Thereafter, our company was converted into a public limited company pursuant to a special resolution passed by our members at the Annual General Meeting held on June 5, 2024 and consequently the name of our company was changed to 'Rexpro Enterprises Limited' and a fresh certificate of incorporation was issued by Registrar of Companies, Mumbai dated August 9, 2024 bearing Corporate Identification Number U36912MH2012PLC227967.

We are a growing diversified product manufacturing company based out of Vasai, Maharashtra. We Started as a one stop solution to meet the furniture and fixture requirements for retailers and acquired clients across multiple retail segments such as fashion, lifestyle, electronics, grocery, beauty, telecom etc. We have made complete standalone stores, shop in shops, kiosks and displays for leading global brands and several of large Indian retailers. Further, given our multi-material manufacturing capability for customised products, we have diversified into commercial and institutional furniture for offices, hospitals, government offices etc., and also the growing home segment. Further, we have developed industrial products like racks, cabinets and trolleys.

India has witnessed a high growth in the infrastructure sector in which roads and metros are an integral part. To enter and excel in this sector we are manufacturing sound barriers which are now installed on a few flyovers in Mumbai helping to reduce noise pollution and providing a better environment to the neighbourhood.

We have also ventured into products with high potential such high precision double doors used at Metro stations (platform screen doors) for better safety and prevention of accidents at the stations. These have been conceptualised and manufactured in-house.

Given the boom of online retail and growth in the logistics sector, in our subsidiary, we have undertaken the manufacturing of racking systems and fixtures catering specially to the warehousing industry.

Our products are mainly made from wood and metal or a combination and we also use various support materials like laminates, paints, acrylic, prints, solid surfaces, LEDs etc. for accessorising and finishing up to the final products. All processes are in house to ensure quality and adhere to timelines.

We also undertake turnkey projects for end to end solution which includes designing, manufacturing and installing all products required and offer such services across India.

Our business model is B2B (Business-to-Business) and we have clients from several business verticals owing to the diverse range of products we manufacture. While our manufacturing is all based out of Vasai, Maharashtra, we service pan India requirements. Most of the clients we do business with have been regularly purchasing from us over the years and have also made us their long term vendors. We cater to some large companies and brands such as Shoppers Stop Limited, One RX India Private Limited (Samsung), Hindustan Unilever, Lenskart, Marks & Spencer Reliance India Private Limited, and Godrej & Boyce Mfg. Co. Limited.

2. Summary of the Industry in which our Company operates

Our Company manufactures furniture and fixtures for retail, commercial, industrial, Infrastructure and warehousing industries. The Indian retail sector is highly fragmented with more than 90% of its business being run by the unorganized retailers like the traditional family run stores and corner stores. The organized retail however is at a very nascent stage. In 2022, traditional retail, organised retail and E-commerce segments accounted for 81%, 12% and 8% of the market, respectively, The organised retail market in India has 12% share of the total retail market and has a growth rate of 10% over 2021-22. Increasing demand for organized retail space has helped create a capacity of ~120 million square feet

(MSF) in retail space across major Indian cities. Major Indian cities include Delhi (23.7 MSF) and Mumbai (16.7 MSF).

Rapid urbanization has led to increased traffic on roads and bridges, particularly in urban areas. The construction of new flyovers and elevated roads to accommodate this growth has heightened the need for sound barriers to protect communities from noise pollution.

The warehousing sector in India has undergone significant transformation in recent years. Driven by the rise of e-commerce, advancements in technology, and policy reforms, organized warehousing space has expanded rapidly.

India's warehousing industry is a critical component of the logistics sector, contributing to the efficient storage and distribution of goods. Traditionally, the sector was highly fragmented, dominated by small, unorganized players. However, with the advent of modern supply chain requirements, there has been a marked shift towards organized warehousing.

The organized warehousing sector in India was valued at approximately USD 12 billion in 2022 and is expected to grow at a compound annual growth rate (CAGR) of 20-25% over the next five years. The total warehousing space across India stood at around 265 million square feet in 2022, with organized space contributing to approximately 30% of this. The organized warehousing space is expected to reach 500 million square feet by 2025.

We have also ventured into products with high potential such high precision double doors used at Metro stations (platform screen doors) for better safety and prevention of accidents at the stations. These have been conceptualised and manufactured in-house. There are more than 725 metro stations present in India and more than 2,000 in the pipeline. One station requires approximately 16 doors on one side so 32 doors approximately per station. Only 5% or less of metro stations have platform screen doors.

INTERNAL RISK FACTORS

BUSINESS RELATED RISK

1. ***Our Company and Promoter of our company are party to certain litigation and claims. These legal proceedings are pending at different levels of adjudication before the court and regulatory authority. Any adverse decision may make us liable to liabilities/penalties and may adversely affect our reputation, business, and financial status.***

Our Company is not involved in any legal proceedings, except one GST adjudication pending before the AO (for more detail refer chapter “*Outstanding Litigations and Material Developments*” on page 272). In the event of any other Legal proceeding initiated by any third party against the Company and any adverse rulings or the levying of penalties, we may need to make payments or provisions for future payments, which could potentially increase our expenses and current or contingent liabilities. Additionally, following are outstanding litigation proceedings involving our company, our subsidiary, our Promoter, and our directors:

(₹ in lakhs)

Name	Criminal Proceedings	Tax Proceedings	Statutory or Regulatory Actions	Disciplinary actions by the SEBI or Stock Exchanges against the Promoter	Material pending Civil Litigation	Financial Implications to the Extent Quantifiable(₹ In Lakhs)

There can be no assurance that these litigations will be decided in favor of our Company, our Promoter/Director and our group companies, respectively, and consequently it may divert the attention of our management and Promoters and waste our corporate resources and we may incur significant expenses in such proceedings and may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against us, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares.

The amount mentioned above may be subject to additional interest, rates or penalties being levied by the concerned authorities for delay in making payment or otherwise. For further details, please refer section “Outstanding Litigation and Material Development” beginning from page no. 272 of this Prospectus.

2. ***Our success depends on our ability to manufacture, market and deliver our products of high quality on schedule and on a large scale, which may expose us to new and increased challenges and risks.***

Our growth depends on our ability to successfully manufacture, market and deliver our products for every vertical such

as retail, commercial, institutional, residential and infrastructure (please refer to “Our Business” on page 127). This manufacturing of our products requires significant capital expenditure and investments in engineers and other human capital, optimization of our supply chain, R&D costs and other intangibles, which may result in cost overruns particularly for new products developed by us wherein we have no prior experience of manufacturing such products. Factors affecting competition include, among others, technological innovation, product quality and safety, product pricing, sales efficiency, manufacturing efficiency, quality of services, design and styling. Increasing competition may lead to lower sales and increasing inventory. Our ability to successfully compete against other companies will be fundamental to our future success in existing and new markets.

Developing and launching new products will need enhancements to be made to our technology platform and may also involve significant risks and capital investments that may not generate or commensurate returns on investments. We may not be able to innovate or innovate at the speed of some of our competitors. Hence, our platform may become obsolete and this may result in a loss of sales. We may fail to adapt to emerging industry standards or regulatory requirements. Due to any of the reasons above, our customers may be dissatisfied with our products which in turn may cause a decline in our reputation and sales.

Our ability to generate cash flow, secure necessary funding and control expenses and investments in anticipation of expanded operations could be affected due to;

- our inability to manage a large work force in different divisions and geographies and implement and enhance administrative infrastructure, safety, systems and processes;
- our inability to secure the necessary raw materials on acceptable terms and in a timely manner;
- our inability to maintain effective and efficient quality and safety controls, including within our manufacturing processes;
- our inability to design and manufacture our products without defects that require us to undertake repairs or take field actions;

If we are unable to manage or prevent the above risks, our reputation and results of operations will be negatively impacted.

3. *We depend on unorganized and third parties for the supply of raw materials and do not have firm commitments for supply or exclusive arrangements with any of our suppliers. Loss of suppliers may have an adverse effect on our business, results of operations and financial condition.*

We do not have firm commitments for supply of raw materials and rely on regular purchase orders and delivery schedules for the procurement of all raw materials, more so, we rely also on unorganised sector for purchase of some of our raw materials. We procure our raw materials by way of general purchase orders wherein the pricing, scheduling and delivery details are set out. We depend on third-party suppliers and also on unorganised suppliers for all our raw materials and have no binding or general agreements with them and they could give defective and/or delayed supplies due to which our company could face losses or loss of reputation in the market for defective or delayed supplies. We may be unable to source such products from alternative suppliers on similar commercial terms and within a reasonable timeframe. Furthermore, as we are subject to applicable laws in relation to our operations including environmental and manufacturing, our supplier base is limited, which exacerbates the risk of being unable to make alternative arrangements. While our suppliers have not supplied any defective materials nor have they delayed any supply in the last three Fiscals, yet we may be unable to find suitable alternatives in the event they do so in the future.

Furthermore, as we typically do not have exclusive arrangements with our suppliers, our suppliers could engage with our competitors and prioritize supplies to them, which could adversely impact our ability to procure a sufficient quantity of raw materials at competitive rates and in time.

Ultimately, our success depends on the uninterrupted supply of raw materials to our manufacturing facilities which is subject to various uncertainties and risks. A failure to maintain a continuous supply of raw materials may result in our inability to manufacture and supply products to our customers on a timely basis which could have a material and adverse effect on our business, results of operations and overall financial condition.

4. *Dependency on the State of Maharashtra for Procurement of Raw Materials.*

The Company has been significantly dependent on the state of Maharashtra for the procurement of key raw materials during the past three fiscal years. Our manufacturing plants are strategically located in close proximity to vendors and distributors, through whom we procure more than 80% of the raw materials. The table below shows the quantum of procurement of raw materials along with percentage in last three years:

(₹ in lakhs)

State	FY 22	% of Purchase	FY 23	% of Purchase	FY 24	% of Purchase	Sept, 2024	% of Purchase
Maharashtra	1,760.91	81.74%	3,455.19	85.41%	4,557.25	89.36%	2,675.37	82.53%
Total Purchases	2,154.15	100.00%	4,045.60	100.00%	5,100.04	100.00%	3,241.74	100.00%

Any disruption in the availability or supply chain of raw materials from this region could adversely affect the Company's business operations. Factors such as political instability, changes in state policies, labour strikes, natural disasters or transportation bottlenecks within Maharashtra could lead to delays or interruptions in the procurement process. Such disruptions could result in increased costs, project delays or an inability to meet customer demand, which may have a material adverse effect on the Company's financial condition and operational results.

Moreover, the Company's reliance on a specific geographical area may limit its ability to diversify its supply base, exposing it to concentration risks. While the Company is taking steps to identify alternative suppliers outside Maharashtra, there is no assurance that such efforts will mitigate the risks associated with this dependency.

5. *Pricing pressure from our customers may adversely affect our gross margin and profitability. Inability to increase our prices may have a material adverse effect on our results of operations and financial condition.*

We manufacture several diverse products for business verticals such as retail, commercial, institutional and infrastructure. As per our past experience we may continue to experience pressure from our customers to reduce our prices, which may affect our profit margins going forward. If we reduce our prices, we must be able to reduce our operating costs and increase operating efficiencies in order to maintain profitability, we cannot assure that we will be able to do so as much is required and that could result into reduced profitability. As we have diverse product range, supplied to various business verticals, our profitability is dependent in part on our ability to achieve higher sales volume. If we are unable to offset customer price reductions in the future through improved operating efficiencies, new manufacturing processes, sourcing alternatives and other cost reduction initiatives, our results of operations and financial condition may be materially adversely affected.

6. *Our Registered Office, factories and warehouses from where we operate are not owned by our Company. Any adverse impact on the title /ownership rights of the owner, from who's premises we operate our registered office, manufacturing units, warehouses or breach of the terms / non-renewal of the rent agreements, may cause disruption in our corporate affairs and business and impede our effective operations and thus adversely affect our profitability.*

We do not own our Registered Office and factories from where we carry on our business. The said office and factories have been taken on rental basis from third parties and at one location from our Promoter. Our Company has entered into lease agreement with the Promoters, Premal Shah and Ragesh Bhatia for Registered Office of our subsidiaries and with Promoter Group Entity, Rexprovac Enterprises Private Limited for Manufacturing Plant – I (Steel Section). Any adverse changes to the terms of these agreements or disputes with related parties could materially affect our operations. Furthermore, there is no assurance that such transactions will continue on terms favourable to our Company, or that similar transactions with unrelated third parties would not have been more favourable. The present transactions have been carried out at an arm’s length basis. For details on the duration of existing rent agreements for our offices, please refer to Chapter titled ‘Our Business’ beginning on page 127 of this Prospectus. In the event of any dispute of title of owner of premises, we may suffer a disruption in our operations. If alternative premises are not available at the same or similar costs, size or locations, our business, financial condition and results of operations may be adversely affected.

7. *We have not entered into any long-term contracts with any of our customers and typically operate on the basis of purchase orders, which could adversely impact our revenues and profitability.*

Our revenue from operations concentrated to a few top 10 customers are aggregating to:

(₹ in lakhs)

Fiscal Year	Amount	Percentage
September 2024	3,659.75	73.86%
March 2024	5,377.94	64.80%
March 2023	4,134.55	65.75%
March 2022	2,558.93	71.74%

We presently do not have any long-term or exclusive arrangements with any of our customers. We cannot assure you that we will be able to sell the quantities we have historically supplied to such customers. In the event our competitors’ products offer

better margins to such customers or otherwise incentivize them, there can be no assurance that our customers will continue to place orders with us. Most of our transactions with our customers are typically on a purchase order basis without any commitment for a fixed volume of business. There can also be no assurance that our customers will place their orders with us on current or similar terms. Further, our customers could change their business practices or seek to modify the terms that we have customarily followed with them, including in relation to their payment terms. In addition, our customers may also cancel purchase orders at short notice or without notice, which could have an impact on our inventory management. In the event of frequent cancellations of purchase orders, the same could have a material adverse effect on our business, financial condition, results of operations and cash flows.

8. We are dependent on various kinds of Suppliers for the supply of raw materials, services and finished goods.

Our business is significantly affected by the availability, cost and quality of the raw materials and bought out items, which we need to construct, develop and provide for our projects, products and services. The prices and supply of raw materials and bought out items depend on factors not under our control, including domestic and international general economic conditions, competition, availability of quality suppliers, production levels, transportation costs and import duties. Although we may enter into back-to-back supplier contracts or provide for price contingencies in our contracts to limit our exposure, if, for any reason, our primary suppliers of raw materials and bought out items should curtail or discontinue their delivery of such materials to us in the quantities we need, provide us with raw materials and bought out items that do not meet our specifications, or at prices that are not competitive or not expected by us, our ability to meet our material requirements for our projects could be impaired, our construction schedules could be disrupted and our results of operations and business could suffer.

The table below provides the amount of purchase from our top five and top ten suppliers;

(₹ in lakhs)

Fiscal Year	Top 5		Top 10	
	Amount	Percentage	Amount	Percentage
2024	1342.61	38.53%	1729.27	49.63%
2023	1085.06	32.16%	1581.48	46.87%
2022	695.80	35.60%	947.02	48.45%

While we have not experienced any such instances in the past three years, however, the loss of one or more of our significant suppliers or a reduction in the amount of raw material we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. Our reliance on a selected group of suppliers may also constrain our ability to negotiate our arrangements, which may have an impact on our profit margins and financial performance. The deterioration of the financial condition or business prospects of these suppliers could reduce their ability to meet our requirements and accordingly result in a significant decrease in our revenues. Further, there can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply. In the absence of long-term supply contracts, we cannot assure you that a particular supplier will continue to supply to us that we currently source from them in the future. Any change in the supplying pattern can adversely affect our business, results of operations, financial condition and cash flows.

9. A significant portion of our revenues are derived from a specific regional area and any adverse developments in this region could have an adverse effect on our business, cash flows, results of operations and financial condition.

The table below provides details of our revenue from operation from Maharashtra and outside Maharashtra:

(₹ in lakhs)

Particulars	Fiscal Year 2022 (Standalone)		Fiscal Year 2023 (Consolidated)		Fiscal Year 2024 (Consolidated)		September 2024 (Consolidated)	
	Amount	Percentage	Amount	Percentage	Amount	Percentage	Amount	Percentage
Maharashtra	1,829.16	51.28%	2,944.06	46.82%	4,549.06	54.82%	3,554.14	71.73%
Outside Maharashtra	1,737.77	48.72%	3,343.93	53.18%	3,749.60	45.18%	1,400.83	28.27%
Total	3,566.93	100.00%	6,287.99	100.00%	8,298.66	100.00%	4,954.98	100.00%

Most of our revenues aggregating to approximately 55% are generated from Maharashtra. In FY 2024, we have carried out operations in 29 states and union territories for revenue generated outside Maharashtra. We are at risk of any political, social, economic unrest in the state. Maharashtra has been a very progressive state for the past 76 years post-independence of our country. We are also having a good amount business in the western region but outside the state of Maharashtra and to that effect our business is safeguarded.

10. Our Company's failure to maintain the quality standards of the products could adversely impact our business, results of operations and financial condition.

The demand for our products depends on quality that we manufacture and sell. Any failure of ours to maintain the quality standards may affect our business. In the year FY 2022-23, our products worth around Rs. 70 lakhs were rejected owing to the quality of material based on its finishing by our internal quality control department. Although we have put in place strict quality control procedures, we cannot assure that our products manufactured will always be able to clear our internal quality control and satisfy our customer's quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products or any other unforeseen events could adversely affect our reputation, our operations and our results from operations.

11. We have in past entered into related party transactions and we may continue to do so in the future.

As of March 31, 2024, we have entered into several related party transactions with our Promoters, individuals and entities forming part of our promoter group relating to our operations. As on March 31, 2024, 2023 and 2022 we have paid rental expenses to Rexprovac Enterprises Private Limited (Promoter Group) amounting to Rs. 79.50 Lakhs, Rs. 66.10 Lakhs and Rs. 48 Lakhs respectively which have been paid on arm's length basis. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled "Restated Financial Information" on page 212 of Prospectus.

While we believe that all our related party transactions have been conducted on an arm's length basis, and we confirm that the related party transactions entered into by the company are in compliance with the relevant provisions of Companies Act and other applicable laws, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

12. Our business is dependent on our manufacturing activities and we are subject to all risks associated with manufacturing processes. Any disruptions caused in our manufacturing activities could materially and adversely affect our business, financial condition, cash flows and results of operations.

All our manufacturing facilities are based in Maharashtra. We are dependent on our manufacturing facilities which are dedicated for manufacturing our diverse range of products. Our business is dependent on our ability to efficiently manage our manufacturing facilities and the operational risks associated with it, including those beyond our reasonable control. Any unscheduled, unplanned or prolonged disruption of our manufacturing operations, including on account of power failure, fire, mechanical failure of equipment, performance below expected levels of output or efficiency, obsolescence, non-availability of adequate labour or disagreements with our workforce, lock-outs, lockdowns, earthquakes and other natural disasters, industrial

accidents, any significant social, political or economic disturbances or infectious disease outbreaks, could reduce our ability to meet the conditions of our contracts and adversely affect sales and revenues from operations in such fiscal period. Disruptions in our manufacturing operations could delay production or require us to temporarily or permanently cease operations at our manufacturing facilities and require us to incur additional expenditure to attempt to mitigate such disruption. There have been no instances in the past in the company.

13. *If any industrial accident, loss of human life or environmental damage were to occur we could be subject to significant penalties, other actionable claims and, in some instances, criminal prosecution.*

In addition to adversely affecting our reputation, any such accidents may result in a loss of property and/ or disruption in our manufacturing operations entirely, levy of fines, penalties or compensation and/or adverse action against our employees, officers or management, which may have a material adverse effect on our business operations and financial performance. Further, any significant malfunction or breakdown of our equipment or machinery, may involve significant repair and maintenance costs and cause delays in our operations. While there have been no such instances of breakdown or equipment failure or non-availability of adequate labour or disagreements with our workforce or lock-outs in the last three Fiscals, we cannot assure you that such instances may not happen in future. In addition, we may be subject to manufacturing disruptions in case of any contravention by us of applicable regulatory approvals until such regulatory issues are resolved.

14. *Our products are subject to changing technology, design and customer requirements. Our inability to upgrade our manufacturing technology, match customer requirements, upgrade to new designs etc may affect our business and operations.*

All our products sold in all the verticals change from time to time in designs, technology used to manufacture and customer requirements. Our inability to foresee the changing trends in our products pertaining to design and technology or judging the changing customer trends could lead to loss of business. Our company along with its promoters and senior management personnel are hands on with such requirements and have a depth of experience of the same. They ensure to regularly keep up their knowledge of latest happenings in the industry by frequently meeting customers, attending shows, fairs, exhibitions and also studying competition. Our inability to foresee such changes in technology for our products or customer behaviour etc may affect our growth and the current business.

15. *Our Company's failure to maintain the quality standards of the products could adversely impact our business, results of operations and financial condition.*

The demand for our products depends on quality that we manufacture and sell. Any failure of ours to maintain the quality standards may affect our business. Although we have put in place strict quality control procedures, we cannot assure that our products will always be able to satisfy our customer's quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products or any other unforeseen events could adversely affect our reputation, our operations and our results from operations.

16. *We face competition in our business from domestic competitors from both organised and unorganised players. Such competition would have an adverse impact on our business and financial performance.*

The industry, in which we are operating, is highly and increasingly competitive due to presence of many small-time players in unorganized sector. Our results of operations and financial condition are sensitive to, and may be materially adversely be affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or loss of market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

17. *Our industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

We believe that our industry faces competitive pressures in recruiting and retaining skilled and unskilled labour. Our industry being labour intensive is highly dependent on labour force for carrying out its manufacturing operations. Shortage of skilled/unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth 39 detailed procedures for the establishment of unions, dispute resolution and employee removal and

legislation that imposes certain financial obligations on employers upon retrenchment. In addition, we have entered into contracts with independent contractors who engage on-site contract labour for performance of certain functions as per our requirements. Although our Company does not engage these labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such independent contractors. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and financial condition. If we are unable to renew the contracts with our independent contractors at commercially viable terms or at all, our business, financial condition, results of operations and cash flows could be materially and adversely affected. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. While we have not faced any such incidence in past, if our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

18. Our operations may be adversely affected in case of industrial accidents at our production facilities.

Usage of heavy machinery, handling of materials by labour during production process or otherwise, lifting of materials by humans, etc. may result in accidents, which could cause injury to our labour, employees, other persons on the site and could also damage our properties thereby affecting our operations. There have been no instances in the past in the company. Though our plants and machinery are covered under insurance, occurrence of accidents could hamper our production and consequently affect our profitability. Further, no such industrial accidents at our production facilities have occurred in the past.

19. We require a number of approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Some of these approvals are required to be transferred in the name of “Rexpro Enterprises Limited” from “Rexpro Enterprises Private Limited” pursuant to conversion and name change of our company and any failure or delay in obtaining such approvals or renewal of the same in a timely manner may adversely affect our operations.

We require a number of approvals, licenses, registrations and permits in ordinary course of our business. 20. *Our Company has not placed orders for plant and machinery required by us for which funds are being raised through this Issue. Any delay in placing the orders or supply of these equipment’s may result in time and cost overruns and may affect our profitability.*

Our Company proposes to utilise the funds for procurement of plant and machineries for conducting smooth operations. Our Company has identified the plant and machineries proposed to be acquired and have received the quotations for the same from the suppliers, but we have not placed orders for the said plant and machineries aggregating to Rs. 1,798.94 Lakh which are proposed to be acquired for our expansion plan by utilization of Issue Proceeds. Presently, 100% of the orders are pending. For further details read section, see “Objects of the Issue” on page 86 of this Prospectus. Our Company is further subject to risks on account of inflation in the price of such plant and machineries. Any delay in access to Issue Proceeds or any inaccuracy in the management estimates would eventually delay the process of placing the orders.

21. *Risk of Recall on Unsecured Loans taken by the Issuer and its Subsidiaries.*

The company and its subsidiaries have taken unsecured loans, which may be recalled at any time by the lenders. These loans do not have any collateral securing them, and as a result, lenders have the contractual right to demand repayment at short notice or without prior warning. In the situation, the lenders choose to recall these loans, the company may face significant liquidity challenges, which could negatively impact its financial position and operational capacity.

If the company is unable to generate sufficient funds to meet these obligations, it could result in financial distress, default on other debt obligations, and materially adverse effects on its business, results of operations, and financial condition.

22. *Risk of delays in the implementation of the project for which funds are being raised.*

The funds being raised through the public issue are intended to finance the objects of the company. While the company has established a schedule for the implementation of the project, there is a risk of delays due to factors beyond the company’s control. These factors may include, but are not limited to regulatory or environmental approvals, supply chain disruptions and unfavourable weather conditions. Any delay in the project’s implementation could result in cost overruns, negatively impacting the return on investment. Furthermore, delayed project completion may impair the issuer’s ability to generate anticipated revenue streams, affecting the financial projections and overall profitability. This could materially and adversely affect the issuer’s financial condition, business operations, and future growth prospects.

23. *Sustained negative cash flow could adversely impact our business, financial condition and results of operations.*

24. Our Company is dependent on third party transportation providers for the supply of raw materials and delivery of our goods and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.

Our Company uses third party transportation providers for supply of raw material and delivery of our goods. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. In addition, goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations. Further, disruptions of transportation services due to weather-related problems, strikes, lock-outs, inadequacies in the road infrastructure, or other events could impair ability to procure raw materials on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

25. Our business depends largely on availability of various materials and any shortage or interruption in the supply or decrease in quality could adversely affect our business or results of operations.

The principal materials used in manufacture of furniture and fixtures are plywood, engineered wood, metal sheets and pipes (tubes), acrylic and other forms of plastic like HIPS (High Impact Polystyrene), liquid paints, powder paint, adhesive, nuts and bolts (rivets) etc. Our Company mainly purchases these materials from various suppliers for our manufacturing operations, where we do not have long term supply contracts. We are therefore, entirely dependent on external suppliers for the various materials which constitutes a majority of the total cost of material consumed. The prices of these materials largely depend on the market conditions and overall demand of these. Generally, any increase in prices of these materials is passed on to our customers. However, any adverse fluctuations in the price which we may not be able to pass on to our customers could have a material adverse effect on our total cost of production. Further, any material shortage or interruption in the supply or decrease in quality of these materials could also adversely impact our business operations.

26. Under-utilization of our manufacturing capacities and an inability to effectively utilize our expanded manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.

As on the date of this Prospectus, we operate from our manufacturing facilities located in and around Vasai with a capacity as stated below:

Particulars	Process Capacity p.a.	Unit	Products	September 30, 2024 (Half Yearly)	FY 23-24	FY 22-23	FY 21-22
Metal Unit	2200	Tonnes	Sheet metal and tube processing for Retail, Infrastructure, Kiosk- Retail	86%	68%	58%	40%
Wood Unit	1350000	sqft	MDF, Ply panels for Retail, Institutional	81%	67%	60%	45%
Warehousing Unit	3000	Tonnes	Roll forming for warehousing	30%	30%	NA	NA

Our ability to maintain our profitability depends on our ability to optimize the product and service mix to support high-margin products and services with consistent long-term demand and supply. In particular, the level of our capacity utilization can impact our operating results. Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short-term, could materially and adversely impact our business, growth prospects and future financial performance.

27. *Our success depends largely upon the services of our Directors, Promoters, other Key Managerial Personnel and Senior Management Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.*

Our success is substantially dependent on the expertise and services of our Directors, Promoters, other Key Managerial Personnel and Senior Management Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

28. *We are subject to risks associated with expansion into new geographical regions.*

Expansion into new geographical regions subjects us to various challenges, including those relating to our lack of familiarity with the culture, local laws and regulations and economic conditions, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions. For instance, we intend to reach pan India to sell our products. The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets. By expanding into new geographical regions, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

29. *We propose to utilize a portion of the Net Proceeds to undertake acquisitions for which targets have not been identified. Our inability to complete such transactions may adversely affect our competitiveness and growth prospects and our proposed deployment of the Net Proceeds with respect to unidentified acquisitions are based on management estimates and the same have not been independently appraised by a bank or a financial institution.*

We intend to utilize our Net Proceeds towards pursuing inorganic initiatives. The amount of Net Proceeds identified for acquisitions is based on our management's estimates. The actual deployment of funds will depend on a number of factors, including the timing, nature, size and number of strategic initiatives undertaken, as well as general factors affecting our results of operation, financial condition and access to capital. The portion of the Net Proceeds allocated towards the acquisitions and strategic initiatives may not be the total value or cost of any acquisitions but is expected to provide us with sufficient financial leverage to enter into binding agreements. As on the date of this Prospectus, we have not entered into any definitive agreements towards any future acquisitions or strategic initiatives.

The Objects of the Offer have not been appraised by any bank or financial institution, and our funding requirement is based on current conditions, internal estimates and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy. Based on the competitive nature of our industry, we may have to revise our acquisition plans from time to time and consequently our funding requirements may also change. Moreover, any failure or delay on our part to identify a suitable and appropriate target entity in a time bound manner may also have an adverse effect on the interests of the Company. The investors in the Equity Shares will be relying on the judgment of our management regarding the application of the Net Proceeds and identifying a suitable and appropriate target business entity for the purpose of acquisition.

Our Company, in accordance with the applicable law and to attain the objects set out above, will have the flexibility to deploy the Net Proceeds. Pending utilisation of the Net Proceeds for the purposes described above, our Company may temporarily deposit the Net Proceeds within one or more scheduled commercial banks included in the Second Schedule of Reserve Bank of India Act, 1934 as may be approved by our Board. At this stage, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Sections 13(8) and 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations. Further, our Promoter would be liable to provide an exit opportunity to shareholders who do not agree with our

proposal to change the objects of the Offer or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement of our Promoter to provide an exit opportunity to such dissenting shareholders may deter the Promoters' from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoter of our Company will have adequate resources at its disposal at all times to enable it to provide an exit opportunity at the price prescribed by SEBI.

31. The Company has availed insurance cover for Furniture and Fixtures, Plant and Machinery, Raw Material etc., however, it may be inadequate to protect us fully from all losses and damages which in turn would adversely affect our financial condition and results of operations.

The Company has availed various insurance policies such as transit insurance, fire and burglary insurance, equipment insurance, covering the future unforeseen liabilities that might occur in the normal course of business. However, there can be no assurance that the insurance policies will adequately cover losses and damages which may be suffered by us. Losses suffered by our Company in excess of the availed insurance coverage or due to occurrence of unforeseen events will have to be borne by our Company itself. Also, there cannot be any assurance that all claims made by the Company will be honoured duly by the insurers. If our claims are not fully honoured, our financial condition may be affected adversely. There have been no instances in the past in the company. For further details, kindly refer section titled "Our Business – Insurance" on page 127 of this Prospectus.

32. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively or at all. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

33. Changes in technology may impact our business by making our products or services less competitive or obsolete or require us to incur additional capital expenditures.

Our future success will depend in part on our ability to respond to technological advances and emerging industry standards and practices on a cost-effective and timely basis. Changes in technology may make newer products and services more competitive than ours or may require us to incur additional capital expenditures to upgrade our technology, innovations, research and development facilities in order to provide newer products or services. If we are unable to adapt our technology in a timely manner to changing market conditions, client requirements or technological changes, our business, financial performance and the results of operations could be affected.

34. In addition to normal remuneration or benefits and reimbursement of expenses, some of our Directors and key managerial personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Our Directors and Key Managerial Personnel are not only interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and Key Managerial Personnel may also be interested to the extent of their shareholding and dividend entitlement in our Company. For further information, see "Capital Structure" and "Our Management" on page no. 74 and 182, respectively, of this Prospectus.

35. *Our Promoters, together with our Promoter Group, will continue to retain majority shareholding in our Company after the proposed Initial Public Issue, which will allow them to exercise significant control over us. We cannot assure you that our Promoters and Promoter Group members will always act in the best interests of the Company.*

After the completion of our Initial Public Issue, our Promoters, along with our Promoter Group members, will hold, approximately 65.00% of our post issue paid up equity capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholders. By exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company. We cannot assure you that our Promoters and Promoter Group members will always act in our Company's or your best interests. For further details, please refer to the chapters titled "Capital Structure" and "Our Promoter and Promoter Group" and "Our Group Company" beginning on page no. 201 and 208 respectively, of this Prospectus.

36. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "Dividend Policy" on page no. 211 of this Prospectus.

37. *The objects of the Issue include funding working capital requirements of our Company, which is based on certain assumptions and estimates.*

The objects of the Offer include funding working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, please see "Objects of the Issue" on page 86 of this Prospectus

Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

38. *Significant security breaches in our computer systems and network infrastructure, fraud, systems failures and calamities would adversely impact our business.*

We are required to protect our computer systems and network infrastructure from physical and online break-ins as well as security breaches and other disruptive problems caused by our increased internet connectivity. Computer break-ins and power disruptions could affect the security of information stored in and transmitted through these computer systems and networks. These concerns will intensify with our increased dependence on technology. We employ security systems, including firewalls and password encryption, designed to minimize the risk of security breaches but there can be no assurance that these security measures will be successful. Breaches of our security measures could affect the security of information stored in and transmitted through these computer systems and network infrastructure. A significant failure in security measures could have a material adverse effect on our business and our future financial performance. There have been no instances in the past in the company.

39. *We are subject to the risk of failure of, or a material weakness in, our internal control systems.*

We are exposed to risks arising from the inadequacy or failure of internal systems or processes, and any actions we may take to mitigate these risks may not be sufficient to ensure an effective internal control environment. Given our high volume of transactions, errors may be repeated or compounded before they are discovered and rectified. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. As a result, we may incur expenses or suffer monetary losses, which may not be covered by our insurance policies and may result in a material effect on our business, financial condition and results of operations.

40. There have been certain instances of non-compliances in respect of Tax / ROC / Employee benefit related filing or payments.

In the past, there have been certain instances of delays in filing statutory forms, such as AOC 4, MGT 7, ADT-3, ADT1 as per the reporting requirements Companies Act, 2013 with the RoC and delay in filing of GST returns, payment of taxes, filing of EPFO returns etc., which have been subsequently filed by payment of an additional fees / interest / penalties as prescribed in the Companies Act, 2013 and other applicable regulations. Reasons for delay in Statutory filing-

- i. ROC related filings- In the earlier years, the company didn't have Company Secretary who can take care of the data related to the specific technical forms such as MGT-14, DPT-3 etc, which leads to untimely preparation of data and not providing the same in time to the consultants which leads to delay in filing of ROC related forms.

Corrective Steps- Currently, the company has a full time Khushboo Nilesh Rawat, Company Secretary as compliance officer who has the responsibility of timely preparation of data and filing of necessary ROC forms.

- ii. GST filings & payments- Earlier the company was not getting the required data from its few vendors related to Purchases and ITC on time and also in a few instances the vendors also delayed their respective filing which led to decrease in the ITC amount. Due to these issues the company took time to reconcile these mismatches and the company had to pay the extra GST amount every month which led to delay in the filing of returns.
The management runs its operations frugally and does not resort to bank borrowings to meet its gaps in cash flow management and makes payment to the authority on receiving commensurate payment from its operations. This also has led to delays in payments to regulators.

Corrective Steps- Currently, the company has appointed SLC as the CFO of the company who has the responsibility of ensuring such delay do not happen in future. The company has adopted a strategy where the company will make the GST payment to the vendors only when they will give all the data related to purchases on time and when the GST will reflect in company's GSTR-2B, then only, the company shall release the GST payment which will help the company to avoid double payment of GST and also, to make the payment to Government on time and regularise the filing of returns within the due dates.

- iii. Professional Tax – Professional Tax Periodicity for FY 23 was on Annually basis, so we assume that the periodicity is unchanged for FY 24, because on portal updated periodicity is not shown however in order to reduce our professional tax liability we made some advance payment in Aug 23.

We have not been issued any notice for any of the above referred defaults but in future we may get notices for these discrepancies. Therefore, we cannot confirm that no action from authorities would be taken against the Company pursuant to the above explained instances which may adversely affect our business and financial operations.

The Company has called a Board Meeting on 07.10.2024 specifically to form a committee who will address the following:

- Timely providing the data to the concerned person who is filing the respective statutory forms;
- Payment of Statutory dues and filing of the forms within the due date;
- Timely response of all the statutory notices; and
- In every 45 days the committee will give a review to the Board.

The Committee has three members:

Sr No.	Name of the Member	Designation
1	Paras Tushar Shah (Chairman)	Non-executive Independent Director
2	Premal Niranjana Shah (Member)	Managing Director
3	Shankar Laxman Chalke (Member)	CFO

41. Customers may cancel their purchase orders of our products despite their deposit payment, thus harming our business, prospects, financial condition and results of operations.

Customer issue purchase orders for our products which may not result in actual purchase. Customers may cancel their purchase orders for reasons beyond our control, such as changes in their preferences, their perception of the quality of our products and their financial situation. Further, the wait period from order confirmation to delivery is generally between 30 to 60 days and in some instances even longer, which may impact customer purchase decisions. If we encounter delays in the deliveries of our products a significant number of orders may be cancelled. We may, in the future, also experience a higher level of customer cancellations, such as due to changes in government incentive schemes. The cancellation of a fully paid and confirmed purchase order would cause a lesser outflow of funds than the cancellation of a purchase order for which the customer has placed a nominal deposit, resulting in a greater impact on our results of operations. Such occurrences could materially and adversely

affect our business, prospects, financial condition, results of operations and cash flows. We may experience a higher rate of cancellations on pre-orders than on confirmed orders for which customers have paid in full. There have been no instances in the past in the company.

42. Risk relating to unregistered Lease and License agreement.

Our company operates on leased property for certain operations and lease agreements for our warehouse have not been registered with the relevant authorities. Under applicable laws, the failure to register lease agreements may result in limited enforceability of the lease in courts, and the company could face potential legal challenges or disputes over the validity of the lease. This may also expose us to risks, such as the lessor's ability to challenge the lease terms, including rent, lease tenure, or other critical provisions, which could adversely affect our operations.

Additionally, non-registration may lead to challenges in securing financing or government approvals related to the leased property, as lenders or authorities may require a registered lease agreement as part of their due diligence. If we are unable to register these lease agreements in a timely manner or if any disputes arise as a result, it could materially affect our business, financial condition, and results of operations.

43. We have contingent liabilities and capital commitments. Our financial condition could be adversely affected if any of these contingent liabilities or capital commitments materialize.

As of September 30, 2024, we had disclosed the following contingent liabilities (as per Ind AS 37) in the Restated Summary Statements:

(₹ in lakhs)

Contingent liabilities and commitments	For the period ended	For the year ended		
	September 30, 2024	March 31, 2024	March 31, 2023	March 31, 2022
	Consolidated	Consolidated	Consolidated	Standalone
Contingent liabilities (to the extent not provided for)				
a Bank Guarantees opened with banks	3.62	9.03	-	-
b GST Demand Notice u/s 73	21.92	21.92	-	-
Commitments				
Estimated amount of contracts remaining to be executed on capital account and not provided for (net of advances)	-	-	-	-

We cannot assure you that we will not incur similar or increased levels of contingent liabilities in the future. If any of these contingent liabilities materialize or if at any time we are compelled to pay all or a material proportion of these contingent liabilities, our financial condition and results of operation may be adversely affected.

44. We may need to seek additional financing in the future to support our growth strategies. Any failure to raise additional financing could have an adverse effect on our business, results of operations, financial condition and cash flows.

We will continue to incur significant expenditure in maintaining and growing our existing infrastructure, developing and implementing new technologies as part of our platform and solutions. In past we have successfully raised funds to meet the business requirements and as part of our strategy to grow our business may require us to raise additional funds for our long-term business plans. We cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. If our internally generated capital resources and available credit facilities are insufficient to finance our capital expenditure and growth plans, we may, in the future, have to seek additional financing from third parties,

including banks, venture capital funds, joint-venture partners and other strategic investors. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. Our financing agreements may contain terms and conditions that may restrict our ability to operate and manage our business, such as terms and conditions that require us to maintain certain pre-set debt service coverage ratios and leverage ratios and require us to use our assets, including our cash balances, as collateral for our indebtedness. If we are unable to obtain such financing in a timely manner, at a reasonable cost and on acceptable terms or at all, we may be forced to delay our expansion plans, downsize or abandon such plans, which may materially and adversely affect our business, financial condition and results of operations, as well as our future prospects. We may also be required to finance our growth, whether organic or inorganic, through future equity offerings, which may lead to the dilution of investors' shareholdings in us. See, "– Any future issuance of Equity Shares, or convertible securities or other equity linked instruments by us may dilute your shareholding and sale of Equity Shares by shareholders with significant shareholding may adversely affect the trading price of the Equity Shares." below. We may also be restrained from raising funds from foreign investors as a result of regulatory policies and frameworks.

45. Our funding requirements and the proposed deployment of Net Proceeds are based on management estimates and we have not entered into any definitive arrangements to utilize certain portions of the Net Proceeds of the Offer.

Our funding requirement is based management estimates, current circumstances of our business and prevailing market conditions, which are subject to changes due external factors, such as financial and market conditions, market feedback and demand of our products, competition, business strategy and interest/exchange rate fluctuations, which may not be within the control of our management. The objects of the Offer have not been appraised by any bank or financial institution. Based on the competitive nature of our industry, we may have to revise our business plan and/or management estimates from time to time and consequently our funding requirements may also change. Such internal estimates may differ from the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our expenditure, subject to applicable laws. In case of increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by any means available to us, including internal accruals and additional equity and/or debt arrangements, and may have an adverse impact on our business, results of operations, financial condition and cash flows. Accordingly, investors in our Equity Shares will be relying on the judgment of our management regarding the application of the Net Proceeds.

Further, pursuant to Section 27 of the Companies Act and other applicable law, any variation in the Objects of the Offer would require a special resolution of the shareholders and the promoter or controlling shareholders will be required to provide an exit opportunity to the shareholders who do not agree to such proposal to vary the Objects of the Offer, at such price and in such manner in accordance with applicable law.

Our Company, in accordance with the applicable law and to attain the objects set out above, will have the flexibility to deploy the Net Proceeds. Pending utilization of the Net Proceeds for the purposes described above, our Company may temporarily deposit the Net Proceeds within one or more scheduled commercial banks included in the Second Schedule of Reserve Bank of India Act, 1934 as may be approved by our Board.

46. Breaches in data security, failure of information security systems and privacy concerns could adversely impact our financial condition, subject us to penalties, damage our reputation and brand, and harm our business, prospects, results of operations and cash flows.

We expect to face significant challenges with respect to information security and privacy, including in relation to the collection, storage, transmission and sharing of personal and sensitive information of our employees and customers, including names, accounts, customer IDs and passwords and payment or transaction related information. There have been no instances in the past in the company. We have implemented remedial measures in response to such potential incidents. We cannot guarantee that such measures will prevent all incidents in the future.

We may face difficulties or delays in identifying or otherwise responding to any attacks or actual or potential security breaches or threats. A breach in our data security could create system disruptions or slowdowns and provide malicious parties with access to information including information on our product lines stored on our networks, resulting in data being publicly disclosed, altered, lost, or stolen, which could subject us to liability and adversely impact our financial condition. Such access could adversely impact the safety of our employees and customers.

Further, we also face risks relating to compliance with applicable laws, rules and regulations relating to the collection, storage, use, sharing, disclosure, protection and security of personal information, as well as requests from regulatory and government authorities relating to such data. These laws, rules, and regulations evolve frequently, and their scope may continually change, through new legislation, amendments to existing legislation, and changes in enforcement. In addition, many laws and regulations relating to privacy and the collection, storage, sharing, use, disclosure, and protection of certain types of data are subject to varying degrees of enforcement and new and changing interpretations by courts or regulators. For instance, in order to ensure data privacy, our Company is required to ensure compliance with the Information Technology Act, 2000 (“IT Act”) and the rules notified thereunder, including the information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011 (“Privacy Rules”), which prescribe, inter alia, direction for collection, disclosure, transfer and protection of sensitive personal data. Further, the Government of India recently enacted the Digital Personal Data Protection Act, 2023 (“Data Protection Act”), which received President’s assent on August 11, 2023. The Act shall come in force on such date as the Central Government may, by notification in the Official Gazette, appoint and different dates may be appointed for different provisions of this legislation. The Data Protection Act, when notified, would require data fiduciaries (persons who alone or in conjunction with other persons determine purpose and means of processing of personal data), such as us, to implement organizational and technical measures to ensure compliance with obligations imposed under the Data Protection Act, protect personal data and impose reasonable security safeguards to prevent breach of personal data and establish mechanism for redressal of grievances of data principals. In case we are notified as a significant data fiduciary under the Data Protection Act, we may have additional obligations imposed on us. Overall, changes in laws or regulations relating to privacy, data protection, and information security, particularly any new or modified laws or regulations, such as the General Data Protection Regulation (“GDPR”) adopted by the European Union (“EU”), or changes to the interpretation or enforcement of such laws or regulations, that require enhanced protection of certain types of data or new obligations with regard to data retention, transfer, or disclosure, could require us to modify our existing systems or invest in new technologies to ensure compliance with such applicable laws, which may require us to incur additional expenses. Any actual, alleged or perceived failure to prevent a security breach or to comply with our privacy policies or privacy-related legal obligations, failure in our systems or networks, or any other actual, alleged or perceived data security incident we or our suppliers suffer, could result in damage to our reputation, negative publicity, loss of customers and sales, loss of competitive advantages over our competitors, increased costs to remedy any problems and provide any required notifications, including to regulators and/or individuals, and otherwise respond to any incident, regulatory investigations and enforcement actions, costly litigation such as civil claims including representative actions and other class action type litigation, and other liabilities.

In addition, we may incur significant financial and operational costs to investigate, remediate and implement additional tools, devices and systems designed to prevent actual or perceived privacy breaches and other privacy incidents, as well as costs to comply with any notification obligations resulting from any such incidents. Any of these negative outcomes could adversely impact the market perception of our products and customer and investor confidence in our company, and would materially and adversely affect our business, prospects, financial condition, results of operations, and cash flows.

47. In addition to normal remuneration, other benefits, and reimbursement of expenses of our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Some of our Directors (including our Promoter) and Key Management Personnel may be interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, incentives or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Promoter & our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Promoter and Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Promoter and Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects. For further details of our transactions or interests of our Promoter / promoter group, please refer the sections titled “Our Promoter and Promoter Group” and “Group Entities of our Company”, “Related Party Transactions” and “Restated Financial Statements” beginning on page nos. 201, 208, 210 and 212 respectively, of this Prospectus.

48. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties, and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may end in writing-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected. There has been no instances in the past in the company.

49. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators, and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge, and we cannot assure that we will be able to do so in a timely manner.

50. *Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.*

Our Company is incorporated in India, and our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include: -

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters
- prevailing regional or global economic conditions, including in India's principal export markets; and
- Other significant regulatory or economic developments in or affecting India or its IT sector.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition and the price of the Equity Shares

EXTERNAL RISK FACTORS

51. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

52. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

53. Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards.

Our Company currently prepares its annual financial statements under Ind AS. The MCA, Government of India, has, through a notification dated February 16, 2015, set out the Indian Accounting Standards (Ind AS) and the timelines for their implementation. In accordance with such notification, our Company is required to prepare its financial statements in accordance with Ind AS. Ind AS is different in many aspects from Ind AS under which our financial statements are currently prepared. Accordingly, the degree to which the restated financial statements included in the Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in the Prospectus should accordingly be limited.

54. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic, or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition, and results of operations, in particular.

55. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Global pandemics or epidemics, or fear of spread of contagious diseases, such as Ebola or Nipah virus disease, coronavirus disease 2019 ("COVID-19"), Middle East respiratory syndrome, severe acute respiratory syndrome, H1N1 flu, H7N9 flu, and avian flu could disrupt our business operations, reduce or restrict our supply of materials and services, incur significant costs to protect our employees and facilities, or result in regional or global economic distress, which may materially and adversely affect our business, financial condition, and results of operations. Actual or threatened war, terrorist activities, political unrest, civil strife, and other geopolitical uncertainty could have a similar adverse effect on our business, financial condition, and results of operations. Any one or more of these events may impede our production and

delivery efforts and adversely affect our sales results, which could materially and adversely affect our business, financial condition and results of operations.

Any future global spread of the COVID-19 pandemic may result in global economic distress, and the extent to which it may affect our results of operations will depend on future developments, which are highly uncertain and cannot be predicted. We cannot assure you that the COVID-19 pandemic can be eliminated or contained in the near future, or at all, or a similar outbreak will not occur again. If the COVID-19 pandemic and the resulting disruption to our business were to extend over a prolonged period, it could materially and adversely affect our business, financial condition, and results of operations.

We are also vulnerable to natural disasters, including but not limited to hurricanes, earthquakes, tsunamis, fires and other calamities. We cannot assure you that any backup systems will be adequate to protect us from the effects of such unexpected events. Any of the foregoing events may give rise to interruptions, damage to our property, delays in production, breakdowns, system failures, technology platform failures, or internet failures, which could cause the loss or corruption of data or malfunctions of software or hardware as well as adversely affect our business, financial condition, and results of operations.

56. Changing regulations in India could lead to new compliance requirements that are uncertain.

The regulatory and policy environment in which we operate is evolving and is subject to change. The Government of India may implement new laws or other regulations and policies which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition, cash flows and results of operations. Furthermore, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Any changes to such laws, including the instances mentioned below, may adversely affect our business, financial condition, results of operations, cash flows and prospects.

Additionally, the Government of India has introduced (a) the Code on Wages, 2019 (“**Wages Code**”); (b) the Code on Social Security, 2020 (“**Social Security Code**”); (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 (Collectively, the “**Labour Codes**”) which consolidate, subsume and replace numerous existing central labour legislations. The Government of India has deferred the effective date of implementation of the respective Labour Codes, and they shall come into force from such dates as may be notified. Different dates may also be appointed for the coming into force of different provisions of the Labour Codes. While the rules for implementation under these codes have not been notified in its entirety, as an immediate consequence, the coming into force of these codes could increase the financial burden on our Company, which may adversely impact our profitability. We are yet to determine the impact of all or some such laws on our business and operations which may restrict our ability to grow our business in the future. For example, the Social Security Code aims to provide uniformity in providing social security benefits to the employees which was earlier segregated under different acts and had different applicability and coverage. Furthermore, the Wages Code limits the amounts that may be excluded from being accounted toward employment benefits (such as gratuity and maternity benefits) to a maximum of 50% of the wages payable to employees. The implementation of such laws has the ability to increase our employee and labour costs, thereby adversely impacting our results of operations, cash flows, business and financial performance.

Unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations, financial condition, cash flows and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

Additionally, if we are affected, directly or indirectly, by the application or interpretation of any provision of such laws and regulations or any related proceedings, or are required to bear any costs in order to comply with such provisions or to defend such proceedings, our business and financial performance may be adversely affected.

57. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Prospectus.*

While facts and other statistics in the relating to India, the Indian economy, and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the section titled “Industry Overview” beginning on page 111 of this Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

58. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI, or any other government agency can be obtained on any particular terms or at all.

59. *If inflation rises in India, increased costs may result in a decline in profits.*

Inflation rates could be volatile and we may continue to face high inflation in the future as India had witnessed in the past. Increasing inflation in India can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, salaries, and other expenses relevant to our business, which may adversely affect our business and financial condition. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our operating expenses, which we may not be able to pass on to customers, whether entirely or in part, and the same may adversely affect our business and financial condition. Further, high inflation leading to higher interest rates may also lead to a slowdown in the economy and adversely impact credit growth. If we are unable to increase our revenues sufficiently to offset our increased costs due to inflation, it could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows.

While the Government of India has previously initiated economic measures to combat high inflation rates, it is unclear whether these measures will remain in effect, and there can be no assurance that Indian inflation levels will not rise in the future.

60. *Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (“ASM”) and Graded Surveillance Measures (“GSM”) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.*

SEBI and the Stock Exchanges have introduced various pre-emptive surveillance measures in order to enhance market integrity and safeguard the interests of investors, including ASM and GSM. ASM and GSM are imposed on securities of companies based on various objective criteria such as significant variations in price and volume, concentration of certain client accounts as a percentage of combined trading volume, average delivery, securities which witness abnormal price rise not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net worth, price / earnings multiple, market capitalization etc.

Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors which may result in high volatility in price, low trading volumes, and a large concentration of client accounts as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or

other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchanges for placing our securities under the GSM and/or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchanges. These restrictions may include requiring higher margin requirements, requirement of settlement on a trade for trade basis without netting off, limiting trading frequency, reduction of applicable price band, requirement of settlement on gross basis or freezing of price on upper side of trading, as well as mentioning of our Equity Shares on the surveillance dashboards of the Stock Exchanges. The imposition of these restrictions and curbs on trading may have an adverse effect on market price, trading and liquidity of our Equity Shares and on the reputation and conditions of our Company.

61. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

62. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition, and results of operations as well as the price of the Equity Shares.

63. Terrorist attacks, civil unrest and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition, and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, and other countries and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade the global equity markets as well generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

ISSUE SPECIFIC RISKS

64. The Equity Shares of our company have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for our Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Our Company and the Lead Manager have appointed Giriraj Stock Broking Private Limited as Designated Market Maker for the Equity Shares of our Company. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in the Emerge Platform of NSE, securities markets in other jurisdictions, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

65. Our Promoter will be able to exercise substantial control over our Company and may have interests that are different from those of our other Shareholders.

Upon completion of this offering, our Promoters, Premal Niranjana Shah, Ragesh Deepak Bhatia, Ravishankar Sriramamurthi Malla and Minesh Anilbhai Chovatia will approximately hold 66.98% collectively of our outstanding shares of common stock as the controlling Shareholder. Our promoters will hold 75,05,530 equity shares representing 66.98% of our post-offer issued and paid up equity share capital, on a fully diluted basis. As a result, our Promoter will be able to exercise a significant level of control over all matters requiring shareholder approval, including the election of directors, amendment of our constitutional documents and approval of significant corporate transactions and any other approvals which require a majority vote of shareholders eligible to vote. This control could have the effect of delaying or preventing a change of control of our Company or changes in management and will make the approval of certain transactions difficult or impossible without the support of such Controlling Shareholder. The interests of our Promoter could conflict with our interests or the interests of our other Shareholders. While the actions carried out by our Company post-listing will be subject to Board and Shareholder approval, as required under the Companies Act, 2013, and the SEBI Listing Regulations, any such conflict may adversely affect our ability to execute our business strategy or to operate our business.

66. Any future issuance of Equity Shares, or convertible securities or other equity linked securities by our Company may dilute the shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute the shareholding, which may have adverse bearing on the trading price of the Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge, or encumber their Equity Shares in the future.

67. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

68. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

69. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the NSE Emerge in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the NSE Emerge. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

70. Any future issuance of Equity Shares may dilute your shareholding and sale of our Equity Shares by our Promoter or other shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issuances by us, including in a primary offering, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

71. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

72. Our Equity Shares have never been publicly traded and after this offering, our Equity Shares may experience price and volume fluctuations and an active trading market for our Equity Shares may not develop. Further, this offering Price may not be indicative of the market price of our Equity Shares after this offering.

Prior to this Offer, there has been no public market for our Equity Shares. We cannot assure you that an active trading market for our Equity Shares will develop or be sustained after this Offer. The Offer Price of our Equity Shares is proposed to be determined by our Company, in consultation with the Selling Shareholders and the Lead Manager through a fixed price process and may not be indicative of the market price of our Equity Shares at the time of commencement of trading of our Equity Shares or at any time thereafter. The market price of our Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the industry we operate in, developments relating to India and volatility in the stock exchanges and securities markets elsewhere in the world. These broad market fluctuations and industry factors may materially reduce the market price of our Equity Shares, regardless of our Company's Performance. In addition, following the expiry of the one-year locked-in period on certain portions of the pre-Offer Equity Share capital, the pre-Offer shareholders may sell their shareholding in our Company, depending on market conditions and their investment horizon. Any perception by investors that such sales might occur could additionally affect the trading price of our Equity Shares. Consequently, the price of our Equity Shares may be volatile, and you may be unable to sell your Equity Shares at or above the Offer Price, or at all. A decrease in the market price of our Equity Shares could cause investors to lose some or all of their investment.

73. Investors may be subject to Indian taxes arising out of income arising on the sale of and dividend on our Equity Shares.

Capital gains arising from the sale of our Equity Shares are generally taxable in India. Any gain realized on the sale of our Equity Shares on a stock exchange held for more than 12 months is subject to long term capital gains tax in India. Such long-term capital gains exceeding Rs. 1,00,000 arising from the sale of listed equity shares on a stock exchange subject to tax at a rate of 10% (plus applicable surcharge and cess). A security transaction tax ("STT") will be levied on and collected by an Indian stock exchange on which our Equity Shares are sold. Any gain realized on the sale of our Equity Shares held for more than 12 months by an Indian resident, which are sold other than on a recognized stock exchange and as a result of which no STT has been paid, will be subject to long-term capital gains tax in India. Further, any gain realized on the sale of our Equity Shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to short-term capital gains tax at a higher rate compared to the transaction where STT has been paid in India. Capital gains arising from the sale of our Equity Shares will be exempt from taxation in India in cases where an exemption is provided under

a treaty between India and the country of which the seller is a resident.

As a result, subject to any relief available under an applicable tax treaty or under the laws of their own jurisdictions, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of our Equity Shares.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. The Finance Act, 2020, has, inter alia, amended the tax regime, including a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, and that such dividends are likely to be subject to tax deduction at source. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

74. We cannot assure that prospective investors will be able to sell immediately on an Indian stock exchange any of our Equity Shares they purchase in the Offer.

In accordance with Indian law and practice, final approval for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Offer and until our Equity Shares have been issued and allotted. Such approval will require the submission of all other relevant documents authorizing the issuance of our Equity Shares. In accordance with current regulations and circulars issued by SEBI, our Equity Shares are required to be listed on the Stock Exchanges within a prescribed time. Accordingly, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all and there could be a failure or delay in listing our Equity Shares on the Stock Exchanges, which would adversely affect your ability to sell our Equity Shares.

75. Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian Law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as shareholders of an entity in another jurisdiction.

76. Global economic, political, and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

Requirement of Funds and Utilization of Net Proceeds

Our funding requirements are dependent on a number of factors which may not be in the control of our management, changes in our financial condition and current commercial conditions. Such factors may entail rescheduling and / or revising the planned expenditure and funding requirement and increasing or decreasing the expenditure for a particular purpose from the planned expenditure.

The Net Proceeds are proposed to be used in the manner set out in in the following table:

(₹ in lakhs)

Sr. No.	Particulars	Estimated Amount
1.	Purchase of Equipment and Renovation of Factory	2500.00
2.	Funding of working capital requirements of the Company	1000.00
3.	Pursuing Inorganic Growth ⁽²⁾	352.00

4.	General Corporate Expenses ⁽¹⁾⁽²⁾	584.00
----	--	--------

1. The amount to be utilised for general corporate purposes shall not exceed 25% of the Gross Proceeds of the Fresh Issue.
2. The amount for (i) general corporate purposes, and (ii) such objects where the issuer company has not identified acquisition or investment target, as mentioned in objects of the issue in the Prospectus, shall not exceed thirty-five per cent. of the amount being raised by the company.

The fund requirements mentioned above are based on internal management estimates of the Company and have not been verified by the Lead Manager or appraised by any bank, financial institution, or any other external agency. They are based on current circumstances of business and the Company may have to revise its estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment, cost of raw materials and interest or exchange rate fluctuations. Consequently, the fund requirements of the Company are subject to revisions in the future at the discretion of the management. In the event of any shortfall of funds for the activities proposed to be financed out of the issue proceeds as stated above, the Company may re-allocate the issue proceeds to the activities where such shortfall has arisen, subject to compliance with applicable laws. Further, in case of a shortfall in the issue proceeds or cost overruns, the management may explore a range of options including utilizing our internal accruals or seeking debt financing.

Proposed schedule of implementation and utilization of Net Proceeds

We propose to deploy the Net Proceeds for the aforesaid purposes in accordance with the estimated schedule of implementation and deployment of funds set forth in the table below:

(₹ in lakhs)

Sr. No.	Particulars	Amount to funded from Net Proceeds	Amount to be deployed from the Net Proceeds in Financial Year 2025	Amount to be deployed from the Net Proceeds in Financial Year 2026

2	Working Capital Requirements	1000.00	1000.00	-
3	Pursuing Inorganic Growth ⁽²⁾	352.00	-	352.00
4	General Corporate Purposes ⁽¹⁾⁽²⁾	584.00	-	584.00
	Total	4436.00	3500.00	936.00

Notes:

1. To be finalised upon determination of Issue Price. The amount shall not exceed 25% of the gross proceeds of the Issue.
2. The amount shall not exceed 25% of the gross proceeds of the Issue.
3. The amount for (i) general corporate purposes, and (ii) such objects where the issuer company has not identified acquisition or investment target, as mentioned in objects of the issue in the Prospectus, shall not exceed thirty-five per cent. of the amount being raised by the company.

Given the dynamic nature of our business, we may have to revise our funding requirements and deployment on account of a variety of factors such as our financial condition, business strategy and external factors such as market conditions competitive environment and interest or exchange rate fluctuations, logistics and transport costs, taxes and duties, interest and finance charges, working capital margin, regulatory costs, environmental factors and other external factors which may not be within the control of our management.

This may entail rescheduling or revising the planned expenditure and funding requirements, including the expenditure for a particular purpose, at the discretion of our management, subject to compliance with applicable law.

Moreover, if the actual utilisation towards any of the Objects is lower than the proposed deployment such balance will be used for general corporate purposes to the extent that the total amount to be utilized towards general corporate purposes will not exceed 25% of the gross proceeds from the Issue in accordance with the SEBI ICDR Regulations.

In case of a shortfall in estimates of raising requisite capital from the Net Proceeds or an increase in the total estimated cost of the Objects, business considerations may require us to explore a range of options including utilising our internal accruals and seeking additional debt from existing and future lenders. We believe that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilization of funds earmarked for the

purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in the Issue. To the extent our Company is unable to utilise any portion of the Net Proceeds towards the aforementioned objects as per the estimated schedule of deployment specified above, our Company shall deploy the Net Proceeds in subsequent Fiscals towards the aforementioned Objects.

Means of Finance

Our Company proposes to meet the entire requirement of funds for the objects of the Issue from the following means:

- Issue of Equity Shares through this Prospectus
- Internal Accruals of the Company

Accordingly, as required under the SEBI (ICDR) Regulations, we confirm that there is no requirement for us to make firm arrangements of finance through verifiable means towards at least 75% of the stated means of finance, excluding the amount to be raised from the Net Proceeds or through existing identifiable internal accruals.

The requirements of the objects detailed above are intended to be funded from the Proceeds of the Issue. Accordingly, we confirm that there is no requirement for us to make firm arrangements of finance under Regulation 230(1)(e) and 9 (C) of Part A of Schedule VI of SEBI (ICDR) Regulations, through verifiable means towards at least 75% of the stated means of finance, excluding the amount to be raised from the proposed public Issue or through existing identifiable internal accruals.

The fund requirement and deployment are based on internal management estimates and have not been appraised by any bank or financial institution. These are based on current conditions and are subject to change in light of changes in external circumstances or costs, other financial conditions, business, or strategy, as discussed further below.

In case of variations in the actual utilization of funds allocated for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in this Issue. If surplus funds are unavailable, the required financing will be through our internal accruals and/or debt.

We may have to revise our fund requirements and deployment as a result of changes in commercial and other external factors, which may not be within the control of our management. This may entail scheduling, revising, or cancelling the fund requirements and increasing or decreasing the fund requirements for a particular purpose from its fund requirements mentioned below, at the discretion of our management. In case of any shortfall or cost overruns, we intend to meet our estimated expenditure from internal accruals and/or debt. In case of any such re-scheduling, it shall be made by compliance of the relevant provisions of the Companies Act, 2013.

1	Trade Receivables	We expect debtors holding days to be around 90 days FY 2025 as compared to 88 days and 90 days in FY 2023 and FY 2024, respectively.
2	Inventories	We expect our inventories turnover days to be around 55 days for FY 2025 as compared to 38 days and 37 days in FY 2023 and FY 2024, respectively. With increase in size and scale of operations it is inherent for the company to maintain a higher inventory of raw materials specifically which facilitates the following:

		<ul style="list-style-type: none"> i) Faster execution of orders without lead time for raw material procurements also procuring larger quantity results in leading to lower transportation cost; ii) Gives the Company a competitive edge in orders requiring low turnaround time allowing to cash in on more opportunities; iii) Puts the company in ready position to cash in on opportunities; iv) Overall better efficiencies in operations as inventory will prevent any bottlenecks in production due to lack or shortage of raw materials, this will also lead to higher capacity utilization; v) Gives more flexibility for the company to develop new products.
3	Other Current Assets	<p>The main reason of increase in the requirements of net working capital as a percentage of revenue in the FY 2024 is owing to increase in Other Current Assets from ₹ 156.90 lakhs in FY 2023 to ₹ 337.02 lakhs in FY 2024 of which majorly has been an increase of ₹ 48.20 lakhs towards advances to employees and ₹ 132.13 lakhs towards current capital with LLP i.e. our subsidiary Progulf Warehousing Solutions LLP. The realisable days of Other Current Assets was 10 days in FY 2023 which has increased to 17 days in FY 2024 because of the above and the other reason of increase in the requirements of net working capital as a percentage of revenue in the FY 2024 is owing to decrease in Other Current Liabilities from ₹ 325.57 lakhs in FY 2023 to ₹ 126.33 lakhs in FY 2024 of which majorly has been employees benefit payable decrease from ₹ 128.63 lakhs in FY 2023 to ₹ 43.12 lakhs in FY 2024 and advance from customers has reduce from ₹ 141.77 lakhs in FY 2023 to ₹ 37.01 lakhs in FY 2024 owing to which there is a decrease in Other Current Liabilities days from 24 days in FY 2023 to 12 days in FY 2024. As we can see above, the increase working capital requirement based on an increase of 21% in year on year revenue was met through mainly operating profits generated from the operations of the company as company enhanced only ₹ 50 lakhs from CC Limits in FY 24 which is inadequate to meet the working capital requirements. We are attaching herewith the extract of the cash flow statement of FY 24 for ready reference. You will observe that ₹ 661.57 lakhs were operating profit before working capital changes and post the working capital changes and payment of tax, the cash generated from operations were ₹ 97.91 lakhs through efficient management of the company.</p>
Current Liabilities		
1	Trade Payables	<p>We expect our creditors payments days be around 88 days FY 2025 as compared to 98 days and 100 days in FY 2023 and FY 2024, respectively. By reducing credit days availed from the creditors, we can ensure better pricing thereby contributing to better margins, prompt deliveries and ensuring overall efficiency in our operations.</p> <p>A detailed analysis while comparing FY 22 to FY 23 shows the following:</p> <p>Increase in Trade payable from 69 days in FY 22 to 98 days in FY 23 which resulted in increase in Trade payables from ₹ 549.86 lakhs to ₹ 1,346.03 lakhs from FY 22 to FY 23 and in percentage of Cost of goods sold it has increased from 18.85% to 26.72% from FY 22 to FY 23 which is the main reason of decrease in the requirement of Net Working Capital from 13.29% to 7.58% from FY 22 to FY 23. The company has traditionally borrowed very little working capital and has depended on its cash flows for it's working capital requirements. Since the company grew in FY23 in comparison to FY22 by 68%, to manage the additional business and ensure customer satisfaction by supplying it's products in time, it had to manage its working capital requirement by taking additional credit from its suppliers, thereby increasing the trade payables. Other components of working capital are compensating with each other i.e. There has been a marginal decrease from FY 22 to FY 23 in the Trade Receivable and Inventory from i.e. 1.31% of revenue and 1.99% of Cost of goods sold respectively but the same is compensated with the decrease in other current liabilities from 10.30% in FY 2022 to 6.46% in FY 23 of Cost of goods sold. You will observe that ₹ 164.13 lakhs were operating profit before working capital</p>

	changes and post the working capital changes and payment of tax, the cash generated from operations were ₹ 159.15 lakhs through efficient management of the company.
--	--

As shown above the incremental working capital requirement is as follows:

(₹ in lakhs)

Working Capital Required in Fiscal 2025	1,956.73
Less: Working Capital Available till Fiscal 2024 from internal accruals	927.90
Additional Working Capital Gap for Fiscal 2025	1,028.83

3. Pursuing Inorganic Growth

We are on the lookout for small companies or start-ups working in the customised furniture and fixture or the Infrastructure space for acquisition within India for part or full equity acquisition of such company. We plan to acquire the company or enter a joint venture through infusion of equity. There are numerous start-ups which are working in this space on some innovation or the other. They may be self-funded but with limited resources, bootstrapped and may find it difficult to find an investor. We would like to invest in such companies and look at synergies to build on our sales and distribution network by utilising the technology to enhance our product portfolio.

Also, the company has been a manufacturer and provider to large retail stores in the past and has been dealing with MNCs and large corporate clients in India with no experience of tendering and supplies to Government. With the additional double door product for the metro fit to be used in the metro station requires pre-requisitions and eligibility to supply in this sector and fulfil Government orders. Our company's intent is to identify and acquire one such eligible company which will enable the company to directly supply and participate in tenders for the specific product.

The Company expects following benefits from such transactions:

- i. To build on our sales and distribution network by utilising the technology to enhance our product delivery; and
- ii. To enable our company to enter into new segments such as B2G which will enhance our customer portfolio.

As of now the Company has not defined any acquisition but we are in the process of evaluating and appointing a M&A specialist/company for identifying the target company. We may acquire the company wholly or partially with a minimum 26% stake in the target company.

The Company shall ensure to acquire a target with a 20% leeway over the capital allocated and the shortfall if any shall be arranged through internal accruals with no plan to leverage for the acquisition.

The strategy is to acquire in the same industry or segments supporting existing business model which may support the forward or backward integration for the company. The strategy is to acquire within the Domestic markets only. The Company has had a track record for partnering and identifying new areas for growth through its investment in Progulf Warehousing Solutions LLP in FY 22 to get into the new segment catering to the warehousing sector specifically. The management has considered the target size of around Rs. 3.52 crore for acquisition wholly/partially. Our Company undertake that the net proceeds shall not be utilized for acquisition from the Promoter, members of Promoter Group, affiliates or any other related parties of the Company.

Our Company proposes to utilise the fund towards unidentified acquisition by the next fiscal year 2025-26 in accordance with applicable laws. We undertake to temporarily invest the unutilised funds only with scheduled commercial banks.

Macroeconomic Overview

Global GDP is estimated to grow 3.0% in 2023 and 2024 amid concerns over the Russia-Ukraine conflict, elevated inflation and stress in the US financial sector. As per the International Monetary Fund’s (IMF) July 2023 update, global gross domestic product (GDP) growth is expected to moderate from 3.5% in 2022 to 3.0% in 2023 and 2024. The latest estimate is 0.2 percentage point higher for 2023 compared with IMF’s previous forecast in April, mainly due to easing of acute stress in the financial and banking sector and a resilient performance of the services sector across the globe. Economic slowdown compared with 2022 is expected to be mainly driven by distress in financial systems, broadening inflationary pressures, the Russia-Ukraine conflict and a slowdown in China. According to the IMF, the growth forecast for 2023 reflects the rise in central bank rates to fight inflation, especially in advanced economies as well as the impact of the war in Ukraine. The decline in growth in 2023 is driven by advanced economies; in emerging market and developing economies, growth is estimated to have bottomed out in 2022. Growth is expected to pick up in China with full reopening of the economy in 2023. The expected pickup in growth in 2024 in both emerging and advanced economies should be driven by a gradual recovery from the effects of the war in Ukraine and subsiding inflation.

As per the IMF update, achieving sustained disinflation has been the top priority for most economies amid the cost-of-living crisis. With tighter monetary conditions and lower growth potentially affecting the stability of financial and debt markets, reopening of the Chinese economy would safeguard the recovery and ease supply chain bottlenecks.

Significant scope for expansion

- The Indian retail sector is highly fragmented with more than 90% of its business being run by the unorganized retailers like the traditional family run stores and corner stores. The organized retail however is at a very nascent stage
- In 2022, traditional retail, organised retail and E-commerce segments accounted for 81%, 12% and 8% of the market, respectively.
- The Indian e-commerce industry is expected to cross US\$ 350 billion mark by 2030, growing at a CAGR of 23%.
- The organised retail market in India has 12% share of the total retail market and has a growth rate of 10% over 2021-32.
- Increasing demand for organized retail space has helped create a capacity of ~120 million square feet (MSF) in retail space across major Indian cities. Major Indian cities include Delhi (23.7 MSF) and Mumbai (16.7 MSF).
- The unorganised retail sector in India has a huge untapped potential for adopting digital mode of payments as 63% of the retailers are interested in using digital payments like mobile and card payments.
- Many fintech companies are competing for their presence in local stores. In May 2020, Paytm announced a US\$ 1 billion loyalty programme and launched online ledger services for kirana stores in India. Other fintech companies such as PayNearby, Phonepe, BharatPe and Mswipe introduced different services for small shop owners, enabling better digital payments and delivery options at these stores.

Growth of Organized Warehousing Space in India

The warehousing sector in India has undergone significant transformation in recent years. Driven by the rise of e-commerce, advancements in technology, and policy reforms, organized warehousing space has expanded rapidly.

India's warehousing industry is a critical component of the logistics sector, contributing to the efficient storage and distribution of goods. Traditionally, the sector was highly fragmented, dominated by small, unorganized players. However, with the advent of modern supply chain requirements, there has been a marked shift towards organized warehousing.

The organized warehousing sector in India was valued at approximately USD 12 billion in 2022 and is expected to grow at a compound annual growth rate (CAGR) of 20-25% over the next five years. The total warehousing space across India stood at around 265 million square feet in 2022, with organized space contributing to approximately 30% of this. The organized warehousing space is expected to reach 500 million square feet by 2025.

The exponential growth of e-commerce in India has been a major catalyst for the expansion of organized warehousing. E-commerce companies require large, efficient, and strategically located warehouses to manage inventory and ensure timely deliveries. The Indian government's focus on improving infrastructure, including the development of industrial corridors, dedicated freight corridors, and multimodal logistics parks, has further boosted the organized warehousing sector. India's relaxed FDI norms have attracted significant investment in the warehousing sector. Global players are increasingly entering the market, either through direct investment or joint ventures with Indian companies.

The growth of organized warehousing space has been uneven across the country, with certain regions witnessing more significant development.

- Western India: Regions like Mumbai, Pune, and Gujarat have seen substantial growth due to their strategic location and proximity to ports.
- Northern India: The National Capital Region (NCR) and Punjab are major hubs, driven by demand from e-commerce and retail sectors.
- Southern India: Bengaluru, Chennai, and Hyderabad are key markets, benefiting from the IT and electronics sectors.
- Eastern India: While relatively underdeveloped, cities like Kolkata are emerging as potential hubs due to their connectivity with Southeast Asia.

Challenges

Despite the rapid growth, the organized warehousing sector in India faces several challenges:

- Land Acquisition: Acquiring large tracts of land for warehousing is a significant hurdle due to complex regulations and high costs.
- Regulatory Bottlenecks: Variations in state-level regulations can create operational challenges for warehousing companies.
- Skilled Labor Shortage: There is a scarcity of skilled labor, particularly in handling modern warehousing technologies and systems.
- Infrastructure Deficits: While improving, infrastructure in certain regions still lags, affecting the efficiency of warehousing operations.

Technological Advancements

Technology is playing an increasingly important role in the organized warehousing sector. The adoption of automation, robotics, and data analytics is helping companies improve efficiency, reduce costs, and enhance customer satisfaction.

- Warehouse Management Systems (WMS): These systems are becoming standard in organized warehouses, helping manage inventory, streamline operations, and optimize space utilization.
- Automation and Robotics: The use of automated guided vehicles (AGVs), conveyor systems, and robotics is on the rise, particularly in large-scale warehouses catering to e-commerce.
- Cold Storage: With the growth of the pharmaceutical and food sectors, there is a rising demand for organized cold storage facilities, which require advanced temperature control technologies.

Future Outlook

The future of organized warehousing in India looks promising, with several trends likely to shape its evolution:

- **Increased Investment:** Continued domestic and international investment will drive further growth in organized warehousing.
- **Sustainability Focus:** Green warehousing, focusing on energy efficiency and sustainable practices, is expected to gain traction.
- **Expansion into Tier II and III Cities:** As demand grows, there will be increased development of organized warehousing space in smaller cities.
- **Digital Transformation:** The ongoing digital transformation in logistics and supply chain management will lead to further automation and integration of advanced technologies in warehousing operations.

The organized warehousing sector in India is on a robust growth trajectory, fueled by strong demand from e-commerce, favorable government policies, and technological advancements. While challenges remain, the sector's future is bright, with significant opportunities for investment and expansion in the coming years.

Growth of Metro Railways in India

The metro railway system in India has seen rapid expansion over the past two decades, significantly improving urban mobility in major cities. As India's urban population grows, the demand for efficient, reliable, and sustainable public transportation has driven significant investment in metro rail projects across the country.

Metro rail systems have become a critical component of urban infrastructure in India, offering solutions to traffic congestion, pollution, and the growing demand for public transport in densely populated cities.

- **Metro Networks:** As of 2024, India has over 800 kilometers of operational metro rail networks across 15 cities. This network includes approximately 1,500 stations that are operational across these cities.
- **Average Station Length:** The average length of a metro station in India is approximately 140-180 meters. This standard size accommodates trains with 6-8 coaches, ensuring efficient passenger flow and safety.
- **Growth Rate:** The metro rail sector has witnessed a compound annual growth rate (CAGR) of approximately 15-18% over the past decade, with significant investments from both the central and state governments.
- **Upcoming Projects:** Over the next three years, approximately 600 new metro stations are planned to be built, as part of the expansion of existing networks and the development of new metro systems in several cities. This will increase the total number of metro stations to over 2,100 by 2027.

Key Growth Drivers

1. Urbanization and Population Growth

India is witnessing rapid urbanization, with an increasing number of people migrating to cities in search of better opportunities. This has led to overcrowded roads, increased pollution, and a greater need for efficient public transportation. Metro rail systems, with their extensive networks of stations, offer a viable solution to these challenges.

2. Government Initiatives

The Indian government has played a pivotal role in the expansion of metro rail networks through policy support, funding, and collaboration with state governments. Programs like the Smart Cities Mission and AMRUT (Atal Mission for Rejuvenation and Urban Transformation) have also contributed to the growth of metro infrastructure, including the construction of new stations.

3. Environmental Concerns

Metro railways are seen as a sustainable mode of transportation that can help reduce carbon emissions and alleviate environmental issues associated with road traffic. The emphasis on creating green and energy-efficient metro systems, with well-planned station locations, has further accelerated their adoption.

4. Technological Advancements

The adoption of advanced technologies, such as automated fare collection systems, smart card ticketing, and driverless trains, has improved the efficiency and attractiveness of metro railways, encouraging more cities to invest in such systems and expanding the number of stations.

Regional Trends

The development of metro railways has been concentrated in a few major cities, but there is a growing trend of expanding metro networks to Tier-II cities.

- Northern India: Delhi NCR has the largest and most extensive metro network, with over 300 stations, and ongoing expansions to neighboring cities like Noida, Ghaziabad, and Gurgaon.
- Western India: Mumbai and Pune are key hubs, with significant investment in metro projects to ease the burden on the road and suburban rail networks. Mumbai Metro alone is expected to have over 200 stations by 2027.
- Southern India: Bengaluru, Chennai, and Hyderabad have well-established metro systems, with plans to increase the number of stations by 150 in the next three years.
- Eastern India: Kolkata, which was the first city in India to have a metro, continues to expand its network, with other cities like Bhubaneswar also planning metro systems that will add numerous new stations.

Challenges

Despite the rapid growth, the metro rail sector in India faces several challenges:

- High Capital Costs: Building metro rail networks, including the construction of stations, requires significant capital investment, often leading to financial strain on city governments.
- Land Acquisition: Acquiring land for metro projects is a major challenge, particularly in densely populated urban areas where land is scarce and expensive, affecting the timely construction of stations.
- Project Delays: Metro projects often face delays due to regulatory approvals, land acquisition issues, and funding constraints, which can delay the opening of new stations.
- Operational Sustainability: Maintaining financial sustainability is challenging due to high operational costs, low fare revenue, and the need for continuous investment in maintenance and upgrades, including station facilities.

Technological Advancements

Technology is playing an increasingly important role in the growth and efficiency of metro rail systems in India, particularly in station management and operations.

- Driverless Trains: Delhi Metro and Mumbai Metro have introduced driverless train operations on select routes, enhancing operational efficiency and reducing the need for human intervention at stations.
- Smart Ticketing Systems: The adoption of contactless smart card systems and mobile ticketing has made commuting more convenient for passengers and streamlined station operations.
- Energy-Efficient Systems: Metro systems are increasingly focusing on energy efficiency through regenerative braking, solar energy utilization, and green building practices for stations, contributing to overall sustainability.

Future Outlook

The future of metro railways in India is promising, with several trends likely to shape its evolution:

- Expansion into Tier-II Cities: There is a growing trend to expand metro rail networks to Tier-II cities, with projects planned in cities like Kanpur, Agra, and Bhopal, adding numerous new stations.
- Integration with Other Modes of Transport: Future metro projects will focus on integrating with other modes of transport, such as buses, suburban rail, and bicycle-sharing systems, to create a seamless urban mobility ecosystem, with strategically placed stations acting as multimodal hubs.
- Public-Private Partnerships (PPP): The government is encouraging public-private partnerships to fund and operate metro projects, including station development, reducing the financial burden on the public sector.
- Focus on Sustainability: Metro systems will increasingly adopt sustainable practices, including the use of renewable energy, water conservation, and waste management strategies, particularly in station design and operations.

The growth of metro railways in India is a testament to the country's commitment to improving urban infrastructure and providing sustainable transportation solutions. With over 1,500 stations already operational, averaging 140-180 meters in length, and plans to build 600 more in the next three years, the sector is poised for continued expansion. While challenges remain, the future of metro railways in India looks bright, driven by government support, technological advancements, and the increasing need for efficient urban mobility.

Usage of Sound Barriers on Bridges in India

1. Introduction

As urbanization and infrastructure development accelerate in India, noise pollution has become a significant concern, particularly in areas surrounding bridges and elevated roads. Sound barriers, also known as noise barriers or acoustic barriers, are increasingly being incorporated into bridge construction projects to mitigate the impact of traffic noise on nearby residential, commercial, and sensitive areas such as hospitals and schools. This report provides an overview of the usage of sound barriers on bridges in India, key drivers, challenges, and future trends.

2. Market Overview

Sound barriers are essential for controlling noise pollution, especially in densely populated urban environments. These barriers help in reducing the adverse effects of noise on human health, improve the quality of life, and ensure compliance with environmental regulations.

2.1 Current Adoption in India

Urban Areas: The adoption of sound barriers on bridges is more prevalent in major metropolitan cities like Mumbai, Delhi, Bengaluru, and Chennai. These cities face severe traffic congestion, and the construction of flyovers and elevated roads has increased the demand for noise mitigation measures.

Infrastructure Projects: Recent large-scale infrastructure projects, such as the Mumbai Coastal Road, the Delhi-Mumbai Expressway, and the Bengaluru-Mysuru Expressway, have incorporated sound barriers in their designs, especially in sections passing through residential areas.

Material Usage: Common materials used for sound barriers in India include precast concrete, metal, and transparent acrylic panels. These materials are chosen based on factors such as durability, aesthetic appeal, and the level of noise reduction required.

3. Key Growth Drivers

3.1 Urbanization and Infrastructure Development

Rapid urbanization has led to increased traffic on roads and bridges, particularly in urban areas. The construction of new flyovers and elevated roads to accommodate this growth has heightened the need for sound barriers to protect communities from noise pollution.

3.2 Environmental Regulations

India has stringent noise pollution regulations, especially in urban areas. The Ministry of Environment, Forest and Climate Change (MoEFCC) has set noise limits for different zones, and compliance with these standards often necessitates the use of sound barriers on bridges and other elevated structures.

3.3 Public Awareness and Health Concerns

Growing public awareness about the health impacts of noise pollution, such as stress, hearing loss, and sleep disturbances, has increased the demand for effective noise reduction measures. Communities living near bridges and elevated roads are increasingly advocating for the installation of sound barriers.

3.4 Technological Advancements

Advances in materials science and acoustic engineering have led to the development of more efficient and aesthetically pleasing sound barriers. Innovations such as transparent acoustic panels and green walls (vegetation-covered barriers) are gaining popularity, particularly in urban settings where both noise reduction and visual appeal are important.

4. Challenges

Despite the growing adoption of sound barriers on bridges in India, several challenges remain:

4.1 High Installation Costs

The cost of installing sound barriers, particularly those made from advanced materials or featuring aesthetic designs, can be significant. This is a major barrier to widespread adoption, especially in smaller cities and towns where budget constraints are a concern.

4.2 Maintenance Requirements

Sound barriers, particularly those made from materials like metal and acrylic, require regular maintenance to ensure they remain effective. Exposure to harsh weather conditions, pollution, and vandalism can reduce the lifespan of these barriers, leading to higher maintenance costs.

4.3 Aesthetic and Structural Integration

Integrating sound barriers into bridge designs in a way that is both effective and visually appealing can be challenging. Architects and engineers must balance acoustic performance with the overall aesthetic of the structure, as well as consider factors like wind load and structural stability.

4.4 Limited Awareness in Non-Metro Areas

While metro cities are increasingly adopting sound barriers, awareness and implementation in non-metro areas are still limited. Smaller cities may lack the technical expertise or financial resources to install and maintain effective sound barriers on bridges.

Regional Trends

The use of sound barriers on bridges varies significantly across different regions in India:

- Western India: Maharashtra, particularly Mumbai, has been a leader in the adoption of sound barriers, driven by the city's dense population and severe traffic congestion. The Mumbai Coastal Road project is a notable example where extensive use of sound barriers is planned.
- Northern India: Delhi NCR has also seen widespread use of sound barriers, particularly on major expressways and flyovers like the Delhi-Gurgaon Expressway. The city's air quality concerns have further driven the adoption of barriers that also reduce dust and pollution.
- Southern India: Bengaluru and Chennai are increasingly incorporating sound barriers into their infrastructure projects, though the adoption rate is slower compared to Mumbai and Delhi. The Bengaluru Metro expansion and elevated road projects are expected to include more sound barriers in the coming years.
- Eastern India: Kolkata and other cities in the eastern region are gradually adopting sound barriers, though the implementation is still in its early stages compared to other regions.

Future Outlook

The demand for sound barriers on bridges in India is expected to grow significantly over the next decade, driven by several factors:

Expansion of Urban Infrastructure: As more cities expand their road and bridge networks to accommodate growing populations, the need for sound barriers will increase, particularly in urban and peri-urban areas.

Technological Innovations: The development of cost-effective and low-maintenance materials for sound barriers, such as composite materials and vegetative barriers, will likely boost adoption in smaller cities and rural areas.

Government Incentives: Increased government support, in the form of subsidies or regulations mandating the use of sound barriers in certain areas, could further drive growth in this sector.

Sustainability Trends: As sustainability becomes a key consideration in infrastructure development, the use of green walls and other eco-friendly sound barriers is expected to rise, offering both noise reduction and environmental benefits.

The usage of sound barriers on bridges in India is poised for significant growth as urbanization continues and noise pollution becomes an increasing concern. While challenges such as high costs and maintenance remain, advances in technology and growing public awareness are likely to drive broader adoption. With ongoing infrastructure development across the country, particularly in metro areas, the demand for effective noise mitigation solutions, including sound barriers, will continue to rise.

The entire purchases of raw materials are sourced domestically and company does not import any raw materials during the past three financial years.

Our plants are located in close vicinity towards vendors and distributors of manufacturers through whom we meet the requirements for the raw materials used in the manufacturing of our products.

We procure more than 85% of our requirements from the local area by engaging with the distributors and dealers of established manufacturers of our raw materials. Sometimes, reaching out to the manufacturer may reduce overall costs for our company but dealing with their dealers and distributors ensures timely delivery at our doorsteps which is most critical for the smooth functioning of our business.

Our manufacturing process followed at our retail

We have been front runners in customizing product designs as per the requirement of our customers by innovating in product usage so as to meet the requirement in the least cost method without compromising on the longevity of the product.

1. Inquiry Generation:

We have an active client servicing and marketing department who are in touch with potential and existing customers. Leads are generated by our continuous interactions with them.

Interested potential customers are invited to visit our facilities and to take a look at our infrastructure along with systems and processes which ensure a high quality product.

We may or may not sign an NDA depending on the confidentiality and corporate processes required by the customer. Post that an initial meeting is held wherein a detailed brief is received from the customer, we also receive some drawings along with a sample or a material board. Basis this our design team makes 3D models and general product assembly drawings.

2. Prototyping stage:

A single prototype or a small pilot run is taken up before proceeding for any commercial production Any value engineering needed for efficiency is usually done at this stage and we make sure the materials and processes used are similar to what will be used in the in the final production run.

This unit would be verified by the customer at the factory or in the stores. Quality and aesthetics both are checked and confirmed by the client.

This is the basis for creating the BOQ for the costings and commercial closures.

3. Costing and commercials and Job Processing:

Basis the prototype approval, the Project team will determine the material and process costing to arrive at a quotation. This is usually sent to the procurement department for negotiations and cost closure. Post this, usually a purchase order is generated for the job on the basis of which an internal UJN (unique job number) is assigned to enable us to track jobs and order materials against this.

4. Manufacturing – Cutting/Punching

The raw material for all processes – metal and wood(MDF) panels or pipes is fist taken for cutting as per requisite design. For metal we use fibre laser cutting in sheets as well as pipes for high accuracy cuts across large production runs. In wood we have the option of straight cuts in our beam saw or non- linear cuts in our CNC machines. Small panels can also be cut manually on a panel saw.

Wooden panels would be either prelaminated or laminated int the heat press at our unit. The edges are often closed and finished using our through feed edge banding machines post cutting. In case of modular fixtures multi boring machine or cnc is used to bore holes for fitting.

For optimisation of raw materials, the nesting of all panels – programming - is done on the computer – resulting in lower wastage and faster production

5. Manufacturing – bending

We have multiple automated Japanese (and other) CNC bending machines to shaper the cut metal pieces. Bendig allows the metal to be folded and stiffens the panel to build the structure in all kinds of fixtures.

We also have tube bending machines for creating skeletal structures for various fixtures.

Amada machines we have are world class and offer consistent quality across large production runs.

6. Manufacturing – Welding and fabrication

Bent and cut metal parts and pipes can be welded (using heat) to form the final fixture structure. We have multiple types of welding depending on the structure and material Mig, Tig, and spot welding and even a laser welding system.

Wooden panels may be assembled by our carpentry team.

Structures may be fixed or modular to be assembled on site.

7. Coating and Painting

Metal parts are powder coated for colour aesthetics and longevity. We have a 9 tank pre-treatment process followed by a semiautomatic conveyer system for spraying and 2 mega ovens for heat bonding of the powder to the metal. We perform several quality tests for the coating to ensure the desired life, gloss and colour is consistently maintained.

Wooden panels requiring premium finish are painted in house – first sanding section followed by primer in the primer booth and finally top coat in our positive air pressure atmosphere controlled paint booth to ensure consistent and dust free quality.

8. Post production finishing.

Some fixtures or displays require LED light fitting or acrylic work to be added on for functionality or aesthetics. We also need to add digital prints to several of our displays for communicating the brand message. Acrylic is also usually cut on laser

We have 2 high resolution digital printers and laminator for providing accurate colour representation.

9. Quality check

The production supervisor and the project team (in some cases) carry out the necessary quality checks based on the nature of the job. this could include visual inspection, dimensional checking, drawing correlation and material or load testing

10. Packing and despatch

Shipping pan India requires optimal packaging to ensure safe and secure material movement. We use conventional corrugated packaging and foam and corner protection. Fragile material is always sent in wooden crates.

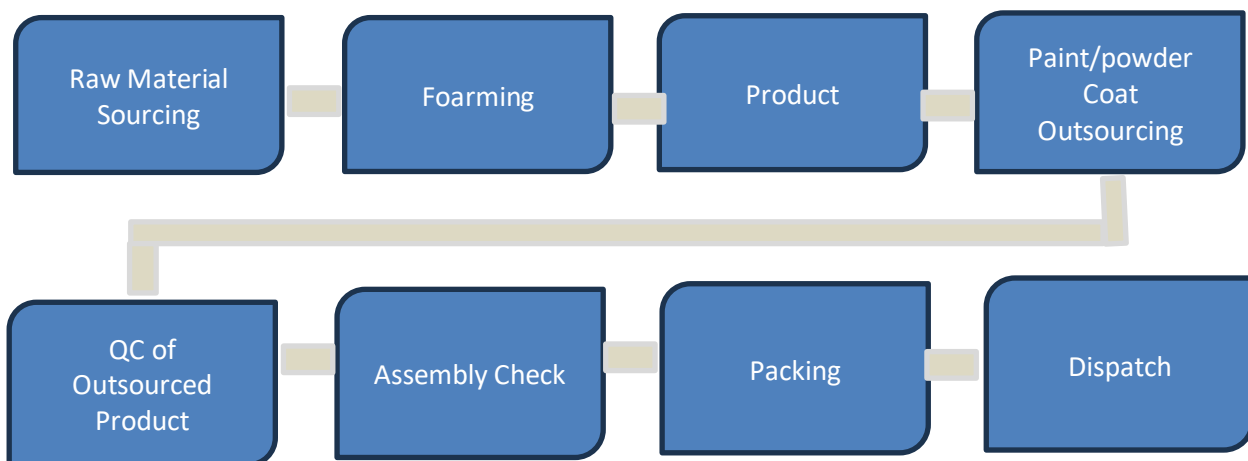

Courier movement is undertaken for smaller units whereas full stores or shop in shops we send dedicated vehicles. Our large customers require a consolidated billing for the logistics payments incurred towards their projects. The logistic is carried out in two methods: a. Full truck load and b. Courier Services.

We use outside agencies for both courier movement as well as full truck movements to meet the logistic requirements of our customers. Through Accurate Logistics, a HUF firm controlled and owned by one of our KMP. We consolidate all full truck load and bill to our customers. A margin of 7%-8% is kept over and above the actual cost paid to third party logistic provider in the related party to meet the staff cost and administrative cost at the related party and also part of his compensation.

11. Installation and deployment.

Retail stores are usually fitted and installed on site using in house teams. The team does a pre-recce of the site to evaluate conditions. Small stores are fitted out using a team of 2 to 3 people with carpenter/ fitter / electrician combination. Whereas mega stores require much larger teams and a dedicated project supervisor is deployed on site for the period. If any, snags are identified jointly by the client and installation team, they are rectified before the handover.

MANUFACTURING PROCESS FOLLOWED AT OUR PROGULF WAREHOUSING SOLUTIONS LLP:

1. Inquiry Generation

We have an active client servicing and marketing department who are in touch with potential and existing customers. Leads are generated by our continuous interactions with them.

Interested potential customers are invited to visit our facilities and to take a look at our infrastructure along with systems and processes which ensure a high quality product.

2. Recce and simulation drawings

Post the inquiry, our team visits the warehouse location / refers to architectural drawings of the space and creates the elevation and plan of the proposed warehouse system.

This is sent to the customer for approval and any fine tuning needed is carried out

3. Costing and commercials and Job Processing.

Basis the drawing approval, the Project team will determine the material and process costing to arrive at a quotation. This is usually sent to the procurement department for negotiations and cost closure. Post this, usually a purchase order is generated for the job

4. Manufacturing:

Warehousing systems consist of multiple width options for beams and uprights. We have several dies ready for these which are using in the roll forming machines- these convert rolls of metal sheets into beams and uprights by pressing them through

the rollers.

The requisite width of raw material is bought as coils. These are loaded onto decoiler which is then fed into the straightening machine. This is followed by the punching machine for creating slots for connector and beam fitment. This is then fed online into the forming machines on one side and after passing through multiple rollers comes out in the requisite shape. These are then cut off as per the required length.

5. Connectors are welded to the uprights as needed

The uprights and beams are then finished and dispatched to the locations along with other connectors and outsourced parts.

6. Quality Check for dimension and finishing carried out

Before the product is sent for dispatch, we have a system of checking for the finishing and dimensions as per order placed. In case of mismatch, the same is withheld from dispatch.

7. Installation

The team visits the site and completes the installation as per the layout plan drawings approved.

Our Competitive Strengths:

Diversified Product Range

The company has over the years developed a diverse product range with an ability to produce customized products at scale to meet the stringent and growing needs of its clients. It has further developed products which can be made using the same processes but for a very different purpose. This includes products and solutions catering to industrial uses in the form of institutional furniture, engineering items, noise barriers and PSD. With advent of e-commerce and quick delivery reaching out to customers has been possible through very systematic warehouses – an opportunity which we have been able to identify in time and take advantage of the same. This derisks the company from concentration risk, from sector, from client and from any

adverse situation.

Strong Quality Control and Ethical Business practices

The company caters to some of the marquee retail powerhouses in India who have very stringent requirements for quality, finishing and timely delivery. They also have been expanding at a fast-paced growth across geographies further requiring us to strengthen our supply chain management. The company has a dedicated quality control department which assesses quality at every level. It is majorly divided in 3 main parts; all raw materials once they reach the factory are only cleared further for manufacturing once the quality control department gives a go ahead, further there are quality checks when the products are in process of manufacturing and finally the finished products are checked by the quality control department and only dispatched after receiving confirmation from them. Further, the company also has the prestigious SEDEX certification which is an audit of ethical standards followed by the company towards its supply chain.

Versatile and Multiple Manufacturing facilities

We have three manufacturing plants in Vasai, Maharashtra to cater to the retailing, industrial and infrastructure sectors. Both the plants are well equipped with high end machinery and tools for manufacturing multi material products having a combination of wood, metal and plastic. Further, we also have professional printing machines by which we provide the final products to our customers. Our plants are equipped to produce at mass levels based on customized requirements. We have a strong array of machinery for cutting, bending and designing with mixing and matching different materials and in-house painting for durability and quality product manufacturing.

Long term relationship with Key customers

We have always believed in maintaining good relations with our customers by providing quality products and services. This is the reason that we have a loyal customer base comprising of large companies in the retail, commercial and residential sectors who help us in our growth. We constantly work on these relationships for growing and sustaining our business.

We do not have a brand under which we sell our product and all that we produce are bespoke products. We have over the years mastered the art of customization in volumes and that is why we are preferred vendors to our clients and get repeat business from them. Our brand has been built with our customers over the years based on our timely delivery of required products, getting the same erected and implemented at the anointed location to meet stiff deadlines of meeting seasonal requirements and meeting strict opening ceremony deadlines.

Experienced Management Team

Our promoters bring in diverse expertise and have developed a core competence in preferred areas. They also share this knowledge and expertise amongst themselves hugely benefitting the company in numerous ways. They have been instrumental in developing skills of our employees and creating intellectual depth. New product development, supply chain management, innovation in use of materials, identifying new areas of business, cost management and client relationship have been some of the strong areas for the management collectively.

Strategies

Research and Development

We have developed innovative products such as platform screen doors, etc. Such innovative products have helped us in growth of our business. In future we would like to continue to do research and development in the infrastructure and retail business verticals which we believe are essential for our growth in future. We shall continue to identify new sectors for collaboration

Expand our operations in the domestic market

Currently we operate at an all-India level in terms of implementation of projects and supply of materials, however, our manufacturing base is based out of the western part of the country. For deeper penetration across the country, we wish to have marketing and implementation teams across different areas in the country.

Usage of Robotics in our manufacturing process to have better finishing in our products

We aspire to incorporate co-existence of robots and humans in our facilities. The mundane and repetitive jobs to be transferred

to robots and the innovation and flexibility in technology and product development to be taken care of by the humans. Collaborative Robots (Cobots): Designed to work alongside humans, cobots are gaining popularity in small and medium-sized enterprises (SMEs) due to their ease of use, flexibility, and safety features.

Use of Automation in processes

We wish to explore the intelligent process automation (IPA) in our processes to improve accuracy, quality, and reliability of those processes, helping our company to operate with greater agility so that we can be more flexible and adaptable to shifting business and market priorities. Post the implementation of IPA into process technology can play a key role in reducing costs across business operations.

Collaboration with eligible and strong partners for B2G business

We seek collaboration with eligible partners working in the metro station atrucnd infrastructure space. We are confident to be able to scale up our operations for mass production of the sophisticated platform screen doors and noise barriers but we would need a partner to be eligible to supply the same to various metro stations. Also, we are directly dealing with corporates both domestic and MNC for our existing product portfolio. We would require to maneuver the tender space through collaboration.

Marketing**For New Clients:**

When we identify potential opportunities through media or industry sources about new brand launches in the offline retail space, we target key contacts within the project or procurement departments. After identifying these key individuals, we share our company profile and invite them for a factory visit. During this visit, clients can observe our in-house processes necessary for a retail launch. Typically, after the visit, clients send an RFQ (Request for Quotation) for their new projects, which includes drawings and design intentions for their fixtures and furniture.

We evaluate clients based on three key parameters: the size of their annual business, the nature of the project, and their future growth potential. Once evaluated, we prepare a cost sheet, and the director, along with the client servicing team, finalizes the offer. Negotiations may take place through direct communication or, in some cases, through online auctions. After a deal is

secured, we maintain regular contact with the client to ensure we are considered for future inquiries.

For Regular Clients:

Our directors and client servicing teams stay in continuous contact with clients via meetings, calls, and WhatsApp groups. The status of ongoing projects is monitored daily or weekly, with office visits for reviews when necessary. We are frequently assigned new projects, as we have pre-approved fixed rates for several items and adhere to set quality standards. For new designs or additional fixtures, we create prototypes, which are then approved either during a visit to our factory or by presenting them to senior management at the client's office. Upon approval, rates are negotiated with procurement.

For POSM Clients (Beauty and FMCG):

For beauty and FMCG clients requiring Point of Sale Materials (POSM), brand managers and merchandising executives typically reach out to us with briefs. Our design team collaborates closely with their brand teams to create detailed 3D mock-ups of displays. This process is followed by ongoing interaction through the prototype stage, commercial negotiations, and deployment. We aim to establish strong relationships with clients engaged in ongoing retail rollouts, and our directors maintain regular communication with the brand teams.

Direct Inquiries:

Occasionally, we receive inquiries directly from new clients. These clients either recognize us as industry leaders or are referred to us by existing clients. In some cases, the person reaching out has worked with us previously and is now with a new company, leading them to contact us for their current needs.

Intellectual Property

Our company does not have any intellectual property as on the date of filing of Prospectus.

Competition

Our business is competitive in all the verticals we operate. In retail, even though there are other companies manufacturing same or similar products, there are only a few large national experienced players who are preferred by larger corporates. These include Shark Shopfits, Disha Retail and Naman Instore Limited. While the competition will exist, we believe that the complexity and customization required in this industry will remain high in India in the coming years and prove to be a

reasonable barrier to entry for smaller players. Moreover we see some international players entering the market but given the long import timelines in this industry we would be better equipped to handle the requirements.

Therefore, our company has strategized to improve production capabilities and efficiencies to improve quality and delivery time. Also focus on innovative products as well as increase the number of products it offers to have better margins.

Insurance

We hold insurance coverage for different aspects such as furniture and fixtures and plant & machinery, stock, finished inventory as needed. We are confident that we have all essential insurance policies in place, aligned with industry norms. Regular reviews are conducted to ensure the adequacy of coverage. While we strive to minimize liability for damages, it's important to note that our insurance may not always provide full protection or be enforceable in every situation, potentially leaving us partially liable for damages. The policies are as under:

Sr. No.	Insurance	Type of Policy	Sum Insured (Rs. in Lakhs)	Validity
1	The Oriental Insurance Company Limited	Oriental Bharat Laghu Udyam Suraksha Policy	1,606.50	October 28, 2025

IT Systems for Warehouse management

The company uses Tally Prime to maintain their warehouse management. This comes with multi user package and inventory management built in to facilitate the smooth accounts/ book keeping for the company.

Corporate Social Responsibility

Under Indian law, we shall be required to form a corporate social responsibility (“CSR”) committee and spend, in each financial year, at least 2% (as per Section 135 of the Companies Act, 2013) of our average net profits generated during the three preceding financial years towards specified CSR activities.

In Fiscal Year 2025, we plan to spend on CSR on activities which include building Infrastructure/ School for training, skill development and education, promoting health care including preventive health care and sanitation including contribution to the Swach Bharat Kosh set up by the Central Government for the promotion of sanitation and making available safe drinking water.

MULTIPLE APPLICATIONS

An Applicant should submit only one Application (and not more than one). Two or more Applications will be deemed to be multiple Applications if the sole or First Applicant is one and the same.

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

In cases where there are more than 20 (Twenty) valid applications having a common address, such shares will be kept in abeyance, post allotment and released on confirmation of "know your client" norms by the depositories. The Company reserves the right to reject, in its absolute discretion, all or any multiple Applications in any or all categories.

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

India's current FDI Policy issued by the DPIIT with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT till October 15, 2020. All the press notes, press releases, clarifications on FDI issued by DPIIT till October 15, 2020 stand rescinded as on October 15, 2020. In terms of the FDI Policy, Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments.

The FDI Policy issued by the DPIIT permits foreign investment upto 100% of paid-up equity share capital of non-banking financial companies under the automatic route subject to compliance of certain conditions mentioned in the FDI Policy. The Company will be required to make certain filings with the RBI after the completion of the Issue.

In accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the FDI Policy and the Foreign Exchange Management (Non-debt Instruments) Rules, 2019. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India.

Further, the existing individual and aggregate investment limits for an FPI in our Company are not exceeding 10% of the total paid-up Equity Share capital of our Company for each FPI and the total holdings of all FPIs in the Company shall not exceed 24% of the total paid-up Equity Share capital of our Company. The RBI, in exercise of its power under the FEMA, has also notified Foreign Exchange Management (Non-debt Instruments) Rules, 2019 ("Rules") and Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India. SEBI registered FPIs have been permitted to purchase shares of an Indian company through the Issue, subject to total FPI investment being within the individual FPI/sub account investment limit of less than 10% of the total paid-up equity capital on a fully diluted basis of the Company subject to the total holdings of all FPIs/sub accounts including any other direct and indirect foreign investments in the Company shall not exceed 24% of the paid-up equity capital of the Company on a fully diluted basis. The aggregate limit of 24% in case of FPIs may be increased up to the sectoral cap/statutory ceiling, as applicable, by the Company concerned by passing of resolution by the Board of the Company to that effect and by passing of a special resolution to that effect by its Shareholders.

With effect from April 1, 2020, the aggregate limit of 24% has increased to the sectoral cap applicable to the Indian Company which in case of the Company is 100% provided that the Company complies with conditions provided under

the FDI Policy. As per the Rules, the aggregate limit as provided above was permitted to be decreased by the Company to a lower threshold limit of 24% or 49% or 74% as deemed fit, with the approval of its Board of Directors through a resolution and also of its shareholders by means of a special resolution, before March 31, 2020. The Company has not passed such Board Resolution and hence, has not revised its sectoral caps. Further, eligible NRIs and OCIs investing on repatriation basis are subject to individual investment limit of 5% of the total paid-up equity capital on a fully diluted basis subject to the aggregate paid-value of the shares purchased by all NRIs and OCIs put together on repatriation basis not exceeding 10% of the total paid-up equity capital on a fully diluted basis of the Company.

The transfer of shares between an Indian resident and a Non-resident does not require the prior approval of the RBI, subject to fulfillment of certain conditions as specified by DIPP / RBI, from time to time. Such conditions include (i) the activities of the investee company are under the automatic route under the foreign direct investment (“FDI”) Policy and the non-resident shareholding is within the sectoral limits under the FDI policy; (ii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI and such other conditions as provided in the FDI Policy from time to time. For the avoidance of doubt, the term ‘U.S. QIBs’ does not refer to a category of institutional investors defined under applicable Indian regulations and referred to in this Prospectus as ‘QIBs’.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Applications may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.
