Summary of Industry

The Caffeine Anhydrous market has experienced significant growth, with a valuation of USD 622.4 Million in 2023, projected to reach USD 881.5 Million by 2030, showcasing a steady Compound Annual Growth Rate (CAGR) of 6.88% during the forecast period of 2024-2030 (*Source: Exim Trade Data*). This expansion is propelled by the increasing adoption of Anhydrous Caffeine across various end-use verticals, notably in the beverage industry and dietary supplements sector.

Several factors contribute to the expanding Anhydrous Caffeine market, including heightened health awareness, the prevalence of obesity among adults, escalating demand from athletes, and its utilization as supplements for diet and weight loss purposes. The prevalence of obesity and overweight offers has spurred consumer interest in weight loss supplements, thereby strengthening the demand for Anhydrous Caffeine due to its nerve stimulant properties, which have been found beneficial for weight control.

Global demand for Caffeine continues to rise, prompting manufacturers to invest in producing superior quality Caffeine products. Coffee, as one of the world’s most favored beverages, plays a pivotal role in this market dynamic, with coffee beans ranking as the second most heavily traded commodity globally. Notably, consumer preferences are shifting towards low and no-calorie beverages, with increasing emphasis on scrutinizing ingredients like Caffeine and preservatives, as highlighted by a recent survey conducted by the International Food Information Council (IFIC).

Our Company set up a Wholly Owned Subsidiary namely “Shri Ahimsa Healthcare Private Limited”, incorporated on September 28, 2022. Our company plans to invest ₹ 3,500 lakhs out of the Net proceeds of the Issue into our Wholly-Owned Subsidiary to establish a new manufacturing unit.

We intend to utilize portions of the Net Proceeds for Funding capital expenditure requirements as follows:

7.	Working Capital Margin	500.00	0.33	0.00
	Total	6,068.00	450.00	3,500.00

⁽¹⁾ The estimated cost to be incurred is inclusive of GST.

⁽²⁾ Total estimated cost, as per Detailed Project Report (“DPR”) dated August 23, 2024, prepared and issued by M/s Lodha Jain & Company, Independent Chartered Accountants and verified by M/s Jain Vinod & Co. Statutory Auditor in respect of the Proposed Project by way of their certificate dated August 30, 2024.

We have procured quotations from various vendors in relation to the capital expenditure in support of our proposed project. For details in respect of the foregoing, please see “*Objects of the Issue*” on page 97. It is important to note that such quotations have a limited validity period and may be subject to revisions, and other commercial and technical factors. We cannot assure that we will be able to undertake such capital expenditure at the costs indicated by such quotations or that there will not be cost escalations over and above the contingencies proposed to be funded out of the Net Proceeds. Further, the actual amount and timing of our future capital requirements may differ from our estimates due to unforeseen delays or cost overruns, unanticipated expenses, regulatory changes, engineering design changes, technological changes and any other reason.

As on the date of this Draft Red Herring Prospectus, we have placed orders for plant and machinery by giving an advance of ₹ 5.25 Lakhs i.e., approximately 0.13% of the total estimated cost for purchase of plant and machinery. We are yet to place orders for rest of the plant and machineries for an aggregate amount of ₹ 3,824.75 Lakhs. Accordingly, we are yet to place orders for 99.86 % of the total estimated cost in relation to the purchase of plant and machinery.

In the event of any delay in placing the orders, or an escalation in the cost of acquisition of the equipment or completion of the civil and related works, or if the vendors are not able to provide the equipment and services in a timely manner, or at all, we may encounter time and cost overruns. Further, if we are unable to procure equipment and ancillary items or avail services from the vendors from whom we have obtained quotations, we cannot assure that we will be able to identify alternative vendors to provide us with a similar kind of plant and machinery, equipment and ancillary items and services, which satisfy our requirements at acceptable prices. Our inability to procure the machinery equipment and services at acceptable prices or in a timely manner, may result in an increase in capital expenditure, extension or variation in the proposed schedule of implementation and deployment of the Net Proceeds, thereby resulting in an adverse effect on our business, prospects and results of operations. We intend to invest in the latest equipment and technology to support our expanding operations. We also seek to purchase equipment from domestic and foreign manufacturers and continue our strategy of minimal reliance on hired or leased equipment.

4. A significant majority of our revenues from operations are derived from a limited number of customers.

During the Financial Year 2024, Financial Year 2023 and Financial Year 2022, the contribution towards revenue from our single customer as well as that from top 5 and top 10 customers is as follows:

(in ₹ Lakhs)

Particular	For the Financial Year ended on					
	March 31, 2024		March 31, 2023		March 31, 2022	
	Amount	%	Amount	%	Amount	%
Revenue from single customer	5,149.50	65.95%	4,329.00	41.57%	1,866.87	32.16%
Revenue from Top 5 customers	6,631.60	84.93%	8,099.61	77.79%	4,202.48	72.40%
Revenue from Top 10 customers	7,312.94	93.66%	9,269.61	89.02%	5,045.74	86.93%

*As certified by M/s. Jain Vinod & Co. Statutory Auditor, by certificate dated August 30, 2024 bearing UDIN: 24073827BKGTM8339

However, the composition of revenue generated from these customers might change as we continue to add new customers in the normal course of business. Our revenues may be adversely affected if there is an adverse development with such customer, including as a result of a dispute with or our quality issue with such major customers, which may result in significant reduction in our orders from such customers, and thereby decline in our revenue, cash flows and liquidity. Further, if our customers are able to fulfil their requirements through captive or in house manufacturing or any of our existing or new competitors providing products with better quality, or cheaper cost, we may lose significant portion of our business and revenue.

Additionally, consolidation of any of our customers may also adversely affect our existing relationships and arrangements with such customers, and any of our customers who are acquired may cease to continue the businesses that require products manufactured by us or may resort to our competitors for their supply requirements. Further, in the event our customers face any form of adverse effect due to exigent circumstances, resulting in a sustained decline in the demand for their products, including due to macroeconomic factors affecting the economy in general could prompt them to reduce their production volumes, in turn affecting their demand for our products. Our business from our customers is dependent on our continuing relationship with such customers, the quality of our products, and our ability to timely deliver their orders, and there can be no assurance that such customers will continue to do business with us in the future on commercially acceptable terms or at all. While we believe that we have maintained good and long-standing relationships with our customers, however, there can be no assurance that we will continue to have such long-term relationship with them. Significant dependence on a select and small group of customers may increase the potential volatility of our results of operations.

5. We are dependent on third parties for the supply of raw materials and such providers could fail to meet their obligations, which may have a material adverse effect on our business, results of operations and financial condition.

We are dependent on third-party suppliers for our raw materials. The raw materials used by us include Crude Caffeine. Discontinuation of production by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality could hamper our production schedule and therefore affect our business and results of operations. This dependence may also adversely affect the availability of key materials at reasonable prices thus affecting our margins and may have an adverse effect on our business, results of operations and financial condition. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials. If we experience a significant or prolonged shortage of raw materials from any of our suppliers, and are not able to procure the raw materials from other sources in the future, we would be unable to meet our production schedules of our products and to deliver such products to our customers on time, which would adversely affect our sales, margins and customer relations. We cannot assure you that a particular supplier will continue to supply the required components or raw materials to us in the future. Any change in the supply pattern of our raw materials can adversely affect our business and profits.

Further our purchases made from our single supplier, top 5 suppliers and top 10 suppliers, and for the Financial Year ended March 31, 2024, March 31, 2023 and March 31, 2022 are as follows:

(₹ in Lakhs)

Sr. No	Particulars	FY 2023-24		FY 2022-23		FY 2021-22	
		Purchases	%	Purchases	%	Purchases	%
1	Purchases from single supplier	3,492.87	73.21%	2,447.17	64.54%	1,827.46	71.29%
2	Purchases from Top 5 suppliers	4,555.00	95.47%	3,358.43	88.58%	2,394.13	93.39%
3	Purchases from Top 10 suppliers	4,697.35	98.46%	3,756.11	99.07%	2,544.76	99.27%

For further details, please see “Our Business” on page no. 135 of this Draft Red Herring Prospectus.

While we may find additional suppliers to supply these products, any failure of our suppliers to deliver these products in the necessary quantities or to adhere to delivery schedules, credit terms or specified quality standards and technical specifications may adversely affect our business and our ability to deliver orders on time and at the desired level of quality.

As a result, we may lose customers which could have a material adverse effect on our business, financial condition, and results of operations. Further our product supply and pricing may become volatile due to several factors beyond our control, including global demand and supply, general economic and political conditions, transportation and labour unrest, natural disasters, competition, import duties, tariffs and currency exchange rates, and there are inherent uncertainties in estimating such variables. Therefore, we cannot assure that we will be able to procure adequate supplies of our products in the future, as and when we need them on commercially acceptable terms. Further, there can be no assurance that we will be able to effectively manage relationships with our existing or new suppliers or that we will be able to enter into arrangements with new suppliers at attractive terms or at all. If we fail to successfully leverage our existing and new relationships with suppliers, our business and financial performance could be adversely affected

6. *Our cost of production is exposed to fluctuations in the prices of raw material particularly Crude Caffeine and our Company has not entered into any agreement with respect to long-term supply for raw materials required.*

The major raw material used is Crude Caffeine and the expenses incurred to procure this raw material contributes to 52.04%, 33.80%, and 42.11% of revenue from operations as per restated consolidated financial information for the Financial Years ended March 31, 2024, 2023 and 2022. The industry in which we operate is highly fluctuating specially the prices of Crude Caffeine. Further, factors affecting the price, directly or indirectly are beyond the control of our Company. We procure our raw material either from imports and have not entered into any long-term supply agreements with our suppliers. We may have to face the risks associated with compensating for or passing on such increase in our cost of raw material consumed on account of such fluctuations in prices to our customers. If we pass on the increase in the cost of raw material consumed to our customers through a corresponding increase in the price of our products to maintain our historical margins, we may face the risk of our products becoming unaffordable for a particular segment of demography. Upward fluctuations in the prices of raw material may thereby, affect our margins directly or indirectly and have a direct bearing on our profitability, resulting in a material adverse effect on our business, financial condition, and results of operations.

For the financial year ended March 31, 2022:

- i. We draw attention to Note No. 34 of the financial statements regarding non-provision of doubtful debts and advances amounting to ₹23.71 lakhs. We further report that, had this observation made by us herein above been considered, the Profit for the year would have been lower by ₹23.71 lakhs, Reserves and Surplus would have been ₹2178.89 Lakhs instead of ₹2202.60 lakhs, Trade Receivables would have been ₹370.35 Lakhs instead of ₹392.06 Lakhs and Long-Term Loans and Advances would have been ₹38.17 Lakhs instead of ₹40.17 lakhs. This matter was also qualified in our report on the financial statements for earlier years.*

Now the provision for doubtful debts and advances of ₹23.71 Lakhs was made in year ended 31st March, 2022 in the Restated Financial Statements. Therefore, the impact of the above qualification has been considered in Restated Financial Statements.”

For further information, see “**Management’s Discussion and Analysis on the Financial Conditions and Results of Operations - Auditor Observations/ Remarks**” on page no 228 and “**Restated Financial Information**” on page no 192. There can be no assurance that any similar remarks or matters of emphasis/key audit matters will not form part of our financial statements for the future fiscal periods, which could subject us to additional liabilities due to which our reputation and financial condition may be adversely affected.

8. We have experienced growth in the past few years and if we are unable to sustain or manage our growth, our business and results of operations may be adversely affected.

We have experienced growth in the past years with exceptional growth in the year 2023. The details of certain of our financial parameters showcasing this growth over the last three Financial Year ended March 31, 2024, 2023 and 2022 has been set out below:

(in Lakhs)

Particulars	March 31, 2024 (Consolidated)	March 31, 2023 (Consolidated)	March 31, 2022 (Standalone)
Revenue from Operations	7,808.16	10,412.78	5,804.40
EBITDA	2,746.03	5,246.20	1,812.69
Profit for the year after tax	1,870.08	3,820.80	1,102.15

Our growth in the Financial Year 2023 was exceptional and we might not be able to continue to maintain such exceptional growth going forward.

Our growth requires us to continuously invest in our operations, evolve and improve our operational, financial, and internal controls and administrative infrastructure. We may not be able to sustain our growth due to a variety of reasons, including but not limited to, the following:

- a decline in the demand for our products.
- acquiring new customers and increasing/maintaining demand of our products from existing customers
- maintaining the quality levels of our products.
- our ability to maintain high level of customer satisfaction.
- non-availability of raw materials,
- preserving a work culture and environment in our manufacturing facility; and
- a general slowdown in the economy.

A failure to sustain our growth may have an adverse effect on our business, financial condition, results of operations and future prospects. We cannot assure you that our future performance or growth strategy will be successful.

Further, as we scale up and diversify our products, we may not be able to execute our operations efficiently, which may result in delays, increased costs, and lower quality products. Further, if we are unable to increase our production capacity, we may not be able to successfully execute our growth strategy. Our failure to manage our growth effectively may have an adverse effect on our business, financial condition, results of operations and future prospects.

9. We are subject to risks resulting from foreign exchange rate fluctuations, which could adversely affect our results of operations.

Substantial purchase of raw materials is procured from foreign countries. Our export sales are also in foreign currencies, primarily the U.S. dollar and Euro. Foreign currencies have fluctuated in the past and our cost of raw materials and results of operations may be impacted by such fluctuations. As we aim to increase our export sales, our operating expenses in connection with our operations outside India will be increasingly denominated in currencies other than Indian Rupees. Any fluctuations in the foreign currency exchange rates may have an adverse impact on our results of operations.

The exchange rate between the Indian Rupee and other foreign currencies has changed considerably in recent years and may further fluctuate in the future. Such fluctuations in currency exchange rates may impact our results of operations. Based on our overseas business operations, we primarily deal in U.S. dollar and Euro. We have not adopted foreign exchange risk mitigation measures and we bear the complete risk of currency exchange rate fluctuations. We are affected by fluctuations in exchange rates and we cannot assure you whether future hedging or other risk management strategies will be effective. Our foreign

currency exposures, exchange rate fluctuations between the Indian Rupee and foreign currencies, especially the U.S. dollar and Euro, may have a material impact on our results of operations, cash flows and financial condition.

10. We do not own some of the business premises where our, Registered Office, Offices and Manufacturing Facility, Storage & Warehouse facilities are located.

Our premises on which our Registered Office and Manufacturing Facility is situated is taken on lease for a period of 99 years. Also, the other premises used by our Company for our business purposes are taken on lease/rent basis. For more details on properties taken on lease by our Company, see “**Our Business**” on page 135. If any such lease/rent agreements under which we occupy the premises are not renewed on terms and conditions that are favourable to us, or at all, we may suffer a disruption in our operations which could have a material adverse effect on our business, financial condition and results of operations. If we do not comply with certain conditions of the lease, the lessor may terminate the lease, which could have an adverse effect on our operations. While we have not experienced any issue in renewing the lease arrangement in the past, there can be no assurance that renewal of lease/rent agreements with the owner will be entered into.

In the event of non-renewal of lease/rent arrangements, we may be required to shift our business premises to a new location and there can be no assurance that the arrangement we enter into in respect of new premises would be on such terms and conditions as the present one.

11. Our Company is required to comply with certain conditions under approvals, applicable laws and regulations as an Export Oriented Unit (EOU). The non-fulfillment of which may expose Company to penalties and affect our business operations and our financial condition.

Our unit is an Export Oriented Unit (EOU) and majority of the production is exported (including deemed exports). Under the terms of the EOU, our Company is required to comply with certain conditions, including specified export obligations and a positive Net Foreign Exchange (NFE).

While we are currently in compliance with the requirement of NFE as on date of this DRHP. Failure to meet these conditions may result in duties and penalties against our Company under the provisions of the Foreign Trade (Development and Regulation) Act, 1992 and the rules and regulations made thereunder, which may have an adverse effect on Company's business and results of operations.

12. We intend to utilise a portion of the Net Proceeds for Investment in Wholly Owned Subsidiary which is setting up a manufacturing unit (“Proposed Project”) which have not been appraised by any independent agency and are based on third-party consultants and may be subject to change based on various factors, some of which are beyond our control.

We intend to utilise a portion of the Net Proceeds for funding Investment in Wholly Owned Subsidiary which is setting up a manufacturing unit (“Proposed Project”). For further details, see “**Our Business – Proposed Project**” on page 135. The same have not been appraised by any independent agency and are based on our estimates and third-party consultants, which are subject to change in the future. Our capital expenditure plans are subject to a number of variables, some of which may be beyond our control, including the changes in costs, our financial condition, business and strategy or external circumstances such as market conditions.

The costs of the project have been estimated in the DPR issued by M/s Lodha Jain & Company, Chartered Accountants based on the consultations and supportings as provided by the Wholly Owned Subsidiary. The cost of the project may escalate due to various factors which are beyond our control. Such estimates may be revised from time to time and consequently our funding requirements may also change. Such estimates may exceed the value that would have been determined by third party appraisals and may require us to reschedule our expenditure which may have a bearing on our expected revenues and earnings.

13. Our business is dependent on our manufacturing facilities, and we are subject to certain risks in our manufacturing process, any disruption, breakdown or shutdown of our Manufacturing Facilities may have a material adverse effect on our business, financial condition, results of operations and cash flow

Our Manufacturing Facilities, are subject to the normal risks of industrial production, including equipment breakdowns, labour stoppages or disputes, shortage of skilled labour, natural disasters, directives from government agencies, water shortages, power interruptions, performance below expected levels of output or efficiency, obsolescence, severe weather, industrial accidents, our inability to respond to technological advances and emerging industry standards and practices in the industry. The Company is taking due care of the medical and other requirement of the said worker in due compliance with the applicable laws and need to comply with the directives of relevant government and regulatory authorities.

Our business is dependent upon our ability to manage our manufacturing facilities and run them at certain utilization levels, which are subject to various operating risks, including those beyond our control, such as the breakdown and failure of equipment, industrial accidents, labour disputes or shortage of labour, severe weather conditions and natural disasters. While there have been no such instances in the past, any significant malfunction or breakdown of our machinery, our equipment, our automation systems, our IT systems or any other part of our manufacturing processes or system (together, our “Manufacturing Assets”) may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair Manufacturing Assets in a timely manner or at all, our operations may need to be suspended until we procure the appropriate Manufacturing Assets to replace the same and we cannot assure you that the new Manufacturing Assets will be procured and/or integrated in a timely manner. In addition, we may be required to carry out planned shutdowns of our facilities for maintenance, statutory inspections, testing and equipment upgrades.

As our customers rely significantly on the timely delivery of our products, uninterrupted power supply, supply of trained and skilled manpower, availability of raw materials and our ability to carry on interruption-free production of our products is critical to our business. Further, our electricity requirements for our manufacturing facilities are directly sourced from local utilities. While we maintain power backup in the form of diesel generator sets, we cannot assure you that we will successfully be able to prevent disruptions in our manufacturing processes in case of non-availability of adequate supply of power.

Further, any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair the malfunctioning machinery in a timely manner or at all, our operations may need to be suspended until we procure machinery to replace the same and we may be subject to manufacturing disruptions due to contraventions by us of any of the conditions of our regulatory approvals, which may require our manufacturing facilities to cease, or limit, production until the disputes concerning such approvals are resolved. While we have not experienced such instances, in the event such instances occur in the future, it may have an adverse effect on our business, financial condition and results of operations.

Presently, we have one Manufacturing Facility which is located within the periphery of Jaipur, Rajasthan and new Manufacturing Facility proposed to be set up by our Wholly Owned Subsidiary will also be in Jaipur, Rajasthan. We are dependent on our Manufacturing Facility for the production of our products and therefore, events impacting state of Rajasthan may disrupt our production and operations.

14. Our Promoter has provided personal guarantees for our loans and any failure or default by us to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations, which may adversely affect our Promoters’ ability to manage our affairs.

We have obtained loans in the ordinary course of business for the purposes of working capital and other business requirements. Our Promoter Mr. Nemi Chand Jain, Mrs. Sumitra Jain, Mr. Amit Kumar Jain has issued personal guarantees in relation to certain of borrowings of our Company. For details, see “*History and Certain Corporate Matters*” and “*Statement of Financial Indebtedness*” on pages 160 and 227, respectively. Our Promoter may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the guarantees provided by our Promoter may be invoked, which could negatively impact the reputation and net worth of our Promoter. In addition, our Promoter may be required to liquidate its shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company. Furthermore, in the event that our Promoter withdraws or terminates his guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities.

We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

15. We have had negative cash flows in the past. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

We have experienced negative cash flows and may, in the future, experience negative cash flows. The following table sets forth certain information relating to our cash flows for the periods indicated below:

(₹ in Lakhs)

Particulars	For the Financial Year ended on (Standalone)		
	March 31, 2024	March 31, 2023	March 31, 2022

As a result, our business, financial condition and results of operations could be materially and adversely affected.

16. Our Company has not complied with certain financial covenant of the financing facility and debt facility in past.

In the past, there had been one instance where our Company was unable to service interest payments and principal repayments on time due to our inability to pay to State Bank of India (“SBI”). In the year 1996, our Company had availed Cash Credit Limit, Export Bills and L/C facilities from SBI for an amount of ₹47 Lakhs against mortgage of properties. The same was settled under SBI OTS SME 2010 Scheme and the entire compromise amounts was paid. SBI has issued a No Dues Certificate dated May 13, 2010. There was no such instances thereafter, however we cannot assure you that no such instances will take place in the future. Furthermore, such events could adversely impact our business, results of operations, cash flows and financial condition.

If such claims are determined against Company, our Promoters and Directors, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares.

Furthermore, we may not be able to quantify all the claims in which we are involved. Failure to successfully defend these or other claims or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subjected to legal and other costs relating to defending such litigation, and such costs could be substantial. 18. We may not be able to successfully manage the growth of our operations and execute our growth strategies which may have an adverse effect on our business, financial condition, results of operations and future prospects.

As we continue to grow, we must continue to improve our managerial, technical and operational knowledge and allocation of resources, and implement an effective management information system. In order to fund our ongoing operations and future growth, we need to have sufficient internal sources of liquidity or access to additional financing from external sources, including debt or equity. Further, we will be required to manage relationships with a greater number of customers, suppliers, distributors, service providers, lenders and other third parties. We will need to further strengthen our internal control and compliance functions to ensure that we will be able to comply with our legal and contractual obligations and minimize our operational and compliance risks. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business and operations and training an increasing number of personnel to manage and operate the expanded business. There can be no assurance that we will be able to successfully manage our growth, strategies or that our expansion plans will not adversely affect our existing operations and thereby have an adverse effect on our business, financial condition, results of operations and prospects.

Further, we could also encounter difficulties and delays in executing our growth strategies due to a number of factors, including, unavailability of human and capital resources, inability to develop adequate systems, infrastructure and technologies, delayed payments or non-payments by customers, failure to correctly identify market trends, increase in cost of raw material, fuel, labour etc. There can be no assurance that we will be able to execute our growth strategy on time and within the estimated costs, or that we will meet the expectations of our customers.

19. We are dependent upon the business experience and skill of our promoters, key managerial personnel and senior management personnel. Loss of our Senior Management or our inability to attract or retain such qualified personnel, could adversely affect our business, results of operations and financial condition.

We believe that our Promoters have played a key role in the development of our business and we benefit from their industry knowledge and expertise, vision and leadership. Our Promoters namely Mr. Nemi Chand Jain, Mr. Amit Kumar Jain, and Mr. Sumit Jain have strong operational knowledge, and good relationships with our customers in the line of business in which Company operates. In addition to our Promoters, our key management and senior management team includes qualified, experienced and skilled professionals who possess requisite experience across various division of our business. We believe the stability of our management team and the industry experience brought on by our individual Promoters enables us to continue to take advantage of future market opportunities. We believe that our senior management team is well qualified to leverage our market position with their collective experience and knowledge in the industry, to execute our business strategies and drive our future growth.

Our ability to meet continued success and future business challenges depends on our ability to attract, recruit and retain experienced, talented and skilled professionals. The loss of the services of our key personnel or our inability to recruit or train sufficient number of experienced personnel or our inability to manage the attrition levels in different employee categories may have an adverse effect on our financial results and business prospects. We have not faced any attrition of key managerial personnel and senior management personnel in the last three (3) financial years. However, we cannot assure that there will be no attrition of our senior management personnel in the future.

If we are unable to hire additional qualified personnel or retain them, our ability to expand our business may be impacted. Our Company's profitability, financial condition and results of operations may also be impacted due to lack of experienced and talented workforce. Senior management attrition may also result in our Company incurring higher costs, including the cost of recruiting and costs associated with onboarding. As we intend to continue to expand our operations, we will be required to continue to attract and retain experienced personnel. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting suitable employees.

20. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, any failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations may adversely affect our operations.

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are subject to periodical renewal. Any failure to renew the approvals that may expire, or to apply for the required approvals, licences, registrations or permits, or any suspension or revocation of any of the approvals, licences, registrations and permits that have been or may be issued to us, could result in delaying the operations of our business, which may adversely affect our business, financial condition, results of operations and prospects.

Further, in order to comply with various applicable local laws, we have made a few applications for obtaining requisite approvals. For further details, see "**Government and Other Statutory Approvals**" on pages 279.

Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals which may result in the interruption of our operations and may have a material adverse effect on our business, financial condition, cash flows and results of operations. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, see "**Key Industry Regulations and Policies in India**" and "**Government and Other Statutory Approvals**" for permits/licenses required for the business on pages 153 and 279 respectively.

21. We have in past entered into related party transactions and we may continue to do so in the future

As of March 31, 2024, we have entered into several related party transactions with our Promoter. In addition, we have in the past also entered into transactions with other related parties. We confirm that the transactions with Related Parties entered into by our Company in the preceding three years have been carried out at arms' length price and are in compliance with applicable laws. Further, we confirm that the transactions are not prejudicial to the interest of our Company. A summary of the related party transactions in Financial Year 2024, 2023 and 2022 as per applicable Ind GAAP is derived from our Restated Financial Statements. For further details, see "**Restated Financial Information**" on page 121.

While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

22. An inability to renew quality accreditations in a timely manner or at all, or any deficiencies in the quality of our products may give rise to product liability claims and negatively affect our business prospects and financial performance.

We obtain and maintain quality certifications and accreditations from independent certification entities and also comply with prescribed specifications and standards of quality approved by certification issuing agencies. For further details, see "**Government and Other Approvals**" on page 248.

If we fail to comply with applicable quality standards or if we are otherwise unable to obtain such quality accreditations in the future in a timely manner or at all, our business prospects and financial performance may be negatively affected.

Further, if our products are alleged or found to be defective, we may be subject to product liability claims. There could be instances in which our products do not meet the specifications. We have, at some times, encountered certain claims with respect to the quality of our products and we may be subject to product liability claims and litigation for compensation in the future also which could result in substantial and unexpected expenditure and could materially affect our cash flow and operating results. Further, there can be no assurance that we will be able to successfully defend such claims. If any such claims against us are ultimately successful, we could be required to pay substantial damages, which could materially and adversely affect our business, financial condition, results of operations and cash flows.

23. We generally do business with our customers on a purchase order basis and our customers do not make long-term commitments with us and may cancel or change their production requirements. Such cancellations or changes may adversely affect our financial condition, cash flows and results of operations.

We primarily follow a business-to-business model which is purchase order based. While we have long standing relationships with various of our customers, we generally do not enter into long-term arrangements, or arrangements with firm commitments of quantities with such customers, and do not have clear visibility as to their future demand for our products. Our customers may cancel, change or delay production quantities and schedules, or fail to meet their forecasts for a number of reasons beyond our control. Our customer's expectations can also change rapidly, requiring us to take on additional commitments or risks. In addition, customers may fail to meet their payment commitments to us. Cancellations, reductions or delays by a significant customer, or by a group of customers, could adversely affect our operating results and negatively affect our working capital levels.

Further, we are not necessarily be the exclusive supplier to our customers and our competitors may also be supplying their products to our customers. The absence of long-term arrangements, or arrangements with firm commitments of quantities from our customers and the possibility of rapid changes in demand for their products affect our ability to accurately estimate their future requirements. Considering that certain of our operating expenses are fixed, a reduction in customer demand can harm our operating results. Moreover, because our margins vary across customers and specific programs, a reduction in demand with higher margin customers can have a more significant adverse effect on our operating results. Low utilization of our manufacturing facilities could also result in our realizing lower margins.

24. Our inability to accurately forecast demand or price for our products and manage our inventory may adversely affect our business, results of operations, financial condition and cash flows.

Our business depends on our estimate of the demand for our products from customers. We estimate demand for our products based on past sales and advance purchase order. If we overestimate demand, we may purchase more raw materials and manufacture more products than required. If we underestimate demand, we may manufacture fewer quantities of products than required, which could result in delayed or non-fulfilment of purchase orders resulting in loss of customers, goodwill and business. In addition, if our products do not achieve widespread acceptance or our customers, change their procurement preferences, we may be required to incur significant inventory markdowns or may not be able to sell the products at all, which would affect our business, results of operations and financial condition. As such, our inability to accurately forecast demand for our products and manage our inventory may have an adverse effect on our business, results of operations, cash flows and financial condition.

25. Our Company will not receive any proceeds from the Offer for Sale portion, and the Promoter Selling Shareholders shall be entitled to the Offer Proceeds to the extent of the Equity Shares offered by them in the Offer for Sale.

The Offer includes an offer for sale of 20,00,000 Equity Shares which comprise of 10,00,000 Equity Shares each by Promoter Selling Shareholders(s) i.e. Mr. Nemi Chand Jain and Mrs. Sumitra Jain. The Promoter Selling Shareholders are, therefore, interested in the Offer Proceeds to the extent of the Equity Shares offered by them in the Offer for Sale. The entire proceeds (net of applicable offer related expenses) from the Offer for Sale will be paid to the Promoter Selling Shareholders in proportion to their respective portions of the Offered Shares transferred pursuant to the Offer for Sale, and our Company will not receive any such proceeds. See “*Objects of the Issue*” on page 97.

26. We have availed unsecured loans which are repayable on demand. Any demand for repayment of such unsecured loans, may adversely affect our cash flows.

As on March 31, 2024, we have unsecured loans amounting to ₹ 118.45 lakhs which are repayable on demand. Further, these loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender (such lenders being Related Party) at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows. For further details of unsecured loans of our Company, see “*Statement of Financial Indebtedness*” on page 227.

27. Our lender has charge over our movable and immovable properties in respect of finance availed by us.

We have provided security in respect of loans / facilities availed by us from bank by creating a charge over our movable and immovable properties. The total amount outstanding and payable by us as secured loans was ₹1,264.33 lakhs, as on March 31, 2024. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our assets may be subject to forfeiture by lenders, which in turn could have significant adverse effect on our business, financial condition or results of operations. For further details of the secured loans availed by us, see “*Statement of Financial Indebtedness*” on page 227.

28. We have identified certain inaccuracy, delayed and incorrect filings that are required to be made with the Registrar of Companies (RoC) by our Company and our Wholly-Owned Subsidiary Company.

There have also been instances wherein the disclosures made in the statutory filings done under Companies Act, 2013 are incomplete or erroneous in nature for instance the number of shareholders and categorization of Directors in the annual filings. Furthermore, some attachments which were required to be attached in the forms filed were not attached by the Company. Also, the few attachments were not duly signed and stamped by the requisite authority.

Although the late filing fees levied are small but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. It is important to note that as of now, no show cause notices have been issued against our Company and our Wholly-Owned Subsidiary company in relation to the aforementioned matters. However, in the event that the relevant authorities take cognizance of these issues, actions may be initiated against our Company, our Wholly-Owned Subsidiary company and its Directors. Such actions could have implications on the financials of our Company, our Wholly-Owned Subsidiary company and our Directors.

Furthermore, as we expand our operations, there is no guarantee that deficiencies in our internal controls and compliance will not arise. We cannot assure that we will be able to effectively implement and consistently maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls, whether in a timely manner or at all.

29. Information relating to the installed production capacity and capacity utilization of our production Units included in this Draft Red Herring Prospectus are based on various assumptions and estimates and future production and capacity may vary.

Information relating to the installed manufacturing capacity of our manufacturing facilities and capacity utilization included in this Draft Red Herring Prospectus are based on various assumptions and estimates of our management, and the capacities of principal and ancillary equipment used in the manufacture of our products. For details of capacity utilisation, see **“Our Business – Capacity utilisation”** on page 135.

While we have relied on certificate issued by Er. K. S Saini, Chartered Engineer, obtained by our Company and utilization is calculated by dividing actual production, in relation to such annual installed capacity of our manufacturing facilities and capacity utilisation, future capacity utilisation may vary significantly from the estimated production capacities of our manufacturing facilities and historical capacity utilisation. For further information, see “**Our Business – Our Manufacturing Facilities**” on page 135. Further, the installed capacity, capacity utilisation and other related information may not be computed on the basis of any standard methodology that is applicable across the industry and therefore may not be comparable to capacity information that may be computed and presented by other comparable companies in the industry in which we operate.

Accordingly, actual production levels and rates may differ significantly from the installed capacity information of our facilities or historical installed capacity information of our facilities depending on the product type. Undue reliance should therefore not be placed on our historical installed capacity information for our existing facilities included in this Draft Red Herring Prospectus.

30. There has been certain non-compliance with labour laws by our Company. Consequently, we may be subject to regulatory actions and penalties for such non-compliance and our business and financial condition may be adversely affected.

In accordance with the Payment of Bonus Act, 1965 (“Bonus Act”), and the Payment of Bonus Rules, 1975 (“Bonus Rules”), Our Company is required to file the annual return of the bonus paid to its employees in Form D on the web portal of the Central Government’s Ministry of Labour and Employment on or before February 1st, every year. Our Company has paid the bonus to its employees, but has not filed the required form for previous years. This annual report must contain details such as the number of cases of sexual harassment filed during the year, the number of cases disposed of, the nature of action taken by the employer, and any measures implemented for awareness and prevention, etc. Our Company has not filed the Annual Report in the previous years. Instead, the required annual reports for previous years were submitted to on District Collector, Jaipur on August 28, 2024, resulting in a non-compliance and/or delay in the compliance under Section 21 and Section 22 of the POSH Act. Therefore, such non-compliance and/or delay in compliance with the provisions of POSH Act, our Company may be subject to regulatory actions and/or penalties under the POSH Act, which could adversely impact our operational and financial stability.

31. Our business is dependent on the delivery of adequate and uninterrupted supply of electrical power and water at a reasonable cost and any shortage, disruption or non-availability of power and water may adversely affect our entire processing requirements and have an adverse impact on our business, results of operations and financial condition.

Adequate and cost-effective supply of electrical power and water is critical to our operations. The power requirement for our Manufacturing Facilities is sourced from the Jaipur Vidyut Vitran Nigam Ltd. We maintain power back-ups through DG Sets to ensure unhindered production, in case of power cuts by the local electricity providers. However, an interruption in or limited /supply of electricity may result in suspension of our operations. A prolonged suspension in production could materially and adversely affect our business, financial condition or results of operations. Further, if the per unit cost of electricity is increased, our power costs will increase. It may not be possible to pass on any increase in our power costs to our customers, which may adversely affect our profit margins.

Our operations and facilities are especially dependent on a steady and stable supply of water which we source from local connection. Any irregular or interrupted supply of water could adversely affect our daily operations. For details, see “**Our Business**” on page 135. If there is an insufficient supply of water to satisfy our requirements or a significant increase in prices, we may need to limit or delay our production, which could adversely affect our business, financial condition and results of operations. We cannot assure you that we will always have access to sufficient supply of power and water in the future to accommodate our requirements and planned growth. Accordingly, any increase in power costs and water costs could adversely affect our profitability.

Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. Most of the raw material and finished products are transported to and from our manufacturing unit by third party transportation providers. Transportation strikes could have an adverse effect on our receipt of goods and our ability to deliver our products to our customers. Non availability of ships, containers and trucks could also adversely affect receipt of goods and the delivery of our products. Further, disruptions of transportation services due to weather-related problems, strikes, lockouts, inadequacies in the road infrastructure, or other events could impair ability to procure raw materials on time. Any such disruptions could materially and adversely affect our business, financial condition, and results of operations.

Customers may demand, among others, price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, any of which may have an adverse effect on our business, results of operations and financial condition. Cancellations, reductions or instructions to delay manufacturing (thereby delaying delivery of products manufactured by us) by a significant customer could adversely affect our results of operations by reducing our sales volume, as well as by possibly causing delay in our customers' paying us for the order placed for purchasing the inventory with us which we would have manufactured for them.

37. Our management will deploy net proceeds pending utilization for objects to issue in scheduled commercial banks and there is no assurance that the objects of the Issue will be achieved within the time frame expected or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment. Any variation in the utilisation of the Net Proceeds or in the terms as disclosed in the Draft Red Herring Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.

We intend to use the Net Proceeds for (i) Investment in our Wholly Owned Subsidiary, Shri Ahimsa Healthcare Private Limited for setting up a manufacturing unit ("**Proposed Project**"); and (ii) general corporate purposes. The deployment of the Net Proceeds is based on management estimates, current circumstances of our business and prevailing market conditions and has not been appraised by any bank, financial institution or other independent institution. We may have to revise our funding requirements and deployment from time to time due to various factors, such as changes in costs, financial and market conditions, business and strategy considerations and interest and exchange rate fluctuations or other external factors, which may or may not be within the control of our management. This may entail rescheduling and revising planned expenditure and funding requirements and increasing or decreasing expenditures for a particular purpose from planned expenditures at the discretion of our management and subject to applicable law. Our Company has not appointed any monitoring agency for this Offer. However, pursuant to Regulation 32(3) of the SEBI LODR Regulations, 2015, our Company shall on a half yearly basis disclose to the Audit Committee the uses and application of the Net Proceeds. Accordingly, investors in Equity Shares will be relying on the judgment of our management regarding the application of the Net Proceeds. The application of Net Proceeds in our business may not lead to an increase in the value of your investment.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds or in the terms of any contract as disclosed in this Draft Red Herring Prospectus without obtaining the Shareholders' approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders' approval may adversely affect our business or operations.

Further, our Promoters would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders may deter the Promoters from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in our interest. This may restrict our ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of the Net Proceeds, if any, or varying the terms of any contract, which may adversely affect our business and results of operations.

Various risks and uncertainties, including those set forth in this section "**Risk Factors**", may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in our business. For details see, "**Objects of the Issue**" on page 96.

38. We may not be able to protect our trademarks from infringement.

We have not registered our " AHIMSA" brand name and logo as registered trademarks in India. Although we take steps to monitor the possible infringement or misuse of our trademarks, it is possible that third parties may infringe, dilute or otherwise violate our trademark rights. Any unauthorized use of our trademarks could harm our reputation or commercial interests. In addition, our enforcement against third-party infringers or violators may be unduly expensive and time-consuming, and any remedy obtained may constitute insufficient redress relative to the damages we may suffer. For details, see chapter titled "**Government and Other Approvals**" on page 248.

However, non-availability of these documents does not have any impact on the business and operations of the Company.

41. Relevant copy of Domain Registration Certificate of the Company is not available / traceable.

Relevant copies of the Domain Registration Certificate of the Company, is not available / traceable. In accordance with the disclosure requirements in section "**Approvals obtained by our Company in relation to our Business and Operations**", with respect Domain Registration, we have relied on Domain Purchase Bill provided by the Company for the purpose of disclosure under the chapter titled "**Government and other Statutory Approvals**" on beginning page 279 of this Draft Red Herring Prospectus.

42. *If we are subject to any frauds, theft, or embezzlement by our employees, suppliers or customers, it could adversely affect our reputation, results of operations, financial condition and cash flows.*

Our operations may be subject to incidents of theft. We may also encounter some inventory loss on account of employees/ supplier/ customer fraud, theft, or embezzlement. Although we have set up various security measures in our units such as deployment of security guards and operational processes such as periodic stock taking, there can be no assurance that we will not experience any fraud, theft, employee negligence, loss in transit or similar incidents in the future, which could adversely affect our reputation, results of operations, financial condition and cash flows.

Additionally, in case of losses due to theft, fire, breakage or damage caused by other casualties, there can be no assurance that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. If we incur a significant inventory loss due to third- party or employee theft and if such loss exceeds the limits of, or is subject to an exclusion from, coverage under our insurance policies, it could have an adverse effect on our business, results of operations and financial condition. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

43. *Our insurance may be insufficient to cover all losses associated with our business operations.*

Our insurance policies currently cover our inventories at manufacturing facility, secure rooms, transit, theft and while being handled by our employees, including with respect to fire, burglary, special perils and vehicles. Notwithstanding the insurance coverage that we carry, we may not be fully insured against abnormal business risks. There are many events that could significantly impact our operations, or expose us to third-party liabilities, for which we may not be adequately insured. There can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. To the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our business, financial condition and results of operations could be adversely affected. For details, see chapter titled “*Our Business*” on page 135.

44. *We may be subject to unionization, work stoppages or increased labour costs, which could adversely affect our business and results of operations.*

Our industry is labour intensive. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. The success of our operations depends on availability of labour and maintaining a good relationship with our workforce. As of date of DRHP, we employed about 80 employees. Our labour force is not unionized. However, in the event that employees seek to unionize, it may become difficult for us to maintain flexible labour policies, which may increase our costs and adversely affect our business. A potential increase in the salary scale of our employees because of organization or unrest, or a disruption in services from our employees due to potential strikes, could adversely affect our business operations and financial condition. In the past three years, we have not experienced any labour dispute. We do not have any formal policy for redressal of labour disputes. Although we have not experienced any major interruption to our operations as a result of labour disputes in the recent past, there can be no assurance that we will not experience any such disruption in the future as a result of disputes or disagreements with our work force, which may adversely affect our ability to continue our business operations. We may also have to incur additional expense to train and retain skilled labour. We are also subject to a number of stringent labour laws that protect the interests of workers, including legislation that imposes financial obligations on employers upon retrenchment. There can be no assurance that we will not experience labour unrest in the future, which may delay or disrupt our operations. Any labour unrest including labour disputes, strikes and lockouts, industrial accidents, experienced by us could directly or indirectly prevent or hinder our normal operating activities and, if not resolved in a timely manner, could lead to disruptions in our operations. In the event of any prolonged delay or disruption of our business, results of operations and financial condition could be materially and adversely affected.

45. *If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report, our financial risks.*

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. There can be no assurance that deficiencies in our internal controls will not arise in the future, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls. Any inability on our part to adequately detect, rectify or mitigate any such deficiencies in our internal controls may adversely impact our ability to accurately report, or successfully manage, our financial risks, and to avoid fraud.

46. *We have not entered into any formal arrangement for technical support service for maintenance and smooth functioning of our equipment's and machineries, which may affect our performance.*

Our manufacturing processes involve daily use of technical equipment's and machineries. They require periodic maintenance checks and technical support in an event of technical breakdown or malfunctioning. Our Company has not entered into any formal technical support service agreements with a competent third-party vendor. However, Company has an in-house team for maintenance and advancement of machinery. Our failure to reduce the downtime in as such events occur may adversely affect our productivity, business and results of operations.

47. *All of our directors do not have any prior experience of being a director in any other listed company in India.*

Our current Board comprises of Eight (8) Directors which includes Chairman and Managing Director, Two (2) Whole-Time Directors, Four (4) Non-Executive Independent Directors and One (1) Non-Executive Non-Independent Director. Except for Shri Om Prakash Bansal (Independent Director) none of our Board of Directors have any prior experience of being a Director in any other listed company in India. While our Board members have relevant experience in their respective field, not having any prior experience as being a director in any other listed company in India may present some potential challenges to our Company in effectively meeting with good corporate governance norms and practices. Additionally, having lack of such experience amongst the board of directors may impact our Company's credibility and reputation among the investors and other stakeholders. For further details, please see chapter titled "***Our Management***" on page no. 164.

48. *The inability to protect, strengthen and enhance our existing reputation could adversely affect our business prospects and financial performance.*

Our business reputation is critical to the success of our business. While we have been making consistent efforts to strengthen our image, various factors, some of which are beyond our control, are critical for maintaining and enhancing our reputation and if not managed properly, may negatively affect our brand and reputation. These include our ability to effectively manage the quality of our products, increase brand awareness among existing and potential customers, adapt our advertising and promotion efforts to emerging industry standards and protect the intellectual property related to our brand.

Our success in marketing our existing and new products depends on our ability to adapt to a rapidly changing marketing and media environment, including our increasing reliance on direct promotional initiatives. There can be no assurance that our marketing efforts will be successful in maintaining our reputation and its perception with customers and/ or result in increased sales in the future. Also, we may not necessarily increase or maintain our sales promotion spending in proportion to our growth in the future, which may result in limited marketing initiatives. Our inability to adapt to evolving marketing trends at the same pace as our competitors may adversely affect our ability to effectively compete in terms of our image value.

Our reputation could also be negatively impacted if we fail to maintain our established standards of service, or if our products fail to meet the expectation of our customers. Any allegations of deterioration in product quality even when false or unfounded, could tarnish our image and may cause our customers to choose other competing products. Any negative publicity regarding us, our reputation, our products or the stones industry generally could adversely affect our business and our results of operations. Other risks associated with our industry include improper disclosure of proprietary information, negative comments about our brands or standard of service, exposure of personally identifiable information, fraud, hoaxes or malicious exposure of false information. The inappropriate use of social media by our customers, employees, suppliers or other third parties could also harm our reputation thereby increasing our costs, lead to litigation or result in negative publicity that could damage our reputation and adversely affect our business, results of operations and financial condition. In addition, counterfeit products, product defects and ineffective promotional activities are all potential threats to the image and potency of our brand. Our failure to develop, maintain and enhance our brand may result in decreased revenue and loss of customers and in turn adversely affect our reputation, business, financial condition, results of operations and cash flows.

49. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures*

Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures and are also prohibited by the terms of our financing arrangements. Our Company has not paid any dividends in the past. The amount of our future dividend payments, if any, will depend upon factors that our Board of Directors deems relevant, including among others, our results of future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends. For further details, please see '***Dividend Policy***' on page no 191 of the Draft Red Herring Prospectus.

EXTERNAL RISK FACTORS:

50. Our business and results of operations could be adversely affected by disruptions in global economic and geo political conditions.

Majority of our raw material is imported, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax including antidumping duties and countervailing duties, trade, and monetary policies; occurrence of natural or man-made disasters; downgrade in debt rating; and adverse global economic conditions due to various reasons. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of its large agricultural and manufacturing sectors, trade deficits, recent initiatives by the Indian government and other factors. Unfavorable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

51. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.

Under the Companies Act, 2013, a company having share capital and incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of our Equity Shares voting on such resolution. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted.

52. Investors may not be able to enforce judgments obtained in foreign courts against us.

We are a public limited company under the laws of India. All of our directors and officers are Indian nationals and all or a significant portion of the assets of all of the directors and officers and a substantial portion of our assets are located in India. As a result, it may be difficult for investors to effect service of process outside India on us or on such directors or officers or to enforce judgments against them obtained from courts outside India, including judgments predicated on the civil liability provisions of the United States federal securities laws.

India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, which includes the United Kingdom, United Arab Emirates, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements of the Indian Code of Civil Procedure, 1908 (the "Civil Code"). The Civil Code only permits the enforcement of monetary decrees, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgment in such a jurisdiction against us, our officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court. However, the party in whose favour such final judgment is rendered may bring a fresh suit in a competent court in India based on a final judgment that has been obtained in a non-reciprocating territory within three years of obtaining such final judgment. It is unlikely that an Indian court would award damages on the same basis or to the same extent as was awarded in a final judgment rendered by a court in another jurisdiction if the Indian court believed that the amount of damages awarded was excessive or inconsistent with public policy in India. In addition, any person seeking to enforce a foreign judgment in India is required to obtain prior approval of the Reserve Bank of India to repatriate any amount recovered pursuant to the execution of the judgment.

53. We are subject to regulatory, economic and social and political uncertainties and other factors beyond our control.

We are incorporated in India and we conduct our corporate affairs and our business in India. Our Equity Shares are proposed to be listed on the Emerge platform of NSE, subject to the receipt of the final listing and trading approvals from the NSE. Consequently, our business, operations, financial performance and the market price of our Equity Shares will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- political instability, terrorism, military conflict, epidemic or public health issues in India or in countries in the region or globally, including in India's various neighbouring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- Instability in financial markets and volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- changes in India's tax, trade, fiscal or monetary policies; and
- other significant regulatory or economic developments in or affecting India or its logistics sector.

Moreover, a fall in the purchasing power of our customers, for any reason whatsoever, including rising consumer inflation, availability of financing to our customers, changing governmental policies and a slowdown in economic growth may have an adverse effect on our customers' revenues, savings and could in turn negatively affect their demand for our products. In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

54. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Red Herring Prospectus.*

As stated in the reports of the Peer Reviewed Auditor included in this Draft Red Herring Prospectus under chapter "Restated Financial Statements" beginning on page 121, the financial statements included in this Draft Red Herring Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Red Herring Prospectus.

Accordingly, the degree to which the financial information included in this Draft Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

55. *We are a public limited company under the laws of India. All of our directors and officers are Indian nationals and all or a significant portion of the assets of all of the directors and officers and a substantial portion of our assets are located in India. As a result, it may be difficult for investors to effect service of process outside India on us or on such directors or officers or to enforce judgments against them obtained from courts outside India, including judgments predicated on the civil liability provisions of the United States federal securities laws Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the industry in which we operate, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, and our business, prospects, financial condition and results of operations, in particular.

56. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue. India has experienced high inflation relative to developed countries in the recent past. Continued high rates of inflation may increase our expenses related to costs of raw material, rent, salaries or wages payable to our employees or any other expenses. There can be no assurance that we will be able to pass on any additional expenses to our customers or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

57. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ taxclearance certificate from the income tax authority.

There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

58. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

59. *The occurrence of natural or man-made disasters may adversely affect our business, financial condition, results of operations and cash flows.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. in past years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID- 19 and man-made disasters, including acts of war such as Russia's invasion of Ukraine, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 virus. A worsening of the current outbreak of COVID-19 pandemic or future outbreaks of COVID-19 or a similar contagious disease could adversely affect the global economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have a material adverse effect on our business and the trading price of the Equity Shares.

Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

60. Our ability to raise foreign capital may be constrained by Indian law.

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions limit our financing sources and could constrain our ability to obtain financings on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that any required regulatory approvals for borrowing in foreign currencies will be granted to us without onerous conditions, or at all. Limitations on foreign debt may have an adverse effect on our business growth, financial condition and results of operations.

61. Rights of shareholders under Indian laws may be different from laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as our shareholder than as a shareholder of an entity in another jurisdiction.

SUMMARY FINANCIAL STATEMENTS

*The following tables provide the summary of financial information of our Company derived from the Restated Consolidated Financial Statements for the Financial Years ended March 31, 2024, March 31, 2023 and March 31, 2022. DETAILS OF THE OBJECTS OF THE OFFER

The details in relation to the objects of the Offer are set forth herein below.

1. Investment in our Wholly-Owned Subsidiary, Shri Ahimsa Healthcare Private Limited (SAHPL) for setting up a manufacturing unit at Sawarda, Jaipur, Rajasthan (“Proposed Project”).

Our Company proposes to invest ₹ 3,500 Lakhs towards investment in our Wholly Owned Subsidiary, Shri Ahimsa Healthcare Private Limited (SAHPL), for setting up a unit for manufacturing unit at Sawarda, Jaipur, Rajasthan. Our Wholly Owned Subsidiary was incorporated on September 28, 2022 with the main object of manufacturing & dealing in Crude or Natural Caffeine and its other preparations and to manufacture and deal in all types of chemicals, pharmaceutical drugs and to do all related activities allied thereto in order. The proposed investment by our Company will be undertaken to manufacture the following products: Caffeine Anhydrous Natural, Green Coffee Bean Extract and Crude Caffeine. This will also allow us to better serve our existing customers and for better economies of scale.

Our Company proposes to invest such amounts from the Net Proceeds by way of subscription to Redeemable Preference Share Capital issued by SAHPL.

The Board of Directors of our Wholly Owned Subsidiary Company, at its meetings held on August 23, 2024 had approved the proposal to set up the Proposed Project and the Detailed Project Report (DPR) for the Proposed Project issued by M/s Lodha Jain & Company, Independent Chartered Accountants. Our Board of Directors took note of the Proposed Project as approved by Shri Ahimsa Healthcare Private Limited, Wholly Owned Subsidiary Company as per Detailed Project Report (DPR) in its meeting held on August 23, 2024 and further approved the investment of Net Proceeds from the Offer in our Wholly Owned Subsidiary Company by its resolution dated September 6, 2024.

Rationale for investment in Wholly Owned Subsidiary

- Our Company i.e Shri Ahimsa Naturals Limited has fully utilized the land area of its existing manufacturing plant, making it unfeasible to expand further on the current site. Consequently, Company requires a new site for further expansion by way of a greenfield project. Shri Ahimsa Healthcare Private Limited, our Wholly Owned Subsidiary, had vacant land which is suitable to establish a new manufacturing unit. Therefore, the Company plans to invest in its Wholly Owned Subsidiary for the above expansion, aimed at increasing production capacity.
- Also, there are certain state level subsidies/benefits available under Rajasthan Investment Promotion Scheme (RIPS) such as interest subsidy, capital subsidy, state goods service tax subsidy etc. being a new manufacturing company, SAHPL is comparatively better positioned for submissions under the above scheme

Hence, considering the above-mentioned points, management took strategic decision to invest in its Wholly Owned Subsidiary for new manufacturing unit.

A. SPECIAL TAX BENEFITS TO THE COMPANY

The CBDT has further Issued Circular 29/2019 dated October 02,2019 clarifying that since the MAT provisions under Section 115JB itself would not apply where a domestic company exercises option of lower tax rate under Section 115BAA, MAT credit would not be available. Economic Outlook

Global Economy

The global economy has been surprisingly resilient, despite significant central bank interest rate hikes to restore price stability. Changes in mortgage and housing markets over the pre-pandemic decade of low interest rates moderated the near-term impact of policy rate hikes. The lower predicted growth in output per person stems, notably, from persistent structural frictions preventing capital and labor from moving to productive firms. As G20 emerging markets account for almost one-third of world GDP and about one-quarter of global trade, spillovers from shocks originating in these economies can have important ramifications for global activity. Since 2000, spillovers from shocks in G20 emerging markets—particularly China—have increased and are now comparable in size to those from shocks in advanced economies. Trade, notably through global value chains, is a key propagation channel. Spillovers generate a reallocation of economic activity across firms and sectors in other countries. Looking ahead, a plausible growth acceleration in G20 emerging markets, even excluding China, could support global growth over the medium term and spill over to other countries.

The baseline forecast is for the world economy to continue growing at 3.2 percent during 2024 and 2025, at the same pace as in 2023. A slight acceleration for advanced economies—where growth is expected to rise from 1.6 percent in 2023 to 1.7 percent in 2024 and 1.8 percent in 2025—will be offset by a modest slowdown in emerging market and developing economies from 4.3 percent in 2023 to 4.2 percent in both 2024 and 2025. The forecast for global growth five years from now—at 3.1 percent—is at its lowest in decades. Global inflation is forecast to decline steadily, from 6.8 percent in 2023 to 5.9 percent in 2024 and 4.5 percent in 2025, with advanced economies returning to their inflation targets sooner than emerging market and developing economies. Core inflation is generally projected to decline more gradually.

Indian Economy Overview

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at ₹293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of ₹269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India- focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at ₹172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of ₹160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

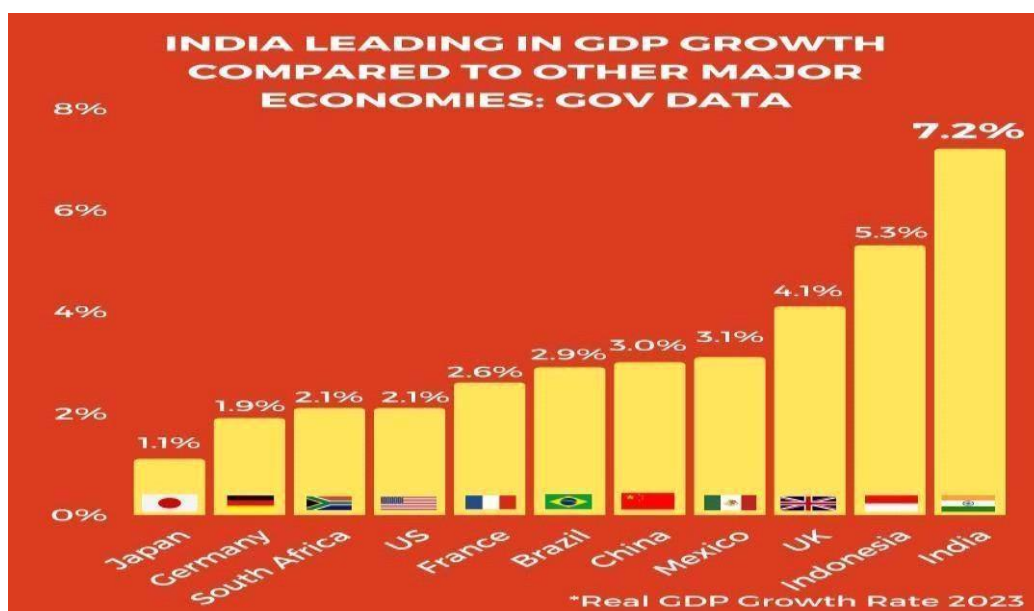

In the first half of FY24, the Indian economy exhibited notable growth, recording a 7.2% expansion, as per data released on November 30, 2023. In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to ₹10 lakh crore (US\$

120.12 billion) over ₹7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at ₹47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is ₹11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Chemical Industry

Global Position of India in Chemical Industry

India is the 6th largest producer of chemicals in the world and 3rd in Asia, contributing 7% to India's GDP. India's chemical sector, which was estimated to be worth US\$ 220 billion in 2022, is anticipated to grow to US\$ 300 billion by 2025 and US\$ 1 trillion by 2040.

Globally, India is the fourth-largest producer of agrochemicals after the United States, Japan and China. India accounts for 16-18% of the world's production of dyestuffs and dye intermediates. India's agrochemicals export was estimated to be at US\$ 1.70 billion from April 2023 to September 2023 (Provisional). Indian colourants industry has emerged as a key player with a global market share of ~15%. The country's chemicals industry is de-licensed, except for a few hazardous chemicals. India has traditionally been a world leader in generics and biosimilars and a major Indian vaccine manufacturer, contributing more than 50% of the global vaccine supply. India holds a strong position in exports and imports of chemicals at a global level and ranks 14th in exports and 8th in imports at the global level (excluding pharmaceuticals). From April 2023 to December 2023, India's

dye exports (Dyes and Dye Intermediates) totalled US\$ 1.69 billion. India's proximity to the Middle East, the world's source of petrochemicals feedstock, enables it to benefit on economies of scale.

The Indian chemicals industry stood at US\$ 178 billion in 2019 and is expected to reach US\$ 304 billion by 2025 registering a CAGR of 9.3%. The demand for chemicals is expected to expand by 9% per annum by 2025. The chemical industry is expected to contribute US\$ 300 billion to India's GDP by 2025.

Indian Chemical Industry

Indian chemical industry comprises of both small scale as well as large scale units. With initiatives like "Make in India" program gaining steam, investments, innovation and infrastructure are going to be the major thrust areas for chemical industry players.

The Indian chemical industry is one of the oldest industries in India and is a critical part of the Indian economy. Chemical industry is the mainstay of industrial and agricultural development of the country and provides building blocks for several downstream industries such as textiles, papers, paints, soaps, detergents, pharmaceuticals, varnish automotive, personal care, construction & engineering, food production and processing etc. With the increase in industrial activity, the demand for chemicals also increased, which resulted in higher international trade.

Covering more than 80,000 commercial products, India's chemical industry is extremely diversified and can be broadly classified into bulk chemicals, specialty chemicals, agrochemicals, petrochemicals, polymers and fertilisers.

India's chemical sector, which was estimated to be worth US\$ 220 billion in 2022, is anticipated to grow to US\$ 300 billion by 2025 and US\$ 1 trillion by 2040. The demand for chemicals is expected to expand by 9% per annum by 2025. The chemical industry is expected to contribute US\$ 383 billion to India's GDP by 2030.

India has traditionally been a world leader in generics and biosimilars and major Indian vaccine manufacturers, contributing more than 50% of the global vaccine supply. Chemicals and petrochemicals demand in India is expected to nearly triple and reach US\$ 1 trillion by 2040.

An investment of ₹8 lakh crore (US\$ 107.38 billion) is estimated in the Indian chemicals and petrochemicals sector by 2025. Specialty chemicals account for 20% of the global chemicals industry's US\$ 4 trillion, with India's market expected to increase at a CAGR of 12% to US\$ 64 billion by 2025. This gain would be driven by a healthy demand growth (CAGR of 10-20%) in the export/end-user industries. The Department of Chemicals & Petrochemicals intends to bring PLI in the chemical & petrochemical sector and will redraft the Petroleum, Chemicals and Petrochemicals Investment Region (PCPIR) guidelines. The Indian chemical industry is expected to further grow with a CAGR of 11-12% by 2027, increasing India's share in the global specialty chemicals market to 4% from 3%. A shift in the global supply chain brought on by the China+1 strategy and a resurgence in domestic end-user demand was expected to fuel significant revenue growth of 18-20% in 2022 and 14-15% in 2023.

Export of Chemical

With global companies seeking to de-risk their supply chains, which are dependent on China, the chemical sector in India has the opportunity for a significant growth. Recent pollution control measures in China have also resulted in the closure of many factories in that country. It is directly benefiting their Indian counterparts. India's specialty chemicals companies are also expanding their capacities to cater to rising demand from domestic and overseas.

From April 2023 to December 2023, exports of organic chemicals stood at US\$ 5.49 billion & inorganic chemicals stood at US\$ 1.50 billion. Imports of organic (US\$ 11.21 billion) and inorganic (US\$ 5.01 billion) chemicals totaled US\$ 16.22 billion from April 2023 to December 2023. From April 2023 to December 2023, exports of castor oil, essential oil, and cosmetics and toiletries stood at US\$ 2.92 billion.

India holds a strong position in international trading of chemicals and ranks 9th in exports and 6th in imports at a global level (excluding pharmaceuticals). Chemicals contributes 4% to the total FDI equity inflow and ~8% to the country's exports.

Caffeine Anhydrous

Caffeine is a chemical compound naturally available in tea and coffee and in some other plants like cocoa beans and guarana berries. This compound comes primarily from “*Coffea Arabica*” and “*Coffea Robusta*” a shrub or tree that grows in high-altitude subtropical and equatorial regions of the world. Globally, Caffeine is grown and used in North America, Europe, Asia- Pacific, Latin America, Middle East and Africa. Caffeine can be natural or synthetic. Natural caffeine is extracted from plants to be used in different foods and beverages and is found in more than 10 species of plants across the globe while synthetic Caffeine is chemically sourced from urea and chorocaetic acid. In reality, it's very difficult to distinguish between natural and synthetic Caffeine as both are chemically identical. Most of the Caffeine products used for work out, weight loss, dietary supplement etc. available in market today contain synthetic Caffeine.

Due to this rising demand of Caffeine globally, manufacturers are spending on preparing better quality Caffeine products. Coffee is one of the most popular beverages around the world and coffee bean is the second most heavily traded commodity in the global market after petrol. A recent survey by the International Food Information Council (IFIC) reports that consumers not only want low and no calorie beverages, but also are concerned with ingredients in their drinks, such as Caffeine and preservatives. A 2013 Mintel report states that 59% of consumers who consume energy drinks or shots are concerned about what goes into their drinks. There are a significant number of people who have said they cut back on energy drinks and shots consumption because of concerns about safety. According to a recent SPINS survey on consumer habits, 44% of beverage consumers prefer beverages that are good for them. This has led consumers to shop differently and the easy step is to look for organics.

“*Caffeine Anhydrous*” also known as organic Caffeine or natural Caffeine has been in demand as the same is driven by several health benefits associated with it. Various researches have proved that Caffeine consumption prevents different types of cancer, lowers cholesterol, boosts immunity, facilitates weight loss, and prevents neurological diseases. Also, increase in promotional activities on social media is raising awareness about organic food and beverages around the world. Apart from these, health consciousness among people is increasing day by day. Moreover, sources such as internet, TV, and newspapers help in gathering information regarding the advantages of organic foods, including Caffeine. The word “anhydrous” means “without water” and Caffeine Anhydrous is a processed, dehydrated form of Caffeine. After harvesting, Caffeine is extracted from the plant matter and dehydrated. In the dehydration process Caffeine Anhydrous is made more concentrated and potent than regular Caffeine. This produces a highly concentrated Caffeine powder which is a nervous system stimulant. It is used in clearance of drowsiness and gives an energy boost. Due to its properties of effective stimulant, it is used to stimulate athletic performance and weight loss.

Difference between Crude Caffeine and Anhydrous Caffeine

While the terms Anhydrous Caffeine, natural caffeine, crude caffeine, organic caffeine are often used as synonyms, Anhydrous Caffeine (also called as natural caffeine or organic caffeine) is different from Crude Caffeine in certain ways. Crude caffeine refers to the caffeine extract obtained from natural sources such as coffee beans, tea leaves, or cacao pods. It is extracted through processes like solvent extraction, filtration, and purification. Crude caffeine may contain impurities and moisture and typically appears as a brownish or yellowish powder. Anhydrous caffeine, on the other hand, is a refined form of caffeine that has undergone further purification to remove impurities and moisture, resulting in a highly pure crystalline white powder. The term "anhydrous" means without water, indicating that anhydrous caffeine is devoid of water molecules. This purification process ensures a higher level of purity compared to crude caffeine. The main difference between crude and anhydrous caffeine lies in their purity levels and applications. While crude caffeine may contain impurities and moisture, anhydrous caffeine is highly purified and free from water. Consequently, anhydrous caffeine is preferred for applications where precise dosage, consistency, and purity are critical, such as pharmaceuticals, energy drinks, and dietary supplements. Its white crystalline form also makes it suitable for easy blending into various formulations. Crude caffeine, on the other hand, may find applications in industries where high purity is not a strict requirement, such as agriculture, where it can be used as a natural pesticide or fertilizer. Additionally, crude caffeine may be used in certain food and beverage applications where minor variations in purity are acceptable, such as flavoring agents or extracts. Both crude and Anhydrous Caffeine are subject to regulatory oversight, ensuring that products containing caffeine adhere to safety standards and labeling requirements.

Caffeine Anhydrous Benefits

Caffeine anhydrous is a dehydrated form of caffeine. So, the product itself is a powdered form of caffeine, resulting in a more concentrated, potent form. With this comes many additional benefits, particularly from a sports nutrition stand-point, such as:

No fluid:

It comes with the benefits of a pre-workout caffeine boost, but without the volume of fluid that normally comes with it (through drinking coffee or energy drinks), then opting for caffeine anhydrous in the form of pills would be a great alternative.

Less GI side effects:

Caffeine anhydrous wouldn't disrupt the GI tract as much as other forms of caffeine, such as coffee and energy drinks, mainly due to a lack of acidic compounds.

Easy to dose:

One of the greatest benefits of caffeine anhydrous is the ability to dose much more accurately. The problem with pre-workout powders, coffee, energy drinks, and any other fluid-based caffeine source, is the inaccuracy of the dose. Caffeine pills, gum, or bars containing caffeine anhydrous provides with a concentrated, accurate dose due to the purity and potency. This way, it makes it more simple to meet the recommended intake of caffeine for sports performance, or any other benefit.

Convenient:

Carrying around caffeine in the form of coffee, an energy drink, or big tubs (particularly athletes) can be inconvenient at the best of times. Pills, chewing gum, or bars containing caffeine anhydrous are simply easier and more convenient forms of caffeine that don't require mixing or drinking.

Market Dynamics

Anhydrous Caffeine market is expanding with steady rate due to factors such as increasing health awareness, obesity being common problem in adults, growing demand by athletes and increasing use of it as supplements in diet & weight loss purpose. According to world Health Organization (WHO) in 2016, more than 1.9 billion adults, 18 years and older, were overweight and of these over 650 million were obese. The rate of obesity and overweight being high is motivating consumers to buy weight loss supplements. This in turn drives the market of *Anhydrous Caffeine* as it is a nerve stimulant and has been found helpful in weight control. Additionally, *Anhydrous Caffeine* is used in different type of products globally, such as colas & caffeinated sodas, certain fruity-flavored soft drinks, gels, gum, bars, sports & gym performance supplements, weight loss pills, alcoholic beverages, chocolates and stay awake pills. These products increase the demand of *Anhydrous Caffeine*. However, high dosage of *Anhydrous Caffeine* can have side effects such as nausea, headache, diarrhea and anxiety and required dosage vary from person to person, so consumers have to consult professional to use this product before using, which may restrain the market up to some extent. In spite of that, there is an opportunity for beverage, nutraceuticals and pharma industry to develop innovative products using *Anhydrous Caffeine*.

Caffeine Anhydrous Market size was valued at USD 622.4 Million in 2023 and is expected to reach USD 881.5 Million by the end of 2030 with a CAGR of 6.88% during the forecast period 2024-2030. Growth in the market is driven by rising adoption of *Anhydrous Caffeine* across diverse end-use verticles such as beverage industry and dietary supplements. During the last few years, demand for dietary supplements and energy drinks containing *Anhydrous Caffeine* has been on the rise across countries like USA and Canada. People spend large amounts on purchasing these health supplements to stay active and reduce fat. USA mainly imports *Anhydrous Caffeine* products from China and other Caffeine producing countries and half of the products are synthetic in nature which are used in production of soft drinks and energy drinks. For example; in 2011, U.S. companies have imported 15 million pounds of *Anhydrous Caffeine* which provided enough Caffeine for 20 billion cans of soda, or just under 7 Billion cans of Red Bull, shows the immensity of market demand as well as utilization of Caffeine in U.S. market

According to recent forecasts and researches, the Asia Pacific *Anhydrous Caffeine* market is expected to grow at a relatively faster rate due to the growing health awareness, increase in consumption of energy drinks and presence of leading market players in the region. China remains the epicentre of *Anhydrous Caffeine* market growth. Asia- Pacific is expected to dominate the global *Anhydrous Caffeine* market with highest share, due to China's monopoly on production of synthetic Caffeine, cheap production cost and low labour cost as well as increased export import activities and presence of major market players in this region. The green coffee bean industry encompasses the cultivation, processing, and trade of unroasted coffee beans, representing a crucial segment within the broader coffee market. Green coffee beans, often sourced from countries with ideal climates and altitude for coffee cultivation, undergo several stages before reaching consumers worldwide. The green coffee bean industry begins with cultivation in coffee-producing regions across the globe, predominantly located within the "Coffee Belt" encircling the equator. Countries such as Brazil, Vietnam, Colombia, Indonesia, and Ethiopia are major contributors to global green coffee production. Coffee plants thrive in tropical climates with consistent rainfall, altitude, and well-drained soil. Cultivation methods vary, with some regions employing traditional methods while others adopt modern agricultural practices and technologies to enhance yield and quality. Increasing awareness about the importance of health is expected to drive market growth during the forecast period. After harvesting, green coffee beans undergo processing to remove the outer pulp and mucilage, revealing the raw seeds within. Processing methods include the dry or natural process, where beans are dried with the pulp intact, and the wet or washed process, which involves fermenting and washing the beans to remove the pulp. The choice of processing method impacts the flavor profile and characteristics of the final coffee. The green coffee bean industry plays a pivotal role in the global coffee supply chain, driving economic development in producing regions and catering to the diverse preferences of coffee enthusiasts worldwide. Adaptation to evolving market trends and addressing sustainability challenges will be essential for the industry's long-term growth and resilience.

Market Segmentation:

- *By Product*
- *By Application*

The Caffeine market is segmented by product and by application. On the basis of product segment the Caffeine market can be further divided into synthetic Caffeine and natural Caffeine. According to the US Foods and Drugs Administration (FDA), synthetic Caffeine is in five types of products including beverages, foods, dietary supplements, energy drinks, and over-the-counter drugs. On the basis of applications the Caffeine market can be segmented into; (1) FMCG and Food Processing Industry (Food and Beverages); (2) Nutraceuticals; and (3) Pharmaceuticals.

FMCG Industry and Food Processing Industry

Fast-moving consumer goods, also known as consumer packaged goods, are products that are sold quickly and at a relatively low cost. Examples include non-durable household goods such as packaged foods, beverages, toiletries, candies, cosmetics, over-the-counter drugs, dry goods, and other consumables.

Fast-moving consumer goods (FMCG) sector is India's fourth-largest sector and has been expanding at a healthy rate over the years as a result of rising disposable income, a rising youth population, and rising brand awareness among consumers. With

household and personal care accounting for 50% of FMCG sales in India, the industry is an important contributor to India's GDP.

India is a country that no FMCG player can afford to ignore due to its middle class population which is larger than the total population of USA. The Indian FMCG market continues to rise as more people start to move up the economic ladder and the benefits of economic progress become accessible to the general public. More crucially, with a median age of just 27, India's population is becoming more consumerist due to rising ambitions. This has been further aided by government initiatives to increase financial inclusion and establish social safety nets.

Growing awareness, easier access and changing lifestyles have been the key growth drivers for the sector. The urban segment (accounts for a revenue share of around 55%) is the largest contributor to the overall revenue generated by the FMCG sector in India. However, in the last few years, the FMCG market has grown at a faster pace in rural India compared to urban India. Semi-urban and rural segments are growing at a rapid pace and FMCG products account for 50% of the total rural spending.

Total revenue of FMCG market is expected to grow at a CAGR of 27.9% through 2021-27, reaching nearly US\$ 615.87 billion. In 2022, urban segment contributed 65% whereas rural India contributed more than 35% to the overall annual FMCG sales. Good harvest, government spending expected to aid rural demand recovery in FY24. The sector had grown 8.5% in revenues and 2.5% in volumes last fiscal year. In the January-June period of 2022, the sector witnessed value growth of about 8.4% on account of price hikes due to inflationary pressures. In third quarter of FY23, the FMCG sector clocked a value growth of 9.0% YoY — lower than the 9.2% YoY value growth seen in third quarter of FY22. According to NielsenIQ's report, in 2024, the FMCG industry in India is expected to grow between 4.5-6.5%, owing to strength in the sector and Indian economy.

Indian food processing market size reached US\$ 307.2 billion in 2022 and is expected to reach US\$ 470 billion by 2028, exhibiting a growth rate (CAGR) of 9.5% during 2023-2028.

The Union government approved a new PLI scheme for the food processing sector, with a budget outlay of ₹109 billion (US\$ 1.46 billion). Incentives under the scheme will be disbursed for six years to 2026-27.

Digital advertising will grow to reach US\$ 9.92 billion by 2023, with FMCG industry being the biggest contributor at 42% share of the total digital spend.

Trends in FMCG revenues over the years (US\$ billion)

(Source: Nielsen India, CRISIL Ratings)

FMCG giants such as Johnson & Johnson, Himalaya, Hindustan Unilever, ITC, Lakmé and other companies (that have dominated the Indian market for decades) are now competing with D2C-focused start-ups such as Mamaearth, The Moms Co., Bey Bee, Azah, Nua and Pee Safe. Market giants such as Revlon and Lotus took ~20 years to reach the ₹100 crore (US\$ 13.4 million) revenue mark, while new-age D2C brands such as Mamaearth and Sugar took four and eight years, respectively, to achieve that milestone.

FMCG ad volumes on television rose by 33% in the year 2021 when compared to 2019. The growth was 22% when compared to the year 2020. The top 10 advertisers on TV accounted for a 60% share of ad volumes in the year 2021 with HUL topping the list, followed by Reckitt Benckiser (India), and Brooke Bond Lipton India.

The Government has allowed 100% Foreign Direct Investment (FDI) in food processing and single-brand retail and 51% in multi-brand retail. This would bolster employment, supply chain and high visibility for FMCG brands across organised retail markets thereby bolstering consumer spending and encouraging more product launches. The sector recorded an FDI of US\$ 20.84 billion between April 2000 and June 2022.

An FMCG industry overview indicated that India's demographic profile plays a major role in the growth of this sector. Not only is India's demographic young, but this segment is also characterised by increased urbanisation and higher expenditure. Urban development initiatives by the government, as well as the increasing middle class of India, has led to an increase in the number of attractive markets in the country.

The FMCG industry in India is divided into the demographics of rural and urban India. The urban market contributes 60% of the consumption revenue of the FMCG market in India. In 2017, this sector recorded a market size of \$ 29.4 bn. While urban areas have spearheaded the growth of the FMCG industry in India, semi-urban and rural segments are growing at a rate that cannot be ignored. Semi-urban and rural segments contribute over 40% of the overall revenues of the FMCG sector in India. FMCG companies in India have witnessed higher growth in rural areas compared to urban ones. And with 12.2% of the world's population living in the villages of India, the Indian rural FMCG market cannot be ignored by investors. Dabur, one of the top FMCG companies in India, generates over 45% of its domestic revenue through the sale of packaged consumer goods in rural India. Hindustan Unilever, another name that has consistently dominated the list of top FMCG companies in India, earns over 35% of its revenue from rural areas. Rural India accounts for more than 40% of consumption in major FMCG categories such as personal care, fabric care, and hot beverages. In urban areas, home and personal care category- including skin care, household care, and feminine hygiene- will continue to grow at attractive rates. Within the foods segment, it is estimated that processed foods, bakery, and dairy are long-term growth categories in both rural and urban areas.

Various reports on the cities of India highlights the emergence of 30 'new wave' cities such as Jaipur and Surat. Consumption in these cities is growing at a faster rate than that of many of India's metros. India's young population is also characterized by a high degree of technological awareness. Growing penetration of smartphones and better internet connectivity in India has led to a burgeoning E-Commerce sector, which has, in turn, helped formalise large sections of the unorganized retail sector. The E-Commerce segment is projected to contribute 11% of overall Indian FMCG companies' sales in 2030.

The FMCG sector is one of the largest sectors of the Indian economy. As consumption in India grows at an unprecedented rate, the FMCG industry remains a key sector for investors. Acknowledging these trends in the FMCG industry profile, the Government of India has undertaken various initiatives to promote the sector. For instance, 100% FDI is permitted in SBRT and cash-and-carry models of retail, and the minimum capitalisation for foreign FMCG companies to invest in India is \$ 100 mn. Even the implementation of GST in India has had far-reaching consequences for the sector, as the highest selling FMCG products such as soap, toothpaste and hair oil now come under the 18% tax bracket (as opposed to the previous 24%).

Favourable demand drivers such as rising income levels and growing urbanisation, among others, have recently encouraged major and diverse investments in the FMCG sector. While top FMCG companies are expanding their capacity to feed the growing domestic demand, homegrown brands have ventured into international markets.

The high growth rate of the FMCG industry in India goes beyond growth drivers such as income growth and urbanisation. The consumption habits of India's new age consumers have resulted in an attitudinal shift in the market. The India of 2030 will have 370 mn generation Z consumers, with changed priorities when it comes to purchasing goods. The new Indian consumer is characterised by high awareness, an affinity for health and nutrition and high expendable income.

Food Processing Industry

Food processing is defined as transforming agricultural products into food that are in consumable form or transforming one food item into another by adding value to it. The importance of processed food items in the consumer basket has increased globally over time. With higher income, urbanisation, demographic shifts, improved transportation and changed consumer perceptions regarding quality and safety, food consumption patterns have changed over the years.

India is one of the largest populated countries in the world and is expected to continue having one of the youngest populations in the world till 2030. The growing consumption of food is expected to reach US\$ 1.2 trillion by 2025-26, owing to urbanization and changing consumption patterns. The processed fruits and vegetables industry was valued at US\$ 15.4 billion in 2019. With heightened consumer awareness during lockdowns, there's increased demand for processed foods, especially in RTE/RTC, dairy, and fruit and vegetable segments. The market size of food processing sector in India is estimated to reach US\$ 1,274 billion in 2027 from US\$ 866 billion in 2022, backed by the rise in population, changing lifestyle and food habits due to rising disposable income and urbanization.

India's food processing sector is a sunrise sector that has gained prominence in recent years. Major processed food products exported from India include processed fruits and juices, pulses, guar gum, groundnuts, milled products, cereals preparations, oil meals and alcoholic beverages. India created history in agriculture and processed food exports by exporting products worth US\$ 25.6 billion in FY22. The food sector is currently undergoing a transition in India. The Agricultural and Processed Food Products Export Development Authority (APEDA) forecasts that the sector will grow at a compounded annual growth rate (CAGR) of 3% between 2022 and 2030.

Anticipating the future growth, many big international players are entering the Indian market by partnering with the domestic players. There are tremendous opportunities for large investments in food and food processing technologies, skills and equipment, especially in the areas of canning, dairy and food processing, specialty processing, packaging, frozen food/refrigeration and thermos processing.

Application of Caffeine in FMCG and Food processing Industry

The main usage of Caffeine is to prevent the consumer from drowsiness and improve their performance. Caffeine in coffee and coffee-related products such as cold coffee, café latte, and cappuccino also act as refreshing drinks among consumers. Moreover, rise in the trend of out-of-home coffee consumption indicates rise in Caffeine consumption in the coming years. Thus, this increase is projected to drive the global organic coffee market growth in beverage industry.

Increased consumption of coffee flavoured personal care products is expected to increase the demand of Caffeine market during 2022 - 2027. For instance, according to L'Oreal S.A.'s quarterly report published in April 2020, brands such as Kiehl's, Lancôme, and Helena Rubinstein, which have a large proportion of skincare products outperformed the company's other luxury brands in the first quarter of 2020. Thus, the skin care brands and focusing on the personal hygiene and cleansing products, this is expected to drive the demand for cosmetic ingredients such as Caffeine.

Application of Caffeine in Nutraceuticals Industry

The nutraceutical benefits of Caffeine have been a matter of research and discussion in industry for quite some time. Caffeine has high levels of antioxidants, which have a number of health benefits, including inhibiting cell oxidation. Oxidation results in the production of “free radicals”, which can build up in cells and cause a number of diseases, including heart disease. Despite the limited amount of research available on the health benefits of Caffeine, demand for Caffeine based nutraceuticals is on the rise.

Application of Caffeine in Pharmaceutical Industry

Caffeine in pharmaceuticals is considered as a drug that acts as a stimulant for the central nervous system (CNS). It is one of the most widely used drug in the world and is known for containing psychoactive substances. Many observational studies have time and again proven the positive effects of Caffeine on human body. Consumption of Caffeine in adequate amounts can cause increased concentration and also lower the risk of cardiovascular disease and diabetes. Caffeine is supposed to be rich in antioxidants such as polyphenols, including flavonoids and catechins. These stabilize harmful free radicals present in the human body and thus, helps in prevention of large-scale cellular destruction. The health benefits associated with coffee along with changing consumer trends are anticipated to drive the global pharmaceutical market for organic Caffeine.

Challenges in Caffeine Anhydrous Market:

The caffeine anhydrous market faces a myriad of challenges, spanning from regulatory hurdles to shifting consumer preferences. Regulation poses a significant obstacle, with stringent policies governing the production, distribution, and labeling of caffeine-based products. Stricter regulations, particularly concerning health claims and recommended dosages, can impact market dynamics and require manufacturers to adapt swiftly to remain compliant. Furthermore, increasing awareness of health concerns associated with caffeine consumption, such as insomnia, anxiety, and heart palpitations, poses a challenge to market growth. Consumers are becoming more discerning, opting for healthier alternatives or reducing their caffeine intake altogether. This trend has led to a demand for caffeine-free or low-caffeine options, creating a competitive landscape for caffeine anhydrous suppliers. Economic factors also play a role, with fluctuating raw material prices affecting production costs and, consequently, product pricing. Market volatility can pose challenges for manufacturers in maintaining competitive prices while ensuring profitability. Additionally, competition within the market intensifies as new players enter, offering innovative formulations or sourcing strategies. Established companies must innovate continuously to maintain their market share and meet evolving consumer demands. Supply chain disruptions, whether due to natural disasters, geopolitical tensions, or global health crises, can also disrupt the caffeine anhydrous market, leading to shortages or delays in production and distribution. Addressing these challenges requires proactive strategies, such as investing in research and development for alternative formulations, maintaining compliance with regulations, diversifying supply chains, and enhancing consumer education on safe caffeine consumption practices. By navigating these obstacles adeptly, companies can sustain growth and competitiveness in the caffeine anhydrous market.

Market Opportunities:

The global caffeine anhydrous market offers promising growth opportunities due to the increasing demand for energy drinks, soft drinks, and dietary supplements. In recent years, consumers have shifted their preference towards natural sources of caffeine as an alternative to traditional methods of caffeine intake. This is a major factor driving growth in the global caffeine anhydrous market.

The growing trend of functional food and beverages has also opened up new opportunities for the market. The rising disposable incomes of consumers, especially in the developing countries, has resulted in the increasing demand for convenience beverages that are fortified with natural ingredients such as caffeine anhydrous. Furthermore, the growing popularity of sports and fitness activities is also driving the demand for energy drinks with caffeine anhydrous as one of the key ingredients. In addition, government initiatives for promoting the consumption of healthy food and beverages are also expected to propel the growth of the global caffeine anhydrous market. Moreover, the growing importance of health and wellness among consumers is also likely to drive the demand for caffeine anhydrous in the upcoming years. Overall, the global caffeine anhydrous market offers promising prospects in the near future.

Way Forward:

The Caffeine market is growing exponentially and its organic sourcing is the latest trend in the global market. The organic coffee market size was valued at \$6.8 Billion in 2018, and is projected to reach \$12.6 Billion by 2026, registering a CAGR of 8.2% from 2019 to 2026. Health benefits of organic Caffeine backed by environment friendly and sustainable farming practice are the major drivers of the organic Caffeine market. Cumbersome certification process however acts as a major challenge for the engaged stakeholders. North America and Europe are the leading regions globally that are reported to heavily consume Caffeine and its related products. Other regions like the Asia-Pacific, Latin America, Middle East and Africa are adopting the culture with reports of awareness related to health benefits. The strategic pricing of these Caffeine products has attracted the customers with unique selling ideas and have contributed massively in the beverage industry. Spraying or soaking of organic coffee in different organic flavours such as almond, vanilla, mint, caramel, mocha, and amaretto is current trend which is likely to shape market in the upcoming years. The organic coffee market is anticipated to grow with a robust growth rate amidst rising health consciousness among consumers, rising government support, and advanced farming techniques.

Basic Manufacturing Process Flow Chart

- ***Detailed Manufacture Process of Caffeine Anhydrous Natural From Crude Caffeine***

DETAILED MANUFACTURING PROCESS

Caffeine Anhydrous Natural is extracted from seeds of various plants like coffee & tea leaves. In fact, caffeine anhydrous and caffeine are essentially the same thing. The difference is that when it comes to anhydrous caffeine, all additional chemical components and water are filtered out in a lab. The detailed process is described in paragraphs to follow.

MANUFACTURE OF CAFFEINE ANHYDROUS NATURAL FROM CRUDE CAFFEINE (Part A)

The step wise manufacturing process is placed hereunder:

Step 1: The Crude Caffeine obtained after separation of Green Coffee Bean Extract or supplied by parties decaffeinating Coffee / Tea by using Methylene Chloride / Ethyl Acetate as solvent is dissolved in Hot Water / Mother Liquor and 5 to 10% Hydrated Lime is added which reacts with impurities and precipitate out. Then it is cooled to about 30 degree C to crystallize the caffeine, then the caffeine cake is separated by centrifuging.

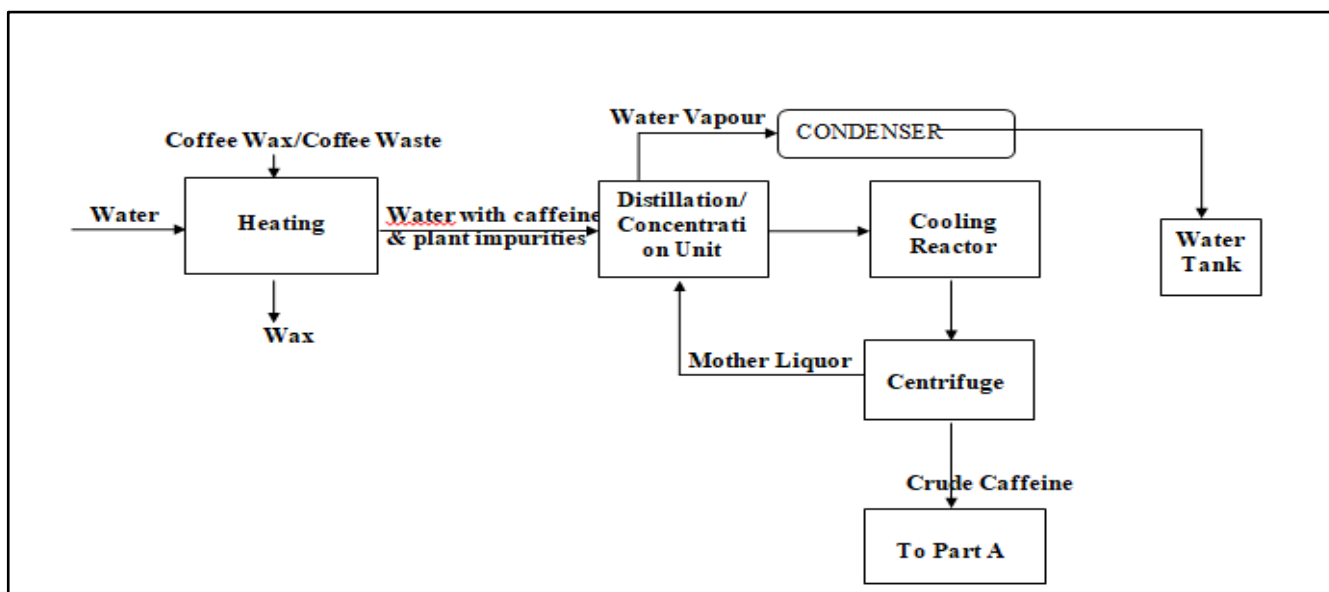

Step 2: Caffeine Cake received from Step 1 is dried in Dryer, passes through Metal Detector, powdered in granulator, sieved, passes through Magnetic Separator and packed after testing.

MANUFACTURE OF CAFFEINE ANHYDROUS NATURAL FROM COFFEE WASTE

Caffeine is a chemical compound naturally available in Tea and Coffee and in some other plants. It can also be manufactured by synthesis of Di-Methyl Urea as the basic raw material. The company has proposed to import Coffee Waste which is obtained during process of decaffeination of Coffee and process the same in the factory to manufacture Caffeine Anhydrous Natural of purity >99% and comply with Food and Pharma Specifications as prescribed by Food and Drug Administration of various countries.

Coffee Waste is black or brown color material in lump form and it is obtained as waste product during decaffeination of Coffee Beans. This material has caffeine content from 5% to 15%, 10% to 15% water & plant impurities.

Note : Process Flow Diagrams for manufacture of Caffeine Anhydrous Natural from Crude Caffeine are given above.

Coffee Waste received from Supplier is put into Hot Water where Caffeine with plant impurities get dissolved in hot water and wax is separated. The wax is taken out and burnt in boiler since it has no commercial value. The hot water with caffeine & plant impurities is transferred to the Distillation Unit. The water vapors in the distillation unit are passed through condenser and the water is collected in the water tank for reuse. During distillation process, mother liquor is added in which Caffeine with impurities get dissolved and the caffeine solution received is transferred to Process Section for purification.(As detailed in Part A)

MANUFACTURE OF CAFFEINE ANHYDROUS NATURAL FROM TEA WASTE

Tea Waste is obtained during manufacturing of Tea in Tea factories as fluff / fiber / dust. The packing units of Tea also sort out the fine dust from the Tea which becomes Tea Waste.

PROCESS FLOW DIAGRAM FOR MANUFACTURE OF CRUDE CAFFEINE FROM TEA WASTE

Note: Process Flow Diagrams for manufacture of Caffeine Anhydrous Natural from Crude Caffeine are given in above.

500 kgs Tea Waste received from supplier is put into Ribbon Blender cum Mixer along with 100 Kgs Hydrated Lime and 150 Ltrs. of Water and blend it properly. Put the mixed material in the Extractor 1 and add Solvent Methylene Chloride (MC) 6 times to separate the Caffeine from the Tea Waste. Repeat the same process in all the 6 Extractors from 5-6 times. Then transfer the Methylene Chloride (MC) along with Caffeine to Distillation Unit. Add Mother Liquor (ML) into the solution and the Methylene

Chloride (MC) is distilled and collect the same in tank for Methylene Chloride to reuse the same. The Caffeine solution received is transferred to Process Section for purification. (as detailed in Part A)

The average recovery of Caffeine is about 1.5%. The Tea Waste after extraction of Caffeine is used in Boiler as fuel or converted into Organic Manure.

MANUFACTURE OF CRUDE CAFFEINE NATURAL & GREEN COFFEE BEAN EXTRACT

PROCESS FLOW DIAGRAM FOR MANUFACTURE OF CRUDE CAFFEINE & GREEN COFFEE BEAN EXTRACT

Note: Process Flow Diagrams for manufacture of Caffeine Anhydrous Natural from Crude Caffeine are given above.

Ammonia is added to water to make its PH 9 to 10 and transferred to Extractor and then Caffeine Powder Kraft Paper Bag 25 KGs. N2VN (crude caffeine extracted from Green Coffee Beans) purchased from certain suppliers is added to it. Thereafter, Methylene Chloride is added to the solution with continuous stirring and circulation and then allowed to settle. Methylene Chloride with Caffeine is allowed to settle, which transferred to Distillation unit where Methylene Chloride is distilled and caffeine is recovered in water solution. The Caffeine solution received is transferred to Process Section for purification.

The wash with Methylene Chloride is repeated with 5 to 6 times to remove the Caffeine. The water with Chlorogenic Acid / Green Coffee Bean Extract is neutralized with Phosphoric Acid and it is made free of Methylene Chloride by heating /distillation. The Chlorogenic Acid is transferred to Storage Tank where the impurities are allowed to settle and separate. The Chlorogenic Acid in water solution is fed to Spray Dryer and dried. It is tested and packed in closed HDPE drums with double polythene inside.

SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022, and the provisions of this circular are deemed to form part of this Prospectus. Furthermore, pursuant to SEBI circular no. Phased implementation of Unified Payments Interface

SEBI has offered the UPI Circulars in relation to streamlining the process of public offer of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public offer closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public offers, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated

Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Offer closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public offers, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds was discontinued and was replaced by the UPI Mechanism. However, the time duration from public Offer closure to listing would continued to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all offers opening on or after September 1, 2023 and on a mandatory basis for all offers opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public

offer closure to listing has been reduced to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification offered by the SEBI from time to time, including any circular, clarification or notification which may be offered by SEBI.

All SCSBs offering facility of making application in public offers shall also provide facility to make application using the UPI Mechanism. The Offers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than 1 (one) Working Day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post-Offer BRLM will be required to compensate the concerned investor.

Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the BRLM, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to ₹5 lakh, shall use the UPI Mechanism. Individual investors Bidding under the Non-Institutional Portion Bidding for more than ₹2 lakh and up to ₹5 lakh, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (“DPIIT”) makes policy announcements on FDI through press notes and press releases which are notified by the RBI as amendments to the FEMA. The DPIIT also offers the Consolidated Foreign Direct Investment Policy (“FDI Policy”) from time to time. The regulatory framework pertaining to foreign investment, over a period of time, thus, consists of acts, regulations, master circulars, press notes, press releases, and clarifications among other amendments.

India’s current FDI Policy offered by the DPIIT with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI offered by the DPIIT till October 15, 2020. All the press notes, press releases, clarifications on FDI offered by DPIIT till October 15, 2020 stand rescinded as on October 15, 2020. In terms of the FDI Policy, Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments.

In accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 offered by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the FDI Policy and the Foreign Exchange Management (Non-debt Instruments) Rules, 2019. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 offered on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Further, in accordance with the amendment to the Companies (Share Capital and Debentures) Rules, 2014 vide notification dated May 4, 2022 offered by Ministry of Corporate Affairs, a declaration shall be inserted in the share transfer form stipulating whether government approval shall be required to be obtained under Foreign Exchange Management (Non-debt Instruments) Rules, 2019 prior to transfer of shares. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.

Further, the existing individual and aggregate investment limits for an FPI in our Company are not exceeding 10% of the total paid-up Equity Share capital of our Company for each FPI and the total holdings of all FPIs in the Company shall not exceed 24% of the total paid-up Equity Share capital of our Company. The RBI, in exercise of its power under the FEMA, has also notified Foreign Exchange Management (Non-debt Instruments) Rules, 2019 and Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 to prohibit, restrict or regulate, transfer by or offer security to a person resident outside India. SEBI registered FPIs have been permitted to purchase shares of an Indian company through the Offer, subject to total FPI investment being within the individual FPI/sub account investment limit of less than 10% of the total paid-up equity capital on a fully diluted basis of the Company subject to the total holdings of all FPIs/sub accounts including any other direct and indirect foreign investments in the Company shall not exceed 24% of the paid-up equity capital of the Company on a fully diluted basis. The aggregate limit of 24% in case of FPIs may be increased up to the sectoral cap/statutory ceiling, as applicable, by the Company concerned by passing of resolution by the Board of the Company to that effect and by passing of a special resolution to that effect by its Shareholders. With effect from April 1, 2020, the aggregate limit of 24% has increased to the sectoral cap applicable to the Indian Company which in case of the Company is 100%. As per the Regulations, the aggregate limit as provided above was permitted to be decreased by the Company to a lower threshold limit of 24% or 49% or 74% as deemed fit, with the approval of its Board of Directors through a resolution and also of its shareholders by means of a special resolution, before March 31, 2020. The Company has passed no such Board Resolution and hence, has not revised its sectoral caps.

As per the FDI Policy, FDI in the industry in which we operate is permitted up to 100% of the paid up share capital of such company under the automatic route.

Further, eligible NRIs and OCIs investing on repatriation basis are subject to individual investment limit of 5% of the total paid-up equity capital on a fully diluted basis subject to the aggregate paid-value of the shares purchased by all NRIs and OCIs put together on repatriation basis not exceeding 10% of the total paid-up equity capital on a fully diluted basis of the Company. The aggregate limit of 10% in case of NRIs and OCIs together may be raised to 24 % if a special resolution to that effect is passed by the shareholders of the Company.

The transfer of shares between an Indian resident and a Non-resident does not require prior approval of RBI, subject to fulfillment of certain conditions as specified by DPIIT / RBI, from time to time. Such conditions include (i) the activities of the investee company are under the automatic route under the FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI. Investors are advised to refer to the exact text of the relevant statutory provisions of law before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer.
