Significant dependency on related party for our purchases may result in conflict of interest in allocating business opportunities amongst our Company, Group company, other entities of our Promoter in circumstances where our respective interests diverge. We cannot assure you that our Promoters and Directors will not provide competitive services or otherwise compete in business lines in which we are already present or will enter into in the future or supply equipment or material at more competitive price to our competitors or supply equipment or material to us on time or at all. In the event that any conflicts of interest arise, our Promoters and Directors may make decisions regarding our operations, financial structure or commercial transactions that may not be in our shareholders’ best interest. It may also enable a competitor to take advantage of a corporate opportunity at our expense. Such decisions could have a material adverse effect on our business, financial condition, results of operations and prospects. Should we face any such conflicts in the future, there is no guarantee that they will be resolved in our favour. Any such present and future conflicts could have a material adverse effect on our business, results of operations and financial condition. For further details see “*Our Group Companies/Entities*” on page 259.

4. We have experienced significant working capital requirements in past and may continue to experience in future also. If we experience insufficient cash flows from our operations or are unable to borrow to meet our working capital requirements, it may materially and adversely affect our business, cash flows and results of operations.

The business of our Company is working capital intensive. Our net working capital was ₹ 4087.42 lakhs, ₹1,750.06 lakhs and ₹715.19 lakhs, representing 38.54%, 18.24% and 10.48% of our revenue from operations for the Fiscal 2024, Fiscal 2023 and Fiscal 2022, respectively. The successful operation of our business heavily relies on significant working capital, which is essential for various aspects, including financing project operations, inventory management, and the purchase of raw materials and may continue to so in future also. However, changes in credit terms and payment delays can adversely impact our working capital, resulting in lower cash flows and increased funding requirements. Inadequate financing of our working capital needs may arise due to several factors, such as delays in disbursements under financing arrangements, higher interest rates, increased insurance costs, or borrowing and lending restrictions. Such circumstances could have a material adverse effect on our overall business, financial condition, and prospects.

Furthermore, our working capital requirements may escalate if certain contracts lack advance payment terms or contain payment schedules that shift payments towards project completion, thereby imposing additional financial burdens. Another aspect influencing our working capital are delays in receiving progress payments or obtaining guarantees in the form of letters of credit from clients can significantly impact our working capital needs.

The combination of these factors places a substantial demand on our working capital, making its management and optimization a critical aspect of our business strategy. As such, we continually strive to enhance our financial management practices to effectively address working capital challenges. By closely monitoring credit terms, payment schedules, and contract agreements, we aim to mitigate risks associated with fluctuations in working capital requirements. Additionally, prudent financial planning, exploring diverse financing options, and maintaining strong relationships with financial institutions are key factors in managing our working capital efficiently. Despite our proactive measures, there can be no assurance that working capital fluctuations will not impact our business operations or financial performance. For details related to working capital requirement, see “*Objects of the Issue*” on page 84.

In fact, we source all of the projects that we execute for our clients are sourced through nomination i.e. where customers with whom we have an existing relationship or new customers who we win through our marketing and sales effort.

6. ***Our current Order Book does not guarantee full realization of future income. Some orders may be subject to modifications, cancellations, delays, holds, or partial payments by customers, which could have adverse effects on our operational results.***

Our Order Book represents the value of secured contracts yet to be executed as of a specific date, providing insight into our future expected revenues. As on August 01, 2024, we have a pending order book of ₹ 15,364.47 lakhs. However, it is crucial to note that the calculation and presentation of the Order Book may vary from other companies, including our competitors. Successful execution of the Order Book depends on adhering to contractual obligations, including delivery schedules and quality requirements. Failure to meet these terms, whether actual or perceived, may result in modifications, cancellations, or delays of our current orders and potential penalties.

Additionally, project execution relies on the cooperation of customers and other service providers involved. Factors beyond our or our clients' control, such as permit delays or practical difficulties, may lead to project postponements or cancellations. Due to uncertainties in project execution, we cannot accurately predict when, if, or to what extent a project will be completed, impacting the income and profits derived from the contracts. Delays can also lead to payment delays or refusals, affecting expected margins.

7. ***We appoint contract labour for carrying out our operations and we may be held responsible for payment of wages of such workers, if the independent contractors through whom such workers are hired default on their payment obligations. Such obligations could have an adverse impact on our results of operations, cash flows and financial condition.***

As of August 31, 2024, we have 125 permanent employees and 21 temporary employees in addition to the contract labours that we employ in our projects. The number of contracts labourers employed by us varies from time to time based on the nature and extent of work we are involved in. There can be no assurance that we will not experience disruptions to our operations due to disputes or other problems with our work force such as strikes, work stoppages or increased wage demands, which may adversely affect our business. In addition, we enter into contracts with independent contractors to complete specified assignments and these contractors are required to source the labour necessary to complete such assignments. If we are unable to negotiate with the labour contractors or if there is any shortage or disruption in the availability of labour, it could result in work stoppages or increased operating costs as a result of higher than anticipated wages or benefits. We also require adequate supply of labour for the timely execution of

our projects. We employ contract labourers at our on-site project in India and outside India. As on date of this Red Herring Prospectus, our Company had not entered any formal agreement with contractor for labour. Accordingly, we are subject to labour legislations of the respective countries. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment.

Although we do not engage these contract labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such labour contractors, including any incorrect disclosure by such labour contractors with respect to the applicability of the provision of the CLRA, as amended. All contract labourers engaged at our on-site projects are assured minimum wages that are fixed by the relevant state and central governments, and any increase in such minimum wages payable or offer of permanent employment or the unavailability of the required number of contract labourers, may adversely affect the business and future results of our operation may adversely affect our results of operations.

8. *Our Company has reported certain negative cash flows from its operating activity, investing activity and financing activity, details of which are given below. Sustained negative cash flow could impact our growth and business*

Our Company had reported certain negative cash flows in previous years as per the Restated Financial Statement, as stated below:

(₹ in Lakhs)

Particular	Fiscal 2024	Fiscal 2023	Fiscal 2022
Cash flow from/ (used in) Operating Activities	(1,224.03)	(362.46)	(84.12)
Cash flow from (used in) Investing Activities	(167.73)	(23.00)	169.72
Cash flow from / (used in) Financing Activities	987.42	611.83	248.68

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. Since our Company is in a growth phase, our working capital requirement has increased in tandem and this has resulted in negative cash flow from operations in the Fiscal 2024, Fiscal 2023 and Fiscal 2022. We may continue to have negative operating cash flows in future. If our Company is not able to generate sufficient operating cash flows, it may adversely affect our business and financial operations. For further details, see “*Restated Financial Statements-Restated Cash Flow Statement*” on page 192.

9. *Our Promoters, Directors and Key Managerial Personnel may have interests other than reimbursement of expenses incurred and receipt of remuneration or benefits from our Company. Certain of our Promoters and Directors may have interests in entities, which are in businesses similar to ours and this may result in conflict of interest with us.*

Our Promoters and Directors- Nirbhaynarayan Singh (Chairman and Whole time Director) and Prayagdatt Mishra (Managing Director) are interested in our Company to the extent: (i) that they have promoted our Company; (ii) of the Equity Shares held by them in our Company and dividend payable, if any, and other distributions in respect of the Equity Shares held by them or the shareholding of their relatives; (iii) of remuneration and reimbursement of expenses, if any, payable to them and; (iv) of unsecured loans provided by them to our Company. Our Promoters and Directors have interests in entities, to the extent of their shareholding and/or directorships/partnership, which are in businesses similar to ours and this may result in conflict of interest with us. For instance, HVAX Engineering, PNX Enterprise LLP and Isovox Technologies are engaged in similar line of business in which our Company operates. Further, we rely on these entities for our supply requirements and purchase from these entities was 41.54% of our total purchase for the Fiscal 2024. We cannot assure you that our Promoters and Directors will not provide competitive services or otherwise compete in business lines in which we are already present or will enter into in the future or supply equipment or material at more competitive price to our competitors or supply equipment or material on time or at all. In the event that any conflicts of interest arise, our Promoters and Directors may make decisions regarding our operations, financial structure or commercial transactions that may not be in our shareholders’ best interest. It may also enable a competitor to take advantage of a corporate opportunity at our expense. Such decisions could have a material adverse effect on our business,

financial condition, results of operations and prospects. Should we face any such conflicts in the future, there is no guarantee that they will be resolved in our favour.

(₹ in Lakhs)

Revenue from operations	10,606.13	9,592.92	6,825.93
YoY growth (%)	10.56%	40.54%	12.36%

As we continue to grow our business, we will need to continuously invest in relationships with third-parties that are important to our business other participants in our network. We will also need to continue to expand, train, manage and motivate our workforce in India and internationally. Furthermore, to support our business and expansion plans, we may have to implement a variety of new and upgraded managerial, operating, technology, procedures and controls, which in turn may lead to higher costs. These initiatives will also require our management to devote additional time and resources towards these efforts. There is no assurance that we will be able to sustain the levels of revenue growth that we have witnessed in the past. Further, we cannot assure you that our growth strategies will be successful, or that we will be able to integrate them with our existing systems. A failure to maintain adequate internal controls or execute any of our strategies effectively may adversely affect our business and prospects.

We may not be able to successfully address customer demands and preferences and our current experience may not be adaptable to these growth plans. We may not be able to grow our operations or recoup our investments with respect to our growth plans in the time anticipated or at all. We may also experience a decline in the growth rate of our revenues due to factors such as insufficient growth in the number of customers, an increase in competition, a decrease in the growth of our overall market, a failure to capitalize on growth opportunities, an increase in operational costs, a slowdown in the Indian or global economy and an increase in government and regulatory restrictions. These factors may have an adverse effect on our business, financial results and prospects

Furthermore, it is likely that we may enter into related party transactions in the future. While no such instance has occurred in the past, related party transactions may potentially involve conflicts of interest which may be detrimental to and have an adverse impact on our Company. In respect of loans or advances that our Company and Subsidiaries provide to related parties, there can be no assurance that we will be able to recover all or any part of such loans or advances which, if unrecoverable, may have an adverse effect on our business, results of operations, cash flows and financial condition.

For details of transactions already executed by our Company with our Promoters, Directors and Group Companies/Entities during last three years, see "**Annexure 29 – Related Party Transaction**" under the Chapter titled "**Restated Financial Statements**" on page 192.

12. *Our global operations expose us to numerous and sometimes conflicting legal and regulatory requirements, and violation of these regulations could harm our business.*

Since, we have business operations in countries namely Algeria, Ethiopia, UAE, Ghana, Kenya, Nepal, New Zealand, Nigeria, Saudi Arabia, Sri Lanka, South Africa, Tanzania, Uganda, Zimbabwe, etc. We are subject to numerous, and sometimes conflicting legal requirements on matters as diverse as import/export controls, content requirements, trade restrictions, the environment tariffs, taxation, sanctions, government affairs, anti-corruption, whistle blowing, internal and disclosure control obligations, data protection and privacy and labour relations and certain regulatory requirements that are specific to our clients' industries. Non-Compliance with these regulations in the conduct of our business could result in fines, penalties, criminal sanctions against us or our officers, disgorgement of profits, prohibitions on doing business and have an adverse impact on our reputation. Gaps in compliance with these regulations in connection with the performance of our obligations to our clients could also result in exposure to monetary damages, fines and/or criminal prosecution, unfavourable publicity, restrictions on our ability to process information and allegations by our clients that we have not performed our contractual obligations. Due to the varying degree of development of the legal systems of the countries in which we operate, local laws might be insufficient to defend us and preserve our rights.

We could also be subject to risks to our reputation and regulatory action on account of any unethical acts by any of our employees or other related individuals. We are subject to risks relating to compliance with a variety of national and local laws, including multiple tax regimes, and employee health, safety, wages and benefits laws. Our failure to comply with applicable regulatory requirements could have a material adverse effect on our business, financial condition and result of operations. Our failure to comply with applicable regulatory requirements could have a material adverse effect on our business, financial condition and result of operations. While we have not been subject to any such risk in the past, there can be no assurance that we will not be subject to any of the aforesaid risk which can have a material effect on our business, financial condition, and operational results.

Further, there may be certain developments in the industries in which our customers operate which in turn may have an impact on our sales from exports. There may be imposition of certain tariffs, quotas and other tariff and non-tariff trade barriers on our activities in jurisdictions in which we operate or seek to undertake projects and we may face trade restrictions in the jurisdictions where we operate. We cannot assure you that the countries where we seek to sell our products will not impose trade restrictions on us in future. We may also be prohibited from exporting to certain restricted countries that may be added to a sanctions list maintained by the Government of India or other foreign governments, such as the Specially Designated Nationals and Blocked Persons list maintained by the Office of Foreign Assets Control of the US Department of Treasury in the United States. Any such imposition of trade barriers may have a material adverse effect on our business, financial condition and results of operations.

These risks may impact our ability to expand our exports in different regions and otherwise achieve our objectives relating to our export operations. Expansion into a market outside of our current operation could require significant capital expenditures and have a material effect on our capital structure and financial condition. If we pursue an international expansion opportunity, we could face internal or external risks, including, without limitation compliance with multiple and potentially conflicting foreign laws and regulations, import and export limitations and limits on the repatriation of funds. We may be unsuccessful in developing and implementing policies and strategies that will be effective in managing these risks in each country where we have business operations. Our failure to manage these risks successfully could adversely affect our business, operating results and financial condition. Furthermore, we may face competition in other countries from companies that have more experience with operations in such countries or with international operations generally. If we are unable to successfully develop or manage our international operations, it may limit our ability to grow our international business.

13. *Our warehouse, from where we operate is not owned by us but taken on leave and license basis. Our inability to renew the leave and license agreements or any adverse impact on the title or ownership rights of our landlords / owners in relation to these premises may impede our operations.*

Our warehouse from where we operate are on premises that have been taken on leave and license/ lease from third parties. Upon expiration of the leave and license agreements for each of our premises, we will be required to negotiate the terms and conditions. Our leave and license agreements are renewable on mutually acceptable terms and upon payment of such rent escalations as stated in the agreements. Any delay or non-payment of rent may result in vacation of the property. Following are the details of our warehouse which is not owned by our Company:

In the event that we are required to vacate our current premises, we would be required to make alternate arrangements for our infrastructure and there can be no assurance that the new arrangements will be on commercially acceptable terms. Further, relocation of any part of our operations may cause disruptions to our business and may require significant expenditure. If we are required to relocate our business operations, we may suffer a disruption in our operations or have to pay increased charges, which could have an adverse effect on our business, results of operations, financial condition and cash flows.

14. *Our adherence to strict quality requirements is essential as any failure to comply with these standards could result in the cancellation of existing and future orders. Moreover, unsatisfied clientele can significantly impact our business operations and future prospects.*

Adherence to quality standards is crucial for our business to maintain strong relationships with customers and ensure their satisfaction. Adherence to quality standards is crucial for our business to maintain strong relationships with customers and ensure their satisfaction. We have Quality systems and controls in place as a turnkey solution company with ISO 9001:2015 Quality Management Systems as per ROHS Certifications Private Limited. Further, we endeavour for continual improvement by following P.D.C.A. Cycle (Plan, Do, Check, Act) and also by complying to various other Quality Management Principles. Failure to achieve or sustain compliance with these standards can lead to adverse consequences, including a potential decrease in orders from our client's. Client's may prefer competitors who consistently meet quality requirements, which can harm our reputation and market position. Failure to achieve or sustain compliance with these standards can lead to adverse consequences, including a potential decrease in orders from our client's. Client's may prefer competitors who consistently meet quality requirements, which can harm our reputation and market position.

In the event of a degradation in quality, we may face legal disputes and commercial conflicts, further impacting our business and financial condition. Inadequate insurance coverage for potential liabilities may also expose us to financial risks, affecting our overall financial performance.

Maintaining positive and ongoing relationships with customers and strategic partners is essential for our business continuity. Any disruption or failure to maintain these relationships could have adverse effects on our business, financial condition, and operational results. Personal relations with clients and tender processes have been a significant source of contracts for us in the past fiscal years. To sustain this trend, we must diligently manage our reputation and ensure a track record of successful project execution. Failure to do so may result in losing opportunities to bid on limited tenders from both existing and potential clients, negatively impacting our growth prospects.

Moreover, the termination of existing contracts at the sole discretion of clients could be detrimental to our reputation and growth potential. Clients appointing other companies to complete balance work may lead to revenue losses and hinder our ability to secure future projects.

- 15. *Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations. We require a number of approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Some of the approvals are required to be obtained by our Issuer Company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations***

Our business operations require us to obtain and renew, from time to time, certain approvals, licenses, registrations and permits under central, state and local government rules in India, generally for carrying out our business. A majority of these approvals are granted for a limited duration. While we are required to obtain a number of approvals for legally conducting our business operations and we shall submit the applications for renewal of such approvals, as and when required, during the course of our business operations, we cannot assure you that we will be able to obtain approvals in respect of such applications, or any application made by us in the future. If we fail to obtain such registrations and licenses or renewals, in a timely manner, we may not then be able to carry on certain operations of our business, which may have an adverse effect on our business, financial condition and results of operations. For details, see “**Government and Other Statutory Approvals**” on page 253. Our Company has applied for few approvals for name change which are currently in the name of HVAX Technologies Private Limited. If we fail to obtain such registrations and licenses or renewals, in a timely manner, we may not then be able to carry operations of our business, which may have an adverse effect on our business, financial condition and results of operations. For details, see “**Government and Other Statutory Approvals**” on page 253. The approvals required by us are subject to numerous conditions and we cannot assure you that these would not be suspended or revoked in the event of non-compliance or alleged noncompliance with any terms or conditions thereof, or pursuant to any regulatory action. Any failure by us to comply with the applicable regulations in the future, or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business. In case we fail to comply with these requirements, or a regulator alleges non-compliance with these requirements, we may be subject to penalties and proceedings may be initiated against us. The introduction of additional government control or newly implemented laws and regulations, depending on the nature and extent thereof and our ability to make corresponding adjustments, may adversely affect our business, results of operations and financial conditions. These laws and regulations and the way in which they are implemented and enforced may change from time to time and there can be no assurance that future legislative or regulatory changes will not have an adverse effect on our business, financial condition, cash flows and results of operations.

We have submitted certain applications to various regulatory authorities seeking approvals and licenses. For details, see “**Government and Other Statutory Approvals**” on page 253. There can be no assurance that the relevant authorities will issue such permits or approvals to us or that they will be issued on time. Further, these permits, licenses and approvals are subject to several conditions and we cannot assure you that we will be able to continuously meet the conditions, which may lead to cancellation, revocation or suspension of relevant permits/licenses/approvals. Failure on our part to renew or maintain such permits, licenses or approvals may result in the interruption of our operations and may have a material impact on our business.

In the future, we may also be required to obtain new permits and approvals for our proposed operations. While we believe that we will be able to obtain such permits and approvals as and when required, there can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Failure by us to maintain or obtain the required permits or approvals, may result in the interruption of our operations or delay or prevent our expansion plans and may have a material and adverse effect on our business, financial condition and results of operations.

- 16. *As we continue to grow, we may not be able to effectively manage our growth and the increased complexity of our business, which could negatively impact our brand and financial performance.***

Our growth strategies are ambitious and have the potential to place significant demands on our management, administrative, technological, operational, and financial infrastructure. As we expand our business, there is a risk that we may face challenges in maintaining the quality of our services. The success of our growth strategies is subject to various factors, including business developments, securing new projects, timely project completions, investment opportunities, and unforeseen contingencies. We acknowledge that there may be difficulties and delays in executing our growth plans due to factors beyond our control, such as the availability of human and capital resources, delayed or non-payment by clients, failure to accurately identify market trends, cost escalations for raw materials and fuel.

The execution of our projects may also be affected by delays arising from unanticipated circumstances or unforeseen risks, leading to potential delays and increased costs. We cannot guarantee that we will always meet the expectations of our clients or execute our growth strategy on time and within estimated costs. To effectively manage our growth, we recognize the need to implement and improve operational systems, procedures, and controls. However, as we expand and diversify, there is a possibility that we may face challenges in implementing, managing, or executing these initiatives efficiently and in a timely manner. Such challenges could result in delays, increased costs, and potential compromises in service quality, which may adversely affect our results of operations and reputation.

Moreover, if we raise additional funds for our growth through debt financing, it will increase our interest and debt repayment obligations, potentially limiting our access to cash flow from operations and other means of financing. The availability and costs of financing are subject to various economic and financial market conditions, investor confidence, and the success of our ongoing projects.

It is essential to acknowledge that our management may reassess current strategies, and any changes in our approach could impose significant strain on our resources and operations. There is also a risk that we may not achieve the targeted operational levels from our future projects. The successful execution of our growth strategies is not guaranteed, and there are inherent uncertainties associated with such endeavors. If we encounter challenges or fail to execute our growth plans effectively, it could materially and adversely impact our business, prospects, and results of operations.

17. *If we are unable to identify consumer demand, project timeline accurately and maintain an optimal level of inventory, our business, results of operations, cash flows and financial condition may be adversely affected.*

Our Company is engaged in offering turnkey solutions and accordingly, the success of our business depends upon our ability to anticipate and forecast consumer demand and trends, and the time to execute the project. Any error in our forecast could result in either surplus stock, which we may be unable to utilise in our projects in a timely manner, or at all, or understocking, which will affect our ability to meet the project deadline. We plan our inventory and commence our design process prior to start of the project and estimate our sales based on the forecasted demand. We have purchase inventory and store at our warehouse in line with the demand schedule for our ongoing and anticipated projects. An optimal level of inventory is important to our business as it allows us to complete the projects in a timely manner or respond to consumer demand effectively. In general, the orders are placed a few days before the actual delivery of products. Ensuring availability of our products requires prompt turnaround time and a high level of coordination amongst manufacturers, warehouse management and physical stores and staff.

Based on our Restated Financial Statement, our inventories as of March 31, 2022 and March 31, 2023 and March 31, 2024 was ₹ 1,494.50 lakhs ₹ 2,002.64 lakhs, and ₹ 2,009.35 lakhs. Further, our inventory turnover ratio was 4.74 times, 3.67 times and 3.37 times, respectively for the corresponding period.

While we aim to avoid under-stocking and over-stocking through our inventory our estimates and forecasts may not always be accurate. If we fail to accurately fore demand, we may experience excess inventory levels or a shortage of products available unsold inventory may have to be sold at a discount or discarded. If not used potent losses. We cannot assure you that we will be able to sell surplus stock in a timely me which in turn may adversely affect our business, results of operations, cash flows.

18. *None of our Directors have prior experience of being a Director of a listed company.*

None of our Directors have prior experience of being a Director of a listed company. Further, our Independent Directors do not have the experience of being directors/ holding directorships of listed companies.

Accordingly, they have limited exposure as regards managing the affairs of a listed company which inter-alia entails several compliance requirements and scrutiny of affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, our Company will be required to adhere strict standards pertaining to accounting, corporate governance and reporting that it did not require as an unlisted company. Our Company will also be subject to the SEBI Listing Regulations, which will require it to file audited annual and unaudited quarterly reports with respect to its business and financial condition. If the Company

experiences any delays, we may fail to satisfy the reporting obligations. Further, as a publicly listed company, our Company will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our Company's disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, the Board of our Company may have to provide increased attention to such procedures and their attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition.

19. *We face foreign exchange risks that could adversely affect our results of operations and cash flows.*

We have business operations in countries namely Algeria, Colombo, Ethiopia, UAE, Ghana, Kenya, Nepal, New Zealand, Nigeria, Saudi Arabia, Sri Lanka, South Africa, Tanzania, Uganda, Zimbabwe, etc. Our export revenue was ₹ 7690.89 lakhs, ₹ 7408.59 lakhs and ₹ 6308.47 lakhs, representing 72.51%, 77.23% and 92.42% of our revenue from operations for the financial year ended on March 31, 2024, 2023 and 2022, respectively. Further, our receivables in foreign currency as on March 31, 2024 was ₹ 1910.88 lakhs representing 76.72% of our total trade receivables. We are exposed to foreign currency fluctuation risk and foreign exchange gain/ (loss) was ₹ 42.22 lakhs, ₹ (82.10) Lakhs and ₹ 15.09 lakhs for the financial year ended on March 31, 2024, 2023 and 2022, respectively.

Although, we closely follow our exposure to foreign currencies. We do not hedge our exposure in totality to foreign currency as a result, our operations, cash flows and financial performance could be adversely affected in case these currencies fluctuate significantly. We may from time to time be required to make provisions for foreign exchange differences in accordance with accounting standards. For further details see "*Restated Financial Statements*" on page 192. In addition, the policies of the RBI may also change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may have an adverse effect on our results of operations and cash flows. Any such losses on account of foreign exchange fluctuations may adversely affect our results of operations and cash flows. Certain markets in which we sell our products may be subject to foreign exchange repatriation and exchange control risks, which may result in either delayed recovery or even non-realization of revenue.

20. *Some of our Group Companies and our Promoter Group Entities/other ventures of our Promoter are engaged in similar line of business. Any conflict of interest in future may occur between our group company or our promoter group entities/other ventures of our Promoter and us may adversely affect our business, prospects, results of operations and financial condition.*

As a turnkey solution company, we are a "design-to-delivery" controlled environment infrastructure and cleanroom solutions provider with the ability to provide end to end solution encompassing designing, engineering, procurement, installation, testing, commissioning, management and operational support for a wide range of customers primarily in the pharmaceutical, healthcare, hospital and biotech sector across India and internationally. Our other promoter group entities namely HVAX Engineering, PNX Enterprise LLP and Isovax Technologies are also engaged in the similar line of business. For instance, HVAX Engineering and Isovax Technologies are our major suppliers and PNX Enterprise LLP is engaged in providing design and engineering consulting services. Further we have not executed any non-compete Agreement with Group company, other entities of our Promoter.

As a result, conflicts of interests may arise in allocating business opportunities amongst our Company, Group company, other entities of our Promoter in circumstances where our respective interests diverge. In cases of conflict, our Promoters may favour our Group company, other entities of our Promoter in which our Promoters have interests. There can be no assurance that our Group company, other entities of our Promoter will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours or consolidate some of the operations of our Company with these entities. Any such present and future conflicts could have a material adverse effect on our business, results of operations and financial condition. For further details see "*Our Group Companies/Entities*" on page 259.

21. *If we are unable to service our debt obligations in a timely manner or to comply with various financial and other covenants and other terms and conditions of our financing agreements, it may adversely affect our business, prospects, results of operations and financial condition.*

As of March 31, 2024, our Company had total indebtedness in the form of short term and long-term borrowings of ₹ 2,437.29 lakhs on restated basis. Our indebtedness could have several important consequences, including but not limited to the following:

- a portion of our cash flows may be used towards repayment of our existing debt, which will reduce the availability of our cash flows to fund working capital, capital expenditures and other general corporate requirements;
- our ability to obtain additional financing in the future at reasonable terms may be restricted;
- fluctuations in market interest rates may affect the cost of our borrowings,
- there could be a material adverse effect on our business, financial condition and results of operations if we are unable to service our indebtedness or otherwise comply with financial and other covenants specified in the financing agreements

Many of our financing agreements also include various conditions and covenants that require us to obtain consent of the lenders prior to carrying out certain activities or entering into certain transactions. Certain covenants in these agreements require us to obtain approval/permission from our lenders in certain conditions. In the event of default or the breach of certain covenants, our lender has the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business. For further details in this regard, see “Annexure 7 & 7.1” under chapter titled “Restated Financial Statement” on page 192.

22. *Our Company has availed unsecured loans which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows.*

As on March 31, 2024, our Company has unsecured loans amounting to ₹ 2.72 lakhs from Directors that are repayable on demand to them. Such loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lenders at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition. For further details of unsecured loans of our Company, see “Annexure 7 & 7.1” respectively under chapter titled “Restated Financial Statements” on page 192.

23. *Our lenders have charge over our movable and immovable properties in respect of finance availed by us.*

We have secured outstanding debt (excluding current maturity) of ₹ 2,434.57 lakhs as on March 31, 2024 and we have secured our lenders by creating charge over our movable and immovable properties. In the event we default in repayment of the loans availed by us and any interest thereof, our properties may be forfeited by lenders. For further information on the financing and loan agreements along with the total amounts outstanding, see “Restated Financial Statements” on page 192.

24. *Significant disruptions of information technology systems or breaches of data security could adversely affect our business.*

We depend upon information technology systems and third-party software, including internet-based systems, for our business operations, and these systems facilitate the flow of real-time information across departments and allows us to make information driven decisions and manage performance. The size and complexity of our computer systems make them potentially vulnerable to breakdown, malicious intrusion and computer viruses. Any such disruption may result in the loss of key information and disrupt our operations. In addition, our systems are potentially vulnerable to data security breaches, whether by employees or others that may expose sensitive data to unauthorized persons. Such data security breaches could lead to the loss of trade secrets or other intellectual property, or could lead to the public exposure of personal information (including sensitive personal information) of our employees, customers and others. Although we have not experienced any significant disruptions to, or security breaches of, our information technology systems, we cannot assure you that we will not encounter such disruptions in the future and any such disruptions or security breaches could have an adverse effect on our business and reputation.

25. *Our inability to collect receivables from our customers or default in payment by them could result in reduction of our profits and affect our cash flows.*

While we generally monitor the ability of our customers to pay the credit arrangements and limit the credit to reasonable extent based on an evaluation of each customer’s financial condition and payment history, we may still experience losses, if customer fails to pay our dues. Dependence on few key customers increases the risk of bad debts if any of these customers experience financial difficulties or go out of business. As majority of our customers operate from foreign jurisdictions, pursuing legal remedies to collect the trade receivables may involve paying higher legal fees and other expenses. Our inability to collect receivables from our customers in a timely manner or at all in future, could adversely affect our working capital cycle and cash flows. For instance, our trade

receivables outstanding for more than twelve months is ₹ 1158.07 lakhs as of March 31, 2024 which represent 46.50 % of our total trade receivables.

26. *We are dependent on our Promoters, our senior management and other key personnel, and the loss of, or our inability to attract or retain, such persons could affect our business, results of operations, financial condition and cash flows.*

Our performance depends largely on the efforts and abilities of our promoters, senior management and other key personnel. They have gained experience in this line of business and have over the years built relations with our customers and other persons who are connected with us and have been actively involved in the day to day operations and management, further we believe that the inputs and experience of our senior management, in particular, and other key personnel are valuable for project development and procurement activities, and our overall business operations and the strategic directions taken by our Company. For details in relation to the experience of our key management personnel, see **“Our Management-Our Key Managerial Personnel”** on page 181. We cannot assure you that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find adequate replacements in a timely manner, or at all. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. The loss of the services of such persons may have an effect on our business, results of operations, financial condition and cash flows.

27. *Our Promoters and Directors have provided personal guarantees for financing facilities availed by our Company and may in the future provide additional guarantees and any failure or default by our Company to repay such facilities in accordance with the terms and conditions of the financing agreements could trigger repayment obligations on them, which may impact their ability to effectively service their obligations as our Promoters and Directors and thereby, adversely impact our business and operations.*

Our Promoters and Directors have personally guaranteed the repayment of certain loan facilities taken by us. Our Promoters may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the guarantees provided by our Promoters and Directors may be invoked, which could negatively impact the reputation and net worth of our Promoters and Directors. In addition, our guarantors may be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company.

Furthermore, in the event that our Promoters and Directors withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

28. *The average cost of acquisition of Equity shares by our Promoters is lower than the Issue price.*

The average cost of acquisition of Equity Shares for our Promoters may be lower than the Issue Price. The details of the average cost of acquisition of Equity Shares held by our Promoters as at the date of the RHP is set out below:

Sr No.	Name of Promoters	No. of Equity Shares held	Average Cost of Acquisition per equity share (in ₹)*
1.	Nirbhaynarayan Singh	92,5173	4.54
2.	Prayagdatt Mishra	92,5230	4.54

*As certified by our Statutory Auditor, M/s. Keyur Shah & Associates vide their certificate dated September 19, 2024.

For more details regarding weighted average cost of acquisition of Equity Shares by our Promoters, see **“Summary of the Issue Document”** on page 18.

29. *Our Company has issued Equity Shares during the preceding one year at a price that may be below the Issue Price.*

In the preceding one year from the date of this Red Herring Prospectus, our Company has issued Equity Shares at a price that may be lower than the Issue Price. The price at which Equity Shares have been issued by our Company in the preceding one year is not indicative of the price at which they will be issued or traded after listing. For details on such allotments, see **“Capital Structure”** on page 89.

30. *We could be adversely affected due to misconduct or errors of our employees that are difficult to detect and any such incidents could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and damage our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

31. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

Our Company faces potential risks related to incidents of theft or damage to inventory. While we have not encountered such situations in the past, we acknowledge that there is a possibility of experiencing inventory losses due to various factors such as employee theft, vendor fraud, and general administrative errors. These incidents could have a negative impact on the results of operations and financial condition. During the execution of the contract and up to defect liability period we are generally fully liable to compensate all concerned for any loss, damage, or destruction of work, structure, property etc. including third party risk arising due to causes attributable to us.

Despite implementing security measures and internal controls, there is no guarantee that we will completely avoid instances of fraud, theft, employee negligence, or security lapses in the future. Any such occurrence could lead to significant financial losses and affect our overall business performance.

Although we have insurance coverage against losses due to theft, fire, breakage, or damage caused by other casualties, the extent of coverage may not fully mitigate the financial impact of such incidents on our operations and financial condition. In some cases, the losses incurred may exceed the insurance coverage, resulting in additional financial strain for the company.

32. *We are subject to anti-bribery, anti-corruption and sanctions laws and regulations.*

We are subject to anti-bribery and anti-corruption laws which prohibit us, our employees, contractors, subcontractors and other intermediaries from bribing government officials for the purpose of obtaining or keeping business or otherwise obtaining favourable treatment. We operate in many parts of the world that have experienced governmental corruption to some degree, and, in certain circumstances, strict compliance with anti-bribery and anti-corruption laws may conflict with local customs and practices. Our competitors in such jurisdictions may not be subject to the same anti-bribery and anti-corruption laws as we are, and accordingly, may be better placed than us to do business.

Our operations are also subject to laws and regulations restricting dealings with certain parties, including activities involving restricted countries, organizations, entities and persons that are subject to international economic sanctions.

We cannot assure you that we will not discover any issues or violations with respect to anti-bribery, anticorruption and economic sanctions laws by us or our employees, agents, sub-contractors or other intermediaries. Any violations of these laws and regulations could result in restrictions being imposed on our operations, affect our eligibility to bid for projects, expose us to administrative, civil or criminal penalties or fines and could adversely affect our reputation, business, financial condition, results of operations and the trading price of our Equity Shares.

33. *There are outstanding legal proceedings involving our Company, Promoters and Directors. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial conditions*

We are involved in certain legal proceedings which are pending at different levels of adjudication before various courts, tribunals, enquiry officers, and appellate authorities. We cannot provide assurance that these legal proceedings will be decided in our favour. Any adverse decisions in any of the following proceedings (as mentioned in the table below) may not have a significant effect on our business, results of operations, cash flows and financial condition.

A summary of the proceedings involving our Company, Promoters and Group Companies are provided below:

34. Compliance with, and changes in, environmental, health and safety laws and regulations or stringent enforcement of existing environmental, health and safety laws and regulations may result in increased liabilities and increased capital expenditures and may adversely affect our cash flows, business results of operations and financial condition.

Our operations may be subject to environmental, health and safety and other regulatory and/ or statutory requirements in the jurisdictions in which we operate. See also “**Key Regulations and Policies**” on page 158. Further, our operations may be subject to various health, environmental, safety laws and regulations of respective countries. Any non-compliance with these laws and regulations or accidents, in particular fatalities, may adversely affect our reputation and may result in fines, civil penalties, criminal sanctions, third-party property damage, personal injury claims, clean-up costs, revocation of key business licences and/or investigations by public authorities as well as litigation from injured workers or their dependents. We cannot assure you that our costs of complying with current and future environmental laws and other regulations will not adversely affect our business, results of operations or financial condition. In addition, we could incur substantial costs, and we could face other

sanctions, if we were to violate or become liable under health, environmental, safety laws and regulations of respective countries.

35. *Our international operations and our strategy to further grow these operations expose us to complex management, legal, tax, operational and economic risks, and exchange rate fluctuations, which could adversely affect our business, financial condition and results of operations.*

We generate a substantial portion of our total revenue from our international markets, primarily Africa, Gulf Cooperation Countries and South Asia, including Sri Lanka, Nepal and Bangladesh. The accounting standards, tax laws and other fiscal regulations in the jurisdictions in which we operate are subject to differing interpretations, thus creating uncertainty and potential unexpected results. For the Financial Years 2024, 2023 and 2022, our revenues from export amounted to ₹ 7,690.89 lakhs, ₹ 7,408.59 lakhs and ₹ 6,308.47 lakhs, respectively, representing 72.51%, 77.23 % and 92.42 %, respectively, of our revenue from operations.

Further, although our reporting currency is Indian Rupees, we transact a significant portion of our business in several other currencies, primarily in U.S. dollars and Euros. We are therefore exposed to exchange rate fluctuations. We are exposed to foreign currency fluctuation risk and foreign exchange gain/ (loss) was ₹42.22 Lakhs, ₹ (82.10) lakhs and ₹ 15.09 lakhs for the financial year ended on March 31, 2024, 2023 and 2022, respectively. For further details, see “*Restated Financial Statements*” on page 192. For example, in 2021 we faced challenges in transporting construction materials and equipment when governments had imposed COVID-19 related lockdowns and other restrictions. We may also face other challenges, including those relating to our lack of familiarity with the social, political, economic and cultural conditions of these regions, language barriers, difficulties in staffing, immigration requirements for workers and managing such operations and the lack of brand recognition and reputation in such regions.

Additional risks associated with international operations include difficulties in enforcing contractual rights, foreign currency risks, the burdens of complying with foreign laws and potentially adverse tax consequences, including permanent establishment and transfer pricing issues, tariffs, quotas and other barriers and potential difficulties in collecting accounts receivable. Certain countries may also impose local content requirements, which require a certain percentage of the materials, labour or other inputs used in the execution of a project to be sourced locally, placing us at a disadvantage to our local competitors since we may source supplies from our preferred suppliers in India.

36. *Any variation in the utilization of the Net Proceeds as disclosed in this Red Herring Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.*

We propose to utilize the Net Proceeds towards utilization for the working capital requirement and General Corporate Purposes of our Company. For further details of the proposed objects of the Issue, see “*Objects of the Issue*” on page 84. However, these objects of the Issue have not been appraised by any bank, financial institution or other independent agency. Further, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with the Companies Act, 2013 and the SEBI ICDR Regulations, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Red Herring Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations. Further, our Promoters would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement to provide an exit opportunity to such dissenting shareholders of our Company may deter our Promoters from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoter will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition, if any, which may adversely affect our business and results of operations.

37. *Our actual cost incurred in completing a project may vary substantially from the assumptions underlying our bid. We may be unable to recover all or some of the additional expenses incurred, which could adversely affect our financial condition, results of operation and cash flows.*

Under our contracts with our customers, we are typically entitled to receive an agreed amount, subject to variations in our scope of work. This amount is based on certain estimates underlying our project cost estimates. However,

our actual expenses in executing a project may vary based on a change in any such assumptions. Any unexpected price fluctuations after placement of orders, shortage, delay in delivery, quality defects, or any factors beyond our control may result in an interruption in the supply of such materials and adversely affect our business, financial performance, results of operations, and cash flows. Most of our arrangement with our customers allow us to claim for an increase in certain project costs. If our cost overruns are greater than the increase in market rates, we may not be able to recover all of our cost overruns. We cannot assure you that we will not experience any cost overruns in the future. Further, the assumptions underlying our bid are typically based on a pre-bid inspection / study that we conduct. Our pre-bidding studies are usually conducted in a short span of time, as part of our preparation and research for a potential bid by us. Further, we may also need to seek additional financing to meet any consequent cost overruns, which may not be available on attractive terms. Any significant deviations from the estimates could adversely affect our business, financial condition and results of operations.

38. ***We rely on third parties, including sub-contractors, to complete certain projects and any failure arising from non-performance, delayed performance or inadequate quality in the performance of work by such third parties, or a failure by third-party subcontractors to comply with applicable laws, to obtain the necessary approvals, or provide services on agreed terms, could adversely affect our business, financial condition, results of operations and cash flows***

We rely on sub-contractors to complete a certain portion of our work. Further, also rely on third-party equipment manufacturers or suppliers, including our related parties to provide the equipment and materials used for our projects. Engaging sub-contractors is subject to certain risks, including difficulties in overseeing performance, delays which may arise on account of being unable to hire suitable subcontractors, or losses as a result of unexpected sub-contracting cost overruns. Since sub-contractors have no direct contractual relationship with our customers, we are subject to risks associated with non-performance, late performance or poor performance by our sub-contractors. As a result, we may incur additional costs, or be exposed to liability arising from poor performance by subcontractors, which may impact our business, reputation and profitability, and may result in litigation or other claims against us. While we may attempt to seek compensation from the relevant sub-contractors, we cannot assure you that we will be successful in such a claim. Further, if sub-contractors engaged by us fail to obtain government or third-party approvals, we may be subject to claims by government authorities or third parties. In addition, if we are unable to hire qualified sub-contractors or find competent equipment manufacturers or suppliers, our ability to successfully complete a project could be affected. If the amount we are required to pay for sub-contractors, equipment or supplies exceeds our estimates, we may suffer losses. If a supplier, manufacturer, or sub-contractor fails to provide supplies, equipment or services on agreed terms, we may be required to source these supplies or equipment from another supplier or find are placement for such a sub-contractor (as the case may be) at higher costs than anticipated, which could adversely affect our business, profitability, financial condition and results of operations.

39. ***Our reliance on equipment suppliers for our business operations exposes us to a variety of risks which could materially disrupt our operations.***

Timely and cost-effective execution of our projects is dependent on adequate and timely supply of various equipment under the turnkey contract or as a part of our business operations. We have not entered into any long-term contracts or supply arrangements with any of the Company's suppliers and if, for any reason, the Company's primary suppliers should curtail or discontinue their delivery of such equipment in the quantities needed, the project schedules could be disrupted, and the Company may not be able to complete work order as per schedule or at such costs that were not anticipated. If the Company is unable to procure the requisite quantities of equipment in time and at commercially acceptable prices, the performance of its financial results and business prospects could be adversely affected. While we have not experienced any such disruption in the past, we cannot assure that we will not be subject to disruption on account of delay or non-supply of equipment's by our suppliers.

40. ***Our business development efforts involve considerable time and expense, and our revenues may not justify expenses incurred towards business development efforts.***

As part of our business development efforts, we invest considerable time evaluating potential projects and preparing our bids, and in educating potential customers about our organizational capabilities. We also incur costs in making feasibility report and drawings and designs. Our results of operations depend on winning contract awards. Our customers may make decisions to award projects based in part or entirely on factors, or perceived factors, not directly related to our technical capabilities, including, among others, that customer's projections of business growth, economic conditions, preferences for particular contractors, and favourable terms offered by competitors. Our business development and bidding efforts require a significant investment of human resources, expense and time, including by management, and we cannot assure you that we will be successful in generating project awards. If our business development efforts do not result in sufficient revenue to justify our costs, our business, financial condition, and results of operations could be adversely affected.

41. Our insurance coverage may be inadequate, which could have an adverse effect on our financial condition and results of operations.

Our operations are subject to risks inherent to our operations such as providing engineering services, risk of equipment failure, work accidents, fire, earthquake, flood and other force majeure events, acts of terrorism and explosions that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environmental damage. We generally maintain insurance covering our assets and operations at levels that we believe to be appropriate, including group medical and group personnel accident policies for our employees and Keyman insurance policy. Risks of loss or damage to project works and materials are often insured jointly with our customers.

However, we may not have sufficient insurance coverage to cover all possible economic losses. While we have not experienced substantial uninsured losses during past three Financial Years. In the event of a substantial uninsured future loss, our policies may not be sufficient to recover the full current market value or current replacement cost of our assets. The occurrence of an event for which we are not adequately or sufficiently insured, or changes in our insurance policies (including premium increases or the imposition of deductible or co-insurance requirements), could have an adverse effect on our business, reputation, results of operations, financial condition and cash flows. Further, we cannot assure you that renewal of our insurance policies in the normal course of our business will be granted in a timely manner, at an acceptable cost or at all

42. We have certain contingent liabilities and commitments that may adversely affect our financial condition.

The following is a summary table of our contingent liabilities and commitments (to the extent not provided for) as of March 31, 2024, as indicated in our Restated Financial Statements:

(₹ in Lakhs)

Particular	Fiscal 2024	Fiscal 2023	Fiscal 2022
Custom Duty saved on import of Capital Goods under EPCG Scheme	-	-	-
Bank Guarantees	-	-	-
Indirect Tax Liability	-	-	-
Direct Tax Liability	0.14	-	-
Corporate Guarantee Given by Company	-	-	-
Total	0.14	-	-

For details, see “*Restated Financial Statements*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations - Contingent Liabilities*” on pages 192 and 232, respectively. Any or all of the above contingent liabilities may crystallize and become actual liabilities. In the event that any of our contingent liabilities crystallize, our business, financial condition, cash flows and results of operations may be adversely affected. Furthermore, we cannot assure you that we will not incur similar or increased levels of contingent liabilities in the current Financial Year or in the future.

43. Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by any bank or financial institution or any other independent agency and our management will have broad discretion over the use of the Net Proceeds.

The fund requirement and deployment, as mentioned in the chapter titled as “*Objects of the Issue*” on page 84 is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter titled “*Objects of the Issue*” on page 84 is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation under chapter titled “*Objects of the Issue*” on page 84 will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control and will be subject applicable rules and regulations. The occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

44. Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures. Moreover, we might not sustain historical dividend levels moving forward.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history see “*Dividend Policy*” on page 191. While we have paid dividends in the past, there can be no assurance as to whether we will pay dividends in the future and, if so, the level of such future dividends.

45. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

46. *Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the Issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.*

Our Promoters along with the Promoter group will continue to hold collectively 66.65% of the Post Equity Share Capital of the Company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder’s vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoter will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

47. *Any future issuance of our Equity Shares may dilute prospective investors’ shareholding, and sales of our Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favorable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favor of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company’s Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company’s Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company’s major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

48. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue price of the Equity Shares have been based on many factors and may not be indicative of the market price of our Equity Shares after the Issue. For further information see “*Basis for Issue Price*” on page 93. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline

below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

49. *We have not commissioned an industry report for the disclosures made in the chapter titled ‘Industry Overview’ and made disclosures on the basis of publicly available data and such data has not been independently verified by us*

We have not commissioned an industry report for the disclosures made in the chapter titled “**Industry Overview**” on page 104 and made disclosures on the basis of publicly available data and such data has not been independently verified by us. However, we have paid for report titled “*Global Cleanroom Panels Market Size, Statistics, Growth Trend Analysis, and Forecast Report, 2024 -2034*” (to the extent applicable for India) dated June 05, 2024 (“*Decipher Research Report*”) prepared by Decipher Market Insights. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have been obtained. We have not independently verified such data. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable. Further, the data furnished on their websites and has no relationship with our Company, its Promoters, Directors, or the Book Running Lead Manager as on the date of this Red Herring Prospectus. The data used in these sources may have been reclassified by us for the purposes of presentation and may also not be comparable. 50. *There have been delays in submitting regulatory filings with the RoC. We cannot assure you that no legal proceedings or regulatory actions will be initiated against our Company in the future.*

There have delays in filing forms with the RoC. For Instance (i) Form GNL-2 for Private Placement Offer Letter (PAS-4) and Form GNL-2 for filing Record for Private Placement Offer Letter (PAS-5) with respect to allotment of Equity Shares dated March 18, 2024; (ii) Form MGT-14 for Approval of Remuneration of Managing Director and Whole-Time Director; (iii) Form INC-27 for conversion of public company into private company were filed by payment of additional fees. Further, there was an inadvertent error in filing form MGT-14 with the RoC. (iv) The Company has filed form CHG-4 for satisfaction of charge from Kotak Mahindra Bank with additional fees.

There can be no assurance that the RoC will not take an adverse view of the irregularity, or that we will not be subject to any penalties by the RoC in this respect. With the expansion of our operations there can be no assurance that such non-compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such non-compliances, in a timely manner or at all. Any penalty or regulatory action taken against us may adversely impact our cash flows and results of operations.

In the past, our filing of Form FC-GPR with respect to Equity Shares allotted to Craft Emerging Market Fund PCC - Citadel Capital Fund and Craft Emerging Market Fund PCC - Elite Capital Fund under FEMA Regulations were rejected by the Reserve Bank of India on April 15, 2024 for want of certain documents. The Company refiled the Form FC-GPR along with necessary information on May 08, 2024 which has been approved by the RBI.

51. *There are certain instances of delays in payment of statutory dues. Any delay in payment of statutory dues or non-payment of statutory dues in dispute may attract financial penalties from the respective government authorities, which may have an adverse impact on our financial condition and cash flows*

There have been certain instances on delay in payment of statutory dues during last three FYs fiscals, which inter-alia include, goods and services tax, provident fund, employees’ state insurance, income-tax, sales-tax, which as on the date of this Red Herring Prospectus has been deposited with relevant authorities. There can be no assurance that such delays may not arise in future. This may lead to financial penalties from respective government authorities which may have a material adverse impact on our financial condition and cash flows.

52. *We may not be able to adequately protect our intellectual property.*

Our success and ability to compete depends, in part, on our ability to protect our intellectual property rights and we generally rely on trademark laws, and confidentiality. While we have registered certain trademarks in India are as follows

Brand Name/Logo Trademark	Class	Registration / Application No.	Applicant	Date of Application / Registration	Current Status
	37	4749457	HVAX Technologies Private Limited	November 19, 2020	Registered

If we fail to register the appropriate intellectual property, or our efforts to protect relevant intellectual property prove to be inadequate, the value attached to our brand could deteriorate, which could have a material adverse effect on our business growth and prospects, financial condition, results of operations, and cash flows. While there have been no instances in the past, the illegal use or impersonation of our trademarks or logos by third parties or any negative publicity about our brand(s) could affect our reputation which, in turn, could affect our ability to attract and/or retain customers, which may adversely affect our business and results of operations.

53. *In the event there is any delay in the completion of the Issue, or delay in schedule of implementation, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the objects of the Issue as has been stated in the chapter titled “*Objects of The Issue*” on page 84. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, it may adversely affect our revenues and results of operations.

54. ***A member of our Promoter Group Entities namely HVAX Engineering uses our registered trademark for its operations. We do not have any control on its activities and change in operation of this entity could adversely affect our reputation and results of operations***

A member of our promoter group entities namely HVAX Engineering uses our registered trademark- HVAX Logo, registered under class 37 for conduct of its operations. We do not have any control over its business. Any negative impact on its business may adversely affect our reputation and consequently, our business, financial condition, results of operations and cash flows.

55. ***We have not identified any alternate source of raising the funds required for the object of the Issue and the deployment of funds is entirely at our discretion and as per the details mentioned in the section titled “Objects of the Issue”.***

Our Company has not identified any alternate source of funding for our object of the Issue and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. For further details of see “*Objects for the Issue*” on page 84.

56. ***Our certain members of our promoter group have not filed Income Tax Returns(“ITR”).***

As on the date of this Red Herring Prospectus, certain members of our promoter group have not filed ITRs for any financial year. In the event cognizance is taken by certain authorities in relation to the aforesaid, it may result in penal actions against the said persons, which may affect our reputation.

57. ***We may not be successful in implementing our business strategies.***

The success of our business will depend greatly on our ability to effectively implement our growth strategies. For further details on our strategies, see “*Business Overview – Business Strategy-*” on page 151. There can be no assurance that we will be able to successfully execute our strategies, which may adversely affect our business, financial condition, cash flows and results of operations. We expect our strategies to place significant demands on our management and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and strategies could have an adverse effect on our business, financial condition, cash flows and profitability

58. ***The requirements of being a public listed company may strain our resources and impose additional requirements.***

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge, and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange could lead to imposition of huge penalties, if any including suspension of trading, imposed by Stock Exchange.

EXTERNAL RISK FACTORS:

59. ***Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.***

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital

expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax (“GST”) regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

60. *Investor may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

61. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.*

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies. The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India’s economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

62. *An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our business, results of operations and financial condition.*

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

63. *Terrorist attacks or war or conflicts involving India or other countries could adversely affect consumer and business sentiment and the financial markets and adversely affect our business.*

Terrorist attacks and other acts of violence or war may adversely affect global equity markets and economic growth as well as the Indian economy and stock markets. Such acts negatively impact business and economic sentiment, which could adversely affect our business and profitability. Also, India has from time to time experienced, and continues to experience, social and civil unrest and hostilities with neighboring countries. Armed conflicts could disrupt communications and adversely affect the Indian economy. Such events could also create a perception that investments in Indian companies involve a high degree of risk. This, in turn, could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares. The consequences of any armed conflicts are unpredictable and we therefore may not be able to foresee events that could have an adverse effect on our business.

64. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock prices.*

Global economic and political factors that are beyond our control influence forecasts directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

65. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

66. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

67. *Instability in financial markets could materially and adversely affect the results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

68. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

69. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

70. *Sanctions - Economic sanctions imposed by the United States and other jurisdictions may expose us to potential compliance risks.*

Various international jurisdictions, including the United States, restrict investments or otherwise doing business in or with certain countries or territories and with certain persons or businesses that have been specially designated by such government agencies. Other governments and international or regional organizations also administer similar economic sanctions.

Our customers may be located in and/ or may enter into transactions with end customers, either directly or indirectly through distributors and agents, located in, jurisdictions to which certain Office of Foreign Assets Control of the U.S. Department of the Treasury-administered and other sanctions apply, such as Iraq, Sudan, Syria, Libya and Myanmar. We have made sales to customers/ entities located in such countries representing 5.23% and 8.51% of our Revenue from operations in Fiscal 2023 and Fiscal 2024, respectively. In each case, we believe such sales have been conducted in accordance with applicable sanctions laws and regulations. We have limited information about and control over the identity of our customers and there can be no assurance that our past or future customers have not been included or will not include persons or entities targeted by or were not or will not be located in any country that is the subject of sanctions.

As part of our growth strategy, we intend to expand our international operations. While we select our partners, which operate in certain geographies and have the ability to review and exclude shipments from and to destinations in order to comply with applicable laws, however, there might be exposure to jurisdictions that are subject to sanctions, which we expect and believe will not be material to our overall revenue from operations. In addition, as a result of our business activities or a change in the scope or application of sanctions, our counterparties, including our vendors and suppliers, or our other customers, that are required to comply with such sanctions laws and regulations, may seek to terminate or modify our arrangements to impose additional conditions that may be adverse to our operations or business prospects, or may be precluded from entering into commercial transactions with us.

Future changes to sanctions regimes may also require us to discontinue existing operations, or prevent us from doing business, in jurisdictions subject to such sanctions, which could have an adverse effect on our business, operations, prospects or financial results, including as a result of disputes arising from the termination of our existing contractual arrangements.

If we fail to comply with current or future applicable laws, we could incur significant fines and other penalties and suffer negative publicity and reputational damage, which could have an adverse effect on our financial condition, cash flows, results of operations or business. Further, investors in the Equity Shares could incur reputational or other risks as a consequence. There can be no assurance that our future business will be free of risk under sanctions implemented by these jurisdictions or that we will be able to conform our business operations to the expectations and requirements of such international regulatory agencies that do not have jurisdiction over our business but nevertheless assert the right to impose sanctions on an extraterritorial basis. In addition, because many sanctions programs are evolving, new requirements or restrictions could come into effect which might increase regulatory scrutiny of our business or result in some of our business activities being subject to sanctions.

71. *A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.*

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange

currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investor's reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

72. *Changing laws, rules and regulations and legal uncertainties in India and abroad, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details see "***Government and Other Statutory Approvals***" on page 253 for details of the laws currently applicable to us. The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, turnover tax, goods and services tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred. We are involved in various disputes with tax authorities. For details of these disputes, see "***Outstanding Litigation and Material Developments***" on page 247. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time.

Any change in Indian tax laws could have an effect on our operations. For instance, the Taxation Laws (Amendment) Ordinance, 2019, a new tax ordinance issued by India's Ministry of Finance on September 20, 2019, prescribes a number of changes to the income tax rate applicable to companies in India. According to this new ordinance, companies can henceforth voluntarily opt for a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate for Indian companies. Any such future amendments may affect other benefits such as an exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would influence our profitability.

The Finance Act, 2022 ("Finance Act"), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax ("DDT"), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident and are likely to be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. Further, the Government of India has notified the Finance Act, 2023, which has introduced various amendments to taxation laws in India. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial

precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

73. *Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures such as the Additional Surveillance Measures (“ASM”) and Graded Surveillance Measures (“GSM”) by the Stock Exchanges in the order to enhance market integrity and safeguard the interest of the investors*

On and post the listing of equity shares, we may be subject to ASM and GSM by the Stock Exchange(s) and the Securities and Exchange Board of India. These measures have been introduced in order to enhance market integrity, safeguard the interest of investors and to alert and advise investors to be extra cautious and carry out necessary due diligence while dealing in such securities. The criteria for shortlisting any scrip trading on the Stock Exchange(s) under the ASM is based on an objective criterion as jointly decided by SEBI and the Stock Exchanges(s) which includes market based dynamic parameters such as high low-price variation, client concentration, close to close price variation, market capitalization, average daily trading volume and its change, and average delivery percentage, among others. A scrip is typically subjected to GSM measures where there is an abnormal price rise that is not commensurate with the financial health and fundamentals of a company. Specific parameters for GSM include net worth, net fixed assets, price to earnings ratio, market capitalisation, and price to book value, among others. Factors within and beyond our control may lead to our securities being subject to GSM or ASM. In the event our Equity Shares are subject to such surveillance measures implemented by any of the Stock Exchanges, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

74. *The determination of the Price Band is based on various factors and assumptions and the Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The determination of the Price Band is based on various factors and assumptions and will be determined by our Company, in consultation with the BRLM. Furthermore, the Issue Price of the Equity Shares will be determined by our Company in consultation with the BRLM, through the Book Building Process. These will be based on numerous factors, including factors as described under “*Basis for the Issue Price*” on page 93 and may not be indicative of the market price for the Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. The factors that could affect the market price of the Equity Shares include, among others, broad market trends, financial performance and results of our Company post-listing, and other factors beyond our control. There can be no assurance that an active market will develop or sustained trading will take place in the Equity Shares or regarding the price at which the Equity Shares will be traded after listing

75. *Qualified Institutional Buyers (“QIBs”) and Non-Institutional Investors are not permitted to withdraw or lower their Bids (either quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.*

Pursuant to the provisions of the SEBI ICDR Regulations and other regulations and guidelines prescribed by the SEBI, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares Bid for or the price) at any stage after submitting a Bid and are required to pay the Bid Amount at the time of submission of the Bid. While our Company is required to complete Allotment pursuant to the Issue within three (3) Working Days from the Bid/ Issue Closing Date, or such other period as may be prescribed by SEBI, events affecting the Bidders’ decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Bid by QIBs and Non-Institutional Investors and Allotment of the Equity Shares. Our Company may choose to complete the Allotment of the Equity Shares pursuant to the Issue despite the occurrence or one or more such events, and QIBs and Non-Institutional Investors would not be able to withdraw or lower their Bids in such or any other situation, once they have submitted their Bid.

76. *The Equity Shares have never been publicly traded, and the Issue may not result in an active or liquid market for the Equity Shares. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price.*

Prior to the issue, there has been no public market for the Equity Shares, and an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, there will be liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Issue. The market price of the Equity Shares after the Issue can be volatile as a result of several factors beyond our control, including volatility in the Indian and global securities markets, our results of operations, the

performance of our competitors, developments in the Indian and global machine tools industry, changing perceptions in the market about investments in this sector in India, investor perceptions of our future performance, adverse media reports about us or our sector, changes in the estimates of our performance or recommendations by financial analysts, significant developments in India's economic liberalization and deregulation policies, and significant developments in India's fiscal regulations. In addition, the Stock Exchanges may experience significant price and volume fluctuations, which may have a material adverse effect on the market price of the Equity Shares. General or industry-specific market conditions or stock performance or domestic or international macroeconomic and geopolitical factors unrelated to our performance may also affect the price of the Equity Shares. In particular, the stock market as a whole in the past has experienced extreme price and volume fluctuations that have affected the market price of many companies in ways that may have been unrelated to the companies' operating performances. For these reasons, investors should not rely on recent trends to predict future share prices, results of operations or cash flow and financial condition.

77. *The requirements of being a publicly listed company may strain our resources.*

We are not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations, which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and, or, we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies. Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition.

Any further issuance of Equity Shares, or convertible securities or other equity-linked instruments by us may dilute your shareholding. We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including a primary offering of Equity Shares, convertible securities or securities linked to Equity Shares including through exercise of employee stock options, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. We cannot assure you that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

78. *The sale of Equity Shares by our Promoters in future may adversely affect the market price of the Equity Shares.*

After the completion of the Issue, our Promoters will still own a significant percentage of our issued Equity Shares. The sale of a large number of the Equity Shares by our Promoters could adversely affect the market price of the Equity Shares. Similarly, the perception that any such primary or secondary sale may occur, could adversely affect the market price of the Equity Shares. No assurance may be given that our Promoters will not dispose of, pledge or encumber their Equity Shares in the future.

79. *Investors may be subject to Indian taxes arising out of income arising on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares held as investments in an Indian company are generally taxable in India. Any capital gain realized on the sale of listed equity shares on a Stock Exchange held for more than 12 months immediately preceding the date of transfer will be subject to long term capital gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief

Accordingly, Investors may be subject to payment of long-term capital gains tax in India, in addition to payment of Securities Transaction Tax ("STT"), on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any capital gains realized on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India as well as STT. Capital gains arising from the sale of the Equity Shares will not be chargeable to tax in India in

cases where relief from such taxation in India is provided under a treaty between India and the country of which the seller is resident read with the Multilateral Instrument (“MLI”), if and to the extent applicable, and the seller is entitled to avail benefits thereunder. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. No dividend distribution tax is required to be paid in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source pursuant to any corporate action including dividends. We estimate the holding level to stay around 24 days for Fiscal 2025 and 25 days for Fiscal 2026.
Other Current Assets	Other Current Assets mainly includes duties & taxes, prepaid expenses, GST/income tax/duty drawback receivable, rent deposit etc. The holding days of other current assets were 16 days in Fiscal 2022, 16 days in Fiscal 2023 and 12 days in Fiscal 2024. INDUSTRY OVERVIEW

INDIAN ECONOMY

INTRODUCTION

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodities. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

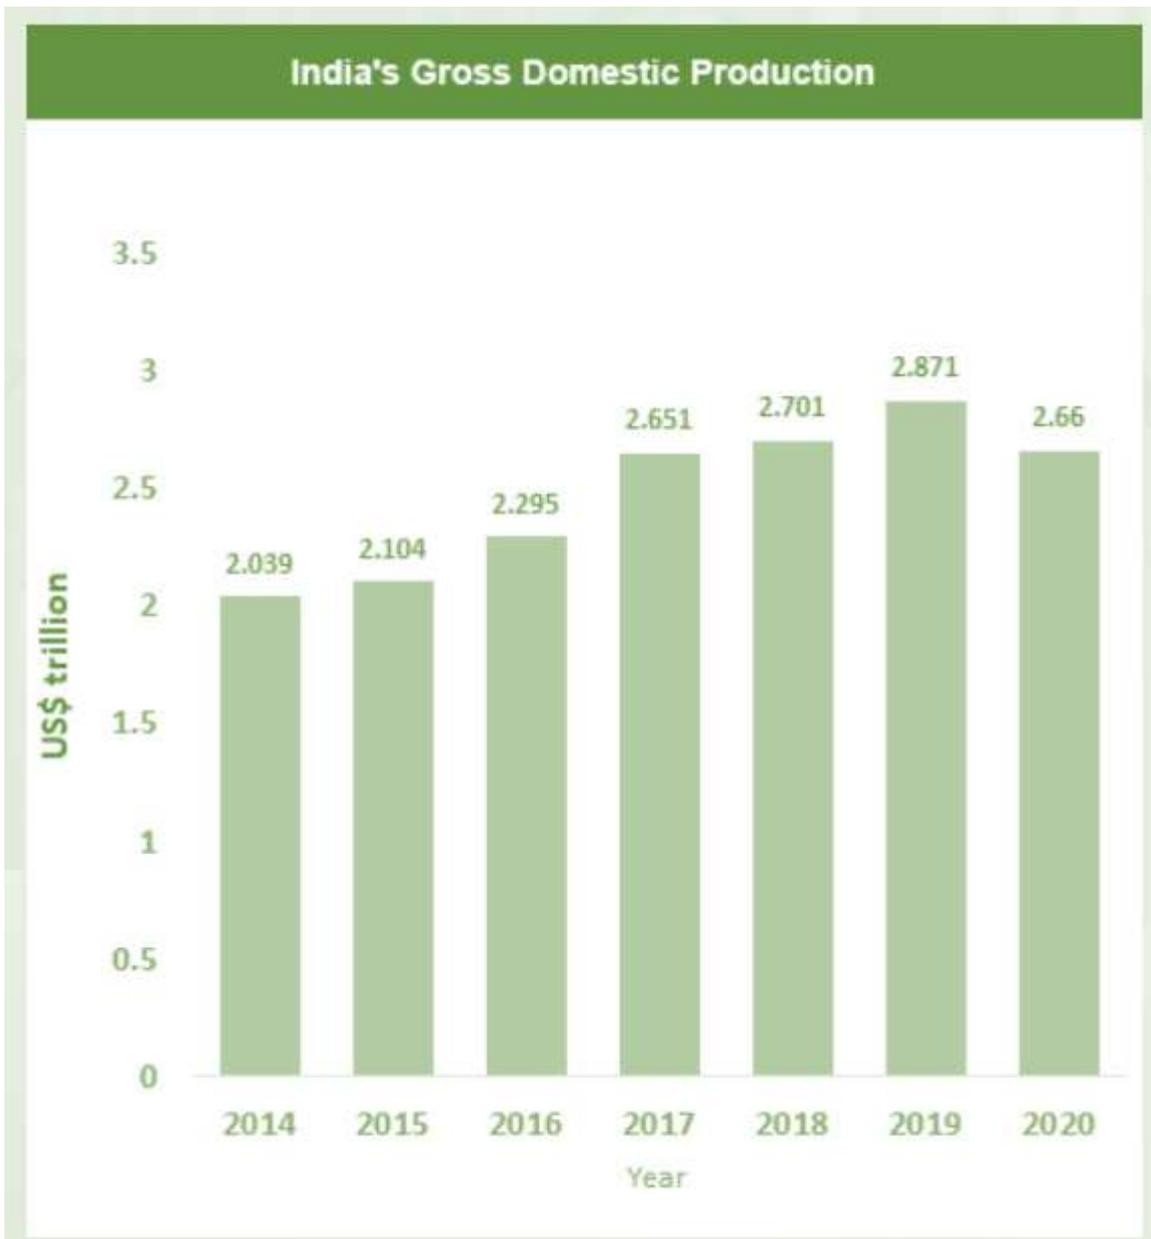

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

MARKET SIZE

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn start-ups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech start-ups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

- Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Our products & service Offerings

Turnkey solutions

As a turnkey solution company, we are a “design-to-delivery” controlled environment infrastructure and cleanroom solutions provider with the ability to provide end to end solution encompassing designing, engineering, procurement, installation, testing, commissioning, management and operational support for a wide range of customers primarily in the pharmaceutical, healthcare, hospital and biotech sector across India and internationally. We undertake such turnkey projects on engineering, procurement and execution basis. As part of such turnkey projects, we are responsible for completing the works by way of achievement of stipulated milestones, adhering to the project completion schedule and complying with the standards and specifications as per the requirements of the client

Following is the detailed flowchart of the project execution:

1. Sales Stage

Under this stage, our marketing and sales team, generate and receive orders. Our team through their experience and good rapport with existing clients owing to timely and quality delivery of service plays an instrumental role

in creating and expanding a work platform for our Company. While evaluating prospective projects, we consider a number of factors including, inter alia, project size and duration, the client's reputation and financial strength, the geographic location of the project and anticipated complexity, our current and projected workload, the likelihood of additional work, the project's cost and profitability estimates and our competitive advantage relative to other likely bidders. After we have evaluated a prospective project and determined that it meets our criteria, depending upon the manner in which said project was sourced, we meet the prospective customer to discuss the project in detail.

2. Planning Stage

We carry out a detailed study of the proposed project, including performing a detailed study of the technical and commercial conditions and requirements of the project followed by a site visit. Our design team carries out basic designing and engineering of the entire project. Based on the design, our team determines requirement of material and manpower required, depending upon the type of contract and the scope of work involved. Project work typically commences once the client approves working designs and issues drawings, wherever applicable. Upon receipt of confirmation, we typically commence pre-construction activities promptly, such as mobilizing manpower and equipment resources and setting up other ancillary facilities. We have a team of engineers who look after the execution of overall project. We also employ temporary onsite employees specifically for our overseas projects. However, planning, designing, procurement and documentations are done at our company's office. Once the requirement of material is identified it is then forwarded to the purchase team for further processing and the planning team allocates the project manager along with the manpower required for the execution of project. Each location / country has an employee designated to coordinate the billing function, who is responsible for preparing and dispatching periodic invoices to the client or the project management consultant, as applicable.

3. Purchase Stage

Based on the requirement received from the planning team, our purchase team plans sourcing of the material required during the execution of the project, depending upon the type of contract and the scope of work involved. As a part of turnkey projects, the company supply third party manufactured products such as wall panels, ceiling panels, covings, riser panels, cleanroom doors, flooring systems, pass boxes, air showers, LT/HT electrical panels. The company also supply pre-fabricated galvanized iron (GI) ducts, air handling units, chillers, Building Management System (BMS), utility generation and distribution, laboratory equipment's and laboratory furniture, etc. All the above-mentioned products are manufactured by third-party domestic vendors or source from third-party reputed brands from domestic market and also import. Once the material is purchased, it is then shipped to the site depending upon location of the project.

4. Project Stage

Once the material reaches the location, our onsite team carries out execution of project. We generally outsource the civil construction work to independent third-party contractors. However, we co-ordinate entire process and procure required material/equipment as per the client's requirement. The execution generally involves installation, testing and commissioning of the project. In order to keep track of the project, our onsite team updates the progress of the project on real time bases. We have a project management system that helps us track the physical and financial progress of work vis-à-vis the project schedule. Progress reports are prepared at the major project sites and sent to the project monitoring cell in the head office, which are reviewed on a weekly and on a monthly basis. Project personnel hold periodic review meetings with the client or project manager consultant, as applicable at the project sites to discuss the progress being made on the project. The project managers also hold periodic meetings with our vendors and sub-contractors. Once the installation and commissioning are concluded, a detailed validation is carried out by the client. We consider a project to be virtually complete when it is ready to be handed over. We then jointly inspect the project with the client to begin the process of handing over the project. Once satisfied, the client prepares a completion certificate. Upon handover, we request the client to release the balance payment that may be outstanding, as per the work contract.

We differentiate ourselves on the basis of the wide range of our product portfolio, quality of our product offerings, our product design and development capabilities and the strength of our relationships with our wide customer base located in the domestic and global market. Since incorporation, our Company has completed around 200 projects in

India and across 15 countries, namely Algeria, Ethiopia, UAE, Ghana, Kenya, Nepal, New Zealand, Nigeria, Saudi Arabia, Sri Lanka, South Africa, Tanzania, Uganda, Zimbabwe, etc. Further, we have generated revenue of ₹ 8,426.28lakhs, ₹9,343.63 lakhs and ₹6,632.27 lakhs from turnkey projects for the Fiscal 2024, Fiscal 2023 and Fiscal 2022, respectively.

Process flow of our business operations is described below:

The typical project lifecycle for our turnkey solution offering is described below:

a) Business Development:

While evaluating prospective projects, we consider a number of factors including, inter alia, project size and duration, the client's reputation and financial strength, the geographic location of the project and anticipated complexity, our current and projected workload, the likelihood of additional work, the project's cost and profitability estimates and our competitive advantage relative to other likely bidders. After we have evaluated a

prospective project and determined that it meets our criteria, depending upon the manner in which said project was sourced, we meet the prospective customer to discuss the project in detail.

Prior to submitting our quotation, we carry out a detailed study of the proposed project, including performing a detailed study of the technical and commercial conditions and requirements of the project followed by a site visit. Our team determines the pricing strategy depending upon the type of contract and the scope of work involved.

b) Mobilisation of Resources and Procurement

Upon receipt and confirmation of work order, our team plans for execution of work order. Resources such as labour, machineries are allocated to work order and resource mobilization starts. Execution work on awarded work order gets commenced with in due timeline along with requisite government approvals. We maintain experienced staff in our purchase department to carry out material, services and equipment procurement for our project sites. Upon award of a contract, the purchase department is provided with the project details along with the budgeted rates for material, services and equipment. The material, services and equipment required for projects are estimated by the engineering personnel from the individual project sites and then passed on to the purchase department along with the schedule of requirements.

We have over the years developed relationships with a number of vendors for key materials, services and equipment. We have also developed an extensive vendor database for various materials and services. The materials ordered are provided to the sites from time to time as per their scheduled requirements. We maintain material procurement, tracking and control systems, which enable monitoring of our purchases. However, in certain projects, our arrangement with our clients may stipulate that the client is responsible for the procurement of few materials or equipment. In such projects, we provide the clients with details of the quantity and quality of the materials required, and mutually agree upon a tentative delivery schedule for such materials.

The ability to procure material, services and equipment in a cost-effective manner, and to meet quality specifications for our projects is essential for the successful execution of such projects. We continually evaluate our existing vendors and also attempt to develop additional sources of supply for most of the materials, services and equipment needed for our projects.

c) Installation and Commissioning

The issuance of a purchase order by the client signifies that we have been awarded the contract. Upon receipt of the letter, we typically commence pre-work activities promptly, such as mobilizing manpower and equipment resources and setting up other ancillary facilities. We execute projects across various sectors, and thus, the methodology of our work depends upon the nature of the project. We generally outsource the civil construction work to independent third-party contractors. However, we co-ordinate entire process and procure required material/equipment as per the client's requirement.

Project work typically commences once the client approves working designs and issues drawings, wherever applicable. The project team immediately identifies and works with the purchase department to procure the key construction materials and services required to commence construction. Based on the contract documents, a detailed schedule of activities is prepared. This schedule identifies interim milestones, if any, stipulated in the purchase order with corresponding time schedules for achieving these milestones. The sequence of construction activities largely follows the construction schedule that was prepared initially, subject to changes in scope requested by the client. The key construction activities involved in a project depend on the nature and scope of the project.

We have a project management system that helps us track the physical and financial progress of work vis-à-vis the project schedule. Progress reports are prepared at the major project sites and sent to the project monitoring cell in the head office, which are reviewed on a weekly and on a monthly basis. Project personnel hold periodic review meetings with the client or project manager consultant, as applicable at the project sites to discuss the progress being made on the project. The project managers also hold periodic meetings with our vendors and subcontractors. Each location / country has an employee designated to coordinate the billing function, who is responsible for preparing and dispatching periodic invoices to the client or the project management consultant, as applicable.

The billing department is also responsible for certifying the bills prepared by our vendors and sub-contractors for particular projects and forwarding the same to our head office for further processing. We consider a project to be virtually complete when it is ready to be handed over. We then jointly inspect the project with the client to begin

the process of handing over the project. Once satisfied, the client prepares a completion certificate. Upon handover, we request the client to release the balance payment that may be outstanding, as per the work contract.

Our ability to effectively manage projects will be crucial to our continued success.

Maximizing Opportunities in Existing Markets and Expanding Footprint in Overseas Markets

We recognise the significance of geographical diversification in our operations and aim to maximize opportunities in our existing markets and concurrently expand our footprint in overseas markets, capitalizing on diverse growth trends both in India and developing markets abroad. Through this approach, we aim to effectively target growth opportunities, broaden our revenue base, and mitigate risks associated with market conditions and price fluctuations resulting from concentration in a specific geographic region. To manage diversification risks, our initial expansion efforts may focus on areas where we can deliver high-quality services, leveraging our strong experience in international markets. We aim to expand our client base in East and West Africa, South Asia and Southeast Asia, Eastern Europe and Eurasia, and Saudi Arabia.

Furthermore, we seek to leverage growth prospects and consolidate our market position in new geographies within developing markets. Gradual diversification of our portfolio will act as a safeguard against risks arising from specific areas or projects and protect us from the impact of concentrated business activities in limited geographical regions. These strategic differentiators, complemented by our expertise in business development, strategic planning, and strong relationships, empower us to fully exploit the potential of existing markets while continuously identifying emerging opportunities.

Our commitment to this strategy allows us to effectively navigate changing landscapes, respond to market demands, and maintain sustainable growth over the long term. By capitalizing on the expected macroeconomic growth in India

and leveraging our international business development capabilities, we are well-positioned to embark on a trajectory of success in both established and emerging markets, driving value for our stakeholders.

Selectively Pursue Large Value and Complex Projects

We plan to focus more on pursuing large value and complex projects that fit our project selection process and risk management framework. We typically do not pursue projects in which we anticipate a significant number of competing bids; since bidders tend to compete primarily based on their pricing for such projects. Further, we target technically complex projects in specialized areas since these projects offer better profit margins compared to less complex endeavours as there are fewer competitors. For example, in our turnkey project vertical, we benefit from our significant experience of having executed over 200 projects in over 15 countries, including projects in India. Our significant experience provides us with a steady stream of opportunities, leading to greater stability and visibility of revenues. Additionally, large, complex projects provide us with publicity and exposure to potential clients, and allow us to distinguish ourselves from other turnkey companies.

COLLABORATIONS, ANY PERFORMANCE GUARANTEE OR ASSISTANCE IN MARKETING BY THE COLLABORATORS

Our Company has not entered into any collaboration, or performance guarantee or assistance for marketing with any Company.

INSTALLED CAPACITY AND CAPACITY UTILISATION

Our Company is engaged in the service sector therefore capacity and capacity utilisation data are not applicable to us.

MARKETING & DISTRIBUTION

We typically send introductory letters to new clients before making pre-qualification applications expressing our intent to register and pre-qualify, allowing prospective clients to familiarize themselves with our capabilities even before evaluating our application. To maintain client relationships and improve our chances to pre-qualify for projects, we prepare client-specific pre-qualification presentation with details of our experience, project portfolio and resources. We also collect project-specific information from public sources, internal records and our network across the engineering and construction sectors, to make informed and informative pre-qualification applications. Additionally, we maintain a business plan that sets out our strategic and long-term goals, and using this, we aim to convey to our clients that their projects are a part of our Company's long-term vision. Finally, after we complete a project, we continue to maintain relationships with former clients to stay abreast of any future projects or awards. We adopt client-wise, location-wise and geography-wise approach for marketing our services. Our marketing team lead by our Promoters works to maintaining the existing clients and acquiring new clients for our services.

PLANT AND MACHINERIES

Being in service industry, plant and machineries related information is not applicable to us.

COMPETITION

We face competition from competitors outside India as well as in the domestic market. Additionally, the competition depends on various factors, such as the type of project, total contract value, potential margins and location of the project. While service quality, technical ability, performance record, experience, health and safety records, the availability of skilled personnel and sufficiency of financial resources are key factors in client decisions among competitors, price is often the deciding factor in most projects being awarded.

We compete with organized players in the industry with better financial position, market share, product ranges, human and other resources and also with unorganised players. Branding and marketing are the key factors in the industry where larger players are in a better position to market their products.

We have continued competing vigorously to capture more market share and manage our growth in an optimal way. To that effect, we have expanded our service offering gradually from being a pure play HVAC contractor to a 'design-to-delivery' controlled environment infrastructure and cleanroom solutions provider.

QUALITY CONTROL, TESTING AND CERTIFICATIONS

We have Quality systems and controls in place as a turnkey solution company with ISO 9001:2015 Quality Management Systems Accreditation, Quality Control Systems as per ROHS Certifications Private Limited. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

Current investments are carried at lower of cost and fair value determined on an individual basis. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

f. PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS

Property, plant and equipment are stated at historical cost less accumulated depreciation, and accumulated impairment loss, if any. Historical cost comprises of the purchase price including duties and non-refundable taxes, borrowing cost if capitalization criteria are met, directly attributable expenses incurred to bring the asset to the location and condition necessary for it to be capable of being operated in the manner intended by management and initial estimate of decommissioning, restoring and similar liabilities.

Subsequent costs related to an item of property, plant and equipment are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are recognized in statement of profit and loss during the reporting period when they are incurred.

An item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. The gains or losses arising from de-recognition are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is de-recognized.

Intangible assets are stated at cost less accumulated amortisation and impairment loss, if any. Property, Plant and Equipments individually costing upto Rs. 5,000 are fully depreciated in the year of purchase.

NOTES TO THE RESTATEMENT

g. DEPRECIATION AND AMORTISATION

Depreciation is calculated using the Written down value method over their estimated useful lives. The estimates of useful lives of PropertyPlant and Equipments are as follows:

Class of Assets	Useful life as per schedule II	Useful Life as per Group
Leasehold Improvements	30 years	30 years
Office equipment	5 Years	5 years
Furniture and fixtures	10 years	10 years
Plant and Machinery	15 years	15 years
Vehicles	8 years	8 years

Leasehold improvements are amortised over of the lease or life of the asset whichever is less.

h. INVENTORIES:

Inventories of traded goods are valued at lower of cost and net realizable value. Cost comprises of all costs of purchase and other costs incurred in bringing the inventories to their present location and condition . Cost formula used is FIFO/weighted average basis.Net realizable value is the estimated selling price in the ordinary course of business, less estimated cost necessary to make the sale.

i. IMPAIRMENT OF ASSETS:

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations are recognised in the statement of profit and loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or cash-generating unit's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

NOTES TO THE RESTATEMENT

j. RETIREMENT BENEFITS:

(i) Short-term employee benefits

Short term employee benefits are recognised as an expense at the undiscounted amount in the statement of Profit and loss for the year which includes benefits like salary, wages, bonus and are recognised as expenses in the period in which the employee renders the related service

(ii) Post employment benefits:

Defined Contribution Plan

'Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognised as an asset to the extent that the pre payment will lead to, for example, a reduction in future payment or a cash refund.

Defined benefit Plans

Unfunded Plan: The Company has a defined benefit plan for Post-employment benefit in the form of Gratuity. Liability for the above defined benefit plan is provided on the basis of valuation, as at the Balance Sheet date, carried out by an independent actuary. The actuarial method used for measuring the liability is the Projected Unit Credit method.

Accumulated leave, which is expected to be utilised within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

'The Company recognises termination benefit as a liability and an expense when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the termination benefits fall due more than 12 months after the balance sheet date, they are measured at present value of future cash flows using the discount rate determined by reference to market yields at the balance sheet date on government bonds.

k. BORROWING COST

Borrowing costs are interest, commitment charges and other costs incurred by an enterprise in connection with Short Term/ Long Term borrowing of funds. Borrowing cost directly attributable to acquisition or construction of qualifying assets are capitalized as a part of the cost of the assets, upto the date the asset is ready for its intended use.  - B. In order to ensure valid Bids, FPIs making multiple Bids using the same PAN, and with different beneficiary account numbers, Client IDs and DP IDs, are required to provide a confirmation along with each of their Bid cum Application Forms that the relevant FPIs making multiple Bids utilize any of the above-mentioned structures and indicate the name of their respective investment managers in such confirmation. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“**FEMA**”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“**RBI**”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”).

The Government of India has from time to time made policy pronouncements on Foreign Direct Investment (“**FDI**”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry (formerly Department of Industrial Policy and Promotion), Government of India (“**DPIIT**”) issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “**Consolidated FDI Policy**”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“**Restricted Investors**”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period

Under the current applicable sectoral cap, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. In the terms of consolidated FDI Policy 2020, issued by the Department of Industrial Policy and Promotion, 100% foreign direct investment in the Company is permitted under automatic route as amended by Press note 4 (2021) series dated October 06, 2021. For further details see “**Key Industry Regulations and Policies**” on page 158.
