Any percentage amounts, as set forth in “**Risk Factors**” on page 24 and “**Management Discussion and Analysis of Financial Condition and Results of Operations**” on page 164 of this Draft Red Herring Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “**Restated Financial Statements**”.

* A Show Cause Notice (“SCN”) dated 29.09.2006 was issued by Directorate of Revenue Intelligence (“DRI”) pursuant to the search conducted by official of DRI from 29.09.2004 to 30.09.2004 at the premises of Dwarkadhish Venture Private Limited (formerly known as Siyaram Metals Private Limited) (“**Company**”). The said SCN contained several charges on the Company as well our Promoter, Mr. Ramgopal Maheshwari, which inter-alia included undervaluation & misdeclaration of imports, evasion of duty, fictitious CT-3 & EEFC clearances, fake clearances to advance licence holders etc., pursuant to which it was sought from the Company that why custom duty amounting to Rs. 4221.97 lakhs along with various penalty and interest should not be recovered and confiscation of goods of value of Rs. 11617.96 lakhs should not be done, under the provisions of Customs Act, 1962 and Central Excise Act, 1944.

Though the aforesaid SCN was adjudicated vide order dated 31.03.2009 by Commissioner of Central Excise and Customs, Rajkot (“**Department**”) confirming the demand against the Company, however, the same was challenged by the Company before the Custom Excise & Service Tax Appellate Tribunal, Ahmedabad (“**CESTAT**”), which had set-aside the said order dated 31.03.2009 and remanded the matter for *de-novo* adjudication on the ground of violation of principle of natural justice, vide order dated 12.08.2009.

The proceedings in the SCN were thereafter adjudicated by Commissioner, Central GST and Central Excise vide its order dated 25.02.2020 (issue date 28.02.2020) confirming the charges made in SCN and imposing total demand of Rs. 11357.19 lakhs (i.e. Rupees one hundred thirteen crores fifty seven lakhs and nineteen thousand) along with interest at appropriate rates and personal penalty of Rs. 850.00 lakhs on our Promoter, Mr. Ramgopal Maheshwari. The Company and Mr. Ramgopal Maheshwari challenged the aforesaid order by filing an appeal before CESTAT, Ahmedabad, however, the Company did not comply with the mandatory condition of pre-deposit. The Company also made civil application no. 6599/2021 with Gujarat High Court. The Gujarat High Court allowed the petition filed by the Company vide its order dated April 01, 2022 and stated in its order that “*Show cause notice issued in each case by the DRI is quashed on the basis of the ratio laid down in M/s. Canon India (Supra) without entering into the merits of individual case. This would be subject to the outcome of review pending before the Apex Court in Commissioner of Customs Vs. M/s. Canon India Pvt. Ltd. [Review Petition (Civil) No. 400/2021 (Diary No. 9580/2021) filed on 07.04.2021]. Furthermore, this quashment shall not in any manner preclude the Revenue to initiate action on merit, if permissible under the law, by proper authority.*”

Further, the CESTAT vide its order dated September 22, 2022 delivered that “*the matter regarding pre-deposit is adjourned sine die. Both sides have liberty to mention as and when the Canon India judgement is delivered by the Hon’ble Supreme Court in the Review Petition.*”

The Union of India, Additional Director General Directorate of Revenue Intelligence, the Commissioner of CGST and Central Excise (“**Petitioners**”) has filed special leave petition with Supreme Court of India against Dwarkadhish Venture Private Limited

(formerly known as Siyaram Metals Private Limited) and our Promoter, Ramgopal Maheshwari (“**Respondents**”) against the aforesaid order of Gujarat High Court along with an application for condonation of delay. The matter is yet to be heard by the SC on condonation of delay.

We cannot assure you that any of these proceedings will be decided in favour of our Company, Directors or Promoters, or that no further liability will arise out of these proceedings. Any adverse decisions could impact our cashflows and profit or loss to the extent of demand amount, interest and penalty. Further, such proceedings could divert management time and attention, and consume financial resources in their defence or prosecution. An adverse outcome in any of these proceedings may also affect our reputation, standing and future business, and could have an adverse effect on our business, prospects, results of operations and financial condition, which could also adversely affect the trading price of our Equity Shares. For the details of the cases please refer the chapter titled “*Outstanding Litigations and Material Developments*” on page 173 of this Draft Red Herring Prospectus.

2. *Our cost of production is exposed to fluctuations in the prices of our raw material and thus any disruption in the supply of the raw material or volatility in the supply and pricing of our raw material could have an adverse effect on our business, cash flows, financial condition and results of operations.*

The principal raw material used in our manufacturing process is brass scrap, which is mainly imported by us from USA, UK, Europe and Middle East. Our cost of raw materials consumed for Fiscal 2023 was ₹ 45,130.06 lakhs, which represented 91.57% of our revenue from operations. The price of brass and brass scrap primarily depends on the Copper price on London Metal Exchange (LME). Since we have long lead times in our supply chain due to high imports, the scrap markets and forex rate may fluctuate in the intervening time and we may not be able to adjust prices of our finished products against what we would have paid for our raw materials which exposes us to a significant risk of price and currency fluctuations. The prices and supply of these raw materials are also affected by, among others, general economic conditions, competition, production costs and levels, the occurrence of pandemic (such as COVID-19), transportation costs, indirect taxes and import duties, tariffs and currency exchange rate.

We have in the past experienced cost fluctuations for brass scrap due to volatility in the commodity markets. Increasing global demand for, and uncertain supply of, brass scrap could disrupt our ability to obtain such materials in a timely manner and may lead to increased costs. In case of increase in raw material prices, there can be no assurance that we will be able to pass such cost increases to our customers. Any increase in the cost of inputs to our production could lead to higher costs for our products. If we increase the prices of our products to offset the impact of higher costs, this may cause certain of our customers to cancel orders or refrain from purchasing our products, which may materially and adversely reduce the demand for our products, and thus, negatively impact our operating results. If we are unable to pass on cost increases to our customers or are unsuccessful in managing the effects of raw material price fluctuations, our business, financial condition, results of operations and cash flows could be materially and adversely affected.

In addition, any restrictions, either from the Central or state governments of India, or from countries which we import from, on the import of our raw materials or any adverse change in policies by India or other countries, in terms of tariff and non-tariff barriers, may adversely affect our business, prospects, financial condition and results of operations. There can be no assurance that such restrictions/ regulations would not be made more stringent which would consequently restrict our ability to import raw materials from other jurisdictions. Further, there can be no assurance that, under these circumstances, we will be successful in identifying alternate suppliers for raw materials or we will be able to source the raw materials at favourable terms in a timely manner. Any restriction on import of raw materials could have an adverse effect on our ability to deliver products to our customers, business and results of operations.

3. *We are primarily dependent upon few key suppliers for procurement of raw materials. Any disruption in the supply of these raw materials or fluctuations in their prices could have a material adverse effect on our business operations and financial conditions.*

We procure a large portion of brass scrap from a few key suppliers, with whom we do not have any long-term supply contracts and therefore, we cannot assure you that we shall always have a steady supply of raw material at prices favourable to us. For the Fiscals 2023 and 2022, purchases from our top ten suppliers amounted to ₹ 306.15 crores and ₹ 215.32 crores respectively, and represented 63.86% and 55.90% of our total raw material purchases. Inadequate supply of brass scrap caused either by a sudden change in the prices or imposition of any new taxes or loss of any of our existing major vendors for any reason could have a material adverse effect on our business operations and profitability. If we cannot fully offset increases in the cost of raw materials, through increases in the prices for our products, we would experience lower margins and profitability, which would have a material adverse effect on our financial condition and results of operations. Our ability to remain competitive, maintain costs and profitability depend, in part, on our ability to source and maintain a stable and sufficient supply of raw materials at acceptable prices.

Further, discontinuation of such supply or a failure of these suppliers to adhere to the delivery schedule or the required quality could hamper our production schedule and therefore affect our business and results of operations. There can be no assurance that demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials. If we were to experience a significant or prolonged shortage of raw materials from any of our suppliers, and we cannot procure the raw materials from other sources, we would be unable to meet our production schedules for our key products and to deliver such products to our customers in a timely manner, which would adversely affect our sales, margins and customer

relations. Any delay in the supply or delivery of raw materials to us by our suppliers in may in turn delay our process of manufacture and delivery of products to our customers and this may have an adverse effect on our business, cash flows and results of operations. Additionally, our inability to predict market conditions may result in us placing supply orders for inadequate quantities of such raw materials. Therefore, we cannot assure you that we will be able to procure adequate supplies of raw materials in the future, as and when we need them and on commercially acceptable terms.

4. Substantial portion of our revenues has been dependent upon few customers, with which we do not have any firm commitments. The loss of any one or more of our major customer would have a material adverse effect on our business, cash flows, results of operations and financial condition.

The substantial portion of our revenues has been dependent upon few customers. For instance, our top ten customers for the F.Y. ended March 31, 2023 and March 31, 2022 accounted for 48.70% and 42.01% of our revenue from operations for the respective year. Our reliance on a limited number of customers for our business exposes us to risks, that may include, but are not limited to, reductions, delays or cancellation of orders from our significant customers, a failure to negotiate favourable terms with our key customers or the loss of these customers, all of which would have a material adverse effect on the business, financial condition, results of operations, cash flows and future prospects of our Company.

The contribution of our top ten customers in our sales as a percentage of the revenue from operations during Fiscal 2023 are disclosed hereunder:

S. No.	Customer	% contribution in the revenue from operations for Fiscal 2023
1	Customer 1	9.83%
2	Customer 2	7.66%
3	Customer 3	6.49%
4	Customer 4	5.52%
5	Customer 5	4.64%
6	Customer 6	3.67%
7	Customer 7	2.79%
8	Customer 8	2.77%
9	Customer 9	2.76%
10	Customer 10	2.58%
Total		60.94%

In addition, we have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on maintaining good relationship with them. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows.

Further, there is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers. In order to retain some of our existing customers, we may also be required to offer terms to such customers which may place restraints on our resources. Additionally, our revenues may be adversely affected if there is an adverse change in any of our customers' supply chain strategies or a reduction in their outsourcing of products we offer, or if our customers decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers.

We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, the sales volume may vary due to our customers' attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences etc., which may result in decrease in demand or lack of commercial success of our products, which could reduce our sales and adversely affect our business, cash flows, results of operations and financial condition.

In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honor their outstanding amounts in time and whether they will be able to fulfill their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

5. We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Except as described below and as mentioned in the chapter titled **“Government and Other Approvals”**, we believe that we have obtained requisite permits and licenses which are adequate to run our business, however we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

We have made an application for obtaining Factory licence with Director Industrial Safety and Health, Jamnagar for our (i) manufacturing unit at Plot 12 and 14, Naghedi, Post-Khodiyar Colony, Lakhbaval – 361006 Dist. Jamnagar and (ii) for the premises situated at Plot 10, Naghedi, Post-Khodiyar Colony, Lakhbaval – 361006 Dist. Jamnagar, both of which are pending for approval. We have applied for renewal of Consolidated Consent and Authorization from Gujarat Pollution Control Board under Water Act, 1974 and Air Act, 1981 - Environment Protection Act, 1986 for the factory situated Plot 6 and 7, Naghedi, Post-Khodiyar Colony, Lakhbaval – 361006 Dist. Jamnagar, which is pending for approval. Further, our Company has recently applied for factory licence with Director Industrial Safety and Health, Jamnagar. Also, our Company is in the process of making application for change in name in all the permits, licenses and approvals, which are under Company’s former name. For details regarding pending approvals, please refer to section titled **“Government and Other Approvals”** beginning on page 177 of the Draft Red Herring Prospectus. There can be no assurance that the relevant authorities will issue or renew these approvals or licenses in a timely manner, or at all. In the event of any unanticipated delay in receipt of such approvals, the proposed capacity expansion plan may extend and any such delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

The approvals required by our Company are subject to numerous conditions and there can be no assurance that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

6. Ours is a high volume-low margin business.

Ours is a high volume-low margin business. Our financial operations are largely dependent on the volume of the business we generate which will add to profits in absolute terms. We need to generate higher volume in terms of quantity to increase our profitability to make our products commercially feasible. Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability and hence adversely affect our operating results, debt service capabilities and financial conditions. Due to the nature of the products we sell, we may not be able to charge higher margins on our products. Hence, our business model is heavily reliant on our ability to effectively grow our turnover and manage our key processes including but not limited to procurement of raw material, timely sales execution and continuous cost control.

The table below gives details of our PBT and PAT based on restated financial statements:

Particulars	₹ in lakhs except percentage		
	F.Y. 2022-23	F.Y. 2021-22	F.Y. 2020-21
Total Income	49,786.27	42,644.34	13,972.93
PBT	1,080.56	449.75	195.45
PBT Margin(%)	2.19%	1.06%	1.41%
PAT	765.42	322.47	142.28
PAT Margin (%)	1.55%	0.76%	1.03%

7. We derive a major portion of our revenue from sale of segregated scrap which is a highly competitive and low-entry barrier business due to non-involvement of any manufacturing operations.

We derive a significant portion of our revenue from sale of segregated scrap, which primarily comprises the sale of brass scrap honey, copper scrap, red brass ebony and zinc scrap. For the F.Y 2021-22 and 2022-23, our revenue from sale of segregated scrap was ₹ 234.42 crores and ₹ 253.30 crores respectively which represented 55.39% and 51.39% of our revenue from operations for the respective year. The sale of segregated scrap business is a highly competitive and low-entry barrier business due to non-involvement of any manufacturing operations, which allows new entrants to easily establish same business with low capital and resources, which may lead to intense competition within the market. If we fail to compete effectively, our business, prospects, financial condition and results of operations could be adversely affected.

8. Trade receivables form a major part of our current assets and net worth. Failure to manage our trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.

Our Company’s business is working capital intensive and hence, trade receivables form a major part of our current assets. As on March 31, 2023, our trade receivables amounted to Rs. 3461.45 lakhs. Our Company has written off bad debts on account of non-

recoverability of the dues from the Debtors which amounted to Rs. 1774.89 lakhs in F.Y. 2021-22 and Rs. 45.55 lakhs in F.Y. 2022-23. We cannot assure that our Company will be able to effectively manage its trade receivables in future. Any such failure in management of trade receivables could result into bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in case of increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability. We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due.

9. *We are subject to strict quality requirements and are consequently required to incur significant expenses to maintain our product quality. Any failure to comply with such quality standards may lead to cancellation of existing and future orders which may adversely affect our reputation, financial conditions, cash flows and results of operations.*

We specialize in the manufacture and supply of (i) brass-based components (plumbing and sanitary parts) and (ii) brass ingots, billets and brass rods. Given the nature of our products and the sector in which we operate, our customers have high and exacting standards for product quality as well as delivery schedules. Adherence to quality standards is a critical factor in our manufacturing process as any defects in the products manufactured by our Company or failure to comply with the technical specifications of our customers regarding the alloy composition may lead to cancellation of the orders placed by our customers. Further, any failure to make timely deliveries of products in the desired quantity as per our customers' requirements could also result in the cancellation of orders placed by our customers and may adversely affect our reputation and goodwill. In addition, our customers may demand, among others, price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, change their outsourcing strategy by moving more work in-house, or replace their existing products with alternative products, any of which may have an adverse effect on our business, cash flows, results of operations and financial condition.

10. *Our inability to accurately forecast demand for our products, and accordingly manage our inventory, may have an adverse effect on our business, cash flows, financial condition and results of operations.*

Our inability to accurately forecast demand for our products and manage our inventory may have an adverse effect on our business, cash flows, financial condition and results of operations. We do not have firm commitment long term supply agreements with our customers and instead rely on short term purchase orders to govern the volume and other terms of the sales of products. Accordingly, we plan our production volumes based on our forecast of the demand for our products. Any error in forecasting could result in surplus stock which would have an adverse effect on our profitability.

We maintain a high level of inventory of raw materials, work in progress and finished goods. As of Fiscal 2023, our inventory of raw materials, stores & spares, finished goods and other items amounted to ₹ 7755.17 lakhs. Our high level of inventory increases the risk of loss and storage costs to us as well as increasing the need for working capital to operate our business. Further, as our customers are not obliged to purchase our products or provide us with a binding long-term commitment, there can be no assurance that customer demand will match our production levels.

On the other hand, in the event that the demand we have forecasted is lower than the actual demand of our products, and we are unable to ramp up production to match such demand, we may be unable to supply the requisite quantity of products to our customers in a timely manner. Any increase in our turn-around time could affect our production schedules and disrupt our supply, which could have an adverse effect on our business, cash flows, financial condition and results of operations.

11. *Our operations involve melting of brass scrap in the furnaces which can be extremely dangerous and any accident, could cause serious injury to people or property which may adversely affect our production schedules, costs, sales and ability to meet customer demand.*

Our operations require individuals to work under potentially dangerous circumstances, with flammable materials as a significant portion of our business involves melting of brass scrap in the hot refining section. Despite compliance with requisite safety requirements and standards, our operations are subject to significant hazards, including:

- explosions
- fires
- mechanical failures and other operational problems
- inclement weather and natural disasters
- discharges or releases of hazardous substances, chemicals or gases; and
- other environmental risks.

Although we employ safety procedures during the melting of brass in the furnaces and maintain what we believe to be adequate insurance, there is a risk that any hazard may result in personal injury to our employees or other persons, destruction of property or equipment, environmental damage, etc. may lead to suspension of our operations and/or imposition of civil or criminal liabilities. The loss or shutting down of our facilities could disrupt our business operations and adversely affect our results of operations, cash

flows, financial condition and reputation. We could also face claims and litigation in India, filed on behalf of persons alleging injury predominantly as a result of occupational exposure to hazards at our facilities, the outcome of which is difficult to assess or quantify, and the cost to defend such litigation could be significant. These claims and lawsuits, individually or in the aggregate, may be resolved against us inflicting negative publicity and consequently, our business, cash flows, results of operations and financial condition could be adversely affected.

In particular, if operations at our manufacturing facilities were to be disrupted as a result of any significant workplace accident, fire, explosion or other connected reasons, our financial performance may be adversely affected as a result of our inability to meet customer demand or committed delivery schedules for our products. Interruptions in production may also increase our costs and reduce our sales, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we may become involved in as a result, which may negatively affect our profitability, business, reputation, financial condition, results of operations, cash flows and prospects.

12. Under-utilization of our manufacturing capacities and an inability to effectively utilize our existing manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.

Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing facilities as well as on the market demand of the products sold by us. Among others, the capacity utilization also depends upon the availability of raw materials, labour, industry/ market conditions and procurement practice followed by our customers. In Fiscals 2023, 2022 and 2021, our overall capacity utilization is detailed below:

Capacity details	2020-21	2021-22	2022-23	Existing Installed Capacity (p.a.)
Brass Billets and Ingots				
Installed Capacity (in Mt)	9,900	9,900	9,900	9,900
Actual Utilization (in Mt)	2046.98	2638.59	3907.19	
Actual Capacity (%)	20.68%	26.65%	39.47%	
Brass Rods				
Installed Capacity (in Mt)	8,250	8,250	8,250	8,250
Actual Utilization (in Mt)	1012.54	1060.89	1279.48

Brass Components (plumbing and sanitary parts)				
Installed Capacity (in Mt)	3,300	3,300	3,300	3,300
Actual Utilization (in Mt)	698.78	852.91	616.46

As certified by Vasant P. Bhadra, Chartered Engineer, through certificate dated September 21, 2023

In the event we are unable to achieve considerable capacity utilization of our current manufacturing facility, it would result in operational inefficiencies which could have a material adverse effect on our business, results, financial condition and future prospects. Under-utilization of our manufacturing capabilities over extended periods, or significant under-utilization in the short-term, could materially and adversely impact our business, growth prospects and future financial performance.

13. Our inability to handle risks associated with our export sales could negatively affect our sales to customers in foreign countries, as well as our operations and assets in such countries, and our overall profitability.

Our revenue from exports for fiscal 2023 and 2022 was ₹ 16,235.87 lakhs and ₹ 11,335.13 lakhs respectively which constituted 32.94% and 26.78% of our revenue from operations for the respective fiscal. We export our products to countries such as China, Germany, Belgium and Oman, of which major revenue is derived from export to China. For instance, in fiscal 2023, our revenue from exports to China were ₹ 15,315.00 lakhs, which contributed 94.34% of export revenue.

Our international operations are subject to risks that are specific to each country and region (especially China) in which we operate, as well as risks associated with international operations in general. Our international operations are subject to, among other risks and uncertainties, the following:

- demand for our products by our customers located outside India;
- social, economic, political, geopolitical conditions and adverse weather conditions, such as natural disasters, civil disturbance, terrorist attacks, war or other military action would affect our business and operations and may also prevent us from production or delivery of our products to our customers;
- environmental, health, safety, labor and accounting laws;
- changes in foreign laws, regulations and policies, including restrictions on trade, import and export license requirements, and tariffs and taxes, intellectual property enforcement issues and changes in foreign trade and investment policies, may affect our ability to both operate and the way in which we manage our business in the countries in which we operate;

- fluctuations in foreign currency exchange rates against the Indian Rupee, may affect our results of operations, the value of our foreign assets, such as export receivables, the relative prices at which we and our competitors sell products in the same markets and the cost of certain inventory and non-inventory items required for our operations. For instance, fluctuation of the Pound Sterling, Euro and U.S. Dollar would have an impact on the export revenues and profits of our operations;
- anti-competitive behavior, money laundering, bribery and corruption by third parties as well as crime and fraud; and
- inability to effectively enforce contractual or legal rights and adverse tax consequences; differing accounting standards and interpretations.

In addition, we may not perform as expected in our international markets, because our competitors and the established players in these markets may have a more established presence and have more experience in operating in such market, which could allow them to have better relationships with distributors and consumers, gain early access to information regarding attractive sales opportunities and, in general, be better placed to launch products with other advantages of being a first mover.

14. We do not own the manufacturing facilities, registered office and other place of operations from which we carry out our business activities. In case of non-renewal of lease agreements or dispute in relation to use of the said premise, our business and results of operations can be adversely affected.

As on date of this DRHP, we have two manufacturing facilities (including registered office) and a scrap segregation unit, all of which are obtained by us on lease from our Directors, Mr. Ramgopal O. Maheshwari and Mrs. Madhu Ramgopal Maheshwari. In the event of termination/non-renewal of said agreements, we may be required to vacate the said premises which may cause disruption in our inventory management, corporate affairs and business and impede our effective operations which could lead temporarily impact our business operations until we get suitable alternative premises. For details on the duration of existing rent/lease agreements for our premises, please refer to the section titled ***“Our Business-Properties”*** beginning on page 86 of this Draft Red Herring Prospectus.

In addition, the agreements pertaining to the lease has irregularities of enforceability, such as inadequate payment of stamp duty, which may affect the evidentiary value of the relevant agreements in specific performance or other injunctive procedures in a court of law, and could impair our operations. Further, it may result in levy of penal charges, in case cognizance being taken by concerned Authorities.

There can be no assurance that we will, in the future, be able to retain or/and renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the registered office on similar terms favorable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations. In the event that the rent agreement is terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our operations which could materially and adversely affect our business, financial condition and results of operations.

Further, we have made investment in certain property, which are not currently giving us any monthly rental income. In case, we are not able to generate any significant returns from such invested property, our results of operations and financial condition can be adversely affected.

15. Our Statutory Auditor have included emphasis of matters in their Audit Report on financial statements for F.Y. 2020-21 and 2021-22.

Extract of Note 1.1(C) - COVID-19 disclosure-The extent to which Covid-19 pandemic will impact the Company's operation and financial result is dependent on future developments which are still highly uncertain and thus for current year no effect is provided in the books of accounts.

There is no assurance that our audit reports for any future fiscal periods will not contain qualifications, matters of emphasis or other observations which affect our results of operations in such future periods. For further details, see, "**Financial Information of the Company**" and "**Management's Discussion and Analysis of Financial Condition and Results of Operations**" on pages 126 and 164, respectively.

16. Our continued operations at our manufacturing facilities are critical to our business and any disruption, breakdown or failure of machinery, disruption to power sources or any temporary shutdown of our manufacturing facility, may have a material adverse effect on our business, results of operations, financial condition and cash flows.

We currently operate through 3 facilities, all of which are located in the district of Jamnagar, which is considered as a hub of brass components. We manufacture brass billets & ingots, brass rods and brass components (plumbing parts) from our unit-I situated at land of 4970 sq. mtrs. and the brass components (sanitary parts) are manufactured from our unit-II situated at land of 3629 sq. mtrs. And, our Unit-III, situated at land of 3346 sq. mtrs. is used for segregation of scrap. Our manufacturing facilities are subject to operating risks, such as breakdown or failure of equipment, disruption in power supply or processes, severe weather conditions, performance below expected levels of efficiency, obsolescence, labor disputes, natural disasters, industrial accidents, infectious diseases (such as COVID-19 pandemic), political instability, the need to comply with the directives of relevant government authorities and the requirement to obtain certain material approvals to operate our manufacturing facilities. We also require substantial electricity for our manufacturing facilities which is sourced from state electricity board. In case, the supply is not available for any reason, our production schedule may be hampered or if our electricity suppliers increase the price for electricity, our cost of production and profitability would be materially adversely affected. Further, natural disasters or adverse conditions may occur in the geographical areas in which we operate including severe weather, tropical storms, floods, excessive rainfalls as well as other events beyond our control. If for any reason electricity is not available, we may need to shut down our plants until an adequate supply of electricity is restored. Interruptions of electricity supply can also result in production shutdowns, increased costs associated with restarting production and the loss of production in progress.

Our customers rely significantly on the timely delivery of our products and our ability to provide an uninterrupted and timely supply of our products is critical to our business. While we seek to ensure a continuous supply of our products to our customers, our customer relationships, business and financial results may be adversely affected by any disruption of operations of our product lines due to any of the factors mentioned above.

17. Our business operations are majorly concentrated in certain geographical regions and any adverse developments affecting our operations in these regions could have a significant impact on our revenue and results of operations.

The manufacturing operations of the Company are carried in the state of Gujarat in the village Lakhabaval, district Jamnagar. Due to the geographical concentration of our manufacturing operations in Gujarat, our operations are susceptible to local, regional and environmental factors, such as social and civil unrest, regional conflicts, civil disturbances, economic and weather conditions, natural disasters, demographic and population changes, and other unforeseen events and circumstances. Such disruptions could result in the damage or destruction of a significant portion of our manufacturing abilities, significant delays in the transport of our products and raw materials, loss of key managerial personnel, and/or otherwise adversely affect our business, financial condition and results of operations.

In addition, we generate major domestic sales through our customers situated in Gujarat. In Fiscal 2023, Gujarat contributed 56.40% of revenue from operations, Madhya Pradesh contributed 5.25%, Punjab contributed 2.03% and Rajasthan contributed 1.41% of our revenue from operations. Such geographical concentration of our business in Gujarat region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and results of operations.

Further, as we enter into new markets and geographical areas, we are likely to compete with not only national players, but also the local players, who might have an established local presence, and are more familiar with local business practices and have stronger relationships with local customers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise

and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

18. Our growth is closely tied to the outlook of industries that utilize brass in the production of their end products.

Our Company is mainly engaged in manufacturing of brass ingots, billets, rods and brass based components (plumbing and sanitary parts). The brass products which we manufacture or deal in finds application mainly in construction sector such as piping and plumbing as well as certain electric components. Thus, our business is dependent on the performance and market trends of the construction & real estate sector (residential and non-residential) in India as well as abroad where we export our products. The real estate and construction sector may be affected by various factors outside our control, including prevailing general economic and market conditions, changes in the applicable governmental regulations, demographic trends, employment and income levels and interest rates, among other factors. In the event of any downturn or cyclical fluctuation in the construction sector affecting the demand of brass products which we deal in or any developments that make our products less economically beneficial, could have an adverse impact on our business, financial condition and results of operations.

19. We are subject to competition from both organized and unorganized players in the market, which may significantly affect the fixation and realisation of the price for our product, which may adversely affect our business operation and financial condition.

The market for our products is competitive on account of existence of both the organized and unorganized players. Competition occurs generally on the key attributes such as quality of products, sales network, pricing and timely delivery. Some of our competitors have longer industry experience and greater financial, technical and other resources, which may enable them to adopt faster in changing market scenario and remain competitive. Moreover, the unorganized sector can offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition. Some of our significant competitors in the organized segment includes Poojawestern Metaliks Limited, Sprayking Agro Equipment Limited, Axelon Metals, Madhav Extrusions and Shree Extrusions.

We operate in a rapidly consolidating industry. The strength of combined companies could affect our competitive position in all of our business areas. Furthermore, if one of our competitors or their customers acquires any of our customers or suppliers, we may lose business from the customer or lose a supplier, which may adversely affect our business, results of operations and financial condition.

20. Our Company is in use of trademark, which is not registered under the Trademarks Act, 1999 as on date of Draft Red Herring Prospectus. Thus, we may be subject to claims alleging breach of third party intellectual property rights.

The trademark & logo , which we are using for our business, has not been applied for registration under class 6 under the provisions of the Trademarks Act, 1999. As such, we do not enjoy the statutory protections accorded to a registered trademark as on date. There can be no assurance that we will be able to register the said trademark and the logo in future or that, third parties who have filed objection will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property. For further details on above and other trademarks, please refer to chapter titled “**Our Business**” beginning on page 86 of this Draft Red Herring Prospectus.

21. We are exposed to foreign currency fluctuation risks, particularly in relation to import of raw materials and export of products, which may adversely affect our results of operations, financial condition and cash flows.

We present our financial statements in Indian Rupees. However, given that the revenue from export form significant portion of our total revenue, a large part of our business transactions is denominated in foreign currencies. Our revenue from exports for fiscal 2023 and 2022 was ₹ 16,235.87 lakhs and ₹ 11,335.13 lakhs respectively which constituted 32.94% and 26.78% of our revenue from operations for the respective fiscal. Further, our raw materials such as brass scrap which is mainly imported by us is priced by reference to benchmarks quoted in US dollars, and hence our expenditures are largely influenced by the value of the US dollar. Depreciation of the Indian Rupee against the USD may adversely affect our results of operations by increasing the cost of the raw materials we import or any proposed capital expenditure in foreign currencies. Although we generally seek to pass exchange rate fluctuations through to our customers through increases in our prices, there can be no assurance that we will be able to do so immediately or fully, which could adversely affect our business, financial condition, results of operations and cash flows. Thus, our global operations exposes us to foreign exchange rate risks, arising primarily from our receivables, payables, export and import of

goods. There can be no guarantee that such fluctuations will not affect our financial performance in the future as we continue to expand our operations globally.

22. We are heavily dependent on our Promoter and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.

Our success heavily depends upon the continued services of our Promoter and Key managerial personnel, particularly Mr. Ramgopal Ochhavlal Maheshwari and Mr. Mr. Bhavesh Ramgopal Maheshwari. We depend significantly on them for executing our day-to-day activities. The loss of any of our Promoter or Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section **“Our Management”** on page 108 of this Draft Red Herring Prospectus.

23. There are certain discrepancies/errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and certain non-compliances of provisions of Companies Act, 2013. Any penalty or action taken by any regulatory authorities in future, for non-compliance with provisions of corporate or any other law could impact the financial position of the Company to that extent.

There are few discrepancies noticed in some of our corporate records relating to e-forms filed with the Registrar of Companies, which inter-alia includes clerical errors in the Annual Returns filed by our Company with the ROC in past years, for instance, the company has not shown holding company in form filed with ROC.

In addition, our Company was required to appoint Company Secretary from the F.Y. 2017-18 as the paid-up share capital of the company exceeded the limits prescribed under the Companies Act, 2013, at that time, but such appointment was done by the company in F.Y. 2021-22. Further, the pursuant to meeting the threshold limit for Cost Audit our Company failed to appoint the cost auditor and comply with provision of section 148 of the Companies Act, 2013 from FY 2021-22, however the company has now appointed the Cost auditor for completing the audit of the company which is in under process.

Further, our company has in the past made certain advances to relatives of Director & relatives of directors which is a non-compliance of Section 185 of the Companies Act, 2013, however no such amount is outstanding as on March 31, 2023. Further, our company had accepted loan in non-compliance of provisions of section 73 of Companies Act 2013 in the year 2019-20, however the same was repaid during that year itself. In case of any action being taken by the regulatory authorities against the Company and/or its officers, the same may have an adverse effect on our business, financial conditions and result of operations.

Further, our company has not complied with certain Accounting Standards in the past such as AS -15 (Accounting for Employee Benefits) in respect of actuarial valuation of gratuity and AS-11 (The Effects of Changes in Foreign Exchange Rates), however the same have been duly complied by us in the restated financial statements.

24. We have in the past entered into related party transactions and may continue to do so in the future.

Our Company has entered into various transactions with our Directors, Promoters and Promoter Group members/entities. These transactions, inter-alia includes, issue of shares, rent, interest payments, remuneration, loans and advances, reimbursements etc. For details, please refer to **Note W - Related Party Transactions**” under Section titled **“Financial Information of the Company”** and Chapter titled **“Capital Structure”** beginning on page 153 and 56 respectively of this Draft Red Herring Prospectus. Our Company has entered into such transactions due to easy proximity and quick execution. While we believe that all such transactions have been conducted on an arm’s length basis and in the ordinary course of business, there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

25. Our Company had negative operating cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

The detailed break up of operating cash flows is summarized in below mentioned table and our Company has reported negative operating cash flow in F.Y. 2022-23. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

(₹ in lakhs)			
Particulars	F.Y. 2022-23	F.Y. 2021-22	F.Y. 2020-21
Net Cash flow from Operating Activities	(2,824.41)	1,057.56	648.72

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay

dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

26. *If we are not able to successfully manage our growth, our business and results of operations may be adversely affected.*

Continued growth of our business and customer base requires us to expand our product portfolio, strengthen our product quality, expand and enhance our sales channels, better manage our supply chain, upgrade our information systems and technologies and devote other resources to our business expansions, among others. As we continue to grow, managing our business will become more complicated as we develop a wider product mix, some of which we may have less experience in. In addition, as we increase our product offerings, we will need to work with a larger number of business partners and maintain and expand mutually beneficial relationships with our existing and new business partners. Our inability to manage the expansion of our products range, customer base and manufacturing capacities, and execute our growth strategy in a timely manner or within budget estimates, or our inability to meet the expectations to track the changing preferences of our customers or other stakeholders could have an adverse effect on our business, results of operations and financial condition.

We cannot assure you that we will be able to effectively manage our growth, that our current personnel, infrastructure, systems, procedures and controls or any measures to enhance them will be adequate and successful to support our expanding operations or that our strategies and new business initiatives will be executed successfully. Our failure to manage our anticipated growth effectively could reduce our ability to execute our business strategies, recruit and retain personnel, innovate, and manage costs all of which could adversely affect our business, results of operations, cash flows and financial condition. In addition, the availability of funds plays a crucial role for growth and expansion of the business. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. Any downgrade in our credit ratings could increase our borrowing costs and adversely affect our access to capital. Further, in case we decide to raise additional funds through the issuance of equity or equity linked instruments, the interests of our shareholders may be diluted. Further, if we decide to meet our capital requirements through debt financing, our interest obligations shall increase and we may be subject to additional restrictive covenants under our respective financing arrangements. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations and financial condition could be adversely affected.

27. *Changes in technology may render our current technologies obsolete or require us to make substantial investments.*

Modernization and technology up gradation is essential to reduce costs and increase the output. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed updated technology, we shall continue to strive to keep our technology, plant and machinery in line with the latest technological standards. In case of a new found technology in the brass components or other products, we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

28. *Adverse publicity regarding our products could negatively impact us.*

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

29. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the Offer price.*

Our Promoters average cost of acquisition of Equity Shares in our Company may be lower than the Offer Price as may be decided by the Company in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapters "*Risk Factors - Prominent Notes*" and "*Capital Structure*" beginning on pages 24 and 56 respectively of this DRHP.

30. *We have not received NOC from one of our lender for undertaking the initial public offer of equity shares.*

As on the date of this Draft Red Herring Prospectus, we have not received the NOC for the Proposed Offer from one of our lender, namely Union Bank of India. However, our Company intends to obtain the necessary NOC in relation to the proposed Offer from such lender prior to the filing of the Prospectus with the RoC, undertaking the proposed Offer without obtaining such lender NOC may constitute a default under such loan agreement, which could impact our loan facilities and may have an effect on our financial condition and results of operations.

31. *Our industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

We believe that the industry in which we operate faces competitive pressures in recruiting and retaining skilled and unskilled labour. Our industry being labour intensive is highly dependent on labour force for carrying out its manufacturing operations. Shortage of skilled / unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past, however there can be no assurance that we will not experience any such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

32. *Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.*

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of our finished products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third-party transport service providers and engage them on a need basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third-party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

33. *Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.*

Our operations are subject to risks inherent in manufacturing facilities such as risk of equipment failure, work accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions including hazards that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environmental damage. Our significant insurance policies consist of, among others, business guard laghu package policy for factory building, plant & machinery and stock in process and marine open policy. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks such as burglary insurance, cash in transit, goods in transit, machinery breakdown, workmen compensation, group personal accident or mediclaim policy. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

34. *Our operations are subject to high working capital requirements. Our inability to maintain an optimal level of working capital required for our business may impact our operations adversely.*

Our business requires significant amount of working capital and major portion of our working capital is utilized towards inventories and trade receivables. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high outstanding amount due from our debtors which may result in a high risk in case of non-payment by these debtors. There can be no assurance that our Promoter will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. For further information, please refer to the chapters/section titled “**Our Business**”, “**Our Promoter and Promoter Group**” and “**Note 47 - Related Party Transactions**”, beginning on pages 86, 120 and 126 respectively of this Draft Red Herring Prospectus.

38. *We have incurred significant indebtedness which exposes us to various risks which may have an adverse-affect on our business and results of operations*

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on March 31, 2023, our total outstanding indebtedness was ₹ 6706.95 lakhs.

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to:

1. increasing our vulnerability to general adverse economic, industry and competitive conditions;
2. limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
3. affecting our credit rating;
4. limiting our ability to borrow more money both now and in the future; and
5. increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a short notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an adverse affect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see “**Statement of Financial Indebtedness**” on page 160 of this Draft Red Herring Prospectus.

39. *Loans availed by Our Company has been secured on personal guarantees of our Director. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected in case of invocation of any personal guarantees provided by our Directors.*

Our Promoter & Directors, Dwarkadhish Venture Private Limited (formerly known as Siyaram Metals Private Limited), Ramgopal O. Maheshwari, Madhuben R. Maheshwari and Bhavesh Ramgopal Maheshwari has provided corporate/personal guarantee to secure a significant portion of our existing borrowings taken from the banks and may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the personal/corporate guarantees provided by the aforesaid may be invoked which could negatively impact their reputation and net worth. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse affect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer “**Statement of Financial Indebtedness**” on page 160 of this Draft Red Herring Prospectus.

40. *Relevant copies of educational qualification of one of our Director is not traceable.*

As of March 31, 2023, such loans amounted to ₹ 498.31 lakhs. In the event that any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. As a result, any such demand may materially affect our business, cash flows, financial condition and results of operations. For further details, please see the section entitled “*Statement of Financial Indebtedness*” on page 160 of this Draft Red Herring Prospectus.

42. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

Our operations may be subject to incidents of theft or damage to inventory. The business may also encounter some inventory loss on account of employee theft, vendor fraud and general administrative error. While we have not experienced any such instance in the past, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse or similar incidents in the future, which could adversely affect our results of operations and financial condition. Though we have insurance losses due to theft, fire, breakage or damage caused by other casualties, could adversely affect our results of operations and financial condition.

43. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

44. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.*

The proposed fund requirement for repayment of cash credit facility, as detailed in the section titled “*Objects of the Issue*” is to be funded from the proceeds of this Issue. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “*Objects of the Issue*” beginning on page 66 of this Draft Red Herring Prospectus.

45. *We may not be able to sustain effective implementation of our business and growth strategy.*

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse affect on our business, financial condition and results of operations.

46. *We are subject to the restrictive covenants of banks in respect of the Loans/ Credit Limits and other banking facilities availed from them.*

Our financing arrangements contain restrictive covenants whereby we are required to obtain approval from our lender, regarding, among other things such as major changes in share capital, management, changes in fixed assets, creation of any other charge, undertake any guarantee obligation etc. There can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows. For further details on the Cash Credit Limits and other banking facilities, please see “*Statement of Financial Indebtedness*” on page 126 of the Draft Red Herring Prospectus.

47. *Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.*

We specialize in the manufacture and supply of brass items which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund. Any demand or penalty raised by the concerned authority in future for any previous years or current year will affect the financial position of the Company.

48. The Objects of the Issue for which funds are being raised, are based on our management estimates and have not been appraised by any bank or financial institution or any independent agency.

The deployment of funds will be entirely at our discretion, based on the parameters as mentioned in the chapter titled “Objects of the Issue”. The fund requirement and deployment, as mentioned in the “*Objects of the Issue*” on page 66 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

49. Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Red Herring Prospectus is based on certain assumptions and has been subjected to rounding off, and future production and capacity utilization may vary.

Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Red Herring Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials and assumptions relating to operational efficiencies. Actual production levels and utilization rates may differ significantly from the estimated production capacities or historical estimated capacity utilization information of our facilities. Undue reliance should therefore not be placed on our production capacity or historical estimated capacity utilization information for our existing facilities included in this Draft Red Herring Prospectus. For further information, see the section titled “*Our Business*” on page 86 of this Draft Red Herring Prospectus.

50. Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section “*Dividend Policy*” on page 125 of the Draft Red Herring Prospectus.

51. Certain key performance indicators for certain listed industry peers included in this Draft Red Herring Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete

Pursuant to the requirements of the SEBI ICDR Regulations, we have included certain key performance indicators, comprising financial and operational information, for certain listed industry peers, in the “*Basis for Offer Price*” beginning on page 71 of the Draft Red Herring Prospectus. Although this information is sourced from and relied upon on the consolidated audited financial statements of the relevant listed industry peers as available on the websites of the Stock Exchanges, including the annual reports of the respective companies submitted to Stock Exchanges, there is no assurance that this information with respect to industry peers is either complete. There may be different methodologies and formulas used to compute the various ratios.

52. There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

53. Our Promoter and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.

Our promoter along with the promoter group will continue to hold collectively 73.38% of the Equity share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholders vote. Such a concentration of the ownership may also have the affect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoter will continue to have the ability to

take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

54. Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuance by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Offer, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

55. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Red Herring Prospectus.

While facts and other statistics in the Draft Red Herring Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various governmental and organizational web site data that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "**Industry Overview**" beginning on page 78 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

56. Certain data mentioned in this Draft Red Herring Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

EXTERNAL RISK FACTORS

57. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. Further, there have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse affect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse affects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

58. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter "**Government and Other Approvals**" on page 177 for details of the laws currently applicable to us. There can be no

assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse affect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax (“GST”) regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

59. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse affects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion affect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE’s benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse affect on our business, operations, financial condition, profitability and price of our Equity Shares.

60. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, man-made disasters, including acts of war, terrorist attacks, environmental issues and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

61. Government regulation of foreign ownership of Indian securities may have an adverse affect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

62. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

63. Our performance is linked to the stability of policies and the political situation in India.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

64. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an Offer of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

65. The Offer price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer and the market price of our Equity Shares may decline below the Offer price and you may not be able to sell your Equity Shares at or above the Offer Price.

The Offer price of the equity shares have been based on many factor and may not be indicative of the market price of our Equity Shares after the Offer. For further information please refer the section titled "**Basis for Offer Price**" beginning on page 71 of the Draft Red Herring Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price.

66. Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application.

Pursuant to the SEBI ICDR Regulations, Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application. While our Company is required to complete Allotment pursuant to the Offer within six Working Days from the Bid/ Offer Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the applicant's ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

INDUSTRY OVERVIEW

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

GLOBAL ECONOMY

After growing 3.1 percent last year, the global economy is set to slow substantially in 2023, to 2.1 percent, amid continued monetary policy tightening to rein in high inflation, before a tepid recovery in 2024, to 2.4 percent. Tight global financial conditions and subdued external demand are expected to weigh on growth across emerging market and developing economies (EMDEs). Projections for many countries have been revised down over the forecast horizon, with upgrades primarily due to stronger than expected data at the beginning of 2023 more than offset by downgrades thereafter. Inflation has been persistent but is projected to decline gradually as demand weakens and commodity prices moderate, provided longer-term inflation expectations remain anchored.

Global growth could be weaker than anticipated in the event of more widespread banking sector stress, or if more persistent inflation pressures prompt tighter-than-expected monetary policy. Weak growth prospects and heightened risks in the near term compound a long-term slowdown in potential growth, which has been exacerbated by the overlapping shocks of the pandemic, the Russian Federation's invasion of Ukraine, and the sharp tightening of global financial conditions. This difficult context highlights a multitude of policy challenges. Recent bank failures call for a renewed focus on global financial regulatory reform. Global cooperation is also necessary to accelerate the clean energy transition, mitigate climate change, and provide debt relief for the rising number of countries experiencing debt distress. At the national level, it is imperative to implement credible policies to contain inflation and ensure macroeconomic and financial stability, as well as undertake reforms to set the foundations for a robust, sustainable, and inclusive development path.

Regional prospects

Growth is projected to diverge across EMDE regions this year and next. It is expected to pick up in 2023 in East Asia and Pacific (EAP) and Europe and Central Asia (ECA), as China's reopening spurs a recovery and as growth prospects in several large economies improve. In contrast, growth is forecast to moderate in all other regions, particularly in Latin America and the Caribbean (LAC) and the Middle East and North Africa (MNA). Headwinds from weak external demand, tight global financial conditions, and high inflation will drag on activity this year, especially in LAC, South Asia (SAR), and Sub-Saharan Africa (SSA). The lingering impact of Russia's invasion of Ukraine will continue to weigh on growth across regions, particularly in ECA. Next year, growth is projected to moderate in EAP and SAR but to pick up elsewhere as domestic headwinds ease and external demand strengthens. Downside risks to the outlook for all regions include possible further global financial stress and more persistent domestic inflation than projected in the baseline. Geopolitical tensions, conflict and social unrest, and natural disasters stemming from climate change also present downside risks, to varying degrees. The materialization of such risks could further weaken potential growth, leading to a prolonged period of slower growth in all EMDE regions.

Financial Spillovers of Rising U.S. Interest Rates

The rapid rise in interest rates in the United States poses a significant challenge to EMDEs. As the Federal Reserve has pivoted toward a more hawkish stance to rein in inflation, a substantial part of the sharp increases in U.S. interest rates since early 2022 has been driven by shocks that capture changes in perceptions of the Fed's reaction function. These reaction shocks are associated with especially adverse financial market effects in EMDEs, including a higher likelihood of experiencing a financial crisis. Their effects also appear to be more pronounced in EMDEs with greater economic vulnerabilities. These findings suggest that major central banks can alleviate adverse spillovers through proper communication that clarifies their reaction functions. They also highlight that EMDEs need to adjust macroeconomic and financial policies to mitigate the negative impact of rising global and U.S. interest rates.

Global outlook

The global economy remains in a precarious state amid the protracted effects of the overlapping negative shocks of the pandemic, the Russian Federation's invasion of Ukraine, and the sharp tightening of monetary policy to contain high inflation. The resilience that global economic activity exhibited earlier this year is expected to fade. Growth in several major economies was stronger than envisaged at the beginning of the year, with faster-than-expected economic reopening in China and resilient consumption in the United States. Nonetheless, for 2023 as a whole, global activity is projected to slow, with a pronounced deceleration in advanced economies and a sizable pickup in China (figure A). Inflation pressures persist, and the drag on growth from the ongoing monetary tightening to restore price stability is expected to peak in 2023 in many major economies. Recent banking sector stress will further tighten credit conditions. This will result in a substantial growth deceleration in the second half of this year. This slowdown will

compound a period of already-subdued growth—over the first half of the 2020s (2020-2024), growth in EMDEs is expected to average just 3.4 percent, one of the weakest half-decades of the past 30 years (figure B). This slowdown reflects both cyclical dynamics and the current trend of declining global potential output growth (figure C).

Global financial conditions have tightened as a result of policy rate hikes and, to a lesser extent, recent bouts of financial instability. Many banks experienced substantial unrealized losses due to the sharp rise in policy interest rates. Concerns about the viability of balance sheets of some banks led to depositor flight and market volatility in the United States and Europe earlier in the year, which were stemmed by a swift and extensive policy response. Financial markets remain highly sensitive to evolving expectations about the future path of interest rates of major central banks. Spillovers from banking turmoil in advanced economies to EMDEs have so far been limited. However, countries with more pronounced macroeconomic policy vulnerabilities, as reflected by lower credit ratings, have experienced slower growth and greater financial stress, including large currency depreciations and a sharp widening of sovereign spreads. Projections for 2023 growth in these economies have fallen by more than half over the past year (figure D).

Inflation pressures persist. Although global headline inflation has been decelerating as a result of base effects, abating supply chain pressures, and falling commodity prices, core inflation in many countries remains elevated, and inflation is above target in almost all inflation-targeting economies. Inflation is expected to continue to be above its pre-pandemic level beyond 2024 (figure E). That said, inflation expectations in most inflation targeting countries have so far not undergone a major shift and appear to remain anchored.

In all, global growth is forecast to slow from 3.1 percent in 2022 to 2.1 percent in 2023, before edging up to 2.4 percent in 2024. Relative to the January projections, this is 0.4 percentage point stronger in 2023 and 0.3 percentage point weaker in 2024. Greater-than-expected resilience of major economies at the end of 2022 and early in 2023 led to the overall upgrade to growth in 2023. Growth in advanced economies is set to decelerate substantially for 2023 as a whole, to 0.7 percent, and to remain feeble in 2024, due to monetary tightening, less favorable credit conditions, softening labor markets, and still-high energy prices. In EMDEs, aggregate growth is projected to edge up to 4 percent in 2023, almost entirely due to a rebound in China following the removal of strict pandemic-related mobility restrictions. Excluding China, growth in EMDEs is set to slow substantially to 2.9 percent this year. This projection is predicated on the assumption of a protracted period of tight global monetary policy, fiscal consolidation in most EMDEs, and weak external demand. The slowdown is expected to be even more severe for EMDEs with elevated fiscal vulnerabilities and external financing needs. Persistent weak growth means that, excluding China, EMDEs are expected to continue making next to no progress at closing the differential in per capita incomes relative to advanced economies (figure F). By 2024, economic activity in EMDEs will still be about 5 percent below levels projected on the eve of the pandemic.

F. EMDE GDP per capita

The global economy is projected to slow substantially this year, with a pronounced deceleration in advanced economies. The first half of the 2020s is expected to be one of the weakest half-decades of the past 30 years for emerging market and developing economies (EMDEs), as a result of both cyclical dynamics and slowing potential growth. EMDEs with lower credit ratings are set to experience a particularly sharp slowdown this year. Inflation remains elevated in many countries and is envisaged to remain

above pre-pandemic levels beyond 2024. Excluding China, EMDEs are expected to make next to no progress at closing the gap in per capita incomes with advanced economies over the forecast horizon.

Global risks and policy challenges

An intensification of advanced-economy banking stress could result in a sharp slowdown in global growth in 2024, or even a global recession if it had major spillovers to emerging market and developing economies (EMDEs). A more hawkish U.S. monetary policy reaction to inflation could also further raise borrowing costs in EMDEs, especially in those with underlying vulnerabilities. There is an increasing need for debt relief for low-income countries amid a greater diversity of lenders. Substantial investments are needed to achieve resilient and low-carbon growth. Rising debt servicing costs are increasing the risk of debt distress. Reversing the decline in potential growth requires decisive structural reforms.

Global trade

Supply chain pressures and supplier delivery times have dropped back to pre-pandemic levels as goods demand has weakened and global shipping conditions have improved. A rising number of new trade measures have been protectionist. The ongoing shift in global consumption toward less trade-intensive goods will likely continue to lower the growth rate of trade relative to output. This shift and subdued demand are expected to dampen global trade growth substantially this year.

Global inflation and financial developments

Global core inflation remains elevated. Projections suggest inflation will continue to be above its pre-pandemic level beyond 2024. Market-based measures of long-term inflation compensation in advanced economies remain above 2 percent, despite a decline in oil prices. In many emerging market and developing economies (EMDEs), inflation is either accelerating or has stabilized at high levels. One-year-ahead EMDE inflation expectations have declined only slightly. Longer-term projections point to a faster decline in inflation in countries with inflation targets.

Prior to the advanced-economy bank failures in March, the U.S. yield curve registered its deepest inversion in four decades. During the banking stress, short-term government bond yields and bank stocks fell sharply. Despite these events, and much tightened bank lending standards, advanced economy credit spreads remain contained. As borrowing costs have risen globally, currency depreciation and credit spread widening in emerging market and developing economies have been disproportionately concentrated in the countries with the weakest credit ratings.

INDIAN ECONOMY

In general, global economic shocks in the past were severe but spaced out in time. This changed in the third decade of this millennium. At least three shocks have hit the global economy since 2020. It all started with the pandemic-induced contraction of

the global output, followed by the Russian-Ukraine conflict leading to a worldwide surge in inflation. Then, the central banks across economies led by the Federal Reserve responded with synchronised policy rate hikes to curb inflation.

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed.

Despite these, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has also given a boost to production activity resulting in an increase in capacity utilisation across sectors. The rebound in consumption was engineered by the near-universal vaccination coverage overseen by the government that brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others. The world’s second-largest vaccination drive involving more than 2 billion doses also served to lift consumer sentiments that may prolong the rebound in consumption. Vaccinations have facilitated the return of migrant workers to cities to work in construction sites as the rebound in consumption spilled over into the housing market. This is evident in the housing market witnessing a significant decline in inventory overhang to 33 months in Q3 of FY23 from 42 months last year.

The Capital Expenditure (Capex) of the central government, which increased by 63.4 per cent in the first eight months of FY23, was another growth driver of the Indian economy in the current year, crowding in the private Capex since the January-March quarter of 2022. On current trend, it appears that the full year’s capital expenditure budget will be met. A sustained increase in private Capex is also imminent with the strengthening of the balance sheets of the Corporates and the consequent increase in credit financing it has been able to generate. India’s economic growth in FY23 has been principally led by private consumption and capital formation. It has helped generate employment as seen in the declining urban unemployment rate and in the faster net registration in Employee Provident Fund. Still, private capex soon needs to take up the leadership role to put job creation on a fast track. Recovery of MSMEs is proceeding apace, as is evident in the amounts of GST they pay, while the ECGLS is easing their debt servicing concerns.

Global growth has been projected to decline in 2023 and is expected to remain generally subdued in the following years as well. The slowing demand will likely push down global commodity prices and improve India’s CAD in FY24. However, a downside risk to the Current Account Balance stems from a swift recovery driven mainly by domestic demand and, to a lesser extent, by exports. Growth is expected to be brisk in FY24 as a vigorous credit disbursal, and capital investment cycle is expected to unfold in India with the strengthening of the balance sheets of the corporate and banking sectors.

Market Size

India's nominal gross domestic product (GDP) at current prices is estimated to be at ₹ 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy.

- As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.
- The private equity-venture capital (PE-VC) sector investments stood at US\$ 2 billion in September 2022.
- In September 2022, the gross Goods and Services Tax (GST) revenue collection stood at ₹ 147,686 crore (US\$ 17.92 billion).
- In August 2022, the overall IIP (Index of Industrial Production) stood at 131.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 99.6, 131.0 and 191.3, respectively, in August 2022.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 7.41% in September 2022.
- In FY 2022-23, (until October 28, 2022), Foreign Portfolio Investment (FPI) outflows stood at ₹ 58,762 crore (US\$ 7.13 billion).

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports.

- Home & Cooperation Minister Mr. Amit Shah, laid the foundation stone and performed Bhoomi Pujan of Shri Tanot Mandir Complex Project under Border Tourism Development Programme in Jaisalmer in September 2022.
- In August 2022, Mr. Narendra Singh Tomar, Minister of Agriculture and Farmers Welfare inaugurated four new facilities at the Central Arid Zone Research Institute (CAZRI), which has been rendering excellent services for more than 60 years under the Indian Council of Agricultural Research (ICAR).
- The Union Budget of 2022-23 was presented on February 1, 2022, by the Minister for Finance & Corporate Affairs, Ms. Nirmala Sitharaman. The budget had four priorities PM GatiShakti, Inclusive Development, Productivity Enhancement and Investment, and Financing of Investments. In the Union Budget 2022-23, effective capital expenditure is expected to increase by 27% at ₹ 10.68 lakh crore (US\$ 142.93 billion) to boost the economy. This will be 4.1% of the total Gross Domestic Production (GDP).
- In August 2022, a Special Food Processing Fund of ₹ 2,000 crore (US\$ 242.72 million) was set up with National Bank for Agriculture and Rural Development (NABARD) to provide affordable credit for investments in setting up Mega Food Parks (MFP) as well as processing units in the MFPs.
- In July 2022, Deendayal Port Authority (DPA) announced plans to develop two Mega Cargo Handling Terminals on a Build-Operate-Transfer (BOT) basis under Public-Private Partnership (PPP) Mode at an estimated cost of ₹ 5,963 crore (US\$ 747.64 million).
- In July 2022, the Union Cabinet chaired by the Prime Minister Mr. Narendra Modi, approved the signing of the Memorandum of Understanding (MoU) between India & Maldives. This MoU will provide a platform to tap the benefits of information technology for court digitization and can be a potential growth area for the IT companies and start-ups in both the countries.

Growth Outlook: 2023-24

India’s recovery from the pandemic was relatively quick, and growth in the upcoming year will be supported by solid domestic demand and a pickup in capital investment. The current growth trajectory will be supported by multiple structural changes that have been implemented over the past few years. The private sector – financial and non-financial – was repairing balance sheets, which led to a slowdown in capital formation in the previous decade. The financial system stress experienced in the second decade of the millennium, evidenced by rising nonperforming assets, low credit growth and declining growth rates of capital formation, caused by excessive lending witnessed in the first decade-plus, is now behind us. Aided by healthy financials, incipient signs of a new private sector capital formation cycle are visible. More importantly, compensating for the private sector’s caution in capital expenditure, the government raised capital expenditure substantially. Budgeted capital expenditure rose 2.7X in the last seven years, from FY16 to FY23, re-invigorating the Capex cycle. Structural reforms such as the introduction of the Goods and Services Tax and the Insolvency and Bankruptcy Code enhanced the efficiency and transparency of the economy and ensured financial discipline and better compliance.

Growth Magnets in this Decade (2023-2030)

After a long period of balance sheet repair in the financial and corporate sector, the financial cycle is poised to turn upward. As the health and economic shocks of the pandemic and the spike in commodity prices in 2022 wear off, the Indian economy is thus well placed to grow at its potential in the coming decade, similar to the growth experience of the economy after 2003. This is the primary reason for expecting India’s growth outlook to be better than it was in the pre-pandemic years. The sound and healthy financial system developed over the last few years will ensure efficient credit provisioning, contributing to higher growth in the coming years through higher investments and consumption. Thanks to India’s digital revolution and formalisation, banks have far more information about their customer’s credit risks than before, thus being able to make credit and pricing decisions better than before.

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India’s comparatively strong position in the external sector reflects the country’s generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India’s economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India’s exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

BRASS RECYCLING - INDUSTRY SCENARIO

India is one of the fastest growing economies in the world. Strong domestic demand coupled with several reforms that the government has undertaken are on track to maintain the economic growth momentum going forward. As nonferrous metals find widespread applications across the economy, the current policy measures provide a tremendous opportunity for the development of the Indian non-ferrous metals industry in the future. A major push is expected to emerge from the governments ‘Make in India’

initiative, which aims to increase the manufacturing share of GDP from the present 17 per cent to 25 per cent by the end of 2025. Under this initiative, the government has identified 25 sectors such as Automotive, Power, Defence manufacturing, etc. which have extensive applications of various non-ferrous metals, and therefore, can provide a boost to the industry. Furthermore, these metals are witnessing increasing applications in the existing sectors as well as exploring many newer applications.

(Source: <https://mines.gov.in/writereaddata/UploadFile/NFMScrapRecyclingFramework3.pdf>)

Metal ores and minerals are non-renewable natural resources, which have an ever growing demand at global level and across sectors, making it imperative to reuse and recycle these metals. The National Mineral Policy 2019 of Ministry of Mines envisages making efforts towards augmenting supply of metals by developing processes for recovery of metal through recycling. The stated policy is in line with SDG Goal No 12, which states that current material needs do not lead to over extraction of resources or to degradation of environment. This calls for policy initiative focusing on improved resource efficiency and reduced wastage. Resource efficiency in the minerals and metals sector is realized through the implementation of sustainable development principles throughout the life cycle of minerals and metals. National Non-ferrous Metal Scrap Recycling Framework, 2020 seeks to use life cycle management approach for better efficiency in mineral value chain process. It envisages bringing both product and processing stewardship to enhance Non-Ferrous Metal recycling. Similarly, NITI Aayog is proposing a comprehensive “National Material Recycling Policy” to drive concerned and coordinated national and state level programs, plans and actions towards ramping up material recycling in India in a formal and organized manner.

Recycling Metal is an important consideration, recycling of non-ferrous metal gains merit on following grounds:-

- a) **Social benefits-** India’s mineral rich areas are under dense forests and inhabited by indigenous communities. Most of the impacts of material extraction, use and disposal occur domestically and negatively on a sizeable population. Extraction pressures have contributed significantly to conflicts due to displacement, loss of livelihood and have led to opposition by tribal and other local communities including fishermen in coastal areas. These social and political conflicts also pose significant threat to internal security. Recycling would put fewer burdens on the need of extraction thereby offsetting some of the risks arising out of social conflicts.
- b) **Environmental benefits-** Mineral rich areas overlap with heavily forested areas in the country. Extraction activities often result in ecological degradation. Reduced pressures from mining will help to reduce this ecological degradation. Reduced waste generation will not only reduce **pollution** associated with disposal but also save related costs. Also, resource extraction and use is highly energy intensive leading to significant GHG emissions. In 2007, CO₂ emissions were to the tune of 131 million tonnes from mineral industry, metal sector contributed about 122.7 million tonnes of CO₂. Furthermore, smelters of copper, zinc, lead ore etc. are significant contributors of CO₂ and SO_x.
- c) **Economic benefits-** In manufacturing sector alone, Indian companies could save up to ₹ 60,855 million by implementing resource **efficiency** measures, thereby improving competitiveness and profitability. Recycling based innovations can also give industries an edge in the export market. New industries can be created in the recycling sector with focus on innovative design and manufacturing from recycled material. As per an estimate from the Society of Indian Automobile Manufacturers (SIAM, 2015), with efficient recycling, India can hope to recover by the year 2020 over 0.18 million tonnes of aluminium scrap (source NITI Aayog, 2017 Strategy Paper on Resource efficiency). Also, reduced import dependence National Non-Ferrous Metal Scrap Recycling Framework, 2020 Page 8 of 21 for critical minerals will help to improve country’s trade balance and promote economic stability.
- d) **Employment Generation Potential-** Recycling and adoption of related innovative methods may altogether give rise to the need of setting up of new industries that can contribute significantly to employment generation. Innovation in recycling process and manufacturing has the potential to create highly skilled jobs benefitting domestic industries and developing potential for export market. This may further prompt global companies to locate efficient design and/or manufacturing units here leading to increased skilled / unskilled labour demand. Working on improved recycling rates, it is estimated that 3 million direct jobs may be created in recycling facilities and conservatively, between 10 to 15 million indirect jobs in upstream related activities.

Brass recycling

Brass has the capacity to be recycled an infinite number of times which has significant environmental and economic advantages. Brass is a copper-based alloy that does not lose its chemical or physical properties in the recycling process. Brass has the capacity to be recycled an infinite number of times which has significant environmental and economic advantages. Brass is a copper-based alloy that does not lose its chemical or physical properties in the recycling process.

The entire economy of the brass industry is dependent on the economic recycling of any surplus products. There is a wide range of brass materials made for a large variety of applications. To use the most suitable and low cost feedstock for making components gives the most economic value. Brass for extrusion and hot forging is normally made from a basic melt of scrap of similar composition with minor adjustments. The use of brass scrap means that the cost of the fabricated brass is considerably less than it might otherwise be.

Superior recyclability also offsets the off-the-shelf price of brass which may sometimes be higher than alternative materials. Raw material cost is only part of the overall cost picture, and brass turnings can be reclaimed for 75-85% of the original value. The unmatched secondary value of brass scrap creates an advantageous net material cost for customers compared to alternative materials. The superior machinability of brass also means higher productivity and lower per-part cost. This, combined with the high value of scrap makes brass a cost-effective material choice. The numbers say it all. In terms of finished part cost, the example below demonstrates that free-cutting brass is 37% less expensive than 12L14 leaded steel.

Government initiatives for Recycling

Government initiatives for Recycling Ministry of Environment, Forest and Climate Change (MoEF&CC) is in the process of formulating National Resource Efficiency Policy (NREP) which aims to mainstream resource efficiency across all sectors, wherein Aluminium sector has been considered as a priority sector. Ministry of Steel has brought out Steel Scrap Recycling Policy which envisages a framework to facilitate and promote establishment of metal scrap recycling centers in India. Such centers will ensure scientific processing & recycling of ferrous scrap generated from various sources. The policy framework shall provide standard guidelines for collection, dismantling and shredding activities in an organized, safe and environmentally sound manner. Similarly, NITI Aayog is proposing a comprehensive “National Material Recycling Policy” to drive concerned and coordinated national and state level programs, plans and actions towards ramping up material recycling in India in a formal and organized manner.

Manufacturing of brass based components (plumbing and sanitary parts)- We manufacture various brass components (plumbing and sanitary parts) such as brass inserts, brass ceramic cartridges (brass spindles), brass valves, extension nipples etc. as per the customer’s requirements, from our two manufacturing units (Unit-I and Unit-II) located at village Lakhaval, district Jamnagar. Some of the renowned brands which are our customers include Hindware, ROCA, Eauset, Somany, Supreme, AGI Greenpac (formerly known as HSIL) and Ashirvad Pipes. For Fiscal 2022 and 2023, our revenue from brass based components were ₹ 5,277.44 lakhs and ₹ 3,550.52 lakhs respectively, which contributed 12.47% and 7.20% respectively of our revenue from operations.

Manufacturing of brass ingots, billets and rods – We manufacture brass ingots, billets and rods through brass scrap from our manufacturing unit-II located at Village Lakhaval, District Jamnagar. We mainly export these products to China. Additionally, we supply brass ingots to esteemed customers in India such as Astral Limited, Kajaria Bathware and AGI Greenpac (formerly known as HSIL). For Fiscal 2022 and 2023, our revenue from sale of brass ingots, billets and rods were ₹ 13,337.55 lakhs and ₹ 19,864.72 respectively, which contributed 31.51% and 40.30% respectively of our revenue from operations.

Segregation of brass scrap – We procure brass scrap mainly from international market such as USA, UK, Europe and Middle East. Post procurement, segregation of brass is done at our unit-III located at Village Lakhaval, District Jamnagar. Post segregation, the segregated brass is termed as Brass scrap honey. The brass scrap is mainly sold by us in Gujarat. For Fiscal 2022 and 2023, our revenue from sale of brass scrap were ₹ 23,646.29 lakhs and ₹ 25,830.18 lakhs respectively, which contributed 55.87% and 52.41% respectively of our revenue from operations.

Brass is an alloy generally made from Copper and Zinc. Copper is a malleable and ductile metallic element that is an excellent conductor of heat and electricity as well as being corrosion resistant and antimicrobial. (Source: <https://mines.gov.in/webportal/copper>). The ability to conduct electricity and heat are two of the most important properties of copper. When alloyed with other metals, it acquires additional properties including increased hardness, tensile strength and improved corrosion resistance. Brass and Bronze are two of the most important alloys of copper. Copper and brass are the materials of choice for plumbing, taps, valves and fittings for their aesthetic appeals. (Source: https://ibm.gov.in/writereaddata/files/07072014112340marketsurvey_copper.pdf). Owing to its corrosion resistance in varied types of environment, zinc is used for protecting steel by way of galvanising. (Source: <https://mines.gov.in/webportal/internationalmineralsscenario>).

Recycling brass helps to conserve natural resources by reducing the need to mine and extract new metals. Recycling also reduces energy consumption, as it takes less energy to recycle brass than it does to produce new brass. Additionally, recycling brass helps to minimise the environmental impact of mining and processing new metals, as well as reducing waste in landfills. Brass is used in a wide range of applications which include:

- Plumbing fixtures and fittings such as valves, faucets, sanitary and other plumbing components;
- Electrical connectors and terminals such as electrical connectors, terminals, and switches;
- Decorative objects such as sculptures, ornaments and doorknobs; and
- Mechanical components such as gears, bearings, and bushings

Our Competitive Strengths

Strategically located manufacturing facilities

We manufacture brass billets & ingots, brass rods and brass components (plumbing parts) from our unit-I situated at land of 4970 sq. mtrs. and the brass components (sanitary parts) are manufactured from our unit-II situated at land of 3629 sq. mtrs. We have cumulative installed capacity of 9,900 Mt for manufacturing of brass billets and ingots, 8,250 Mt for manufacturing brass rods and 3,300 Mt for manufacturing of brass components, which enables us to stream line inventory management and production process resulting into maintenance of high-quality production standards, minimizing production time and bringing cost effectiveness. Further, all three of our units are situated in the district of Jamnagar, Gujarat, which is known as hub of brass components. We believe that the strategic location of our manufacturing units allows us to cater to a larger consumer base of local brass scrap buyers, reduce logistic costs and achieve economies of scale. Further our units are situated at around 300 km away from Mundra Port, enabling us to import raw materials and export finished products at pace and which results in saving of logistics cost.

Stringent quality control mechanism ensuring standardized product quality

We employ an extensive and stringent quality control mechanism at each stage of the manufacturing as well as our recycling process including spectrometer analysis to analyze the composition of brass and hardness test to test material hardness, which are required to ensure that our finished product conforms with the exact requirement of our customers and successfully passes all validations and quality checks. Further, as a certification of the quality assurance, our Company has received ISO 9001:2015 for quality management systems. We believe that our focus on quality of products has enabled us to sustain and grow our business model to benefit our customers.

Diversified Client Base and long-standing relationship with our customers

We serve a diversified client base encompassing a wide array of industries such as manufacturers in the sanitary and bathware sector, pipes & plumbing sector and electrical items. In addition, we also sell products to metal dealers and traders. We generally do not enter into long term agreements with our customers, however, we have developed long-standing relationships with these customers some of whom have been with us for over five years. For instance, companies/entities such as the Supreme Industries

Limited, AGI Greenpac (formerly known as HSIL), Prayag Polymers Pvt. Ltd. and Anurag Impex have been our customers for the last five fiscals. Maintaining strong relationships with our key customers is essential to our business strategy and to the growth of our business. Owing to strong customer relationships and service, we can retain a number of our customers for a long period of time ensuring uninterrupted supplies of our products to them.

Strong and diversified supplier base for sourcing raw material

One of the critical factors to grow and develop in our business is the ability to source raw materials. The essential raw material used by our manufacturing facility for production of brass products is brass scrap, which are mostly imported by us. Our Company has been procuring brass scrap from various global suppliers located in USA, UK, Europe and Middle East, among others, as well as from certain domestic suppliers. Given that raw material expense constitutes a significant portion of our overall cost, we benefit majorly from a globally spread out and diversified supplier base. This enables us to negotiate favorable terms and even avail better discounts. Further, since metal scrap prices vary in international markets, a diverse base of suppliers allows us to selectively buy metal scrap and limit the adverse effects of the changing prices across metal scrap on account of the various global and domestic market conditions. We continually strive to maintain strong relationships with our suppliers in order to derive better insight into the markets for our raw materials, which helps us to manage our raw material supply chain, resulting in greater predictability of supply and, consequently, a greater ability to meet production schedules and achieve on time delivery for our customers.

MANUFACTURING PROCESS:

Set forth below is a brief description of the process carried out in our facilities to manufacture brass products:

Procuring of raw material

Our manufacturing process is dependent on continuous supply of raw material i.e. brass scrap used for manufacturing of our brass products. The brass scrap is procured largely from international suppliers based in USA, UK, Europe and Middle East.

Segregation of Scrap

The input raw material namely mixed metal brass scrap is not normal brass scrap, as it contains brass scrap with high impurities like copper, iron, steel, plastic, rubber etc. The process of segregation for physical removal of impurities from mixed brass scrap to produce segregated mixed brass scrap is first operation in the manufacturing process to manufacture brass items. The mixed scrap is sorted into brass scrap through physical handpicking as well as through machine, depending upon nature of scrap lot.

Melting in induction furnace

The segregated brass scrap is charged into an electric furnace. The furnace is heated electrically to extremely high temperatures. The furnace surround the metal in a crucible by a coil through which an alternating electric current passes. The current induced in the metal causes heating and melting of raw material. We perform material quality check of Non-ferrous Scrap by using Material Spectro Analysis Machine after melting in Induction Furnace, in order to ensure that the produced brass contains requisite composition. If the desired specification are not met, content of copper/zinc is added in requisite proportion.

Casting

The molten metal is poured in the mould for casting in form of Ingots or Billets. Billets are then cut into the desired lengths and are then sent for extrusion for formation of brass rods. We also sell Ingots and Billets as finished product to certain customers.

Extrusion Process

Brass billets are loaded into the extrusion press machine. These billets are cylindrical in shape and are placed in the machine's chamber. The loaded brass billet is subjected to high pressure inside the extrusion press machine. The billet is forced through a specially designed die, which shapes the brass into a continuous rod of the desired diameter and length.

Cutting & Forging

After completion of extrusion process, the rods are cut to smaller pieces according to the requirement and is then further shaped into the desired brass component through forging.

Visual Inspection

After completion of forging process, the goods are inspected visually on random basis. Deficient products are removed and added to brass scrap for melting. Goods which pass the visual inspection are forwarded for machining.

Machining for manufacturing brass components

After forging, the component is subjected to precision machining processes to achieve the final shape, dimensions and surface finish. This is done by us through CNC machining, lathe machining, drilling, threading, and grinding.

Polishing and Plating

After the machining process, the polishing and plating process is done on the brass components as per the requirement, with the help of polishing machine and plating machine. Post polishing and plating, brass components are sent for packing.

Packing and Dispatch

Finished Goods are packed in plastic packages and then into corrugated boxes in a set of such number of units as the client's specification. The box is then dispatched to customer's place by using third party transportation.

PLANT & MACHINERY

Some of the major plant & machineries installed in our units include:

Spectro Analysis machine, Spindle life cycle testing machine, Hardness tester machine, lathe machine, vibrator, rod straightening machine, wire pointing machine, CNC Machines, Slotting Machine, Auto Drill machine, Auto punching machine, polishing machines, grinding machines, plating machines, AV leakage testing machine, plating thickness testing machine, laser marking machine, Pulverizer etc.

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 (‘the Act’) read with Rule 7 of the Companies (Accounts) Rules, 2014, the provisions of the Act. The accounting policies adopted in the preparation of financial statements have been consistently applied. All assets and liabilities have been classified as current or non-current as per the company’s normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of operations and time difference between the provision of services and realization of cash and cash equivalents, the company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

B) USE OF ESTIMATES

The preparation of financial statements is in conformity with Indian GAAP requires judgments, estimates and assumptions to be made that affect the reported amount of assets and liabilities, disclosure of contingent liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known / materialized.

C) ACCOUNTING CONVENTION

The group follows the mercantile system of accounting, recognizing income and expenditure on accrual basis. The accounts are prepared on historical cost basis and as a going concern. Accounting policies not referred to specifically otherwise, are consistent with the generally accepted accounting principles.

The following significant accounting policies are adopted in the preparation and presentation of these financial statements:

1. Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Sale of goods

Revenue is recognized when the significant risks and rewards of ownership of the goods have been passed to the buyer. Sales are disclosed net of GST, trade discounts and returns, as applicable.

Income from services

Revenue from services is recognized when services have been rendered and there should be no uncertainty regarding consideration and its ultimate collection.

Interest Income

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable."

Dividend Income

Dividend Income is recognized on receipt basis.

2. Fixed Assets

- a) Fixed Assets are stated as per Cost Model i.e., at cost less accumulated depreciation and impairment, if any;
- b) Costs directly attributable to acquisition are capitalized until the Fixed Assets are ready for use, as intended by the management;
- c) Subsequent expenditures relating to fixed assets are capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably. Repairs & maintenance costs are recognized in the Statement of profit & Loss when incurred;
- d) The cost and related accumulated depreciated are eliminated from the financial statements upon sale or retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit or Loss. Assets to be disposed of are reported at the lower of the carrying value or the fair value less cost to sell;
- e) Depreciation on Tangible Assets in case of company is provided in such a manner so that the cost of asset (Net of realizable value) will be amortized over their estimated remaining useful life on WDV basis as per the useful life prescribed under Schedule II to the Companies Act 2013.
- f) Depreciation methods, useful lives, and residual values are reviewed periodically, including at each financial year end;

3. IMPAIRMENT

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

4. INVENTORIES

Inventories are valued after providing for obsolescence, as follows:

- a) Raw Materials, Stores & Spare parts and Packing Material - Lower of cost and net realizable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost is determined on FIFO Basis.
- b) Work-in-Progress is valued at raw material cost plus proportionate conversion cost.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale, however due to the nature of the company the own manufactured goods are valued at a Cost on FIFO Basis on a consistent basis, however the Trading Goods are valued at the lower of Cost or Net Realizable Value.

5. RETIREMENT BENEFITS & OTHER EMPLOYEE BENEFITS

Defined-contribution plans:

All short-term employee benefits are accounted on undiscounted basis during the accounting period based on services rendered by employees.

The Company's contribution to Provident Fund and Employees State Insurance Scheme is determined based on a fixed percentage of the eligible employees' salary and charged to the Statement of Profit and Loss on accrual basis.

In the restated financial statements, The Company has made provision for payment of Gratuity to its employees, based on the actuarial valuation report obtained from actuarial valuer.

6. FOREIGN EXCHANGE TRANSACTIONS

Foreign-currency denominated monetary assets and liabilities if any are translated at exchange rates in effect at the Balance Sheet date. The gains or losses resulting from the transactions relating to purchase of current assets like Raw Material etc. are included in the Statement of Profit and Loss. Revenue, expense and cash-flow items denominated in foreign currencies are translated using the exchange rate in effect on the date of the transaction.

7. CASH FLOW STATEMENT

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities are segregated.

8. BORROWING COSTS

Borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of that asset till such time the asset is ready for its intended use. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. Costs incurred in raising funds are amortized equally over the period for which the funds are acquired. All other borrowing costs are charged to profit and loss account.

9. INCOME TAX

The accounting treatment for the Income Tax in respect of the Company's income is based on the Accounting Standard on 'Accounting for Taxes on Income' (AS-22). The provision made for Income Tax in Accounts comprises both, the current tax and deferred tax. Provision for Current Tax is made on the assessable Income Tax rate applicable to the relevant assessment year after considering various deductions available under the Income Tax Act, 1961.

Deferred tax is recognized for all timing differences; being the differences between the taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Such deferred tax is quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out.

10. EARNINGS PER SHARE

Basic earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

11. PROVISIONS AND CONTINGENT LIABILITIES

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

12. CASH & CASH EQUIVALENTS

Cash and cash equivalents comprise cash and cash on deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

13. SEGMENT REPORTING

Segment Reporting Disclosures issued by The Institute of Chartered Accountants of India is not applicable as the company does not have any identifiable geographical or business segment during the year under consideration. Further, the brass scrap is used as raw material for the production of the Brass Rods and subsequently the Brass Rods are used as raw material for production of Brass based Sanitary, plumbing and bathroom fittings. These activities are directly co-related to each other and fall under the same business line. Hence, this clause is not applicable to the company.

14. EMPLOYEE BENEFITS

The company makes defined contribution to Government Employee Provident Fund which is recognized in the statement of profit and loss account on accrual basis. Payments to defined contribution retirement benefit plans are recognized as an expense when employees have rendered the service entitling them to the contribution. Defined Benefit plans are not recognized on accrual basis but is recognized in the books when liability is discharged.

Brass is an alloy generally made from Copper and Zinc. Copper is a malleable and ductile metallic element that is an excellent conductor of heat and electricity as well as being corrosion resistant and antimicrobial. (Source: <https://mines.gov.in/webportal/copper>). The ability to conduct electricity and heat are two of the most important properties of copper. When alloyed with other metals, it acquires additional properties including increased hardness, tensile strength and improved corrosion resistance. Brass and Bronze are two of the most important alloys of copper. Copper and brass are the materials of choice for plumbing, taps, valves and fittings for their aesthetic appeals. (Source: https://ibm.gov.in/writereaddata/files/07072014112340marketsurvey_copper.pdf). Owing to its corrosion resistance in varied types of environment, zinc is used for protecting steel by way of galvanising. (Source: <https://mines.gov.in/webportal/internationalmineralsscenario>).

Recycling brass helps to conserve natural resources by reducing the need to mine and extract new metals. Recycling also reduces energy consumption, as it takes less energy to recycle brass than it does to produce new brass. Additionally, recycling brass helps to minimise the environmental impact of mining and processing new metals, as well as reducing waste in landfills. Brass is used in a wide range of applications which include:

- Plumbing fixtures and fittings such as valves, faucets, sanitary and other plumbing components;
- Electrical connectors and terminals such as electrical connectors, terminals, and switches;
- Decorative objects such as sculptures, ornaments and doorknobs; and
- Mechanical components such as gears, bearings, and bushings

Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 and circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019 circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth

transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Book Running Lead Manager.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company.
