash Equivalents	80.98	10.00

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

43. *The average cost of acquisition of Equity Shares by the Promoter may be less than the Issue Price.*

The average cost of acquisition of Equity Shares by the Promoter may be less than the Issue Price. The details of the average cost of acquisition of Equity shares held by the Promoters are set out as below:

Name of the Promoters	Average Cost of Acquisition (₹)
Mr. Saiyyed Owais Ali	10.46

44. *Delays or defaults in payments from our clients could result into a constraint on our cash flows. The efficiency and growth of our business depends on timely payments received from our clients.*

In the event, our client’s default or delay in making payments and clearing their dues, we may not have adequate resources to fund our business and implement our growth plans. This could have an adverse effect on the results of operations and our financial condition.

45. *Our insurance coverage may not adequately protect us against losses, and successful claims against us that exceed our insurance coverage could harm our results of operations and diminish our financial position.*

We maintain insurance coverage of the type and in the amounts that we believe are commensurate with our operations. Our insurance policies, however, may not provide adequate coverage in certain circumstances and may be subject to certain deductibles, exclusions and limits on coverage. In addition, there are various types of risks and losses for which we do not maintain insurance, such as losses due to business interruption and natural disasters, because they are either uninsurable or because insurance is not available to us on acceptable terms. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or results in changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, future financial performance and results of operations.

46. *There are no alternate arrangements for meeting our requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our working capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not yet identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer chapter titled “*Objects of the Issue*” on page 75 of this Draft Red Herring Prospectus.

47. *Our actual results could differ from the estimates and projections used to prepare our financial statements.*

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

48. *Guarantees from Promoters & Directors as well as others have been taken in relation to the debt facilities provided to us.*

In an event any of the guarantors withdraws or terminates this guarantee, the lender for such facilities may ask for alternate guarantee/s, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantee/s satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information, please see the chapter titled “*Statement of Financial Indebtedness*” beginning on page 181 of this Draft Red Herring Prospectus.

49. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholder's investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "**Dividend Policy**" on page 164 of this Draft Red Herring Prospectus.

50. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.*

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships or joint venture across the country and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and negotiating with several potential partners, we have not entered into any definitive agreements. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and marketing functions and the diversion of management's time and focus from operating our business to addressing challenges pertaining to acquisition and integration. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

51. *Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

52. *Some of the KMPs is associated with our company for less than one year.*

Our Key Management Personnel, Chief Financial officer and Company Secretary & Compliance Officers are associated with the Company for a period of less than one year therefore they may not have been accustomed to the company affairs till date. For details of Key Management Personnel and their appointment, please refer to chapter "**Our Management**" beginning on page 139 of this Draft Red Herring Prospectus.

53. *There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all.*

In accordance with Indian law and practice, permission to list the Equity Shares will not be granted until after the Equity Shares have been issued and allotted. Approval will require all other relevant documents authorizing the issuing of our Equity Shares to be submitted. There could be a failure or delay in listing our Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

54. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of Our Company.*

Since, the Issue size is less than ₹10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised from this Issue, is hence, at the discretion of the management and the Board of Directors of Our Company and Our Company's management will have flexibility in applying the proceeds of the Issue and will not be subject to monitoring by any independent agency. The fund requirement and deployment mentioned in the Objects of the Issue is based on internal management estimates and have not been appraised by any bank or financial institution. Any

inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. However, our Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. Also, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Issue without the Company being authorized to do so by our shareholders by way of special resolution and other compliances as applicable in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

55. *Negative publicity could adversely affect our revenue model and profitability.*

We work in the market where trust of the customers on us and upon the services provided by us matters a lot. Any negative publicity regarding our company or the services rendered by the company due to any other unforeseen events may affect our reputation and image which leads to the adverse effect on our business and goodwill as well.

56. *Industry information included in this Draft Red Herring Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Red Herring Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us, or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Red Herring Prospectus.

57. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

Issue Specific Risks:

58. *There are restrictions on daily/weekly/monthly movements in the price of the Equity Shares, which may adversely affect a shareholders' ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

59. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.*

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- a. Volatility in the Indian and global capital market;
- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors,
- d. Adverse media reports on Company or pertaining to the agriculture Industry;
- e. Changes in our estimates of performance or recommendations by financial analysts;
- f. Significant developments in India's economic and fiscal policies; and
- g. Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

60. *You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

61. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity shares after the issue.*

The Issue price of our equity Shares has been determined by Book Built Method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuation after the issue and may decline below the issue price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue price. For further details you may refer chapter titled "**Basis for Issue Price**" beginning on the page 83 of this Draft Red Herring Prospectus.

Some of the factors which may affect our share price without limitations are as follows:

- Reports on research by analysts.
- Changes in revenue.
- Variations in growth rate of our financial indicators such as earning per share, income, profit etc.
- General Market Condition
- Domestic and International Economy.

62. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the Trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISKS

Industry Related Risks:

63. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

64. Malpractices by some players in the industry affect overall performance of emerging Companies

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

Other Risks:

65. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India. Any gain on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain on the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1st day of October 2004 on which STT was not charged will attract tax under provisions of Long-Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April 2018 if the long-term capital gain exceeds ₹ 1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April 2018 in excess of ₹1,00,000/- pa. shall be chargeable at the rate of 10%. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

66. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements, prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Red Herring Prospectus.

As stated in the reports of the Auditor included in this Draft Red Herring Prospectus under chapter “**Financial Statements as Restated**” beginning on page 168 the financial statements included in this Draft Red Herring Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Red Herring Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Red Herring Prospectus. Accordingly, the degree to which the financial information included in this Draft Red Herring Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited.

67. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

68. Financial instability in Indian Financial Markets could adversely affect our Company’s results of operation and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company’s business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

69. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in this Draft Red Herring Prospectus.

While facts and other statistics in this Draft Red Herring Prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “**Our Industry**” beginning on page 94 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

70. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer

debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

71. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

72. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

73. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade the global equity markets as well. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

74. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20.00 to ₹24.00 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Amount (₹)	Cumulative Quantity	Subscription
500	24.00	500	16.67%
1000	23.00	1500	50.00%
1500	22.00	3000	100.00%
2000	21.00	5000	166.67%
2500	20.00	7500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

1) Purchase of Equipments to Facilitate Manufacturing

Our company was initially operating under the name of M/s Owais Ali Overseas, a proprietorship concern of our promoter-director, Mr. Saiyyed Owais Ali. We were in the business of manufacturing and processing of MC Manganese and Ferro Alloys. In financial year 2022-23, we started another vertical of Quartz processing and manufacture of Wood Charcoal. The entire business was transferred into the company with effect from April 01, 2023.

The geographical location of the manufacturing unit of our company is market oriented and close to the states such as Gujarat, Maharashtra, Madhya Pradesh and Rajasthan, which are the main consumers of our products. We intend to cater to the high demand-supply gap for our products by expanding the current capacity of our manufacturing units. Apart from the existing products, our company is exploring other profitable segments to operate. Currently, we are spreading our wings in the processing of ferro chrome which generates chromium as its end product used in Steel and alloy industry. In order to penetrate into the market and expand our operations, our company intends to make capital expenditure towards purchase of additional plant & machinery. Our Company proposes to use part of net proceeds to the extent of ₹1,978.09 Lakhs to meet capital expenditure in relation to:

i) Set up of Carbon Reduction Furnace for Manufacturing MC Manganese

MC Manganese is used majorly as a raw-material in steel and other alloys to improve its strength, hardness and durability. Setting up of Carbon Reduction Furnace to the existing facility will increase the production of MC Manganese which will in turn generate increased revenue. It will also enable us in manufacturing of Low Carbon Manganese which are used in special steel manufacturing industry. This product is saleable in market at a higher price and its consumer market is also very huge. The furnace will automate the process of manufacturing thereby reducing labour cost and increase in profit margins.

Accordingly, we have estimated an expenditure of ₹2,519.87 Lakhs towards setting up of 4.5 MVA Submerged ARC Furnace based on the quotation received from Metro Craft Industries dated September 22, 2023 which shall include purchase of equipment, its utilities, construction of shed for installation of furnace and civil, designing etc. related to it. We intend to utilize ₹811.95 Lakhs from the Net Issue Proceeds towards setting up of Carbon Reduction Furnace. as per details mentioned below:

11	132 kV Substation for running the furnace	397.22	-	397.22
	Total	2,519.87	811.95	1,707.92

The setting of ARC Furnace involves huge investment in terms of time. The purchase of basic materials itself will consume a lot of time. Taking into consideration the estimated time involved in the setting up of this furnace, the Board of Directors have decided to purchase the furnace equipment from the proceeds of the issue. The payment for the said furnace equipment is to be made in advance at the time of placing Purchase Order with the vendor as per the terms agreed.

ii) Set up of Machinery for Automatic Charcoal Production

Our company has started production of wood charcoal from April 2023 whereby wood is treated to high heat without oxygen to convert it into charcoal. Our current manufacturing facility for conversion of wood into wood charcoal is manual and it takes approximately 6 days to complete each batch of the product. Setting up of the below-mentioned machinery will automate the process of production of charcoal and reduce the manufacturing cycle from 6 days to 2 days, thereby increasing production. It will also increase the efficiency of the existing manufacturing facility by upto 10%. We intend to utilize ₹ 463.05 Lakhs towards setting up of automated charcoal furnace as per below mentioned schedule:

iii) Machinery for processing of Quartz

Processing of Quartz is yet another highly profitable segment which involves extraction of Quartz from mines and processing it further to get desired grades and specifications of the product. Currently our company is producing single

grade of Quartz that is used in the steel industry. Upon installation of additional machinery, we shall be able to produce various grades of the finished products which can be catered to glass industry and marble industry also.

Our company wants to install additional machineries like crushers, washers and screeners to the existing manufacturing facilities which will increase the turnover to upto ₹20.00 Lakhs per day. We intend to utilize ₹508.59 Lakhs towards setting up of machineries for processing of Quartz based on the quotation received from Metro Craft Industries dated June 20, 2023. ANNEXURE TO THE STATEMENT OF POSSIBLE SPECIAL TAX BENEFITS AVAILABLE TO OWAIS METAL AND MINERAL PROCESSING LIMITED (“THE COMPANY”) AND IT’S SHAREHOLDERS UNDER THE APPLICABLE TAX LAWS IN INDIA

Outlined below are the possible special tax benefits available to the Company and its shareholders as per the Income tax Act, 1961 (“IT Act”) as amended from time to time and applicable for financial year 2023-24 relevant to assessment year 2024-25 (AY 2024-25) and Indirect Tax Laws as amended from time to time and applicable for financial year 2023-24. I. Under the IT Act

1. Special Tax Benefits to the Company

- Lower Corporate Tax rate under Section 115BAA

A new Section 115BAA has been inserted by the Taxation Laws (Amendment) Act, 2019 (“the Amendment Act, 2019”) granting an option to domestic companies to compute corporate tax at a reduced rate of 25.17% (22% plus surcharge of 10% and cess of 4%) from the Financial Year 2019-20, provided such companies do not avail specified exemptions/incentives (e.g. deduction under Section 10AA, 32(1) (ia), 33ABA, 35(2AB), 80-IA etc.)

The Amendment Act, 2019 also provides that domestic companies availing such option will not be required to pay Minimum Alternate Tax (“MAT”) under Section 115JB. The CBDT has further issued Circular 29/2019 dated October 02, 2019 clarifying that since the MAT provisions under Section 115JB itself would not apply where a domestic company exercises option of lower tax rate under Section 115BAA, MAT credit would not be available. Corresponding amendment has been inserted under Section 115JAA dealing with MAT credit.

The Company has exercised the above option.

2. Special Tax Benefits available to Shareholders

There are no Special Tax Benefits available to the Shareholders (other than Resident Corporate Shareholder) of the Company.

With respect to a Resident Corporate Shareholder, a new section 80M is inserted in the Finance Act, 2020, to remove the cascading effect of taxes on inter-corporate dividends during financial year 2020-21 and thereafter. The section provides that where the gross total income of a domestic company in any previous year includes any income by way of dividends from any other Domestic Company or a Foreign Company or a Business Trust, there shall, in accordance with and subject to the provisions of this section, be allowed in computing the total income of such domestic company, a deduction of an amount equal to so much of the amount of income by way of dividends received from such other Domestic Company or Foreign Company or Business Trust as does not exceed the amount of dividend distributed by it on or before the due date. The “due date” means the date one month prior to the date for furnishing the return of income under sub-section (1) of section 139.

NOTES:

- The above statement of Possible Special Tax Benefits is as per the current Direct Tax Laws relevant for the assessment year 2024-25. Several of these benefits are dependent on the Company or its Shareholders fulfilling the conditions prescribed under the relevant provisions of the Tax Laws.
- In respect of non-residents, the tax rates and consequent taxation mentioned above will be further subject to any benefits available under the relevant Double Taxation Avoidance Agreement, if any, entered into between India and the country in which the non-resident has fiscal domicile.

- As the Company has opted for concessional corporate income tax rate as prescribed under section 115BAA of the Act, it will not be allowed to claim any of the following deductions:

GLOBAL ECONOMY AT LARGE

Near-Term Resilience, Persistent Challenges

- Global growth is projected to fall from an estimated 3.5 percent in 2022 to 3.0 percent in both 2023 and 2024. While the forecast for 2023 is modestly higher than predicted in the April 2023 World Economic Outlook (WEO), it remains weak by historical standards. The rise in central bank policy rates to fight inflation continues to weigh on economic activity. Global headline inflation is expected to fall from 8.7 percent in 2022 to 6.8 percent in 2023 and 5.2 percent in 2024. Underlying (core) inflation is projected to decline more gradually, and forecasts for inflation in 2024 have been revised upward.
- The recent resolution of the US debt ceiling standoff and, earlier this year, strong action by authorities to contain turbulence in US and Swiss banking, reduced the immediate risks of financial sector turmoil. This moderated adverse risks to the outlook. However, the balance of risks to global growth remains tilted to the downside. Inflation could remain high and even rise if further shocks occur, including those from an intensification of the war in Ukraine and extreme weather-related events, triggering more restrictive monetary policy. Financial sector turbulence could resume as markets adjust to further policy tightening by central banks. China's recovery could slow, in part as a result of unresolved real estate problems, with negative cross-border spillovers. Sovereign debt distress could spread to a wider group of economies. On the upside, inflation could fall faster than expected, reducing the need for tight monetary policy, and domestic demand could again prove more resilient.
- In most economies, the priority remains achieving sustained disinflation while ensuring financial stability. Therefore, central banks should remain focused on restoring price stability and strengthening financial supervision and risk monitoring. Should market strains materialize, countries should provide liquidity promptly while mitigating the possibility of moral hazard. They should also build fiscal buffers, with the composition of fiscal adjustment ensuring targeted support for the most vulnerable. Improvements to the supply side of the economy would facilitate fiscal consolidation and a smoother decline of inflation toward target levels.

Forces Shaping the Outlook

The global recovery from the COVID-19 pandemic and Russia's invasion of Ukraine is slowing amid widening divergences among economic sectors and regions.

The World Health Organization (WHO) announced in May that it no longer considers COVID-19 to be a "global health emergency." Supply chains have largely recovered, and shipping costs and suppliers' delivery times are back to pre-pandemic levels. But forces that hindered growth in 2022 persist. Inflation remains high and continues to erode household purchasing power. Policy tightening by central banks in response to inflation has raised the cost of borrowing, constraining economic activity. Immediate concerns about the health of the banking sector have subsided, but high interest rates are filtering through the financial system, and banks in advanced economies have significantly tightened lending standards, curtailing the supply of credit. The impact of higher interest rates extends to public finances, especially in poorer countries grappling with elevated debt costs, constraining room for priority investments.

As a result, output losses compared with pre-pandemic forecasts remain large, especially for the world's poorest nations. Despite these headwinds, global economic activity was resilient in the first quarter of 2023, with that resilience driven mainly by the services sector. The post-pandemic rotation of consumption back toward services is approaching completion in advanced economies (including in tourism-dependent economies of southern Europe), and it accelerated in a number of emerging market and developing economies in the first quarter (Figure 1). However, as mobility returns to pre-pandemic levels, the scope for further acceleration appears more limited.

At the same time, non-services sectors, including manufacturing, have shown weakness, and high-frequency indicators for the second quarter point to a broader slowdown in activity. Amid softening consumption of goods, heightened uncertainties regarding the future geoeconomic landscape, weak productivity growth, and a more challenging financial environment, firms have scaled back investment in productive capacity. Gross fixed capital formation and industrial production have slowed sharply or contracted in major advanced economies, dragging international trade and manufacturing in emerging markets with them. International trade and indicators of demand and production in manufacturing all point to further weakness. Excess savings built up during the pandemic are declining in advanced economies, especially in the United States, implying a slimmer buffer to protect against shocks, including those to the cost of living and those from more restricted credit availability.

Core Inflation Declining More Gradually Than Headline Inflation

Global headline inflation is set to fall from an annual average of 8.7 percent in 2022 to 6.8 percent in 2023 and 5.2 percent in 2024, broadly as projected in April, but above pre-pandemic (2017–19) levels of about 3.5 percent. About three-quarters of the world's economies are expected to see lower annual average headline inflation in 2023. Monetary policy tightening is expected to gradually dampen inflation, but a central driver of the disinflation projected for 2023 is declining international commodity prices. Differences in the pace of disinflation across countries reflect such factors as different exposures to movements in commodity prices and currencies and different degrees of economic overheating. The forecast for 2023 is revised down by 0.2 percentage point, largely on account of subdued inflation in China. The forecast for 2024 has been revised upward by 0.3 percentage point, with the upgrade reflecting higher-than-expected core inflation.

Core inflation is generally declining more gradually. Globally, it is set to decline from an annual average of 6.5 percent in 2022 to 6.0 percent in 2023 and 4.7 percent in 2024. It is proving more persistent than projected, mainly for advanced economies, for which forecasts have been revised upward by 0.3 percentage point for 2023 and by 0.4 percentage point for 2024 compared with the April 2023 WEO. Global core inflation is revised down by 0.2 percentage point in 2023, reflecting lower-than-expected core inflation in China, and up by 0.4 percentage point in 2024. On an annual average basis, about half of economies are expected to see no decline in core inflation in 2023, although on a fourth-quarter-over-fourth-quarter basis, about 88 percent of economies for which quarterly data are available are projected to see a decline. Overall, inflation is projected to remain above target in 2023 in 96 percent of economies with inflation targets and in 89 percent of those economies in 2024.

Policy Priorities

Conquer inflation. Central banks in economies with elevated and persistent core inflation should continue to clearly signal their commitment to reducing inflation. A restrictive stance—with real rates above neutral—is needed until there are clear signs that underlying inflation is cooling. Multilayered uncertainty complicates the task for central banks: Levels of neutral rates and lags of policy transmission are difficult to estimate with confidence, and the potency of the transmission mechanism may differ across economic sectors. In view of these uncertainties, adjusting policy in a data-dependent manner and avoiding a premature easing before price pressures have adequately receded is warranted, while continuing to use tools to maintain financial stability when needed. Although the primary responsibility for restoring price stability lies with central banks, legislated government spending cuts or tax increases aimed at ensuring public debt sustainability

can, by reducing aggregate demand and reinforcing the overall credibility of disinflation strategies, further ease inflation. This is especially the case in countries with overheated economies and steep inflation-unemployment trade-offs.

Maintain financial stability and prepare for stress. The fast pace of monetary policy tightening continues to put the financial sector under pressure. Strengthened supervision (by implementing Basel III and removing forbearance measures) and monitoring risks to anticipate further episodes of banking sector stress is warranted. The intensity of supervision must be commensurate with banks' risks and systemic importance, and it is essential to address oversight gaps in the nonbank financial sector. Macroprudential policy measures could be employed preemptively to address emerging risks in banks and nonbank financial institutions. Where market strains emerge, deploying tools that provide liquidity support promptly and forcefully, while mitigating the risk of moral hazard, would limit contagion. Because central banks are not equipped to deal with insolvency problems, it is important for governments to rebuild fiscal space in the event real resources need to be mobilized. Countries at risk of external shocks can make full use of the global financial safety net afforded by international financial institutions, including IMF precautionary financial arrangements.

Rebuild fiscal buffers while protecting the vulnerable. With fiscal deficits and government debt above pre-pandemic levels, credible medium-term fiscal consolidation is in many cases needed to restore budgetary room for maneuver and ensure debt sustainability. Fiscal adjustment is currently projected International Monetary Fund | July 2023 9 to average 0.5 percent of GDP in 2024 (based on the change in structural fiscal balances) in both advanced economies and emerging market and developing economies. For economies with access to international markets, the pace of fiscal consolidation should depend on the strength of private demand. The composition of fiscal adjustment should protect targeted support for the most vulnerable. Phasing out untargeted fiscal measures, including those that blunt price signals such as energy subsidies is warranted, especially since energy prices have broadly returned to pre-pandemic levels. In cases in which countries are in or at high risk of debt distress, achieving debt sustainability may require not only well-timed fiscal consolidation, but also debt restructuring.

GLOBAL FINANCIAL STABILITY UPDATE

Financial markets appear sanguine, and financial conditions have mostly continued to ease. Since the April 2023 Global Financial Stability Report, central banks have communicated that they could need to tighten monetary policy further. Even as yield curves remain inverted and recession concerns are prominent, financial conditions have mostly eased (Figure 1.1). A rally in the technology sector and higher equity prices, undoing some of the disinflationary impulses from tighter monetary policy, has supported this easing. In such circumstances, upside surprises to inflation could cause a sudden, sharp repricing of financial assets. The resulting tightening in global financial conditions could then interact with existing vulnerabilities in the financial system, which could amplify the tightening. Immediate concerns about the banking sector have eased, but growth in bank loans in advanced economies has slowed, and high interest rates will likely lead to tighter credit conditions. The shift of deposits in the United States from regional to large banks and money market funds has subsided, but a tighter monetary environment continues to challenge banks and nonbank financial intermediaries. In the euro area, mandatory repayments of loans from targeted longer-term refinancing operations are confronting banks that had relied on this source of funding, whereas in the United States, ongoing quantitative tightening and issuance of large amounts of Treasury bills after the recent debt ceiling episode could lead to further outflows from the banking system. In the meantime, the quality of business borrowers' credit is weakening as higher rates are starting to bite, raising credit costs, further curtailing bank lending, and slowing corporate debt issuance. Moreover, falling prices for commercial real estate—particularly office space—and residential property in many jurisdictions could add to pressures on indebted households and firms and weaken

nonbank financial institutions exposed to vulnerable sectors. Major emerging markets have generally remained resilient in this uncertain environment and largely avoided the banking sector turmoil in March 2023. However, many lower-rated issuers of sovereign bonds in emerging and frontier markets are still struggling to maintain access to international markets. In the second quarter, spreads for investment-grade sovereigns have stayed at about average historical levels, while spreads on those below investment grade have remained well above the historical range for issuances (880 basis points). Notably, 18 countries have spreads at distressed levels (more than 1,000 basis points). These high spreads have made issuance of new hard-currency debt very challenging for frontier markets so far in 2023 (Figure 1.2). INDIAN INDUSTRY OVERVIEW

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

MARKET SIZE

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise

exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritize lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.
- The private equity-venture capital (PE-VC) sector investments stood at US\$ 2 billion in September 2022.
- Merchandise exports in September 2022 stood at US\$ 32.62 billion.
- PMI Services remained comfortably in the expansionary zone at 56.7 during April-September 2022
- In September 2022, the gross Goods and Services Tax (GST) revenue collection stood at Rs. 147,686 crore (US\$ 17.92 billion).

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- Home & Cooperation Minister Mr. Amit Shah, laid the foundation stone and performed Bhoomi Pujan of Shri Tanot Mandir Complex Project under Border Tourism Development Programme in Jaisalmer in September 2022.
- In August 2022, Mr. Narendra Singh Tomar, Minister of Agriculture and Farmers Welfare inaugurated four new facilities at the Central Arid Zone Research Institute (CAZRI), which has been rendering excellent services for more than 60 years under the Indian Council of Agricultural Research (ICAR).
- In August 2022, a Special Food Processing Fund of Rs. 2,000 crore (US\$ 242.72 million) was set up with National Bank for Agriculture and Rural Development (NABARD) to provide affordable credit for investments in setting up Mega Food Parks (MFP) as well as processing units in the MFPs.
- In July 2022, Deendayal Port Authority (DPA) announced plans to develop two Mega Cargo Handling Terminals on a Build-Operate-Transfer (BOT) basis under Public-Private Partnership (PPP) Mode at an estimated cost of Rs. 5,963 crore (US\$ 747.64 million).
- In July 2022, the Union Cabinet chaired by the Prime Minister Mr. Narendra Modi, approved the signing of the Memorandum of Understanding (MoU) between India & Maldives. This MoU will provide a platform to tap the benefits of information technology for court digitization and can be a potential growth area for the IT companies and start-ups in both the countries.

ROAD AHEAD

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

METALS & MINING INDUSTRY IN INDIA

INTRODUCTION

India holds a fair advantage in production and conversion costs in steel and alumina. Its strategic location enables export opportunities to develop as well as fast-developing Asian markets. As of FY22, the number of reporting mines in India were estimated at 1,425, of which reporting mines for metallic minerals were estimated at 525 and non-metallic minerals at 720.

Minerals are precious natural resources that serve as essential raw materials for fundamental industries, so the growth of the mining industry is essential for the overall industrial development of a nation. The vast resources of numerous metallic and non-metallic minerals that India is endowed with serve as a foundation for the expansion and advancement of the nation's mining industry.

India is largely self-sufficient in metallic minerals including bauxite, chromites, iron ore, and lignite as well as mineral fuels like coal and lignite. The industry has the potential to significantly impact GDP growth, foreign exchange earnings, and give end-use industries like building, infrastructure, automotive, and electricity, among others, a competitive edge by obtaining essential raw materials at reasonable rates.

Rise in infrastructure development and automotive production are driving growth. Power and cement industries are also aiding growth for the sector. Demand for iron and steel is set to continue given the strong growth expectations for the residential and commercial building industry.

MARKET SIZE

Production level of important minerals in February, 2023 were: Coal 861 lakh tonnes, Lignite 41 lakh tonnes, Natural gas (utilized) 2595 million cu. m., Petroleum (crude) 22 lakh tonnes, Bauxite 1995 thousand tonnes, Chromite 330 thousand tonnes, Copper conc. 9 thousand tonnes, Gold 9 kg, Iron ore 245 lakh tonnes, Lead conc. 31 thousand tonnes, Manganese ore 278 thousand tonnes, Zinc conc. 144 thousand tonnes, Limestone 336 lakh tonnes, Phosphorite 183 thousand tonnes, Magnesite 10 thousand tonnes and Diamond 17 carat. In FY23, production of crude steel at 125.32 million tonnes (MT), finished steel at 121.29 MT and consumption of finished steel at 119.17 MT has exceeded their respective levels achieved over the corresponding period of not only COVID affected last two years but also pre COVID years as well.

India's iron ore production stood at 250 MT in FY22, increase of 23% compared with 204 MT in FY21. India's overall coal production has seen a quantum jump to 893.08 MT in FY23 as compared to 728.72 MT in FY19 with a growth of about 22.6%. The world production of Aluminum during October-December 2021 was about 16.62 million tonnes against world consumption of 16.56 million tonnes. The index of mineral production of mining and quarrying sector for the month of January, 2023 (Base: 2011-12=100) at 135.9, is 8.8% higher as compared to the level in the month of January, 2022. As per the provisional figures of Indian Bureau of Mines (IBM), the cumulative growth for the period April- January, 2022-23 over the corresponding period of previous year is 5.8%. In FY22, mineral production was estimated at Rs.190,392 crore (US\$ 24.95 billion). India ranks fourth globally in terms of iron ore production. Production of iron ore in FY21 stood at 204.48 million tonnes. From April 2021- January 2022, iron ore production in India stood at 204 million tonnes (MT). In FY20, India had a total number of 878 steel plants producing crude steel. India's crude steel production stood at 71.3 MT in FY23 (until October 2022). The steel production in India is projected to increase by 18% to reach 120 million tonnes (MT) by FY22. In Q3 FY22, production of hot metal, crude steel and saleable steel by SAIL stood at 1.55 MT, 1.44 MT and 1.46 MT, respectively. Combined Aluminum production (primary and secondary) in India stood

at 4.1 MT per annum in FY21 becoming the 2nd largest in the world. Aluminum production stood at 3,285,186 tonnes between April 2020 and January 2021. India is the world's second-largest coal producer as of 2021.

INVESTMENTS/ DEVELOPMENTS

Some of the investments/ developments in the Metals & Mining sector in the recent past are as follows:

As per data from the Ministry of Statistics and Programme Implementation (MOSPI), India's mining GDP increased from Rs. 739.90 billion (US\$ 8.98 billion) in the fourth quarter of 2020 to Rs. 913.03 billion (US\$ 11.09 billion) in the first quarter of 2021. The index of mineral production of mining and quarrying sector for the month of December 2022 stood at 107.4, 9.8% higher as compared to the level in the month of December 2021. In FY23 (until December 2022), the combined index of eight core industries stood at 152.2 driven by the production of coal, refinery products, fertilizers, steel, electricity and cement industries.

Between April 2000-September 2022, FDI inflows in the metallurgical industry stood at US\$ 17.09 billion, followed by the mining (US\$ 3.405 billion), diamond & gold ornaments (US\$ 1.219 billion) and coal production (US\$ 27.73 million) industries. In February 2023, ArcelorMittal - Nippon Steel is investing Rs. 60,000 crore (US\$ 7.3 billion) to expand its steelmaking capacity in Hazira to 15MT a year from 9MT. In February 2023, NMDC signed an agreement for collaborative research with CSIR-IMMT, Bhubaneswar on "Feasibility Studies for Preparation of Fused Magnesia from Kimberlite Tailings" at its Head Office in Hyderabad. In November 2022, IIT Bombay and JSW Group entered into an exclusive strategic agreement to establish first-of-its-kind, state-of-the-art JSW Technology Hub in India for steel manufacturing in India.

In August 2022, Tata Steel signed a MoU with the Government of Punjab for setting up a 0.75 MnTPA long products steel plant with a scrap-based electric arc furnace. In July 2022, Hindalco Industries Limited has signed an MoU with Phinergy and IOC Phinergy Private Limited (IOP) on R&D and pilot production of aluminium plates for Aluminum-Air batteries, and recycling of aluminum, after usage in these batteries. In October 2022, Coal India Limited (CIL) signed a MoU with Rajasthan Rajya Vidyut Utpadan Nigam Limited (RVUNL), for setting up 1,190 MW solar power project. In January 2023, Vedanta announced that its board had approved the sale of its international zinc assets in South Africa and Namibia to subsidiary Hindustan Zinc (HZL) for US\$ 2.98 billion.

In March 2022, MOU with detailed collaborative framework was between KABIL, India and Critical Mineral Office (CMO), Department of Industry, Science and Resources (DISER), Govt. of Australia for carrying out joint due diligence and further joint investment in Li & Co mineral assets of Australia. In February 2023, JSW Group announced to build a steel plant in Andhra Pradesh's YSR Kadapa district with an investment of Rs. 8,800 crore (US\$ 1 billion). In 2021, an Indian state committee recommended the expansion of Vedanta Ltd's Lanjigarh Alumina refinery from 1 million tonnes to 6 million tonnes, an investment that would cost the company Rs. 64.83 billion (US\$ 993 million).

In February 2023, Essar Capital Limited, investment manager of Essar Global Fund Limited, announced to set up steel plants in Odisha and a facility to import liquefied natural gas (LNG) at Hazira in Gujarat. On 2nd September 2022, Steel Authority of India Ltd. (SAIL) has supplied about 30000 tonnes of the specialty steel for nation's first indigenously built Aircraft Carrier INS Vikrant for Indian Navy which commissioned at Cochin Shipyard Ltd. Innovative mineral exploration activities using state-of-the-art technology by Geological Survey of India (GSI), stepped up efforts by Khanij Bidesh India Limited (KABIL) to source strategic minerals from countries like Australia, Argentina and Chile.

GOVERNMENT INITIATIVES

The Government of India has adopted few initiatives in the recent past, some of these are as follows:

- The government plans to monetize assets worth Rs. 28,727 crore (US\$ 3.68 billion) in the mining sector over 2022-25.
- In 2022, PLI Scheme for domestic production of specialty steel has been approved with an outlay of Rs.6,322 crore (US\$ 762.4 million) by the Cabinet.
- Mines and Minerals (Development and Regulation) Amendment Act, 2021, notified on 28.03.2021, for giving boost to mineral production, improving ease of doing business in the country and increasing contribution of mineral production to GDP.
- Enactment of Mines and Minerals (Development and Regulation) Amendment Act, 2021 enabled captive mines owners (other than atomic minerals) to sell up to 50% of their annual mineral (including coal) production in the open market.
- Import duty on Anthracite/Pulverized Coal Injection (PCI) coal, Coke and Semi-coke and Ferro-Nickel were reduced to zero.
- Export duty on Iron ores/ concentrates and iron ore pellets was raised to 50% and 45% respectively.

ROAD AHEAD

There is a significant scope for new mining capacities in iron ore, bauxite and coal and considerable opportunities for future discoveries of sub-surface deposits. Infrastructure projects continue to provide lucrative business opportunities for steel, zinc, and aluminum producers. Iron and steel make up a core component for the real estate sector. Demand for these metals is set to continue given strong growth expectations for the residential and commercial building industry.

The Government of India has also helped in the development of the metals and mining sector in India by launching key policy initiatives. The National Mineral Policy, which was approved by the government in February 2019, has ensured improved regulation and enforcement, more transparency, balanced social and economic growth, and sustainable mining techniques. The policy grants industry status to the mining activities and boost private sector funding.

Additionally, it aims to facilitate the merger and acquisition of mining companies, entice private sector involvement in exploration, and permit the transfer of mineral corridors created specifically for metals and mining leases. In the future, both increased domestic demand and exports are projected to play significant roles in driving the industry's expansion and its contribution to GDP growth in a post-covid environment.

Our recent R&D endeavour is extracting Gold from quartz and we have succeeded in it in the year 2022-23. We have successfully executed lab scale project. Now we are planning to develop a pilot level plant in the coming future. Our plan outlines a systematic approach to finding gold in quartz by combining geological knowledge, modern technology, and environmental responsibility throughout the process. Our research and development efforts for gold extraction from quartz focuses on various areas such as conducting detailed characterization of the quartz ore to understand its mineralogy, gold content, and associated impurities. Analyse the particle size distribution, liberation characteristics, and mineral associations to optimize extraction processes.
2. Our research team is currently developing a plan to automate our furnaces of producing wood charcoal. This will benefit us to increase our capacity and we can manufacture our charcoal pollution free, efficiently, less labour dependency. We are currently producing wood charcoal with the help of Bhatti's which takes almost 6 days to complete. However as per our research if we switch to automatic furnace the production time will significantly reduce to 36 hours approximately.

3. We are currently planning to introduce Carbon Reduction Furnaces for our product Manufacturing of MC Ferro Manganese in the near future. Introduction of such furnaces will increase the rate of production to a great extent. by introducing such measures, we can significantly improve our operational efficiency, and this will in return enhance our capacity.

COMPETITION

The Indian metal and mineral industry have historically been dominated by major entities, which aggregates major market share, as the industry presents significant entry barriers. These market entry barriers include the development of an extensive distribution network through long-term relationships with dealers, the ability to set up tinting machines with dealers, as well as significant marketing costs and the establishment of a distinct brand to gain product acceptance. We compete with these smaller companies as well on the strength of our distribution network, brand recognition and ability to leverage our dealer relationships to install tinting machines. We believe we are well-positioned to compete with these companies given our differentiated strategy where we seek to fulfil unmet product requirements, while at the same time offering a complete range of decorative paint products across India. With over a decade of operating history and the quality of our products, our product development capability and our range of paint products for different applications, we believe that we have the competitive strengths in the paint market in India.

The Act was enacted with a view to bring the regulation of mines and the development of minerals, under the control of the Union to a certain extent. The Act primarily regulates (a) the conditions, procedure and manner of granting licenses for prospecting and reconnaissance operations in the mining sector and matters incidental thereto; and (b) the conditions, procedure and manner of granting and renewal of mining licenses. The NMP highlights the importance of ensuring that regional and detailed exploration is carried out systematically in the entire geologically conducive mineral-bearing area of the country, using state-of-the-art techniques in a time-efficient manner. The NMP calls for the maximisation of extraction of mineral resources, located through exploration, using scientific methods of mining, beneficiation and economic utilisation. The NMP also promotes zero waste mining and calls for an upgrade in existing mining technology. It proposes to freely allow the import of mining machinery and equipments and also strengthen indigenous industry for their manufacturing. The NMP proposes to facilitate financing and funding of mining activities and development of mining infrastructure based on the principle of user charges and public private partnerships. It aims to develop manpower through education and specialized training, making the regulatory environment conducive to investment and technology flow. Under the NMP, efforts will be made to attune indigenous industry to the international economic situation in order to derive maximum advantage from foreign trade by anticipating technology and demand changes in international markets. Cooperation with countries with complementary resource bases will be developed. Efforts will be made to export minerals in a value-added form. A long-term export policy would provide stability and prove to be an incentive for

investing in large-scale mining activities. It may also provide for assurances on exports, which is a key factor for investment decisions, particularly for foreign direct investment in the sector. The NMP aims to provide a framework of sustainable development designed to take care of bio diversity issues, restoration of ecological balance, protection of environment and proper relief and rehabilitation of people displaced and affected by the mining process.

FACTORS THAT MAY AFFECT THE RESULTS OF THE OPERATIONS

Unusual or infrequent events or transactions

There are no transactions or events, which in our best judgment, would be considered unusual or infrequent that have significantly affected operations of the Company.

Significant economic changes that materially affected or are likely to affect income from continuing operations

There are no significant economic changes that materially affected Company’s operations or are likely to affect income from continuing operations. Any slowdown in the growth of Indian economy or future volatility in global commodity prices, could affect the business including the future financial performance, shareholders’ funds and ability to implement strategy and the price of the Equity Shares.

Known trends or uncertainties that have had or are expected to have a material adverse impact on sales, revenue or income from continuing operations

Other than as disclosed in the chapter titled “*Risk Factors*” beginning on page 29 of this Draft Red Herring Prospectus to our knowledge, there are no known trends or uncertainties that have or had or are expected to have a material adverse impact on revenues or income of our Company from continuing operations.

Future changes in relationship between costs and revenues in case of events such as future increase in labour or material cost or prices that will cause material change

According to our knowledge, there are no future relationship between cost and income that would be expected to have a material adverse impact on our operations and revenues. However, increase in the cost of the goods in which the Company deals, will affect the profitability of the Company. Further, the Company may not be able to pass on the increase in prices of the services to the customers in full and this can be offset through cost reduction.

The extent to which material increases in net sales or revenue are due to increased sales volume, introduction of new products or services or increased prices

The increase in revenue is by and large linked to increase in volume of all the activities carried out by the Company.

We expect competition to intensify due to possible new entrants in the market, existing competitors further expanding their operations and our entry into new markets where we may compete with well-established unorganized companies/ entities. This we believe may impact our financial condition and operations. For details, please refer to the chapter titled "**Risk Factors**" beginning on page 29 of this Draft Red Herring Prospectus.

Increase in income

PHASED IMPLEMENTATION OF UPI FOR BIDS BY RETAIL INDIVIDUAL BIDDERS AS PER THE UPI CIRCULAR

SEBI has issued circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three working days.

Pursuant to the SEBI UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the SEBI UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints in this regard, the relevant SCSB as well as the post – issue BRLM will be required to compensate the concerned investor.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI payment mechanism.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks make an application as prescribed in Annexure I of SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 and provide a written confirmation on compliance with SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Further, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/45 dated April 5, 2022, all UPI Bidders applying in public Offers where the application amount is up to ₹ 5,00,000 shall use the UPI Mechanism and shall also provide their UPI ID in the Bid cum Application Form submitted with any of the entities mentioned herein below:

- a syndicate member
