Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impact in future.

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “**Risk Factors**” beginning on page 22 and “**Management Discussion and Analysis of Financial Condition and Results of Operations**” beginning on page 175 unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “**Audited Financial Statements, as restated**” prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP).

INTERNAL RISK FACTORS

1. We have very short span of operating history as company.

Our company was incorporated on February 12, 2019 as a private limited company and started our business operation in January, 2021 when our company purchased the fixed assets and stock from “M/s Sona Foods India”, which is a proprietorship concern of Narendra Kumar, father of our promoter, Vasu Naren. Our limited operating history may adversely affect our ability to implement our growth strategies, and may make it difficult for you to evaluate our past performance and future prospects in connection with any investment in the Equity Shares. Prospective investors should accordingly consider our future prospects in light of the risks and the challenges encountered by a company with a limited operating history.

We cannot assure you that we will be able to successfully meet the challenges, uncertainties, costs and difficulties encountered by us or that we will attain our objectives successfully. Our limited operating history as a company makes it difficult to predict our future prospects and financial performance.

2. We generate our major portion of revenue from our operations in certain geographical regions and any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.

Currently, we sell our products to more than 15 states & Union Territories in India of which majority portion of the revenue comes from the state of Uttar-Pradesh followed by Chhattisgarh & Haryana. We had also exported our products to countries such as Nepal, Kenya, Nigeria, Bangladesh etc. Our revenue from exports for the period ending August 31, 2023 and fiscal year 2023, 2022 and 2021 was Rs. 16.26 Lakhs, Rs. 252.59 lakhs, Rs. 106.66 lakhs and Rs. 13.00 lakhs respectively which constituted 0.60%, 3.12 %, 2.40% and 2.15 % of our revenue from operations for the respective period & fiscal. Our sales from top five geographical regions for the period ending August 31, 2023 & fiscal year ending 2023, 2022 & 2021 comprises of 74.80%, 72.35%, 68.22% & 78.41% of total revenue respectively.

We carry our entire manufacturing operations from our manufacturing units situated at Ghaziabad, Uttar-Pradesh. Due to the geographical concentration of our manufacturing operations at Uttar-Pradesh, our operations are prone to local, regional and environmental factors, such any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the state government or state or local governments and require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our operations. Any such adverse development affecting continuing operations at our manufacturing facilities could result in significant loss due to an inability to meet customer contracts and production schedules, which could materially affect our business reputation within the industry. The occurrence of or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects.

Further, as we enter into new markets and geographical areas, we are likely to compete with not only national players, but also the local players, who might have an established local presence, and are more familiar with local business practices and have stronger relationships with local distributors, dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

3. The agriculture sector is seasonal in nature. We experience the effects of seasonality, which may result in our operating results fluctuating significantly and also, reduce our sales.

Our sales could be affected due to seasonal trends in the agriculture sector. In particular, the agriculture sector is inherently seasonal, and is further impacted by factors including agricultural commodity prices, costs of fertilizers, and adverse weather conditions. Accordingly, due to the inherent seasonality of our business, results of one reporting period (quarter/half year/year) may not be necessarily comparable with preceding or succeeding reporting periods. For instance, our revenue in first qtr. of F.Y 2021-22 and FY 2022-23 respectively is only 19.30% & 11.57 % of total revenue, whereas the same in third qtr. is 29.34% for FY 2021-22 & 32.85% for FY 2022-23.

Thus, we are subject to seasonal factors, which make our operational results very unpredictable. During periods of lower sales activities, we continue to incur substantial operating expenses, but our revenues remain usually lower. Sometimes, even if there is a slight change in the timing of rain fall, the sales will get deferred from one reporting period to another reporting period. The sales that were supposed to take place during one financial year may get added to sales of the next financial year and therefore results of even full financial year may not necessarily be comparable to the other financial year. Further, any change in weather conditions, including the occurrence of drought conditions, could adversely affect our business, financial condition, results of operations, and prospects.

4. We do not have long-term agreements with suppliers for our raw materials and an increase in the cost of, or a shortfall in the availability or quality of such raw materials could have an adverse effect on our business, financial condition and results of operations

During the stub period ended August 31, 2023 and for the Fiscal 2023 and Fiscal 2022, our purchases of raw material was Rs. 1852.83 lakhs, Rs. 5,399.85 lakhs and Rs. 2,990.40 lakhs respectively, which represented 68.53%, 66.69 % and 67.18% of our revenue from operations. The raw materials we use in our manufacturing process are primarily sourced from third party suppliers in India. Our purchases from top ten suppliers represented 54.37%, 55.37 % and 60.03% of our total purchases for the period ending August 31, 2023, fiscal year ending March 2023 & 2022 respectively.

In addition, we usually do not enter into long-term supply contracts/ agreements with any of our raw material suppliers and typically source raw materials from the open market. The absence of long-term contracts/agreements at fixed prices exposes us to volatility in the prices of raw materials that we require and we may be unable to pass these costs onto our customers, which may reduce our profit margins. We face a risk that one or more of our existing suppliers may discontinue their supplies to us, and any inability on

our part to procure raw materials from alternate suppliers in a timely manner, or on commercially acceptable terms, may adversely affect our business, financial condition and results of operations.

The quality of our products is primarily derived from the quality of our raw materials, and any deterioration in the quality of raw materials supplied to us will have an adverse effect on the quality of our products, market reputation and sales volumes. There can be no guarantee that we will be able to maintain our current line-up of suppliers or adequate supply of such raw materials at all times.

Further our Company has outstanding dues of trade payables during the stub period ended August 31, 2023 and for the Fiscals 2023 and 2022 of Rs. 823.02 Lakhs, Rs. 907.13 lakhs and Rs. 538.48 lakhs respectively. We have faced delay in payments of some MSME vendors in past and any delay in payment to our creditors including MSME creditors in future may impact our long-standing relations with our suppliers and may result in stoppage of timely or at all delivery of raw material. Any such disruption would impact the production and overall financial position of our Company.

5. *If there are delays in setting up the Proposed Facilities or if the costs of setting up and the possible time or cost overruns related to the Proposed Facilities or the purchase of plant and machinery for the Proposed Facilities are higher than expected, it could have a material adverse effect on our financial condition, results of operations and growth prospects.*

In order to capitalize on the future demand, we currently are in process of setting up a new manufacturing unit in Ghaziabad, Uttar Pradesh, in order to increase our manufacturing capabilities. The proposed land on which the said unit is being constructed comprises of around 90,729 sq. ft. area which will be purchased. The total cost for setting up new manufacturing unit is estimated to be Rs. 3041.25 lakhs. which includes, purchase of proposed land, civil construction to be carried out on said land and purchase of machineries to be installed. This cost is expected to be funded from the proceeds of IPO, for further details, see “*Objects of the Issue*” on page 63 of this Draft Red Herring Prospectus.

The completion of the setting up of the Proposed Facilities is dependent on our ability to arrange finance through Net Proceeds or otherwise, the performance of external agencies which are responsible for inter alia construction of buildings, installation and commissioning of plant and machinery. We cannot assure you that we will be able to arrange for such finance on time. Our expansion plans remain subject to the potential problems and uncertainties that construction projects face including cost overruns or delays, labour shortages, increased costs of equipment or manpower, inadequate performance of the equipment and machinery installed in our manufacturing facilities, delays in completion, defects in design or construction, the possibility of unanticipated future regulatory restrictions, delays in receiving governmental, statutory and other regulatory approvals, incremental pre-operating expenses, environment and ecology costs and other external factors which may not be within the control of our management. There can be no assurance that our budgeted costs may be sufficient to meet our proposed capital expenditure requirements. If our actual capital expenditures significantly exceed our budgets, or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits of these projects, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects. Further, we cannot assure you that the performance of external agencies will meet the required specifications or performance parameters. We may not be able to identify suitable replacement external agencies in a timely manner. If the performance of these agencies is inadequate in terms of the requirements, this may result in incremental cost and time overruns.

Further, we have entered into a contract of agreement to sale dated November 21, 2023 to purchase land, which may carry uncertainties as the agreement's completion is contingent upon various factors, including regulatory approvals, environmental clearances, external or other factors beyond our control which could lead to withdrawal or termination of said agreement. One of the conditions of said agreement is to complete the sale transaction and to execute absolute sale deed within 5 months. The enforceability of the agreement also faces risks from legal challenges or unforeseen circumstances, potentially hindering our ability to acquire the specified land. Our strategic flexibility to explore alternative opportunities introduces an element of unpredictability, with no assurance of acquiring the identified land or involving the same landowner in future acquisitions.

The estimated costs for setting up the Proposed Facilities are based on the certificate dated November 28, 2023 given by M/s. Sunrise Engineers, Chartered Engineers, and are based on management's estimates and current conditions which are subject to change, owing to prospective changes in external circumstances, costs and other financial conditions.

Our return on our investment depends upon, among other things, successful implementation of our strategy, competition, demand of our products, government policies, interest rates and general economic conditions. If our return on investment does not meet our or market expectations, this could materially and adversely affect our business, cash flows, results of operations and financial condition.

6. *Our business is dependent on our manufacturing unit, and the loss or shutdown of operations of our manufacturing unit may have a material adverse effect on our business, results of operations, cash flows and financial condition.*

Our business is dependent on our ability to manage our manufacturing unit situated at Ghaziabad, Uttar Pradesh, Our Manufacturing Facility is spread across approximately 52,205 sq. ft. The core of our business relies on efficient management of the manufacturing

facility, however our operations face a spectrum of operational risks, such as (i) the risk of substantial disruption or shutdown due to breakdowns or failure of equipment, natural disasters, storms, fires, explosions, earthquakes, floods and other catastrophic events, which could result in power interruptions and water shortages, potential or suspected epidemic outbreaks, terrorist attacks and wars, labour disputes, strikes, lock-outs, loss of suppliers and industrial accidents, (ii) performance below expected levels of output or efficiency, and (iii) obsolescence.

Our manufacturing unit is also subject to operating risk arising from any failure to comply with the directives of relevant government authorities or any changes in governmental regulations affecting our business and our facilities, which could lead to a loss of licenses, certifications, permits and the ability to continue operating from our current manufacturing unit.

Disruptions caused due to breakdown of machinery installed at our manufacturing unit in Ghaziabad, could also lead to a reduction in our production levels, resulting in a negative impact on our earnings. We cannot assure you that we will always have access to sufficient supply of electricity in the future to accommodate our production requirements and planned growth. In the event of prolonged disruptions at our manufacturing unit, we may have to import various supplies and products in order to meet our production requirements, which could affect our profitability. Our facilities and equipment would be difficult and costly to replace on a timely basis and in a cost-efficient manner. Moreover, catastrophic events could also destroy any inventory located at our unit. Such disruptions may result in delays in shipments of raw materials from our suppliers to us and shipment of products from us to our customers. The occurrence of any such catastrophic event could result in the temporary or long-term closure of our manufacturing unit, severely disrupting our business operations and materially and adversely affecting our business, results of operations, cash flows and financial condition.

7. *We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions.*

We require certain statutory and regulatory licenses, registrations and approvals to operate our business some of which our Company has either received, applied for or is in the process of application, we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our operations, thereby having a material adverse effect on our business, results of operations and financial conditions. There can be no assurance on the renewal or there might be delay in renewal of licenses, registrations and approvals from relevant authorities.

Further, we are yet to apply for registration under Shops & Establishment Act for our warehouse situated at Ghaziabad. Upon cognizance being taken by the appropriate authority, the Company and its officers in default may face penalties and/or prosecution under the extant provisions, which could have an adverse impact on our business, results of operations and cash flows. Further, these licenses, registrations and approvals are subject to several conditions, and we cannot assure that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. Failure by us to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our operations and may have a material adverse effect on our business, results of operations and financial condition. For details regarding pending approvals, please refer to section titled “**Government and Other Approvals**” beginning on page 186 of the Draft Red Herring Prospectus.

8. *We do not own the registered office, manufacturing unit and warehouse from which we carry out our business activities. In case of nonrenewal of rent agreements or dispute in relation to use of the said premise, our business and results of operations can be adversely affected.*

Our registered office, manufacturing unit and warehouse, from which we carry out our business activities, are being taken by us on rent. In the event of termination/non-renewal of said agreements, we may be required to vacate the said premises which may cause disruption in our inventory management, corporate affairs and business and impede our effective operations which could temporarily impact on our business operations until we get suitable alternative premises. For details on the duration of existing rent/lease agreements for our premises, please refer to the section titled “**Our Business**” beginning on page 90 of this Draft Red Herring Prospectus.

In addition, agreements pertaining to the lease/rent have irregularities of enforceability, such as non-registration of agreement and inadequate payment of stamp duty, which may affect the value of the relevant agreements in specific performance or other injunctive procedures in a court of law, and could impair our operations. Further, it may result in levy of penal charges, in case cognizance being taken by concerned authorities.

There can be no assurance that we will, in the future, be able to renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the offices on similar terms favorable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations. In the

event that the rent agreement is terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our manufacturing operations which could materially and adversely affect our business, financial condition and results of operations.

9. We have not registered the trademarks which we are using for our business in the name of our company.

The trademark & logo which we are using for our business is in the name of our Promoter, Vasu Naren and the same is in opposed status with the Registrar of Trademarks in India, under the Trade Marks Act, 1999. Further, our company has not applied for registration of any trademark under the provisions of the Trademarks Act, 1999. As such, we do not enjoy the statutory protections accorded to a registered trademark as on date. There can be no assurance that we will be able to register the said trademark and the logo in future or that, third parties who have filed objection will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill.

The registration of intellectual property including trademarks is a time-consuming process and there can be no assurance that any registration applications we may pursue will be successful and that such registration will be granted to us. If we fail to register the appropriate intellectual property, or our efforts to protect relevant intellectual property prove to be inadequate, the value attached to our brand and proprietary rights could deteriorate, which could have a material adverse effect on our business growth and prospects, financial condition, results of operations, and cash flows.

10. A significant portion of our revenue is generated from our sales of milling & grading equipments and material handling equipments. The loss of customers who purchase these equipments, or a significant reduction in the production and sales of, or demand for said equipments may adversely affect our business, financial condition, results of operations and prospects.

The revenue contribution of our top two product categories i.e. milling & grading equipments and material handling equipments accounted for a significant portion of our total revenue in the five-month period ending August 31, 2023 and fiscal year ending March 2023 & 2022 i.e. 63.70%, 63.54% and 57.49% respectively. In case of increased competition, pricing pressures, fluctuation in the demand or supply of products within our top two categories or other factors, our revenue from these products may decline in the future. Any adverse developments with respect to the sale of products within our top two categories could adversely affect our revenue which in turn may have an adverse effect on our business, results of operations and financial condition.

11. Our business and financial conditions may be impacted by changes or slowdown in the agricultural sector.

Demand for most of our products is directly related to the sale of grains such as rice, pulses, wheat by millers, and the average age of the equipment deployed / rate of demand for replacement of the equipment by millers. Sales may be affected by a prolonged spell of drought or flood, general economic or industry conditions, including evolving regulatory requirements, government initiatives, trade agreements, and other factors. Therefore, the significant reduction in production of, or demand for grains could lead to cancellation of orders or loss of business and consequently reduce our sales and affect our estimates of anticipated sales, which could have an adverse effect on our business and results of operations.

The processed food market in India is expected to grow to Rs. 3,451,352.5 crores (US\$ 470 billion) by 2025, from Rs. 1,931,288.7 crores (US\$ 263 billion) in FY20 on the back of government initiatives such as planned infrastructure worth US\$ 1 trillion and Pradhan Mantri Kisan Sampada Yojna. The food processing industry employs about 1.77 million people. The sector allows 100% FDI under the automatic route. From 2017 to 2020, India received ~US\$ 1 billion in agritech funding. With significant interest from investors, India ranks third in terms of agritech funding and the number of agritech start-ups. By 2025, Indian agritech companies are likely to witness investments worth US\$ 30-35 billion. (Source: <https://www.ibef.org/industry/agriculture-india>). For more details, see “**Industry Overview**” on page 77 of this Draft Red Herring Prospectus. If these measures are withdrawn, or if we are unable to adequately anticipate and respond to changing conditions affecting the agriculture sector, our operations, our business, financial condition, results of operations and prospects may be adversely affected.

12. We have had certain inaccuracy in relation to regulatory filings to be made with the RoC and our company has made non-compliances of certain provision under applicable laws.

Our company has not complied with certain statutory provisions in the past including but not limited to the details as mentioned herein. Further, there are few discrepancies noticed in some of our corporate records related to e-forms filed with the Registrar of Companies, which includes Company has not filed Form CHG-1 for creation of charge on a vehicle loan taken in the past, which is non-compliance of section 77 of the Companies Act, 2013 read with rules made thereunder and attracts penalty under section 86 of the Companies Act, 2013. however, we have made the payment of this loan as on the date of this Draft Red Herring Prospectus.

Our Company has not complied with certain Accounting Standards, however the same have been duly complied by the company in the restated financial statements. For details regarding impact of such non-compliance on the financials, please refer to section titled “**Financial information of the company**” beginning on page 137 of the Draft Red Herring Prospectus

In case of any action being taken by the regulatory authorities against the Company and/or its officers, the same may have an adverse effect on our business and reputation. Although, no show cause notice in respect of the non-compliance has been received by the Company till date, any penalty imposed for such noncompliance in future by the any regulatory authority could affect our financial conditions to that extent.

13. We rely on after-sales service network to redress customer grievances. Non-performance or underperformance of our after-sales service network could significantly harm our reputation.

Our products are preferred among millers in India due to their quality and efficiency, and our after-sales service capabilities. Our sales network is backed by an after-sales service team of 25 employees who provide our customers with access to maintenance services and spare parts, and respond to a majority of customer grievances in the earliest possible after such grievances are raised.

We have also placed emphasis on our need to retain a customer service team to redress customer grievances but we cannot assure you that our customer service team will continue to have a consistent rate of good performance. Further, if we are unable to resolve customer grievances in an adequate or timely manner, or if we are unable to retain a good customer service team, it could have an adverse effect on our business, results of operations, and financial condition, and damage our reputation and relationships with our customers. This could also cause a reputational harm to us in the industry, leading to a lesser sale of our products.

14. Inventories and trade receivables form a major part of our current assets. Failure to manage our inventory and trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.

We are a manufacturing company, and, at all points of time, a certain portion of our assets comprises of an inventory of raw materials, work in progress products and finished products. Maintaining sufficient inventory of raw materials is critical for our operations including as a buffer against any supply disruptions. Any failure on our part to effectively manage our inventory of raw materials and finished products in response to changing market scenario may have an adverse effect on our financial condition and may even lead to loss of business and increase the costs of our operations. During the period ending August 31, 2023 and Fiscal year ending 2023 & 2022, our inventories were Rs. 817.60 lakhs, Rs. 526.88 lakhs and Rs. 190.15 lakhs respectively.

In the event we overestimate our requirements for raw materials as compared to the demand for our products, it may lead to situations that require us to block more capital and increase our operating costs in connection with inventories and further expose us to variations in raw materials risk. Equally, if we underestimate our requirements for raw materials, it may adversely affect our ability to manufacture the required quantity of products for our customers' requirements in a timely and cost-efficient manner which may lead to loss of business and / or the opportunity to service customers which could adversely affect our business, results of operations and financial condition. Further, we may also lose opportunities to acquire raw materials in a cost-effective manner, thereby increasing costs of operations and adversely affecting our working capital requirements. Additionally, if our inventory of finished products is not dispatched on time or if there is any unanticipated delay in the delivery of our finished products or if the finished products are not properly maintained or are damaged or destroyed, we could lose such inventory which could have an adverse impact on our production cycle, results of operation and financial condition.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. During the period ending August 31, 2023 and Fiscal year ending 2023 & 2022, our trade receivables were Rs. 615.95 Lakhs, Rs. 594.05 Lakhs and Rs. 439.83 Lakhs respectively. Our Company has written off bad debts on account of non-recoverability of the dues from the Debtors which amounted to Rs. 16.88 lakhs in F.Y. 2021-22 and Rs. 15.10 lakhs in F.Y. 2022-23. We cannot assure that our Company will be able to effectively manage its trade receivables in future. Any such failure in management of trade receivables could result into bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in case of increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability. We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. For details regarding trade receivables and inventory, please refer to section titled "**Financial information of the company**" beginning on page 137 of the Draft Red Herring Prospectus.

15. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.

Our operations are subject to accidents which are inherent to any manufacturing process such as risks of machinery/equipment failure, worker accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions including accidents that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environment. We have ICICI Bharat Laghu Udyam Suraksha Policy for our manufacturing unit which covers building, machines & stock insurance from loss due to Fire, Earthquake and terrorism. Further, we have taken Burglary Insurance Policy for our manufacturing unit from ICICI Lombard which covers loss due to theft, riot, strike and malicious damage. Along with the same, we have taken Vehicle Insurance policy and Medical Insurance of Employees from Star Health and Allied Insurance Co. Ltd.

While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance

policies do not cover all risks, specifically risks such as cash in transit, key man insurance or group personal accident. Further, we have not taken insurance in respect of our registered office in Delhi and warehouse in Ghaziabad. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

16. The Proposed Project being implemented by us is large in context of our Company’s current scale of operations. We may face several risks on account of implementation of our Proposed Project.

Our Company has embarked upon a project of approximately Rs. 3041.25 Lakhs, which is large in size compared to the present restated net worth of our Company as on August 31, 2023 i.e. Rs. 1326.67 Lakhs. Since, the management and financial resources are till date allocated to one manufacturing facility, the Proposed Project with substantially higher capacity, poses some unforeseen risks and challenges to the financial and managerial capacity of our Company. For details, please refer to section titled “**Financial information of the company**” beginning on page 186 of the Draft Red Herring Prospectus.

17. Our Company, Promoters and Directors are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.

Our Company, Promoters and Directors are parties to certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and forums. Mentioned below are the details of the proceedings involving our Company, Promoter and Directors as on the date of this Draft Red Herring Prospectus along with the amount involved.

Litigations against the Directors:

Nature of Cases	No. of Outstanding cases	Amount (Rs. Lakhs)
Litigation/Matters involving tax Liabilities	4	1.10

Litigations filed by the Company:

Nature of Cases	No. of Outstanding cases	Amount (Rs. Lakhs)
Other	1	139.11

The amount may be subject to additional interest/other charges being levied by the concerned authorities which are unascertainable as on date of this Draft Red Herring Prospectus. For further details, please refer to the chapter titled “**Outstanding Litigations and Material Developments**” on page 183 of this Draft Red Herring Prospectus

18. We are subject to competition from both organized and unorganized players in the market, which may significantly affect the fixation and realization of the price for our product, which may adversely affect our business operation and financial condition

The market for our products is competitive on account of existence of both the organized and unorganized players. Competition occurs generally on the key attributes such as quality of products, sales network, pricing, timely delivery, brand recognition, longer operating histories, product development, more experienced management and access to a cheaper cost of capital. Some of our competitors have longer industry experience and greater financial, technical and other resources, which may enable them to adopt faster in changing market scenario and remain competitive. Moreover, the unorganized sector can offer their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

Further, new competitors may emerge at any time. Our competitors may be able to respond more quickly to new or emerging technologies or customer requirements, and may bring with them customer loyalties that may limit our ability to compete, which could decline our sales. In addition, a variety of known and unknown events could have a material adverse impact on our ability to compete. The success of our products as well as our ability to maintain or increase our sales may also depend upon the effectiveness of our marketing initiatives which may adversely affect our ability to compete effectively. New competitors may include foreign-based companies and domestic producers who could enter our markets. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising, may affect the competitiveness of our products, which may result in a decline in our revenues and profitability.

Furthermore, if one of our competitors or their customers acquires any of our customers or suppliers, we may lose business from the customer or lose a supplier, which may adversely affect our business, results of operations and financial condition.

19. Adverse publicity regarding our products could negatively impact us.

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

20. Our contingent liabilities as stated in our Restated Financial Statements could affect our financial condition.

Our contingent liabilities as on August 31, 2023 is Rs. 81 lakhs. For further details of the contingent liabilities and commitments of our Company as on August 31, 2023, see “*Restated Financial Information*” on page 137 of this Draft Red Herring Prospectus. If a significant portion of these liabilities materialize, fully or partly, it could have an effect on our results of operations and financial condition. Further, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

21. We have experienced negative operating cash flows in the past. Any operating losses or negative cash flows in the future could adversely affect our results of operations and financial conditions

As per our Restated Financial Statements, our cash flows are as set out below: -

Particulars	For The Period/Year Ended			
	August 31, 2023	March 31, 2023	March 31, 2022	March 31, 2021
Net cash from operating activities	249.54	1188.96	(59.73)	322.35
Net cash flow from investing activities	(59.83)	(696.62)	(72.18)	(274.41)
Net cash flow from financing activities	(127.11)	(35.44)	229.06	-

Amt. (Rs. in lakhs)

Cash flow of a company is a key indicator to show the extent of cash generated to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. Any operating losses or negative cash flows could adversely affect our results of operations and financial conditions. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

22. The implementation of the proposed project is at a very preliminary stage. The schedule of implementation may be delayed and as a result thereof, we may face operational delays. This may have an adverse effect on our business operations and our return on investments.

As per the proposed schedule of implementation, the completion date for setting up of manufacturing facility at Ghaziabad is expected around October 2024 which may be subject to delays and other risks, including, among other things, contractor performance shortfalls, unforeseen engineering or technical problems, delay in procuring plant & Machineries, delay in registry of proposed land, dispute with workers, force majeure events, unanticipated cost increases or changes in scope and delay in obtaining certain property rights and government approvals and consents, any of which could give rise to delays, cost overruns or the termination of the Project and/or a breach of the financial covenants imposed by our lenders. While we may seek to minimize the risks from any unanticipated events, we cannot ensure that all potential delays can be mitigated and that we will be able to prevent any cost over-runs and any loss of profits resulting from such delays, shortfalls and disruptions.

23. If we are not able to successfully manage our growth, our business and results of operations may be adversely affected.

Continued growth of our business and customer base requires us to expand our product portfolio, strengthen our product quality, expand and enhance our sales channels, better manage our supply chain, upgrade our information systems and technologies and devote other resources to our business expansions, among others. As we continue to grow, managing our business will become more complicated as we develop a wider product mix, some of which we may have less experience in. In addition, as we increase our product offerings, we will need to work with a larger number of business partners and maintain and expand mutually beneficial relationships with our existing and new business partners. Our inability to manage the expansion of our products range, customer base and manufacturing capacities, and execute our growth strategy in a timely manner or within budget estimates, or our inability to meet the expectations to track the changing preferences of our customers or other stakeholders could have an adverse effect on our business, results of operations and financial condition.

We cannot assure you that we will be able to effectively manage our growth, that our current personnel, infrastructure, systems, procedures and controls or any measures to enhance them will be adequate and successful to support our expanding operations or that our strategies and new business initiatives will be executed successfully. Our failure to manage our anticipated growth effectively could reduce our ability to execute our business strategies, recruit and retain personnel, innovate, and manage costs all of which could adversely affect our business, results of operations, cash flows and financial condition. In addition, the availability of funds plays a crucial role for growth and expansion of the business. Our ability to arrange financing and the costs of capital of

such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. Any downgrade in our credit ratings could increase our borrowing costs and adversely affect our access to capital. Further, in case we decide to raise additional funds through the issuance of equity or equity linked instruments, the interests of our shareholders may be diluted. Further, if we decide to meet our capital requirements through debt financing, our interest obligations shall increase and we may be subject to additional restrictive covenants under our respective financing arrangements. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations and financial condition could be adversely affected.

24. Under-utilization of our manufacturing capacities and an inability to effectively utilize our existing manufacturing capacities could have an effect on our business, future prospects and future financial performance.

Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing facility as well as on the market demand of the products sold by us. Among others, the capacity utilization also depends upon the availability of raw materials, labour, industry/ market conditions and procurement practice followed by our customers. For the period ending August 31, 2023 and Fiscals 2023, 2022 and 2021, our overall capacity utilization is detailed below:

Particulars	FY 2020-21	FY 2021-22	FY 2022-23	For period ended August 31, 2023*
Installed Capacity (nos.)	800	5990	7785	2550
Actual Production (nos.)	411	3555	5231	1975
Capacity Utilization (in %)	51.38%	59.35%	67.19%	77.45%

***For 5 Months Period**

In the event we are unable to achieve considerable capacity utilization of our current manufacturing facility, it would result in operational inefficiencies which could have a material effect on our business, results, financial condition and future prospects. Under-utilization of our manufacturing capabilities over extended periods, or significant under-utilization in the short-term, could materially and adversely impact our business, growth prospects and future financial performance.

25. Changes in technology may render our current technologies obsolete or require us to make substantial investments.

Modernization and technology up gradation is essential to reduce costs and increase the output. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed updated technology, we shall continue to strive to keep our technology, plant and machinery in line with the latest technological standards. In case of a new found technology in the agro-processing equipments, we may be required to implement new technology or upgrade the machineries and other equipment 's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

26. We have incurred indebtedness which exposes us to various risks which may have an effect on our business and results of operations

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on August 31, 2023, our total outstanding indebtedness was Rs. 132.04 lakhs

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to:

1. increasing our vulnerability to general adverse economic, industry and competitive conditions;
2. limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
3. affecting our credit rating;
4. limiting our ability to borrow more money both now and in the future; and
5. increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a shorter notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an effect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see "Statement of Financial Indebtedness" on page 173 of this Draft Red Herring Prospectus.

27. We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company's financial condition and results of operations.

We have entered into various transactions with our Directors/ Promoters and Promoter Group members. These transactions, inter-alia include, remuneration, loans and advances, etc. For details, please refer to “Annexure-Y- Related Party Transactions” under Section titled “**Financial Information of the Company**” of this Draft Red Herring Prospectus. Our Company has entered such transactions due to easy proximity and quick execution on arms-length price in compliance with provisions of Companies Act 2013 and other applicable laws. Although all related-party transactions that we may enter into in the future are subject to approval by Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions are not entered into with related parties.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

28. *Certain of our investments may be subject to market risk and we have not made any provisions for a possible decline of the value of such investments.*

We have made certain investments in mutual funds. The value of these investments depends on several factors which are beyond our control, including the prevailing Indian and international economic conditions, inflationary expectations etc. Any decline in the value of these investments in future could affect our financial condition and results of operations. For details, please refer to Annexure H–Restated Statement of Non-Current Investments under Section titled “Financial Information of the Company” on page 137 of this Prospectus.

29. *We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.*

Our performance depends upon the continued services efforts and abilities of our Promoter and Key managerial personnel, particularly Vasu Naren. He has gained experience in this line of business and has over the years built relations with our suppliers, third party suppliers, customers and other persons who are connected with us and have been actively involved in the day to day operations and management. Further we believe that the inputs and experience of our senior management, in particular, and other key personnel are valuable for successful delivery of products, our overall business operations and the strategic directions taken by our Company. For details in relation to the experience of our key management personnel, please refer to Section “**Our Management**” on page 121 of this Draft Red Herring Prospectus.

We cannot assure you that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find an adequate replacement in a timely manner, or at all. The loss of our promoter, senior management and other key personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the promoter, senior management and other key personnel could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy.

30. *Compliance with, and changes in, safety, health and environmental laws and labour regulations may adversely affect our business, prospects, financial condition and results of operations.*

Our operations are subject to central, state, and local laws and regulations relating to the protection of the environment and occupational health and safety, including those governing the generation, handling, storage, use, management, transportation and disposal of, or exposure to, environmental pollutants or hazardous materials resulting from our manufacturing processes. Due to the nature of our business, along with extensive and increasingly stringent environmental, health and safety laws and regulations, various labour related laws and regulations are also applicable on us.

The scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted and hence the costs and time required to comply with these requirements could be significant. Amendments to such statutes may impose additional provisions to be followed by our Company and accordingly the Company needs to incur clean-up and remediation costs, as well as damages, payment of fines or other penalties, closure of production facilities for non-compliance, other liabilities and related litigation, could adversely affect our business, prospects, financial condition and results of operations.

31. *Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.*

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of our finished products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third-party transport service providers and engage them on a need basis. Additionally, availability of

transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third-party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lock-outs, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, movement of goods encounters additional risks such as accidents, pilferage, spoilage, shrinkage and our inability to claim insurance may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

32. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in its first year of operation, there is no guarantee that we can implement the same on time and within the estimated budget going forward or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations

33. *The average cost of acquisition of Equity Shares by our Promoter, is lower than the face value of Equity Share.*

The average cost of acquisition of Equity Shares of our Promoter is lower than the face value of Equity Shares i.e., ₹ 10/-. For further details regarding the average cost of acquisition of Equity Shares by our Promoter in our Company and build-up of Equity Shares of our Promoter in our Company, please see Chapter titled “*Capital Structure*” beginning on page 54 of this Draft Red Herring Prospectus.

34. *Our Promoter and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders*

Our Promoter and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company or their relatives, dividend entitlement, properties given by them on lease/rental basis or loans advanced by them to the Company, and benefits deriving from the directorship in our Company. There can be no assurance that our Promoter will exercise his rights as shareholder to the benefit and best interest of our Company. Our Promoter will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. For further information, please refer to the chapters/section titled “*Our Business*”, “*Our Promoter & Promoter Group*” and “*Annexure -Y - Related Party Transactions*”, beginning on pages 90, 133 and 137 respectively of this Draft Red Herring Prospectus.

35. *Our industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

We believe that the industry in which we operate faces competitive pressures in recruiting and retaining skilled and unskilled labour. Our industry being labour intensive is highly dependent on labour force for carrying out its manufacturing operations. Shortage of skilled / unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past, however there can be no assurance that we will not experience any such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

36. We are exposed to foreign currency fluctuation risks, particularly in relation to export of products, which may affect our results of operations, financial condition and cash flows.

We present our financial statements in Indian Rupees. We export our products to countries like Nepal, Bangladesh, Kenya, Nigeria etc. In period and fiscal year ending August 31, 2023, March 31, 2023, March 31, 2022 and March 31, 2021 we derived revenue from export of 0.60%, 3.12%, 2.40% and 2.15 % of our total revenue from operations respectively. Although we generally seek to pass exchange rate fluctuations to our customers through increases in our prices, there can be no assurance that we will be able to do so immediately or fully, which could adversely affect our business, financial condition, results of operations and cash flows. Thus, our global operations expose us to foreign exchange rate risks, arising primarily from our receivables. There can be no guarantee that such fluctuations will not affect our financial performance in the future as we continue to expand our operations globally.

37. Our historical performance is not indicative of our future growth or financial results and we may not be able to sustain our historical growth rates.

Our business has experienced significant growth in prior periods. Our revenue from operations has increased from Rs. 604.19 lakhs for the period from January 2021 to March 2021, to Rs. 4451.59 Lakhs, Rs. 8096.63 Lakhs and Rs. 2703.69 lakhs in Financial Years 2022, 2023 and the five months' period ended August 31, 2023 respectively. We cannot assure you that we will be able to sustain the levels of revenue growth that we have had in the past. As a relatively new player in this industry, we have a limited operating history and there is no assurance that we will be able to maintain our past rate of growth and succeed in realizing our growth strategy. Further, a number of our strategic initiatives are in initial stages. While we may experience initial success with such initiatives, there is no assurance that these will succeed in the long term.

38. Loans availed by Our Company has been secured on personal guarantees of our directors.

Our directors namely Vasu Naren and Narendra Kumar has provided corporate/personal guarantee to secure a portion of our existing borrowings taken from the banks and may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the personal/corporate guarantees provided by the aforesaid may be invoked which could negatively impact their reputation and net worth. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer "*Statement of Financial Indebtedness*" on page 173 of this Draft Red Herring Prospectus.

39. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favor of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

40. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.

The proposed fund requirement for our Working Capital requirements, as detailed in the section titled "Objects of the Issue" is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on

our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “*Objects of the Issue*” beginning on page 63 of this Draft Red Herring Prospectus.

41. *The Objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any variation between the estimation and actual expenditure as estimated by the management could result in execution delays or influence our profitability adversely.*

The deployment of funds as stated in the “*Objects of the Issue*” beginning on page 63 of this Draft Red Herring Prospectus is entirely at the discretion of our management and has not been appraised by any independent agency. Further, the purposes for which the Net Proceeds are to be utilized have not been appraised by an independent entity and are based on our estimates and on third-party quotations. In the event, for whatsoever reason, we are unable to execute our plans, we could have a significant amount of unallocated net proceeds. In such a situation, we would have broad discretion in allocating these net proceeds from the Issue without any action or approval of our shareholders. In case the assumptions on which these estimates have been made are not correct or they become un-realistic then there will be a variation in the estimates and the actual expenditure incurred which could result in execution delays and have an adverse effect on our operations and profitability.

42. *Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Red Herring Prospectus is based on certain assumptions and has been subjected to rounding off, and future production and capacity utilization may vary.*

Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Red Herring Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials and assumptions relating to operational efficiencies. Actual production levels and utilization rates may differ significantly from the estimated production capacities or historical estimated capacity utilization information of our facilities. Undue reliance should therefore not be placed on our production capacity or historical estimated capacity utilization information for our existing facilities included in this Draft Red Herring Prospectus. For further information, see the section titled “*Our Business*” on page 90 of this Draft Red Herring Prospectus.

While we have obtained a certificate dated November 28, 2023 from by M/s. Sunrise Engineers, Chartered Engineers (registered as a chartered engineer with the Institution of Engineers (India) with membership number M1718058), there is no assurance that our installed capacities and capacity utilization rates, will not be significantly different. Undue reliance should therefore not be placed on our installed capacity or historical estimated capacity utilization information

43. *Relevant copy of educational qualification of one of our directors is not traceable.*

Relevant copy of the educational qualification of Narender Kumar, Non-Executive Director is not traceable. In accordance with the disclosure requirements in respect of brief biographies of the Director, we have relied on affidavit provided by Non-Executive Director for the purpose of disclosure in the section entitled “*Our Management*” on page 121 of this Draft Red Herring Prospectus.

44. *The activities carried out at our manufacturing facilities can cause injury to people or property in certain circumstances.*

The activities carried out at our manufacturing facilities may be potentially dangerous to our employees. While we employ safety procedures in the operation of our manufacturing facilities and maintain what we believe to be adequate insurance, there is a risk that an accident may occur at any of our manufacturing facilities. An accident may result in personal injury to our employees, or the deployed at our facilities, destruction of property or equipment, manufacturing or delivery delays, environmental damage, or may lead to suspension of our operations and/or imposition of liabilities. Any such accident may result in litigation, the outcome of which is difficult to assess or quantify, and the cost to defend such litigation can be significant. As a result, the costs to defend any action or the potential liability resulting from any such accident or death or arising out of any other litigation, and any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations, cash flows and prospects.

45. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

Our operations may be subject to incidents of theft or damage to inventory. The business may also encounter some inventory loss on account of employee theft, vendor fraud and general administrative error. While we have not experienced any such instance in the past, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse or similar incidents in the future, which could adversely affect our results of operations and financial condition. Though we have insurance, losses due to theft, fire, breakage or damage caused by other casualties, could adversely affect our results of operations and financial condition.

46. We are subject to restrictive covenants under our credit facilities that limit our operational flexibility.

The loan agreements entered into by us with banks contain specific covenants which require us to obtain the prior approval/permission from the banks on the occurrence of certain events such as formulation of any scheme of amalgamation or reconstruction, undertaking of any new project or expansion, making any substantial change in our management set up, any change in our capital structure resulting in reduction of capital, etc. Further, there can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows. For further details on the Cash Credit Limits and other banking facilities, please see “*Statement of Financial Indebtedness*” on page 173 of this Draft Red Herring Prospectus.

47. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.

Since the Issue is for an amount not exceeding ₹10,000 lakhs, in terms of SEBI ICDR Regulations, our Company is not required to appoint an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our finances. However, Audit Committee of our Company will be monitoring the utilization of the Issue Proceeds.

48. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, working capital requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholder’s investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 136 of this Draft Red Herring Prospectus.

49. Certain data mentioned in this Draft Red Herring Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

50. Any Penalty or demand raised by statutory authorities in future will affect financial position of the Company.

Our Company is engaged in the manufacturing business, which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund, Employee State Insurance and Professional Tax. Any demand or penalty raised by the concerned authority in future for late payments or non-payments for any previous year and current year will affect the financial position of the Company. For instance, our company in the past had delayed filing of GSTR1/GSTR3B due to operational reasons and accordingly paid later fees and penalties on the same. Any demand or penalty raised by the concerned GST authority for such late filing may affect the financial position of the company.

51. Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuance by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

52. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the Emerge Platform of NSE Platform in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the Emerge Platform of NSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

53. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

EXTERNAL RISK FACTORS

54. *A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.*

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by Centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. Further, there have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

55. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details, please refer to the chapter "**Government and Other Approvals**" on page 186 for details of the laws currently applicable to us. The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, turnover tax, goods and services tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. The final determination of our tax liabilities involves the interpretation of local tax

laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred.

Any change in Indian tax laws could have an effect on our operations. For instance, the Taxation Laws (Amendment) Ordinance, 2019, a new tax ordinance issued by India's Ministry of Finance on September 20, 2019, prescribes a number of changes to the income tax rate applicable to companies in India. According to this new ordinance, companies can henceforth voluntarily opt for a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate for Indian companies. Any such future amendments may affect other benefits such as an exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would influence our profitability.

The Finance Act, 2022 ("Finance Act"), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax ("DDT"), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as nonresident and are likely to be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. Further, the Government of India has notified the Finance Act, 2023, which has introduced various amendments to taxation laws in India. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

56. Our business and results of operations could be adversely affected by disruptions in global economic and geo political conditions.

As substantially all of our operations are dependent on our customers who have their head offices or parent companies situated outside India, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax, trade, and monetary policies; occurrence of natural or manmade disasters; downgrade in debt rating; and adverse economic conditions occurring elsewhere in the world, such as a slowdown in economic growth in China, the repercussions of the United Kingdom exit from the European Union and other matters. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of its large agricultural and manufacturing sectors, trade deficits, recent initiatives by the Indian government and other factors. Unfavorable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

57. The continuing effect of the COVID-19 pandemic on our business, results of operations and financial condition is highly uncertain and cannot be predicted.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our consumers. In case there is a rapid increase in severe cases of infections leading to deaths, where the measures taken by governments are not successful or are any bans imposed by the government in this regard are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession.

58. Our performance is linked to the stability of policies and the political situation in India.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will

continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

59. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

60. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

61. Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the 42 world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. Recent developments in the ongoing conflict between Russia and Ukraine has resulted in and may continue to result in a period of sustained instability across global financial markets, induce volatility in commodity prices, increase borrowing costs, cause outflow of capital from emerging markets and may lead to overall slowdown in economic activity in India. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries.

62. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, man-made disasters, including acts of war, terrorist attacks, environmental issues and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

63. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The issue price of the equity shares has been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

64. Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application.

Pursuant to the SEBI ICDR Regulations, Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an application. While our Company is required to complete Allotment pursuant to the issue within six Working Days from the issue Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the applicant’s ability to sell the Equity Shares Allotted pursuant to the issue or cause the trading price of the Equity Shares to decline on listing.

We intend to finance our Objects of Issue through Net Issue Proceeds which is as follows:

		(₹ in Lakhs)
Sr. No	Particulars	Amount
1.	Net Issue Proceeds	[●]
	Total	[●]

Since, the entire fund requirement is to be funded from the proceeds of the Issue, there is no requirement to make firm arrangements of finance under Regulation 230(1)(e) of the SEBI ICDR Regulations through verifiable means towards at least 75% of the stated means of finance, excluding the amounts to be raised through the proposed Issue.

Subject to applicable law, if the actual utilization towards the Objects is lower than the proposed deployment, such balance will be used for general corporate purposes to the extent that the total amount to be utilised towards general corporate purposes will not exceed 25% of the Gross Proceeds in accordance with Regulation 7(2) of the SEBI ICDR Regulations. We believe that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilisation of funds earmarked for the purpose set forth above, increased funding requirements for a particular purpose may be financed by surplus funds, if any, available in respect of other purposes for which funds are being raised in the Fresh Issue. Any variation in the utilisation of the Net Proceeds as disclosed in this Draft Red Herring Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company. The Objects may be

varied in the manner provided in “*Objects of the Issue – Variation in Objects*” on page 63. However, we confirm that no bridge financing has been availed as on date, which is subject to being repaid from the Issue Proceeds.

As we operate in competitive environment, our Company may have to revise its business plan from time to time and consequently our fund requirements may also change. Our Company’s historical expenditure may not be reflective of our future expenditure plans. Our Company may have to revise its estimated costs, fund allocation and fund requirements owing to various factors such as economic and business conditions, increased competition and other external factors which may not be within the control of our management. This may entail rescheduling or revising the planned expenditure and funding requirements, including the expenditure for a particular purpose at the discretion of the Company’s management.

ANNEXURE TO THE STATEMENT OF SPECIAL TAX BENEFITS

The information provided below sets out the special tax benefits available to the Company and the Equity Shareholders under the Income Tax Act, 1961 presently in force in India. It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in Equity Shares particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the benefits, which an investor can avail.

A. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE COMPANY:

The Company is not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

B. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE SHAREHOLDERS:

The Shareholders of the Company are not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

NOTES:

1. The above Annexure of special tax benefits sets out the provisions of Tax Laws in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.
2. The above Annexure covers only the special tax benefits under the Act, read with the relevant rules, circulars and notifications and does not cover any benefit under any other law in force in India. This Annexure also does not discuss any tax consequences, in the country outside India, of an investment in the shares of an Indian company.
3. The above Annexure of special tax benefits is as per the current direct tax laws relevant for the assessment year 2023-24. Several of these benefits are dependent on the Company or its shareholders fulfilling the conditions prescribed under the relevant provisions of the Tax Laws.
4. In respect of non-residents, the tax rates and consequent taxation mentioned above will be further subject to any benefits available under the relevant Double Taxation Avoidance Agreement, if any, entered into between India and the country in which the non-resident has fiscal domicile.
5. A new Section 115BAA has been inserted by the Taxation Laws (Amendment) Act, 2019 ('the Amendment Act, 2019') with effect from Financial Year 2019-20 granting an option to domestic companies to compute corporate tax at a reduced rate of 25.168% (22% plus surcharge of 10% and cess of 4%), provided such companies do not avail specified exemptions/ incentives. The option under section 115BAA of the Act once exercised cannot be subsequently withdrawn for any future financial year. The Amendment Act, 2019 further provides that domestic companies availing such option will not be required to pay Minimum Alternate Tax ('MAT') under Section 115JB. The CBDT has further issued Circular 29/2019 dated October 02, 2019 clarifying that since the MAT provisions under Section 115JB itself would not apply where a domestic company exercises option of lower tax rate under Section 115BAA, MAT credit would not be available.

In such a case, the Company is not allowed to claim any of the following deductions/ exemptions under the Act: -

- ✓ Deduction under the provisions of Section 10AA.
 - ✓ Deduction under clause (iia) of sub- section (1) of Section 32 (additional depreciation).
 - ✓ Deduction under section 32AD or Section 33AB or Section 33ABA
 - ✓ Deduction under section 35AD or Section 35CCC
 - ✓ Deduction under section 80G
6. Lower corporate tax rate under Section 115BAA of the Act and Minimum Alternate Tax ('MAT') credit under section 115JAA of the Act which are in general available and hence may not be treated as special tax benefits.
 7. The Company has evaluated and decided to exercise the option permitted under Section 115BAA of the Act for the purpose of computing its income-tax liability for the Financial Year 2020-21 and onwards.
 8. This Annexure is intended only to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of tax consequences, each investor is advised to consult his or her tax advisor with respect to specific tax consequences of his/her investment in the shares of the Company.
 9. For the purpose of reporting here, we have not considered the general tax benefits available to the company or shareholders.

10. The above statement covers only certain relevant direct tax law benefits and indirect tax law benefits or benefit.
11. No assurance is given that the revenue authorities/ courts will concur with the views expressed herein. The views are based on the existing provisions of law and its interpretation, which are subject to changes from time to time. We do not assume responsibility to update the views consequent to such changes. GLOBAL ECONOMIC OVERVIEW

The global economy remains in a precarious state amid the protracted effects of the overlapping negative shocks of the pandemic, the Russian Federation’s invasion of Ukraine, and the sharp tightening of monetary policy to contain high inflation. The resilience that global economic activity exhibited earlier this year is expected to fade. Growth in several major economies was stronger than envisaged at the beginning of the year, with faster-than-expected economic reopening in China and resilient consumption in the United States. Nonetheless, for 2023 as a whole, global activity is projected to slow, with a pronounced deceleration in advanced economies and a sizable pickup in China (figure 1.1.A). Inflation pressures persist, and the drag on growth from the ongoing monetary tightening to restore price stability is expected to peak in 2023 in many major economies. Recent banking sector stress will further tighten credit conditions. This will result in a substantial growth deceleration in the second half of this year. This slowdown will compound a period of already-subdued growth—over the first half of the 2020s (2020-2024), growth in EMDEs is expected to average just 3.4 percent, one of the weakest half-decades of the past 30 years (figure 1.1.B). This slowdown reflects both cyclical dynamics and the current trend of declining global potential output growth (figure 1.1.C).

Global financial conditions have tightened as a result of policy rate hikes and, to a lesser extent, recent bouts of financial instability. Many banks experienced substantial unrealized losses due to the sharp rise in policy interest rates. Concerns about the viability of balance sheets of some banks led to depositor flight and market volatility in the United States and Europe earlier in the year, which were stemmed by a swift and extensive policy response. Financial markets remain highly sensitive to evolving expectations about the future path of interest rates of major central banks. Spillovers from banking turmoil in advanced economies to EMDEs have so far been limited. However, countries with more pronounced macroeconomic policy vulnerabilities, as reflected by lower credit ratings, have experienced slower growth and greater financial stress, including large currency depreciations and a sharp widening of sovereign spreads. Projections for 2023 growth in these economies have fallen by more than half over the past year (figure 1.1.D).

FIGURE 1.1

Inflation pressures persist. Although global headline inflation has been decelerating as a result of base effects, abating supply chain pressures, and falling commodity prices, core inflation in many countries remains elevated, and inflation is above target in almost all inflation-targeting economies. Inflation is expected to continue to be above its pre-pandemic level beyond 2024 (figure 1.1.E). That said, inflation expectations in most inflation targeting countries have so far not undergone a major shift and appear to remain anchored.

Energy prices have eased considerably since their peak in 2022 on account of weaker global growth prospects and a warmer-than-expected Northern winter, which reduced natural gas and electricity consumption. Metal prices increased in early 2023, reflecting signs of a stronger-than-anticipated recovery in China, but subsequently retraced those gains. Agricultural prices have been easing on the back of good production prospects for most crops.

In all, global growth is forecast to slow from 3.1 percent in 2022 to 2.1 percent in 2023, before edging up to 2.4 percent in 2024. Relative to the January projections, this is 0.4 percentage point stronger in 2023 and 0.3 percentage point weaker in 2024. Greater-than-expected resilience of major economies at the end of 2022 and early in 2023 led to the overall upgrade to growth in 2023.

However, the drag on activity from tighter monetary policy is increasingly apparent, particularly in more interest-rate-sensitive activities such as business and residential investment, including construction. Growth over the rest of 2023 is set to slow substantially as it is weighed down by the lagged and ongoing effects of monetary tightening, and more restrictive credit conditions. These factors are envisaged to continue to affect activity heading into next year, leaving global growth below previous projections. Notwithstanding a continued recovery in tourism, global trade growth is likewise expected to slow in view of the ongoing rotation of consumption toward services, which tend to be less trade-intensive. Fiscal policy is expected to have little net impact on global growth over the forecast horizon, with modest tightening in EMDEs generally offsetting support in advanced economies.

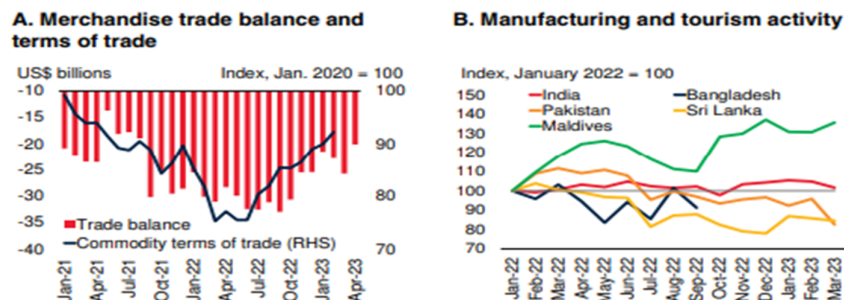

Growth in advanced economies is set to decelerate substantially for 2023 as a whole, to 0.7 percent, and to remain feeble in 2024, due to monetary tightening, less favorable credit conditions, softening labor markets, and still-high energy prices. In EMDEs, aggregate growth is projected to edge up to 4 percent in 2023, almost entirely due to a rebound in China following the removal of strict pandemic-related mobility restrictions. Excluding China, growth in EMDEs is set to slow substantially to 2.9 percent this year. This projection is predicated on the assumption of a protracted period of tight global monetary policy, fiscal consolidation in most EMDEs, and weak external demand. The slowdown is expected to be even more severe for EMDEs with elevated fiscal vulnerabilities and external financing needs. Persistent weak growth means that, excluding China, EMDEs are expected to continue making next to no progress at closing the differential in per capita incomes relative to advanced economies (figure 1.1.F). By 2024, economic activity in EMDEs will still be about 5 percent below levels projected on the eve of the pandemic.

In 2022, South Asia (SAR) endured significant negative spillovers from rapid monetary policy tightening in advanced economies, weak growth in China, and the Russian Federation's invasion of Ukraine. The peak impact of these shocks appears to have passed, and regional economic conditions have improved so far in 2023, however, the economic and financial consequence of these shocks persist. Terms of trade have become more favorable since the second half of 2022, and large trade deficits caused by high import commodity prices have partially receded (figure 2.5.1.A). Maldives, the region's fastest-growing economy in 2022, benefited from sustained high levels of tourists from Europe, India, and Russia, and returning tourism from China since early this year (figure 2.5.1.B). Import restrictions imposed by several economies (Bangladesh, Nepal, Pakistan, Sri Lanka), which adversely affected economic activity, have been relaxed as external imbalances have improved and exchange rate pressures have eased. Food export bans, however, are expected to remain in place in Bangladesh, India, and Pakistan through 2023 despite falling global prices.

In India, which accounts for three-quarters of output in the region, growth in early 2023 remained below what it achieved in the decade before the pandemic as higher prices and rising borrowing costs weighed on private consumption. However, manufacturing rebounded into 2023 after contracting in the second half of 2022, and investment growth remained buoyant as the government ramped up capital expenditure. Private investment was also likely boosted by increasing corporate profits. Unemployment declined to 6.8 percent in the first quarter of 2023, the lowest since the onset of the COVID-19 pandemic, and labor force participation increased. India's headline consumer price inflation has returned to within the central bank's 2-6 percent tolerance band.

INDIAN ECONOMIC OVERVIEW

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Real GDP at constant prices (2011-12) in the first quarter of 2023-24 is estimated at Rs. 40.37 trillion (US\$ 484.94 billion), showing a growth of 7.8% as compared to the first quarter of 2022-23 estimated at Rs. 37.44 trillion (US\$ 449.74 billion). Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022-2023. In 2023-24 (April-September), India's service exports stood at US\$ 164.89 billion. Furthermore, India's overall exports (services and merchandise) in 2023-24 (April-September) were estimated at US\$ 376.29 billion. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalization of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-December 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

MARKET SIZE

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 301.75 trillion (US\$ 3.62 trillion) in 2023-24. Additionally, the Nominal GDP at current prices in Q1 of 2023-24 was Rs. 70.67 trillion (US\$ 848.92 billion), as against Rs. 65.42 trillion (US\$ 785.85 billion) in 2022-23, estimating a growth of 8%. With 115 unicorns valued at more than US\$ 350 billion, as of February 2023, India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) decreases to US\$ 9.2 billion in Q1 of 2023-24 from US\$ 17.9 billion in Q1 of 2022-2023.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy

ROAD AHEAD

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

MANUFACTURING SECTOR IN INDIA

Manufacturing is emerging as an integral pillar in the country's economic growth, thanks to the performance of key sectors like automotive, engineering, chemicals, pharmaceuticals, and consumer durables. The Indian manufacturing industry generated 16-17% of India's GDP pre-pandemic and is projected to be one of the fastest growing sectors.

The machine tool industry was literally the nuts and bolts of the manufacturing industry in India. Today, technology has stimulated innovation with digital transformation a key aspect in gaining an edge in this highly competitive market. Technology has today encouraged creativity, with digital transformation being a critical element in gaining an advantage in this increasingly competitive industry. The Indian manufacturing sector is steadily moving toward more automated and process-driven manufacturing, which is projected to improve efficiency and enhance productivity.

India has the capacity to export goods worth US\$ 1 trillion by 2030 and is on the road to becoming a major global manufacturing hub.

With 17% of the nation's GDP and over 27.3 million workers, the manufacturing sector plays a significant role in the Indian economy. Through the implementation of different programmes and policies, the Indian government hopes to have 25% of the economy's output come from manufacturing by 2025.

India now has the physical and digital infrastructure to raise the share of the manufacturing sector in the economy and make a realistic bid to be an important player in global supply chains.

A globally competitive manufacturing sector is India's greatest potential to drive economic growth and job creation this decade. Due to factors like power growth, long-term employment prospects, and skill routes for millions of people, India has a significant potential to engage in international markets. Several factors contribute to their potential. First off, these value chains are well positioned to benefit from India's advantages in terms of raw materials, industrial expertise, and entrepreneurship.

Second, they can take advantage of four market opportunities: expanding exports, localising imports, internal demand, and contract manufacturing. With digital transformation being a crucial component in achieving an advantage in this fiercely competitive industry, technology has today sparked creativity. Manufacturing sector in India is gradually shifting to a more automated and process driven manufacturing which is expected to increase the efficiency and boost production of the manufacturing industry.

India is gradually progressing on the road to Industry 4.0 through the Government of India's initiatives like the National Manufacturing Policy which aims to increase the share of manufacturing in GDP to 25 percent by 2025 and the PLI scheme for manufacturing which was launched in 2022 to develop the core manufacturing sector at par with global manufacturing standards.

India is planning to offer incentives of up to Rs. 18,000 crores (US\$ 2.2 billion) to spur local manufacturing in six new sectors including chemicals, shipping containers, and inputs for vaccines.

Manufacturing has emerged as one of the high growth sectors in India. Prime Minister of India, Mr Narendra Modi, launched the 'Make in India' program to place India on the world map as a manufacturing hub and give global recognition to the Indian economy. Government aims to create 100 million new jobs in the sector by 2022.

ETHANOL BLENDED PETROL (EBP) PROGRAMME

1. Government has been implementing Ethanol Blended Petrol (EBP) Programme throughout the country except Union Territories of Andaman Nicobar and Lakshadweep islands, wherein OMCs sell petrol blended with 10% ethanol.
2. To increase indigenous production of ethanol the Government since 2014 took multiple interventions like: -
 - Re-introduction of administered price mechanism;
 - Opening of alternate route for ethanol production;
 - Amendment to Industries (Development & Regulation) Act, 1951 which legislates exclusive control of denatured ethanol by the Central Government for smooth movement of ethanol across the country;
 - Reduction in Goods & Service Tax (GST) on ethanol meant for EBP Programme from 18% to 5%;
 - Differential ethanol price based on raw material utilized for ethanol production;
 - Extension of EBP Programme to whole of India except islands of Andaman Nicobar and Lakshadweep wef 01st April, 2019;
 - Interest Subvention Scheme for enhancement and augmentation of the ethanol production capacity by Department of Food and Public Distribution (DFPD);
 - Publication of Long Term Policy on ethanol procurement.
3. For the first time during ethanol supply year 2018-19, following raw materials apart from C heavy molasses were allowed for ethanol production viz. B heavy molasses, sugarcane juice, sugar, sugar syrup, damaged food grains like wheat and rice unfit for human consumption. Also, different ex-mill price of ethanol, based on raw material used for ethanol production, was fixed by the Government in case of sugarcane juice/sugar/sugar syrup, B heavy molasses and C heavy molasses.
4. The aforesaid actions helped in increasing ethanol procurement by PSU OMCs from 38 crore litres during Ethanol Supply Year (ESY) 2013-14 (December, 2013 to November, 2014) to 188.6 crore litres during 2018-19 (December, 2018 to November, 2019) thereby achieving average blend percentage of 5.00% in ESY 2018-19.
5. Under the EBP Programme, the target for ongoing ESY 2019-20 (December, 2019 to November, 2020) is 7% which has to be progressively increased to 10% by ESY 2021-22.
6. Major reasons cited for lower offers/supplies during ongoing ESY 2019-20 is due to low production of Sugarcane crop in Maharashtra & Karnataka, production not started by new distilleries who had participated in the tender etc.
7. With a view to achieve 10% ethanol blending in petrol by 2021-22 and 20% by 2030, constraint in available ethanol distillation capacity was identified as one of the actionable point. In order to address the ethanol distillation capacity constraint, Department of Food and Public Distribution (DFPD) notified a Scheme on 19th July, 2018 for extending financial Assistance to sugar mills for enhancement and augmentation of the ethanol production capacity.
8. MoP&NG has also issued a 'Long Term Ethanol Procurement Policy' under EBP Programme on 11.10.2019.

MANUFACTURING PROCESS

Set forth below is a brief description of the process carried out in our facilities to manufacture agro-processing equipments like Cleaning Machine, Milling Machine, Grading Machine etc.

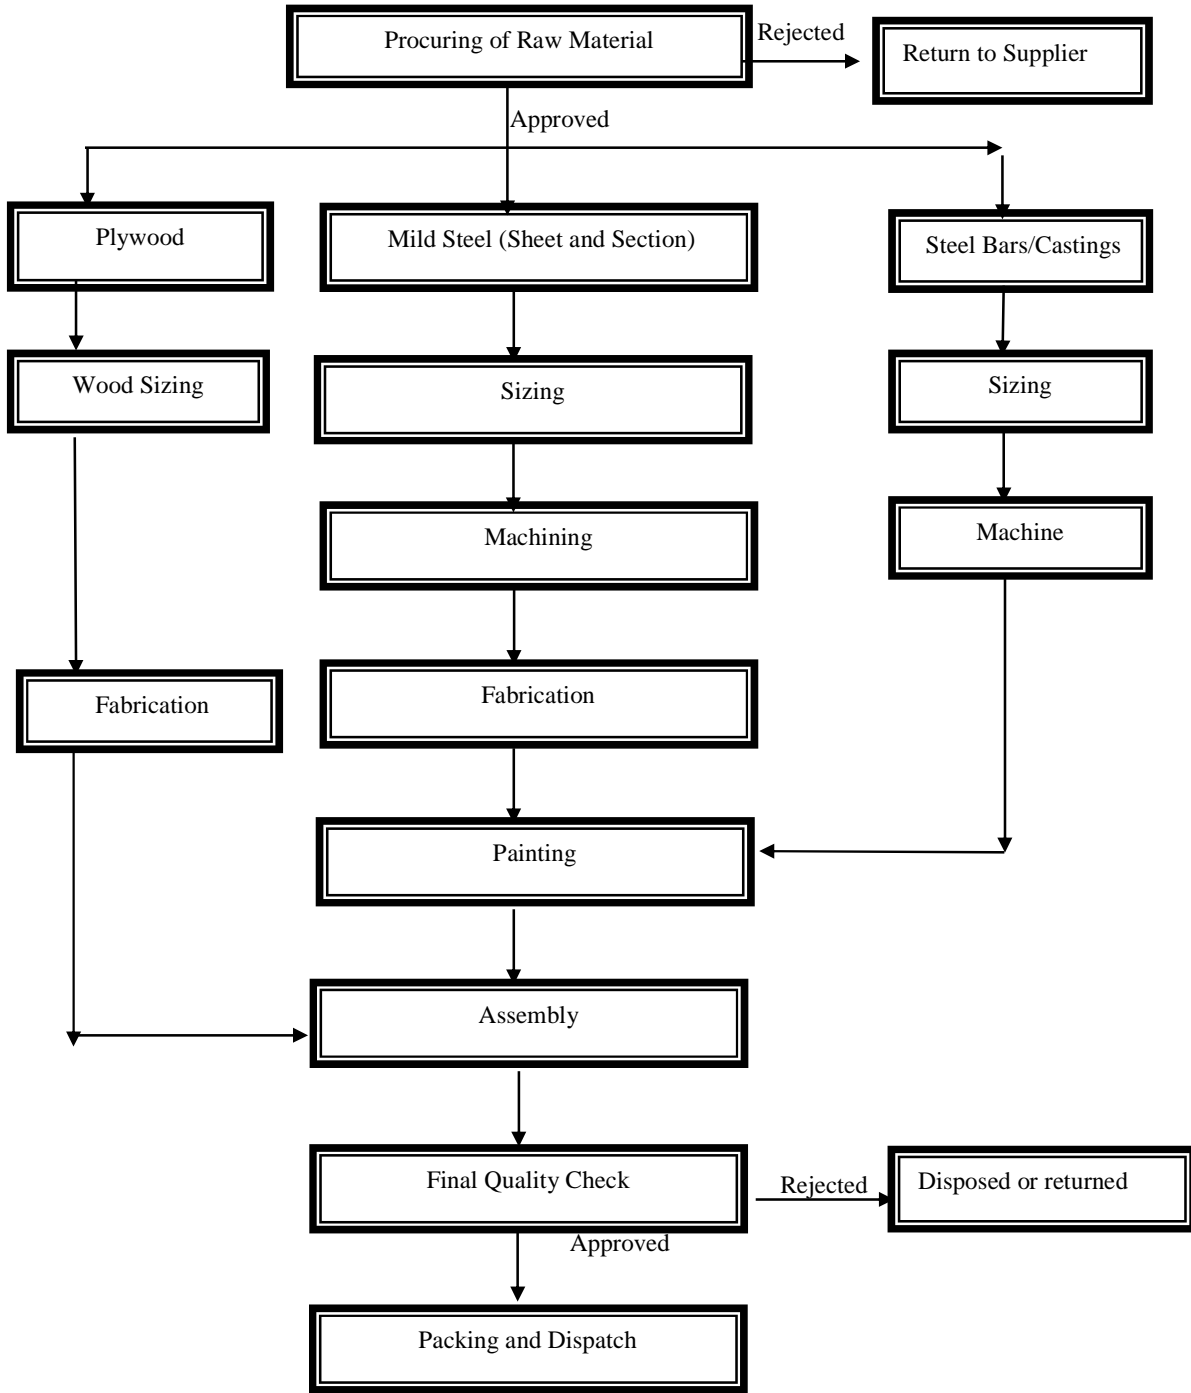

Manufacturing Process for Milling, Grading and Material Handling Machines

The manufacturing operations described through above diagram is explain as follows:

1. **Procuring of Raw Material** Our manufacturing process is dependent on continuous supply of raw materials i.e. mild steel & steel bars used for manufacturing of our milling and grading equipments from various suppliers, which is then checked for quality standards. If approved the same is stored otherwise returned to Supplier.
2. **Sizing**: Sizing is a stage where every raw material is cut into specific size/dimension using machines like Laser Cutting & Turret for sheet metal and Hexa Cutter for steel profiles (e.g., angles, C channels, solid bars, etc.),
3. **Machining**: The Machining Stage is where the cut material is formed into various precise usable forms according to the type of product required. Here, the material is processed using bending machines to achieve a precise surface finish.
4. **Fabrication**: Fabrication is the stage where different parts of sheet metal and profile sections are assembled using welding processes, maintaining the strength of the structure as per desired engineering standards.
5. **Surface Finishing & Painting**: Surface Finishing is the process of preparing parts/fabricated structures to achieve a perfect aesthetic appearance. This is done using surface grinders, body fillers, and sheet treatment processes. It is followed by painting, which is done using PU-grade paint with a base coat of primer and powder painting which is used in material handling due to its smaller size and high volume of production.
6. **Assembling**: Assembly is the stage where all parts from different areas (finished casted parts, bought-out motors and parts) come together and are installed in the fabricated structure of the machine. Various types of hand tools like hammers and gauges are used during this stage to complete the assembly.
7. **FQC (Final Quality Control)**: FQC is the process where all finished goods and machines are tested according to specific standards before delivery. After passing QC approval, they are forwarded to the warehouse for storage.
8. **Packing and Dispatch**: After FQC, all finished equipment is stored and marked for delivery, and then packed accordingly. The final materials are packed and delivered to the customer .

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Bidder had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Bidders into the UPI mechanism.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules.
