INTERNAL RISKS

A. BUSINESS RELATED RISKS

1. *Our business is dependent on the road network and our ability to utilize our vehicles in an uninterrupted manner. Any disruptions or delays in this regard could adversely affect us and lead to a loss of reputation and/ or profitability.*

Our business operations i.e. goods transportation business is dependent on the road network. There are various factors which affect road transport such as political unrest, bad weather conditions, natural calamities, regional disturbances, fatigue or exhaustion of drivers, improper conduct of the drivers/ motormen, accidents or mishaps and third-party negligence. Even though we undertake various measures to avoid or mitigate such factors to the extent possible, some of these could cause extensive damage and affect our operations and/ or condition of our fleet and thereby increase our maintenance and operational costs. Also, any such interruption or disruptions could cause delays in the delivery of our consignments to their destination and/or so cause damage to the transported cargo. We may be held liable to pay compensation for losses incurred by our customers in this regard, and/ or losses or injuries sustained by other third parties. Further, such delays and/ or damage may cause a loss of reputation. In the event that the goods to be delivered have a short shelf life, any delay in the delivery of such cargo could also expose us to additional losses and claims. Although,

some of these risks are beyond our control, we may still be liable for the condition of such cargo and their timely delivery, and any disruptions or delays could adversely affect us and lead to a loss of reputation and/or profitability. For further details regarding our business, please refer **“Our Business”** on page 84 of this Prospectus

2. ***Our business is operating under various laws which require us to obtain approvals from the concerned statutory/regulatory authorities in the ordinary course of business and our inability to obtain, maintain or renew requisite statutory and regulatory permits and approvals for our business operations could materially and adversely affect our business, prospects, results of operations and financial condition.***

Our business requires us to obtain and renew from time-to-time certain approvals, licenses, registrations and permits, some of which we have not obtained, or they have expired and for which we have either made or are in the process of making an application for obtaining the approval or its renewal. Further, the approvals, licenses, registrations and permissions under various regulations, guidelines, circulars and statutes regulated by various authorities may contain conditions, some of which could be onerous. There can be no assurance that the relevant authorities will issue these approvals or licenses in a timely manner, or at all. In the event of any unanticipated delay in receipt of such approvals, it will have an adverse impact on our business operations.

Failure by us to renew, maintain or obtain the required permits or approvals at the requisite time may result in the interruption of our operations and may have an adverse effect on our business, financial condition and results of operations. Further, we cannot assure that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any failure to renew the approvals that have expired or apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to us, may impede our operations. For further details, see **“Government and Other Statutory Approvals”** on page 212 of this Draft Red Herring Prospectus. In the event that we are unable to obtain such approvals in a timely manner or at all, our business operations may be adversely affected. We may be involved in any environmental legal proceedings in the course of our business due to non-compliances with terms and conditions of regulatory approvals or authorizations.

3. ***There are outstanding legal proceedings involving our Company, Promoters and Directors. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.***

We are involved in certain legal proceedings which are pending at different levels of adjudication before various courts, tribunals, enquiry officers, and appellate authorities. We cannot provide assurance that these legal proceedings will be decided in our favour. Any adverse decisions in any of the proceedings may have a significant adverse effect on our business, results of operations, cash flows and financial condition.

4. *Our inability to pass on any increase in operating expenses, particularly fuel costs, to our customers which may adversely affect our business and results of operations.*

Fuel costs, toll charges and lorry hire charges represent some of our major operating costs and an increase in such costs or inability to pass on such increase to our customers will adversely affect our results of operations. In particular, the cost of fuel has increased in recent times, and it fluctuates significantly due to various factors beyond our control, including, international prices of crude oil and petroleum products, global and regional demand and supply conditions, geopolitical uncertainties, import cost of crude oil, government policies and regulations and availability of alternative fuels. In recent times, the cost of fuel has been fluctuating due to geopolitical factors. Although in our contracts with few of our customers, we have price variation/diesel variation clause where in the transportation rates are linked and adjusted to the fluctuation in the price of diesel beyond a certain level during the contract, a part of the fluctuation in to be borne by our Company.

However, historically we have generally been able to pass on any increase in the cost of fuel or other operating costs to the customers through periodic increase in our freight rates, there can be no assurance that we will be able to pass on any such increase in the future to our customers either wholly or in part, and our profitability and results of operations may be adversely affected as a result of that. Further, our Company might not be able to accurately gauge or predict the volatility and trends in the movements of the cost of fuel which may affect our business plans and prospects, growth estimates, financial condition and results of operations.

5. *Claims relating to loss or damage to cargo, personal injury claims or other operating risks that are not adequately insured may adversely affect our business, results of operations and financial condition.*

Our business is subject to various risks inherent in the goods transportation industry, including potential liabilities towards our customers which could result from, among other circumstances, damage to property arising from accidents or incidents involving vehicles operated by us. In our goods transportation business, we may be exposed to claims related to cargo loss, theft and damage, property and casualty losses and general liabilities from our customers. In the event of any damage or loss of goods, we may be required to compensate our customers. There have been instances in the past where the customers have made deductions in the payments because of shortage of materials during the transit. While we endeavour to recover such losses, as well as related losses of freight through auctioning the damaged goods or recovery from the truckers, there can be no assurance that we will fully or partially recover any such losses.

Furthermore, any accident or incident involving our vehicles and vehicles hired by us, even if we are fully insured or held not to be liable, could negatively affect our goodwill among customers and the public and could significantly affect the cost and availability of insurance in the future. To the extent that any such uninsured risks materialize, our business, results of operations and financial condition may be materially and adversely affected.

6. *We do not verify the contents of the parcels transported by us, thereby exposing us to the risks associated with the transportation of goods in violation of applicable regulations.*

We transport various goods as part of our goods transportation business, other than goods that are classified as hazardous or illegal. While we obtain a declaration from the customer regarding the contents of the parcel and its value, we do not independently verify its contents. We also do not have any equipment to enable us to verify all our consignments prior to loading in our vehicles. Accordingly, we are unable to guarantee that these parcels do not contain any hazardous or illegal goods. In such circumstances, our vehicles may be confiscated, which could in turn, adversely affect our operations and reputation. In addition, our courier business could involve movement of confidential documents and information, and unauthorized disclosure of such confidential and sensitive information may result in liability for us.

7. *Our Company is proposing to increase its fleet of trucks and consequently also expect demand for qualified drivers to increase. We are working in a man-power centric industry and trained and qualified drivers are crucial to our performance and if our Company is unable to attract and retain a sufficient number of qualified drivers, our business, financial condition and results of operations could be adversely affected.*

As our Company is proposing to increase its fleet of trucks, our Company has to rely significantly on our drivers. There has been an increase in the demand for qualified drivers in the industry in recent years. Any shortage of drivers could force us to further increase driver compensation along with incentives, which could adversely affect our Company's profitability unless our Company is able to offset the increased compensation costs with the attrition rate of the drivers.

This high attrition rate requires us to continuously recruit a substantial number of drivers in order to operate vehicles. If our Company is unable to attract and retain a sufficient number of qualified drivers, we could be forced to decrease the number of assignments our vehicles or limit our growth which may could have a material adverse effect on our business, financial condition and results of operations.

8. We are dependent on various third parties for the adequate and timely supply of equipment and maintenance of our vehicles, and any delays or increase in costs related thereto may adversely affect our business.

We are dependent upon suppliers and other persons for supply of vehicle related equipment and maintenance and/ or servicing of the vehicles. There can be no assurance that such suppliers will continue to supply such vehicles related equipment, spares, tyres or other materials in quantities or prices that are commercially acceptable to us or at all. Events beyond our control may have an adverse effect on the cost or availability of raw materials, components and spare parts.

9. We may be unable to meet certain contractual obligations including timelines of deliveries, due to which we could be liable to claims by customers, suffer adverse publicity and may incur substantial costs as a result of deficiency in our services, which in turn could adversely affect our results of operations.

Many of our contracts/assignments involve providing services that are critical to the operations of our customers' business. Any failure or defect in services could result in a claim against us for substantial damages, regardless of our responsibility for such a failure or defect. In our contracts, we have commitments for safe and timely delivery of the cargo. Any failure to meet the scheduled timelines set by our customers or loss or damage to cargo may lead to our customers raising claims against us. Although, we attempt to limit our contractual liability for all damages, including consequential damages, in rendering our services, we cannot be assured that the limitations on liability we provide for in our service contracts will be enforceable in all cases, or that they will otherwise be sufficient to protect us from liability for damages. Further, in certain instances we may also be required to provide performance bank guarantees to our customers and in case we are not able to perform our contractual obligations, the customers may invoke the bank guarantees to claim damages. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or changes in our insurance policies, including premium increases or the imposition of a large deductible or co-insurance requirement, could adversely affect our financial condition and results of operations.

10. Our Registered Office is not owned by us. The same is occupied by us on a rental basis. Disruption of our rights as tenant or termination of the agreements with our landlord would adversely impact our operations and, consequently, our business.

Our Registered Office is located in Chennai, Tamil Nadu and is used by our company for administrative purpose. Our Company has been occupying the Registered Office at New No.9, Old No.5 Coral Merchant Street, Chennai, Chennai, Tamil Nadu, India, 600001, on rental basis through a rent agreement entered into by our Company with LKC Logistics Private Limited, for a period of 21 months. We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new office and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business through franchise, prospects, results of operations and financial condition.

11. We derive a majority portion of our revenue from operations from our top 10 customers, contributing 97.70%, 99.30% and 99.80% revenue from operations for the Financial Year ended March 31, 2024, March 2023 and March 2022 respectively. Loss of one or more of these customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows.

Our business operations are highly dependent on our top customers, which exposes us to a high risk of customer concentration. The following table summarizes the revenue proportion of our top customers for the respective period:

(Rs. In Lakhs)

Particulars	For the Financial Year ended		
	March 31, 2024	March 31, 2023	March 31, 2022
Top 10 customers	11,295.21	10,480.66	11,343.71

Loss of one or more of these customers or a reduction in the amount of business we obtain from them for any reason including due to loss of, or failure to renew existing arrangements; adverse general economic conditions; disputes with such customers; decline in business of such customers; adverse changes in the financial condition of such customers; adverse change in any of such customers' supply chain strategies; reduction in their outsourcing of logistics operations;

or if such customers decide to choose our competitors over us, could have an adverse effect on our business, results of operations, financial condition and cash flows.

In order to retain some of our existing customers we may also be required to offer terms to such customers which we may place restraints on our resources. We cannot assure you that we will be able to maintain historic levels of business with our top customers or negotiate commercially favourable arrangements. Further, we may be reluctant to proceed against customer and strain the relations in the event of disagreements or disputes relating to our services.

12. *There are certain discrepancies / errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 2013. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.*

The Company has generally complied with certain statutory provisions and there are the following discrepancies have been mentioned in the forms filed by the company with the Registrar of Companies under provisions of Companies Act, 2013:

- Provisions of SS-1 and SS-2 of the Companies Act, 2013 were not complied by the Company at the time of preparation of the documents for filling of forms. Further, the Company is complying with the said regulation post identification of the same.
- Our Company failed to comply with few of the provisions of Section 12(3) (a) and (c) of the Companies Act, 2013 by not mentioning Corporate Identity Number along with telephone number, fax number, e-mail and website addresses of the company on its business letters, and billheads. Upon identification of the said non-compliances, the Company has adhered to the provision mentioned in Section 12 of the Companies Act, 2013.
- Delay in filing of E-Form AOC-4 for the Financial Year 2017-18, 2018-19, 2021-22 and 2022-23 pursuant to Section 137 of Companies Act, 2013 for filing of Financial Statements for the Financial Year, However We have paid the additional fees amount under Companies Act, 2013 beyond 30 days of Annual General Meeting.
- Delay in filing of E-Form MGT-7 pursuant to Section 92 (4) of Companies Act, 2013 for filing of Annual Returns for the Financial Year 2022-23, However, we have paid the additional fees amount under Companies Act, 2013 beyond 60 days of Annual General Meeting.

Delay in filing of E-Form ADT-1 pursuant to Section 139 of Companies Act, 2013 for filing of Notice for appointment of Statutory Auditor, However, we have paid the additional fees amount as required under Companies Act, 2013.

- Delay in filing E-Form CHG-1 pursuant to Section 77 of the Companies Act, 2013 for the creation of charge. However, we have paid the additional fees amount as required under Companies Act, 2013.

Notices maybe issued upon our Company and fines or penalties may also be imposed upon our Company, which may adversely affect our administration from compliance perspective. There can be no assurance that no penal action will be taken against us by the regulatory authorities with respect to the non-compliances. If any adverse actions are taken against us, our financial results could be affected.

Additionally, we have strengthened our internal compliance system by introducing the 'Maker Checker' System and have undertaken steps to update the internal database with latest circulars and amendments to ensure future compliance. In the event the Company fails to submit the requisite disclosures to the regulators in the future, then the Company may be penalised by the regulators and the same may affect our results of operations.

13. *Inadvertent reporting of number of Board Meetings conducted in the Company's Board Report and Annual Return for the Financial Year 2017-18.*

We inadvertently reported an incorrect number of Board Meetings held during the financial year 2017-18 in our Board's Report. The Annual Return of the Financial Year 2017-18 also reflects this error, stating that only three board meetings were conducted instead of four meetings, since Section 173 of the Companies Act, 2013 mandates a minimum of four board meetings in a Financial Year. As a result, there is a risk of penalty being imposed by the Registrar for non-compliance with Section 173 of the Companies Act, 2013.

14. Majority of our revenues are generated from the State of Tamil Nadu Any adverse development affecting our operations in this region could have an adverse impact on our business, financial condition and results of operations.

We derive majority of our revenue from the State of Tamil Nadu. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in these regions to expand our operations in other parts of India. Details of the revenue derived from the State of Tamil Nadu is mentioned below:

(Rs. In Lakhs)

Particulars	For the Financial Year ended		
	March 31, 2024	March 31, 2023	March 31, 2022
Revenue from Operations from State of Tamil Nadu	6,734.63	4,876.91	5,298.37
Total Revenue from Operations	11,558.61	10,552.33	11,369.85

Our Company had negative cash flows from our operating activities as well as investing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

(₹ in lakh)

Particulars	For the Financial Year ended		
	March 31, 2024	March 31, 2023	March 31, 2022

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

16. Our Group entities have objects similar to that of our Company's business and this could lead to a potential conflict of interest.

Our Group Entities i.e. SLB Logistics Private Limited is engaged in the similar line of business and have objects similar to that of our Company's business. Currently we do not have any non-compete agreement/arrangement with any of our Group Entities. Such a conflict of interest may have adverse effect on our business and growth.

17. We have applied for registration of our name and logo but do not own the trademark legally as on date. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third-party intellectual property rights.

We have applied for registration of our logo under the provisions of the Trademarks Act, 1999 and do not own the trademark as on date. The application is currently objected before the Registrar of Trademarks and we have responded to the objection accordingly. As such, we do not enjoy the statutory protections accorded to a registered trademark as on date. There can be no assurance that we will be able to register the trademark and the logo in future or that third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Further, we cannot assure you that any application for registration of our trademark in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property. For further details, please refer to the chapter titled "**Government and Other Approvals**" on page 212 of this Draft Red Herring Prospectus.

18. We require a number of approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Some of the approvals are required to be obtained by our Issuer Company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.

We require several statutory and regulatory permits, licenses, and approvals to operate our business. Many of these approvals are granted for fixed period of time and need renewal from time to time. Presently, we have applied for updating licenses and approvals in the name of **“Rapid Fleet Management Services Limited”** from **“Rapid Fleet Management Services Private Limited”**. We require to keep already obtained valid key approvals such as, Tax Registration, License under Food Safety and Standards Act, 2006, Importer Exporter Code etc., for running our operations in a smooth manner. Some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses, or approvals. Further, our Trademark registration bearing application no. 5662669 has been objected by the authorities. Any failure by us to obtain the required permits, licenses or approvals, or the cancellation, suspension, or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please see chapters titled **“Key Industry Regulations and Policies”** and **“Government and Other Statutory Approvals”** at pages 142 and 212 respectively of this Draft Red Herring Prospectus.

19. We operate in a highly fragmented and competitive industry and may not be able to maintain our market position which may adversely affect our business, financial condition, results of operation and cash flows.

We operate in a competitive industry across our business verticals. In particular, the road transport industry is highly unorganised and fragmented in nature, and comprises players providing transportation services, intermediaries, such as transport contractors, booking agents and brokers, and consignors. In the logistics industry, we compete with a variety of local, regional and global logistics service providers of varying sizes, operations and financial resources.

Our service quality, reliability, price and the ability to understand evolving industry trends as well as the ability to anticipate, understand and address customer requirements, and timely service, are important competitive factors. The availability and configuration of vehicles and other facilities that are able to comprehensively address varying requirements of different industries and specific customer needs is also another factor. Our competitors may successfully attract our clients by matching or exceeding what we offer. Among other things, our competitors may:

- expand their transportation network or increase the frequency in their existing routes;
- reduce, or offer discounts on their prices; or
- benefit from greater economies of scale, if they are larger than us, and operating efficiencies such as a broader logistics network, a wider range of services, larger brand recognition or greater financial resources than we do and may be able to devote greater resources to pricing and promotional programs.

20. We depend significantly on our vendors to provide transport facilities. A loss of, or a significant decrease in services provided by our vendors could adversely affect our business and profitability.

The Company relies on third-party vendors to provide some transportation services, when our own vehicles aren’t available. This dependence exposes the Company to the risks associated with the performance and stability of these vendors. Any disruptions or significant decreases in the transportation industry could impact these services’ availability, reliability, and cost, directly affecting the Company’s ability to fulfil its contractual obligations and meet customer demands. If the Company loses any transportation provider, it may be difficult to find a suitable replacement quickly and at competitive rates. Consolidation within the transportation industry could lead to reduced competition and increased prices for services, impacting the Company’s profitability. A downturn in the transportation industry could lead to decreased demand for services, putting pressure on the Company’s margins and revenue. A shortage of qualified drivers or other transportation personnel could lead to service disruptions and increased costs.

21. The average cost of acquisition of Equity Shares by the Promoters may be less than the Issue Price.

The average cost of acquisition of Equity Shares by the Promoters may be less than the Issue Price. The details of the average cost of acquisition of Equity shares held by the Promoters are set out as below:

Name of the Promoters	Average Cost of Acquisition (₹)
Mr. Anand Poddar	0.29
Ms. Shruti Poddar	0.20

22. *Our business involves usage of manpower and any unavailability of our employees or any strikes, work stoppages may have an adverse impact on our cash flows and results of operations.*

Our business involves usage of manpower, and we are dependent on the availability of our employees. Unavailability of employees, strikes, and work stoppages may have an adverse impact on our cash flows and results of operations. We may not be able to secure the required number of employees required for the timely execution of orders. We are subject to laws and regulations relating to employee welfare and benefits such as minimum wage, working conditions, employee insurance, and other such employee benefits and any changes to existing legislations. Further, there can be no assurance that disruptions in our business will not be experienced if there are strikes, work stoppages, disputes, or other problems. This may adversely affect our business and cash flows and results of operations.

23. *We are subject to various risks associated with transportation and we may face claims relating to loss or damage to cargo, personal injury claims or other operating risks that are not adequately insured*

Our business is subject to various risks inherent in the logistics industry, including potential liability to our customers which could result from, among other circumstances, personal injury to persons or damage to property arising from accidents or incidents involving vehicles operated by us. In the normal course of business, we may be exposed to claims from our customers arising from theft, damage or loss of the materials.

We may, in certain circumstances, be required to compensate our customers in the event of any damage or loss of goods transported by us. Road transport services involve many risks and hazards, including mechanical breakdowns; however, insurance cover may be expensive, or may not be available, for certain of these risks. We may become subject to liability for hazards which we cannot, or may not elect to, insure because of high premium costs or other reasons, or for occurrences which exceed maximum coverage under our policies. We operate a mix of our own vehicles and vehicles engaged on a hire-basis for specific consignments. Despite having experienced drivers and giving necessary instructions to vehicle owners/ representatives, we bear the risk of vehicles carrying the cargo being involved in collusion, malfunctioning, manufacturing defect, title issue which may lead to non-delivery of cargo on a timely basis or at all.

Further, we may also have to suffer losses on account of repair of the vehicles (in the case of owned vehicles) and losses on account of human injuries. We also run the risk of contamination by unauthorized carrying of contraband items resulting in confiscation of the vehicles along with materials and cargo.

Certain of the materials that we transport are corrosive and flammable and require skilled handling. Any failure or mishandling of such materials, may cause accidents, fire, loss of human life and property, damage to our and third-party property and, or, environmental damage, require shutdown of one or more of our warehouses and expose us to civil or criminal liability. If any such event were to occur we could be subject to significant penalties, other actionable claims and, in some instances, criminal prosecution. In addition to adversely affecting our reputation, any such accidents, may result in a loss of our vehicles and/or disruption in our warehouses entirely, which may have an adverse effect on our results of operations, cash flows and financial condition. Though, there are no such incidents had been occurred in the past.

While we maintain insurance coverage at levels and for risks that we believe are customary in the logistics industry in India. Furthermore, any accident or incident involving vehicles operated by third party suppliers, even if these vehicles are fully insured or we are held not to be liable, could negatively affect our reputation among customers and the public, thereby making it difficult for us to compete effectively, and could significantly affect the cost and availability of insurance in the future. To the extent that any such uninsured risks materialize, our business, financial condition, results of operations and cash flows may be materially and adversely affected.

24. *Our business is highly dependent on technology and any disruption or failure of our technology systems may affect our operations.*

We believe that our technological capabilities play a key role in helping us effectively manage our pan-India operations, maintain operational and fiscal controls, and support our efforts to enhance client service levels. Our business is significantly dependent on the efficient and uninterrupted operation of our technology infrastructure and systems such as our transportation management system and control tower and our warehouse management system. For further details, see “*Our Business*” on page 117.

Our operations are vulnerable to interruption by events beyond our control such as fire, earthquake, power loss, telecommunications or internet failures, terrorist attacks and computer viruses. We are also subject to hacking or other attacks on our IT systems, and we cannot assure you that we will be able to successfully block or prevent all such attacks. Any breaches of our IT systems may require us to incur further expenditure on repairs or more advanced security systems. A significant system failure could adversely affect our ability to manage overall operations, thereby affecting our ability to deliver our services to our clients, affecting our reputation and revenues. We may also be exposed to multiple claims

for failed delivery of goods. If such interruption is prolonged, our business, operations, financial condition and results of operations may be materially and adversely affected.

We expect our clients to continue to demand more sophisticated and customized solutions. We may lose clients and our business could be affected if we fail to implement and maintain our technology systems or fail to upgrade or replace our technology systems to handle increased volumes, meet the demands of our clients and protect against disruptions of our operations. Our operating efficiency may decline, and our growth may suffer if our technology systems are unable to handle additional volume of our operations as we grow. Some of our existing technologies and processes in the business may become obsolete or perform less efficiently compared to newer and better technologies and processes in the future. Certain of our competitors may have access to similar or superior technology or may have better adapted themselves to technological changes. The logistics industry could also experience unexpected disruptions from technology-based start-ups. The cost of upgrading or implementing new technologies, upgrading our equipment or expanding their capacity could be significant and could adversely affect our business, operations, financial condition and results of operations.

25. *Our failure to perform in accordance with the standards prescribed in our client contracts could result in loss of business or payment of liquidated damages.*

We may be unable to effectively address capacity constraints or accurately predict capacity requirements, as a result of which our clients may experience service shortfalls. Any disruptions to our businesses, including as a result of actions outside of our control, could significantly impact the continued performance of our contractual obligations to meet the quality or performance standards set out in our client contracts which may in-turn harm our reputation, cause clients to terminate their contracts with us, impair our ability to obtain renewal of our contracts from existing clients and impair our ability to grow our client base, any of which could adversely affect our business, financial condition and results of operations. In the event that we are unable to meet the prescribed obligations, we may also be required to pay compensation or liquidated damages to our clients on the terms set out in our contracts. In certain instances, we may also be required to bear consequential liability.

26. *Some of the KMPs are associated with our Company for less than one year.*

Our Key Management Personnel, Chief Financial officer and Company Secretary & Compliance Officers are associated with the Company for a period of less than one year therefore they may not have been accustomed to the company affairs till date. For details of Key Management Personnel and their appointment, please refer to chapter “*Our Management*” beginning on page 158 of this Draft Red Herring Prospectus.

27. *Certain documents in relation to work experience for one of our directors prior to joining our Company are not available and due to insufficient documentary evidence those experiences are not included in his brief profile in this Draft Red Herring Prospectus.*

Our Independent Director, Mr. Rupesh Kothari, is currently unable to locate copies of documents related to his previous work experiences. Prior to joining our Company, he accumulated experiences in various roles at other companies. However, due to the absence of documentary evidence, we have been unable to independently verify these details for inclusion in this Draft Red Herring Prospectus. Additionally, there is no assurance that our Director will be able to retrieve the relevant documents pertaining to his prior experiences in the future, if at all.

28. *Certain documents in relation to educational qualification for some of our Directors are not available and due to insufficient documentary evidence those qualifications are not included in their profiles in this Draft Red Herring Prospectus.*

Our Managing Director Mr. Anand Poddar and Independent Director Mr. Rupesh Kothari have been unable to trace copies of certain documents pertaining to their educational qualification. In absence of primary documentary evidence, neither we, nor the Book Running Lead Manager have been able to independently verify these details for inclusion of the same in this Draft Red Herring Prospectus. Further, there can be no assurances that they will be able to trace the relevant documents pertaining to their qualification in the future, or at all.

29. *Brand recognition is important to the success of our business, and our inability to build and maintain our brand name will harm our business, financial condition and results of operation.*

Brand recognition is important to the success of our business. Establishing and maintaining our brand name in the industry or for people relying on services is critical to the success of the customer acquisition process of our business. Although, we expect to allocate significant number of resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brand name will be effective in attracting and growing user and client base for our businesses or that such efforts will be cost-effective, which may negatively affect our business, financial condition and results of operations.

The Company's success significantly depends on its brand recognition and reputation within the transportation services industry. Failure to build and maintain strong brand name could adversely impact the Company's business, financial condition, and operation results.

Customers are more likely to choose and remain loyal to companies they recognise and trust, leading to increased revenue and market share. Strong brand recognition may allow the Company to command premium prices for its services compared to less-known competitors. A respected brand attracts and retains skilled professionals, further enhancing the Company's competitiveness. A well-established brand requires less marketing and advertising expenditure to reach target customers. If the Company fails to reach its target audience with its marketing and branding efforts, it may not achieve the desired level of brand recognition. Any negative publicity or reputational damage, such as accidents, service failures, or ethical lapses, could significantly erode brand equity and customer trust. The transportation industry is highly competitive, and established brands may significantly challenge the Company's efforts to build brand recognition. Customer preferences can shift over time, and the Company's brand may become less relevant or appealing if it fails to adapt to changing market trends.

30. We may not be able to realise the amounts, partly or at all, reflected in our Order Book which may materially and adversely affect our business, prospects, reputation, profitability, financial condition and results of operation.

Future earnings related to the supply of our services in the order book may not be realized and although the orders in the order book represent business that is considered firm, cancellations or scope or schedule adjustments may occur. We may also encounter problems executing the order or executing it on a timely basis. Moreover, factors beyond our control or the control of our clients may postpone the delivery or cause its cancellation, including delays or failure to obtain necessary permits, authorizations, permissions, right-of-way, and other types of difficulties or obstructions. Due to the possibility of cancellations or changes in scope and schedule of orders, resulting from our clients' discretion or problems we encounter in execution of such contracts or reasons outside our control or the control of our clients, we cannot predict with certainty when, if or to what extent an order forming part of our order book will be performed. Delays in the completion of a delivery can lead to clients delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such order. Even relatively short delays or difficulties in the execution of an order could result in our failure to receive, on a timely basis or at all, all payments due to us on a project.

31. Our success depends in large part upon our qualified personnel, including our senior management, directors and key personnel and our ability to attract and retain them when necessary.

Our operations are dependent on our ability to attract and retain qualified personnel. While we believe that we currently have adequate qualified personnel, we may not be able to continuously attract or retain such personnel, or retain them on acceptable terms, given the demand for such personnel. The loss of the services of our qualified personnel may adversely affect our business, results of operations and financial condition. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting the qualified employees that our business requires. Furthermore, our senior management team is integral to the success of our business. However, we cannot assure you that we will be able to retain any or all of our management team. Any loss of our senior management or key personnel or our inability to recruit further senior managers or other key personnel could impede our growth by impairing our day-to-day operations and hindering our development of ongoing and planned projects and our ability to develop, maintain and expand customer relationships.

32. Significant security breaches in our computer systems and network infrastructure and fraud could adversely impact our business.

We seek to protect all the computer systems and network infrastructure in our offices from physical break-ins as well as security breaches and other disruptive problems. Computer break-ins and power disruptions could affect the security of information stored in and transmitted through these computer systems and networks. To address these issues and to minimise the risk of security breaches we employ security systems, including firewalls and intrusion detection systems, conduct periodic penetration testing for identification and assessment of potential vulnerabilities and, use encryption technology for transmitting and storing critical data such as passwords. However, these systems may not guarantee prevention of frauds, break-ins, damage and failure. A significant failure in security measures could have an adverse effect on our business.

33. *Our business strategies and expansion plans may be subject to various unfamiliar risks and may not be successful.*

Our business strategies include the diversification of our revenue streams by addition of new clients, strengthening our relationships with our existing clients, focus on large transactions and providing integrated, end-to-end solutions, focus on increasing our revenues from new and existing industry verticals and taking advantage of the changing logistics industry dynamics.

These strategies require us to expand our operations to other geographical areas and in new industry verticals. Risks that we may face in implementing our business strategy in these markets may substantially differ from those previously experienced, thereby exposing us to risks related to new markets, industry verticals and clients. The commencement of operations beyond our current markets and industry verticals is subject to various risks including unfamiliarity with pricing dynamics, competition, service and operational issues as well as our ability to retain key management and employees. There can also be no assurance that we will not experience issues such as capital constraints, difficulties in expanding our existing operations and challenges in training an increasing number of personnel to manage and operate our expanded business, or that we will be able to successfully manage the impact of our growth on our operational and managerial resources and control systems. We may not be able to successfully manage some, or all of the risks associated with such an expansion into new geographical areas and new industry verticals, which may place us at a competitive disadvantage, limit our growth opportunities and materially and adversely affect our business, results of operations and financial condition. Furthermore, our participating in industry verticals such as e-commerce and bulk has increased in recent financial periods. We cannot guarantee that our business in these industry verticals will continue to perform in a manner consistent with its performance in prior periods.

Going forward, we plan to make further investments or undertake transactions to enhance our operations and technological capabilities in the markets where we currently operate. However, it is possible that we may not be able to identify suitable investment opportunities in the future and if we do identify suitable opportunities, we cannot assure you that we will be able to achieve the strategic purpose of these investments and generate the expected benefits. Our management's attention and resources may also be diverted from our operations as a result of these investment transactions. If any of the foregoing risks materialize, it could adversely affect our business, financial condition, results of operations and prospects.

34. *Misconduct or errors by manpower engaged by us could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Misconduct or errors by manpower engaged by us could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such misconduct includes breach of security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective.

The risks associated with the deployment of manpower engaged by us across several locations include, among others, possible claims relating to:

- actions or inactions, including matters for which we may have to indemnify our clients;
- our failure to adequately verify personnel backgrounds and qualifications resulting in deficient services;
- failure of manpower engaged by us to adequately perform their duties or absenteeism;
- errors or malicious acts or violation of security, privacy, health and safety regulations; and
- damage to our clients' facilities or property due to negligence or criminal acts.

These claims may give rise to litigation and claims for damages, which could be time-consuming. These claims may also result in negative publicity and adversely impact our reputation and brand name. Further, as per the terms of certain client contracts, we indemnify our clients against losses or damages suffered by our clients as a result of negligent acts of manpower engaged by us. We may also be affected in our operations by the acts of third parties, including sub-contractors and service providers. Any claims and proceedings for alleged negligence as well as regulatory actions may in turn materially and adversely affect our brand and our reputation, and consequently, our business, financial condition, results of operations and prospects.

35. *Our Company's insurance coverage may not be adequate to cover all losses associated with our business operations.*

We procure insurance for our operations against third-party liability, transportation risks, stock insurance at warehouse, and employees' health. Our existing insurance coverage may be insufficient to cover all the risks associated with our business and operations, for example the risks involved in accidental damages arising out of handling, operating and maintaining of equipment outsourced from third parties on lease. Typically, our customers are responsible for obtaining insurance policy for their respective cargo/consignment transported through our logistics services and solutions. In certain cases, depending on the business arrangement, we may undertake to obtain insurance on behalf of our customers for their cargo/consignment. We are exposed to damages and loss arising out of risks such as sinking of ship along with cargo, intrusion by pirates and robbery of cargo, damage of cargo due to natural disaster etc. In the case of an uninsured loss or a loss in excess of insured limits, including those caused by natural disasters and other events beyond our control, we may be required to pay for losses, damages and liabilities out of our own funds, which could materially and adversely affect our business, financial condition and results of operations. Even if our insurance coverage is adequate to cover our direct losses, we may not be able to take remedial actions or other appropriate measures. Furthermore, our claim records may affect the premiums which insurance companies may charge us in the future. Further, even if our insurance coverage is adequate, we may not be able to successfully claim the entire damage. Re-imburement and indemnity of damages by insurance companies generally involve strict inspection and verification procedures.

36. *General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.*

Our business is highly dependent on economic and market conditions in India and other jurisdictions where we operate. General economic and political conditions in India, such as macroeconomic and monetary policies, industry-specific trends, mergers and acquisitions activity, legislation and regulations relating to the financial and securities industries, household savings rate, investment in alternative financial instruments, upward and downward trends in the market, business and financial sectors, volatility in security prices, perceived lack of attractiveness of the Indian capital markets, inflation, foreign direct investment, consumer confidence, currency and interest rate fluctuations, availability of short-term and long-term market funding sources and cost of funding, could affect our business. Global economic and political conditions may also adversely affect the Indian economic conditions. Market conditions may change rapidly, and the Indian capital markets have experienced significant volatility in the past. The Indian economy has had sustained periods of high inflation in the recent past. If inflation or real interest rates were to rise significantly, the trends towards increased financial savings might slow down or reverse, our employee costs may increase and the sales of many of our products and services may decline.

37. *Major fraud, lapses of internal control, system failures, theft, employee negligence or similar incidents could adversely impact the company's business.*

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, theft, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company's operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

Despite implementing security measures and internal controls, there is no guarantee that we will completely avoid instances of fraud, theft, employee negligence, or security lapses in the future. Any such occurrence could lead to significant financial losses and affect our overall business performance.

Although we have insurance coverage against losses due to theft, fire, breakage, or damage caused by other casualties, the extent of coverage may not fully mitigate the financial impact of such incidents on our operations and financial condition. In some cases, the losses incurred may exceed the insurance coverage, resulting in additional financial strain for the company. Though, there had been no of such instances in past, we may not able to assure such incident will not happen in the future.

38. *We have entered into related party transactions in the past and may continue to do so in the future.*

We have in the course of our business entered into, and will continue to enter into, several transactions with our related parties. For further information, see "**Financial Statements – Annexure XXVIII "Related Party Transactions"**" on page 51. We cannot assure you that we will receive similar terms in our related party transactions in the future. While we believe that all such related party transactions that we have entered into in last three fiscals are legitimate business transactions conducted on an arms' length basis, in compliance with the requirements stipulated in Companies Act, 2013, and relevant Accounting Standards and other statutory compliances, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. Any further transactions with our

related parties could involve conflicts of interest. While we have not had any conflict of interest in relation to our equity shareholders in the past, we cannot assure you that such conflicts will not arise in the future. Further, we cannot assure you that such transactions, individually or in the aggregate, will not have any adverse effect on our business and financial results, including because of potential conflicts of interest or otherwise. For further information on our related party transactions, see “*Financial Statement – Annexure - XXVIII Related Party Transactions*”.

- 39. *The nature of our business exposes us to liability claims and contract disputes and our indemnities may not adequately protect us. Any liability in excess of our reserves or indemnities could result in additional costs, which would reduce our profits.***

Time is often of the essence in our business work. In the event there are delays in our current or future service, we will not be able to get extensions from our customers. Further, in some contracts, in case of delay due to deficiency in services by us, clients may have the right to complete the work at our risk and cost by engaging a third party. In the event we fail to perform under the terms of a particular contract, that could adversely affect our financial conditions and business operations. Failure to effectively cover ourselves against any of these reasons could expose us to substantial costs and potentially lead to material losses. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us.

- 40. *Delays or defaults in payments from our clients could result into a constraint on our cash flows. The efficiency and growth of our business depends on timely payments received from our clients.***

In the event, our client’s default or delay in making payments and clearing their dues, we may not have adequate resources to fund our business and implement our growth plans. This could have an adverse effect on the results of operations and our financial condition.

- 41. *Our actual results could differ from the estimates and projections used to prepare our financial statements.***

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

- 42. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholder’s investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 189 of this Draft Red Herring Prospectus.

- 43. *Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

- 44. *There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all.***

In accordance with Indian law and practice, permission to list the Equity Shares will not be granted until after the Equity Shares have been issued and allotted. Approval will require all other relevant documents authorizing the issuing of our Equity Shares to be submitted. There could be a failure or delay in listing our Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

45. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of Our Company.

Since, the Issue size is less than ₹10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised from this Issue, is hence, at the discretion of the management and the Board of Directors of Our Company and Our Company’s management will have flexibility in applying the proceeds of the Issue and will not be subject to monitoring by any independent agency. The fund requirement and deployment mentioned in the Objects of the Issue is based on internal management estimates and have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. However, our Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. Also, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Issue without the Company being authorized to do so by our shareholders by way of special resolution and other compliances as applicable in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

46. Negative publicity could adversely affect our revenue model and profitability.

We work in the market where trust of the customers on us and upon the services provided by us matters a lot. Any negative publicity regarding our company or the services rendered by the company due to any other unforeseen events may affect our reputation and image which leads to the adverse effect on our business and goodwill as well.

47. Industry information included in this Draft Red Herring Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.

48. The requirements of being a public listed company may strain our resources and impose additional requirements.

As we transition to being a publicly listed company, we anticipate encountering new challenges and responsibilities that were not present before. These include heightened scrutiny from shareholders, regulators, and the public, resulting in

increased legal, accounting, and corporate governance expenses. Moreover, we will need to adhere to listing agreements with stock exchanges, necessitating the regular filing of unaudited financial results. Meeting these obligations will require significant resources and management oversight, potentially diverting attention from other aspects of our business. There is also the need to strengthen our management team with individuals possessing public company experience and accounting expertise. However, the timely acquisition of such talent is not guaranteed. Overall, this transition may pose obstacles to our business operations and could impact our ability to promptly report changes in our financial performance compared to other listed companies.

Issue Specific Risks:

49. There are restrictions on daily/weekly/monthly movements in the price of the Equity Shares, which may adversely affect a shareholders' ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

50. After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- a. Volatility in the Indian and global capital market;
- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors,
- d. Adverse media reports on Company or pertaining to the agriculture Industry;
- e. Changes in our estimates of performance or recommendations by financial analysts;
- f. Significant developments in India's economic and fiscal policies; and
- g. Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

51. You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

52. The Issue price of our Equity Shares may not be indicative of the market price of our Equity shares after the issue.

The Issue price of our equity Shares has been determined by Book Built Method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuation after the issue and may decline below the issue price. We cannot assure you

that you will be able to sell your Equity Shares at or above the Issue price. For further details you may refer chapter titled “*Basis for Issue Price*” beginning on the page 86 of this Draft Red Herring Prospectus.

Some of the factors which may affect our share price without limitations are as follows:

- Reports on research by analysts.
- Changes in revenue.
- Variations in growth rate of our financial indicators such as earning per share, income, profit etc.
- General Market Condition
- Domestic and International Economy.

53. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the Trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISKS

Industry Related Risks:

54. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

55. *Malpractices by some players in the industry affect overall performance of emerging Companies*

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers’ attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

Other Risks:

56. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India. Any gain on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax (“STT”) has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain on the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October 2004 shall be available only if the acquisition of share is

chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1st day of October 2004 on which STT was not charged will attract tax under provisions of Long-Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April 2018 if the long-term capital gains exceeds ₹ 1,00,000.00 p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April 2018 in excess of ₹1,00,000.00 pa. shall be chargeable at the rate of 10%. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

57. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements, prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Red Herring Prospectus.*

As stated in the reports of the Auditor included in this Draft Red Herring Prospectus under chapter "**Financial Statements as Restated**" beginning on page 191 the financial statements included in this Draft Red Herring Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Red Herring Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Red Herring Prospectus. Accordingly, the degree to which the financial information included in this Draft Red Herring Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited.

58. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

59. *Financial instability in Indian Financial Markets could adversely affect our Company's results of operation and financial condition.*

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

60. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in this Draft Red Herring Prospectus.*

While facts and other statistics in this Draft Red Herring Prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These

facts and other statistics include the facts and statistics included in the chapter titled “*Our Industry*” beginning on page 96 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

61. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

62. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

63. *Natural calamities could have a negative impact on the Indian economy and cause Our Company’s business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

64. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

65. *Any downgrading of India’s sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

66. *Our business and activities are regulated by the Competition Act.*

The Competition Act, 2002 (the “Competition Act”) was enacted for the purpose of preventing practices having an adverse effect on competition in India and has mandated the Competition Commission of India (the “CCI”) to regulate such practices. Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which causes or is likely to adversely affect competition in India is void and may result in substantial penalties. Any agreement among competitors which directly or indirectly determines purchase or sale prices, directly or indirectly results in bid rigging or collusive bidding, limits or controls production, supply, markets, technical development, investment or the provision of services, or shares the market or source of production or provision of services in any manner, including by

way of allocation of geographical area or types of goods or services or number of clients in the relevant market or any other similar way, is presumed to adversely affect competition in the relevant market in India and shall be void. The Competition Act also prohibits the abuse of dominant position by any enterprise. Further, if it is proved that any contravention committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the contravention and may be punished.

Consequently, all agreements entered by us may fall within the purview of the Competition Act. Further, the CCI has extraterritorial powers and can investigate any agreements, abusive conduct or combination occurring outside India if such agreement, conduct or combination adversely affects competition in India. The applicability of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, may adversely affect our business, results of operations and prospects.

67. We may not receive final listing and trading approvals from the Stock Exchanges and you will not be able to sell immediately on an Indian Stock Exchange any of the Equity Shares you are allotted in the Issue.

Under the SEBI ICDR Regulations, we are permitted to list the Equity Shares within three working days of the Bid/Issue Closing Date. Justification for Holding Period Levels

Particulars	Detail
Inventories	Since we are service oriented company, we do not have any inventories to report.
Trade Receivables	Trade receivables are amount owed to Company by clients following completion of services. Over the past 2 fiscal years, we had trade receivable days of 82 days in FY 2021-2022 and 94 days in FY 2022-2023. Furthermore, we have witnessed same line of holding period for FY 2023-2024 which is 90 days as trade receivables has increased in line with stimulated increased sales volume and has foster stronger customer relationships. Looking ahead we anticipate maintaining a consistent level of 90 days for FY 2024-2025. By prioritizing effective credit management practices and proactive receivables management strategies, we can uphold a consistent turnover ratio and reap the associated benefits for long-term success.
Cash and Cash Equivalents	Cash & cash equivalents available with the company shall be utilised for working capital and further expansion thereby leading to holding level of 18 days in FY 2023-24. Over the past two fiscal years, we have observed variations in our cash & cash equivalent days. We anticipate to maintain our holding days to 5 days in FY 2024-2025 and utilise the cash to maintain liquidity and emergency funds.
Short Term Loans & Advances	Short term loans and advances majorly include advances to suppliers and Other deposits which is expected to be having holding period of 6 days in FY 2024-2025 in line with FY 2023-2024 of 9 days. During FY 2021-2022 we observed holding days of 1 day denoting advances. As the company grew, we have witnessed holding days of 21 days as there was increase in Advances to suppliers to cater to the increase in demand and achieve favourable hire charges from our suppliers/Transporters.
Other Current Assets	Other Current Assets majorly comprise of Interest receivable on Fixed Deposits and TDS Receivable from customers which we have assumed to be 5 days for FY 2024-2025 same as for FY 2023-2024.
Short-term Borrowings	Short Term Borrowings include current maturities of long-term debt which is around 1 month in first 2 fiscal years. Eventually as the debt is repaid, there was a decrease in holding days to 27 days in FY 2023-2024. However, we expect to reduce further to 4 days in FY 2024-2025 as current maturities shall be repaid out of cash available with the company.
Trade Payables	Over the last years, our trade payables have exhibited a significant variation. There was a notable increase to 140 days in FY 2021-2022 and a further increase to 164 days in FY 2022-2023. Looking ahead, we anticipate reducing the days to 106 days as on FY 2023-2024 and further

	reduce to 50 days to encash discounts on early payments as we intend to utilise the issue proceeds. This reduction would give us financial benefit and help us to enhance the image in the market.
Other Current Liabilities	Other current liabilities include statutory dues payable, advance from customers and other payables. We have assumed just 3 day holding period for other current liabilities in FY 2024-2025 as we intend to utilise the issue proceeds. In the initial 2 fiscal years, our holding period stood at 4 days for both FY 2021-2022 and FY 2022-2023. However, the same rose to 14 days for the FY 2023-2024 due to increase in GST liability as on that date.
Short-term Provisions	The short-term provisions are mainly of income tax, provision for Gratuity and Other Expenses, the income tax has been calculated as the provisions of income tax act and CSR provisions is made as per applicable provisions of Companies Act. During Fiscal 2022, there were no applicability for CSR, Gratuity etc. Assumption of 17 days in the financial year 2024-25 as compared to 11 days in 2023-24 is reasonable.

Pursuant to the certificate dated August 10, 2024, M/s. Jay Gupta & Associates, Chartered Accountants, have verified the working capital requirements for the period ended on March 31, 2024 from the Restated Financial Information and working capital estimates for the financial year 2025 as approved by the Board pursuant to its resolution dated August 10, 2024.

GLOBAL ECONOMY AT LARGE

Disinflation amid Economic Resilience

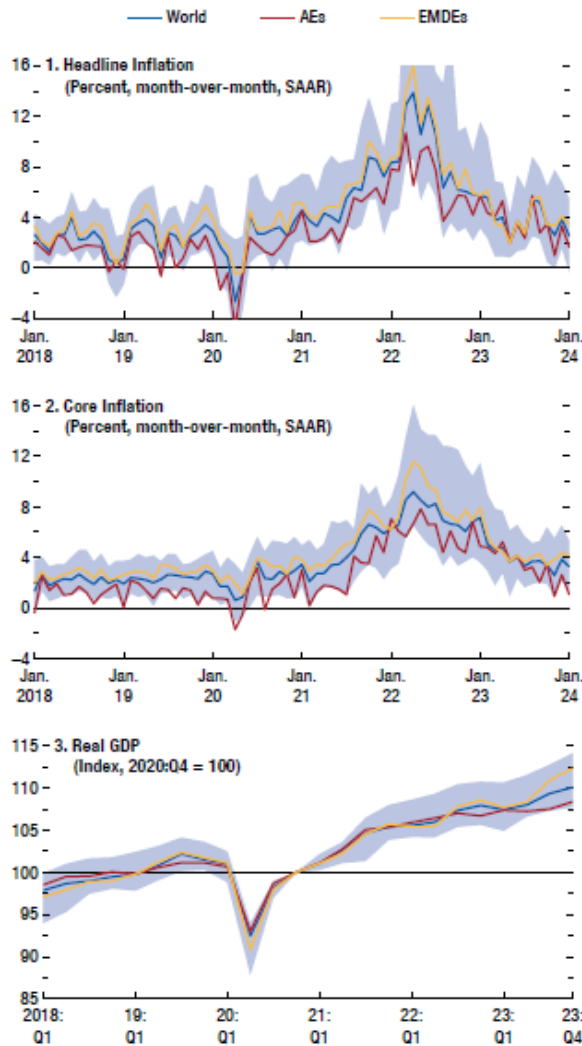

Economic activity was surprisingly resilient during the global disinflation of 2022–23. Growth in employment and incomes has held steady as favourable demand and supply developments have supported major economies, despite rising central bank interest rates aimed at restoring price stability. As inflation converges toward target levels and central banks pivot toward policy easing, a tightening of fiscal policies aimed at curbing high government debt levels, with higher taxes and lower government spending, is expected to weigh on growth. The pace of expansion is also expected to remain low by historical standards as a result of factors including the long-term consequences of the COVID-19 pandemic, Russia’s invasion of Ukraine, weak growth in productivity, and increasing geoeconomic fragmentation.

In late 2023, headline inflation neared its pre-pandemic level in most economies for the first time since the start of the global inflation surge (Figure 1.1). In the last quarter of 2023, headline inflation for advanced economies was 2.3 percent on a quarter-over-quarter annualized basis, down from a peak of 9.5 percent in the second quarter of 2022. For emerging market and developing economies, inflation was 9.9 percent in the last quarter of 2023, down from a peak of 13.7 percent in the first quarter of 2022, but this average was driven by high inflation in a few countries; for the median emerging market and developing economy, inflation declined to 3.9 percent. This progress notwithstanding, inflation is not yet at target in most economies.

As global inflation descended from its peak, economic activity grew steadily, defying warnings of stagflation and global recession. During 2022 and 2023, global real GDP rose by a cumulative 6.7 percent. That is 0.8 percentage point higher than the forecasts made at the time of the October 2022 World Economic Outlook (WEO) (Figure 1.2). The United States and several large emerging market and middle-income economies displayed the greatest overperformance, with aggregate demand supported by stronger-than-expected private consumption amid still-tight—though easing—labor markets. Households in advanced economies supported their spending by drawing down accumulated pandemic-era savings. Larger-than-expected government spending further supported the expansion of aggregate demand in most regions. The overall budgetary stance—measured by the structural fiscal balance—was more expansionary than expected, on average. Among large economies, the additional budgetary support, compared with October 2022 WEO forecasts, was estimated at 2 percent of GDP in the United States and 0.2 percent of GDP in the euro area, whereas in China,¹ the fiscal stance was mildly tighter than expected, by 0.7 percent of GDP. The euro area also displayed the smallest upside growth surprise, reflecting weak consumer sentiment and the lingering effects of high energy prices. In parallel, global headline inflation declined broadly in line with expectations, averaging just 0.1 percentage point more than predicted in the October 2022 WEO for 2022 and 2023. However, in lower-income countries, inflation was on average higher than expected, reflecting cases in which pass-through into domestic prices from international food, fuel, and fertilizer costs, as well as from currency depreciation, was greater than expected. Price pressures in some lower-income countries were significant. These factors also caused these economies to grow more slowly than expected, suggesting a negative supply shock. In China, inflation fell unexpectedly, with the decrease reflecting sharply lower domestic food prices and pass-through effects on underlying (core) inflation. The resilience in global economic activity was compatible with falling inflation thanks to a post pandemic expansion on the supply side. A greater-than-expected rise in the labor force amid robust employment growth supported activity and disinflation in advanced economies and several large emerging market and middle-income economies. The labor force expansion reflected, in some economies, increased inflows of migrants, with faster growth in the foreign-born than in the domestic-born labor force since 2021 (Figure 1.3), as well as higher labor force participation rates. Exceptions to this pattern include China, where labor market weakness, in the context of subdued demand, was broad based across sectors, and lower-income countries, where supply-side challenges held job creation back. Greater-than-expected additions to the stock of physical capital, with business investment responding to the strength in product demand, further bolstered the supply side in most regions, with exceptions

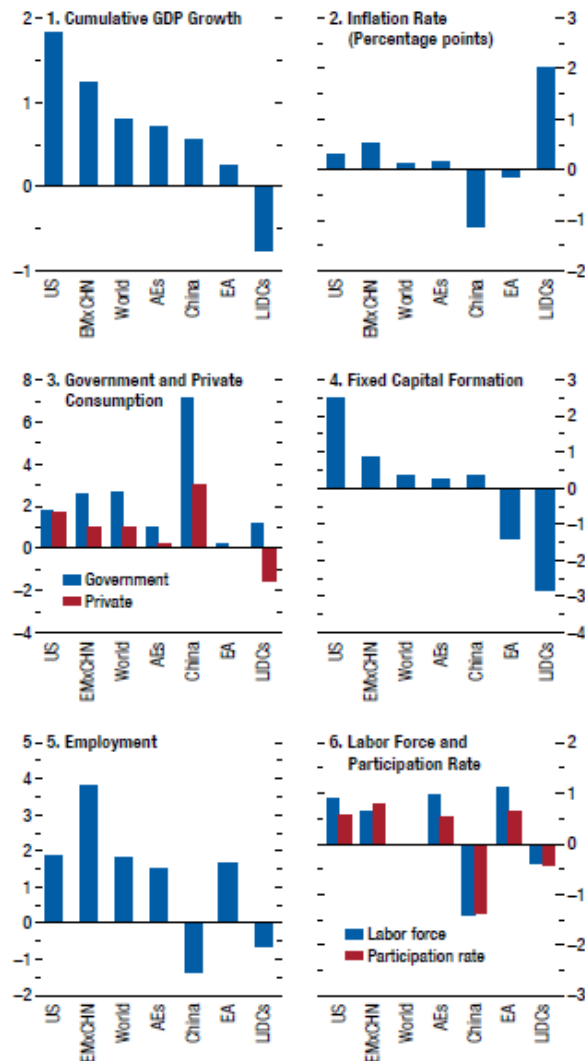

including the euro area, where interest-rate-sensitive business investment, particularly in manufacturing, was subdued. A resolution of pandemic-era supply-chain problems allowed delivery times to decline and transportation costs to decrease (Figure 1.4).

Growth Forecast for Emerging Market and Developing Economies

In *emerging market and developing economies*, growth is expected to be stable at 4.2 percent in 2024 and 2025, with a moderation in emerging and developing Asia offset mainly by rising growth for economies in the Middle East and Central Asia and for sub-Saharan Africa. *Low-income developing countries* are expected to experience gradually increasing growth, from 4.0 percent in 2023 to 4.7 percent in 2024 and 5.2 percent in 2025, as some constraints on near-term growth ease.

- Growth in ***emerging and developing Asia*** is expected to fall from an estimated 5.6 percent in 2023 to 5.2 percent in 2024 and 4.9 percent in 2025, a slight upward revision compared with the January 2024 WEO *Update*. Growth in *China* is projected to slow from 5.2 percent in 2023 to 4.6 percent in 2024 and 4.1 percent in 2025 as the positive effects of one-off factors—including the post pandemic boost to consumption and fiscal stimulus—ease and weakness in the property sector persists. Growth in *India* is projected to remain strong at 6.8 percent in 2024 and 6.5 percent in 2025, with the robustness reflecting continuing strength in domestic demand and a rising working-age population.
- Growth in ***emerging and developing Europe*** is projected at 3.2 percent in 2023 and 3.1 percent in 2024, with an easing to 2.8 percent in 2025, an upward revision of 0.5 percentage point for 2023 and 0.3 percentage point for 2024 and 2025 since January. The moderation reflects a prospective decline of growth in *Russia* from 3.2 percent in 2024 to 1.8 percent in 2025 as the effects of high investment and robust private consumption, supported by wage growth in a tight labor market, fade. In *Türkiye*, growth is projected at 3.1 percent in 2024 and 3.2 percent in 2025, with economic activity strengthening in the second half of 2024 as monetary tightening ends and consumption starts to recover.
- In ***Latin America and the Caribbean***, growth is projected to decline from an estimated 2.3 percent in 2023 to 2.0 percent in 2024 before rising again to 2.5 percent in 2025, an upward revision of 0.1 percentage point for 2024 since January. In *Brazil*, growth is expected to moderate to 2.2 percent in 2024 on the back of fiscal consolidation, lagged effects of still-tight monetary policy, and a smaller contribution from agriculture. In *Mexico*, growth is projected at 2.4 percent in 2024, supported by a fiscal expansion, before declining to 1.4 percent in 2025 as the government is expected to tighten the fiscal stance. The forecast for Mexico is revised downward on account of weaker-than-expected outcomes for end-2023 and early 2024, with a contraction in manufacturing.
- Growth in the ***Middle East and Central Asia*** is projected to rise from an estimated 2.0 percent in 2023 to 2.8 percent in 2024 and 4.2 percent in 2025, with a downward revision of 0.1 percentage point for 2024 from the January 2024 projections. The revision reflects a downward adjustment in the 2024 growth forecast for *Iran* driven by lower non-oil activity and oil revenues, as well as for a number of smaller economies.
- In ***sub-Saharan Africa***, growth is projected to rise from an estimated 3.4 percent in 2023 to 3.8 percent in 2024 and 4.0 percent in 2025, as the negative effects of earlier weather shocks subside and supply issues gradually improve. The forecast is unchanged for 2024 from the January 2024 WEO *Update*, as a downward revision to *Angola* owing to a contraction in the oil sector is broadly offset by an upward revision to *Nigeria*.

World Trade Outlook: Stable, in Line with Output

World trade growth is projected at 3.0 percent in 2024 and 3.3 percent in 2025, with revisions of a 0.3 percentage point decrease for 2024 and 2025 compared with January 2024 projections. Trade growth is expected to remain below its historical (2000–19) annual average growth rate of 4.9 percent over the medium term, at 3.2 percent in 2029. This projection implies, in the context of the relatively low outlook for economic growth, a ratio of total world trade to GDP (in current dollars) that averages 57 percent over the next five years, broadly in line with the evolution in trade since the global financial crisis (Figure 1.17). Even as world trade-to-GDP ratios remain relatively stable, significant shifts in trade patterns are taking place, with increasing fractures along geopolitical lines, especially since the start of the war in Ukraine in February 2022. IMF staff analysis indicates that growth in trade flows between geopolitical blocs has declined significantly since then compared with growth of trade within blocs (Box 1.1). This reallocation of trade flows is occurring in the context of rising cross-border trade restrictions, with about 3,200 new restrictions on trade in 2022 and about 3,000 in 2023, up from about 1,100 in 2019, according to Global Trade Alert data, and increased concerns about supply-chain resilience and national security.

Downside Risks - Despite the surprisingly resilient global economic performance since October 2023, several adverse risks to global growth remain plausible:

- *New commodity price spikes amid regional conflicts;*
- *Persistent inflation and financial stress;*
- *China's recovery faltering;*
- *Disruptive fiscal adjustment and debt distress;*
- *Distrust of government eroding reform momentum;*
- *Geoeconomic fragmentation intensifying*

Upside Risks - More favorable outcomes for the global economy than expected could arise from several sources:

- *Short-term fiscal boost in the context of election*
- *Further supply-side surprises, allowing for faster monetary policy easing*
- *Spurs to productivity from artificial intelligence*
- *Structural reform momentum gathering*

Policies: From Fighting Inflation to Restocking Fiscal Arsenals

As the global economy approaches a soft landing, the near-term priority for central banks is to ensure that inflation comes down smoothly; they should neither ease policies prematurely nor delay too long and risk causing target undershoots. At the same time, as central banks take a less restrictive stance, a renewed focus on implementing medium-term fiscal consolidation is in order to rebuild room for budgetary maneuver and priority investments and to ensure debt sustainability. Intensifying supply-enhancing reforms would facilitate both inflation and debt reduction, allow economies to increase growth toward the higher pre-pandemic era average, and accelerate convergence toward higher income levels. Multilateral cooperation is needed to limit the costs and risks of geoeconomic fragmentation and climate change, to accelerate the transition to green energy, and to encourage debt restructuring.

Rebuilding Room for Budgetary Maneuver and Ensuring Debt Sustainability

A renewed focus on fiscal consolidation to rebuild budgetary room to deal with future shocks and curb the rise of public debt is appropriate, since major central banks are expected to ease monetary policy this year and economies are in a better position to absorb the economic effects of fiscal tightening. The size of the fiscal adjustment needed to ensure government debt sustainability is large in numerous cases.

With elections in a number of countries in 2024, ensuring that any new tax cuts or spending increases are funded and do not expand budget deficits is necessary to preserve the envisaged fiscal adjustment path.

Calibrating the pace of adjustment: Fiscal adjustment should be gradual and sustained, where possible, given its generally negative effects on economic activity in the near term. Avoiding an abrupt adjustment is warranted to avert the risk that sharp expenditure cutbacks or tax increases will set off a negative cycle of slowing activity and rising debt ratios and undercut political support for fiscal reforms, which can often take time to implement.

Building credibility with well-specified plans and a strong institutional framework: To reduce policy uncertainty, committing to measures sufficient to meet medium-term targets based on realistic assumptions about the short-term growth effects of fiscal consolidation, interest rates, and the budgetary yield of revenue and spending policy changes is essential.

Addressing debt distress: For countries in debt distress, debt restructuring, conducted in an orderly manner, may be necessary. Progress in improving international sovereign debt resolution frameworks is moving in the right direction. The G20 Common Framework has started to deliver, with each successive case building on previous experiences to achieve faster coordination.

Strengthening Cross-Border Cooperation

Multilateral cooperation is necessary to mitigate fragmentation and strengthen the resilience of the international monetary system. Policymakers should maintain stable and transparent trade policies and avoid discriminatory policies that induce trade and investment distortions. An intergovernmental dialogue on—or a consultation framework for— industrial policies could help improve data and information sharing and identify the impact of policies, including their unintended consequences across borders. Over time, steady lines of communication could help in developing international rules and norms on the appropriate use and design of industrial policies, making it easier for firms to adjust to the new environment. Cooperation is also required for the orderly resolution of debt problems to clear a path through an increasingly complex creditor landscape. Furthermore, international coordination is vital to mitigate the effects of climate change and facilitate the transition to green energy, building on recent agreements at the 2023 Conference of the Parties to the UN Framework Convention on Climate Change. Safeguarding the transportation of critical minerals, restoring the WTO’s ability to settle trade disputes, and ensuring the responsible use of potentially disruptive new technologies such as artificial intelligence by, among other things, upgrading domestic regulatory frameworks and harmonizing global principles are priorities. Establishing the free flow of low-carbon technologies—which facilitate emissions reductions—from advanced economies to emerging market and developing economies would further support meeting climate targets.

INDIAN INDUSTRY OVERVIEW

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government’s continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India’s exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The

contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-December 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

MARKET SIZE

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

ROAD AHEAD

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India’s resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

INDIAN SERVICE INDUSTRY

The reforms of the 1990s have been associated with the expansion of the service sector in India. Midway through the 1980s, the service sector began to expand, but it took off in the 1990s when India started a series of economic reforms in response to a serious balance of payments issue.

The services sector is not only the dominant sector in India’s GDP but has also attracted significant foreign investment, has contributed significantly to exports and has provided large-scale employment. India’s services sector covers a wide variety of activities such as trade, hotel and restaurants, transport, storage and communication, financing, insurance, real estate, business services, community, social and personal services, and services associated with construction. To enhance India's commercial services exports, share in the global services market from 3.3% and permit a multi-fold expansion in the GDP, the government is also making significant efforts in this direction.

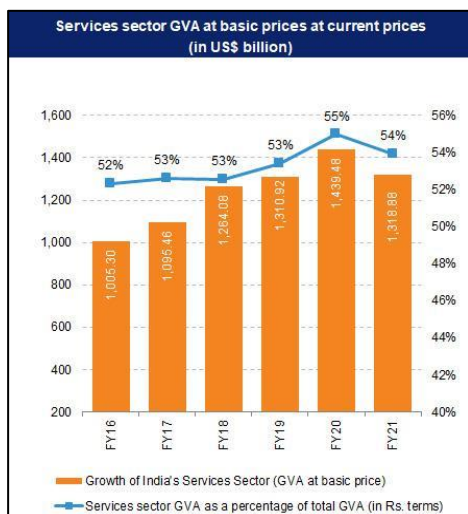

The service sector has over 50% contribution to India’s GDP, and it has witnessed a growth of 10.8% during the first half of 2021-22. The service sector has emerged as the highest employment generator with a 5-7% y-o-y growth in 2022. The share of the services sector accounted for 57% of the total GVA in FY24 (April-September) as per advance estimates. The services category ranked first in FDI inflows, as per data released by the Department for Promotion of Industry and Internal Trade (DPIIT).

India is a unique emerging market in the globe due to its unique skills and competitive advantage created by knowledge-based services. The Indian services industry, which is supported by numerous government initiatives like smart Cities, clean India, and digital India is fostering an environment that is strengthening the services sector. The sector has the potential to open up a multi-trillion-dollar opportunity that might stimulate symbiotic growth for all nations. Service providers in India continued to signal positive demand trends in June, which underpinned a stronger increase in new business volumes and further job creation.

Services exports are projected to set a record of US\$ 322.72 billion with a compound annual growth rate of 26.79% during FY23 as compared to FY22. India’s service exports stood at US\$ 163.94 billion, whereas imports stood at US\$ 88.89 billion in (April-September) 2023-24. The services trade surplus for 2023-24 (April-September) is expected to be US\$ 75.05 billion.

India’s IT and business services market is projected to reach US\$ 19.93 billion by 2025.

The PMI services remained in the expansion zone in September 2023, at 61, led by good demand conditions and new business gains, followed by a decline in November 2023. With the fastest growing (9.2%) service sector globally, the sector accounts for a 66% share of India's GDP and generates about 28% of the total employment in India. As per the First Advance Estimates, Gross Value Added (GVA) in the services sector is estimated to grow at 9.1% in FY23, driven by 13.7% growth in the contact-intensive services sector.

WAREHOUSING AND LOGISTICS SECTOR IN INDIA

The warehousing, industrial, and logistics (WIL) sectors are projected to be crucial for attaining India's vision of being a US\$ 5 trillion economy by FY25. The warehouse and logistics industry has benefited the most from the COVID-19 epidemic, increasing its share from 2% in 2020 to 20% in 2021. Because of the growing shift from discretionary to essential internet buying during the COVID-19 epidemic, the e-commerce industry became more appealing and attractive.

The expansion of this industry is likely to be aided by a robust economy, government efforts to improve infrastructure, and a favourable business environment. Increasing consumerism and a huge consumer base are fostering the growth of retail and e-commerce in India. The Indian retail sector's market size is

predicted to increase at a CAGR of 9% between 2019 and 2030, totalling more than US\$ 1.8 trillion. Large international funds and corporations have invested in warehousing developers and operators to grow their reach and geographical footprint, which are the sector's key differentiators.

The Government of India has taken many initiatives to strengthen the sector's infrastructure, including the establishment of dedicated freight corridors and the extension of road and rail networks, to improve connectivity and decrease travel times. Another critical governmental intervention has been the sector's digital transformation, projects such as Digital India, Bharat

Net, and the National Logistics Portal would aid in the industry's digitization. Furthermore, the government has announced the establishment of logistics parks and warehouses across the country to provide appropriate storage facilities for enterprises. The warehouse sector has grown rapidly in recent years, fuelled by the expansion of e-commerce, solid infrastructure, the adoption of GST, and the advent of organized retail. The recently implemented National Logistics Policy intends to reduce India's logistics costs from the double digits of GDP to the single digits by 2030.

OVERVIEW OF THE LOGISTICS INDUSTRY

The Indian logistics industry is growing, due to a flourishing e-commerce market and technological advancement. The logistics sector in India is predicted to account for 14.4% of the GDP. The industry has progressed from a transportation and storage-focused activity to a specialised function that now encompasses end-to-end product planning and management, value-added services for last-mile delivery, predictive planning, and analytics, among other things. One of the key drivers of this expansion is projected to be the rise of India's logistics industry, which employs 22 million people and serves as the backbone for various businesses. The logistics sector in India was valued at US\$ 250 billion in 2021, with the market predicted to increase to an astounding US\$ 380 billion by 2025, at a healthy 10%-12% year-on-year growth rate. Moreover, the government is planning to reduce the logistics and supply chain cost in India from 13-14% to 10% of the GDP as per industry standards.

The industry is crucial for the efficient movement of products and services across the nation and in the global markets. The logistics business is highly fragmented and has over 1,000 active participants, including major local players, worldwide industry leaders, the express division of the government postal service, and rising start-ups that focus on e-commerce delivery. The industry includes transportation, warehousing, and value-added services like packaging, labelling, and inventory management. With the advent of technology-driven solutions such as transportation management systems (TMS) and warehouse management systems, India's logistics industry has witnessed tremendous development in recent years (WMS). These solutions have assisted logistics firms in increasing operational efficiency, lowering costs, and improving customer service.

As depicted in the below pie chart (left), representing the segment-wise breakup of the logistics sector in FY21. Roads have the largest percentage share of 73% followed by rail (18%), water (5%) and air (5%).

OVERVIEW OF THE WAREHOUSING INDUSTRY

A warehouse is an essential component of corporate infrastructure and one of the primary enablers in the global supply chain. The Indian warehousing market is predicted to reach US\$ 34.99 billion (Rs. 2,872.10 billion), expanding at a CAGR of 15.64% from 2022 to 2027. Modern warehouse facilities and technology-driven solutions have changed the warehousing sector in India in recent years. With increased demand and supply throughout the years, the Indian warehousing industry is gaining traction. The key players are third-party logistics (third-party logistics) and e-commerce enterprises, which are growing into tier 2 and 3 cities and eventually increasing their proportion of secondary marketplaces. Businesses are transitioning to a hub-

and-spoke model while also implementing technology to simplify operations, with an eye on the larger picture of ease, efficiency, and sustainability.

Grade A warehouses are modernized buildings created specifically to meet the needs of warehouse logistics. They feature the most up-to-date technology, superior building materials, a prime location, and a convenient traffic interchange. Grade B objects are outdated buildings that must be rebuilt to satisfy modern warehouse logistics standards.

As depicted in the below chart, India saw a 21% year-over-year increase in the total stock of Grade A and B warehouse space in the top eight cities in 2021. The total warehousing capacity is expected to be 287 million square feet by the end of 2021, up from 238 million square feet the previous year. Grade A stock in India was

134 million square feet, representing a 5-year CAGR of 29.9%. Among the eight major cities, the three largest cities in the country, including Delhi NCR, Mumbai, and Bengaluru, contribute more than half of the warehousing stock.

As demonstrated in the below pie chart, 3PL/Logistics has remained the top segment in terms of warehouse space demand for the last five years. Various e-commerce areas, including retail, groceries, pharmacy, and food delivery, are likely to grow substantially as consumers shifted their purchasing habits from offline to online. COVID-19 has increased eCommerce adoption, increasing demand for online delivery of both essential and non-essential commodities. While the share of manufacturing demand from the Auto & Ancillaries and Engineering sectors has declined during the epidemic, demand from other consumption-based sectors such as Retail and FMCG has increased.

KEY INDUSTRY DRIVERS

- **Government initiatives**

The government's warehousing policy focuses on creating exclusive warehousing zones through public-private partnerships in order to reduce transportation and logistics costs and accelerate growth. The government will invest US\$ 91.38 billion (Rs. 7.5 lakh crore) in infrastructure, logistics development, and multi-modal connectivity in FY23. Reforms such as GST and e-way bills are fostering industrial growth, consolidation, and efficiency. The introduction of free trade logistics parks and warehousing zones.

- **Global manufacturing shift**

Demand for warehouse alternatives and logistics services has increased as a result of international firms relocating their manufacturing focus to India. The Production Linked Incentive (PLI) scheme is increasing domestic production and, as a result, increasing demand for industrial space and warehousing.

- **New-age startups**

The emergence of new-age tech logistics startups that are aggressively infiltrating this market and producing competing products. Several new businesses are entering the B2B market, driven by manufacturing. New players are introducing more technology and digital systems to boost productivity, resulting in overall industry growth.

- **Technology advancement**

Solutions based on modern technology are opening up chances for solution expansion throughout the entire value chain. Warehouses are being designed and integrated with technologies such as the Internet of Things (IoT), robotics, and artificial intelligence (AI).

- **Flourishing e-commerce**

An increase in e-commerce leads to expanded operations to meet increased demand. Consumer behaviour is changing, and they are demanding convenience through last-mile connectivity, ease of returns, and other value-added services. The expansion of Direct-to-Consumer (D2C) brands demanding end-to-end logistics services. Omni-channel retailing increases the need for several warehouses to serve end users.

INVESTMENT TRENDS

Foreign corporations are actively investing in India's logistics infrastructure to capitalize on the country's strategic location, trained labour, and improved business environment. The development of industrial and logistics parks, as well as data centres, is a new bright spot on the Indian real estate heatmap. In 2022, these two segments received US\$ 1.8 billion in Private Equity (PE)/ Venture Capitalist (VC) investments, representing a 29% increase year on year. The industry garnered investments worth US\$ 1 billion (Rs. 8,257 crore) at the beginning of 2022. The logistics and industrial industries' quarterly average investment was around 1.3 times more in 2021 than it was in 2021 when it was US\$ 335.69 million (Rs. 2,755) crore. Over the last four years (2019-2022), the warehouse and logistics sector has received a total institutional investment of US\$ 5.4 billion, with 2022 accounting for a major 35% portion.

Warehouse investment accounted for the second greatest percentage of institutional real estate investment in both 2021 and 2022, accounting for 27% and 31%, respectively, outperforming other asset classes such as residential and retail. During the four-year period 2019-2022, the western area of the country - led by Mumbai, Pune, and Becharji, (a tiny town in Gujarat) - witnessed the second-greatest institutional investment in warehousing, accounting for 35% of total investment in the industry, demonstrating the increased confidence that investors have in the nation's Tier II cities.

ROAD AHEAD

The warehousing and logistics industry in India is a dynamic and rapidly growing sector that is expected to play an increasingly important role in the country's economy. Despite some challenges, the sector is well-positioned for long-term growth and presents exciting opportunities for investors and businesses. With the government's focus on improving

infrastructure and the rise of e-commerce, the sector is expected to be a key driver of economic growth in the country. Moreover, with the increasing adoption of technology and the government's push for a digital economy, there is also significant potential for logistics players to leverage data analytics, artificial intelligence, and machine learning to improve operational efficiency and enhance customer experience. There are also opportunities for foreign investment as international companies look to tap into India's growing logistics market. The government has made it easier for foreign companies to invest in the sector by allowing 100% foreign direct investment in logistics parks and warehouses.

THE TRANSFORMATION OF THE TRANSPORTATION AND LOGISTICS INDUSTRY

Logistics Industry is crucial to both enterprises and the economy. In today's interconnected world, shipping and logistics are at the heart of the economy, acting as vital gateways for international trade and business. A nation with a strong and effective logistics sector offers an efficient forward and reverse flow of goods and services, which eventually translates to fast-paced growth.

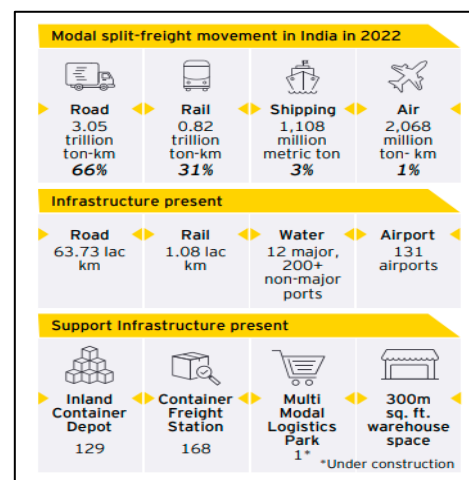

Significant factors that will increase the demand for India's logistics sector include the country's anticipated GDP growth of US\$ 26 trillion by fiscal year 2048 (US\$ 6 trillion by 2030) and its objective to accelerate merchandise exports to US\$ 1 trillion by 2030. This would open a huge opportunity for India's transport and logistics sector, which is expected to increase at a CAGR of 4.5% from 2022 to 2050, reaching 15.6 trillion tonnes kilometres. The Indian transport and logistics business is expected to be around Rs. 13-16 lakh crore (US\$ 156.18-192.23 billion) in 2022.

By 2030, India wants to lower its logistics expenditures from 13-14% of GDP to 8-10% of the GDP. It is projected that a 10% reduction in indirect logistics costs is expected to result in a 5% to 8% increase in exports. According to the Logistics Performance Index (LPI) of the World Bank, India has climbed six positions to reach the position of 38th rank out of 139 nations. The improvement is attributed to a variety of factors, including technological advancement, data-driven decision-making, and legislative initiatives targeted at promoting world-class infrastructure. The National Logistics Policy (NLP) and the PM Gati Shakti programme are significant overarching policy moves taken by the central government in this area to deliver outcomes by 2024-25.

TRANSPORTATION AND LOGISTICS LANDSCAPE IN INDIA

Transport and logistics refer to the procedures involved in the manufacture, storage, inventory, delivery, and distribution of specific commodities or services. The logistics sector in India was predicted to account for 14.4% of GDP in 2022. It is the primary source of income for more than 22 million people. The overall logistics sector in India includes 37 export promotion councils, 40 Participating Government Agencies (PGAs), 20 government agencies, 10,000 goods, and 500 certifications. Between the financial years 2015-16 to 2019-20, India invested approximately US\$ 10.2 trillion in the development of infrastructure.

The freight movement in India is significantly prejudiced towards road transportation, which transports 66% of goods (in ton-kilometres). This is followed by rail (31%), shipping (3%), and air (1%). To facilitate cargo transportation, India has a vast network of support infrastructure, including 129+ inland container depots, 168+ container goods stations, and 300 m sq. ft. of warehouse capacity.

The logistics sector in India can be divided into the following categories:

1. Transportation

- **Surface Transportation**

The surface transport sector is anticipated to experience the fastest growth in India's infrastructure sector, with a CAGR of more than 8% in 2020. Additionally, the trucking sector is very unorganised and fragmented. Less than five trucks make up the fleet of 70% of the truck owners in the industry. Through different asset monetisation techniques and funding through Special Purpose Vehicles, the Ministry of Road Transport and Highways (MoRTH) is working to reach a target of over Rs. 40,000 crore (US\$ 4.80 billion) for the current financial year (2023-24). The road network in India has risen from 62.15 lakh km in FY21 to 63.73 lakh km by January 2023. The transportation sector can be further divided into the following categories:

Commerce (ICC)

- **Full Truck Load (FTL)**

The FTL market contributes significantly to the Transportation sector. The FTL market was anticipated to be around US\$ 120 billion in 2021. It is expected to increase at a rate of 7-8% in the upcoming years (2022 onwards).

Source: Aviral and Indian Chamber of

- **Part Truck Load (PTL)**

In terms of revenue, the PTL ranks as the second-largest contributor to the Indian surface transportation industry. In 2021, it was expected to be worth approximately US\$ 12 billion, with an annual growth rate of 8-10%. Part truckload services are becoming increasingly popular around the country.

- **Express**

While India has less than 2% of the global express business, it has one of the fastest-growing express industries. The Indian Express market is fragmented, and there are reportedly 1,000 active players. The domestic express market is dominated by approximately 15 large competitors. The remaining players range in size from small to medium-sized enterprises. The sector was expected to grow at a CAGR of around 15% by 2020, reaching US\$ 5.5 billion.

- **Waterways**

India has a 7,500 km (4,660 miles) coastline that is encircled by the sea on three sides. India has 200 minor/intermediate ports and 12 big ports, which together, account for 65% of the country's total value and 95% of its volume of trade. The Indian coast offers a huge opportunity for the movement of cargo. By 2025, total cargo movement is estimated to exceed 250 MTPA. Commodities including petroleum, oil, lubricants, building supplies, and dry bulk cargo like cereal grains, fertiliser, steel, coal, and minerals are ideal for coastal transportation. On December 15th, 2021, the Government of India (GoI) pledged to invest Rs. 3-3.5 lakh crore (US\$ 38-44 billion) across ports, shipping, and in-land waterways under the Maritime India Vision (MIV), which would help unleash Rs. 20,000 crore (US\$ 2.40 billion) in potential annual revenue for Indian ports. Indian Government plans to replace diesel with electricity for at least half of the vehicles and equipment needed by the major ports by 2030 and to increase that number to 90% by 2047. The shipping ministry wants ports to build at least one liquified natural gas (LNG) bunkering station by 2030 and electric vehicle charging facilities near port areas by 2025 to decrease the usage of petrol. Moreover, the major ports collectively handled a record-breaking 795 million tonnes of cargo in 2022-23, registering a 10.4% growth over the previous year.

- **Railways**

India has the world’s fourth-largest rail network and accounts for the second highest percentage of goods moved in terms of volume. From April to September 2023, a total freight loading of 758.20 million tonnes (MT) was obtained, compared to a loading of 736.68 MT the previous year, representing a rise of around 21.52 MT. During September 2023, Indian Railways loaded 59.70 MT of coal, 14.29 MT of iron ore, 5.78 MT of pig iron and finished steel, 6.25 MT of cement (excluding clinker), 4.89 MT of clinker, 4.54 MT of foodgrains, 4.23 MT of fertilizer, 4.0 MT of mineral oil, 7.28 MT of containers, and 10.10 MT of rest of all other goods. The average speed of freight trains on the Dedicated Freight Corridor (DFC) will more than double with the inauguration of DFC. In 2021, India pledged to invest Rs. 3 lakh crore (US\$ 36.04 billion) in the Dedicated Freight Corridor (DFC) to build dedicated rail tracks and related infrastructure for the transit of goods trains.

- **Airways**

Airways account for less than 2% of the total modal mix. The materials transported by air for freight movement are primarily time-sensitive commodities such as pharmaceuticals, healthcare, electronics, etc. Airways are not recommended for non-time-sensitive freight movement of commodities since they are more expensive than other means of transportation. As of June 30th, 2023, the Regional Air Connectivity Fund Trust (RACFT) has released Viability Gap Funding (VGF) amounting to Rs. 2,729.11 crore (US\$ 333 million) to the selected airline operators for the operation of the Regional Connectivity Scheme (RCS)-UDAN (Ude Desh ka Aam Nagrik) Scheme. 479 routes are in operation, connecting 74 airports, including two water aerodromes, and nine heliports, based on the four rounds of bidding under UDAN. The Scheme has benefitted around 123 lakh passengers.

- **Dedicated Air cargo:** These are specifically designed freighters for air cargo.
- **Belly Cargo Movement:** This cargo movement is commonly done in the belly of commercial planes.

2. Warehousing Industry

A warehouse is an essential component of corporate infrastructure and one of the primary enablers in the global supply chain. The Indian warehousing market is predicted to reach Rs. 2,872.10 billion (US\$ 34.50 billion), expanding at a CAGR of 15.64% from 2022 to 2027. With increased demand and supply throughout the years, the Indian warehousing industry is gaining traction. The key players are third-party logistics (third-party logistics) and e-commerce enterprises, which are growing into tier 2 and 3 cities and eventually increasing their proportion of secondary marketplaces. With a market share of more than 60%, 3PL and e-commerce are the largest lessors of storage space. To assist this expansion, the government is building multimodal logistic parks and other projects that connect urban transit to railways, attracting investments from institutional funds and developers.

3. Value Added / Other Services

Value-added/other services include a variety of operations such as customs clearing, Logistics packaging, Inventory management, Material handling equipment, etc.

- **Custom clearing**

Customs clearance is a time-consuming and difficult process that necessitates much documentation and coordination. However, many established businesses and startups nowadays are utilising technological platforms to streamline this process. Customs automation has aided industry and made operations more efficient.

- **Freight Forwarding**

Freight forwarding is the business of organizing shipments for individuals or corporations to move commodities from the manufacturer to an international buyer. The freight forwarder serves as a liaison between the liner and the shipper. A freight forwarder streamlines the procedure and provides the customer with an estimated price rate after adding his margin.

- **Logistics Packaging**

Packaging is an essential component of the overall supply chain. Proper packaging services are essential for businesses before the goods are delivered to the customer.

KEY TRENDS

1. Green logistics technology

The use of green logistics technology, such as tools for measuring the climate, real-time data collection tools, electric vehicles, green cold chain solutions, electric cargo delivery drones, and platforms for managing logistics resources, can have a variety of advantages, such as decreasing waste, streamlining procedures, boosting an organization's competitiveness, and being environmentally friendly. Several businesses, including Spencer, Bigbasket, Amazon, Licious, Myntra, and Flipkart, have joined forces with Zypp Electric for their last-mile delivery through e-vehicles and e-vehicle fleet management.

2. Embracing digital ecosystems

- **Ecosystem collaboration**

Collaboration among technology providers, logistical service providers, and customers backing innovation, knowledge sharing, and the acceleration of digital transformation. Collaborative ecosystems offer seamless integration, streamline processes, and provide greater consumer experiences.

- **Supply chain orchestration**

End-to-end supply chain orchestration is facilitated by advanced platforms and digital markets. By utilising these platforms, businesses are able to connect with a large network of suppliers, transporters, and service providers, which helps to streamline logistics processes and shorten time-to-market.

- **Rise of cross-border e-commerce**

The rapid expansion of e-commerce has had a tremendous impact on the logistics business, resulting in a surge in demand for foreign goods and MSMEs selling in the international markets. The growth is being driven by millennials, who make up a major share of the professional purchasing decision market and anticipate online shopping interfaces. As a result, efficient and dependable delivery services have become essential, resulting in the creation of cross-border digital markets with significant economic growth.

3. Technological innovation

- **Artificial intelligence (AI) and machine learning (ML)**

AI-powered algorithms and machine learning models enable predictive analytics, demand forecasting, route optimisation, and real-time decision-making. These solutions enable organisations to optimise their supply chains, better allocate resources, and provide better consumer experiences.

- **Internet of Things (IoT)**

With the proliferation of IoT devices, logistics organisations have increased visibility and control over their assets and inventories. Real-time tracking, remote monitoring, and predictive maintenance are made possible by IoT sensors and connectivity, allowing proactive and efficient logistics operations.

- **Robotics and automation**

Automation technologies such as robotic process automation (RPA) and autonomous vehicles are altering warehouse operations and last-mile delivery. Robotics automates repetitive operations, minimises errors, increases speed, and improves safety, resulting in cost savings and higher output.

ROAD AHEAD

The uneven distribution of modes of transport has resulted in low operational efficiency, causing the GOI to launch a number of logistics-specific programmes, including GatiShakti and the National Logistics Policy. These initiatives seek to improve India's logistics sector by making it more environmentally friendly, agile, transparent, and integrated. The logistics management regimen is capable of overcoming infrastructural disadvantages in the short term while providing cutting-edge competitiveness in the long term. Physical transporters that execute their business processes manually and offline can use various technologies such as AI, Big data, and IoT to improve their service and compete in an international market by delivering real-time and end-to-end connections.

To realise the full potential of the sector, stakeholders such as service providers, customers, and the government of India must work and complement one another. The sector is experiencing significant infrastructural expansion, a stronger emphasis on digitalization, and a larger emphasis on sustainable logistics. The launch of numerous start-ups, as well as the Government's digital initiatives such as "Make in India," Unified Logistics Platform (ULIP), and others, are assisting in bringing greater transparency to the logistics sector. The digitization of work processes to enable paperless processing of paperwork and clearances, as well as improved shipment tracking, aids in increasing the pace of goods movement and lowering logistics costs.

KEY ADVANCERS FOR LOGISTICS OPTIMIZATION

➤ PM GATI SHAKTI SCHEME

In order to improve logistics efficiency, reduce logistics costs, break inter-departmental silos in the country, a need has been felt to integrate planning and infrastructure development efforts across multiple agencies.

PM Gati Shakti launched by the Hon'ble Prime Minister on 13.10.21, is a response in that direction, which rests on the premise of a "whole of government approach".

Significant work has been done in the past few years in planning and delivering pathbreaking improvements in 'infrastructure reforms' (National Rail Plan, Bharatmala, Sagarmala, etc.) and 'process reforms' (like goods and services tax/e-Sanchit/Risk based enforcements/faceless assessments, digital reforms) in all sectors. The logical next step - to look at 'integration challenges' pertaining to infrastructure and logistics networks in the country, is being realized through PM Gati Shakti. It is a transformative approach for integrated and holistic planning across concerned Ministries/Departments to improve multimodal connectivity, logistics efficiency and address critical gaps for seamless movement of people, goods, and services, with focus on minimizing disruptions and ensuring timely completion of works.

PM Gati Shakti provides an integrated platform called National Master Plan where all the economic zones and their multimodal connectivity infrastructure are depicted, along with physical linkages to promote comprehensive and integrated multimodal national network of transportation and logistics to create efficiency gains and avenues for further developments, value addition and creating employment opportunities.

(Source : <https://logistics.gov.in/infrastructure/pm-gatishakti/>)

➤ NATIONAL LOGISTICS POLICY

Logistics efficiency is a function of infrastructure, services (digital systems/processes/regulatory framework) and human resources. The PM Gati Shakti National Master Plan (NMP) for multimodal connectivity infrastructure to various economic zones, has been launched. It is a transformative approach for improving logistics efficiency and reducing logistics cost, with focus on integration of existing and proposed infrastructure development initiatives of different agencies, to ensure first and last mile connectivity, for seamless movement of people and goods. While development of integrated infrastructure and network planning is envisaged to be addressed through the Gati Shakti National Master Plan, for efficiency in services (processes, digital systems, regulatory framework) and human resource, the National Logistics Policy is the logical next step. This will provide a comprehensive agenda for the development of the entire logistics ecosystem.

(Source : <https://logistics.gov.in/policy-regulation/national-logistics-policy/>)

The National Logistics Policy will be implemented through a **Comprehensive Logistics Action Plan (CLAP)**

- **Integrated Digital Logistics Systems:** Develop a system of unified logistics interface to link multiple data sources and develop cross sectoral use cases for logistics stakeholders.
- **Standardization of physical assets & benchmarking service quality standards:** Enhance interoperability, minimize handling risks, undertake process optimization, and improve ease of doing business, through standardization of physical assets and benchmarking of service quality standards in logistics including transportation infrastructure (fixed and rolling), terminal handling, warehousing, temperature-controlled logistics, packaging, etc.
- **Logistics Human Resources Development and Capacity Building:** Develop an overarching logistics human resource strategy and under its guiding principles, line ministries to develop action plans to address skill development related and internal capacity building challenges in the respective sector.
- **State Engagement:** Provide support for development of state/city level logistics plans, set up institutional framework to take action at city/state level, measure and monitor action by states and rank them.
- **EXIM (Export-Import) Logistics:** Addressing infrastructure and procedural gaps in India's EXIM connectivity and create efficient and reliable logistics network, with transparent and streamlined cross-border trade facilitation, for improved trade competitiveness and greater integration of India with regional and global value chains.
- **Service Improvement framework:** Improving regulatory interface to enable seamlessness between sectors, promote standardization, formalization, inter-operability; eliminate fragmentation in documentation, formats, processes and liability regimes; reduce gaps in regulatory architecture.
- **Sectoral Plan for Efficient Logistics:** Sectoral Plans for Efficient Logistics (SPEL) aligned with PM Gati Shakti, will be developed for each sector with underlying philosophies of inter-operability, resiliency, sustainability, and innovation. Specifically, SPEL would (i) address logistics issues pertaining to infrastructure, processes, digital improvements, policies and regulatory reforms, and capacity building for better workforce, and ii) prioritize cross-sectoral cooperation to complement and not duplicate efforts and focus on optimization of modal mix.
- **Facilitation of Development of Logistics Parks:** Logistics parks (eg. Multi Modal Logistics Parks, Air Freight Stations, Inland Container Depots, Container Freight Stations, cargo terminals, etc.) are hubs for intermediary activities (storage, handling, value addition, inter-modal transfers, etc.) in the supply chain connected by a transportation network. It is envisaged to take following steps to facilitate development of logistics parks:
 - Guidelines to facilitate devDraft framework elopement of Logistics Parks in the country with focus on encouraging private investment.
 - Create a network of logistics parks by mapping them on the PM Gati Shakti NMP, for enhanced visibility, improved logistics efficiency, optimum utilization and connectivity.

C. Renewable Transportation Services

As an anticipated plan of expansion and tapping the market of logistics industry and to expand our services in order to cater to the increasing demand, our Company has entered into logistics of Renewal Energy Sector. Tamil Nadu being the largest producer of Wind Turbine Generator (Blades of a Windmill) has immense scope for logistics of such Wind Turbine Generator within India and to nearest ports for export outside India.

We have currently invested in Extenders used for transportation of Wind Turbine Generator (WTG). Each Wind Turbine Generator is a set of three wind blades with a capacity to generate 3 MW of power. The transportation of these wind blades requires at least three extendable telescopic trailer (TT) which are 62 meter long. Each Extender comprises of a Truck which is the former part of the vehicle comprising of engine and driver’s area. The latter part is the Trailer where the windmill blades are kept during transit. The following are the standard features of the telescopic trailer:

Structure construction	<ul style="list-style-type: none"> ✚ Platform design with the spine beam out of high tensile fine-grained steel. ✚ The platform trailers can be coupled behind each other or side-by-side.
Steering mechanism	<ul style="list-style-type: none"> ✚ All wheels are hydro-mechanically steered ✚ Two double acting steering cylinders are installed for hydraulic displacement of trailer steering. ✚ All track rods are easily accessible from top side.
Brake system	<ul style="list-style-type: none"> ✚ Dual line pneumatic brake system; consists of service brake cylinders and tri-stop brake cylinders which take care of parking brake function. ✚ All pendulum axles are equipped with AGS (automatic brake adjuster).

Hydraulic system	<ul style="list-style-type: none">  Line break protection system (single-circuit version) in hydraulic suspension system.  Hydraulic accumulators in the suspension system for damping in empty and loaded condition. (Switchable)
Electrical system	<ul style="list-style-type: none">  7 Pin electric sockets are provided at all four corners.  Side marker lamps are mounted at spacing distance max. 3000 mm as per law.
Safety system	<ul style="list-style-type: none">  Trailer has all the necessary safety instructions & warning sign required by law.
Colour	<ul style="list-style-type: none">  Upper Frame – RED  Area underneath the frame and bogie – GREY  Rims and hub caps – SILVER
Trailer combination	<ul style="list-style-type: none">  The modules are designed for the longitudinal and transverse combinations.  Each axle line can be connected or disconnected hydraulically to get required loading configuration.

Since the wind turbines are over dimensional, we need to adhere to high safety standards for transportation of Wind Turbine Generator. They need to be accompanied by three escort cars to ensure safe movement.

OUR PROCESS

RAPID FLEET MANAGEMENT SERVICE LIMITED

1. Work Order Acquisition Process (INDENT):

Upon successfully securing contracts through extensive negotiations and offering the most competitive pricing, our company receives work orders. These contracts are obtained after meticulous efforts and networking by our management team. Work orders are received once contracts are confirmed, and communication channels include emails, phone calls, or transportation management apps utilized by our customers. Contracts typically result in consistent work orders, necessitating careful planning of manpower and resources. Dedicated teams and vehicles are allocated to ensure seamless operations throughout the contract period. Additionally, we also receive ad hoc work orders for specific purposes, which may arise suddenly from customers.

Furthermore, we handle special or capital expenditure (capex) movements, where work orders are given for the movement of capital goods or machinery. Capital expenditure (CAPEX) movements involve the transportation of high-value assets such as machinery, equipment, or other capital goods essential for business operations. These movements typically require specialized handling and logistics due to the size, weight, and often delicate nature of the items being transported. These work orders are typically not consistent and may last for a limited period based on the project's requirements.

Moreover, we acquire work orders through RFQ online bidding. RFQ (Request for Quotation) online bidding is a method where we solicit bids from suppliers or service providers using digital platforms or online portals. This approach is variable and necessitates tailored planning according to each customer's unique requirements.

2. Work order planning:

Upon receiving work orders, our operations team meticulously reviews the requirements outlined in the indents. For contractual agreements, where the scope of work is predefined, planning is systematically organized, and vehicle allocation is promptly carried out. Vehicles may be sourced from our own fleet, the market fleet, or an attached fleet, as preplanned to ensure optimal resource utilization.

In the case of work orders involving Capital Expenditure (Capex) goods, our operations team initiates contact with market suppliers based on the specific specifications of the goods. This entails detailed discussions and negotiations to ensure that the required equipment or machinery meets our stringent quality and operational standards. Through proactive communication and coordination, we ensure that all necessary arrangements are made to seamlessly execute the work orders in line with our clients' expectations and project timelines.

3. Execution Management:

In the execution phase, our operations teams meticulously allocate vehicles and communicate with drivers to proceed to the designated pickup locations. This allocation process is strategically planned to ensure optimal resource utilization, with the closest available vehicle and driver selected for each assignment. By maximizing the efficiency of our fleet and personnel, we aim to minimize delays and streamline the transportation process. Additionally, our operations teams remain vigilant to any changes or challenges that may arise during execution, proactively addressing them to ensure smooth and timely delivery of goods to their intended destinations.

4. Payment Processing:

Upon confirmation of vehicle allocation by the operations team, they liaise with the accounts department to initiate payment processing. This involves releasing funds for diesel and advance charges necessary to facilitate the operation. Approximately 80% of the agreed hire value is disbursed at this stage to ensure smooth execution of the transportation task. To maintain transparency and compliance, the operations team ensures that all requisite documentation, such as the lorry receipt, is generated and provided to the accounts department. Subsequently, the billing team is responsible for data entry, accurately recording all financial transactions related to the operation. This meticulous approach to payment processing ensures that all financial aspects of the transportation process are handled efficiently and in accordance with company policies and procedures.

5. Execution of indent:

During the execution phase of indents, our team ensures a seamless process from pickup to delivery. Once payment is confirmed, the designated driver proceeds to the pickup point to load the material onto the vehicle. At major loading points, we deploy a team of supervisors who oversee the loading process, ensuring compliance with documentation requirements and the integrity of the goods. These supervisors act as our representatives, overseeing the loading process and signing off on the receipt of goods.

After the loading process is completed and the vehicle is sealed, responsibility for the safe transportation of the goods rests with the driver. To ensure transparency and real-time monitoring, we employ live tracking through GPS technology. A dedicated team monitors the movement of the vehicle, providing updates on its whereabouts to our customers. Additionally, a Delivery Status Report (DSR) is shared with the customer, providing detailed information on the progress of the shipment while it is in transit.

6. Completion of Delivery process:

Once the vehicle arrives at the designated destination, our tracking team promptly notifies the customer of its arrival. At this point, the material is safely handed over to the customer, ensuring a smooth and efficient transfer of ownership. The driver is entrusted with the responsibility of delivering the vehicle and ensuring that the Proof of Delivery (POD) is obtained from the customer. This POD serves as confirmation of the successful delivery and is duly sealed and signed by the recipient.

Following the completion of delivery and the collection of the POD, the driver coordinates with our operations team to formally close the trip. This involves updating internal records, reconciling any discrepancies, and ensuring that all necessary documentation is properly filed and archived.

7. Documentation:

Our billing and data entry team meticulously handles all relevant documentation pertaining to the delivery process. This includes ensuring that essential documents such as the Proof of Delivery (POD), Expense Reports (ER), Freight Receipts (FRA), and Expense Reports (ERA) are collected from the operations team in a timely manner. Once these documents are obtained, our team reviews them for accuracy and completeness before proceeding with further processing.

Vendor payments are processed once all valid documents have been submitted and verified. This involves cross-referencing the documentation with internal records to ensure that all transactions are properly documented and accounted for.

8. Bill submission:

Our dedicated billing team oversees the submission of invoices to customers, ensuring all relevant documents are available. Once all necessary documentation, including the POD, ER, FRA, and ERA are available, the billing team proceeds to raise a tax invoice based on the approved and agreed-upon freight rates with the customer.

The tax invoice is generated in accordance with the terms of the agreement and can be issued either manually or through the Transportation Management apps utilized by the customer. Following the generation of the invoice, it is meticulously reviewed to ensure accuracy in pricing and compliance with regulatory requirements. Subsequently, the tax invoice, along with all valid documents, is submitted to the relevant authorities and departments within the customer's setup.

9. Accounting:

Upon the issuance of the tax invoice by the billing department, a copy of the invoice is promptly provided to the accounts department for accounting purposes. This ensures that all financial transactions, including revenue generated from billing activities, are accurately recorded and accounted for in the company's financial records. The accounts department is responsible for reconciling the tax invoice with other financial documentation, such as bank statements and transaction records, to verify the completeness of the accounting entries.

10. Payment Management and Follow-Up:

Our billing and dedicated credit control team take proactive measures to ensure timely collection of payments for invoices within the agreed credit period. This involves closely monitoring payment deadlines and following up with customers to expedite the payment process. By maintaining regular communication with customers, the credit control team seeks to address any payment issues or delays promptly and efficiently. This proactive approach helps to maintain a healthy cash flow and smooth functioning of our operations. Additionally, the credit control team plays a crucial role in managing working capital by optimizing the inflow of funds into the system. By closely managing payment collections and credit terms, they help to maximize liquidity and support ongoing business activities.

Being in service industry, capacity and capacity utilisation is not applicable.

COMPETITION

Our Company faces competition from numerous road transportation logistics companies operating in India, ranging from large multinational corporations to small local players. Competing with them for market share, clients, and routes is a constant challenge. Price is often a significant factor in the logistics industry. Competitors may engage in price wars to attract clients, which can squeeze profit margins for all players. Companies that embrace technology for fleet management, route optimization, tracking, and customer service gain a competitive edge. Those who lag behind in adopting such technologies may struggle to keep up. India's road infrastructure is still developing in many areas. Companies may face challenges such as poor road conditions, traffic congestion, and inadequate facilities like truck stops and repair centers. The rise of digital freight marketplaces and on-demand logistics services can disrupt traditional business models. Companies need to adapt to these changes or risk losing market share. Customers increasingly demand faster delivery times, real-time tracking, and transparency in logistics operations. Companies that can provide superior service quality and meet these expectations gain a competitive advantage. Natural disasters, political instability, and other unforeseen events can disrupt supply chains. Companies that have robust contingency plans and can quickly adapt to changing circumstances fare better in such situations. With growing awareness of environmental issues, companies that adopt sustainable practices and offer eco-friendly transportation solutions may gain a competitive edge over those that do not. As the Indian economy becomes more integrated with the global market, logistics companies face competition not only from domestic players but also from international firms expanding their operations in India.

This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of the National Environmental Policy:

2. Intra-generational Equity: Livelihood Security for the Poor

Furthermore, SEBI vide press release bearing number 12/2023 has approved the proposal for reducing the time period for listing of shares in public issue from existing 6 working days to 3 working days from the date of the closure of the issue. PHASED IMPLEMENTATION OF UPI FOR BIDS BY RETAIL INDIVIDUAL BIDDERS AS PER THE UPI CIRCULAR

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 01, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 01, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 01, 2023 and on a mandatory basis for all issues opening on or after December 01, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 09, 2023 (“T+3 Notification”). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Book Running Lead Manager.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Book Running Lead Manager.

The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%

1,000	23	1,500	50.00%

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2) / 2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015, as updated from time to time by RBI and Master Direction– Foreign Investment in India (updated up to March 08, 2019). In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular and Master Direction. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

In case of investment in sectors through Government Route, approval from competent authority as mentioned in Section 4 of the FDI Policy 2020 has to be obtained. The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP / RBI, from time to time.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Our Company, the Underwriters and their respective directors, officers, agents, affiliates, and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that

- (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations;
- (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and
- (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules.

Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction / purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India.
