INTERNAL RISK FACTORS

- 1. We intend to utilize a portion of the Net Proceeds for setting up the Proposed Manufacturing Facility at Village Tofhapur, Tehsil Dera Bassi, Distt SAS Nagar, Mohali, Punjab, India (“Proposed Manufacturing Facility”). We are yet to place orders for plant and machinery and apply for requisite government approvals for the Proposed Manufacturing Facility. If we are unable to commission our Proposed Manufacturing Facility without time and cost overruns or unable to adhere to the schedule of implementation, it may adversely affect our business, results of operations and financial condition.***

Our Company is engaged in the business of production of processed and frozen non-vegetarian and vegetarian food., The present Manufacturing Facility of our Company is situated at Village Chaundheri, Ambala Road,

District Mohali, Punjab – 140 501, India. Our Company is proposing to expand its business operations by setting up the Proposed Manufacturing Facility in Village Tofhapur, Tehsil Dera Bassi, Distt SAS Nagar, Mohali, Punjab, India and expand its production capacity for vegetarian food segment.

We intend to utilize a portion of the Net Proceeds for setting up the Proposed Manufacturing Facility. We have obtained a Cost Assessment Report Plant and Machinery and a Cost Assessment Report Civil, both dated September 28, 2023 from independent chartered engineers (collectively referred to as the “**Cost Assessment Reports**”) who have estimated the total cost of the project to be ₹ 3,046.54 lakhs comprising of purchase of land (including registration charges) amounting to ₹452.53 lakhs, building and civil works amounting to ₹ 1,202.95 lakhs, plant and machinery amounting to ₹ 1,211.06 lakhs, other preliminary/ pre-operating expenses/ government rate, fees and taxes amounting to ₹110.00 lakhs and cost towards miscellaneous fixed assets (testing lab equipments and other production tools) amounting to ₹70.00 lakhs. As on the date of this Red Herring Prospectus, our Company has paid ₹ 62.85 lakhs as earnest money out of internal accruals for entering into an agreement towards acquisition of land located at Village Tofhapur, Tehsil Dera Bassi, Distt SAS Nagar, Mohali, Punjab, India. However we are yet to place final orders for 100% of plant and machinery and are yet to complete the purchase of land. Further, we are yet to apply for requisite government approvals for the Proposed Manufacturing Facility. We have not entered into any definitive agreements to utilize the Net Proceeds of the Issue and have relied on the quotations received from third parties and Cost Assessment Reports for estimation of the costs. Our Company, depending on various factors, will finalise the suppliers for the Proposed Manufacturing Facility which may not be the same from whom the quotations were obtained. While we have obtained the quotations from various vendors in relation to the plant and machinery and building and civil works, most of these quotations are valid for a certain period of time and may be subject to revisions. We cannot assure that we will be able to procure plant, machinery and equipment as well as undertake building and civil works within the cost indicated by such quotations and set up the Proposed Manufacturing Facility as per our schedule of implementation. For details, see “*Objects of the Issue*” on page 73. Any time and cost overrun due to our failure to purchase plant and machinery within our budget could adversely impact our financial condition temporarily and also delay our growth prospects.

Our expansion plan may be subject to delays and other risks such as unforeseen engineering or technical problems, disputes with workers, force majeure events, unanticipated cost increases or changes in scope, etc. Additionally, we may face risks in commissioning the Proposed Manufacturing Facility including but not limited to, delays in the civil constructions, problems with its facilities or for other reasons. If our Proposed Manufacturing Facility does not function as efficiently as intended or utilisation is not optimal, we may not be able to fulfil additional orders to generate anticipated or desired revenue as projected.

We cannot assure that we will be able to utilize our Proposed Manufacturing Facility to its full capacity or up to an optimum capacity, and non-utilisation of the same may lead to loss of profits and may adversely affect our business, results of operations and financial condition.

While we may seek to minimize the risks from any unanticipated events, it cannot be assured that all potential delays could be mitigated and that we will be able to prevent any cost over-runs and any loss of profits resulting from such delays, shortfalls and disruptions. As a result, our business, financial condition, results of operations and prospects could be materially and adversely affected. For further details, please refer to the chapter titled — “*Objects of the Issue*” on page 73.

2. *The purchase of land by the Company for setting up the Proposed Manufacturing Facility is subject to compliance with certain terms and conditions. Failure to comply with such conditions could adversely affect our business and financial condition.*

Our Company is proposing to expand its business operations by setting up Proposed Manufacturing Facility and expand its production capacity for the vegetarian segment. For this purpose, we have entered into an Agreement to Sell dated September 25, 2023 with Jaswinder Singh & Kulwinder Singh and Mohan Singh & Harwinder Singh (referred to as the “**Sellers**”) for a total area admeasuring approximately 3.49 acres (the “**Land**”). The Sellers received a no objection certificate (“**NOC**”) from the Indian Overseas Bank dated October 5, 2023 & October 9, 2023 and from UCO Bank October 11, 2023, certifying that the lien has been discharged from the said Land. This will result in the Company getting a clear and marketable title of the Land. Following the payment of pending consideration from the IPO proceeds, the said Land will be registered in the name of the Company and a conveyance deed will be executed in favour of the Company. The agreement is subject to whole consideration amount of ₹419 lakhs towards purchase of Land, being paid on or before March 31, 2024. Any failure or delay on our part to raise funds from the Issue or any shortfall

in the Issue proceeds and subsequent inability of our Company to source alternate means of finance may delay the purchase of Land and could adversely affect our growth plans.

- 3. We derive a substantial portion of our revenue from the sale of products in the non-vegetarian segment. Any loss of business in this segment may adversely affect our business, results of operations, financial conditions and cash flows.**

We introduced plant based mock meat products in 2021 and vegetarian products in 2022 with a separate unit having a capacity of 2,278 MT per annum. While we are in the process of continually developing our vegetarian and plant based segment, presently we are dependent on our non-vegetarian segment and derive a substantial portion of our revenue from the non- vegetarian segment which contributes ₹6,405.89 lakhs, ₹11,220.95 lakhs, ₹8,575.46 lakhs and ₹6,118.06 lakhs constituting 89.43%, 96%, 98% and 100% of our total revenue from operations for the six months ended September 30, 2023 and the Fiscals 2023, 2022 and 2021, respectively. Further also refer, “Our Business – Our Product Portfolio” on page 101. Any loss of business from, or any significant reduction in the volume of business with existing customers, if not replaced, could materially and adversely affect our business, financial condition and results of operations. Set forth below is the revenue break-up of the three business segments in which we operate.

Sr. No.	Product Segment	Revenue Mix (₹ in Lakhs)			
		Six months ended September 30, 2023	Financial Year ended March 31, 2023	Financial Year ended March 31, 2022	Financial Year ended March 31, 2021
1.	Non-vegetarian	6,405.89	11,220.95	8,575.46	6,118.06
2.	Vegetarian	191.94	15.84	0.00	0.00
3.	Plant-based	564.70	485.97	157.95	0.00

Our business is dependent upon our ability to manage our distribution and branding operations effectively and efficiently. A significant decline in the demand of our products, unfavourable industry conditions, disruption of distribution and supply channels, raw material suppliers, etc. could adversely affect our operations under this segment, and require a modification of our business strategy, or require us to incur significant expenditure or suspend our operations. We cannot assure you that the demand for products that we sell will grow in the future. The occurrence of or our inability to effectively respond to any such events or effectively manage the competition in this segment, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects.

- 4. Our Registered Office and godowns/ warehouses are not owned by the Company.**

At present, the warehouses/ godowns located in Punjab and Gurgaon, occupied and used by the Company are not owned by us and leased to us by third parties. Our Company enters into lease or clearing and forwarding agent (C & F) agreement with such third parties to be able to use the warehouses/ godowns. The tenure of the agreements is subject to renewal after the agreed period of time. Any change in the terms and conditions of such agreements, any premature termination of such agreements, may adversely affect our business operations and our financial condition. Further, our Registered Office is not owned by our Company. One of our Promoter and Executive Director, Gurpreet Chatha has gratuitously allowed the Company to use the property owned by him, located at 272, Mota Singh Nagar, Jalandhar – 144 001, Punjab, India, as the Registered Office of our Company.

However if we are required to vacate any of the above mentioned premises, we would be required to make alternative arrangements for new premises and other infrastructure and during this process we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition. For further details, please see sub-section titled “Our Properties” on page 116 in the “Our Business” section.

- 5. Our Promoter have extended personal guarantees and personal properties as collateral security with respect to various loan facilities availed by our Company. Revocation of any or all of these personal guarantees may adversely affect our business operations and financial condition.**

Our Promoters, Paramjit Singh Chatha, Gurpreet Chatha and Gurcharan Singh Gosal have provided personal guarantees for the working capital and term loan facilities availed by the Company. Further, the properties charged

with the bank for the working capital and term loan availed by the Company, are owned by Paramjit Singh Chatha and Gurcharan Singh. In the event any of these guarantees are revoked or if the personal property charged with the Bank is withdrawn, the Bank may require us to furnish alternate guarantees or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative securities in a timely manner or at all. If the guarantees are invoked or if the repayment of loan is accelerated or the Bank enforces any of the restrictive covenants or exercise their options under the relevant debt financing arrangement the ability of our Company to continue its business operations could be adversely affected, carrying our operations and use of assets may be hampered significantly and the Bank may demand the repayment of the entire outstanding amount and this in turn may also affect our further borrowing abilities. For further details please refer to the chapter titled “Financial Indebtedness” on page 158 of this Red Herring Prospectus.

6. We have not entered into any arrangements for alternate source of raising the funds required for our “Objects of the Issue”. Any shortfall in raising/meeting the same could adversely affect our growth plans, operations and financial performance.

Our Company has not entered into any definitive arrangement for alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. In addition to internal accruals of the Company, in case there is a shortfall in the Gross Proceeds or any increase in the actual utilisation of funds earmarked for the Objects, our Company has availed an expression of interest (“EOI”) from Kotak Mahindra Bank Limited (“Bank”) dated September 29, 2023 for an amount of ₹300 lakhs. However we cannot assure you that the EOI will translate into a formal agreement or a sanction by the Bank and this may affect our growth plan and capacity expansion. The delay/shortfall in raising these Gross Proceeds could result in delay in implementing the project and may require us to borrow the funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the Company.

7. Our Company has reported negative cash flow in the past. Any negative cash flows in the future would adversely affect our cash flow requirements, which may adversely affect our ability to operate our business and implement our growth plans, thereby affecting our financial condition.

Our Company has experienced negative net cash flow from operating, investing and financing activities in the recent past, the details of which are provided below:

Particulars	(Amount in lakhs)			
	Six months ended September 30, 2023	Year ended March 31, 2023	Year ended March 31, 2022	Year ended March 31, 2021
Net cash generated from operating activities	208.43	314.55	563.01	(86.72)
Net cash generated from investing activities	(89.25)	(169.85)	(525.34)	(211.37)
Net cash flow from financing activities	(115.36)	(137.58)	(43.65)	295.73

For year ended March 31, 2021 negative cash flow from operating activities is mainly on account of adverse impact of COVID-19 on the QSR industry in India.

For further details, please refer ‘Cash Flow Statement’ for the on page 45 of the chapter titled ‘Financial Information’.

8. Our Manufacturing Facility and operations are concentrated in Mohali region and any adverse developments affecting this region could have an adverse effect on our business, results of operations and financial condition.

Our Manufacturing Facility is located at Village Chaundheri, Ambala Road, District Mohali, Punjab – 140 501, India. Further, the Proposed Manufacturing Facility that is to be set up pursuant to this Issue, will be located at Village Tofhapur, Tehsil Dera Bassi, District SAS Nagar which also is located in Mohali District. Since our entire infrastructure, facility and business operations are currently concentrated in this region, any significant social, political or economic disruption, or natural calamities or civil disruptions in or around this region, or changes in

the policies of the local, state or central governments, could require us to incur significant capital expenditure, change our business structure or strategy, which could have an adverse effect on our business, results of operations and financial condition.

- 9. As on date we have not obtained any of the approvals, clearances and permissions as may be required from the relevant authorities for the Proposed Manufacturing Facility. In the event we are unable to obtain such approvals and permits, our business, results of operations, cash flows and financial condition could be adversely affected.**

Our Company is engaged in the business of production of frozen, ready to eat non vegetarian and vegetarian processed food. The Manufacturing Facility of our Company is situated at Village Chaundheri, Ambala Road, District Mohali, Punjab – 140 501, India. As on the date of this Red Herring Prospectus, our Company markets and sells mainly non-vegetarian products to approximately 32 cities across India. Our Company is proposing to expand its business operations by setting up of an additional manufacturing unit at Village Tofhapur, Tehsil Dera Bassi, Distt SAS Nagar, Mohali, Punjab, India and expand its production capacity for the vegetarian segment. For further details, please refer to the chapter titled — “*Objects of the Issue*” on page 73.

We have not applied for the required licenses and approvals for setting up of our Proposed Manufacturing Facility and increase in our overall production capacity. For instance, in relation to installation of plant and machinery in our existing manufacturing unit, we require various licenses and approvals as highlighted in the chapter titled “*Government and Other Statutory Approvals*” on page 174. Similarly, we will be required to obtain licenses and registrations including but not limited to (i) license to work a factory under Section 6(1) of the Factories Act, 1948; (ii) consent to operate; (iii) license under Food Safety and Standards Act, 2006, and (iv) license required under the Central Goods And Services Tax Act, 2017 etc.;

We shall be applying for such approvals prior to commencement of commercial production in the said Proposed Manufacturing Facility. We cannot assure you that we will be able to receive the approvals for the Proposed Manufacturing Facility in a timely manner. If we are not able to receive the required approvals and permissions at all or if there is a delay in receiving the same, all other operations, which are to be undertaken for the completion of the Proposed Manufacturing Facility might also be delayed. This may cause the actual cost of construction to exceed the budgeted amounts due to a variety of factors such as construction delays, cost escalation of raw material, interest rates, labour costs, regulatory and environmental factors, weather conditions and our financing needs. The quotations for plant and machinery and civil works received by us from various suppliers might expire and we may be compelled to purchase the same at a higher cost. Our financial condition, results of operations and liquidity would be materially and adversely affected if our project or construction costs materially exceed such budgeted amounts. For further details, please refer to chapters titled —“*Objects of the Issue*” and “*Government and Other Statutory Approvals*” on pages 73 and 174 respectively.

- 10. We may not be able to adequately protect our intellectual property, which may result in the inability to prevent our competitors from developing, using or commercializing products that are functionally equivalent or similar to our products.**

As on date of this Red Herring Prospectus, we have 3 registered trademarks. We are heavily dependent on our intellectual property. Our Company has made an application for registration with the Registrar of Trademarks for registration of our logo  and word marks such as NAX and Chatha Foods and the same is pending for registration before the Registrar of Trademarks. Such marks are open for observations until approved by the Trademarks Registry. Our inability to obtain such registrations may adversely affect our competitive business position. If any of our unregistered trademarks are registered in favor of a third party, we may not be able to claim registered ownership of those trademarks and consequently, we may be unable to seek remedies for infringement of those trademarks by third parties other than relief against “passing off” by other entities. In addition, in certain jurisdictions, marketing authorizations in relation to our products may be held by certain third parties with whom we have not directly entered into agreements to protect our rights in relation to such marketing authorizations.

The registration of any intellectual property rights is a time-consuming process, and there can be no assurance that any such registration will be granted. In the absence of such registration, competitors or other companies may challenge the validity or scope of our intellectual property. For instance, recently, objection was raised for one of our mark’s bearing application number 6221986. Presently we have filed our replies and are awaiting grant of approval from the Trademarks Registry. However we cannot assure you the approval will be granted. The protection of our intellectual property rights may require the expenditure of financial, managerial and operational

resources. We rely on a combination of laws and regulations, confidentiality of information and contractual restrictions to protect our intellectual property. Despite our efforts to protect and enforce our proprietary rights, unauthorized parties may in the future use, our trademarks or similar trademarks, copy aspects of our website images, features, compilation and functionality or obtain and use information that we consider as proprietary, such as trade secrets.

We cannot assure you that our pending trademark application will proceed to registration, and even registered trademarks could be challenged by a third party including by way of revocation or invalidity actions. In addition, there could be potential trade name or trademark ownership or infringement claims brought by owners of other rights, including registered trademarks, in our marks or marks similar to ours. Any claims, brand dilution or consumer confusion related to our brands could damage our reputation and brand identity and substantially harm our business, financial condition, cash flows and results of operations.

Further, we do not hold any patents over our product formulae and have not made any applications in this respect. We may therefore not be able to prevent our competitors from developing, using or commercializing products that are functionally equivalent or similar to our products. This may lead to reduction in sales of some of our products. Additionally, the process of obtaining intellectual property protection is expensive and time-consuming, and the amount of compensation for damages can be limited. Even if issued, patents or trademarks may not adequately protect our intellectual property, as the legal standards relating to the validity, enforceability and scope of protection of patent, trademark and other intellectual property rights are applied on a case-by-case basis and it is generally difficult to predict the results of any litigation relating to such matters. Any litigation, whether or not it is resolved in our favor, could result in significant expense to us and divert the efforts of our technical and management personnel, which may adversely affect our business, financial condition, cash flows and results of operations.

11. We derive a significant revenue from few of our customers and loss of one or more such customers or a reduction in demand for our products could adversely affect our business, results of operations, financial condition and cash flows.

As on September 30, 2023, we have 37 customers of our products. The table below sets forth details of revenue generated from our top 5 and the top 10 customers/ buyers for our products for the six months ended September 30, 2023 and for Fiscals 2023, 2022 and 2021:

Custo mers	Six months ended September 30, 2023		Fiscal 2023		Fiscal 2022		Fiscal 2021	
	Amount in ₹ lakhs	Percentage of Revenue from operations (%)	Amount in ₹ lakhs	Percentage of Revenue from operations (%)	Amount in ₹ lakhs	Percentage of Revenue from operations (%)	Amount in ₹ lakhs	Percentage of Revenue from operations (%)
Top 5	6,681.64	93.29	10,980.26	93.67	8,308.87	95.14	5,793.13	94.69
Top 10	7,028.77	98.13	11,343.40	96.76	8,480.48	97.10	5,843.23	95.51

The deterioration of the financial condition or business prospects of these buyers could result in a significant decrease in the revenues. The reduction in the amount of business we obtain from our customers shall be due to circumstances specific to such customer, such as pricing pressures or adverse market conditions affecting our supply chain or the economic situation generally, such as the COVID-19 pandemic, could have an adverse effect on our business, results of operations, financial condition and cash flows. While there has been no material impact on our business, results of operations and financial conditions of the Company, we cannot assure you that there will not be any material impact in future on our business, results of operations and financial condition due to non receipt of future purchase orders with the brand owners. Further, in the event of loss of one or more set of such

customers on whom we are dependent for our business, we cannot assure you that we may be able to offset such loss of business by identifying a new customer of our products.

Our reliance on a select group of customers may also constrain our ability to negotiate, which may have an impact on our profit margins and financial performance. The deterioration of the financial condition or business prospects of these customers could reduce their requirement of our products and result in a significant decrease in our revenues. We cannot assure you that we will be able to maintain historic levels of business from our significant customers, or that we will be able to significantly reduce customer concentration in the future.

12. In the event we are found not to be in compliance with any applicable regulations in relation to the regulatory filings or corporate actions, we may be subject to regulatory actions or penalties for any such possible non-compliance and our business, financial condition and reputation may be adversely affected.

Although, our Company endeavours to comply with all compliance/ reporting requirements, there may have been instances of delays/non-discourses/erroneous disclosures and non-filings of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 with RoC. For instance, in the past, our Company had inadvertently erred in providing details in Form MGT 7 filed with the Roc for the financial year 2022-23 for which we refiled the form with corrected details. Similarly, when there have been instances wherein our Company has failed to comply with the requirements of RoC or has delayed in any form filings, we have paid additional fees as required. No show cause notice in respect of the above has been issued to our Company till date and no penalty or fine has been imposed by any regulatory authority with respect to the same. It cannot be assured, that there will not be such instances in the future or any penalty or fine will not be imposed by any regulatory authority in respect to the same. Further we cannot assure you that we will not be subject to any regulatory actions, including monetary penalties by statutory authorities on account of any inadvertent discrepancies in our secretarial filings and/or corporate records in the future, which may adversely affect our business reputation, financial condition, divert management attention, and result in a material adverse effect on our business prospects.

13. There can be no assurance that the Objects of the Issue will be achieved within the time frame anticipated or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment. Further, the plan for deployment of the Net Proceeds has not been appraised by any bank or financial institution.

Our Company intends to use approximately ₹2,411.03 lakhs of the Net Proceeds for setting up the Proposed Manufacturing Facility. Our Board will have flexibility in temporarily investing the Net Proceeds as well as its *inter se* allocation across various heads under the setting up of the Proposed Manufacturing Facility, as disclosed in the section titled “Objects of the Issue” on page 73. Further, the plans for deployment of the Net Proceeds are in accordance with our management’s estimates and have not been appraised by any bank or any financial institution. Although we have obtained Cost Assessment Reports which highlights the estimated cost of the Proposed Manufacturing Facility that will be utilised from the Net Proceeds, our Company may have to revise its management estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment, and interest or exchange rate fluctuations and consequently its requirements may change.

In the event there is a shortfall in the Gross Proceeds raised from this Issue, we may be unable to commission the Proposed Manufacturing Facility. In case of any shortfall of the proceeds raised from this Issue, there can be no assurance that we will be able to raise the funds through other sources to complete the Proposed Manufacturing Facility. In case of shortfall in the proceeds of this Issue which are to be utilized for meeting the objects of the Issue, the shortfall will be met by such means as are available to our Company at such future time and at the discretion of the management, including by way of cash available with us or by any other means permissible under law. We cannot assure that we will be able to arrange for adequate cash or will be able to procure further loans to meet the funding requirements. Any failure to meet the additional funding requirements will have a material adverse effect on the implementation of the stated object.

We may also be required to adhere to certain restrictive covenants as regards raising of finance for the facility from means other than those sanctioned under our present financing documents. Any failure or delay on our part to raise funds from the Issue or any shortfall in the Issue proceeds and subsequent inability of our Company to source alternate means of finance may delay the implementation of our object and could adversely affect our growth plans.

14. We are subject to stringent quality control requirements and any product defect issues or failure by us or our suppliers to comply with quality standards may lead to the cancellation of existing and future orders, recalls and exposure to potential product liability claims.

All the products that we manufacture are for human consumption and any contamination or defect of the product could damage our reputation, adversely affect our sales and result in legal proceedings being initiated against us irrespective of whether the allegation has any factual basis or not. Such perceived contamination of our products could subject us to regulatory action and damage our reputation or have an adverse effect on our financial condition. We may not be able to meet regulatory relevant quality standards prescribed in India, or the quality standards imposed by our customers which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Any failure by us or our suppliers to achieve or maintain compliance with general quality standards may disrupt our ability to supply products sufficient to meet demand until compliance is achieved or, until a new supplier has been identified and evaluated. There can be no assurance that if we need to engage new suppliers to satisfy our business requirement, we will be able identify new suppliers in a timely manner, or at all. Failure to do so could lead to the cancellation or delays in fulfilling our existing and future orders and have a material adverse effect on our business and revenue.

Our Company has received various quality control certifications for its Manufacturing Facility such as HACCP certification ISO 22000, GFSI approved Food Safety certification - FSSC 22000, quality certificate issued by BRCGS. In spite of availing such quality certifications, our quality-control procedures may fail to test for all possible conditions of use or identify all defects in the product. Any such defects could require us to undertake service actions or product recalls. Any defect in our Company's products could also result in customer claims for damages. Any negative publicity regarding our Company, or products could adversely affect our reputation, our operations and our results from operations. Prior to entering into purchase contracts, some of our customers undertake a detailed review process and quality check, which involves inspection of our Manufacturing Facility. We are therefore subject to a stringent quality control mechanism at each stage of the entire process and are required to maintain the quality and precision level for our products. We will continue to incur a portion of our future revenues to manage our product quality and to maintain our existing quality control systems, which may impact our profitability.

We have long standing relations with our suppliers and purchase raw materials from them on an on-going basis and have not faced any difficulties in dealing with them or instances of failure on their behalf in the past. However, we cannot assure in future if our suppliers tie up with our competitors and fail to fulfil our demands which could cause adverse consequences.

15. The orders placed by customers may be delayed, modified or cancelled, which may have an adverse effect on our business, financial condition and results of operations.

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control and our customers caused by matters such as acts of God, strikes, civil commotion, riots, war, revolution, acts of governments, pandemics and lockdowns etc. may postpone the delivery of such products or cause its cancellation. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customers discretion or problems we encounter in the delivery of such products or reasons beyond our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to fulfil the orders placed. In addition, even where a completion of the order proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed.

16. We have in the past entered into related party transactions and we may continue to do so in the future.

As of September 30, 2023, we have entered into several related party transactions with our Promoters, Directors, etc. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer Note 29 – in the chapter titled— “*Restated Financial Information*” at page 155. While we believe that all our related party transactions have been conducted on an arm's length basis, and we confirm that the related party transactions entered into by the Company are in compliance with the relevant provisions of Companies Act and other applicable laws, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial

condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

17. Any shortage, disruption or non-availability of power and water may adversely affect operations and have an adverse impact on our business, results of operations and financial condition

Our Manufacturing Facility and the Proposed Manufacturing Facility and operations require significant and constant power supply as our raw materials and finished products are required to be processed and stored at specified and defined controlled temperatures. Temperature control becomes essential in relation to, processing and preservation of raw materials and our products. We currently source our water requirements for the purpose of processing of raw ingredients, sanitation, etc. from ground water at our Manufacturing Facility and depend on state electricity supply for our energy requirements. Although we have diesel generators to meet exigencies at Manufacturing Facility, we cannot assure you that our facilities will be operational during longer power failures. Any major failure in power supply may occur in the future as a result of any natural calamity, technical fault, shortage of power or other factors beyond our control or failure to obtain alternate sources of electricity or water, in a timely fashion, and at an acceptable cost, requiring us to either stop our operations or activities and may involve additional time and increase our costs which may have an adverse effect on our business, results of operations and financial condition.

18. The information in the Industry Section is derived from publicly available information and we have commissioned and paid for an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data provided in the same and such data has not been independently verified by us.

The information in the Industry Section is derived publicly available information and publications, and the report titled ‘Quick Service Restaurant (QSR) Market in India 2023’ of February 2023 commissioned and paid by us from Netscribes Data & Insights Private Limited. We have used certain extracts from the said report in the Industry section. Neither we nor any other person connected with this Issue has independently verified the information provided in the Industry Section. Industry sources and publications, referred to in the Industry Section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information. The extent to which the market and industry data used in this Red Herring Prospectus is meaningful depends on the reader’s familiarity with and understanding of the methodologies used in compiling such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Red Herring Prospectus. Further, the industry data mentioned in this Red Herring Prospectus or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Red Herring Prospectus in this context.

19. Our business depends on processing of raw materials and any loss of or shutdown of operations on any grounds could adversely affect our business or results of operations.

Our Manufacturing Facility is subject to operating risks, such as breakdown or failure of equipment, interruption in power supply or processes, shortage of raw materials, performance below expected levels of output or efficiency, natural disasters, obsolescence, labour disputes, strikes, lockouts, severe weather, industrial accidents, our inability to respond to technological advances and emerging industry standards and practices in the industry and the need to comply with the directives of relevant government authorities. The occurrence of any of these risks could significantly affect our operating results, and the loss or shutdown of operations at our Manufacturing Facility will have a material adverse effect on our business, financial condition and results of operations.

20. We do not have long term agreements with suppliers for our raw materials and an increase in the cost of or a shortfall in the availability of such raw materials could have an adverse effect on our business, results of operations and financial condition.

Production quantity and cost of our products are dependent on our ability to source raw materials and packaging materials at acceptable prices, and maintain a stable and sufficient supply of our major raw materials. Meat is the key raw material used to manufacture most of our products. We have long standing relations with our suppliers and purchase raw materials from them on an on-going basis. We have annual purchase contracts with them which saves us from fluctuations in the market rates. However, in the event that our suppliers are unable to supply meat to us on time or discontinue their supply to us or if we are unable to source quality raw material from other suppliers at competitive prices, we may not be able to meet our production and sales targets. Interruption of, or a

shortage in the supply of, raw material may result in our inability to operate our manufacturing facilities at optimal capacities or at all, leading to a decline in production and sales. An inability to procure sufficient quality raw material at reasonable cost, or an inability to pass on any additional cost incurred on purchase of raw materials to our customers, may adversely affect our operations and financial conditions.

21. If we are not able to obtain, renew or maintain our statutory and regulatory licenses, registrations and approvals required to operate our business, it may have a material adverse effect on our business, results of operations and financial condition.

We require certain statutory and regulatory licenses, registrations and approvals to operate our business some of which are granted for a fixed period of time and need to be renewed from time to time. Further, in future, we may also be required to obtain new licenses, registrations and approvals for any proposed operations, including any expansion of existing operations. As on date of this Red Herring Prospectus, we have applied for revisions of certain license of our Company post conversion from private limited to public limited company. There can be no assurance that the relevant authorities will renew such licenses, registrations and approvals in a timely manner or at all. For instance, our Company has applied for renewal of the license issued under the Plastic Waste Management Rules, however, we cannot assure you that such licenses will be granted or renewed in time or at all. For further information, refer “*Government and Other Statutory Approvals*” on page 174.

Further, these licenses, registrations and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. We may be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. Further, our Company will be responsible for bearing any and all liabilities arising out of this noncompliance. If we are unable to renew, maintain or obtain the required registrations or approvals, it may result in the interruption of our operations and may have a material adverse effect on our revenues and operations. Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company’s operations and may have a material adverse effect on our business. For further details on the licenses obtained by our Company and licenses for which renewal applications have been made, kindly refer the chapter titled “*Government and Other Approvals*” beginning on page 174.

22. If our customers fail to identify and effectively respond to changing preferences and spending patterns or changing trends of their end consumers in a timely manner, the demand for our products could decrease, causing our business, results of operations, financial condition and cash flows to be adversely affected

We cater to QSRs, CDRs and players in the HoReCa segment which as a whole is a highly competitive industry and is characterized by frequent changes particularly in consumer preferences, new products and product variations. The popularity and demand of our products may vary over time due to end consumer behaviour and preferences, demographics, local preferences, consumption trends, the level of end consumer confidence as well as on macroeconomic factors such as the condition of the economy and per capital income. End Consumer preferences in the food industry are difficult to predict as it is a fast-changing industry and changes in those preferences or the introduction of new products by our competitors could put our products at a competitive disadvantage. If our competitors alter their pricing model, and we are unable to change our product prices in response to such competitive measures, our results of operations and profitability may be materially and adversely affected.

Our future growth and success will depend significantly on our customers’ ability to anticipate changes in market trends and end consumer tastes and preferences, and the ability to identify, source and bring to the market in a timely manner new or unique products that satisfy the preferences of a broad range of end consumers. While we aim to introduce new brands and products from time to time, we recognize that end consumer preferences cannot be predicted with certainty and can change rapidly, and that there is no certainty that these will be commercially viable or effective or accepted by the end consumers. For instance, we ventured into plant-based mock meat products in 2021 when we recognized that the vegetarian and vegan retail industry was growing. However, an unanticipated change in the end consumer demand may adversely affect our liquidity and financial condition. If we are unable to foresee or respond effectively to the changes in market conditions, new and changing trends or desired end consumer preferences, accurately anticipate and forecast demand for products, then there may be a decline in the demand and sales for our products, thereby reducing our market share and preventing us from acquiring new customers and retaining existing customers and erosion of our competitive position and goodwill which could have an adverse effect on our business, results of operations, financial condition and cash flows.

23. *The success of our business depends substantially on our management team and operational workforce. Our inability to retain them could adversely affect our businesses.*

Our Key Management Personnel and Senior Management Personnel are key to our business operations. Our success and growth depend upon consistent and continued performance of our employees with direction and leadership from Senior Management. We cannot assure you that we will continue to retain any or all of the key members of our management. We do not maintain key personnel insurance in respect of the risk of resignation of any of our Key Management Personnel and Senior Management Personnel.

In addition, our success largely depends upon the continued service of our Key Management Personnel and Senior Management. They have deep industry knowledge and along with other key individuals in our business, play a strategic role in developing and building relations with our key stakeholders, including investors, board members, suppliers and other strategic business relationships on a regular basis. They have played, and are expected to continue to play, a significant role in building and maintaining strong relationships with critical stakeholders into the future. If they were to step down from their leadership positions in our Company, our reputation could deteriorate and our business could be adversely affected. Our success also depends on our ability to recruit, develop and retain qualified and skilled personnel, for our business. We compete in the market to attract and retain skilled personnel, in areas such as product and design, technology, sales and brand management and consumer service, supply chain and operations, as well as enabling corporate functions. As of September 30, 2023, we have 327 full-time employees. See “*Our Business—Human Resources*” on page 115.

If we fail to identify, recruit and integrate strategic personnel, our business could be adversely affected. Any loss of members of our Senior Management team or Key Management Personnel could significantly delay or prevent the achievement of our business objectives and could harm our business and consumer relationships. We may need to invest significant amounts of cash and equity to attract and retain new employees, and we may never realize returns on these investments. If we are not able to retain and motivate our current personnel or effectively integrate and retain employees, our ability to achieve our strategic objectives, and our business could be adversely affected.

24. *The launch of new brands or products that prove to be unsuccessful could affect our growth plans which could adversely affect our business, financial condition, cash flows and results of operations.*

New brand and product introductions from time to time is a key element of our growth strategy. New brands and product categories require us to understand and make informed judgments as to end consumer demands, tastes, trends and preferences. Various elements of new brand and product initiatives entail significant costs and risks, as well as the possibility of unexpected consequences, including:

- acceptance of our new brand/product initiatives by our customers may not be as high as we anticipate;
- sale of new products or brands may not sustain initial levels of high sales volumes;
- we may incur costs exceeding our expectations;
- we may experience a decrease in sales of our existing products as a result of the introduction of related new products;
- any delays or other difficulties impacting our ability, or the ability of our third-party suppliers, to manufacture, distribute and ship products in a timely manner in connection with launching the new product initiatives.

We expend considerable time and financial resources in the development and launch of new brands and products. Each of the above risks could delay or impede our ability to achieve our growth objectives, which could adversely affect our business, financial condition, cash flows and results of operations.

25. *We operate in a highly competitive industry. We also face competition from both domestic as well as multinational corporations. Our failure to compete effectively could have a negative impact on the success of our business and/or impact our margins*

Our industry is highly competitive and we expect that competition will continue to increase. We face competition from both domestic and multinational corporations and we expect competition to continue to intensify. If we are unable to change our offerings in ways that reflect the changing demands of taste and end consumer preferences or compete effectively with and adapt to such changes, our business, financial condition, cash flows and results of operations would be adversely affected.

Some of our competitors have competitive advantages such as longer operating histories, more experience in implementing their business plan and strategy, better brand recognition, greater negotiating leverage, established supply relationships and greater financial, marketing and other resources. In addition, the markets in which we compete have attracted significant investments from a wide range of funding sources, and our competitors can be highly capitalized, which allows them to lower their prices by achieving economies of scale.

26. Product liability claims and product recalls could harm our reputation, business, financial condition, cash flows and results of operations

We face risks of exposure to product liability or recall claims if our products fail to meet the required quality standards. We face the risk of legal proceedings and product liability claims being brought against us by various entities including consumers and distributors for various reasons including for defective and contaminated products sold. We cannot assure you that we will not experience any product recalls or material product liability losses in the future or that we will not incur significant costs to defend any such claims. While we maintain a product liability insurance cover, a product recall or a product liability claim may adversely affect our reputation and brand image, which may adversely affect our reputation, business, financial condition, cash flows and results of operations

27. Our inability to manage our growth may disrupt our business and reduce our profitability.

From Fiscal 2021 to Fiscal 2023, our total revenue has grown at a CAGR of 24.12%. As part of our growth strategy to meet customer needs, we are committed to diversify our product offerings, customer base and geographic footprint and minimizing our exposure to individual markets and segment. This will in turn result in substantial demands on our management, operational, and financial resources and our growth will require us to continuously invest in our operations and improve our operational, financial and internal controls, employee costs, newer units in newer locations, expansion of existing units and administrative infrastructure. An inability to manage our growth, including as a result of a failure to adequately respond to any such challenges, risks or uncertainties, may disrupt our business and reduce our profitability.

28. Some of our agreements may be under stamped or inadequately stamped and if any financial or judicial implication arises out of the same it may have an adverse effect on the Company's business and reputation.

Some of our lease agreements may be under stamped or unregistered. An inadequately stamped document is inadmissible as evidence before any judicial forum. It may be further noted that such inadequately stamped document is capable of being impounded upon presentation before a governmental or judicial authority and an applicable penalty may be imposed up to 10 times the value of the stamp duty payable.

29. We may not be able to accurately manage our inventory, this may adversely affect our business, financial condition and results of operations and reputation.

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and trade inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory, we may be required to dispose off our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of our products and local transportation. Should our supply of our products be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. Such disruption to supply would materially and adversely affect our business, profitability and reputation. Although in the past we have not experienced any instance of excess inventory or shortage thereof, but during the COVID-19 lockdown, we were forced to sell the inventory at a discount.

In the past we have not experienced any instances of disruptions to the delivery of product to our customer occurred for reasons such as poor handling, transportation bottlenecks which could have led to delayed or lost deliveries or damaged products and disrupt supply of these products, but there is not guarantee that these instances will not happen in future to improve our line capability, we try to stock our inventory. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we overstock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock

inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

30. *Our inability to effectively manage or expand our distribution network may have an adverse effect on our business, results of operations and financial condition.*

Our ability to expand and grow our sales significantly depends on the reach and effective management of our distribution network and the continued cooperation of our distributors. We cannot assure you that we will continue to be able to effectively manage our distribution network and maintain good relationships with such third parties. Certain distribution intermediaries may have exclusivity arrangements with our competitors and may be unable to, or decline to, stock and distribute our products, which in turn may limit our ability to expand our distribution network.

We intend to capture our existing intermediaries as well as create a distribution network in new markets to market our existing and new products proposed to be manufactured by our Company. Our inability to strategically expand our distribution network may lead to revenue loss and impede the full utilisation of our production capacity. We have an extensive network of 29 distributors covering 32 cities across India but we may face difficulties in creating a new and maintaining the current distribution network, identifying our competitors or keeping up with the expectation and the requirement of the intermediaries and end use customers. While the aforementioned events have not materially occurred in the past, future occurrence of any of these events could affect our financial condition, results of operations and prospects. We cannot assure you that we will be able to expand our sale and distribution network in accordance with our business plans, or at all, which may adversely affect our business, results of operations and financial condition.

31. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

Upon completion of this Issue, our Promoters and members of our Promoter Group will have the ability to exercise significant influence over all matters requiring shareholders' approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company's best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

32. *The average cost of acquisition of Equity Shares held by our Promoter could be significantly lower than the Issue Price.*

Our Promoter's average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined through book building mechanism. For further details regarding average cost of acquisition of Equity Shares by our Promoter in our Company and build-up of Equity Shares by our Promoter in our Company, please refer to the chapter titled "Capital Structure" on page 58.

33. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.*

As on September 30, 2023 our Company's total outstanding loans are ₹ 987.96 lakhs. In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favourable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays

in arranging additional working capital requirements, loss of reputation, liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our debt or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled —“*Financial Indebtedness*” on page 158.

34. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.

Since the Issue size is less than ₹10,000 lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

35. The requirement of funds in relation to the objects of the Issue has not been appraised by any bank or financial institution

We intend to use the proceeds of the Issue for the purposes described in the section titled “*Objects of the Issue*” on page 73. The objects of the Issue have not been appraised by any bank or financial institution. These are based on management estimates and current conditions and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy. Based on the competitive nature of the industry, we may have to revise our management estimates from time to time and consequently our funding requirements may also change. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors/Management and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

36. An inability to maintain adequate insurance coverage in connection with our business may adversely affect our operations and profitability.

We have obtained a number of insurance policies in connection with our operations and Manufacturing Unit including property insurance, product insurance, marine insurance and employee insurance. While we are of the opinion that the insurance coverage which our Company maintains for its business would be reasonably adequate to cover the normal risks associated with the manufacturing activities and other operations of our business, we cannot assure you that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. Our Company’s insurance policies may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. Further, we do not have a key man’s insurance policy covering risks for our key managerial employees. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance or exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial condition may be adversely affected.

37. The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchange may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchange, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchange or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time

of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

38. *Our Company has not paid dividends on Equity Shares in the past and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.*

The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. Since incorporation, our Company has not paid any dividend as the profits of our Company were invested in our Company for the purposes of incurring capital expenditure. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on various factors.

39. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

40. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE Limited in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE Limited due to delay in submission of required documents/ completion of formalities/compliance with required laws by the issuer. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

External Risk Factors

41. *Natural disasters, epidemics, pandemics, acts of war, terrorist attacks and other events could materially and adversely affect our business and profitability.*

Natural disasters (such as earthquakes, fire, typhoons, cyclones, hurricanes and floods), pandemics, epidemics, strikes, civil unrest, terrorist attacks and other events, which are beyond our control, may lead to global or regional economic instability, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations. Any of these occurrences could cause severe disruptions to our daily operations and may warrant a temporary closure of our Manufacturing Unit. Such closures may disrupt our business operations and adversely affect our results of operations. Our operation could also be disrupted if our clients are affected by such natural disasters or epidemics. An outbreak or epidemic, such as SARS, the H1N1 and H5N1 viruses or COVID-19 could cause general consumption or the demand for various products to decline, which could result in reduced demand for our products. Such an outbreak or epidemic may significantly interrupt our business operations as health or governmental authorities may impose quarantine and inspection measures on us or our clients.

Moreover, certain regions in India have witnessed terrorist attacks and civil disturbances and it is possible that future terrorist attacks or civil unrest, as well as other adverse social, economic and political events in India could have a negative effect on us. Transportation facilities, including vehicles, can be targets of terrorist attacks, which could lead to, among other things, increased insurance and security costs. Regional and global political or military tensions or conflicts, strained or altered foreign relations, protectionism and acts of war or the potential for war

could also cause damage and disruption to our business, which could materially and adversely affect our business, financial condition, cash flows and results of operations. Such incidents could create the perception that investments in Indian companies involve a higher degree of risk and such perception could adversely affect our business and the price of the Equity Shares.

42. Financial instability in other countries may cause increased volatility in Indian and other financial markets.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have in the past experienced substantial dislocations, liquidity disruptions and market corrections.

43. Changing laws, rules and regulations and legal uncertainties in India and other countries may adversely affect our business and financial performance.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

44. Our business is affected by economic, political and other prevailing conditions beyond our control.

We are incorporated in India and we conduct our business affairs and our operations in India as well as internationally. Our Equity Shares are proposed to be listed on BSE SME. Consequently, our business, operations, financial performance and the market price of our Equity Shares will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include: a) any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets; b) any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions; c) prevailing income conditions among Indian customers and Indian corporations; d) epidemic or any other public health issue in India or in countries in the region or globally, including in India's various neighboring countries and e) hostile or war like situations with the neighboring countries etc.

45. Investors outside India subscribing to this Issue may not be able to enforce any judgment of a foreign court against us, except by way of a suit in India.

Our Company is incorporated under the laws of India. As a result, it may be difficult for investors to effect service of process upon us or such persons in India or to enforce judgments obtained against our Company or such parties outside India. India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. India has reciprocal recognition and enforcement of judgments in civil and commercial matters with a limited number of jurisdictions, including the United Kingdom, Singapore, UAE, and Hong Kong. A judgment from certain specified courts located in a jurisdiction with reciprocity must meet certain requirements of the Code of Civil Procedure, 1908, as amended (“Civil Procedure Code”). The United States has not been notified as a reciprocating territory.

In addition, any person seeking to enforce a foreign judgment in India is required to obtain the prior approval of the RBI to repatriate any amount recovered, and we cannot assure that such approval will be forthcoming within a reasonable period of time, or at all, or that conditions of such approvals would be acceptable. Such amount may also be subject to income tax in accordance with applicable law. Consequently, it may not be possible to enforce in an Indian court any judgment obtained in a foreign court, or effect service of process outside of India, against Indian companies, entities, their directors and executive officers and any other parties resident in India. Additionally, there is no assurance that a suit brought in an Indian court in relation to a foreign judgment will be disposed of in a timely manner.

46. Any adverse change or downgrading in ratings of India may adversely affect our business, results of operations and cash flows.

Any adverse revisions to India’s credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favorable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

47. The requirements of being a listed company may strain our resources.

We are not a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators that is associated by the virtue of being a listed company. As a listed company, we will incur legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing compliances and reporting requirements to the Stock Exchange on which equity shares of our Company will be listed, which require us to file audited annual and unaudited half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

48. Our clients might engage in dealings or transactions in or with countries or persons that are subject to U.S. and other sanctions.

Applicable laws and rules in U.S. generally prohibit U.S. persons from directly or indirectly investing or otherwise doing business in or with certain countries that are the subject of comprehensive sanctions and with certain persons or businesses that have been specially designated by the OFAC or other U.S. government agencies. Other governments and international or regional organisations also administer similar economic sanctions. We may enter into transactions with customers who may be doing business with, or located in, countries to which certain OFAC-administered and other sanctions apply. There can be no assurance that we will be able to fully monitor all of our transactions for any potential violation. If it were determined that transactions in which we participate violate U.S. or other sanctions, we could be subject to U.S. or other penalties, and our reputation and future business prospects in the United States or with U.S. persons, or in other jurisdictions, could be adversely affected. Further, investors in the Equity Shares could incur reputational or other risks as the result of our customers’ dealings in or with countries or with persons that are the subject of U.S. sanctions

49. Under Indian legal regime, foreign investors are subject to investment restrictions that limit our Company’s ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares. Accordingly, our ability to raise foreign capital may be constrained.

As a Company incorporated in India, we are subject to exchange controls that govern the borrowings in foreign currencies. Further, under applicable foreign exchange regulations in India, transfer of shares between non-residents and residents are freely permitted (subject to compliance with sectoral norms and certain other restrictions), if they comply with the pricing guidelines and reporting requirements specified under applicable

laws. If share transfer is not in compliance with such requirements and does not fall under any of the permissible exceptions, then prior approval of the relevant regulatory authority is required. Such regulatory restrictions limit our financing sources and could constrain our ability to obtain financings on competitive terms and refinance existing indebtedness.

50. Equity Shares of our Company have never been publicly traded, and after the Offer, the Equity Shares may be subject to price and volume fluctuations, and an active trading market for the Equity Shares may or may not develop. Further, the Issue Price may not be indicative of the market price of the Equity Shares after the Issue.

Prior to this Issue of our Company, no public market existed for the Equity Shares, and an active trading market on the Stock Exchange may not develop or be sustained after the Issue. Listing and quotation of Equity Shares does not guarantee that a market for the same will develop, or if developed, the liquidity of such market for the Equity Shares cannot be guaranteed. The Issue Price of the Equity Shares is proposed to be determined through a book building process in compliance with Schedule XIII of the SEBI ICDR and the same may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The Issue Price will be based on numerous factors, as described in the section “*Basis for Issue Price*” beginning on page 73. This price may not necessarily be indicative of the market price of our Equity Shares after the Issue is completed. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the industry we operate in.

Our Equity Shares are expected to trade on BSE SME after the Issue, but there can be no assurance that active trading in our Equity Shares will develop after the Issue, or if such trading develops, that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

51. Investors may be subject to Indian taxes arising out of income arising on the sale of the Equity Shares

Under the present Indian tax laws and regulations, unless specifically exempted, capital gains that arise from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax (“STT”) is levied on and collected by an Indian Stock Exchanges on which equity shares are sold. Any gain realized on the sale of listed equity shares held for more than 12 months, which are sold using any other platform other than on a recognised Stock Exchanges and on which no STT has been paid, are subject to long-term capital gains tax in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of Securities Transaction Tax (“STT”), on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on and collected by a domestic Stock Exchanges on which the Equity Shares are sold. Further, any capital gains realised on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident and the seller is entitled to avail benefits thereunder, subject to certain conditions.

Capital gains arising from the sale of the Equity Shares will not be chargeable to tax in India in cases where relief from such taxation in India is provided under a treaty between India and the country of which the seller is resident and the seller is entitled to avail benefits thereunder, subject to certain conditions. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

52. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after the submission of their Bid, and Retail Individual Investors are not permitted to withdraw their Bids after closure of the Bid/ Offer Closing Date.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/Offer Period and withdraw their Bids until the Bid/ Offer Closing Date. While we are required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on Stock Exchange where such Equity Shares are proposed to be listed, including Allotment, within three Working Days

from the Bid/Offer Closing Date or such other period as may be prescribed by the SEBI, events affecting the investors' decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or financial condition may arise between the date of submission of the Bid and Allotment. We may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Investors' ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

53. Investors will not be able to sell immediately on an Indian Stock Exchange any of the Equity Shares they purchase in the Issue.

The Equity Shares will be listed on the Stock Exchange. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited within one working day of the date on which the Basis of Allotment is approved by the Stock Exchange. The Allotment of Equity Shares in the Issue and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately five Working Days from the Bid/Issue Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchange is expected to commence within three Working Days of the Bid/ Issue Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchange. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

54. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution. However, if the laws of the jurisdiction the investors are located in does not permit them to exercise their pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value the custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emption rights granted in respect of the Equity Shares held by them, their proportional interest in us would be reduced.

GLOBAL ECONOMIC OVERVIEW

As per the International Monetary Fund (IMF)’s World Economic Outlook growth projections released in April 2023, global economic growth for CY22 was estimated at 3.4% on year on year (y-o-y) basis, down from 6.3% in CY21 due to disruptions resulting from the Russia-Ukraine conflict and higher-than-expected inflation worldwide. The global economic growth for CY23 is projected to slow down further to 2.8% mainly due to tightening global financial conditions, expectations of steeper interest rate hikes by major central banks to fight inflation and spillover effects from the war between Russia and Ukraine with gas supplies from Russia to Europe expected to remain tightened. Growth in CY24 is projected to marginally improve to 3.0% with expected gradual recovery from the effects of the war and subsiding of inflation. For the next 5 years, the IMF projects world economic growth in the range of 3.0%-3.2% on a y-o-y basis.

Global Growth Outlook Projections (Real GDP, Y-o-Y change in %)

Source: IMF – World Economic Outlook, April 2023

For major advanced economies, the GDP growth was estimated to be 2.7% in CY22, down from 5.4% in CY21, which is further projected to decline to 1.3% in CY23. This forecast of low growth reflects rise in central bank interest rates to fight inflation and the impacts of Russia- Ukraine war. About 90% of advanced economies are projected to see decline in growth in CY23. This growth is expected to increase slightly to 1.4% in CY24. One of the major countries from this group is United States. The growth for United States is estimated to be 2.1% for

CY22 compared to 5.9% in CY21. Whereas, growth for CY23 and CY24 is projected at 1.6% and 1.1%, respectively. This is reflective of declining real disposable income impacting consumer demand with higher interest rates taking toll on spending.

The growth for CY22 in Euro Area is estimated to be 3.5% compared to 5.4% in CY21. However, the boost from reopening of economy after pandemic appears to be fading. For CY23 and CY24, the growth is projected at 0.8% and 1.4%, respectively. With inflation at about 7%-8% in several Euro Area countries and the United Kingdom, household budgets will remain stretched. Further, the accelerated pace of rate increases by the Bank of England and the European Central Bank is tightening financial conditions and cooling demand in the housing sector and beyond.

For the emerging market and developing economies group, GDP growth is estimated at 4.0% in CY22, compared to 6.9% in CY21. This growth is further projected at 3.9% in CY23 and 4.2% in CY24. This expected improvement in GDP growth in CY24 is on account of anticipation of gradual recovery.

In China, growth is expected to pick up to 5.2% with the full reopening in CY23. Whereas, India's GDP projection for CY23 and CY24 stand at 5.9% and 6.3%, respectively with resilient domestic demand despite external headwinds.

Policy Priorities

Ensuring a durable fall in inflation: With inflation still well above targets for most economies, the priority remains reducing inflation and ensuring that expectations stay anchored while containing financial market strains and minimizing the risk of further turbulence.

Safeguarding financial stability: Minimizing financial stability risks will require careful monitoring of risks, managing market strains, and strengthening oversight. This includes proactively employing the IMF's precautionary financial arrangements and focusing aid from the international community on low-income countries facing shocks, including through the rechanneling of special drawing rights and support from the Poverty Reduction and Growth Trust and the Resilience and Sustainability Trust.

Normalizing fiscal policy: As deficits and debts remain above pre-pandemic levels, fiscal efforts will be warranted in 2023. Fiscal policymakers should support monetary policy in getting inflation back to target.

Supporting the vulnerable: The surge in global energy and food prices in 2022 triggered a cost-of-living crisis in many countries, especially low-income countries, many of which are still suffering from food insecurity. Governments acted swiftly to extend support to households and firms, which helped cushion the effects on growth. Broad-based measures are costly and should be replaced by more targeted approaches.

Improving food security everywhere: Trade restrictions on food and fertilizers run the risk of pushing a large share of the global population into food insecurity. Restrictions on exports of food and fertilizers—particularly those most recently imposed—should be lifted to safeguard food supplies and their distribution globally.

Restoring debt sustainability: With lower growth and higher borrowing costs, public debt ratios are becoming unsustainable in many countries. Actions must be taken to put them on a credible downward path. For economies at high risk of debt distress, fiscal consolidation and structural reforms to create sound policy frameworks and revitalize growth remain the fundamental solution to sustainable debt.

Reinforcing supply: Well-designed supply-side policies could help address structural factors impeding medium-term growth and recoup some of the output losses accumulated since the pandemic. Policy actions could include structural reforms to reduce harmful market power and rent-seeking behavior as well as overly rigid regulation and planning processes. They could also involve stimulating investment in infrastructure improvements and productive digitalization initiatives and enhancing access to and quality of education.

Containing pandemic risks: Authorities should remain vigilant to the risks of a reemergence of the COVID-19 virus and new pandemics and their potential impacts on the global economy. This includes coordinated efforts to boost access to vaccines and medicines where immunity is low and greater public support for vaccine development and systematic responses to future epidemics.

Strengthening multilateral cooperation: Strengthening the multilateral trading system would help reduce the risks to growth and resilience from such fragmentation by providing fair and predictable rules for exchange. To achieve

such strengthening, WTO rules in critical areas such as agricultural and industrial subsidies must be upgraded, new WTO-based agreements implemented, and the WTO dispute settlement system fully restored.

Speeding up the green transition: Progress in emission reductions needed to contain global warming at 2°C or less remains inadequate. International coordination on carbon pricing or equivalent policies would facilitate a faster decarbonization in a cost-efficient way. With declining investment in fossil fuels, a concerted push on alternative clean energy investment could help ensure sufficient energy supplies and achieve the needed decarbonization. This could be achieved through investment incentives for green materials and electricity grid upgrades, easing of permitting processes for renewables, and support for research and development, among other efforts.

INDIAN ECONOMIC OVERVIEW

The Indian economy exhibited robust resilience in 2022-23 amidst a global turmoil following the war in Ukraine, and recorded a growth of 7.0 per cent, the highest among major economies in the world. Barring the Omicron wave scare early in the year 2022, COVID-19 was largely on the ebb for most part of the year helping in restoration of consumer and business confidence. Contact-intensive activity gradually resuscitated during the year and the release of pent-up demand bolstered domestic activity. Sound macroeconomic fundamentals, a resilient financial system reflected in healthy balance sheets of banks and non-banking financial companies (NBFCs), and a deleveraged corporate sector imparted resilience to counter the adverse global spillovers.

Headline CPI inflation, which was projected by the Reserve Bank before the war started in Ukraine to moderate to 4.5 per cent in 2022-23, surged to 6.7 per cent. The elevation in price pressures was broad based and sticky, exceeding the upper tolerance level of the inflation target in several months of the year. The Reserve Bank raised the policy repo rate cumulatively by 250 basis points (bps) and changed the monetary policy stance to withdrawal of accommodation, prioritising price stability while remaining mindful of growth. In view of the dominance of supply side factors in shaping the inflation trajectory, the government introduced several targeted item specific anti-inflationary measures. Fiscal policy demonstrated a commitment to consolidation while directing public expenditure towards a large increase in growth-supportive capex. Capital formation emerged as a lead driver of growth during 2022-23.

Domestic economic activity does face challenges from an uninspiring global outlook going forward, but resilient domestic macroeconomic and financial conditions, expected dividends from past reforms and new growth opportunities from global geo-economic shifts place India at an advantageous position. Taking into account softer global commodity and food prices, good rabi crop prospects, sustained buoyancy in contact-intensive services, the government's continued thrust on capex, higher capacity utilisation in manufacturing, double digit credit growth, receding drag on purchasing power from high inflation and rising optimism among businesses and consumers, real GDP growth for 2023-24 is projected at 6.5 per cent with risks evenly balanced.

Table 1: RBI's GDP Growth Outlook (Y-o-Y %)

FY24 (complete year)	Q1FY24	Q2FY24	Q3FY24	Q4FY24
6.5	8.0	6.5	6.0	5.7

Industry and Services sector leading the recovery charge

Agriculture sector: Agriculture and allied sector growth moderated marginally in 2022-23, for the third consecutive year. The GVA of the sector grew by 3.3 per cent during 2022-23 on record production of foodgrains (including rice, wheat, maize, barley and pulses), sugarcane and rapeseed and mustard. The sector's buoyancy during the year was generally supported by normal cumulative south-west monsoon (SWM) rainfall - despite its uneven distribution over time and across regions, and delayed withdrawal - and normal north-east monsoon rains.

Going forward, rising bank credit to the sector, increased exports and higher sowing of rabi crop will be the drivers for agriculture sector. However, performance of the sector will depend on the spatial and temporal distribution of rainfall. A downside risk exists in case the intensity of El Nino is significantly strong.

Industrial sector: During 2022-23, the industrial sector's growth moderated amidst lingering global uncertainties. The organised manufacturing sector which benefitted from the lower base as well as softer raw material costs during 2021-22 faced the brunt of rising raw material costs in H1:2022- 23. The supply chain bottlenecks following the war in Ukraine coupled with elevated raw material costs, impacted the profitability of manufacturing companies. While increased sales in Q1:2022-23 cushioned the hike in raw material costs, the global slowdown impacted sales in Q2:2022-23 adversely, resulting in profit diminishing at an accelerated pace. In Q3:2022- 23, a moderation in input costs could only contain the decline in profits to some extent.

Industrial output measured by the index of industrial production (IIP) expanded by 5.1 per cent during 2022-23 as compared to 11.4 per cent last year. Manufacturing sector, which accounts for three-fourths of the industrial sector largely shaped the industrial sector recovery. The micro, small and medium enterprises (MSMEs) segment, which contributes about 29 per cent of India's GDP and employs over 11 crore workers, recorded a modest recovery. The revenue for the MSME sector is projected to exceed the pre-COVID level in 2022-23 by 25 per cent.⁴ With 99.8 per cent of MSMEs being unregistered, they account for a sizeable share of the unorganised sector output and employment [National Sample Survey Organisation (NSSO), 2015-16]. Various policy measures were introduced to support the sector from the onslaught of the COVID-19 pandemic, including the Emergency Credit Line Guarantee Scheme (ECLGS), which aimed at meeting their liquidity needs for sustaining business operations. As per the assessment of the Credit Information Bureau (India) Limited (CIBIL), the scheme assisted MSME borrowers in managing their businesses better with lower non-performing assets (NPAs) for borrowers availing the facility as compared to borrowers who were eligible but did not avail of it (across all categories of micro, small and medium industries). Overall, industrial sector is valued at Rs. 45.2 trillion registering 4.4% growth in FY23.

Services sector : Services sector, which being contact intensive faced the major brunt of COVID-19 pandemic, revived strongly in 2022-23. The high frequency indicators of services sector indicated strong growth in Q1:2022-23 supported by low base, but the momentum moderated in Q2 and Q3. In Q4:2022-23, three-wheeler sales, air passenger traffic and GST E-way bills improved while sales of passenger vehicles and construction sector moderated. Among sectors, construction, domestic trade and transport surpassed their pre-pandemic levels, while aviation, tourism and hospitality sectors, though recovering, are yet to reach the respective pre-pandemic levels. Overall, benefitting from the pent-up demand, service sector was valued at Rs. 20.6 trillion and registered growth of 9.5% y-o-y in FY23. Healthy growth in various service sector indicators like air passenger traffic, port cargo traffic, GST collections and retail credit is expected to support service sector going ahead.

Conclusion: Despite the global growth uncertainties, Indian economy is relatively better placed. The major headwinds to economic growth are escalating geopolitical tensions, volatility in global commodity prices and shortages of key inputs. However, the bright spots for the economy are continued healthy domestic demand, support from government towards capital expenditure, moderating inflation and improving business confidence. Various high-frequency growth indicators including purchasing managers index, auto sales, bank credit, GST collections have shown improvement in the FY23. Moreover, normalizing employment situation after the opening up of economy is expected to improve and provide support to consumption expenditure.

The IMD forecasts a normal monsoon despite El Nino which bodes well for the agricultural sector's outlook however, a lot will depend on the spatial and temporal distribution of rainfall. A downside risk exists in case the intensity of El Nino is significantly strong.

Public investment is expected to exhibit healthy growth as the government has budgeted for strong capital expenditure in FY24. Private sector's intent to invest is also showing improvement as per the data announced on new project investments. However, the volatility in commodity prices and the economic uncertainties emanating from global turbulence may slow down the improvement in private capex and investment cycle.

Among sectors, the industrial segment is expected to perform better as the input costs are now moderating. With flagship programmes like 'Make in India' and the PLI schemes, the government is continuing to provide the necessary support to boost the industrial sector. Service sector is expected to see continued growth in FY24 with healthy economic growth.

Market overview

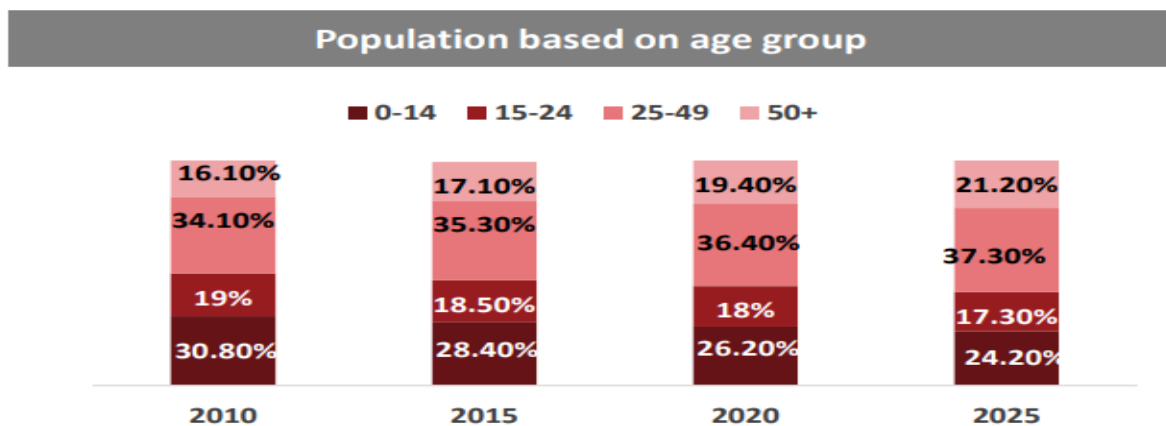

The global QSR market was valued at INR 25.05 Trn in FY 2022. It is expected to reach INR 54.53 Trn by FY 2027, expanding at a CAGR of ~17.41% during the FY 2023 – FY 2027 forecast period. The requirement for a wide variety of fast-food items and the growth of the market both contribute to the quick-service restaurants market’s expansion globally. The QSR market in India was valued at INR 171.90 Bn in FY 2022. It is expected to reach INR 431.27 Bn in FY 2027, expanding at a CAGR of ~20.47% during the FY 2022 – FY 2027 forecast period. The current decade is overseeing a shift to a larger organized sector. Customer retention and a higher range and depth of offerings are new goals among the organized market players of QSR.

Major drivers of Indian Food Industry

(a) Demographics

The size and age of workforce of India will play a significant role in its economic growth in the coming years. Share of India’s working age population to total population will reach its highest level at 68.9% by 2030. By the year 2030, India’s dependency ratio is projected to reach its lowest point at 31.2%. With a relatively young population (median age of 28.4 years), India not only gets a competitive advantage in terms of workforce but also an opportunity to unleash the consumption power of a young population.

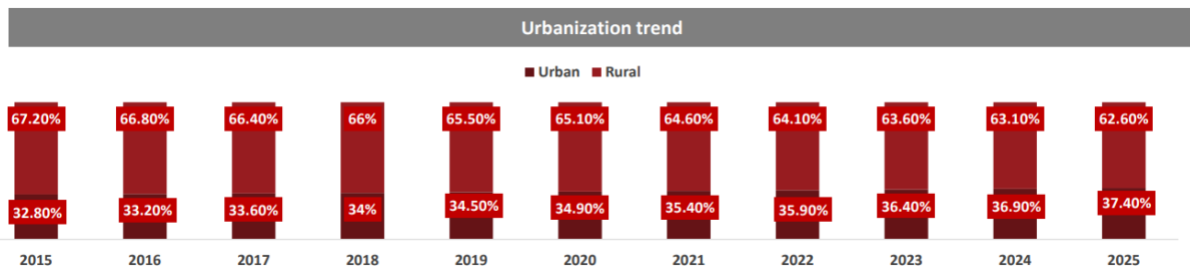

By 2025, approximately 25% of the population will be below 14 years and ~54% between the age of 15 to 49 years. This young population not only reinforces India’s competitive advantage in the services and manufacturing sectors, but also unleashes the consumption power of a young population towards discretionary expenditure.

Trend of Population vis-à-vis dependency ratio

India has the second largest urban population in the world in absolute terms. The implementation of a “smart city” initiative by the Indian government aimed at the creation of new urban clusters is expected to accelerate urban development in India. Currently, urban populations contribute 63% of India’s GDP. It is estimated that 37% of India’s population will be living in urban centers by financial year 2025, and the urban population is expected to contribute 75% of India’s GDP in financial year 2030.

(b) Economic growth

GDP registered an average growth of over 6.5% in the last 5 years, i.e. between FY18 and FY22 (excluding COVID impact year of 2020). India bears good tidings for becoming USD 5 trillion economy by CY27. According to the IMF dataset on Gross Domestic Product (GDP) at current prices for India, the GDP is estimated to be at USD 3.4 trillion for CY22 and projected to reach USD 4.2 trillion by CY25.

(source: International Monetary Fund, World Economic Outlook Database, April 2023)

(c) Rising Income levels and growing per capita expenditure

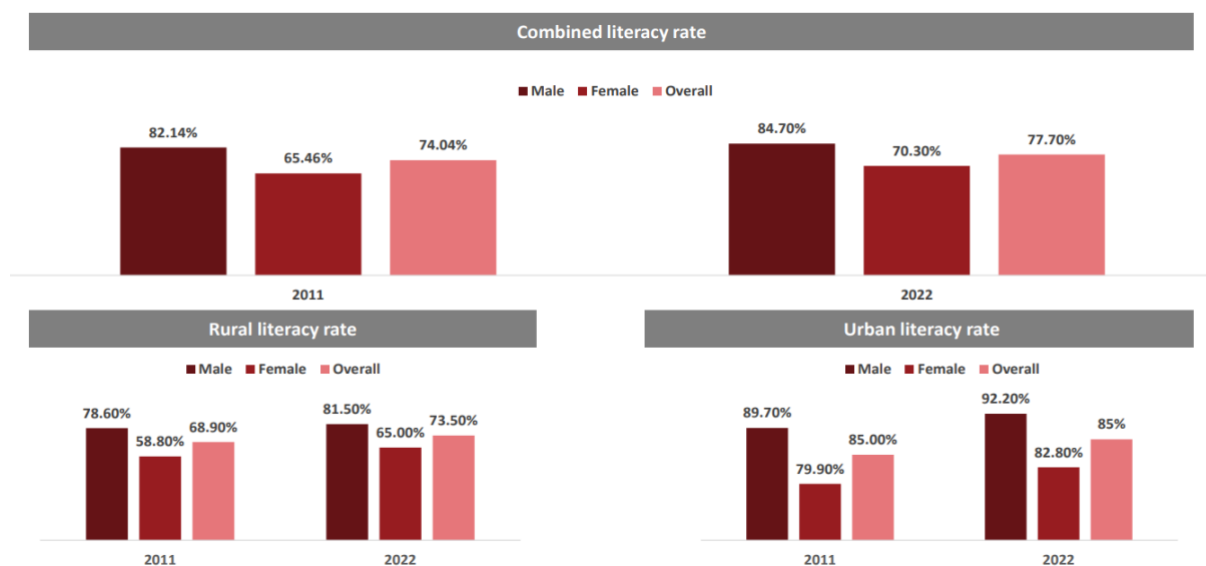

In the last decade, Indian economy has progressed rapidly. Correspondingly, India’s per capita GDP has gone up from Rs 107,341 in FY16 to Rs 172,913 in FY22 at a CAGR of 8.2% fuelling a consumption boom in the country. Also, the per capita private final consumption expenditure too rose from Rs 63,339 in FY16 to Rs 102,992 in FY22 at a CAGR of 8.4%. The growth in country’s per capita GDP in turn has increased the disposable income of the populace ultimately driving the country’s consumption.

(d) Digital transformation and contactless payments

A special focus and consistent backing of the GoI over the last decade in creating India’s uniquely scalable Digital Public Infrastructure has borne fruit, yielding economic benefits and growth of innovation and entrepreneurship. Riding on the Stack and the wide-scale adoption of Unified Payments Interface (UPI) by 260m unique users, India today accounts for the highest volume of real-time digital payments among businesses globally, with a share of over 40% of all such transactions. Open Network of Digital Commerce (ONDC) is another platform which can be transformative as it will onboard micro, small and medium enterprises and small traders on a single platform, thereby giving more choice and access to a variety of products to customers and open e-commerce to buyers and sellers of all sizes.

The growing use of digital wallets and contactless payment systems has resulted in an increased spending amongst the consumers. Tap-to-pay and digital wallet payment options (GooglePay, PhonePe, Paytm) allow customers to receive coupons and instant cashback by simply tapping or scanning a QR near a payment terminal. The incentives such as cash-back offer or discounts have lured the Indian consumer to experience the pleasure of ‘cashless spending’.

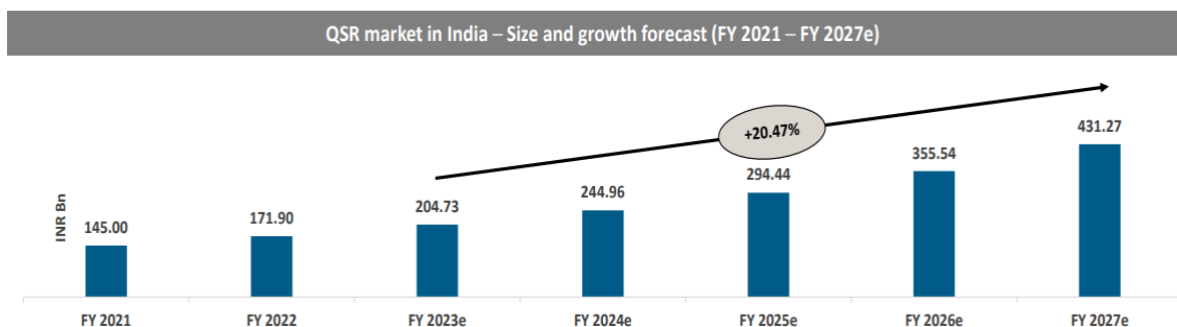

(e) Growing female working population

On the backdrop of growing Indian economy during the recent years, the participation of female workforce in the country’s economic activities has increased. Improvement in literacy metrics specifically in rural segment is seen as a catalyst for improvement of share of women in the country’s workforce.

The higher purchasing power in the hands of ‘working-women class’ is expected to have a broad impact on societal factors and economic independence for women. This increase of women in the workforce has seen a shift in household activity, including a downward trend in home-cooked meals and an increase in demand for out-of-home meals from households with working couples enhances the ability of the former to spend much more comparatively.

QSR Market in India

- The QSR market in India was valued at INR 171.90 Bn in FY 2022. It is expected to reach INR 431.27 Bn in FY 2027, expanding at a CAGR of ~20.47% during the FY 2022 – FY 2027 forecast period.
- The QSR industry in India is classified into two segments, organized and unorganized, based on the following three key parameters: (i) accounting transparency, (ii) organized operations with quality control and sourcing norms, and (iii) outlet penetration
- The organized standalone market share in the total QSR market has increased to 29% in 2022 from 24% in 2017, as increasing disposable incomes have encouraged owners and entrepreneurs to open such organized outlets.
- The current decade is overseeing a shift to a larger organized sector. Customer retention and a higher range and depth of offerings are new goals among organized market players of QSR

- This phase witnessed a sharper segmentation within the different formats based on consumer needs and offerings by the brands e.g., within QSRs, there is a clear differentiation between pizza chains and burger chains; within CDRs, a further segmentation was observed as premium and value-based CDRs, based on attributes like ambiance, service style, and cuisines, etc.
- This phase has also seen the birth of food technology, which is estimated to be growing at almost 15-20% per year
- Major quick food-service chains, such as McDonald's, Burger King, and Domino's, among others, are deepening their reach in India's smaller cities and benefiting from a younger demography, thereby further aiding the growth of the market.
- The QSR segment will see its next big growth come from consumers in tier II and tier III cities. Annual spends on eating out at QSR chains in non-metros are expected to surge 150% to INR 3,750/- per household over the next three years.

Conclusion

QSR is more of a macro story play with India's fast changing ecosystem (internet, mobile, young population, large population, rising hygiene preferences, etc.) driving penetration. India's food consumption landscape is moving on to the next stage of evolution, driven by rapid urbanization, a rise in disposable incomes, changing consumption habits, a large millennial population (aged 15-34 years), less time to make food, preference for branded players, etc. The millennial population of India (~34% of the total population), being a key driver of the food services industry's growth, has become more discerning in its consumption habits, both in terms of the frequency at which they eat or order from outside as well as the variety they seek. Major QSR players have positioned their respective brands to target this large and growing millennial population in India by connecting with them through its value leadership, strong entry menu at attractive price points, and advertising & marketing campaigns. Given the long-term prospects of the QSR segment, all supporting businesses including OEM players and outsourced vendor firms producing ready to eat products will reap the benefits of the long-term story that is developing in this sector.

IMPACT OF COVID ON OUR BUSINESS OPERATIONS

The outbreak of COVID-19 pandemic adversely affected the global economy. The World Health Organization declared the outbreak of COVID-19 as a public health emergency of international concern on January 30, 2020, and a pandemic on March 11, 2020. The Government of India announced a nation-wide lockdown on March 24, 2020, and imposed several restrictions.

During the nation-wide lockdown, our Manufacturing Facility was shut down for a period of around 60 days and given that we work with leading QSR's, CDR's and other HoReCa segment players whose operations and stores were impacted during COVID, there was a significant adverse impact on our operations also. We strived to resume and stabilize our operations after making adequate arrangements to meet the government's requirement on sanitisation, and social distancing. Despite various restrictions being applicable during the nation-wide lockdown, there was no significant impact on our procurement of raw materials. Further, we did not lay-off any of our employees and workers and there have been no reductions in salaries and wages of our employees and workers due to the COVID-19 pandemic. However, post the pandemic, with the improvement in business outlook and growth of our QSR, CDR and other HoReCa customers, our sales and operations have significantly improved.

OUR COMPETITIVE STRENGTHS

We believe that we have the following competitive strengths:

- (a) **Strong Supply Chain and Input Sourcing for Quick Service Restaurants (QSR), Casual Dining Restaurants (CDR) and Other Outdoor Dining Options in India:**

Our customer/distributor base is the HoReCa segment players in India mainly the QSR and CDR segments. Given that a customer's trust, loyalty and affiliation for QSRs, CDRs and other HoReCa segment is a key driver for their brand value and perception, they are very selective and cautious about the vendors they engage with. We believe in constantly addressing the customer needs for variety of our products. Our existing relationships help us to get repeat business from our customers. This has helped us to maintain a long term working relationship with our customers and improve our customer retention strategy. We have

strong existing client relationships which generates multiple repeat orders. We believe that our existing relationship with our clients represents a competitive advantage in gaining new clients and increasing our business. We believe that existing relationships is our core competitive strength. Our capabilities in product quality, safety, service, new product development, and technical know-how have earned us the trust and confidence of QSRs and CDRs segment players whom have engaged us. Leveraging our support, strength and capabilities, our customers frequently utilize our facilities to trial and assess new products for launch, considering aspects such as quality, stability, and costing. This collaborative process not only provides us with early insights into potential future products but also strengthens and solidifies our relationships with our valued customers.

(b) **Strong entry barriers in the industry we operate in:**

Success of QSRs, CDRs and other HoReCa segment players is highly reliant on the quality, consistency, taste and predictability of food products and hence they exercise a high degree of caution, filtering and multiple checks and audits at the time of selection and post selection on an on-going basis. Setting up and managing manufacturing plants and supply chains requires significant upfront and continuous investment of capital and the same does not guarantee success. Our history of successfully partnering with our customers, combined with our track record that strengthens with each passing day, serves as a competitive advantage, acting as a moat against potential new entrants in the industry. Additionally, this fosters visibility, repeatability, and loyalty among our customers, further solidifying and strengthening our business.

(c) **Timely Supply of Quality Products Repeatedly is Key for QSR, CDR and Other Outdoor Dining Options in India:**

Timeliness of supplies is a key factor for QSRs, CDRs and other HoReCa segment players and we have over the years established a strong supply chain to ensure that we help our customers deliver their brand promise to their consumers. Moreover, establishing an efficient supply chain capable of timely delivery also requires immense operational and category expertise and understanding which is developed over time. Not only is it difficult for new entrants to be able to develop this skill but also QSRs, CDRs and other HoReCa segment players are unlikely to entrust new entrants with such aspects which are critical for their continued strong brand perception. Furthermore, in collaboration with our logistics partners, who possess extensive distribution capabilities, we are able to deliver our products to every corner of the nation. This advantage gives us a competitive edge and aids us to achieve timely deliveries.

(d) **Broad Vendor Base is a Key Moat developed over the years with focussed efforts:**

Our adherence to GFSI certified BRC standards has been instrumental in establishing procedures for vendor qualification, allowing us to meticulously verify the consistency of ingredients with every consignment we receive. Furthermore, our purchase contracts allow us to establish annual agreements for raw material and packaging material costs, enabling us to maintain stable prices that are unaffected by fluctuations in the market rates. Our relationships with most of our suppliers is between 3 – 20 years old and are companies and brands having a global presence. Some of our suppliers include Sneha Farms, DS Spico, VKL, Paras, Spices, Rai Poultries, Una Inc, .Connell bro's and Multivac Laraon. Our relationships with suppliers play a critical role in empowering our customers to maintain control over product quality, pricing, and the timely delivery of goods. This directly influences the brand perception of our customers among consumers, thereby bolstering our standing in the industry and fostering deeper connections with our valued customers.

(e) **In-house Manufacturing Plant Layout & Designing Capability as per the GFSI approved global foods safety standards:**

Considering we commenced our operations in the year 1997, we were amongst the first few businesses of our kind in the industry and since the overall HoReCa segment in India was in its new and early stage of development, access to engineers for designing and planning efficient plants customized for Indian operating conditions was a challenge. Making allowance for the same, our Promoters and team dedicated extensive effort to collaborate with existing and potential customers, adapting globally recognized practices to suit the Indian market. As a result, they formulated a flexible plant layout maximizing cost-effectiveness and production capacity efficiency. Over the years, as the business matured, volumes increased and product capabilities expanded, numerous modifications and engineering aspects have been improvised or

introduced directly by the Promoters and the team to ensure the best cost adjusted production outcomes. Even today there is a scarcity of professionals and industry specific engineers who can plan and design manufacturing plants for this industry in a cost-effective manner and hence this remains a key aspect of the success of the business.

(f) Customers of Global Repute with Healthy Financials Obligated to Maximizing Shareholder Value:

Most of our sales are to customers who are globally and domestically well recognized as strong brands in the QSR space. Moreover, most of our sales are to customers who are listed entities or having private equity investment and control and have well capitalized balance sheets. For example, our customer Jubilant Foodworks Limited has a net worth of INR 22,446 million as of September 30, 2023 and our customer Subway is owned by The Everstone Group which is a leading Private Equity firm. This advantageous customer base not only aligns our growth with theirs, but also ensures the implementation of the best corporate governance and operational excellence practices. The emphasis placed by our customers on enhancing brand value and maximizing shareholder returns has a profound and positive impact on our business growth and operations.

(g) Quality Compliance, Control and Quality Standards:

We are committed towards quality of our products. Our determination towards quality is demonstrated by well-defined quality and food safety procedures at various stages of our manufacturing process from procurement of raw material to distribution of our products. Owing to the expertise of our experienced and trained team forming part of our Food Safety Division, all our products are manufactured strictly as per the GFSI standards. With a team of qualified food technologists and microbiologists supervising each stage, we ensure that rigorous quality and safety standards are followed. Additionally, our facility is equipped with a laboratory for microbiological and physico-chemical analysis, validating our food safety management system. To continuously enhance our operations, we undergo regular compliance audits by our certification body (NSF International) and our customers, focusing on cleanliness, maintenance, and product safety & quality. Additionally, with an in-house internal audit team, we strive to meet the stringent standards set by our institutional customers and regulatory authorities. This dedication to quality has allowed us to cultivate enduring relationships with our valued customers.

(h) High Quality Manufacturing Facility:

We have incurred substantial capital expenditure in establishing and operating a modern Manufacturing Facility equipped with high-quality equipment sourced from Germany and Italy. Our comprehensive range of machinery includes mincers, bowl choppers, brine injectors and tumblers for marination. We also have high-capacity cooking combi ovens, forming, coating, and frying lines for customized products, a retort sterilizer for shelf-stable items, dicer and slicer machines, thermoforming machines for vacuum/MAP packaging, as well as metal detectors and precision weighing equipment from Ishida, complying with international standards. Our plant capacity and equipment calibre also allow us to cater to our customers volume requirements. We have obtained various food safety and quality certifications for our products and production facilities, such as FDA approval, Halal certification, GFSI approved BRC (9) certification, and Export Inspection Council certification. The facility is routinely subjected to audits by various agencies throughout the year; for instance, FSSAI & NSF International for FSMS-BRCGS audit the Company's facility once a year through different agencies even whilst customers audit the facilities at least once a year at different times of the year.

(i) Experienced Promoter & Management Team who have recently increased their shareholding:

We believe that, the experience and leadership of one of our Promoters, Paramjit Singh Chatha, is a key factor in our growth and development. Paramjit Singh Chatha has an experience of over 25 years strong background and extensive experience, knowledge and understanding of the industry in which we operate. He has been associated with us since the inception and is actively involved in the strategic decision making for our Company, pertaining to, financial operations, expansion activities, business development and management of overall business. We believe that his experience has helped us develop relationships with our vendors for the procurement of raw materials and our customers. He also provides strategic guidance to our Company, while also being involved in the day-to-day functioning of our business. Our Board and Senior Management have an extensive experience and deep understanding of our business. Key members

of our Senior Management team including Kulbeer Walia, the Chief Accounting Officer of our Company (who has over 25 years of experience in Accounting & Finance), June Odelia Swer, the Strategic Business Head of our Company (who has over 18 years of experience in R&D, Food Safety Systems & Quality Compliance), Sandeep Bhardwaj, the Purchases Head of our Company (who has over 31 years of experience in Procurements & Supply chain) Sohan Singh, the Head-HR of our Company (who has over 18 years of experience in Human Resources development) Prashant Verma, the National Sales Head-GT of our Company, (who has over 20 years of experience in HoReCa & Retail sales), Vishal Singh Sirmauria, the Chief Financial Officer of our Company (who has over 9 years of experience in Finance & Accounting & Operations), who are dedicated to the growth of our business. We believe that our management team of qualified and experienced professionals enables us to identify new avenues of growth and help us to implement our business strategies in an efficient manner and to continue to build on our track record of the past. Some of the Promoters of our Company including Paramjit Singh Chatha, Gurcharan Singh Gosal and Gurpreet Chatha have also recently increased their shareholding in the Company from 15.17% to 25.67%, 19.88% to 25.03% and 15.14% to 21.00%, respectively, in the year, 2023 and 2024 which is a strong sign of faith and confidence that the promoters have in the future prospects of the business. For further details, see “*Our Management*” on page 131.

OUR GROWTH STRATEGY

Our future business growth will be primarily driven across the following factors:

(a) **Setting up of an additional facility focusing on Vegetarian frozen RTE and RTC products:**

Currently we have two units within the same Manufacturing Facility, with a capacity of 2,278 MT for the vegetarian unit and 5,562 for the non-vegetarian unit, both operating 2 shifts with a production of 96 MT and 316 MT for vegetarian unit and 3,560 MT and 1,915 MT for Non-vegetarian unit in Fiscal 2023 and in the six months ended September 30, 2023, respectively. Given the overall growth prospects of the vegetarian industry in which we operate, there is a need for establishing an additional manufacturing facility which will not only help us in catering to a larger customer base but also help us increase our share of business with our existing customers. The experience of the Promoters and the management team in setting up and improvising our existing facility along with the experience of working with our customers over the past years coupled with their strong repute, will enable us to continue to take advantage of future market opportunities and expand into new markets.

(b) **Introducing Differentiated Products & Striving for Improved Margins in our Existing Business:**

We also believe that continuous product development and expansion of our product portfolio are integral to the growth of our business. We have an experienced in-house research and development team that works on our new product development processes through innovations, trials, regulatory approvals and driving market acceptance and cost alignments along with our marketing and supply chain management teams. Our new product development process is reliant on feedback from customers and sales team. Given our capabilities across the supply chain, customers often use our facilities for researching and experimenting with new products. We will continue to strive to convert this ability to not only help realize higher and more predictable revenues but also higher margins from our customers. We plan to continue to increase offerings in our current business segments as well as diversify into new products by tapping into segments which in the view of our management have attractive growth prospects. Further, we believe that with the strategic initiative of setting up an additional manufacturing unit, our customer base would be diversified, as a consequence of the same, there will be a continuous demand to evolve our existing products and expand our product portfolio to meet these requirements. We believe that our emphasis on quality of manufacture and timely delivery of our offerings have been a key factor in our ability to attract new customers and to retain our existing customers. We intend to draw on our experience, market position and ability to timely deliver quality products to successfully foray into vegetarian segment as well as to other geographies.

(c) **Introducing Products for International Expansion:**

We believe that there is a huge potential for export of products like ready to eat meals & gravies, frozen vegetarian snack foods & savouries, innovative and high protein vegetarian snacks in the international markets like countries in the Indian sub-continent, Europe and U.S.A. Given our strength in new product development & manufacturing processes, we can create another strong potential market for our products. This will not only help us diversify our revenues but also help us utilize our facilities better and enabling

us to achieve higher operating margins. Given the current expansion of frozen vegetarian products in the export market, we have a significant opportunity to expand in this direction.

(d) **Expanding Vegetarian Product Offerings:**

Historically our focus on vegetarian products has been very limited given the business dynamics of our customers. However, going forward, unique vegetarian products like protein rich vegetarian snacks like millets, legume-based products, may provide a key growth opportunity for our business. Vegetarian products and ingredients also continue to be a significantly larger proportion of revenue for our customers and we believe that there is an opportunity to replicate our past success in this line of products with our customers. We intend to allocate significant proportion of our Proposed Manufacturing Facility at Mohali towards this line of business. Given the strength of our existing procurement capabilities, product development capabilities and customer connect, we may be successful in potentially scaling up this business significantly after the commissioning of our Proposed Manufacturing Facility at Mohali. Venturing into these products may also allow us to further build on our relationship and retain our existing customers.

COLLABORATION & JOINT VENTURES

As on the date of this Red Herring Prospectus, our Company has not entered into any collaboration or joint-venture agreements or arrangements.

RAW MATERIALS

The primary raw materials required to manufacture our products are meats, functional ingredients, spices/seasonings, blends, packaging materials and others. The raw materials constituted 72.61%, 74.08%, 72.54% & 78.50% of our revenue from operations in the in the six months ended September 2023 and Fiscals 2023, 2022, 2021, respectively.

We presently procure all these raw materials from certified and approved suppliers on our requirements on an on-going basis. We have long-standing relationships with most of our suppliers. We procure all of our raw materials by way of purchase orders on an on-going basis. Through our Purchase contracts, we have established annual agreements with most of our suppliers and therefore, are unaffected by fluctuations in the market rates.

PACKAGING

The primary packaging material used by us is high barrier PA/PE laminate with >70 micron. This enables the product to have a primary shelf life of at least 12 months/365 days under frozen condition of -18⁰C and below and a secondary shelf life of at least 5 days in chilled conditions between 0 – 4⁰C. For shelf stable products, the primary packaging used is extra barrier laminate (EVOH/PA/PE) to give a shelf stable shelf life of at least 18 months.

We source these laminates from suppliers who specialize in packaging development for various food products. Our products are packed using automated packaging machines, ensuring different pack sizes. To safeguard our primary or secondary packs throughout the sales and distribution process, we utilize duplex boxes or airtight cartons for secondary packaging, and corrugated carton boxes for tertiary packaging.

UTILITIES

Infrastructure – Our Registered Office and Manufacturing Facility is well equipped with computer systems, internet connectivity, other communication equipment and security, which are required for our business operations.

Power – We have arrangements for regular power supply at our office premises & Manufacturing Facility. We have specific power requirements due to the need to process raw ingredients to get final products and for packing of different products within a particular range of temperatures. We depend on state electricity supply for our power requirements and utilise diesel generators to ensure that our facilities are operational during power failures or other emergencies. We have installed energy efficient equipment at our Manufacturing Facility.

Water – We source our water requirements from ground water at our Manufacturing Facility. For the portfolio of products that we manufacture, our water requirement is mainly for processing of raw ingredients, sanitation, and air-conditioning and firefighting purposes.

QUALITY ASSURANCE

As of February 29, 2024, our dedicated quality assurance team consists of 14 experienced technologists and microbiologists. This team is responsible for providing comprehensive training to all employees in our Manufacturing Facility, from procurement to sales and marketing, to uphold quality assurance standards. Our

quality assurance team is well-equipped to train our staff on the latest updates in quality, regulatory, and statutory standards, as well as the specific standards mandated by our institutional customers, ensuring compliance with our food safety and quality management systems.

Listed below are the roles performed by the Food Safety & Quality Assurance Team, all of which are in accordance with our Company's certifications.

- (a) **Raw Material:** At the initial stage, we ensure that raw meat is sourced exclusively from approved suppliers. With each batch of supply, the suppliers provide a health certificate and a Certificate of Analysis, confirming that the raw material is free from antibiotics and diseases, and is completely safe for human consumption, meeting all necessary quality and safety criteria.
- (b) **Hygiene:** Detailed systems have been developed to manage all the stages of cleaning of the equipment's, drains, tools. Protective gear is used mandatorily by the personnel, and strict procedures are followed to ensure that good personal hygiene practices are followed by the workers.
- (c) **Water:** A double RO system has been implemented to ensure that the water/ice used in the products is free from any kind of contamination. (Physical, chemical & microbiological). The effectiveness of the RO is evaluated daily by our microbiologist and every 6 months by an external, NABL accredited lab. Additionally, water pipelines have been colour-coded for identification.
- (d) **Maintenance:** A skilled and trained maintenance team, consisting of 26 employees as of February 29, 2024, is constantly present in at the Manufacturing Facility to ensure the strict adherence to preventive maintenance procedures and maintain optimal equipment efficiency at all times.
- (e) **Prevention of Contamination:** A thorough waste management procedure is in place that categorises wastes into biodegradable, non-biodegradables, metal scraps and used media from the lab. A physical segregation is conducted to segregate high care & low care areas. High care areas are operated under a controlled temperature of 8 -10°C & processing areas, including raw material inspection areas, are operated under temperatures below 12 - 15°C.
- (f) **Pest Prevention:** A daily inspection of pest activity inside & outside the plant is outsourced to PCI (Pest Control of India). A thorough quarterly audit and trend analysis, for continual improvement, is carried out with the PCI team.
- (g) **Sensible Storage:** The storage system for raw material is designed in such a way that the food and non-food ingredients; allergens and non-allergen materials, all stand segregated. Also, chemicals used for cleaning are stored separately, and restricted to use by authorized personnel only.
- (h) **Crisis Management Plan:** Mock drills, fire safety audits, first-aid trainings are carried out at least once a year and a site security checklist, to ensure food security is used every month. Accountability of visitors, contractors & all employees is maintained and monitored, and even documented for, with every entry and exit.

Furthermore, our Manufacturing Facility and manufacturing processes have been subject to periodic audits and approvals by some of our key QSR customers. We view this as an opportunity to foster long-term partnerships and once qualified, we customize our products to meet the specific requirements of our valued customers.

The FDI Policy consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP till October 15, 2020.

In terms of the FDI Policy, foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments. FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Where FDI is allowed on an automatic basis without the approval of the Government, the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. In preparing the financial statements in conformity with accounting principles generally accepted in India, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Any revisions to accounting estimates are recognized prospectively in the current and future years.

C Revenue recognition

- a) Revenue from sale of goods is recognized when the significant risks and rewards in respect of ownership of the goods are transferred to the customer and is stated net of Goods and Services Tax and net of trade discounts, and sales returns. No significant uncertainties exist regarding the amount of consideration that will be derived from sale of goods.
- b) Revenue from sale of services is recognized as the service is performed by the completed service contract method.
- c) Interest income is recognized on a time proportion basis, taking into account the amount outstanding and the rates applicable

D Property, plant and equipment

Property, plant and equipment are stated at cost (gross block) less accumulated depreciation and impairment losses, if any. Cost comprises the purchase price (net of tax credit availed) and any attributable cost of bringing the asset to its working condition for its intended use. Any gain or loss on disposal of an item of property, plant and equipment is recognized in statement of profit and loss, when the item is de-recognized. Such gains are not classified as revenue.

Expenditure on account of modification/alteration in plant and machinery/building, which increases the future benefit from the existing asset beyond its previous assessed standard of performance, is capitalized. Items of property, plant and equipment costing less than Rs. 5,000 are fully depreciated in the year of purchase.

Borrowing costs directly attributable to acquisition or construction of fixed assets, which necessarily takes a substantial period of time to get ready for their intended use are capitalized.

The residual value of any asset is calculated at 5% of original cost of any asset in accordance with Schedule I of the Companies Act, 2013.

E Depreciation

Depreciation is calculated on cost of items of PPE less their estimated residual values over their estimated useful lives using the straight-line method based on life prescribed as per Schedule II of the Companies Act, 2013.

Block of asset	Useful life as per Companies Act, 2013 (in years)
Buildings	30-60
Plant and machinery	15
Furniture and fixture	10
Office equipment	5
Computers	3-15
Vehicles	8-10

F Inventories

Inventories are valued as follows:

- 1 **Raw materials, stores and spares and packing materials:** At cost as determined on the basis of First In First Out (FIFO Basis). However, materials and other items held for use in the production of inventories are written down below cost only when both raw material net realizable value and the finished goods in which they will be incorporated are expected to be sold below cost.
- 2 **Work in process and finished goods:** Lower of cost and net realizable value. Cost includes direct materials and a proportion of labour and manufacturing overheads based on normal operating capacity. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion to make the sale.

G Employee benefits

Short-term employee benefits

All employee benefits payable/available within twelve months of rendering the service are classified as short-term employee benefits. Benefits such as salaries, wages, bonus, etc. are recognized in the statement of profit and loss in the period in which the employee renders the related service.

Post-employment benefits

Defined contribution plan

The company makes specified contribution towards employee provident fund to Employees Provident Fund administered by the Regional Provident Commissioner. The Company's contribution to provident fund, being a defined contribution plan, is recognized in the statement of profit and loss in the financial year to which it relates.

Defined benefit plan

Gratuity is a post-employment defined benefit plan. The present value of obligation for gratuity is determined based on actuarial valuation using the Projected Unit Credit Method, together with adjustments for unrecognized actuarial gains or losses and past service costs. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to the statement of profit and loss in the year in which such gains or losses arise.

Other long-term liability

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognized as a liability determined based on actuarial valuation using the Projected Unit Credit Method at the balance sheet date.

Actuarial gains/losses

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to the statement of profit and loss in the year in which such gains or losses arise.

H Accounting for taxes on income

Tax expense comprises current tax and deferred income tax.

Current tax is determined as the amount of tax payable in respect of taxable income for the year, computed in terms with the provision of Income Tax Act, 1961 and the rules made thereunder.

Deferred income taxes reflect the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years. Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. In respect of carry forward losses and unabsorbed depreciation, deferred tax assets are recognized only to the extent there is virtual certainty that sufficient future taxable income will be available against which such losses can be realized.

Minimum Alternate tax (MAT) credit is recognized as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. In the year in which MAT credit becomes eligible to be recognized as an asset in accordance with the recommendations contained in guidance note issued by the Institute of Chartered Accountants of India, the said asset is created by way of a credit to the statement of profit and loss and shown as MAT credit entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT credit entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal income tax during the specified period.

I Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

For calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

As per Accounting Standard -20 on Earning Per Share, If the number of equity or potential equity shares outstanding increases as a result of a bonus issue or share split or decreases as a result of a reverse share split (consolidation of shares), the calculation of basic and diluted earnings per share should be adjusted for all the periods presented. If these changes occur after the balance sheet date but before the date on which the financial statements are approved by the board of directors, the per share calculations for those financial statements and any prior period financial statements presented should be based on the new number of shares. Accordingly the EPS has been calculated on number of shares after bonus issue made on 29 December 2023 for all reporting period.

J Leases

Leases of assets under which significant risks and rewards of ownership are effectively retained by the lessor are classified as operating leases. Lease rentals in respect of assets taken under an operating lease are charged to the statement of profit and loss on a straight-line basis over the lease term.

K Provisions and contingent liabilities

A provision is created when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation at the reporting date. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

The Company does not recognize assets which are of contingent nature until there is virtual certainty of realizability of such assets. However, if it has become virtually certain that an inflow of economic benefits will arise, asset and related income is recognized in the financial statements of the period in which the change occurs

L Impairment of assets

The Company on an annual basis makes an assessment of any indication that may lead to impairment of assets. If any such indication exists, the Company estimates the recoverable amount of the assets. If such recoverable amount is less than the carrying amount, then the carrying amount is reduced to its recoverable amount by treating the difference as impairment loss and is charged to the statement of profit and loss. If at the balance sheet date there is an indication that a previously assessed impairment loss is no longer valid, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of depreciated historical cost.

M Cash and bank balances

Cash and bank balances comprise cash, Current accounts and deposit with banks. The Company has a policy of classifying highly liquid investments which have a tenure of less than three months and are readily convertible into fixed amounts of cash and cash equivalents.

BUSINESS OVERVIEW

Founded in 1997, Chatha Foods Limited has established itself as a prominent player in India's frozen food processing industry. We cater to leading QSRs (Quick Serving Restaurants), CDRs (Casual Dining Restaurants), and other segments within HoReCa. Over the last 3 years, we have witnessed impressive growth, with our revenue climbing from ₹ 6,118.06 lakhs in FY 2021 to ₹ 8,733.41 lakhs in FY 2022, and further surging to ₹ 11,722.77 lakhs in FY 2023. Revenues for six months ended September 30, 2023 have come in at an impressive ₹ 7,077.86 lakhs.

Despite the adverse impact of Covid-19, which led to revenue challenges in FY 2021 due to shutdowns and ingredient scarcity, we rebounded remarkably. We continued our strong growth trajectory through FY 2023 with a 24% CAGR in our revenue growth.

FY 2023 witnessed a surge in demand for convenience foods spanning across the nation, from metropolitan areas to Tier 1 and Tier 2 towns. The food service industry, encompassing all QSR brands, has experienced rapid expansion, marked by an increased number of stores per brand and an aggressive push into Tier 1 and Tier 2 towns.

The upsurge of online food delivery, coupled with increasing income levels and evolving lifestyles in India, has led to a heightened demand for convenience foods not only among our established large QSR customers but also among medium and small QSR customers. Notably, our portfolio of QSR customers has expanded from 23 in FY 2021 to 33 in FY 2023 and to 37 in the six month ended September 30, 2023.

In response to the burgeoning needs of the food service industry, we've made substantial investments in new equipment, a dedicated facility for vegetarian products, a dedicated New Product Development kitchen to cater to the ever-increasing demand of new and innovative products, an expanded skilled team, and advanced technology. These strategic initiatives have driven our production capacity utilization from 2197 MT in FY 2021 to 3659.18 MT in FY 2023. The capacity utilization stands at 2230.74 MT for the six months ended September 30, 2023.

In line with our future growth strategy, we have commenced the development of the Proposed Manufacturing Facility spanning 3.49 acres. The Land will be utilized for setting up a manufacturing building having 35,360 sq. ft. area and utility shed building of 5,000 sq. ft. for capacity expansion with additional capacity of 29 MT/per day. This expansion is poised to boost our manufacturing capacity and lead to an increase in revenue.

Phase implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 and circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019 circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Bidder had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the

timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: *The Phase III shall commence voluntarily for all public issues opening on or after September 1, 2023 and shall be mandatory for all public issues opening on or after December 1, 2023 as per the SEBI Circular No. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“T+3 Notification”). In this phase, the time duration from public issue closure to listing is reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI*

The Issue is being made under Phase III of the UPI (on a mandatory basis).

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law.

Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the BRLM, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

Additionally, if there is any delay in the redressal of investors’ complaints, the relevant SCSB as well as the post-Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint Sponsor Banks to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/or payment instructions of the UPI Bidders using the UPI.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1000	23	1,500	50.00%
1500	22	3,000	100.00%
2000	21	5,000	166.67%
2500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories
